EXECUTIVE COMMITTEE

The articles in volumes one and two were published in fascicules from 1954 onwards, the dates of publication of the individual fascicules being:

1954:	fascs. 1-3,	vol. i, pp.	1-192
1955:	fascs. 4,	vol. i, pp.	193-256
1956:	fascs. 5-7,	vol. i, pp.	257-448
1957:	fascs. 8-10,	vol. i, pp.	449-640
1958:	fascs. 11-14,	vol. i, pp.	641-896
1959:	fascs. 15-19,	vol. i, pp.	897-1216
1960:	fascs. 20-23,	vol. i, pp.	1217-1359, vol. ii, pp. 1-64
1961:	fascs. 24-26,	vol. ii, pp.	65-256
1962:	fascs. 27-29,	vol. ii, pp.	257-448
1963:	fascs. 30-34,	vol. ii, pp.	449-768
1964:	fascs. 35-37,	vol. ii, pp.	769-960
1965:	fascs. 38-40,	vol. ii, pp.	961-1146

First impression 1965
Second impression 1970
Third impression 1983

ISBN 90 04 07026 5

PRINTED IN THE NETHERLANDS

AUTHORS OF ARTICLES IN VOLUMES ONE AND TWO

For the benefit of readers who may wish to follow up an individual contributor's articles, the Editors have decided to place after each contributor's name the numbers of the pages on which his signature appears. Academic but not other addresses are given (for a retired scholar, the place of his last known academic appointment). The following is a consolidated list and index of authors for the first two volumes of the *Encyclopaedia.*

In this list, names in square brackets are those of authors of articles reprinted or revised from the first edition of this Encyclopaedia or from the *Shorter Encyclopaedia of Islam.* An asterisk after the name of the author in the text denotes an article reprinted from the first edition which has been brought up to date by the Editorial Committee; where an article has been revised by a second author his name appears in the text within square brackets after the name of the original author.

M. ABDUL HAI, University of Dacca. i, 1167.
H. H. ABDUL WAHAB, Tunis. i, 24, 207, 309, 863.
Mrs FEVZIYE ABDULLAH-TANSEL, University of Istanbul. ii, 683.
A. ABEL, Université Libre, Brussels. i, 923, 1055, 1277; ii, 59, 71, 77, 126, 128, 131, 199.
A. ADAM, University of Aix-Marseilles. i, 506, 978; ii, 117, 727.
the late A. ADNAN ADIVAR, Istanbul. i, 393.
AZIZ AHMAD, University of Toronto. ii, 297, 421, 437, 1077.
M. MÜNIR AKTEPE, University of Istanbul. ii, 713, 714.
ÖMER FARUK AKÜN, University of Istanbul. ii, 924.
P. ALEXANDRE, École des Langues Orientales, Paris. ii, 10, 63.
F. R. ALLCHIN, University of Cambridge. i, 857, 1010.
Miss GÜNAY ALPAY, University of Istanbul. ii, 997, 1043, 1138.
H. W. ALTER, Dhahran. ii, 109, 569.
G. C. ANAWATI, Cairo. ii, 755, 837.
R. ANHEGGER, Istanbul. i, 175, 184, 481.
A. S. BAZMEE ANSARI, Central Institute of Islamic Research, Karachi. i, 431, 433, 702, 808, 809, 813, 822, 828, 856, 859, 952, 954, 957, 958, 970, 1005, 1012, 1018, 1020, 1022, 1023, 1043, 1053, 1137, 1161, 1166, 1192, 1193, 1194, 1196, 1197, 1202, 1203, 1210, 1219, 1254, 1300, 1330, 1331, 1348; ii, 29, 31, 47, 104, 132, 138, 140, 187, 189, 255, 276, 317, 337, 372, 379, 381, 392, 489, 491, 494, 501, 504, 523, 558, 598, 602, 609, 736, 797, 809, 814, 837, 869, 870, 872, 974, 1004, 1046, 1092, 1093, 1123, 1131, 1135.
W. ʿARAFAT, University of London. i, 1078, 1215, 1241, 1313; ii, 592.
the late R. R. ARAT, University of Istanbul. i, 1038; ii, 69.
A. J. ARBERRY, University of Cambridge. i, 1089; ii, 600.
[C. VAN ARENDONK, Leiden]. i, 258.
R. ARNALDEZ, University of Lyons. ii, 767, 775.
E. ASHTOR, Hebrew University, Jerusalem. i, 1128.
M. R. AL-ASSOUAD, Paris. ii, 245.
J. AUBIN, École pratique des Hautes Études, Paris. i, 148.
G. AWAD, Baghdad. i, 423, 846, 866, 990, 1038.
D. AYALON, Hebrew University, Jerusalem. i, 442, 444, 445, 446, 732, 765, 945, 947, 1061, 1325; ii, 24, 172, 357, 421, 955.
A. M. A. AZEEZ, Zahira College, Colombo. ii, 28.
FR. BABINGER, University of Munich. i, 97, 295, 309, 707, 739, 768, 790, 826, 993; ii, 203, 292.
F. BAJRAKTAREVIĆ, University of Belgrade. i, 131.
J. M. S. BALJON Jr., University of Groningen. i, 288.
Ö. L. BARKAN, University of Istanbul. ii, 83.
[W. BARTHOLD, Leningrad]. i, 47, 71, 91, 102, 135, 241, 278, 312, 320, 354, 419, 421, 423, 425, 453, 508, 735, 750, 767, 839, 855, 857, 987, 993, 1002, 1010, 1011, 1028, 1033, 1106, 1130, 1134, 1135, 1139, 1188, 1296, 1311, 1312, 1338, 1343; ii, 3, 4, 19, 61, 89, 607, 622, 778, 793, 976, 978, 1043, 1118.
[H. BASSET, Rabat]. i, 689.
[R. BASSET, Algiers]. i, 50, 1179, 1187, 1315.
A. BAUSANI, Istituto Universitario Orientale, Naples. i, 304, 835, 847, 912, 918; ii, 397, 758, 784, 866, 971, 1001, 1036.
M. CAVID BAYSUN, University of Istanbul. i, 63, 291; ii, 210, 420, 490, 713.
L. BAZIN, École des Langues Orientales, Paris. i, 1159.
S. DE BEAURECUEIL, University of Kabul. i, 516.
[C. H. BECKER, Berlin]. i, 9, 42, 52, 126, 729, 736, 788, 845, 870, 933, 938, 945, 972, 1016, 1043; ii, 103.
C. F. BECKINGHAM, University of London. i, 95, 106, 719, 929, 933, 1038, 1043, 1280, 1283; ii, 57, 522, 788, 1121.
A. F. L. BEESTON, University of Oxford. i, 103; ii, 895.
[A. BEL, Tlemcen]. i, 122, 123, 155.

P. 535ᵇ, **DJIBŪTĪ**, *after the third paragraph, ending* of the majority., *insert the following paragraph, omitted in error in the English edition*:

D̲j̲ibūtī is the administrative centre of a region misleadingly called "Côte Française des Somalis", "French Somaliland": in fact more than three-quarters of its area (*ca.* 23,000 sq. km.) and of its coast belong to the ʿAfar, while less than a quarter belongs to the Somalis. It is a desert region, with practically no agriculture. Outside the capital, the population is almost entirely nomadic; all the inhabitants are Muslim. Besides the ʿAfar (numbering some 25,000), it contains the subjects of four "sultanates": the whole of Tadjoura (Tad̲j̲urra, in ʿAfar Tagorri) and Gobaʿad, the majority of Raḥayto, and a small part of Awsa. The ʿAfar (called by the Arabs Danāḳil [*q.v.*]) form a relatively organized population, with a firmly hierarchical social structure, divided into regional 'commands' ruled by hereditary chiefs and based on a family and tribal organization. Among the Somalis, the only autochthonous tribe is that of the ʿĪse, nine-tenths of whom in any case belong to Somalia or to Ethiopia. This tribe is unusually anarchical, having no true chiefs: the *ugās*, who lives in Ethiopia, has no effective power; a minimum of authority is exercised by councils of elders, who dispense justice. The ʿĪse groups which normally wander throughout the country during part of the year total about 6000 individuals. They belong mainly to the sub-tribes Rēr Mūse, Ūrweyne, Fūrlabe, Horrōne and Mammāsan.

[Shortly before this article by Dr Shahîd was published, the editors interpolated a note communicated to them by another scholar, which introduced a newly-discovered inscription from a Ghassānid building. Dr Shahîd has now pointed out to them that this note on buildings deals with an aspect of the subject which he had discussed in articles listed in his Bibliography and which he had therefore decided not to treat in detail in the body of the article; the insertion of the note might give the impression that the editors had thought that the part allotted to Ghassānid buildings was insufficient. The editors readily express their regret if any such misunderstanding has occurred and take this opportunity of mentioning that Dr Shahîd is at present engaged on a book on Arab-Byzantine relations before the rise of Islam which will include a comprehensive chapter on Ghassanid structures.]

CADIZ [see ḲĀDIS]

CAESAREA [see ḲAYSARIYYA, KAYSERI, SHARSHAL]

ČAGHĀNIYĀN (Arabic rendering: Ṣaghāniyān). In the early Middle Ages this was the name given to the district of the Čaghān-Rūd [*q.v.*] valley. This river is the northernmost tributary of the river Āmū-Daryā [*q.v.*]. The district lies to the north of the town of Tirmidh [*q.v.*], the area of which, however, (including Čamangān) did not form part of Čaghāniyān either politically or administratively (Ibn Khurradādhbih, 39). Wē/aishagirt (= Fayḍābād) was regarded as the boundary with the district of Khuttalān ([*q.v.*]; between the rivers Pandj and Wakhsh). Incidentally, the area around Ḳabādiyān (Ḳuwādiyān; [*q.v.*]) to the south-east, has frequently been regarded as an independent district.

The region had a pleasant climate, good water supplies, good soil, and corresponding agriculture. Its peasants, however, were considered lazy, thus a considerable number of poor (*darwishān*) were to be found in Čaghāniyān, and the area was sparsely populated. The capital was also called Čaghāniyān (the derivation by Markwart, Wehrot 93, from the Mongol *čaghan* 'white' is surely wrong). It was situated on the side of a hill where there was running water. The population of the town was also regarded as poor and ill-educated, and despite its greater size, it was soon overshadowed by Tirmidh (Iṣṭakhrī, 298; *Ḥudūd al-ʿĀlam*, 114, no. 25 and no. 27, also *ibid.*, 63, 119, 198; Samʿānī 352 v). Round the year 985, the taxes were 48,529 dirhams (Muḳaddasī, 283, 290). Other known places in the district were Bārangī and Dārzangī. *Maps* of the area: *Ḥudūd al-ʿĀlam*, 339, and Le Strange, map ix.

History: In the 5th and 6th centuries, Čaghāniyān was one of main Hephthalite (see HAYṬAL) areas and was under Buddhist influence. Even in the 4th/10th century it was considered a border region against the 'Kumēdjī', who are regarded as remnants of the Hephthalites (Bayhaḳī, ed. Morley, 499, 576, 611, 696; and also Markwart, *Wehrot* 93 f., with further data), though they may also have belonged to the Saks (*Ḥudūd al-ʿĀlam*, 363). In Sāsānid times, it was ruled by its own dynasty with the title Čaghān-Khudāt (Ṭabarī, ii, 1596). In 31/651, its troops took part in Yazdagird III's fight against the attacking Arabs. Some of them (prisoners ?) could be found in Baṣra around 59/678 (Balādhurī, ed. De Goeje, 419 f. = ed. Cairo 1901, 413; Spuler, *Iran*, 19). In 86/705 the Čaghān-Khudāt submitted to Ḳutayba b. Muslim [*q.v.*], who had conquered Transoxania for the Muslims. Thus Čaghāniyān became part of an Islamic region, and accepted its culture from Balkh rather than from Bukhārā and Samarḳand (*Ṭabarī*, ii, 1180; Dīnawarī, *Akhbār*, 330; Spuler, *Iran*, 29 and note 6; H. A. R. Gibb, *Arab Conquests in Central Asia*, 1923, 32 (Turkish ed., 28); Gh. H. Sadighi, *Les mouvements relig. iraniens*, 1938, 24 f.). In 119-121/737-9, the inhabitants fought on the side of the Arabs against the western Turks, their allies, and Sughd refugees (Ṭabarī, ii, 1596; Ind., p. 735; Barthold, *Turkestan*, 191; B. G. Gafurov, *Ist. Tadžikskogo Naroda*, i, 1949, 147). They took part in the civil war between the Umayyads and ʿAbbāsids (Ṭabari. ii, 1423, 1767); in 191-195/806-10, in the rising of Rāfiʿ b. Layth against the ʿAbbāsids (Yaʿḳūbī, *Hist. Isl.*, 1883, ii, 528), and in 323/934, followed for a short time a certain 'False Prophet' Mahdī (name? title?) (Gardīzī, 37 f.). Abū ʿAlī (see ILYĀSIDS), who ruled over this district as well as over Tirmidh and Shūman and Kharūn further east, had come here for purposes of defence in 337/948, after he had been deposed as governor of Khurāsān. He is described as a member of the Muḥtādj dynasty. It is not evident whether there was a link between this house and the Čaghān-Khudāt. When he became governor of Khurāsān once more in 341/952, he passed the rule of Čaghāniyān on to his son. Deposed again in 343/954, he was buried in Čaghāniyān (Radab-Shaʿbān 344/Nov. 955) (Ibn Ḥawḳal 401; Muḳaddasī 337; Gardīzī 36 f.; Yāḳūt, *Learned Men* (Gibb Mem. Ser. VI), i, 143; Barthold, *Turkestan*, 233, 247/49; Spuler, *Iran*, 97).

Towards the end of the 4th/10th century, a lengthy war broke out between the *amīr* of Čaghāniyān (who ranked as one of the *Mulūk al-aṭrāf*), the rulers of Gōzgān (Djūzdjān; [*q.v.*]), and other candidates (Narshakhī, 157; further information in Barthold, *Turkestan*, 254; Minorsky in *Ḥudūd al-ʿĀlam*, 178, with further data). It ended in 390/999, when Čaghāniyān came under Ḳarakhānid rule. In 416/1025, the district joined Maḥmūd of Ghazna, and in 426/1035, it repelled Ḳarakhānid attempts to recover it with the assistance of the Ghaznawids (Bayhaḳī, ed. Morley, 82, 98, 255, 575 f., 611, 616 [see ḲARĀKHĀNIDS]). Finally, Čaghāniyān came under Saldjūḳ rule in 451/1059. They suppressed a rising in 457/1064 (Ibn al-Athīr, ed. Tornberg, x, 22). By *ca.* 561/1165, the Ḳarakhānids (who were subject to the Ḳara Khitāy) had once again achieved a position of great influence (al-Kātib al-Samarḳandī, in Barthold, *Turk. russ.*, i, 71 f.). Around the years 570-571/1174-75, the country came under the rule of the Ghūrids (Djūzdjānī, *Ṭabaḳāt*, 423-6).

The district is not mentioned during the time of the Mongol conquests; and subsequently it is hardly found in Mongol sources. In the 7th/13th century, Čaghāniyān belonged to the Čaghatāy empire, and the Transoxanian Khān Baraḳ (generally called Burāḳ [*q.v.*] by the Muslims) had the centre of his empire here in 663-670/1264-71. In Tīmūr's time, the place-name *Dih-i naw* (now: *Dēnaw*) is mentioned (Sharaf

al-Dīn Yazdī, ed. Iláhdád, 1885, i, 124), and this appears to be on the site of the ancient town of Čag̲h̲āniyān (thus Barthold, *Turkestan*, 72; Markwart, *Wehrot*, 93). There is mention of Čag̲h̲āniyān on only one further occasion, in the *Bābur-nāma* (ed. Beveridge, 1905, index), where it is probably a historical reminiscence. Apparently no mediaeval ruins have survived in Čag̲h̲āniyān, and the old settlements have vanished. Today the district belongs to the Özbek SSR, and the Özbek language has supplanted the old Iranian. The regions to the east of the Kāfirnahān river, however, together with Ḳabādiyān, belong to the Tād̲j̲īk language area and to the Tād̲j̲īk SSR.

Bibliography: W. Barthold, *Turkestan*, index; Le Strange, 435-40; J. Markwart, *Wehrot und Arang*, 1938, index; *Ḥudūd al-ʿĀlam*, index; B. Spuler, *Iran*, index. (B. Spuler)

ČAG̲H̲ĀN-RŪD (Čag̲h̲ān-Rōd̲h̲), the seventh and last tributary on the right of the river Āmū-Daryā [*q.v.*]. It comes from the Buttam mountains, to the north of Čag̲h̲āniyān [*q.v.*], flows past that town and several smaller places, and finally into the Āmū-Daryā above Tirmid̲h̲. The river is called by this name only in the *Ḥudūd al-ʿĀlam*, (71, no. 11, p. 363), and in S̲h̲araf al-Dīn ʿAlī Yazdī, *Ẓafar-nāma* (ed. Iláhdád), 1885, i, 196 (= translation by F. Pétis de la Croix, i, 183). Muḳaddasī, 22, calls it "river of Čag̲h̲āniyān", and distinguishes it from the Kāfirnihān, the 6th tributary (further to the east) of the Āmū-Daryā. Ibn Rusta, (*BGA* vii, 93), on the other hand, gets the two rivers, their sources, and their tributaries mixed up; he calls the Čag̲h̲ān-Rūd: Zāmi/Zamul. Today, the upper part of the river is known as Ḳara Ṭag̲h̲ Daryā, and from Dih-i naw (Dēnaw = Čag̲h̲āniyān) onwards: Surk̲h̲ān.

Bibliography: Le Strange, 436, 440; W. Barthold, *Turkestan*, 72; J. Markwart, *Wehrot und Arang*, 1938, 89-94 (he attempts a classification of the pre-Islamic Iranian sources); B. Spuler, *Der Āmū-Darjā*, 234 (in *Jean Deny Armağanı*, Ankara 1958, 231-48); Brockhaus-Efron, *Enciklop. Slovaŕ* xxxii/1 (= 63), St. Petersburg 1901, 109; *Bol'shaya Sovetskaya Éntsiklop*[2]. 41, (1956) 315. (B. Spuler)

ČAG̲H̲ATAY K̲H̲ĀN, founder of the Čag̲h̲atay K̲h̲anate [*q.v.*], the second son of Čingiz-K̲h̲ān and his chief wife Börte Fud̲j̲in. Already in his father's lifetime he was regarded as the greatest authority on the *Yasa* (the tribal laws of the Mongols as codified by Čingiz-K̲h̲ān). Like his brothers he took part in his father's campaigns against China (1211-1216) and against the kingdom of the K̲h̲ʷārizm-S̲h̲āh (1219-1224). Urgānd̲j̲, the latter's capital, was besieged by the three princes D̲j̲oči, Čag̲h̲atay and Ögedey and taken in Ṣafar 618/27th March-24th April 1221. In the same year Čag̲h̲atay's eldest son Mö'etüken was slain before Bāmiyān. After the battle on the Indus (according to Nasawī, transl. Houdas, 83, on Wednesday 7 S̲h̲awwāl 618, probably 24 November 1221) Čag̲h̲atay was entrusted with operations against Sulṭān D̲j̲alāl al-Dīn K̲h̲ʷārizm-S̲h̲āh and spent the winter of 1221-1222 in India. During Čingiz-K̲h̲ān's final campaign against the Tangut (1225-1227) he remained in Mongolia in command of the forces left behind there.

After his father's death Čag̲h̲atay no longer took an active part in any of the campaigns. As the eldest surviving son of Čingiz-K̲h̲ān (his brother D̲j̲oči had predeceased his father) he enjoyed enormous prestige. In the year 1229 he presided with his uncle Otčigin over the *kuriltay* at which Ögedey was elected Great K̲h̲an: owing to his position as the recognized authority on the *yasa*, he exercised an influence to which even the Great K̲h̲ān Ögedey had to bow. He seems to have spent this period partly in Mongolia at his brother's court, partly in the territory allotted to him by Čingiz-K̲h̲ān, where he held his own court-camp. Like all the Mongol princes Čag̲h̲atay had separate camps (*ordu*) for winter and summer. His summer residence according to D̲j̲uwaynī was at some place on the Ili whilst his winter quarters were at Ḳuyas, probably to be identified with the Equius of William of Rubruck, near Almalig̲h̲, *i.e.*, in the region of the present-day Kulja. The residence of Čag̲h̲atay's successors is called Ulug̲h̲ Ef (in Turkish „Great House") by D̲j̲uwaynī and others.

Čaghatay had received from his father all the lands from the Uyg̲h̲ur territory in the east to Bukhārā and Samarḳand in the west: we must not however regard these lands as a single kingdom governed from the Ili valley and only indirectly subject to the Great K̲h̲ān. Everywhere, even in the Ili valley itself, the local dynasties who were there before the Mongols remained. On the relationship of these dynasties to the Mongol rulers we have no accurate information; we know equally little about what sovereign rights the court on the Ili could claim from the Great K̲h̲ān and his deputies. The settled lands of Central Asia were certainly not governed in the name of Čag̲h̲atay but in that of the Great K̲h̲ān. In the account of the suppression of the rebellion in Buk̲h̲ārā in 636/1238-1239 Čaghatay is not mentioned; the governor of Mā warāʾ al-Nahr at this period was Maḥmūd Yalavač, a K̲h̲ʷārizmī by birth, who had been appointed by the Great K̲h̲ān. Even the generals of the Mongol forces in Mā warāʾ al-Nahr were appointed by the Great K̲h̲ān. When, soon afterwards, Maḥmūd Yalavač was arbitrarily dismissed from his office by Čag̲h̲atay the latter was called to account by his brother and had to admit the illegality of his action. Ögedey was satisfied with this apology and granted the land to his brother as a fief (*ind̲j̲ü*); but the legal position of this territory was not thereby altered. During the last years of Ögedey's reign, as well as under Möngke, all settled areas from the Chinese frontier to Buk̲h̲ārā were governed by Masʿūd Beg, the son of Maḥmūd Yalavač, in the name of the Great K̲h̲ān.

It cannot be ascertained how far Čag̲h̲atay's Muslim minister Ḳuṭb al-Dīn Ḥabas̲h̲ ʿAmīd had a share in the administration of the country along with the representatives of the Great K̲h̲ān. According to Ras̲h̲īd al-Dīn this minister came from Otrar, according to D̲j̲amāl Ḳars̲h̲ī from Karmīna, and like many other Muslim dignitaries at this time had made his fortune among the Mongols as a merchant. He was on terms of such intimacy with the K̲h̲ān that each of Čag̲h̲atay's sons had one of Habas̲h̲ ʿAmīd's sons as a companion.

In general Čag̲h̲atay was not favourably inclined towards Islam. Among the infringements of Mongol law which he rigidly punished was the observance of certain prescriptions of Islam. Among the Mongols it was forbidden to slaughter an animal by cutting its throat, which is the method prescribed by the *s̲h̲arīʿa*; another law frequently broken by the Muslims at their ablutions was that which prohibited washing in running water. The cruel punishment which Čaghatay visited upon any such transgressions made his name hated among the Muslims.

According to Djuwaynī, Čaghatay survived his brother Ögedey, who died on 5 Djumādā II 639/11th December 1241 though only for a short period. On the other hand Rashīd al-Dīn states that he died seven months before Ögedey, *i.e.*, apparently in the beginning of May, 1241.

Bibliography: Djuwaynī-Boyle; Rashīd al-Dīn, *Djāmiʿ al-Tawārīkh*, ed. E. Blochet, Leiden 1911; V. V. Barthold, *Four Studies on the History of Central Asia*, Vol. i, transl. V. and T. Minorsky, Leiden 1956. (W. Barthold-[J. A. Boyle])

ČAGHATAY KHĀNATE. The Central Asian Khānate to which Čaghatay gave his name was really not founded till some decades after the Mongol prince's death. Čaghatay was succeeded by his grandson Ḳara-Hülegü, the son of Mö'etüken who fell at Bāmiyān. Ḳara-Hülegü had been designated as Čaghatay's heir both by Čingiz-Khān himself and by Ögedey; he was however deposed by the Great Khān Güyük (1241-1248) in favour of Yesü-Möngke, the fifth son of Čaghatay, with whom Güyük was on terms of personal friendship. In 1251 Yesü-Möngke was involved in the conspiracy against the Great Khān Möngke, who reinstated Kara-Hülegü and handed Yesü-Möngke over to him for execution. Ḳara-Hülegü however did not survive the homeward journey and the execution was carried out by his widow, Princess Orḳīna, who now ruled in her husband's stead, though her authority does not seem to have extended beyond the Ili valley. As appears from the narrative of William of Rubruck, the whole Empire was at this period divided between Möngke and Batu: Batu's portion was the whole area west of a line between the rivers Talas and Ču, east of which all territories were directly subject to the Great Khān. Masʿūd Beg [see the previous article], who enjoyed the confidence of both Khāns, was governor of all the settled areas between Besh-Balīgh and Khʷārizm.

With the death of the Great Khān Möngke in 1259 a different condition of things arose. During the struggle for supremacy between Ḳubilay and Arīgh Böke, the brothers of the late Khān, Alughu, a grandson of Čaghatay, agreed to take possession of Central Asia for Arīgh Böke and support him from that quarter against his enemies. He actually succeeded in bringing the whole of Central Asia under his sway, including areas such as Khʷārizm and the present-day Afghānistān which had never previously been numbered amongst the possessions of the House of Čaghatay. He had of course won these victories for himself and not for Arīgh Böke. He everywhere proclaimed himself as an independent ruler; and Arīgh Böke, who had tried to assert his rights, was finally forced to vacate this territory after some initial successes. Masʿūd Beg still remained the governor of the settled areas, now no longer in the name of the Great Khān but as the representative of Alughu.

Alughu may be regarded as the founder of an independent Mongol state in Central Asia: he enjoyed his success only for a brief period, as he died in 664/1265-1266. Mubārak-Shāh, the son of Kara-Hülegü and Orkīna, the first Čaghatay convert to Islam, was proclaimed Khān in March 1266. Already in the same year he was dethroned by his cousin Burāḳ (or rather Baraḳ) Khān [*q.v.*], the nominee of the Great Khān, who was soon however to become little more than a satellite of Ḳaydu [*q.v.*], now the real master of Central Asia. After Burāk's death in 1271 Ḳaydu appointed Nīkpāy, a grandson of Čaghatay, to succeed him; Nīkpāy was followed by Buḳa-Temür, another grandson of Čaghatay; and in 1282, Ḳaydu's choice fell upon Du'a, the son of Burāḳ. The faithful ally of Ḳaydu in all his wars against the Great Khān, Du'a defeated and deposed his son Čapar shortly before his own death in 1306 or 1307. The Čaghatay Khānate was from now on to remain in Du'a's family almost to the moment of its extinction, the throne being occupied, for longer or shorter periods, by six of his sons, of whom we need mention here only Esen-Buḳa (1309-1318), Kebek (1318-1326) and Tarmashirin (1326-1334).

It was some time before the Čaghatay Khanate received an independent organisation of its own. Djamāl Karshī's work, written in the reign of Čapar shows that affairs in Central Asia were in much the same condition even at this period, when there had long been a strong Mongol central government in China and Persia, as they had been in the early years of the Mongol conquest. The Mongols were apparently less under the influence of Islam and Muslim culture than in Persia and were able to preserve their own peculiar ways of life for a much longer period of time. Except in the Uyghur country Islam was everywhere the state religion by the time of the Mongol conquest, even in the Ili valley, although these areas had been little influenced by Arabo-Persian culture. The Mongol conquest, as Rubruck pointed out, was followed in these regions by an extension of the pasture lands at the expense of the towns and cultivated areas; at a later period urban life altogether disappeared under the influence of Mongol rule, except in Mā warā' al-Nahr and the present-day Sinkiang. The Muslim civilisation of Mā warā' al-Nahr naturally exercised some influence on the Mongols, particularly the rulers; but this influence was not strong enough to induce the mass of the people to change their mode of life. When the ruling family decided to settle in Mā warā' al-Nahr and break with the customs of the people, their action resulted in the complete separation of the eastern provinces.

Even the brief reign of Yesü-Möngke (1246-1251) appears to have been favourable to those who professed Islam. The chief minister then was a friend of the Khān's youth and a foster-son of Ḥabash ʿAmīd, Bahā' al-Dīn Marghīnānī, a descendant of the *Shuyūkh al-Islām* of Farghāna. As a patron of poets and scholars he is praised by his contemporary Djuwaynī, who was personally acquainted with him. Ḥabash ʿAmid, who was hated by the Khān as an adherent of Ḳara-Hülegü, owed his life to the intercession of Bahā' al-Dīn. Nevertheless, when Bahā' al-Dīn was involved in his master's downfall, he was handed over to his foster-father, who ordered his execution in the cruellest fashion.

Under Orḳīna, Ḥabash ʿAmīd again occupied the position he had held under Čaghatay; this princess however was favourably inclined to the Muslims; she is described by Waṣṣāf as a protectress of Islam and by Djamāl Karshī was even said to be a Muslim. Her son Mubārak-Shāh, raised to the throne in Mā warā' al-Nahr, certainly adopted Islam, as did his rival Burāḳ Khān some years later. The rule of Alughu seems to have been less favourable to the Muslims, and the events of the following years postponed for several decades the final victory of Muslim culture. Ḳaydu and Čapar, as well as Du'a and other princes, remained pagans and resided in the eastern provinces. In the reign of Esen-Buḳa the armies of the Great Khān penetrated deep into Central Asia and ravaged the winter and summer

residences of the Khān; the continuator of Rashīd al-Dīn in his account of these happenings says that the winter residence was in the region of the Issik-Kul, while the summer residence was on the Talas.

Esen-Buḳa's successor Kebek was the first to return to the settled lands of Mā warā' al-Nahr. Though he did not adopt Islam he is praised by Muslims as a just prince; he is said to have built or restored several towns; he also had built for himself a palace in the neighbourhood of Nakhshab, from which the town takes its modern name of Ḳarshī (from the Mongol word for "palace"). He introduced the silver coins afterwards called *Kebekī*, which may be considered the first independent coinage of the Čaghatay Khānate.

After two brief interregnums Kebek's brother Tarmashirin was raised to the throne. This Khān adopted Islam and took the name of ʿAlā' al-Dīn; the eastern provinces were entirely neglected by him and the nomads of those provinces rose against him as a violator of the *Yasa.* This rebellion appears to have taken place about 734/1333-1334; it was headed by Buzan, a nephew of the Khān, and resulted in Tarmashirin's flight and death. Buzan can have reigned only for a few months since he was succeeded in 1334 by Čangshi, another nephew of Tarmashirin. Statements of contemporary Christian missionaries show that the centre of the Khānate was now again transferred for a brief period to the Ili valley and Christians were allowed to propagate their religion unhindered and to build churches; it is even said that a 7-year old son of Čangshi was baptised with his father's consent and received the name of Johannes.

Some years later Nakhshab is mentioned again as the residence of the Čaghatay Khān. This was Ḳazan, who was descended, not like Du'a and his sons from Yesün-To'a, but from Büri, another son of Mö'etüken. Ḳazan fell in battle in 747/1346-1347 in the course of a struggle against the Turkish aristocracy, and with his death the rule of his house in Mā warā' al-Nahr came to an end. Till 1370, descendants of Čaghatay were placed on the throne by the Turkish amīrs as nominal rulers; in the time of Tīmūr these rulers were chosen from the family of Ögedey. Nevertheless under Tīmūr and his successors the nomad population of Mā warā' al-Nahr, who as a warrior caste enjoyed many privileges, were still as before called Čaghatay.

Bibliography: As in the article on Čaghatay. For genealogical tables of the House of Čaghatay, based on both the Chinese and the Persian sources, see Louis Hambis, *Le chapitre cvii du Yuan che*, Leiden 1945.

ČAGHATĀY LITERATURE [see TURKS]

ČAGHATĀY TURKISH [see TURKS]

ČAGHRĪ-BEG Dāwūd b. Mīkhā'īl b. Saldjūḳ was the brother of Ṭughrīl-Beg [*q.v.*], and the co-founder with him of the Saldjūḳid dynasty. The careers of both brothers were, for the most part, inextricably bound together. It is difficult to ascertain which was the elder brother. They seem to have been born about 380-385/990-995, and there is no evidence whether their family was already, or only later became, Muslim. Little is known about their life before the year 416/1025. They were orphaned at an early age, and must have been brought up, until they were about fifteen years old, by their grandfather Saldjūḳ, in the Djand region, during which time their uncle Arslan-Isrā'īl was fighting in the service of the last Sāmānids. After the death of the grandfather, ill-defined political reasons caused them to remove, with a section of their tribe, to the territory owned by a Ḳarakhānid who was, for a time, known under the title-name of Bughrā-Khān. Subsequently they quarrelled with him, and joined, without, however, combining their forces with his, their uncle, who was then in the service of a rival Ḳarakhānid, ʿAlī-Tegīn of Bukhārā. Tradition gives here an account of a highly improbable escapade of Čaghrī-Beg in Armenia. In 416/1025, the Saldjūḳids were involved in the defeat of ʿAlī-Tegīn by the combined forces of Maḥmūd of Ghazna and the supreme Ḳarakhānid, Ḳadir-Khān, whereupon Arslan-Isrā'īl, with his tribal group, had to settle in Ghazna territory. Ṭughrīl and Čaghrī, on the other hand, remained with ʿAlī-Tegīn, and then, after being involved in disagreements with him, possibly over the leadership of the tribe, transferred themselves to Khwārizm (between 421/1030 and 425/1034 ?). The threats of the Oghuz prince Shāh-Malik, the old enemy of their family, who had by then become master of Djand, forced upon them another displacement, and, as the Turcomans of the Ghazna territory had abandoned their Khurāsānian encampments as a result of disorders following the death of Mahmūd, Ṭughrīl and Čaghrī demanded, and then seized forcibly, from his successor, Masʿūd, the right to take their place. Although they had become the quasi-official concessionaries of the border plains to the north of western Khurāsān, they certainly did not show themselves to be well-behaved guests. Maʿsūd was at first unaware of the potential seriousness of what he believed to be mere local unrests, but even the town populations grew weary of paying taxes to the Ghaznawid without being safeguarded against the pillage of their countryside. The Saldjūḳids had, on the other hand, represented themselves to the Muslim aristocracy as faithful adherents of the orthodox religion, and a growing party, in Khurāsān, felt that it was advisable, by submitting to them, to divert elsewhere the depredations of their men. In 423/1036 Marw opened its gates to Čaghrī-Beg, who had the *Khuṭba* recited there in his name as autonomous prince. Soon Nishāpūr did the same for Ṭughrīl, and then, later, Čaghrī penetrated into Harāt and sent his kinsmen towards the Sīstān region. Maʿsūd reacted too late. His heavy armies wore themselves out physically and morally chasing an elusive enemy across the desert, and, in 431/1040, at Dandānḳān the Saldjūḳids defeated him beyond all hope of recovery.

The conquerors divided up their conquered territories, and, while Ṭughrīl went off to try his luck at fresh conquests in Iran, Čaghrī kept, in Khurāsān, the base of the young Saldjūḳid power. His career there has nothing to compare with the remarkable developments that followed that of his brother. During the first four years, he made complete his possession of Khurāsān by annexing, on the one hand, Balkh and then Tirmidh, and, on the other, Khwārizm, whose prince had been driven out by Shāh-Malik. In addition, a son of Čaghrī, Kavurt, acting in a more or less autonomous capacity, occupied Kirmān. But from then onwards, the chief military activity of Čaghrī's forces consisted in a difficult struggle against the Ghaznawids, who, in their mountain stronghold, and fortified with the resources found in their Indus provinces, resumed the war, sometimes with success. The intrigues of the Ghaznawids compromised, but for a very short time only, the relations of the Saldjūḳids with

the neighbouring Karakhānids. On their side, the Saldjūkids interfered in the internal quarrels of Ghazna, where Masʿūd's successor, Mawdūd, had married a daughter of Čaghrï, but where, against a successor of Mawdūd, the Saldjūkids encouraged the usurper Farrukhzād, only to find themselves soon afterwards at war with him also. Hostilities went on intermittently in the Balkh and the Sīstān districts, and in Sīstān the danger was for a while so grave that it became necessary to recall the Turcomans temporarily from Kirmān. Čaghrï was, by that time, old, and the conduct of operations fell in fact upon his son Alp-Arslan [*q.v.*]. Saldjūkids and Ghaznawids were forced to recognize that their power was about equal, and in 451/1060, Čaghrï and Ibrāhīm of Ghazna concluded a peace that remained virtually undisturbed by their successors. Some months later, Čaghrï died (at the beginning of 452/ end of 1060).

Practically nothing is known of Čaghrï-Beg's government. The chief of the plundering nomads became prince of a territory in which the traditional administration was continued or resumed. He gave himself the title of *Malik al-Mulūk*. A brother of the famous Ismāʿīlī writer Nāṣir-i Khusraw for a long time held a prominent position in the service of his vizir, but it would be impossible to conclude from this a heterodox orientation on the part of the sovereign. Nevertheless, the fact that neither Niẓām al-Mulk nor the authors of moral tales, nor the *dīwān*s of the poets, have preserved any noteworthy information about Čaghrï from the time that he was separated from his brother, gives the impression of a weaker personality and a rather passive political attitude, from a religious and all other points of view.

It is difficult even to obtain a clear assessment of Čaghrï's relations with his kinsfolk. After Dandākān, Sīstān appears to have been handed over to Mūsā Payghu (Yabghu ?), the uncle of Čaghrï and Ṭughrïl, but the power of the chiefs of this family seems to have been unstable, and in 446-448/1055-1057, hostilities arose between them and Yākūtī, one of Čaghrï's sons, who came, it is true, from Kirmān. It appears that from then onwards Čaghrï was considered in Sīstān as the suzerain over his young cousins. A more important question is that of the relations between Čaghrï and Ṭughrïl, holding in mind the successes that made the latter the protector of the Caliphate and the legally recognized master of the entire Muslim East. The only certainty is that the good relations between them were never belied. It seems that in Sīstān Čaghrï accepted Ṭughrïl's decisions. In any case, when in 450/1058-9, the revolt of Ibrāhīm Ināl constituted a grave threat to Ṭughrïl's sultanate, Tughrïl in part owed his preservation to the help brought to him by Alp-Arslan and Yākūtī. Relations between Čaghrï and Ṭughrïl must have been made easier by the fact that the latter was childless. Therefore when the Caliph wanted to form a marriage alliance with him, it was a daughter of Čaghrï that became the wife of al-Ḳāʾim. Čaghrï had married a Khwārizmian princess, who had already a son, Sulaymān. When his brother died, Ṭughrïl married her. It is not certain whether Alp-Arslan, who was to unite the two inheritances, had been selected for that fortune by the two ruling brothers, or whether, as Ṭughrïl's vizir declared, Sulaymān had been intended—at all events, the latter had played no role under either Čaghrï or Ṭughrïl.

Bibliography: A. Sources. On the origins there is little information available except through the *Malik-nāma*, which is lost but utilized by Ibn al-Athīr, ʿAlī b. Nāṣir (*Akhbār al-dawla al-Saldjūkiyya*, ed. Muḥ. Iḳbāl, Lahore 1933), Bar-Hebraeus (*Chronography*, ed. trans. Budge), and especially Mīrkhwānd. From the time of the entry into Khurāsān onwards, this source can be supplemented by the Ghazna historians, Bayhaḳī and Gardīzī (see also the analysis of the former by Kazimirski in his introduction to the *Dīwān* of Manūčihrī), and also by Ẓahīr al-Dīn Nīshāpūrī (now published by Djalāl-i Khāvar, Tehran 1953, making unnecessary the *Rāḥat al-Ṣudūr* of his embellisher Rāwandī). Sources are scanty for Čaghrï's autonomous period, the chief ones being Ibn al-Athīr and the *Akhbār*, supplemented locally by the *Taʾrīkh-i Bayhaḳ* of Ibn Funduḳ, ed. Bahmanyar, 1938, and the anonymous *Taʾrīkh-i Sīstān*, ed. Bahār 1937 (there exists, on the other hand, nothing on Čaghrï specifically in the histories of Kirmān). His relations with Ṭughrïl are treated in Ibn al-Athīr, and also in the other largely Mesopotamian chronicles, especially the *Mirʾāt al-Zamān* of Sibṭ Ibn al-Djawzī. Also to be consulted are the beginning and end of Nāṣir-i Khusraw, *Safar-nāma*.

ČAHĀR AYMAḲ, four semi-nomadic tribes in western Afghānistān [see AYMAḲ]. There is little information and much confusion about these tribes, consequently various sources have different names, locations and even languages ascribed to them. At the present they speak Persian and are Sunnīs, unlike the Shīʿī Hazāras with whom the Čahār Aymaḳ are closely linked. Some sources erroneously identify the two. The origin of the name Čahār Aymaḳ is unknown but is at least as early as the 18th century A.D. at the time of the early Durranī empire. It may have been originally a name of a tribal confederation formed between local Persian-speakers and Mongol Hazāras against the Turkomans. The admixture of Turkic elements is also probable. The Djamshīdīs live north of Harāt with their centre at Kushk. The Taymūrī or Sunnī Hazāras are scattered with one centre at Ḳalʿa-i Naw; the Taymānī are located in Ghūr, and the Fīrūzkūhī on the upper reaches of the Murghāb River. The origins and history of the various tribes are unknown. Their number has been estimated from 400,000 to a million.

ČAHĀR MAḲĀLA [see NIẒĀMĪ ʿARŪḌĪ SAMARḲANDĪ]

CAIN [see HĀBĪL WA ḲĀBĪL]

CAIRO [see AL-ḲĀHIRA].

ČAKÏRDJÏ-BASHÏ, chief falconer, a high official of the Ottoman court. In the *Ḳānūnnāme* of Meḥemmed II (*TOEM* Supp. 1330 A.H., 12) he is mentioned among the *aghas* of the stirrup, immediately before the *čashnagīr-bashi* [*q.v.*]. During the 16th century the numbers and sub-divisions of the *aghas* of the hunt (*shikār aghalari*) increased greatly, and the *Čakïrdji-bashi* is joined by separate officers in charge of the peregrines, lanners, and sparrow-hawks (*Shahindji-bashi*, *Doghandji-bashi*, and *Atmadjadji-bashi*). Until the time of Meḥemmed IV (1058/1648-1099/1687) the *Doghandji-bashi* and his staff belonged to the Inner service (*Enderūn*); the others to the outer service (*Bīrūn*). During the 17th and 18th centuries the falconers dwindled in numbers and importance.

(B. LEWIS)

ČAḲMAḲ, AL-MALIK AL-ẒĀHIR SAYF AL-DĪN, Sultan of Egypt, was in his youth enrolled among the Mamlūks of Sulṭān Barḳūḳ. He gradually rose, till under Sulṭān Barsbāy he became Chief *ḥādjib* [*q.v.*]. Chief Master of the Horse, and finally Atābeg (Commander-in-Chief). On his deathbed in 842/1438, Barsbāy appointed him regent to his infant son al-Malik al-ʿAzīz Yūsuf. The various divisions of the Mamlūks, originating in the bodyguards of the Sulṭāns Barḳūḳ, Nāṣir Faradj, Muʾayyad Shaykh and Barsbāy, were at enmity with one another and their sole aim was to obtain all the wealth and influence they could. In the confusion that arose the only course open to Čaḳmaḳ was to seize the reins of government for himself. Sulṭān Yūsuf was deposed, placed in confinement in the citadel, retaken after an attempt to escape and finally taken to Alexandria and kept under a mild form of custody. Soon afterwards the resistance of the governors of Damascus and Aleppo also collapsed; they had been defending Sulṭān Yūsuf's claims to further their own interests. The Syrian rebels were defeated, the leaders executed and Čaḳmaḳ's supremacy was assured in 843/1439. Like his predecessor Barsbāy [*q.v.*] Čaḳmaḳ wished to make war on the Christians under pretence of checking piracy on the north coast and therefore sent ships via Cyprus to Rhodes but the Egyptians had to return as the resistance offered by the Knights of St. John, who were well prepared, was too strong for them. In the years 846/1442 and 848/1444 the Egyptians again made unsuccessful attempts to conquer Rhodes, and had finally to make peace with the Knights. Čaḳmaḳ's foreign policy was a successful one; he was on good terms with all Muslim rulers and did not, like Barsbāy, fall into the error of causing irritation by petty trickeries. Against the advice of his *amīrs*, he allowed Tīmūr's son Shāh Rukh to send a covering for the sacred Kaʿba, although this was a privilege of the Sultans of Egypt (see the article BAIBARS in *EI*[1]). The populace was still so strongly incensed against the Mongols that they actually attacked an embassy which included one of Tīmūr's widows. He was also on good terms with the Ottomān Sultan and the princes of Asia Minor. In his domestic policy, in Egypt itself, he was not quite able to put a stop to the mismanagement of the state monopolies [see BARSBĀY]. Jews and Christians were tormented with strictly enforced petty regulations. He could not restrain the arrogance and outrages of the Mamlūks so that the only way he could protect women from them on the occasion of festivals was to forbid them to go out. He himself was an exceedingly frugal and pious man, liberal only to the learned, and thought no price too high for a beautiful book; he left but little property behind him on his death. Through his example the morals of the court improved. When, in the year 854/1453, he felt the approach of death—he was now over 80 years old—he had homage paid to his son ʿUthmān whom the Caliph chose to be Sultan. The *amīrs* and officials of the court and a large multitude of the people attended his funeral, contrary to the usual custom sincerely grieving at his loss.

Bibliography: Weil, *Chalifen*, v, 215-248; Muir, *Mameluke or Slave Dynasty of Egypt*, 149-155; al-Sakhāwi, *al-Ḍawʾ al-Lamiʿ*, iii, 71-74; Ibn Taghribirdī, *al-Nudjūm*, ed. Popper, vol. vii, 30 ff.; *al-Manhal al-Ṣāfi*, ed. Wiet, no. 838; Ibn Iyās (Būlāḳ), *passim*. (M. SOBERNHEIM)

ÇAKMAK, MUSTAFA FEVZI, also called Kavaklı, marshal in the Turkish army. Born in Istanbul in 1876, he was the son of an artillery colonel. He entered the war academy (Harbiye, [*q.v.*]) where he became a lieutenant in 1895, joined the staff course, and was gazetted as a staff captain in 1898. After spending some time on the general staff, he was posted to Rumelia where he became successively a Colonel, divisional commander, and Army Corps Chief of Staff. He served on the staff of the army of the Vardar during the Balkan War, and during the World War saw service at the Dardanelles, in the Caucasus, and in Syria. He became a general in 1914. In December 1918 he became, for a while, Chief of the General Staff in Istanbul, and in Feb. 1920 Minister of War. He used his position to send arms and give other help to the nationalists in Anatolia, and in April 1920 left with Ismet [Inönü] to join them. In May he became minister of defence and on 21 January 1921 was elected president of the council of ministers of the Ankara government, and was sentenced to death *in absentia* in Istanbul. On 2 April 1921, after the second battle of Inönü, he was promoted full general by the Grand National Assembly, and became acting Chief of the General Staff as well as premier and defence minister. He was formally elected as Chief of Staff by the Assembly on 12 July 1922, while Raʾuf Bey became premier. In October 1922, after the victory of the Turkish forces on the Sakarya, the Assembly passed a motion of thanks to him (together with Ismet and Kâzim Karabekir Pashas), and promoted him marshal (Mushīr). He remained chief of the General Staff until his retirement, ostensibly under the age limit, in January 1944. In 1946 he was elected as an independent candidate on the Democrat Party list, and in August was nominated as opposition candidate for the Presidency, receiving 59 votes in the Assembly, as against 388 for Ismet Inönü. In 1948 he appeared as honorary president of the newly formed Party of the Nation (*Millet Partisi*). He died on 10th April 1950.

ČALA [see BUKHĀRĀ]

CALATAYUD [see ḲALʿAT AYYŪB]

CALATRAVA]see ḲALʿAT RABĀḤ]

CALCUTTA (Kalikātā), the capital of West Bengal and the largest city in India, situated about 80 miles from the sea on the left or east bank of the Huglī, a branch of the Gangā (Ganges), which is navigable for the largest ocean vessels. A centre of rail, river and ocean traffic, and lying midway between Europe and the Far East, it is one of the busiest ports of the world. About five-sevenths of India's overseas trade is shared by Calcutta and Bombay, with Calcutta having the major share; about one-third of the country's organized factory industry is in its vicinity. It has a large international airport. Area, 32.32 sq. m.; pop. (March 1, 1951) 2,548,677, a density of 139 persons per acre. Including Howrah (pop. 433, 630) which is really a part of Calcutta, and the suburbs which are within half an hour's bus journey to the city, Calcutta has three and a half million people.

The crowded metropolis of today grew out of a cluster of three mud villages at the end of the 17th century. Calcutta is first mentioned in a Bengali poem, *Manasā-vijaya* by Vipradāsa (ASB text, 144) written in 1495, but the portion in which Calcutta is referred to is possibly a later elaboration. The first definitive mention of Calcutta then occurs in the *Āʾīn-i Akbarī* (Lucknow text, ii, 62), compiled about 1596, as a rent-paying village in the *sarkār* of Sātgāon under the Mug͟hal emperor Akbar. The foundation of the city occurred about a century later in 1690. The English merchants, who had been in Bengal for about fifty years, felt the necessity of a fortified place, and under the direction of Job Charnock and after two futile attempts after 1686 they finally settled at Sūtānuti, the northern portion of present Calcutta, on 24 August, 1690. In 1696 the English were allowed to build a fort and two years later they secured permission from Prince ʿAẓīm, grandson of the emperor Awrangzīb, to rent the three villages of Sūtānuti (north), Kalikātā (centre) and Govindapur (south), which formed the nucleus of modern Calcutta. In 1707 Calcutta was made the seat of a separate Presidency. In 1717 the English were permitted by the emperor Farruk͟hsiyar to purchase 38 villages in the vicinity of their settlement. The names of some of these 38 villages still survive in the street-names of the city today. In June, 1756 Sirād͟j al-Dawla, Nawwāb of Bengal, captured it and during his temporary occupation he named it ʿAlīnagar. Modern Calcutta dates from 1757 when, after the battle of Plassey (June), the English became virtual masters of Bengal; the old fort was abandoned and the present Fort William begun by Clive on the site of Govindapur. In 1772 the treasury of the province was transferred from Murs͟hidābād to Calcutta, which in 1773 became the official capital of British India. It remained India's capital until 1911 and that of Bengal as well until 1947.

Though Calcutta is a creation of English rule, it is an important centre of Muslim life. On 1 March 1951 Calcutta city had a Muslim population of 305,932 and including two of its immediate suburbs, Howrah and Garden Reach, Calcutta had a Muslim population almost equal to the entire population of Ḋhākā (Dacca), the capital of East Pākistān and the historic centre of Muslim activity. About 131,000 Muslims had left Calcutta on the eve of the census of 1951 in view of the unsettled conditions of the time, and the census of 1961 is likely to show a considerable increase of Muslim population. Calcutta is an important centre of Muslim culture. The Calcutta *Madrasa* was founded in 1781 by Warren Hastings for the encouragement of Islamic learning. It had among its Principals Islamic scholars of repute like H. Blochmann and Sir E. Denison Ross. The Asiatic Society, founded in 1784, possesses over 6,000 Arabic and Persian MSS. and has to its credit a large number of valued publications bearing on Muslim history and culture. The National Library has in its Būhār collection a good number of Arabic and Persian MSS. and has recently acquired the rich collection of the distinguished historian of Muslim India, Sir Jadunāth Sarkār. The Indian Museum and the Victoria Memorial exhibit some rare and beautiful examples of Indo-Islamic paintings. The University of Calcutta has two Post-Graduate Islamic departments: (i) Arabic & Persian and (ii) Islamic History & Culture. In Calcutta lived the sons of Tīpū Sulṭān, and the last king of Awadh (Oudh), Wād͟jid ʿAlī S͟hāh, who died in 1887. Of the Muslim monuments, the only one with any architectural pretensions is the mosque in Dharamtalā St., built in 1842 by Prince G͟hulām Muḥammad, son of Tīpū Sulṭān; the oldest are the Nimtalā mosque (built some time after 1784), the mosque and tomb of Bhonsri S͟hāh at Chitpur (1804) and D͟jumma S͟hāh's tomb in Netād͟jī Subhās (Clive) St. (1808).

ČALDIRĀN, the plain in north-western Persian Ād͟harbayd͟jān, the western boundary forming part of the present-day frontier with Turkey (cf. *Farhang-i D͟jug͟hrāfiyāʾī-yi Īrān*, iv (Tehran, 1330 *s͟hamsī*), 154), which on the 2 Rad͟jab 920/23 August 1514 was the scene of a decisive Ottoman victory over the Ṣafawids.

The campaign was launched by Selīm I, despite the reluctance of his troops and military advisers, on the 23 Muḥarram 920/20 March 1514 as the first enterprise of his reign after he had secured his throne by the elimination of his brothers, and is properly to be regarded as the final response to those separatist tendencies which for over half a century had been manifesting themselves among the Turkish tribal elements of Anatolia in *darwis͟h* revolts or in active support for pretenders of the Ottoman line, and which now threatened to draw the entire province into the Ṣafawid orbit. The profound disquiet of the region may be judged from the mass executions and arrests of suspected dissidents which preceded the actual military operations, and the gravity with which this situation was regarded is to be inferred from the risks which Selīm felt compelled to take in order to achieve a final settlement. Whether the Ṣafawids had inspired this dissatisfaction by their subversive missionary activities or merely benefited from the prevailing anti-Ottoman sentiments by appearing as an alternative hegemony is difficult to determine; but it is clear that the counterheretical allure which the Ottomans gave to their attack upon the S͟hīʿī Muslims of the east was but the façade to a starkly political purpose.

The campaign, which seems to have been modelled on that of Meḥmed II against Uzun Ḥasan in 1473, is described in detail in the journal preserved in Ferīdūn Beğ, although the fundamental logistical

problems of moving an army of the size attributed to the Ottomans across home territories where they could not live off the land are scarcely touched upon. But that these could be solved and that the fractious troops could be held under discipline throughout all the unfamiliar hardships of campaigning in these regions was certainly the most impressive display of Ottoman might that Anatolia had ever witnessed and far more overawing to Shāh Ismāʿīl and his supporters than the firearms and artillery which usually figure so prominently in the narratives as the reason for the Ottoman victory (cf. Luṭfī Pasha's highly romantic account of Ismāʿīl's astonishment as contingent after contingent of Ottoman troops took the field).

The campaign may be regarded as having succeeded in its primary object in that it neutralized for over a generation the attraction exerted on Anatolia from the east. The "scorched earth" tactics of the retreating Ṣafawids prevented any long occupation of their invaded territories, and although Tabrīz was entered by the Sulṭān on the 17th Radjab/7th Sept., within a week preparations were made for returning to winter quarters at Amasya. From here the following year operations were begun in south-eastern Anatolia which were to bring an end to the semi-independent principality of the Dhu 'l-Ḳadr-oghlī around Elbistan and add definitively to Ottoman territory Diyārbekr and northern Kurdistan.

Bibliography: Among the general histories of the Ottoman Empire, Hammer-Purgstall's is still the most circumstantial account of this campaign (ii, 392 ff.), Zinkeisen (ii, 566 ff.) and Jorga (ii, 327 ff.) affording it but casual mention; İ. H. Uzunçarşılı, *Osmanlı Tarihi*, ii, Ankara 1949, 246 ff. adds a diagram of the battle. The Ottoman historians: Kamāl Pasha-zāde, *Tawārīkh-i Āl-i ʿOthmān*, ix, Millet, Ali Emiri, no. 29, f. 35b, ff.; ʿĀlī, *Kunh al-akhbār*, Süleymaniye, Esʿad Ef., no. 2162, f. 238a, ff.; Saʿd al-Dīn, *Tādj al-Tawārīkh*, ii, Istanbul 1279, 239 ff.; Luṭfī Pasha, *Tawārīkh-i Āl-i ʿOthmān*, ed. ʿĀlī, Istanbul 1341, 206 ff.; Ṣolaḳ-zāde, *Taʾrīkh*, Istanbul 1287, 359 ff., give very much the same picture as presented by Hammer-Purgstall (who, however, did not use Kamāl Pasha-zāde and Luṭfī Pasha) which can be usefully supplemented in certain aspects by the various *Selīm-nāmes* (a fairly complete repertoire of which is to be found in A. S. Levend, *Ġazavāt-nāmeler*, etc., Ankara 1956, 22 ff.), the most important being those of Shukrī, British Museum, Or. 1039, f. 62b ff. (repeated in Djawrī, Millet, Ali Emiri, no. 1310, f. 54a ff., and Yūsuf Efendi, Süleymaniye, Esʿad Ef., no. 2146, f. 11a ff.,) Kashfī, Süleymaniye, Esʿad Ef., no. 2147, f. 31a ff.; Saʿdī b. ʿAbd al-Mutaʿāl, Topkapı, Revan, no. 1277, f. 64a ff.; Abū 'l-Faḍl b. Idrīs Bitlīsī, British Museum, Add. 24,960, f. 63b ff.; Sudjūdī, Topkapı, Revan, no. 1284/1, f. 5b ff.; Djalāl-zāde Muṣṭafā Čelebi, British Museum, Add. 7848, f. 120b ff. The documents in Ferīdūn Beğ, *Munshaʾāt al-salāṭīn*, i, Istanbul 1274, 396 ff. (correspondence, journal of the campaign, *fatḥ-nāmes*) are of exceptional importance. The Persian sources (a full discussion of which is to be found in Ghulām Sarwar, *History of Shāh Ismāʿīl Ṣafawī*, Aligarh 1939, 3-16) seek to palliate the magnitude of the defeat and their accounts are coloured by this purpose; the most important is that of Khwāndamīr, *Ḥabīb al-siyar*, iv, Tehran 1333, 543 ff., whose version underlies those of Ḥasan Rūmlū, *Aḥsan al-Tawārīkh*, ed. C. N. Seddon, Baroda 1931, 143 ff. (with various expansions) and Iskandar Beğ Munshī, *ʿĀlam-ārā-yi ʿAbbāsī*, Tehran 1341, 31 ff. (who, in addition to the above two, uses also Ghaffārī's *Djahān-ārā*). The dominant early European account is that of Paolo Giovio, *Historiae Sui Temporis*, Paris 1558, i, 133-163 ff. (an Italian translation of this section is given in F. Sansovino, *Historia Universale dell' Origine, Guerre et Imperio de Turchi*, Venice 1654, ff. 323-360); also in Sansovino are the *Vita di Sach Ismael, etc.* by Teodoro Spandugino (ff. 132-140) and the *Vita et Legge Turchesca* by G. A. Menavino (ff. 17-75), who, although claiming to have accompanied the Turks on this campaign, gives a highly distorted account of its outcome (a Latin translation in P. Lonicerus, *Chronica Turcorum*, Frankfurt 1578, i, ff. 95-97). The narrative in R. Knolles, *The Generall Historie of the Turks*, London 1621, 505-515, while noticing Menavino, follows Jovius throughout, as does also that of T. Artus in his continuation of De Vigenere's translation of Chalcocondylas, *L'Histoire de la Decadence de l'Empire Grec*, Paris 1650, i, 358-374, though this does include, too, the accounts in J. Leunclavius, *Historiae Musulmanae Turcorum*, Frankfurt 1591, cols. 691-704, 742-745. P. Bizaro, *Rerum Persicarum Historia*, Frankfurt 1601, is important only in that it contains the letter of H. Penia from Constantinople, dated 6 Nov. 1514, 275-278. The article by M. Tayyib Gökbilgin in *IA*, fasc. 24, 329-331, presents the familiar Ottoman version.

CALENDAR [see anwāʾ, taʾrīkh]

CALICUT [see kalikat]

CALIPH [see khalīfa]

CALLIGRAPHY [see khaṭṭ]

ČAM (or Cham), A people of Malayo-Polynesian origin which settled before the Christian era on the southern coasts of the Indo-Chinese peninsula. The Cham appear in history at the end of the 2nd century A.D. with their foundation, in 192, of the kingdom of Champa [see ṣanf], which occupied the coastal provinces of present-day Viet-nam, from Quang-binh in the North to Binh-thuan in the South.

Up to the 10th century Champa experienced a period of magnificence during which the Cham dynasties were able to extend their territories slightly and to develop their civilization. But during the following centuries the country came into open conflict with its Vietnamese and Khmer neighbours, and then suffered the Mongol invasions. These struggles, aggravated by internal revolts, quickly led Champa towards disintegration. In spite of a short period of victorious fighting during the reign of the famous Chê Bong Nga (1360-1390), and Chinese intervention on his side, the kingdom was nearing its end. In 1471 the Vietnamese emperor Le Thanh Ton conclusively subjected Champa and it became a dependency of Viet-nam; a part of the inhabitants took refuge on Cambodian soil, and gradually it disappears from the history of the Far East.

The Cham people, deeply affected by the culture of India, adopted its religion and writing in the second century. They practised Hinduism and Brahmanism up to the 15th century.

Although the Muslims were already established in Champa from the middle of the 4th/10th century (there is proof of the existence, from the 5th/11th century onwards, of Arab trading communities living in contact with the Cham), Islam was not

seriously practised by the Cham until after the fall of their kingdom.

To-day two-thirds of the Cham living in Viet-nam still practise Brahmanism; the other third, together with the Cham who emigrated to Cambodia, are Muslims. In the absence of precise and up-to-date statistics, there are an estimated 15,000 Cham living in the south of central Viet-nam (the provinces of Phan-rang and Phan-thiet) and 20,000 living in Cambodia (on the banks of the Mekong).

Cham society, originally matriarchal and organised in clans, adopted, under influence from India, the caste system and Hindu customs. The Cham, skilful craftsmen and experienced farmers, with a reputation as courageous soldiers, lived as pirates, raiding the neigbouring provinces and trading in slaves. Nowadays they constitute racial minorities in process of assimilation. Apart from work on silk and metals and the cutting of precious stones, the Cham were outstanding builders. Cham architecture has left us numerous sites and monuments, of which most are unfortunately in extremely bad condition. Cham monuments are all identical in silhouette, a tower with diminishing stories, built in pink sandstone, terra cotta, and above all in brick. However their style is not uniform. Hindu motifs can be recognised in their decoration. These towers were religious buildings (the cult of S̲h̲iva) all of whose interior furnishings have disappeared. The scenes on the bas-reliefs again give concrete expression to the Cham's pronounced love of music, which has had a very deep influence on the music of Viet-nam.

ČAMALAL [see ANDI]

CAMBAY [see KANBĀYA]

CAMEL [see D̲J̲AMAL]

CAMEROONS, a former German colony on the west coast of Africa, now consisting of (a) an independent state, formerly under French trusteeship, and (b) a territory at present (1960) under British trusteeship. It lies at the eastern end of the Gulf of Guinea, between Nigeria, Spanish Guinea, and former French Equatorial Africa. Area 503,600 sq. km., 4,000,000 inhabitants, of whom 20,000 are non-African.

Created as a result of German penetration from the Bight of Biafra towards Chad (1884-1910) and conquered by the Allied Forces between 1914 and 1916, the Cameroons was divided in 1919 into a zone under British mandate (80,000 sq. km.) and a zone under French mandate (423,000 sq. km.). The first has in practice been integrated administratively with Nigeria, while the second has developed along distinctive autonomous lines.

(a) Thanks to its geographical situation the former French Cameroons presents a remarkable assortment of climates and peoples, which make it as it were an intermediary zone between West Africa, Central Africa and Equatorial Africa. The relief map shows a narrow coastal plain separated from the forest plateau of the south by a range of fairly high mountains. North of the valley of the Sanaga the uplands and savannah country of Adamawa fall in a rugged escarpment to the Chad plain and the valley of the Benue. Along the Nigerian frontier a series of mountain ranges, including the Manengumba, Bamileke, Bamun, Alantika and Mandara massifs, culminates on the seacoast in the volcanic Mount Cameroon (4,070 m.).

The population of the forest-covered south includes pygmy hunters, Bantu and Bantu-type farmers and fishermen; in the central savannah and the Bamileke mountains, semi-Bantu farming peoples; in the uplands and the northern plains, 'Sudanese' and 'Ubangians' of various origins; in the mountains, long-established palaeonigritic peoples; in all, 3,100,000 Africans and 15,000 immigrants.

After the 1914-18 war, Cameroons was placed under a B Mandate by the League of Nations. In 1940, under Col. Leclerc, it rallied to Free France. In 1946 the system of the mandate was replaced by that of the trusteeship of the United Nations, Cameroons becoming an Associated Territory of the French Union. In 1957 it was established as a State under trusteeship, possessing some degree of internal autonomy: the Prime Minister and his government were responsible to the Legislative Assembly sitting at Yaunde. A High Commissioner dealt with the spheres reserved to France—currency, defence, and public order. The administrative structure includes 21 departments and some 60 *arrondissements*. Municipal administration is inspired by that of metropolitan France. The French government announced at the end of 1958 its intention of renouncing trusteeship and of recognising the independence of the Cameroons on 1 Jan. 1960; this decision, after arousing lively opposition in the United Nations Assembly from the Soviet block and certain Afro-Asian states, was carried through and made effective on the appointed date.

The economy is predominantly agricultural (coffee, cocoa, vegetable oils, timber, cotton, bananas) with cattle husbandry important in the north. Current industrial development: electrometallurgy at Edea, gold and diamonds in the east, tin in the west, petroleum in the south. Chief towns: the port of Duala (100,000 inhabitants), Yaunde, the capital (30,000), Garua capital of the north (15,000), Marua, Ngaundere, Edea, Nkongsamba, Fumban, Tchang, Kribi, Mbalmayo, and Ebolowa.

The south is almost entirely Christianized: 600,000 Catholics and 300,000 Protestants, with animist survivals, and a tendency toward the formation of syncretistic sects.

Islam has some 600,000 followers in the northern plain, Adamawa and the Bamun massif. It seems to have penetrated the area about the 12th century, coming from the east (Wadai, Bagirmi) and the north-west (Kanem, Bornu), but experienced its period of great expansion only at the beginning of the 19th century, under the influence of the conquering Fulani, successors of Ut̲h̲mān dan Fodio: his son Mohamman Bello and particularly his lieutenant Mōdibbo Ādama (died 1847) who conquered Fumbina and gave it its present name of Adamawa. Ādama took the title of Amīru (*Amīr*) and made his capital at Yola (Nigeria) where the *lāmībe* (Fulani chiefs) went to receive the investiture until the Franco-British conquest. His work was continued up to the beginning of the 20th century by the *Amīrs* Mohammed Lawal, Sanda and Zubeiru; they were however not able to subdue the Kirdi (heathens) who took refuge in the mountains of the north.

Since the European conquest, some groups of Muslim immigrants have arisen in the towns of the south, where they are butchers, peddlers, and shoe-

makers. They are thought to number some 25,000. They do a little proselytising by marriage.

Fulani influence prevails in the Islam of the Cameroons, with its tendency towards Mahdism. But, in addition to the 300,000 Fulani, there are in the north some Hausa, some Kotoko, and some Shua (or black Arab) Muslims of long standing, and Islam tends to spread among the pagan farmers of the plains and the Kirdi who have come down from the mountains. The Bamun of Fumban, long at war with the Fulani, saw their aristocracy converted by agreement or by force in 1917 by the *Fon* Njoya the Great who at this time took the title of Sultan and the name of Ibrahim.

Higher Muslim education is little developed, and the *modibbe* (or *mālams*) who wish to continue their studies have to go to Nigeria, Chad, or the Sudan. The Ḳādiriyya sect is the oldest, but not the most numerous; its principal centre is Garua. The Tidjāniyya sect has predominated since the conversion of Mohamman Bello, who received the *wird* of El Hadj Omar about 1840; its adherents probably amount to some 300,000. Mahdism comes next in importance. Local mahdīs appear every four or five years, but their influence is generally short-lived and localized. On the other hand, since the settlement of several thousand Fulani in the Sudan at the time of the British conquest of Nigeria, the Sudanese Mahdiyya has had numerous adherents in the Cameroons.

Wahhābi influence is slight, exercised chiefly through the medium of former soldiers of the negro guard of King Ibn Saʿūd, nearly all Hausas. The Muslims have long remained aloof from local political trends. Precolonial institutions and hierarchies are better preserved among them than among the peoples of the south. Nevertheless, in contrast to the confessional and political divisions of the South, the westernized *élite* of the north have been called on to play an increasingly important role as arbitrators, until, in 1958, a Fulani Muslim of modernist tendencies was appointed Premier of the newly formed State.

Bibliography: Lembezat, *Le Cameroun*, Paris 1952; Froelich, *Cameroun-Togo*, Paris 1956; Cardaire, *Contribution à l'étude de l'Islam noir: l'Islam au Cameroun*, Douala (Cameroons) 1949; Annual reports to SDN and UNO.

(P. Alexandre)

British Cameroons. This territory on the West Coast of Africa, between the Cameroon Republic on the east and Nigeria on the west, is that part of the old German colony of Kamerun which passed in 1919 into British control, first under a League of Nations mandate and subsequently as a United Nations Trust territory. Following administrative practice, which is to some extent justified by real ethnic and cultural differences, it is convenient to consider it as two distinct units.

The Southern Cameroons [administrative capital Buea] has a total area of 16,581 square miles and a population of some 800,000. Until 1954 this territory was administered as an integral part of the Eastern region of Nigeria but a series of changes since that date have raised it to the status of a self-governing region within the Nigerian federation with its own regional government and a legislative assembly with a majority elected by universal adult suffrage. The political future of the region, which has not hitherto proved economically self-sufficient, is at present uncertain. The United Kingdom has undertaken to separate the administration of the region from that of the Federation of Nigeria by October 1960, the date when the Federation assumes complete independence. A plebiscite is to be held not later than March 1961 to decide between incorporation in Nigeria and reunion with the Cameroons Republic, the latter course being favoured by the present regional government.

The tribal pattern of the territory exhibits a marked degree of political fragmentation. The bulk of its population, speaking a large number of Bantu and semi-Bantu languages, have their nearest affinities with neighbouring peoples in the Cameroons republic. The Tikor and Bali peoples who are dominant in the central grasslands have migrated into this area from the north-east in the last few centuries and their traditional culture is of the pagan Sudanic type. The Christian missions have a continuous history in the area since the establishment of the Baptists at Victoria in 1858. The most reliable figures of missionary adherents show 58,000 Catholics and 65,000 Protestants but the number of those who have been strongly influenced by the missions is much greater. Islam is not numerically important.

There are no known mineral resources of commercial value within the territory and no industry beyond the processing of palm oil and rubber. The country is overwhelmingly rural in character and even the largest towns, Mamfe and Kumba, have fewer than 10,000 inhabitants. Most of the exported cash crops of bananas, palm-oil, palm kernels and rubber are produced from the plantations administered by a government subsidised agency, the Cameroons Development Corporation. The growth of cash crops, especially cocoa, by individual small farmers is increasing with official encouragement, but the mass of the people in the interior are still engaged in subsistence agriculture as are those of the Northern Cameroons.

The Northern Cameroons, an area of 17,000 square miles with a population probably slightly smaller than the Southern Cameroons, is a narrow strip of territory more than 500 miles long but nowhere more than 80 miles wide which is divided into two by a "corridor" of Nigerian territory, some 45 miles wide, on either bank of the Benue. Administratively the territory has been completely integrated with the Northern Region of Nigeria. The greater part falls within the Adamawa Province, but the Dikwa emirate in the north, formerly a part of the old "empire" of Bornu is appropriately incorporated, as a division, in Bornu province and three districts in the south belong to the Benue province. By a plebiscite held under United Nations auspices in November 1959 the people of the territory have postponed the final decision as to whether or not it is to remain with Nigeria after independence. The ruling tribes, Kanuri and Shoa Arabs in Dikwa and Fulani in Adamawa, are strongly Muslim but much of the hill country has never fallen effectively under their influence and remains entirely pagan. There are Catholic and Protestant missions in Adamawa and a few thousand converts to Christianity have been made. [For an account of the religious history see the preceding section on the French Cameroons]. (D. H. Jones)

CAMIENIEC [see kaminča]

ČAMPĀNĒR, a ruined city of Gudjarat in Western India, Lat. 22° 29′ N., long. 73° 32′ E., about 78 miles south-east of Aḥmadābād, taken by the Gūdjarāt sulṭān Maḥmūd Shāh I 'Begaḍā' on his conquest (889/1484) of the adjoining stronghold

of Pāwāgaṙh, which had successfully resisted Aḥmad Shāh I in 821/1418. The Begadā occupied Čāmpānēr forthwith, building a city wall with bastions and gates (called Djahānpanāh; inscription *EIM* 1929-30, 4-5), and a citadel (*bhādar*). He renamed the city Maḥmūdābād, and it was his favourite residence until his death in 917/1511; it remained the political capital of Gudjarāt until the death of Bahādur Shāh in 942/1536. When Gudjarāt came under the Mughals after 980/1572 Čāmpānēr was the head of a *sarkār* of 9 *maḥal*s (Jarrett, *Āʾīn-i Akbarī*, ii, 256; of 13 divisions, according to the *Mirʾāt-i Sikandarī*); it fell to the Marāṫhās at the end of the 18th century, and came into British hands in 1853; almost deserted, it was not recolonized.

Monuments. Of Maḥmūd's seven-storeyed palace (Sāt manzil) built in steps on the cliff edge opposite Pāwāgaṙh only the lowest storey remains; the other monuments other than the walls (cf. *Bombay Gazetteer*, iii, 307-8) are all mosques and tombs, which in their similarity exhibit a local style. The Djāmiʿ Masdjid, c. 929/1523, is inspired in plan by that of Aḥmadābād [*q.v.*], 100 years older; but here there is a double clerestory in the *līwān* in the space of one dome only; the arcuate *maḳṣūra* screen and the trabeate hypostyle *līwān* are well integrated; the side wings of the *līwān* are proportioned as a double square (8.5 by 17.0 metres); a *zanāna* enclosure is formed by screening off the northernmost *miḥrāb*; and the external surfaces, as in all the Čāmpānēr buildings, are the subject of rich plastic decoration—particularly the buttresses supporting each of the 7 sumptuous *miḥrābs*. The other buildings —10 mosques, many nameless tombs—are of similar style, characterized by refinement of decoration; the niches in the *minār*s of the Naginā *masdjid* are of an exquisite marble tracery excelled only by that of Sidī Sayyid's mosque in Aḥmadābād [*q.v.*]. The tombs use the arch more freely than the mosques, and their carved decoration is of consummate delicacy, skill and craftsmanship.

CAMPIÑA [see KANBĀNIYA]

ČANAḲ-ḲALʿE BOGHAZÎ (Çanak-kale Boğazı) is the name now given in Turkish to the Dardanelles. This narrow channel, which unites the Marmara and the Aegean Seas, has a length of about 62 km. (Gelibolu-Çardak to Seddülbahir-Kumkale) and a width ranging from 8 km. down to 1250 m. (Çanak-kale to Kilitbahir). The strait was known to the ancient Greeks as the Hellespont (ὁ Ἑλλήσποντος, in Doric ὁ Ἑλλάσποντος), a name that remained in usage amongst the Byzantines. It is called in some of the mediaeval Western sources and sea-charts Bucca Romaniae, Brachium S. Georgii (a term which denoted the entire channel separating Asia and Europe, *i.e.*, embraced the Bosphorus as well as the Dardanelles), Bocca d'Aveo (Avido, Aveo, the ancient Abydos: Ἄβυδος) and also Dardanelo (cf. Pauly-Wissowa, s.v. Hellespontos, and Tomaschek, 17). To the Ottomans it was the Aḳ Deniz Boghazî, Ḳalʿe-i Sulṭāniyye Boghazî and later Çanaḳ-ḳalʿe Boghazî.

The more notable localities on or near the European shore of the Dardanelles are Bolayır, Gelibolu (*i.e.*, Gallipoli, the ancient Kallipolis), Kilya (not far from the old Sestos), Eceabad (Edjeābād, formerly Maydos, *i.e.*, the ancient Madytos), Kilitbahir (Kilīd al-Baḥr) and Seddülbahir (Sedd al-Baḥr). Along the Asiatic shore are situated Çardak, Lapseki (the ancient Lampsakos-Lampsico, Lapsico, Lapsaco in the mediaeval Western sources), Çanak-kale (near the old Abydos), Erenköy and Kumkale (Ḳum Ḳalʿe).

Sulṭān Meḥemmed II (855-886/1451-1481), in order to establish a more effective control over the Dardanelles, built new defences on either shore of the strait, amongst them a fortress close to the ancient Abydos. This fortress received the name of Ḳalʿe-i Sulṭāniyye (according to Pīrī Reʾis (*Kitāb-i Baḥriyye*, 86), because a son of Meḥemmed II, Sulṭān Muṣṭafā, was associated with its construction. Cf. also Ibn Kemāl, 100 = *Transkripsiyon*, 101, where it is called Sulṭāniyye). The town of Ḳalʿe-i Sulṭāniyye counted amongst its inhabitants, during the 17th and 18th centuries, a considerable number of Armenians, Jews and Greeks. As a result of the establishment there (perhaps ca. 1740) of potteries, and of its subsequent reputation as a noted centre for the manufacture of earthenware, the town came to be known as Çanaḳ Ḳalʿesi (*čanaḳ* = an earthen bowl), the older name falling out of current usage. Çanaḳ Ḳalʿesi belonged, in 1876, to the Ottoman *wilāyet* of Djezāʾir-i Baḥr-i Sefīd and thereafter to the *sandjaḳ* of Bīghā. It is now the centre of the present province of Çanak-kale. The town suffered much from fire in 1860 and 1865, from the earthquake of August 1912, and from naval bombardment in 1915 during the course of World War I. Çanak-kale, in recent years, has largely regained its former prosperity and was estimated, in 1940, to have 24,600 inhabitants.

The Ottoman Turks absorbed (c. 735-c. 745/c. 1335-c. 1345) into their own territories the emirate of Ḳarasī [*q.v.*] and then, after the town had been ruined in the earthquake of 755/1354, established themselves at Gallipoli [see GELIBOLU], which served them as a point of departure for their subsequent conquest of Thrace. It was now, for the first time, that a Muslim state held control over the lands on either side of the strait. The Ottoman Sulṭān Bāyazīd I (791-805/1389-1403) strengthened the defences of Gallipoli (792/1390), further improvements being carried out there in the reigns of Meḥemmed I (816-824/1413-1421) and Murād II (824-855/1421-1451). Ottoman control of the Dardanelles was destined, however, to remain insecure, as long as the Sulṭān had no large and efficient fleet at his command: Christian naval forces sailed into the strait in 767/1366 (the "crusade" of Amedeo of Savoy, which brought about a brief restoration of Gallipoli to Byzantine rule), in 801/1399 (expedition of the Maréchal Boucicaut to Constantinople), in 819/1416 (the Venetian defeat of the Ottoman naval forces before Gallipoli) and again in 848/1444 (Papal and Venetian squadrons sent to the Dardanelles at the time of the Varna campaign). Sulṭān Meḥemmed II (855-886/1451-1481), anxious to secure a more effective control of the Dardanelles, caused new defences to be built where the waters of the strait are at their narrowest, *i.e.*, the fortresses of Ḳalʿe-i Sulṭāniyye on the Asiatic, and of Kilīd al-Baḥr on the European shore. The manufacture and use of

fire-arms had now advanced to such a degree that the Sulṭān was able to furnish these new defences with large guns capable of firing across the channel. A restoration of the two fortresses was carried out in 958/1551 during the reign of Sulṭān Sulaymān Ḳānūnī (926-974/1520-1566). At this time the region of the Dardanelles was included in the *eyālet* of Djezāʾir-i Baḥr-i Sefīd, *i.e.*, it formed, together with some of the islands and coastal areas of the Aegean Sea, the province of the Ḳapudan Pāshā or High Admiral of the Ottoman fleet.

The fortifications along the shores of the Dardanelles fell gradually into disrepair during the late 16th and early 17th centuries. It was not until the Cretan War (1055-1080/1645-1669) that the Porte, under the threat of a Venetian irruption into the strait, initiated new measures of defence. Ḳalʿe-i Sulṭāniyye and Kilīd al-Baḥr now underwent (1069-1070/1658-1660) a thorough restoration. Moreover, new forts were built at the Aegean mouth of the Dardanelles-Sedd al-Baḥr on the European, and Ḳum Ḳalʿe on the Asiatic side of the channel. The danger arising from the presence of a Russian fleet before the Dardanelles during the Ottoman-Russian war of 1182-1188/1768-1774 led to the creation of new forts along the shores of the strait, this task being carried out under the guidance of the Baron de Tott. A further effort was made to establish a more modern system of fortification in the Dardanelles towards the end of the reign of Selīm III (1203-1222/1789-1807). The fact that in 1221/1807 an English fleet under the command of Sir John Duckworth forced a passage into the strait underlined once more the urgent need for a complete modernization of the defences on the Dardanelles. Control of the strait was to become thereafter a matter of more than local concern, the status of the Dardanelles (and also of the Bosphorus) being regulated in a series of international agreements negotiated during the 19th and 20th centuries. Of more recent events associated with the Dardanelles it will be sufficient to mention here the Gallipoli campaign of 1915-1916 fought in the course of World War I.

CANARY ISLANDS [see al-djazāʾir al-khālidāt]

ČANDĒRĪ, town and old fort in north-central India, 24° 42′ N., 78° 9′ E., on a tableland overlooking the Betwā valley on the east. Early references by al-Bīrūnī (421/1030) and Ibn Baṭṭūṭa do not mention the fort and probably relate to a site some 15 km. north-north-west known now as Būṛhī [Urdū, 'old'] Čandērī; here there are ruined Islamic fortifications among Hindū and Djayn remains, probably of the early 8th/14th century, for although the city fell in 649/1251 to Ghiyāth al-Dīn Balban, then *nāʾib* of Nāṣir al-Dīn, whose aim was the seizure of booty and captives, it did not come into Muslim hands until ʿAyn al-Mulk's defeat of the Rādjā Harānand in 705/1305. Four years later it formed the rendezvous for Malik Kāfūr's force before his march on Warangal in Telingānā. The new Čandērī seems to have been built by the Ghūrī kings of Mālwā in the early 9th/15th century (inscriptions of Dilāwar Khān and Hūshang, in *AR*, *ASI*, 1928-9, 128, and *EIM* 1943, 47), from whom it was wrested in the Mālwā interramal struggles by ʿAlāʾ al-Dīn Shāh Khaldjī I in 842/1438 (Bayley's *History of Gujarāt* [*Taʾrīkh-i Alfī*], 123), and remained under the Khaldjī's governors until the vacillating governor Bahdjat Khān revolted, supporting against Maḥmūd II his brother Ṣāḥib Khān, the puppet Muḥammad II, and appealing to Sikandar Lōdī of Dihlī for support in 919/1513. Hereafter Čandērī's position on the borders of Bundelkhand and Mālwā led to its changing hands frequently: Sikandar's forces remained in occupation until 921/1515, but after their withdrawal it was seized by the Rānā of

Čitawr who set up Medinī Rāy, Maḥmūd II's dismissed minister who had escaped the massacre at Māndū [q.v.], as governor; from him it was taken by Bābur in 934/1528, who restored it to Aḥmad Khān, son of Ṣāḥib Khān. Later it fell to the Pūrbīya Rādjput Pūran Mal, who lost it to Shīr Shāh c. 947/1540 but later retook it and massacred and degraded the Čandērī Muslims, an act which brought retribution from Shīr Shāh in 950/1543 (Briggs's *Ferishta*, ii, 160). After Akbar had gained the *sūba* of Mālwā, Čandērī became the headquarters of a *sarkār* (*Āʾīn-i Akbarī*, i, 122), when it was said to have been a large city with 14,000 stone houses and over 1200 mosques. Thereafter it passed frequently into Bundel hands, and after the early 12th/18th century remained in Hindū possession.

Monuments. The city is walled, with 5 gates, one of which is the Kātīghātī hewn through the rock outcrop; the fort, which stands some 70 metres higher, is dependent for its water supply on a large tank at the foot of the hill, access to which is by a covered way. (Map in Cunningham, *ASI*, ii, Plate XCIII). The Djāmiʿ Masdjid is similar to that of Māndū with its tall domes over the *liwān* stilted between springing and haunch, but with the cornice supported by a row of serpentine brackets, a contribution of Gudjarāt workmen; two tombs known as the madrasa and the Shāhzādī kā rawḍa are of excellent workmanship in a similar style; probably somewhat earlier is the Kūshk Maḥall, a large square building with intersecting passages on each of the remaining four storeys which divide the interior into four quadrants, in the suburb of Fateḥābād, 3 km. west, identified with the seven-storeyed palace (*Sāt manzil*) whose building was ordered by Maḥmūd Shāh I in 849/1445. At the western foot of the fort is an unattached gateway, the Bādal Maḥall darwāza, a triumphal arch between two tapering buttresses, somewhat over-ornamented.

Bibliography: Cunningham, *ASI*, ii, gives historical sketch with references to original sources in 404-12 (mainly Ferishta). Also C. E. Luard, *Gwalior State Gazetteer*, i, 1908, 209-12. Earliest inscr., 711/1312, in Ramsingh Saksena, *Persian Inscriptions in the Gwalior State* in *IHQ*, i, 1925, 653, there assumed to be from New Čandērī though this is not certain. On the monuments, Cunningham, *op. cit.*; M. B. Grade, *Guide to Chanderi*, Arch. Dept. Gwalior 1928; *ASI Annual Reports*, specially 1924-5, 163-4; Sir John Marshall, *The monuments of Muslim India*, in *Cambridge History of India III*, 1928, 622 ff.

(J. Burton-Page)

ČANKİRİ (earlier also known as *Kianghrī*, *Kanḳrī*, and popularly as *Čangïrï* or *Čengiri*), the ancient Gangra (in Arabic sources *Khandjara* or *Djandjara*), a town in the north of Central Anatolia, 40° 35′ north, 33° 35′ east, at the confluence of the Tatlïčay and the Acïčay, a tributary of the Kïzïl Irmak, at an altitude of 2395 ft. (730 m.); since 1933, on the Ankara-Zonguldak railway (105 m. (174 km.) from Ankara). The town was once the capital of a *sandjaḳ* (*liwāʾ*) of the *eyālet* of Anadolu; after the *Tanẓīmāt*, it became the capital of a *sandjaḳ* of the *wilāyet* of Kastamonu; under the Turkish Republic, it is the capital of a *wilāyet* (*il*) with 3 *kazas* (Çankırı, Çerkeš, and Ilgaz/Koçhısar).

It was known even in antiquity as a fortified place, and was occasionally used by the Byzantines as a place of exile. Later it again gained importance because of its impenetrable fortress in the battles with the Arabs and the Turks. The Umayyads repeatedly advanced as far as Khandjara in their raids against the Byzantines. They did this in 93/711-12 (al-Ṭabarī, ed. de Goeje, ii, 1236; Ibn al-Athīr, ed. Tornberg, iii, 457; al-Yaʿḳūbī, ii, 350 who calls the town *Ḥisn al-Ḥadīd*), in 109/727-28 (al-Yaʿḳūbī, ii, 395), and in 114/731-32 (Bar Hebraeus, *Keṯābā de Maḳṭebānūṯ Zabnē*, ed. Bruns and Kirsch, ii, 125; compare also al-Ṭabarī, ii, 1561, and Theophanes under the year 6224). When the Byzantines sacrificed the eastern border provinces as a result of their defeat near Malāzgird (Manzikert) in 1071, the Saldjūḳs and the Dānishmendids divided the loot. The former settled after a short intermission in Nicea (Iznik) and Konya, the latter spread over the northern half of Asia Minor from Amasya to Kastamonu. Čankïrï is mentioned as being among the conquests of the first Dānishmendids in 468/1075-76 (Ḥasan b. ʿAlī Tokādī (?), *Taʾrīkh-i Āl-i Dānishmand*, in Ḥusayn Ḥusam al-Dīn, *Amasya tarīkhi*, Istanbul 1322, II, 286 ff.; Hezārfenn, *Tanḳīḥ al-tawārīkh*, in *ZDMG*, 30, 470). In 1101, an army of crusaders left Constantinople for the region of the Dānishmend-oghlu, in order to rescue Bohemund of Antioch whom these had captured at Malatya and imprisoned in Nīksār. The army conquered Ankara and advanced towards Čankïrï (praesidium Gangara), but the attack failed, and shortly afterwards the army was completely routed near Amasya by the united Saldjūḳs and Dānishmendids (Albert of Aix, I. VIII, c. 8; Ibn al-Athīr, ed. Tornberg, x, 203; cf. *ZDMG* 30, 476; Chalandon, *Les Comnènes*, i, 224 ff.). The Comnene emperor John conquered Čankïrï in 1134, with the aid of heavy siege-weapons, after he had attacked it without success in the previous year (*Chronicle of Niketas*, i, c. 6, and particularly John Prodromos; see Chalandon, *op. cit.*, ii, 84 ff.); but shortly after the emperor's departure, the fortress was recaptured by the Dānishmendids, never to return to Byzantine rule.

Subsequently we find Čankïrï in the hands of the Saldjūḳs of Konya (cf. Chalandon, *passim*). After the collapse of the Rūm Saldjūḳ empire, (Anatolia), Čankïrï became part of the region of the Čandar-oghlu of Kastamonu. For a short time the town formed part of the empire of the Ottoman Murād I (this according to ʿAzīz Astarābādī, *Bezm u rezm*), later it was taken from the Čandar-oghlu by Bāyazīd I in 795/1392-93 (according to Neshrī) or in 797/1394-95 (according to ʿĀshiḳpashazāde, and the anonymous chronicles; Saʿd al-dīn, i, 150), together with the greater part of their possessions. In 1401, Tīmūr returned them and finally, in 822/1439, they were annexed by Meḥemmed I (ʿĀshïḳpashazāde, Istanbul edition, 88 f., ed. Giese, 79; Leunclavius, *Historiae Musulmanae Turcorum*, Frankfurt 1591, col. 475; von Hammer's statements, *GOR*, i, 70, are based on a misunderstanding). During the subsequent peaceful period under Ottoman rule, Čankïrï is very much in the background. Historians hardly mention it, though Ewliyā Čelebi (*Seyāḥatnāme*, iii, 250 f.) and Kātib Čelebi (*Djihān-nümā*, 645), have left detailed descriptions of the town. The first mention by an European visitor dates from the years 1553-55, and is by Dernschwam (in his *Tagebuch einer Reise nach Konstantinopel und Kleinasien*, ed. Babinger, Munich 1923, 196). There is an eye-witness description by Ainsworth, almost 300 years later. The town has also been visited and occasionally described by Russian and German travellers in Asia Minor.

The fortress, which had been attacked by Arabs,

Dānishmendids, Byzantines and Crusaders, is now in ruins. The only surviving monument is the grave of Ḳaratekin, who conquered the town for the first Dānishmendid prince, and is now revered as a saint. The prehistoric cisterns on the castle hill, which are described in detail by both Ewliyā Čelebi and Kātib Čelebi, have not yet been closely investigated, nor has the "Medjīd Tash" (Tash Mesdjid), a monastery of the Mewlewī Dervishes. This has inscriptions, which, according to what Ainsworth was told, date from the time of the Arab Caliphs. Some of the mosques are said to date back to Byzantine times (cf. Cuinet). The main mosque was built by Suleymān I in 996/1558-59.

The extensive salt-mines near Maghāra, 2 hours south-east of Čankiri (Cuinet, iv, 427, and Märcker), were already famous in Byzantine times. Their product was known as Γαγγρηνὸν ἅλας (Nikolaos Myrepsos, at the end of the 13th century, in Du Cange, *Glossar. ad scriptores med. et inf. Graec.*). Even today this salt is still being mined in the same way (at a rate of 3000 to 5000 tons a year.) The great earthquakes which have repeatedly shaken the town (the most recent in February 1944), were already mentioned in mediaeval times. Al-Ḳazwīnī, *Āthār al-Bilād*, ed. Wüstenfeld, 368, mentions one such catastrophe which destroyed the town in August 1050.

According to Texier, the number of inhabitants in Čankiri in the middle of the 19th century was 16,000, predominantly Muslim. Amongst the inhabitants there were not more than 40 Greek families. In 1839, Tshihatsheff estimates about 1800 houses, 40 of them Christian. For the end of the 19th century, Cuinet gives the following figures: 15,632 inhabitants, amongst these 780 Greek and 472 Armenian. The *Sālnāme* of Kastamonu gives the number of inhabitants as 11,200, Leonhard (1903) as 25,000 in 5000 houses, J. H. Mordtmann about 30,000 in 5000 houses, amongst these 150 Greek and 50 Armenian families, who probably left after the First World War. The 1950 census gave the following figures: the town of Čankiri 14,161, the *kaza* 73,402, and the *vilayet* 218,289 inhabitants

Taeschner])

CANNANORE [see kannanur]

ČAO (*čāw* Persian transcription of Chinese *tṣʿau*), name given to the paper currency that was in circulation in Iran for about two months in the autumn of the year 693/1294. The *Čao* was introduced at the instigation of the Chief and Finance Minister of the Ilkhān Gaykhātū (1291-95), Ṣadr al-Dīn Aḥmad b. ʿAbd al-Razzāḳ Khālidī or Zindjānī, following the example of China, and was issued for the first time, according to Rashīd al-Dīn, on the 19th Shawwāl 693/13th September 1294, according to Waṣṣāf and others somewhat later, namely in Dhu 'l-Ḳaʿda/ 23rd September—22nd October, at Tabrīz and other provincial capitals where it was manufactured and distributed by the so-called *Čao-Khānas*, specially constructed for the purpose at considerable expense.

This new currency however met with very great opposition and the result was that trade and industry came to a standstill, the towns became depopulated and the country headed towards complete ruin, so that after two months the paper money had to be withdrawn from circulation in favour of the old coins.

The *Čao*, made of the bark of the mulberry-tree, was oblong in shape and, in addition to some Chinese signs, bore the *shahāda*. Underneath this was the name "Īrīndjīn tūrčī" (transcription of "Rin-čʿen rdorje" meaning "very costly pearl") which had been given to Gaykhātū by the Tibetan Bakhshīs, and, inside a circle, the designation of the value: one (or one half) up to ten *dīnārs*. Besides this, these "bank-notes"—according to the continuator of the work of Bar Hebraeus—bore the red impression of the state seal in jade (the Altamġa), granted by the Great Khān to the Ilkhāns. As regards the method of printing, it may be assumed that this was done by means of wooden blocks.

ČAPANOGHULLARI [see Supplement and derebey].

ČAPAR (Čāpār), the eldest son of Ḳaidū [*q.v.*] and great grandson of the Mongol Great Khan Ögedey (Uk/gatāy: *regn.* 1229-41), after his father's death in 700/1301 and his own succession to the throne on the Imil in the spring of 702/1303 (Djamāl Ḳarshī in W. Barthold, *Turkestan*, Russian ed. i, 1900, 138), he fought in the beginning continually against the claims of Ḳubilay's successors upon the Great Khanate, considering it his own prerogative as one of Ögedey's descendants, who were the central "protectors of the genuine Mongol tradition". In August 1303, together with Duwa, the Khan of Čaghatāy's Ulus, he submitted to the Great Khan (the emperor of China) by means of an embassy to Khānbaligh (Peking). Thereby a plan for a Mongol federation with full freedom of movement for trade was to be realised. In September 1304 negotiations were made from China concerning it with the Īlkhān Öldjaytü [*q.v.*]. In fact, the federation did not last: with the aid of Chinese troops Duwa forced Čapar out of his Ulus in West and East Turkestan, and succeeded him there. After Duwa's death (1306-7) Čapar attempted to regain these provinces, but could not hold his own against Duwa's son Kebek (Turkish *Kepek* = "bran", cf. Ibn Baṭṭūṭa, ii, 392) and was forced in 1309 to flee to China and the court of the Great Khān. Thereupon a Ḳuriltay in the summer of 1309 confirmed the almost complete disintegration of Ögedey's Ulus, whose inheritance was for the most part taken over by the Čaghatāy line (cf. the article čingizids, II, beginning, and III). According to Rashīd al-Dīn (ed. Blochet, *Djāmiʿ al-tawārīkh*, ii, 9), Čapar looked "like a Russian or a Circassian", apparently no longer of pure Mongol stock.

ČĀSHNA-GĪR, in Persian, 'taster', title of an official, generally an *amīr*, at the court of the Muslim sovereigns (including the Mamlūks) from the time of the Saldjūkids. It is not always clear in what way he is connected with the overseer of the food, *khʷānsalār*; perhaps the two are often confused. The title does not appear to be found, even in Iran, under previous dynasties, although caliphs and princes did undoubtedly have overseers for their food, and even had it tasted before they eat, as the dishes were always suspected of being poisoned. The term *čāshna-gīr* is also found as the name of a kind of crystal decanter (al-Tanūkhī, *Nishwār*, viii, ed. Margoliouth, Damascus 1930, 150).

Bibliography: I. H. Uzunçarşılı, *ʿOsmanlı Devleti Teşkilâtına Medhal*, Istanbul 1941, index. (CL. CAHEN)

ČASHNAGĪR-BASHĪ. chief taster, a high official of the Ottoman court. Already under the Saldjūḳids and other Anatolian dynasties the *čashnagīr*, *amīr čashnagīr* or *amīr-i dhawwāḳ* appears among the most important officers of the Sultan. Ibn Bībī (*Al-Awāmir al-ʿAlāʾiyya*, edd. Necati Lugal and Adnan Sadık Erzi, Ankara 1957, 164) mentions the *čashnagīr* together with the *mīr ākhūr* and the amīr *madjlis*. In the *Ḳānūnnāme* of Meḥemmed II (*TOEM* Supplement 1330 A.H. 11-12) the *čashnagīr-bashī* appears as one of the *aghas* of the stirrup, in the group headed by the *agha* of the janissaries. He follows after the *Mīr-i ʿAlam*, *Kapîdjî-bashî*, *Mīr ākhūr* and *Čakîrdjî-bashî*, and precedes the other *aghas* of *böluks* [*q.v.*]. A document of 883/1478-9 lists 12 *dhawwāḳīn* (tasters) as subordinate to their chief Sinān Bey (Aḥmad Refīḳ, *Fātiḥ dewrine ʿaʾid wethīḳalar*, *TOEM*, no. 49/62, 1335-7, 15). Later the numbers of tasters employed rose considerably, reaching as high as 117 (ʿAyn-i ʿAlī, *Ḳawānīn-i Āl-i ʿOthmān*, 97). In the 18th century, D'Ohsson mentions only 50, and gives the *čashnagīr-bashī* a much lower rank, in the 5th class of the outside service (*bīrūn*), under the Commissioners of Kitchens. By this time he has clearly fallen in status, and has responsibilities more strictly related to the preparation of food.

CASTILLE [see ḲASHTĀLA]

CASTRO GIOVANNI [see ḲAṢR YĀNĪ]

ČATĀLDJA (Çatalca, ancient Metra). 1. 41° 08′ N, 28° 25′ E. Thracian capital of the most rural of the 17 *ḳaḍāʾ*s in the *wilāyet* of Istanbul, 56 km. by asphalt road and 71.41 km. by rail (the station lies 2.3 km. NE of town) WNW of Istanbul. Çatalca borders the Kara su (ancient Athyras) stream at an altitude of 255 feet near the centre of a range of hills forming the backbone of the fortified "Çatalca Lines" extending from the Black Sea at Karaburun to the Marmara at Büyükçekmece. Çatalca was taken from the Byzantines by Murād I in 775/1373. The fortifications were built during the Russo-Turkish war of 1294-5/1877-8, but were passed without fighting by the Russians in their advance to San Stefano. The Çatalca Lines were a rallying point for Maḥmūd Shewket Pasha's forces which put down the abortive counter-revolution at Istanbul in April 1909. In November 1912 retreating Turkish troops repulsed the Bulgarians at Çatalca. The fortifications were reconditioned but saw no action in the 1914-18 and 1939-45 World Wars. Since 1950, Turkish forces have been substantially withdrawn with adverse economic consequences for the district. Some promise of producing oil wells and a proposed atomic reactor may counteract this trend. In 1955 the population was growing fast with 5,534 in town and 58,988 in the *kazas* 3 other *nahiye*'s of Büyükçekmece, Hadımköy (Boyalık) and Karacaköy, and in its 67 villages. Population pressure on the land area of 1684 sq. km. is causing litigation. The district produces beets, sunflowers, grapes, vegetables and cattle. In 1953 there were only four small industries, some 30 shops, 2 elementary and 1 middle schools in Çatalca.

2. Çatalca is also the Ottoman name of Pharsala, a town and *ḳaḍāʾ* in Thessaly 60 km. SE of Trikala, captured in 799/1397 by Bāyazīd I (Hammer-Purgstall, i, 250). According to Shams al-Dīn Sāmī (*Ḳāmūs al-Aʿlām*, iii, 1867) it had a population of 5,000 under Ottoman administration and boasted 6 mosques, a *medrese*, many *tekke*'s, notably that of Dūrbālī Bābā, the Bektāshī and 91 villages in a fertile plain.

3. Çatalca is also the name of a village in the *ḳāḍāʾ* of Nizip (Nisib) in the *wilāyet* of Gazi Antep (Ghāzī ʿAyntāb). The word *Çatal*, or fork (cf. *Tanıklariyye Tarama Sözlüğü*, i, Istanbul 1943, ii, 1945, 213) figures in 82 names of inhabited places in Turkey (*Türkiye'de Meskun Yerleri Kılavuzu*, i, Ankara 1946, 240-1).

CAUCASUS [see ḲABḲ]

CAUSE [see ʿILLA]

ČĀʾŪSH (modern Turkish: *çavuş*). A term used by the Turks to indicate (a) officials staffing the various Palace departments, (b) low-ranking military personnel. The word is met in Uygur, where it refers to a Tou-kiu ambassador; Maḥmūd Kāshgharī defines it as 'a man who controls promotion in army ranks, and supervises the maintenance of discipline'. The word *čāʾūsh* passed from the Pečenegs and Saldjūḳids to the Turks (cf. the μέγας τζαούσιος, chief of the imperial messengers of the Lascari and Paleologi). The Persians used it as a synonym for *sarhang* and *dūrbāsh*, and under the Arabs it became variously *djāʾūsh, shāʾīsh, shāwīsh*, and *shāʾūsh*. It is still seen in the latter form in N. Africa, where it means a court usher or mace-bearer.

Under the ancient Turks, the Saldjūḳids, the Ayyūbids, and the Mamlūks, the *čāʾūsh* formed a privileged body under the direct command of the ruler, and often appointed to a special rôle. Under the Ottoman Turks, the *čāʾūshes* of the Dīwān were part of the official ceremonial escort when the Sultan left the palace, or when he was receiving viziers, foreign ambassadors etc. The Sultan or Grand Vizier also used them as ambassadors and envoys to convey or carry out their orders. The *čāʾūsh bashi*, chief of the *čāʾūshes* of the Dīwān, acted as deputy to the Grand Vizier, particularly in the administration of justice; being a court official, he was a member of the "āghās of the stirrup". The *čāʾūshes* of the Dīwān were either paid out of treasury funds or allotted *zeʿāmets* or *arpalıḳs*. Furthermore, in the *odjaḳ* of the Janissaries, the 5th Orta consisted of 330 *čāʾūshes*, men already of long service, under the command of a *bāsh-čāʾūsh*.

The ranks of *čāʾūsh* and *čāʾūsh wekīlī* were used in the cavalry and navy at the beginning of the 19th century. When the army was reorganized in 1241/1826, a *čāʾūsh* held the equivalent rank of a sergeant, and the system remains the same to this day.

In certain religious sects and orders (*e.g.*, Yazīdī and Rifāʿī), the title *čāʾūsh* corresponded to a grade in the hierarchy of the sect. There were also *čāʾūshes* in the guilds, where they were responsible for seeing that the rulings of the Guild Council were enforced.

Bibliography: Important bibliography contained in the article '*çavuş*' by M. F. Köprülü, in *İA*, iii, fasc. 25, 362-369. Additional works: Gibb-Bowen, I/1, 1950, *index*; L. Bréhier, *Les Institutions de l'Empire byzantin*, Paris 1949, 148. (R. Mantran)

ČĀWDORS (or DJĀVULDUR), a Turcoman tribe, the first settlers of which came to Khwārizm in the 16th and 17th centuries, the bulk following in the 18th century. After the wars against the Khānate of Khīwa, a proportion of them was driven off to the Manglshlaḳ peninsula, whence some clans emigrated to the steppes of Stavropol'. Part of the tribe submitted to Khīwa and settled permanently in Khwārizm.

It is now a sedentary tribe with a population of some 25,000, in the Nukhus area (Autonomous Soviet Socialist Republic of Ḳara-Ḳalpaḳistān). [See: TÜRKMEN]. (Ed.)

ČAWGĀN (Pahlawī: *čūbikān*; other forms: *čūygān* (attested in Ibn Yamīn); *čūlgān* (cf. *čūl*, in Vullers, *Lexicon persico-latinum*; compare Arabic *sawladjan*); Greek: τζυκάνιον, French: *chicane*), stick used in polo (*bolo*: Tibetan for '*ball*', introduced into England around 1871); used in a wider sense for the game itself, (*gūy-u*) *čawgān bāzī*, "game of (ball and) *čawgān*"; also used for any stick with the end bent back, particularly those for beating drums. The *čawgān* is not the same as the mall (*malleum*), which is a hardwood sledge-hammer. According to Quatremère (*Mamluks*, i, 123), the *sawladjān*, a bent stick, was used for mall (polo), and the *djūkān* (*čawgān*), with a hollow scooped out of the end, for rackets; but Van Berchem (*C.I.A. Jerusalem-ville*, publ. *IFAO*, 1923, 269, n. 1) raises the objection that al-Ḳalḳashandī does not make this distinction. The game originated in Persia, and was generally played on horseback, though sometimes on foot (*čawgān piyāda bāzī*, testified by the *Akbar-nāma*, quoted by Quatremère, 130). The earliest reference to it is in the short historical romance, *Kārnāmagh-ī Ardashēr-ī Pābhaghān* ("Deeds and exploits of Ardashīr") written in Pahlawī in the early 7th century: Ardashīr (Nöldeke, 39) and his grandson Ohrmizd (*id.*, 68) excelled at the game; the latter passage is reproduced almost word for word in al-Ṭabarī (quoted by Quatremère, 123), and put into the form of a poem by Firdawsī (*Shāhnāma*, tr. Mohl, v, 274), but in both texts Ohrmizd is replaced by his father Shāpūr. Quatremère's detailed and learned note provides many quotations: from Cinnamus, on the popularity of τζυκάνιον in Byzantium (122); from the *Aghānī* and al-Masʿūdī, on the *sawladjān* (124); from the *Ḳābūs-nāma*, on the dangers of the game (125) and the notable accidents it had caused (*ibid.*, and 127, 129); from Abū Shāma, on its suitability for keeping soldiers and horses in good physical condition; from various other writers (its popularity with the Mongols, Kurds, and rulers of Egypt) (126-28); on the metaphorical use of *gūy, čawgān* and *sawladjān* in prose and poetry (130-132). To these literary texts many more could be added, but it suffices to mention the references to Firdawsī (tr. Mohl, especially vii, 224; and F. Wolff, *Glossar zu Firdosis Schahname*, under *gōy* and *čōgān*), Niẓāmī (*Khusraw u Shīrīn*: description of a game between two teams of female players, led respectively by the king and his favourite), Saʿdī (cf. Massé, *Essai sur Saadi*, 228), a poem of Ḥāfiẓ (*Dīwān*, ed. Ḳazwīnī-Ghanī, no. 271, and ed. Khalkhalī, no. 268, v. 6), and above all the short mystical poem of ʿĀrifī (15th century), *Gūy u Čawgān* (see *Bibl.*). The game began by one of the players throwing the ball as high into the air as possible; another caught it and did the same thing, and thus the ball passed from team to team (there were originally four players in each team; see Firdawsī, *op. cit.*, ii, 250 ff. and 288). The *Ḳābūsnāma* (cf. R. Levy, *A Mirror for Princes*, London 1951, 86) kept the same number of players, "in order to avoid a dangerous scramble". Anthony Sherley gave a brief description of the game at the end of the 16th century, when he was at the court of the Shāh ʿAbbās (quoted by Sykes, 341); 12 players divided into two teams, and each carried a long-handled *čawgān* no thicker than the finger. Chardin (approx. 1675) described the game as follows: "the object is to get the ball through the opposing side's posts, which are at the end of the

pitch and through which one can pass (*Voyages*, iii, 181); . . . as the stick (*čawgān*) is short, the riders must bend below the level of the pommel . . . . and strike the ball on the gallop; the game is played between teams of 15 or 20 players" (440). A similar account is given in the early 19th century by Malcolm (*History of Persia*, i, 299 n.); both he and Chardin remark on the shortness of the *čawgān*, and here they are at variance with Sherley. But the information given by Sherley on the positioning of players and posts and the size and shape of the mallets agrees with the pictures on two 16th century miniatures, one in the British Museum (MS. Add. 27257, fol. 107), the other in the Imperial Persian Library (reproduced in "*Iran*", publ. by New York Soc. in conjunction with UNESCO). They illustrate the text from Niẓāmī's *Khusraw and Shīrīn* (mentioned above); one can clearly see the *čawgān*'s long thin handle and convex end (*čawgān*s of the same shape can be seen in the Victoria and Albert Museum, Salting Bequest miniature, no. 1228, 16th cent., and another miniature reproduced in René Grousset, *Civilisations de l'Orient*, i, 243, 16th century). In the British Museum miniature (Add. 27257) the mallets have circumflex-shaped heads; another 16th century miniature (H. d'Allemagne, *Du Kurdistan au pays des Bachktiaris*, i, 160) reveals both the above head and also the hammer type, with tapering handles. Others were shaped rather like a golf club; see A. Sakisian, *La miniature persane*, fig. 48 (dated 1410, Shīrāz school). An even earlier shape is mentioned by Cinnamus (quoted by Quatremère, 122: "stick with a large round end, inside which small cords are intertwined"—it was thus a sort of racket) and by the *Inshā'* (quoted by Quatremère, *ibid.*, "a stick with a bulging conical head made out of wood", *i.e.*, "convex"; *maḥdūdba* should be corrected to *maḥdūba*); this short spoon-shaped *čawgān* figures on a modern miniature of Indo-Persian style, signed and dated (Sykes, 336); another Indo-Persian miniature, more realistic, of the 18th cent., is contained Kühnel, *Miniaturmalerei in Islam. Orient.* pl. 112. The text of the *Inshā'* (and of two others, Nuwayrī and Khalīl Dhahirī, quoted by Quatremère) concerns the *djūkāndār*, an official responsible for the care of the *čawgān*s and for the conduct of the game. The coat of arms (two curved *čawgān*s placed back to back) of this officer is known from the inscriptions and coats of arms, on the one hand, of a *madrasa* in Jerusalem (built by Il-malak, *djūkāndār* to the Mamlūk sultan of Egypt, al-Malik al-Nāṣir, 1340), and of a lantern inscribed with the name of the same person, preserved in the Istanbul Museum (studied by M. van Berchem, *C.I.A. Jerusalem-ville*, 266-270, publ. *IFAO*, Cairo 1923), and on the other hand, of the tomb of a *djūkāndār* (d. at Marāgha, 1328) of the Egyptian sultan Ḳalā'ūn (A. Godard, *Āthār-è Īrān*, i, 1936, 144-149, fig. 101 & 103). According to Sykes, the political chaos following the fall of the Ṣafawids resulted in the disappearance of the game, and now it is played only in certain parts of India; Sykes claims to have reintroduced it into Tehran *ca.* 1897.

ČAY. Tea appears to be mentioned for the first time in an Arabic text by the author of the *Akhbār al-Ṣīn wa'l-Hind* (ed. and transl. by J. Sauvaget, 18), under the form *sākh*, whereas al-Bīrūnī, *Nubadh fī Akhbār al-Ṣīn*, ed. Krenkow, in *MMIA*, xiii (1955), 388, calls it more correctly *dja'*. It was introduced into Europe towards the middle of the 16th century by the Dutch East Indies company; but it is only in the middle of 17th century that its use spread, particularly in England.

In Morocco the first mention of tea dates back to 1700. It was a French merchant, with business contacts in the Far East, who introduced it to the sultan Mawlāy Ismā'īl. For a long time this commodity remained rare and expensive. At first the use of tea was known only to the bourgeoisie, but it afterwards spread to all classes of society. In Morocco mint tea has become the national drink. Its properties, and the ceremonies of its preparation and consumption have been the subject of several poems in Arabic and Berber; at the court of the sultans of Morocco a special corps of officials, called *mwālīn ātāy*, was formed to prepare it.

In Morocco, in Mauretania, and in the departments of Oran and Algers, the name of tea is *ātāy*. Tunisia and the department of Constantine use *tāy*. In Libya *shāhī* is found; this perhaps represents the Eastern Arabic *shāy*, contaminated, by popular etymology, with the root *sh-h-w*.

The radical *tāy* certainly seems to come from the English 'tea', but with the pronunciation (*tei*) which this word had until about 1720, when it rhymed in fact with 'obey' and 'pay' (cf. Yule, *Hobson-Jobson*, 1903, 905). It is known that it was English merchants who introduced the use of tea in Morocco, and that for a long time they kept a virtual monopoly on its importation.

As for the prefix *ā-*, which figures in western Maghribī names, it must represent the Berber definite article in the masculine singular. Indeed, in Morocco and Tlemcen, its presence dispenses with the use of the Arabic definite article. Therefore the word *ātāy* was probably borrowed through Berber; it is established that in the 17th century the principal centres for importation were Agadir and then Mogador, which are situated in Berber-speaking country. [For *Čay* and *Čaykhāna* in Persia and Central Asia, see SUPPLEMENT].

(G. S. Colin)

ČEČENS, name given by the Russians to a Muslim people living in the valleys of the southern tributaries of the Sunja and Terek Rivers in the Central Caucasus (native name = Nakhčio or Veynakh).

The Čečens belong to the linguistic family of the Ibero-Caucasian peoples; their language forms with Ingush, Batzbi and Kistin a special group rather close to that of the Dāghistānī languages.

The Čečens are the descendants of autochthonous Ibero-Caucasian tribes which were driven back and kept in the high mountains, between the pass of Daryal and the valley of Sharo-Argun, by the Alains. Nearly all their history until the 18th century is unknown; we know only that it is in the 16th century that their tribes of shepherds began to emigrate into the piedmont which today forms the northern part of the Čečens country (in Russian "Cečnya"). At first subject to the Kabard princes [*q.v.*], they made themselves independent in the 18th century, a little before the arrival of the Russians.

Sunnī Islam of the Ḥanafī school penetrated into their country only from the 17th century, both through Dāghistān and Crimea, but until the middle of the 18th century it remained rather superficial; it was firmly implanted only at the end of the century thanks to the influence of the Naḳshbandīs. Among their western neighbours, the Ingush [*q.v.*], it was implanted still later, in the first half of the 19th century. At the beginning of the 20th century some traces of animism still persisted (cult of the patron spirit of the clan).

At the time when the first Russian detachments appeared, the Čečens were divided into clans, of which some were grouped together in tribes: Mičik, Ičkeri, Aukh, Kist, Nazran, Ḳarabulakh, Ghalghay (this latter gave birth later to the Ingush nation). The term "Čečen" was applied by the Russians to the whole of these tribes in the middle of the 18th century from the name of the "Čečen" *aul* on the river Argun where, in 1732, there occurred the first combat between a Russian detachment and the natives. The Russian advance toward the south began in the middle of the 18th century and was accelerated after the annexation of Eastern Georgia in 1801; it was slow and methodical, marked by the construction of fortresses, the establishment of Cossack colonies and the destruction of the villages of the natives, who were driven always back toward the high mountains. The Čečens offered fierce resistance to the Russian advance. A popular movement, directed by the Shaykh Manṣūr Ushurma, burst out in 1785 and was crushed only in 1791. In the first half of the 19th century the Čečen country became the principal bastion of the imāmate of Shamīl (cf. Dāghistān and Shamīl), and the Russian domination was imposed only in 1859; it was moreover marked by frequent revolts, of which the most important, that of ʿAlibek Aldamov of Simsiri in 1877, lasted a year and spread to all the Čečen country. In 1865, an important group of Čečens, nearly 40,000, emigrated to Turkey. On the eve of the revolution of 1917, the Čečen country was pacified and partially colonized by Russian colonists (especially Cossacks) in the plains of the north. Moreover, the discovery of the petroliferous strata at Groznïy attracted a growing number of Russian workers (10,000 in 1905, more than 20,000 in 1917).

Until the Revolution, Čečen society preserved a very archaic proto-feudal social structure, less developed than that of their Dāghistān and Kabard neighbours. The great patriarchal family of 40 to 50 people maintained its position almost everywhere as also the rigorously exogamous clans, *taïpa*, gathering together the descendants of a common ancestor. Finally, Čečen society did not recognize any division into social classes, all the Čečens considering themselves as *uzdens*, "nobles".

Soviet Čečnya. — After the October Revolution, the Čečen country was the last bastion of native resistance against the Soviet regime (Imāmate of Uzūn Ḥadjdjī, cf. Dāghistān); on 20 January 1921, it was included in the Mountain Republic (*Gorskaya Respublika*), and on 30 November 1922 upper Cečnya was set up as the Čečen Autonomous Region. On 7 July 1924 the Ingush country situated to the west of Čečnya was, in its turn, transformed into the Ingush Autonomous Region (cf. Ingush). On 4 November 1929 the lower country with Groznïy was included in the Čečen Autonomous Region. In January 1934, the two autonomous regions were joined into one, the Čečen-Ingush Autonomous Region, which was transformed on 5 December 1936 into the Čečen-Ingush Autonomous Soviet Socialist Republic. On 25 June 1946 a decree of the Supreme Soviet of the U.S.S.R. abolished the Republic, and Čečen and Ingush people were deported to Central Asia (the same decree affected other Caucasian peoples: Balkars, Karačays [*qq.v.*]). On 9 January 1957 a new Supreme Soviet decree rehabilitated the deportees and re-established the Čečen-Ingush Autonomous Soviet Socialist Republic, authorizing the survivors to return to their country between 1957 and 1960.

At present, the Čečen-Ingush A.S.S.R. (area 19,300 sq. km.) has a total population of 700,000 inhabitants (1958), the Čečens representing as yet only a minority.

The census of 1939 counted 407,724 Čečens, of whom roughly 30,000 were in the A.S.S.R. of Dāghistān and the rest were in their own Republic; the Ingush numbered 92,074 in the western part of the Republic (the high valleys of Asa, Sunja, and Kambileyka). The capital Groznïy, a big industrial centre (226,000 inhabitants in 1926), is an almost entirely Russian city.

The Čečen-Ingush now form a "nation", divided into two "nationalities" very closely related to one another. In fact, nothing distinguishes these two peoples except the fact that the Ingush have taken only a negligible part in the Shamīl movement. They speak very similar languages, Ingush being simply a dialect of Čečen. The Čečen language properly speaking is divided into two dialects—Upper Čečen (or Čaberloy), spoken in the nountains, and the Lower Čečen of the plains; this latter, the basis of the written language, is endowed with a Latin alphabet (after a fruitless attempt to transcribe Čečen into Arabic characters). For its part, Ingush was established as a written language in 1923 (based on the Lower Ingush dialect of the plains) and also transcribed into Latin characters. In 1934, after the fusion of the two Autonomous Regions, Čečen and and Ingush, the two written languages were unified into a single language—"Čečen-Ingush", written

from 1938 in a Cyrillic alphabet. At present, they are once more officially separated. The new Čečen-Ingush literature has developed only during the Soviet period.

(A. Bennigsen)

CELEBES, one of the four larger islands in Indonesia. With the exception of the north-eastern peninsula, which was one of the areas of early Christianization, and the south-western peninsula, where Islām also started its penetration in the 16th century, the island remained inaccessible to the influence of foreign religions until the second half of the 19th century. A new Christian community then came into existence in Central Celebes, inhabited by the Jo-Radja. It is said that this community suffered a great deal from the military activity of the Dār al-Islām movement after Indonesia became a republic in 1949; reliable information is lacking, however. The Muslim community of the south-western peninsula is not very different from those elsewhere in Indonesia; some details on its history are given under Makasar. For a general discussion of Indonesian Islām cf. djāwa. (C. C. Berg)

ČELEBĪ (Turkish), "writer, poet, reader, sage, of keen common sense" (thus Moḥammad Khōʾī in *Khulāṣa-i ʿAbbāsī*, in P. Melioranskiy, *Zapiski Vostočnago Otděleniya*, xv, 1904, 042; similarly Aḥmed Wefīḳ Pasha in *Lehdje-i ʿUthmānī*, i, 1876, 482). It is a term applied to men of the upper classes in Turkey between the end of the 13th and the beginning of the 18th century, as a title primarily given to poets and men of letters, but also to princes (thus all the sons of Bāyazīd I (d. 805/1403) were given it). An Ādharbaydjānī poet of the 9th/15th century, Ḳāsim-i Anwār (died 835/1431-2) uses Čelebī also in the sense of the mystical term 'Beloved', *i.e.*, God (C. Salemann in *Zapiski Vost. Otd.* xvii, 1907, XXXIV). Heads of an order were also called Čelebī; it was applied to the head of the Mawlawī [*q.v.*] order from the time of Djalāl al-Dīn Rūmī's successor, Čelebī Ḥusām al-Dīn (died 1284/683 [*q.v.*]) right into the 20th century. According to its usage, the word would thus correspond roughly to the Persian Mīrzā [*q.v.*] from *amīr-zāda*. In its secular meaning the word has been replaced by *Efendi* [*q.v.*] in the Ottoman empire since ca. 1700. Occasionally, Čelebī also appears as a proper name. In Syrian and Egyptian Arabic, *shalabī/djalabī* today has the meaning of 'barbarian'.

There has been no satisfactory explanation of the origin of the word. The following have been suggested: 1) as late as the 7th/13th (!) century, borrowed by the Nestorian Mission from the Syrian *ṣĕlībhā* 'cross', which was subsequently taken to mean a worshipper of the crucifix (Aḥmed Wefīḳ Pasha, *Lehdje, loc. cit.*); the same, though taken over considerably earlier: Viktor, Baron Rosen in *Zapiski Vost. Otd.* v, 305 ff.; xi, 310 ff.; with additional source references also found in P. Melioranskiy, *Zapiski Vost. Otd.* xv, 1904, 036 ff.; cf. also Menges, as in the bibliography; the same, but taken over in Anatolia, perhaps through Kurdish intermediation (cf. below, no. 4): Nikolay N. Martinovitch, JOAS 54 (1934), 194-9 (although the Nestorians never played a role in Anatolia); 2) from the Arabic *djalab*, pl. *djulbān*, "imported slave", a separate body in the Mamlūk period in Egypt, which was specially trained in administrative work, Woldemar, Frh. von Tiessenhausen in the *Zapiski*, xi, 1898, 307 ff.; 3) from the Greek καλλιεπής "beautifully speaking, singing, writing", hence, as early as Byzantine times, "of high rank": thus Čelebī would appear to have developed in Anatolia: V. Smirnov in *Zapiski* xviii, 1908, 1 ff. (according to a private communication from F. Dölger, 3/I/1959, the meaning "of distinguished rank" is, however, not verifiable in Greek): 4) taken from the Kurdish *theleb* "God", *thelebi* "noble lord, wandering minstrel" which, in turn, had come into that language "from a non-Indo-European language": this is the explanation given by Nik. Jak. Marr in *Zapiski* xx, 1910, 99/151, and it is based on his Japhetic theory; 5) from the Anatolian Turkish *čalab/čäläb* "God" (there are examples in the 13th-15th centuries in Mansuroğlu, and in later centuries current particularly among the Yürüks [*q.v.*], a word which, according to Muḥammad Khoʾī, *Khulāsa-i ʿAbbāsī* [excerpt from Mīrzā Mahdī Khān, *Senglākh*] comes from the Greek. K. Foy, in *MSOS, Westasiat. Studien*, ii, 124; P. Melioranskiy in the *Zapiski*, xv, 1904, 042; W. Barthold also favours this view (in which case the development would be opposite to that of the Iranian word khvadhāi "lord" > khudā "god"); 6) Mansuroğlu (see bibliography) is undecided, but he does not believe in the foreign origin of the word. — Several of these attempts at a derivation (1, 2, and 4 in particular), seem impossible and far fetched. Though the word is apparently of Anatolian origin, there is no evidence of its Greek descent [as—on the contrary—Efendi]. It seems doubtful whether Ibn Baṭṭūṭa (ed. Defrémery and Sanguinetti, ii, 270), means "Greek" in his mention of the meaning of the word Čelebī "in the language of Rūm" (thus W. Barthold), or whether this is merely a reference to its use in Anatolia. To the Greeks (such as G. Phrantzes, *Chron.* 70), the word Čelebi appears Turkish.

Bibliography: The most recent survey of the etymology is by M. Manṣūroğlu, in the *Ural-Altaische Jahrbücher*, xxvii, 1955, 97/99; E. Rossi in *Türk Dili Araştırmaları Yıllığı: Belleten* 1954, 11/14; K. H. Menges in *Supplement to Word VII*, Dec. 1951, 67/70. Concerning the Greek sources of the word, G. Moravcsik, *Byzantino-Turcica*², Berlin 1958, ii, 311.

ČELEBI EFENDI [see djalāl al-dīn, mawlānā]

ČELEBI-ZĀDE (or Küčük čelebi-zāde) Ismāʿīl ʿĀṣim Efendi, 18th century Ottoman historian, poet and *shaykh al-islām*. His familiar name (*laḳab*) derives from his father Küčük Čelebi Meḥmed Efendi (*Sidjill-i ʿOthmānī*, iv, 205) who was "foreign secretary" (*reʾīs ül-küttāb*) for about ten months in 1108-09/1699 (Rāshid, *Taʾrikh*, ed. 1282, ii, 387, 421). He was born in Istanbul, and, from the statement of Müstaḳīm-zāde Süleymān Efendi (*Tuḥfe-i Khaṭṭāṭīn*, Istanbul 1928, 650) that he was 77 years of age at the time of his death, his birth should be fixed about 1096/1685 about 1096/1685. His contemporary, Sālim Efendi (*Tedhkire-i Shuʿarā*, Istanbul, 1315, 452) says that he was given the grade of *mülāzim* by Fayḍullāh Efendi in 1108/1696-97, but, as M. C. Baysun suggests (*İA*, fasc. xxv, 371 b), this was

probably an honorary degree conferred on the boy of twelve out of respect for his father's position —an action quite in character for this notoriously simonistic *shaykh al-islām*. (cf. Naʿīmā, *Taʾrīkh*, ed. 1280, vi, Supp., 6-7. It is probable that the *mustaḳillan* of Sēlim's text should be corrected to *mustaḳbilan*, "in anticipation"). His teaching career, all of which was passed in Istanbul, began in 1120/1708 at the *madrasa* of Kenʿān Pasha, from where he advanced to the Dizdāriyye (1125/1713), the Aḥmed Pasha in Demir Ḳapî (1130/1718), the ʿĀrifiyye (1131/1719) and finally (1135/1723) the *madrasa* founded by his father-in-law, the *ḳāḍī ʿasker* ʿÖmer Efendi, in Mollā Gūrānī (Sālim, *op. cit.* and Ismāʿīl ʿĀṣîm, *Taʾrīkh*, ed. 1282, 110). On 28 Ramaḍān 1135/5 April 1723, he was appointed official historiographer (*waḳāʾiʿ-nüwīs*) in succession to Rāshid Efendi, which post he filled until about 1143/1730 when his patron, the Grand Vizier Ibrāhīm Pasha, was sacrificed to the rebels and his favourites driven from office (cf. AḤMAD III). In 1145-46/1732-33, he was *ḳāḍī* of Yeñi Shehr (Larissa in Thessaly); in 1152-53/1738-39, of Bursa; in 1157-58/1744-45, of Medīne; and in 1161-62/1748-49, of Istanbul. His next appointment did not come until 1170/1757, when he was made *ḳāḍī ʿasker* of Anatolia for one year; and on the 5 Dhu 'l-Ḳaʿda 1172/30 June 1759, he attained the ultimate dignity of *shaykh al-islām*, in which office he died after eight months (28 Djumādā II 1173/16 Feb. 1760). He was buried next to his father-in-law, ʿÖmer Efendi, in the courtyard of Mollā Gūrānī (Ḥāfiẓ Ḥuseyn Efendi Ayvānsarāyī, *Ḥadīḳat al-Djewāmiʿ*, Istanbul 1291, i, 208).

His history (twice printed as a supplement to that of Rāshid: Istanbul 1153 and 1282) covers the period 1135-41/1722-29, and although, even by the standards of the official histories, notably superficial and frequently little more than a court chronicle, it has some of the virtue of its defects in being a wholly characteristic expression of the frivolity and complacency of the so-called Tulip Period of Ottoman history. In his verse he uses the poetic signature (*makhlaṣ*) ʿĀṣim; and while his stature as a poet is overshadowed by such great contemporaries as Nedīm, Seyyid Wehbī and Neylī, nevertheless, his *dīwān* (lithographed, Istanbul 1268), with its graceful language and delicate sententiousness, has always been regarded as one of the masterpieces of this period in which Ottoman *dīwān* poetry finally develops its own recognizably authentic voice. His abilities and range as a prose writer can be better appreciated from his collected letters (*Münsheʾāt*: Istanbul 1268) than from his history, where he deliberately models his style on that of Rāshid Efendi. His only other surviving work is a translation from the Persian commissioned by Dāmād Ibrāhīm Pasha of the *Sefāret-nāme-i Čīn* of Ghiyāth al-Dīn al-Naḳḳāsh (Browne, iii, 397; M. F. Köprülü, *MTM*, ii (1331), 351-68) under the title *ʿAdjāʾib al-Laṭāʾif* (ed. ʿAlī Emīrī, Istanbul 1331). A *Mawlid risālesi* attributed to him by Müstaḳīm-zāde (*op. cit.* 651) is otherwise unknown.

Bibliography: The only reliable biographical information is in the notice by M. C. Baysun already referred to (but on 372a, l. 3, for *cemāziyel-evvel* read, after Sālim, Djumādā II). Babinger, 293, is a not entirely exact translation of the *Sidjill-i ʿOthmānī*, i, 366, which itself contains errors. Both Djemāl al-Dīn, *Āyīne-i Ẓurafāʾ*, Istanbul 1314, 45 and Rifʿat Efendi, *Dawḥat al-Meshāʾikh*, Istanbul n.d., 101 derive from Wāṣif, *Taʾrīkh*, Istanbul 1219, i, 179. In addition to Sālim, *op. cit.*, Ṣafāʾī (*Tedhkire*, Millet, ʿAlī Emīrī, 771), 279 and Rāmiz (*Ādāb-ı Ẓurafāʾ*, Millet, ʿAlī Emīrī, 762), 173 are contemporary opinions of his poetry. Apart from the short article of ʿAlī Djānib, *Ḥayāt*, i, no. 20 (1927), 3-5, no study has been made of his *dīwān*, which, moreover, requires re-editing from the Bāyezīd MS., no. 5644, with marginal corrections in his own hand. Sadeddin Nüzhet Ergun, *Türk Şairleri*, i, 108-111, contains extracts from some of the sources mentioned above; references to Faṭīn, von Hammer, Gibb, etc. may be found in Babinger.

ČELEBI ZĀDE EFENDI [see SAʿĪD EFENDI]

ČENDERELI [see DJANDARLI]

ČEPNI, an Oghuz tribe, which holds an important place in the political and religious history of Turkey, and in the history of its occupation by the Turks. The most intimate *mürīd*s of Ḥādjdjī Bektāsh belonged to this tribe, an important branch of which must therefore have been living in the Ḳîrshehir region in the 13th century. In the second half of this century there was another important group of the Čepni in the Samsun region, who in 676/1277 successfully defended Samsun against the forces of the Emperor of Trebizond, and in the 14th century played the chief part in the conquest of the Djānik (Ordu-Giresun) district; the Ḥādjdjī Emīrli principality which controlled the Ordu-Giresun region in the 14th century was probably founded by this tribe. At the beginning of the 16th century the region round Trabzon, especially to the west and south-west, was in their hands and was hence called *wilāyet-i Čepni* after them. From the 16th century onwards they began to penetrate the region east of Trabzon too, where even in the 18th century the Čepni were waging fierce struggles with the local people. Thus the Čepni played a very important rôle in the conquest and turcicization of the Samsun-Rize area.

Important groups connected with this tribe are found in other parts of Turkey too in the 15th and 16th centuries. The largest lived in the Sivas region and practised agriculture. There was another important group among the Türkmens of Aleppo, one branch of which began to settle in the ʿAyntāb area in the 16th century; another, generally called the Bashîm Ḳîzdîlu, migrated to western Anatolia and settled in the districts of Izmir, Aydîn, Manisa and Balikesir.

There was another important branch of the Čepni in the Aḳ-ḳoyunlu confederation; they were led, in the time of Uzun Ḥasan and his first successors, by Il-aldî Beg, and were later in the service of the Ṣafawids. In the 16th century there were Čepni also in the Erzurum district, and some clans around Konya and Adana too.

In the 15th and 16th centuries there were many villages named, after the tribe, Čepni; in some cases the name survives to the present day. Bektāshī and Ḳîzîlbash doctrines were from of old widespread among the Čepni.

Bibliography: Faruk Sümer, *Osmanlı devrinde Anadolu'da yaşayan bazı Üçoklu Oğuz boylarına mensup teşekküller*, in *Iktisat Fakültesi Mecmuası*, x, 441-453, Istanbul 1952.

(FARUK SÜMER)

CERAMICS [see FAKHKHĀR]

ČEREMISS (native name Mari), people of the eastern Finnish group, living principally in the basin of the Middle Volga to the north-east of Ḳazan in

the Autonomous Soviet Socialist Republic of the Maris as well as in the neighbouring territories: A.S.S.R. of Tātārstān and of Bas͟hkiria, regions (*oblast'*) of Gorki, of Kirov and of Sverdlovsk of the R.S.F.S.R. The total number of Čeremiss reached 481,300 in 1939; they are divided into three distinct groups by their dialects and their material culture. The Čeremiss of the plains (*lugovie*) live on the left bank of the Volga, those of the highlands (*gornie*) on the right bank, and the eastern Čeremiss emigrated in the 18th century into the valley of the river Belaya in Bas͟hkir country.

The Čeremiss descend from the Finnish-Ugrian tribes of the Volga, subjugated in the 8th century by the K͟hazars, then, between the 9th and the 13th century, by the Bulg͟hārs. It is through the medium of these latter that the Arabs became acquainted with the Čeremiss (under the name of Ṣarmis). After the destruction of the Kingdom of Greater Bulgaria, the Čeremiss fell under the domination of the Golden Horde, then of the K͟hānate of Ḳazan. The ancestors of the present Čeremiss were never converted to Islam, but they submitted, nevertheless, as early as the high Middle Ages, to the indirect influence which we recognise in our own day in certain ritual terms: *payrām* (the feast of spring), *ḳaram* (sacred grove), *keremet* designating the spirit of the forests (from *karāma* = miracle).

Conquered by Russia in the 16th century, the Čeremiss were from that period very strongly marked by Russian culture and, in the 19th century, the majority were officially converted to orthodox Christianity. At the end of the 19th century, only the Čeremiss of the eastern group remained Animists (the Či-maris).

From the outset of 1905 to the October Revolution and even beyond, one notes among the Čeremiss living in contact with the Tatars and the Muslim Bas͟hkirs numerous conversions to Islam. It is unfortunately impossible to judge the new influence of Islam on the Čeremiss because the converts generally adopt the language and customs of the Tatars and "Tatarize" themselves.

CERIGO [see Čoka Adasī]

ČERKES, The name of Čerkes (in Turkish *čerkas*, perhaps from the earlier "kerkète", indigenous name: Adīg͟he) is a general designation applied to a group of peoples who form, with the Abk͟haz [*q.v.*], the Abaza (cf. Beskesek Abazā) and the Ubək͟h, the north-west or Abasgo-Adīg͟he branch of the Ibero-Caucasian peoples.

The ancestors of the Čerkes peoples were known among the ancients under the names of Σινδοί, Κερχεταί, Ζιχγοί, Ζυγοί, etc., and lived on the shores of the Sea of Azov and the Black Sea and in the plains of the Kuban to the south and the north of this river, extending perhaps to the Don.

In the 10th century, the Russians settled in the peninsula of Taman (the principality of Tmutarakan) and entered into contact with the Čerkes, whom their chronicles designate under the name of Kasog (Georgian name = Kas͟hak, Kasagi in Ossète). From the 13th to the 15th century, the north-west Caucasus was subjected to the Golden Horde and it is after the collapse of the latter that the eastern Čerkes tribes (the present Kabard) began to play a rôle in the history of the Caucasus.

The Kabard princes maintained in the 16th century friendly relations with the rulers of Moscow (the second wife of Ivan IV was a Čerkes princess). In the 17th century the Kabard tribes led the coalition of Caucasian peoples which halted and repulsed the advance of the Kalmīks and from that era, the Čerkes held supremacy which they lost only after the Russian conquest.

Distribution of the Čerkes Tribes. — Before the Russian conquest in the middle of the 19th century, the Čerkes peoples, numbering more than a million, inhabited the north-west Caucasus (country of the Kuban) and a part of the eastern coast of the Black Sea and the peninsula of Taman up to the neighbourhood of the Abk͟hazi.

The principal tribes were:

— The Natuk͟hay (Natkuad͟j) in the peninsula of Taman and near the estuary of the Kuban.

— The S͟hapsug, divided into the "Great S͟hapsug", on the left bank of the lower Kuban and along the river Afips, and the "Little S͟hapsug" on the shores of the Black Sea. These two tribes spoke the same dialect; more to the East, in the basins of the tributaries of the Kuban Belaya, Ps͟his͟h and Psekups lived the largest of the Adīg͟he tribes: the Abadzek͟h. Before 1864, these three tribes formed 9/10 of the total of the entire population of Western Adīg͟he tribes. Among the other Western tribes, the most important were the Mok͟hos͟h on the river Farsu, the Temirgoy (Kemgui, Čengui) between the Laba and the Kuban; the Bjeduk͟h at the confluence of the rivers Ps͟his͟h and Psekus͟h with the Kuban; the Khatükay between the lower Beləya and the Ps͟his͟h, and finally the most eastern of the western tribes: the Besleney to the south-east of the Mok͟hos͟h.

The eastern tribes or Kabards (Kaberdey) [cf. Kabarda] lived from the 18th century in the basin of the upper Terek and some of its tributaries. They were divided into two groups: the tribes of the Great Kabarda, between the rivers Malka and Terek (to the west of the Terek) and those of the Little Kabarda (between the Sunja and the Terek, to the east of the latter river.

To these tribes must be added two others who were of non-Adig͟he origin but who were in point of fact assimilated by the Čerkes and whose history is indissolubly bound to that of the latter: the Ubək͟h [*q.v.*] and the Abaza (cf. Besekesek-Abaza).

After the conquest of the country by the Russians, the greater part of the western Čerkes emigrated in 1864-65 to Turkey and there remained in Russia only a small fraction of them. The last Soviet census (1939) counted only 164,000 Kabards and 88,000 western Adīg͟he thus distributed:

1\. — Kabard: The 152,000 in the Kabard-Balkar A.S.S.R. and 7,000 to 8,000 in the two Autonomous Regions of Adīg͟he and Karačay-Čerkes (*auls* Katzk͟habl', Blečeps and K͟hodz'). In addition, the census of 1939 counted as Kabards the 2000 Kabard-speaking Armenians of Armavir (territory of Krasnodar) of the Armenian-Gregorian religion, the 2100 "Čerkes of Mozdok" of the A.S.S.R. of North Ossetia who are Kabards converted to orthodox Christianity, and finally a little group (500 to 600) of Kabard-speaking Jews of the district of Mozdok.

2\. — The Besleney: about 30,000, of whom 20,000 are in the Autonomous Region of Karačay-Čerkes (this group adopted the literary language of

the Kabards and is assimilated by the Kabard nation), and 10,000, in the Autonomous Region of Adīghe and near Armavir, who adopted the literary language of the Adīghe.

3. — The Lower Adlghe: in number about 55,000, principally in the Autonomous Region of Adīghe. After the migration of 1864-65, the tribal differences shaded off rapidly, and the scattered elements of the tribes remaining in Russia consolidated in an "Adlghe Nation" commune; only the following tribes still conserve some peculiarities of dialect and custom: the Abadzekh, about 5,000 around the *aul* Khakurinov (their dialect is on its way to disappearance); the Bjedukh, about 12,000 who populate 38 *auls* to the south of the Kuban and an *aul* near Armavir; finally, the Shapsug to the number of 10,000 on the shores of the Black Sea (14 *auls* to the north and south of Tuapse) with a little islet in the peninsula of Taman.

Language: With Abkhaz, Ubəkh and, according to some, Abaza (which others consider a simple Adīghe dialect), the Čerkes languages form the north-west branch of the Ibero-Caucasian languages. The Čerkes group is divided into several dialects of which two are now literary languages:

1. — Eastern Adīghe ("high Adīghe") or Kabard, including diverse speech characteristics a little different from one another. The speech of the Great Kabarda serves as the basis of the Kabard literary language used in the Kabardo-Balkar A.S.S.R. and in the Autonomous Republic of the Karačay-Čerkes, transcribed in the Latin alphabet since 1925 (after a trial of the Arabic alphabet in 1924). In 1938, the Latin alphabet was replaced by the Cyrillic.

2. — Lower Adlghe (or K'akh), including dialects closely related to one another: Bjedukh, Shapsug, K'emirgoy (or Temirgčy), as well as the rest of the Abadzekh and Khakuci dialects. The Bjedukh and K'emirgoy dialects serve as the basis of the Adīghe written language used in the Autonomous Republic of the Adīghe. The first attempts to give the Adlghe a written language trace back to 1855 (handbook of the Adlghe language of ʿUmar Besney). In 1865, Atakujin and in 1890 Loparinski aimed toward an Adīghe Cyrillic alphabet.

Between 1917 and 1920 there were again attempts to give Adīghe a script: Domatov worked out an Arabic alphabet and Saltokov modified Lopatinski's Cyrillic alphabet. Finally, in 1925, Adlghe received a Latin alphabet, replaced in 1935 by Cyrillic. From 1925, the linguistic unity of the Čerkes people was broken and the two written languages, Adīghe and Kabard, thereafter developed alone different lines, in spite of the vain attempt to reunite them in 1930, at the time of the conference of the Committee on the new Latin alphabet at Moscow.

Halfway between Kabard and Lower Adīghe is found the Besleney dialect, which belongs to Lower Adīghe but is full of Kabard elements.

The written Kabard and Adīghe literatures appeared after the establishment of the Soviet regime. The Čerkes had until then only an oral literature, principally of folk-lore, which included two types in particular: the legends of *Nartes* (mythological-heroic legends) which the Čerkes share in common with some other Caucasian people such as the Ossetes, and the heroic-historical songs which Shora-Bekmurzin Nogmov gathered and published (see bibliography).

Religion. — The Čerkes are Sunnī Muslims of the Ḥanafī school. Islam was brought in the 16th century by the Nogais [*q.v.*] and the Tatars of the Crimea, first to the Kabards, then, in the 17th century, to the western Adīghe. Penetration was slow and at first reached only the feudal nobility. It is only at the beginning of the 18th century, thanks to the zeal of the Khāns of the Crimea and the Turkish pashas of Anapa, that Islam was imposed on all of the people, replacing Christianity (introduced as early as the 6th century by Byzantium and, between the 10th and the 12th centuries, by Georgia) and the ancient pagan religion of which one still finds traces among the western Adīghes.

Before their conversion to Islam, the Čerkes worshipped agrarian divinities: Shible, god of storm and thunder, Sozeresh, protector of the sowings, Yemish, protector of the flocks, Khategnash, god of the gardens, etc. The cult of the god of thunder was linked to the worship of trees and sacred groves where, even recently, were offered sacrifices and prayers. A particular cult was dedicated to Tlepsh, god of the blacksmiths and doctors. The Čerkes had neither temples nor clergy; sacrifices were entrusted to the care of an old man elected for life.

Justice was rendered according to the Adīghe-Khabzə *ʿādat*, a veritable unwritten code of law which governed all Čerkes life and which was adopted by neighbouring peoples more or less subject to the influence of Kabard and Adīghe princes: Ossetes [*q.v.*], Karačays [*q.v.*], Balkars [*q.v.*] and Nogays [*q.v.*].

Social Structure and Customs. — Until the second half of the 19th century, the Čerkes people maintained a very archaic social structure different according to the tribes. The Kabards had a highly developed feudal system; their society, comprising up to thirteen classes, formed several groups clearly differentiated and not easily penetrated: 1. — at the summit of the social hierarchy, the princes (*pshə*) among whom the *wālī* was the chief of the Kabard people; 2. — under them, the nobles (*uork*, *uorkkh*, or *uzden*) subdivided into four classes according to the rights and obligations which bound them to the princes; 3. — the free peasants (*tfokhotl*) who, in certain circumstances, were kept to attend the *pshə* and the *uork*; 4. — the serfs (*og* or *pshətlə*) and finally, at the bottom of the ladder, the slaves (*unaut*).

The same feudal system, less rigorous however, existed also among the Adīghes and the lower eastern Čerkes tribes (Besleney, Bjedukh, Khatukay). On the other hand, the western Adlghe tribes (Natukhay, Shapsug, Abadzekh) did not have princes. Among them the *uork* class was weak, while that of the *tfokhotl* was the most numerous and the strongest. They are sometimes called the "democratic Adlghe tribes", as opposed to the Kabard "aristocratic tribes".

The reasons for this difference are not known. Some think that the western tribes passed the feudal stage in the 18th century after the long struggle which set the Abadzekh, Shapsug and Natukhay *tfokhotl* against the princes of Bjedukh (battle of Bziük in 1796), thanks also to the action of Ḥasan Pasha, *serʿasker* of Anapa, who abolished in 1826 the privileges which the nobles of these three tribes enjoyed.

For others, on the contrary, the social evolution toward feudalism had been retarded by several factors, notably the economic influence of the Greek colonies, then the Italian and Turkish. This last opinion seems nearer the truth, because at the beginning of the 20th century one finds among the western tribes strong survivals of the patriarchal clan system which had disappeared among the eastern Adlghe. The clan (*tleukh*) was divided into several groups of great patriarchal families (*ačikh*)

which formed in their turn rural communities (*psu<u>kh</u>o*), autonomously united and independently administered by the councils of the elders.

All the Čerkes tribes maintained some customs characteristic of the patriarchal and feudal stages: 1. — blood vengeance in cases of murder, which was a right and an absolute duty for the whole of the clan; 2. — *atalikat*, which consisted of having children raised from birth in the families of strangers, often vassals (boys till 17-18 years). *Atalikat* created a sort of foster brotherhood which served to tighten the feudal bonds and unite the Čerkes tribes; 3. — diverse traditions concerning hospitality, considered sacred. The guest became, by right of protection, a veritable member of the clan of his host, who put his life and his property at the service of his guest. Hospitality was extended even to the exile (*abrek* or *<u>kh</u>a<u>dj</u>ret*). If this latter succeeded in touching with his lips the bosom of the mistress of a strange house, he became a member of the family, and the master of the house had to provide for his safety. Among other customs of the clan stage figured the swearing of brotherhood (*kunak*) by which a man became a member of another clan; 4. — customs concerning marriage. Exogamy inside the clan or the great patriarchal family was strictly observed especially by the Kabards. The *kalym* (purchase of the fiancée) was universally practised, and could only be avoided by resorting to abduction, a frequent occurrence, in case of refusal by the parents. The pretence of forcible abduction remains an essential rite in the marriage ceremony.

The Čerkes in the Soviet Union.—It was only at the end of the civil war that the Soviet regime was established in the regions inhabited by the Čerkes—in the spring of 1920, first in the country of the Adîg<u>h</u>e, then in that of the Kabard. Administratively, the Čerkes were divided into three territorial unities:

— The Autonomous Region of the Adîg<u>h</u>e in the basin of the Kuban and its tributaries belonging to the territory (*kray*) of Krasnodar, formed 27 July 1922 under the name of the Autonomous Region of Adîg<u>h</u>e-Čerkes, then, on 13 August 1928, under that of the A.R. of Adîg<u>h</u>e. This territory has an area of 4400 sq. km. and a population of 270,000 people (in 1956), of whom the Adîg<u>h</u>e represent only a minority. The capital Maikop is a Russian city.

— The Autonomous Region of the Karačay-Čerkes in the high valleys of the Great and Little Zelenčuk belonging to the territory (*kray*) of Stavropol', which the Čerkes share with a Turkish people (the Karačay [*q.v.*]). This territory, formed 12 January 1922, was divided, 26 April 1926, into two administrative unities: the Autonomous Region of the Karačay and the national civil district of the Čerkes, elevaled 30 March 1928 to the status of Autonomous Region. In 1944 the Karačay were deported and their Autonomous Region abolished, but after their rehabilitation, the Autonomous Region of the Karačay-Čerkes was re-established 9 January 1957. Its area is 14,200 sq. km., and the population, in 1956, was 214,000 people, in majority Russian and Ukrainian.

— The Kabard-Balkar Autonomous Soviet Socialist Republic, in the mountainous part of the Central Caucasus. It was formed 1 September 1921 as the Autonomous Region of the Kabard to which was added 16 January 1922 the national civil district of the Balkar, thus constituting the Kabard-Balkar Autonomous Region, which became on 5 December 1936 an Autonomous Republic. In 1944, following the deportation of the Balkar, the Republic, with the loss of a part of Balkar territory, was renamed the Kabard A.S.S.R. Finally, on 9 February 1957, the Balkar having been rehabilitated and authorized to return to their territory, the Republic became once more the Kabard-Balkar A.S.S.R. Its territory comprises 12,400 sq. km., and its population, in 1956, was 359,000 inhabitants. In 1939, the Kabard, Balkar and other Muslims represented 60% of the population, living mainly in the mountainous areas; Russians and Ukrainians (40% of the population) constitute the majority of the population of the capital Nalʿčik (72,000 inhabitants in 1956) and predominate in the plain of Terek.

Bibliography: A very complete bibliography appears in the article by Ramazan Traho, *Literature on Circassia and the Circassians*, in *Caucasian Review*, no. 1, 1955, Munnich, 145-162. It included more than 250 titles of works and articles in Russian, in western languages (French, English, German, Turkish, Hungarian, and Polish) and in Čerkes languages dealing directly or indirectly with the Čerkes people. It is sufficient therefore to note here a few recent works:

In French: A. Namitok, *Origines des Circassiens*, Paris 1939; G. Dumezil, *Introduction à la grammaire comparée des langues caucasiennes du Nord*, Paris 1933; and *Etudes comparatives sur les langues caucasiennes du Nord-Ouest*, Paris 1932.

In German: A. Dirr, *Einführung in das Stadium der Kaukasischen Sprachen*, Leipzig 1928; F. Hančar, *Urgeschichte Kaukasiens*, Vienna-Leipzig 1937.

In English: J. B. Baddeley, *The Russian Conquest of the Caucasus*, London 1908; W. S. Allen, *Structure and system in the Abaza Verbal complex* in *Transactions of the Philological Society*, 1956, 127-76, with extensive linguistic bibliography.

In Russian: *Adîgeîskaya Avtonomnaya Oblast'*, Maikop 1947; *Kabardinskaya ASSR*, Nal'čik 1946 <u>Sh</u>. B. Nogmov, *Istoriya Adîgeyskogo Naroda sostaxlennaya po predaniyam Kabardintzev*, Nal'čik 1947; K. Stal, *Étnografičeskiy očerk Čerkesskogo naroda*, in *Kavkazskiy Sbornik*, xxi, Tiflis 1900; S. A. Toharev, *Étnografiya narodov SSSR*, Moscow 1958, 246-258; D. A. A<u>sh</u><u>kh</u>amaf, *Grammatika Adîgeiskogo yazîka*, Krasnodar 1934; T. M. Borukaev, *Grammatika Kabardino-Čerkesskogo Yazîka*, Nal'čik 1932; idem, *Yazîki severnogo Kavkaza i Dagestana*, i, Moscow-Leningrad 1935; N. F. Yakovlev and D. A A<u>sh</u><u>kh</u>amaf, *Grammatika Adîgeyskogo literaturnogo yazîka*, Moscow-Leningrad 1941.

(Ch. Quelquejay)

ii. Mamlūk period. The Circassians are designated in Mamlūk sources as *<u>Dj</u>arkas* or *<u>Dj</u>arākisa* (sing. *<u>Dj</u>arkasī*). There are also alternative spellings: *Čarkas* or *Čarākisa* (sing. *Čarkasī*); *<u>Sh</u>arkas* or *<u>Sh</u>arākisa* (sing. *<u>Sh</u>arkasī*) and less frequently *<u>Dj</u>ihāraks*. Circassia is variously known as *bilād al-<u>Dj</u>arkas*, or simply *<u>Dj</u>arkas* and occasionally as *<u>Dj</u>abal al-<u>Dj</u>arkas*. According to al-Ḳalḳa<u>sh</u>andī the Circassians live in poverty and most of them are Christians (*Ṣubḥ al-Aʿ<u>sh</u>ā*, v, 462, l. 5).

The Circassians, who, since the closing decades of the 8th/14th century and up to the end of the Mamlūk sultanate (922/1517), constituted the predominant element of Mamlūk military society, were quite important in that sultanate from its very inception in the middle of the 7th/13th century. They occupied a most prominent place in the *Bur<u>dj</u>iyya* [*q.v.*] regiment founded by Sulṭān Ḳalā'ūn (678-689/1279-1290). Whether the decline of that regiment weakened their power or not, is an open

question. The Ķipčaķ Turks, the ruling race during the first hundred and thirty years or so of the sultanate's existence, feared them very much because of their ambitious character, haughtiness and inclination to trouble and discord. As a matter of fact the Ķipčaķs succeeded in nipping in the bud a dangerous military coup of the Circassians during Ramaḍān-Shawwāl 748/December 1347-January 1348 (Sulṭān Ḥasan's reign). These Circassians were the favourites of Ḥasan's immediate predecessor, Sulṭān Ḥādjdjī (747-8/1346-7), who "brought them from all quarters and wanted to give them precedence over the *Atrāk*" (*Nudjūm*, v, 56, ll. 14-20). Sulṭān Ḥādjdjī's reign was apparently too short for his plan to be carried out, and thus the Circassians' rise to power had been postponed for another 35 to 45 years.

It was Sulṭān Barķūķ, himself a Circassian and a member of the Burdjiyya regiment, who brought about the final victory of his own race, by the systematic purchase of increasing numbers of Circassian Mamlūks and by drastically cutting at the same time the purchase of Mamlūks of other races. He is justly called "the founder of Circassian rule" (*al-Ķā'im bi-dawlat al-Djarākisa*) (*Nudjūm* v, 362). Though he regretted his action towards the end of his life, as a result of a Circassian attempt to assassinate him (*Nudjūm*, v, 585, 598), it was too late for him to change the situation which he himself had created. His son and successor, Sulṭān Faradj (809-815/1406-1412), paid with his life for his attempt to break the Circassians' growing power by means of large-scale massacres. As early a writer as al-Ķalkashandī, who completed his book in 815/1412, states: "In our time most of the *amīrs* and army have become Circassians ... The *Turk* Mamlūks of Egypt have become so few in number that all that is left of them are a few survivors and their children" *Ṣubḥ al-Aʿshā*, iv, 458, ll. 16-19). Sulṭān al-Mu'ayyad Shaykh (815-824/1412-1421), who is described by Ibn Taghrībirdī as resembling the former Mamlūk sultans (*mulūk al-salaf*) in that his criterion for the choice of soldiers was not race, but efficiency and courage (*al-Manhal al-Ṣāfī*, iii, fol. 168a, l. 21-168b, l. 4), had some success in curbing the power of the Circassians by strengthening the Ķipčaķ-Turk element in Mamlūk military society. But after his death the Circassians regained their supremacy, which they maintained without any serious challenge till the end of Mamlūk rule.

Mamlūk sources ascribe the rise of the Circassians at the expense of the Ķipčaķ-Turks mainly to factors existing within the Mamlūk sultanate. Equally important, however, were factors prevailing in the Mamlūks' countries of origin. The decline of the Golden Horde during the latter half of the 8th/14th century and the internal wars that broke out there must have greatly influenced the decision of Egypt's rulers to transfer the Mamluks' purchasing centre to the Caucasus.

The writers of the Circassian period held, generally speaking, a very high opinion of the Ķipčaķ-Turks and harshly criticized the Circassians, to whom they ascribed the sultanate's decline and misery. Typical in this respect are Ibn Taghrībirdī's following words: Referring to Ṭashtamur al-ʿAlā'ī, formerly *dawādār* and later *atābak al-ʿasākir* (commander-in-chief), who was removed by *amīrs* Berke and (later Sulṭān) Bar ķūķ, he says: "The time of Ṭashtamur was a flourishing and plentiful time for the Mamlūk sultanate under his wise direction, and that condition prevailed until he was removed from office and thrown into prison. In his place came Barķūķ and Berke, who did things in the sultanate from which the population suffers till this day. Then Barķūķ became sole ruler, and turned the affairs of the realm upside-down, and his successors have maintained his policy down to the present. For he gave precedence to the members of his own race over the others, and gave those of his own Mamlūks (*adjlāb*) who were related to him large fiefs and high offices while they were still in their minority. This is the main cause of the decline of the realm. Indeed, is there anything more grave than to set the minor over the senior? This is at variance with the practice of the former sultans; for they did not recognise the superiority of any one race. Whenever they found a man who displayed wisdom and courage, they showed him preference and favour. No-one was given office or rank who was not worthy of it" (*Manhal*, iii, f. 185b, ll. 14-23).

Though this and other statements of the same kind contain a very substantial element of truth, they certainly should not be taken at their face value. The Circassians might have accelerated the process of the realm's decline, but many of the factors that brought about that decline had already been quite visible in the closing decades of Ķipčaķ-Turk rule.

The predominance of the Circassian race in the later Mamlūk period was much stronger and much more comprehensive than that of the Ķipčaķ Turks in the early period. Unlike the Ķipčaķ Turks the Circassians were very hostile to the other Mamlūk races, whom they relegated to a state of political insignificance. No other Mamlūk race was so much imbued with the feeling of racial solidarity and of racial superiority as they were. Under their rule, *al-djins*, meaning the Race, denoted the Circassian race. Similarly *al-ķawm*, the People, was applied only to the Circassians.

Of all Mamlūk races the Circassians were the only ones who claimed to trace their origin to an Arab tribe, namely, the Banū Ghassān, who entered Bilād al-Rūm with Djabala b. al-Ayham at the time of Heraclius' retreat from Syria (Ibn Khaldūn, *Kitāb al-ʿIbar*, v, 472, ll. 4-18. Ibn Iyāb, v, 193, l. 3). This legend was still alive in Egyptian Mamlūk society under the Ottomans (see bibliography).

iii. (Ottoman period) Replacing the Genoese on the Black-sea coasts the Ottomans took Anaba (Anapa) and Koba (Copa, cf. Heyd, ii, 190) in 884/1479 (cf. *Hasht Behisht*), but the Circassian tribes in the hinterland continued to be dependent on the Crimean Khāns (see KIRIM) who as under the Golden Horde sent their sons to be brought up among the Circassians (see ATALIĶ). Along with the marriages of the Crimean princes with the Circassian noblewomen this secured the attachment of the Čerkes; they gave the Khāns a yearly tribute consisting of slaves as well as auxiliary forces. The Crimean Khāns styled themselves rulers of *Tagh-ara Čerkes* or *Čergāč*. Circassia served also as a refuge for the Tatar-Noghay tribes from the *Dasht* who came often to mingle with them especially in the Kuban basin and the Taman peninsula. Later on the

Crimean Khāns built there fortresses such as Čoban-ḳalʿa, Nawrūz-Kirmān. Shād-Kirmān and settled in them Noghays to defend the country against the Cossacks (Ḳazaḳ) and the Ḳalmuḳs. Not infrequently the Čerkes co-operated with the Cossacks, too. In his major efforts to subdue the rebellious Čerkes tribes Ṣāḥib Girāy Khān made five expeditions in Circassia, the first against Ḳansāwuḳ, beg of Zhana in 946/1539, the second and the third against Ḳabartāy (Kaberda). He forcibly settled on the upper Urup the tribes who had taken refuge in the high Baksan valley. Later in 956/1549 he made his last expedition against the Khatuḳāy (*Ṣāḥib Girāy Taʾrīkhi*, Blochet, *Cat. Man. Turc. supp.*, 164). But after his death the Čerkes, especially those of Zhana and Psheduh (Pzhedukh) sacked the Taman peninsula, threatened Azaḳ [*q.v.*] and sought the protection of Ivan IV (see *Belleten*, no. 46, 1948, 364). At the same period the Cossacks, stationed on the Terek, also became a threat to Crimean-Ottoman influence in Ḳabartāy.

The strengthening of Tatar-Circassian relations resulted in the spread of Islam among the Čerkes. But in 1076/1664-65 Ewliyā Čelebī (vii, 708-758) found that many tribes were still pagans and those professing Islam preserved their old religious beliefs and practices. Meḥmed Girāy IV induced the islamized tribes of Ḳabartāy to give up pig-raising.

The Ottoman Sultans recognized Crimean sovereignty over the Čerkes, but this did not prevent their sending orders and granting titles to the Circassian chieftains as vassal *beg*s (see *Belleten*, no. 46, 399). In 978/1570 Selim II wrote to the Czar not to interfere with the Čerkes, his subjects (*Belleten*, 400).

In 1076/1665, on his way from Taman to Albrus, Ewliyā Čelebī (vii, 698-768) found first the Noghays in Čoban-eli then Shḳāgeh tribe (cf. J. Klaproth, *Voyage*, i, 238) on the Black Sea coast, Great and Small Zhana tribes at the foot of the Hayḳo mountains, and further east Khatuḳay, Ademi, Taḳaḳu (?), Bolatḳay, Bozoduḳ (Pzhedukh), Mamshugh (?), Besney (Besleney), and Ḳabartāy tribes. He also reported that in this period the Ḳalmuḳ raids caused the Čerkes tribes in the Kuban and Ḳabartāy regions to retreat to the inaccessible parts of the mountains, while in the west the Cossacks were pressing hard the Čerkes in the lower Kuban and the Tamam peninsula.

When from the early 18th century onwards Circassia was seriously threatened by Russian expansion they became more and more co-operative with the Ottomans. In 1148/1735 they repulsed the Russian forces on the other side of the Kuban. But with the treaty of Küčük-Ḳaynardja in 1188/1774 the Ottomans recognized the independence of the Crimean Khānate with its dependencies north to the Kuban which in 1197-1783 were annexed by Russia. The Ḳabartāys were already in Russian control in 1188/1774.

In order to form a defence line against the Russians on the Kuban the Ottomans were now much interested in Circassia and built or rebuilt the fortresses of Soghudjuḳ (Sudjuḳ), Gelendjik, Noghay, and Anapa in 1196/1782 and tried to reorganize the Čerkes as well as the newly arrived Tatar immigrants from the Crimea and the Noghays from Dobrudja. Feraḥ ʿAlī Pasha (1196/1782-1199/1785), an administrator of unusual ability, encouraged his Ottoman soldiers to establish family ties with the Čerkes which strengthened Ottoman influence and furthered the spread of Islam among the Čerkes. Anapa rapidly developed as the chief commercial centre of the area. Meantime Shaykh Manṣūr, a forerunner of Shaykh Shāmil [*q.v.*] in the Čečen area found a response among the Čerkes for his preaching of the Holy War against the Russians (for this period see the important account of Meḥmed Hāshim, the *Dīwān Kātib* of Feraḥ ʿAlī Pasha, MS. in Topkapî, Revān, no. 1564, cf. Djewdet, *Taʾrīkh*, iii, 168-272).

During the Ottoman-Russian war of 1201-1206/1787-1792 a Khānate of Kuban was created with the Tatars under Shahbāz Girāy while the Čerkes co-operated with the Ottoman army under Baṭṭāl Huseyin Pasha and won some successes. But in the end Anapa, the main Ottoman base, fell (1205/1791). With the peace treaty the Kuban river was fixed as the border line between the Russian and Ottoman empires. After the peace, while the Ottomans neglected the area, the Russians formed a line of fortresses along the border and settled large groups of Cossacks there. At the same time they annexed Georgia and, taking control of the Daryal Pass, encircled Circassia. By the treaty of Adrianople 1245/1829 the Ottomans had to give up their rights on Circassia in favour of Russia. The Circassians, however, sustained a long and fierce struggle against the invaders until 1281/1864 and, according to an Ottoman report, 595,000 Circassians left their country for Turkey between 1272/1856 and 1281/1864. These were settled in Anatolia as well as in Rūmeli (see BULGARIA). According to the census of 1945 there were in Turkey 66,691 Circassians still speaking their mother-tongue. Under the Ottomans, especially from the 17th century onwards, Circassian slaves occupied an important place in the Ottoman *ḳul* [*q.v.*] system and many of them reached high positions in the state (see *Ṭaʾrīkh-i ʿAṭā*, 5 vols. Istanbul 1291-1293).

(HALIL INALCIK)

ČERKES EDHEM, Čerkes Reshīd, and Čerkes Meḥmed Tewfīḳ, Turkish guerrilla leaders, sons of a Circassian farmer in Emre near Karacabey (*wilāyet* of Bursa). Reshīd, the oldest, was born in 1869 (or 1877 ?—see *T.B.M.M. 25ci yıldönümünü anıs* [1945], 63), Edhem, the youngest, in 1883-4. Reshīd fought with the Ottoman forces in Libya and the Balkans, where he was "Deputy Commander in Chief" for the provisional government of Western Thrace (September 1913), and sat for Saruhan in

the last Ottoman Chamber and the Ankara National Assembly. All three brothers took leading parts in the nationalist guerrilla movement, Edhem distinguishing himself against the Greeks at Salihli and Anzavur's *Ḳuwwa-yi Meḥmediyye* (summer 1919) and in suppressing the anti-Kemalist revolts at Düzce and Yozgad (spring 1920). As Commander of Mobile Forces (*Ḳuwwa-yi Seyyāre*, with his brother Tewfiḳ as deputy) he came into increasingly sharp conflict with the regular army command, especially after Edhem's defeat by the Greeks at Gediz (24 October 1920) and the appointment of İsmet [İnönü] as commander-in-chief of the Western front. An ad-hoc commission of the National Assembly failed to resolve the dispute. After a decisive clash with the Turkish regulars (Kütahya, 29 December), Edhem, his brothers, and several hundred Circassian guerrillas fled behind the Greek lines (5 January 1921). The Ankara Assembly denounced the brothers as traitors and expelled Reshīd; later the brothers were among the 150 persons (*yüzellilikler*) excepted from the amnesty provisions of the Lausanne Treaty of 1923. Edhem and Reshīd went to Greece, Germany, various Arab countries, and eventually to ʿAmmān. In 1935 they were briefly detained there under suspicion of plotting against Atatürk, and in 1941 Edhem was again detained in ʿAmmān because of his support of the movement of Rashīd ʿĀli in ʿIrāq. He died of throat cancer in ʿAmmān on 7 October 1949. Reshīd returned to Turkey after the Democrat Party victory of 1950 and died in Ankara in 1951. Tewfiḳ spent his exile years in Haifa as an oil refinery watchman and died soon after his return to Turkey in 1938.

ČERKES [see MUḤAMMAD PASHA ČERKES]

ČESHME, a Persian word meaning "source, fountain" which has passed into Turkish with the same sense. It is the name of a market-town in Asia Minor with a wide and safe natural harbour on the Mediterranean coast, at the entrance to the Gulf of the same name, at the north-western extremity of the peninsula of Urla opposite the island of Chios, 26° 20′ W., 38° 23′ N. It is the chief town of a *kaza* in the *vilayet* of Izmir. The town has (1950) 3,706 inhabitants; the *kaza*, 12,337. Originally part of the principality (later *sandjaḳ*) of Aydln, it was Ottoman from the time of Bayazīd II. There is a citadel with a mosque of Bāyazīd II, of 914/1508. The present town, which is quite modern, occupies the site of the ancient harbour of Erythrae. There are hot springs at Ilidja.

A Russian fleet of nine ships of the line and a few frigates, divided into three squadrons commanded by Spiridov, Alexis Orlov and Elphinston, which sailed from Kronstad to aid the rebel Mainots, attacked the Turkish fleet at Česhme. The Turkish fleet consisted of sixteen ships of the line besides frigates and small craft and was commanded by the Ḳapūdān-Pasha Ḥusām al-Dīn with Djezā'irli Ḥasan Pasha and Djaʿfar Bey. The Russian and Turkish flagships both caught fire at the same moment and those of the crew who could saved themselves by swimming (11 Rabīʿ I 1183/5 July 1770). The remainder of the Turkish fleet was set on fire the following night. This defeat of the Turks at Česhme was the fore-runner of the Peace of Küčük Ḳaynardja.

ČESHMĪZĀDE, Muṣṭafā Rashīd, Ottoman historian and poet, one of a family of *ʿulamā'* founded by the *Ḳāḍīʿasker* of Rumelia, Česhmī Meḥmed Efendi (d. 1044/1634) A grandson of the *Shaykh al-Islām* Meḥmed Ṣāliḥ Efendi, and the son of a *ḳāḍī* in the Ḥidjāz, he entered the *ʿIlmiyye* profession, and held various legal and teaching posts. After the resignation of the Imperial historiographer Meḥmed Ḥākim Efendi [*q.v.*], he was appointed to this office, which he held for a year and a half. He then returned to his teaching career, which culminated in his appointment as *müderris* at the Dār al-Ḥadīth of the Sulaymāniyye. His history, which covers the period 1180-82/1766-68, was used by Wāṣif [*q.v.*]. The Turkish text was first published by Bekir Kütükoğlu in 1959; but a Swedish translation of his account of the war in Georgia in 1180-2/1766-8, with a brief account of some events in Cyprus, Egypt and Medina, was included by M. Norberg in his *Turkiska Rikets Annaler*, v, Hernösand 1822, 1416-1424. He died in Shaʿbān 1184/Nov. 1770, and was buried at Rumeli Ḥiṣārī.

CEUTA [see SABTA]

CEYLON. The Muslims constitute only 6.63% of Ceylon's population—roughly 550,000 out of a total of 8,000,000. Of this community, which is multi-racial in its composition, the Ceylon Moors form the most significant element and count 463,963. The Malays are the next in importance. They number 25,464. Nearly all of the remaining groups are of Indian origin; their ancestors first came to Ceylon after the British occupation of its Maritime Provinces during the 18th century.

As a result of the insufficiency of available evidence and the lack of sustained effort and encouragement in respect of the investigations involved, which require a good knowledge of several languages, each of them with a different background and most of them with distinctive characters, the ethnology of the Ceylon Moors has yet remained an inadequately explored field of research. A scientific and comprehensive treatment of the subject would indeed illumine some of the obscure aspects of Ceylon's history—*e.g.*, the nature and extent of the contacts the Muslims of Ceylon (Moors) had for several centuries with their brethren in faith in lands far and near; the political relations which Ceylon

through these Muslims maintained with the Muslim World particularly during its period of glory; and the volume of Ceylon's external and internal trade and its geographical distribution during the early centuries.

The Muslims of Ceylon were given the appellation of 'Moors' by the Portuguese who first came to Ceylon in 1505 and encountered these Muslims as their immediate rivals to trade and influence. This name, however, has persisted, having gained currency in Ceylon through its wide use by the Colonial Powers concerned, even though this term 'Moors' had been previously unknown among the Muslims themselves. 'Sonahar' was the name familiar to them, deriving its origin from 'Yavanar', an Indian word connoting foreigners especially Greeks or Arabs.

These Moors were the descendants of Arab settlers whose numbers were later augmented by local converts and immigrant Muslims from South India. With regard to the date of the arrival of the first Arab settlers, Sir Alexander Johnstone holds that it was during the early part of the 2nd/8th century. "The first Mohammedans who settled in Ceylon were, according to the tradition which prevails amongst their descendants, a portion of those Arabs of the house of Hās͟him who were driven from Arabia in the early part of the eighth century by the tyranny of the Caliph ʿAbd al-Melek b. Merwān, and who, preceeding from the Euphrates southward, made settlements in the Concan, in the southern parts of the peninsula of India, on the island of Ceylon and at Malacca. The division of them which came to Ceylon formed eight considerable settlements along the north-east, north, and western coasts of that island; *viz*: one at Trincomalee, one at Jaffna, one at Mantotte and Mannar, one at Coodramalle, one at Putlam, one at Colombo, one at Barbareen and one at Point-de-Galle."

The presence of these settlers is strikingly corroborated by the accounts found in Muslim sources with regard to the proximate cause of the Arab conquest of Sind, during the time of Caliph al-Walīd. His governor, al-Ḥad͟jd͟jād͟j of ʿIrāḳ, initiated this conquest, under the leadership of ʿImād al-Dīn Muḥammad b. Ḳāsim, as a punishment for the plunder of the ships that carried the families of the Arabs who had died in Ceylon, together with presents from the King of Ceylon to the Caliph.

It is reasonable to suppose that during the 2nd/8th century and subsequent centuries these Arabs came in increasing numbers and settled down in Ceylon without entirely losing touch with the areas of their origin. Ceylon exercized a special fascination on these seafaring Arabs as a commercial junction of importance which afforded possibilities of profitable trade in pearls, gems, spices and other valued articles. Settlement was encouraged by the tolerant and friendly attitude of the rulers and people of the island.

After the sack of Baghdad in 1258 A.D., Arab activities in the Persian Gulf and the Indian Ocean diminished considerably. Muslim influence, however, did not thereby cease entirely. It began to emanate from India where by the 7th/13th century the Muslims had firmly established themselves along the western coast and possessed a virtual monopoly of external trade.

It may therefore be concluded that the Muslims of Ceylon began, as a result, to rely on India for their cultural leadership as well as for their commercial contacts. An Indian element was thus added into the composition of the local Muslim (Moor) community. Despite the racial admixture that took place in consequence and the new manners and customs that were acquired, the individuality of the community was preserved on account of the cherished memory of its Arab origin and the emphasis that was placed on Islam as the base of its communal structure.

These Muslims were not treated as aliens, but were favoured for the commercial and political contacts with other countries they gained for Ceylon, for the revenue they brought to the country and the foreign skills they secured, *e.g.*, medicine and weaving. Besides they encouraged local trade by the introduction of new crafts, *e.g.*, gem-cutting and of improved methods of transport, *e.g.*, *thavalam*-carriage-bullocks. They were therefore allowed to establish their local settlements, *e.g.*, Colombo, Barberyn, with a measure of autonomy and with special privileges. The important seaports of Ceylon were virtually controlled by these Muslims (Moors).

With the advent of the Portuguese in 1505 the Muslims (Moors) suffered a change in their status from which they never again recovered. The Portuguese regarded them as their rivals in trade and enemies in faith. The Dutch who superseded the former as rulers of the sea-board were not prepared to give the Muslims even a small share of their commercial gains and therefore promulgated harsh regulations to keep them down. Deprived of their traditional occupation, many of them were forced to take to agriculture. To this could be mainly attributed the concentrations of Muslim peasantry in areas like Batticaloa.

It was during the Dutch period the Malays—who form an important element of the Muslim community of Ceylon—came to Ceylon, many of them brought by the Dutch as soldiers to fight for them and some as exiles for political reasons. When the Dutch capitulated to the British, the Malay soldiers joined the British regiments specially formed. On their disbandment the Malays settled down in Ceylon. Their separate identity has been preserved by the Malay language which they still speak in their homes.

The British did not follow the undiluted policy of proselytization pursued by the Portuguese. Nor were the British so harsh as the Dutch in their economic exploitation of Ceylon. To that extent, under the new rulers, the Muslims fared better. Yet they could not gain any special favour, on account of their irreconcilable attitude towards the ways and culture of the West which they identified with Christianity. This, no doubt, handicapped the Muslims severely in the political, economic and educational spheres but ensured the preservation of their communal individuality despite the smallness of their numbers and the loss of cultural contacts with the Muslim World. As a result till about the beginning of the current century the Muslims of Ceylon remained culturally isolated, educationally backward and politically insignificant.

The Muslims, however, could not continue to ignore the trend of events taking place in Ceylon and India. Sir Sayyid Aḥmad K͟hān, who founded in 1875 the Mohamedan Anglo-Oriental College, was the leader of the Aligarh Movement in India with its emphasis on educational reforms. Arumuga Navalar, who countered the efforts of the Christian Missionaries in North Ceylon, established in 1872 an English school under Hindu management. The Buddhist Theosophical Society established an English school in 1886 which finally developed into the present Ananda College, Colombo. In this

year the Anagarika Dharmapala who was actively associated with the inauguration of this Society resigned his Government post to devote his entire time to Buddhist activities. During this period the Muslims of Ceylon had in M. C. Siddi Lebbe a leader of vision who understood the significance of these changes. He had for several years canvassed the opinion of his co-religionists for a new educational approach but he had not been heeded. It was at this time, in 1883, that ʿUrābī Pas͟ha [*q.v.*] came as an exile to Ceylon. He provided a powerful stimulus for a reappraisal on the part of the Muslims of Ceylon in regard to their attitude towards modern education and Western culture. All these together culminated in the establishment in 1892 of Al-Madrasa al-Zāhira under the patronage of ʿUrābī Pas͟ha which has since blossomed into Zahira College, Colombo.

The Ceylon Muslims—apart from isolated instances—belong to the S͟hāfiʿī school of Sunnīs. In the realm of Law the following special enactments pertaining to them may be cited—the Mohammedan Code of 1806 relating to matters of succession, inheritance etc., Mohammedan Marriage Registration Ordinance no. 8 of 1886 repealed by Ordinance no. 27 of 1929 and now superseded by the Muslim Marriage and Divorce Act no. 13 of 1951 which confers upon the Ḳāḍīs appointed by the Government exclusive jurisdiction in respect of marriages and divorces, the status and mutual rights and obligations of the parties; the Muslim Intestate Succession Ordinance no. 10 of 1931 and the Muslim Mosques and Charitable Trusts or Waḳfs Act no. 51 of 1956 which provides a separate Government Department with a purely Muslim Executive Board. Of these the Mohammedan Code of 1806 is of special value to students of Islamic Civilization, for it contains many provisions which are in conflict with the principles of Muslim law stated in standard text books on that subject. Wherever such conflict occurs the view has been taken that it is the duty of the courts in Ceylon to give effect to the provisions of the Code, which formed the statute law of this country, although they may clash with well-established principles of Muslim law."

Tamil is the home-language of the great majority of the Muslims of Ceylon. In the Tamil language as spoken and written by the Muslims of Ceylon and of South India, a number of Arabic words are used, which in many cases have displaced their pure Tamil equivalents. The term Arabic-Tamil has therefore gained currency to indicate the Tamil of the Muslims. At one time Arabic-Tamil was written in the Arabic script, ڔ ڃ ڠ ڣ being improvised to denote four Tamil sounds unknown to Arabic, and *o* being represented by 6, ō by و6, e by 6̄ and ā by ي6. Today Arabic Tamil is being generally written in the Tamil alphabet with or without diacritical marks. The literature of the Muslims of Ceylon has to be treated as part of the Arabic-Tamil literature of South India. Although Ceylon has produced its quota of poets and writers in Arabic-Tamil none has reached the stature of their well-known South Indian counterparts.

The Muslims of Ceylon received their first political recognition when in 1889 a nominated seat was assigned to them in the Legislative Council. This representation was increased to 3 elected members in 1924. The Donoughmore Constitution of 1931 abolished communal representation but the Soulbury Constitution of 1947 envisaged a certain measure of communal representation through territorial electorates specially delimitated. In the present House of Representatives, elected in 1956, there are 7 Muslim M.P.s among 95 territorially elected members.

ČEYREK, a corruption of Persian *čahāryak* (1/4), has in Turkish the special meaning of a quarter of an hour, or a coin, also known as the *bes͟hlik*, or five piastre piece, originally the quarter of a *med͟jīdiyye*, introduced in 1260/1844 during the reign of ʿAbd al-Mad͟jīd and issued by the succeeding rulers until the end of the Ottoman Empire. The silver *čeyrek* had a fineness of 830, weighed 6.13 grams and measured 24 mm. in diameter.

(G. C. Miles)

CHAM [see Čam]

ČHAT, an ancient town, situated on the bank of the Ghaggar and 14 miles from Ambāla (India), is now practically desolate, with the exception of a few huts of Gud͟jd͟jars (milk-sellers) and other low-caste people atop a prehistoric mound, still unexcavated. It was a *maḥāll* in the *sarkār* of Sirhind, *ṣūba* of Dihlī, during the reign of Akbar, with a cultivable area of 158,749 *bīgha*s yielding a revenue of 750,994 *dāms* annually. Its name suggests that in pre-Muslim days it was a settlement of Čhattas, *i.e.*, *Čhattarī*s (more accurately Ks͟hattriyas), a martial Hindū tribe. Apart from being a flourishing town peopled mainly by the Afg͟hāns and the Rād͟jpūts it was, during the early Mug͟hal period, a military station garrisoned by 650 cavalry and 1,100 infantry. Its history is closely connected with that of Banūr [*q.v.*] only 4 miles away. During the Sayyid and Lōdī periods, as the vast ruins, the dilapidated but very spacious D͟jāmiʿ Masd͟jid of the pre-Mug͟hal period and the extensive grave-yard indicate, it was a town of considerable importance, and became the seat of one of the four branches of the Sayyids of Bārha, called the Čhat-Banūrī or Čhat-rāwdī Sayyids, of whom Sayyid Abu 'l-Faḍl Wāsiṭī was the first to settle in this town (see *Āʾīn-i Akbarī*, vol. i, transl. Blochmann, 430-1). In 1121/1709 it was over-run and laid almost completely waste by the Sikhs under general Banda Bayrāgī. S͟hayk͟h Muḥammad Dāʾim, the commandant of Ambāla, who encountered the Sikh army was defeated and fled in dismay to Lahore. The most wanton cruelties were perpetrated on the inhabitants of Čhat and Banūr and very few escaped the sword or forced apostasy. Since then Čhat has remained a dependency of Patīāla and has never regained its lost prosperity. Al-Badāʾūnī (Eng. transl. iii 47)

mentions one Shaykh Dā'ūd of Čhatī, but apparently Čhatī has been misread for Djuhnī, more accurately Djuhnīwāl, once a small town in the *pargana* of Multān, and the translator has obviously confounded Čhat.

CHINA [see al-ṣīn]

CHIOS [see saḳiz]

CHITRAL (Čitrāl), a princely state and a federated unit of the Republic of Pakistan, situated between 35° 15′ and 37° 8′ N. and 71° 22′ and 74° 6′ E. with an area of about 4,500 sq. miles, and a population of 105,000 in 1951, contiguous to Soviet Russia, Afghānistān and the Peoples' Republic of China. The state takes its name from the capital city, Čitrāl, also known as Ḳāshḳār or Čitrār, two ancient names still in favour with the people who call themselves Ḳāshḳārīs. The origin of Ḳāshḳār is not known; the theory that it is composed of *Kāsh*—a demon and *ghār*—a cave must be dismissed as absurd. The Chinese, after their conquest sometime in the first century B.C., called the area Čitar, said to mean a green garden. Bābur, in his memoirs, uses the same word for Čhat [*q.v.*], apparently struck by the large number of flower-gardens in and around the town (*Bābur-nāma*, transl. A. S. Beveridge, i, 383). The state, with an estimated annual income of 13,000,000 rupees, is now commonly known as Čitrāl; although the natives still prefer the older form Čitrār.

A mountainous country, its ice-caps and glaciers are a permanent source of water-supply for the lush green valleys of the Hindū-Kush whose off-shoots divide Čitrāl into several orographic regions. Bounded by the unnamed *kūhistāns* of Dīr and Swāt (*qq.v*), the Himalayas and the Karakoram Range there are many famous passes and peaks in Čitrāl.

The Dūrāh Pass (14,500 ft.) leads to Badakhshān [*q.v.*] and is open for only three months in the year. From ancient times it has served as an important caravan route between Čitrāl and the Central Asia. The Bārōghil pass (12,500 ft.) across the Yārkhūn valley connects China and Soviet Russia with Čitrāl and caravans from Kāshghar and Khōtan [*qq.v.*] were a common sight till recently. The other important passes are Shandūr (12,500 ft.) and Lowarā'ī (10,230 ft.) which lead to Gilgit and Dīr respectively. The Lowarā'ī pass, the only link between Čitrāl and the rest of West Pakistan, remains snow-bound for at least seven months in the year, and when open it can only be negotiated by jeep traffic. During the snow-bound period travellers cross into Čitrāl on foot and merchandise is carried on mules.

The main occupation of the people is agriculture or cattle-grazing, though the state is rich in mineral and forest wealth, which awaits large-scale exploitation. There are believed to be considerable deposits of antimony, iron-ore, lead, sulphur, mica, crystal and orpiment. The *Ta'rikh-i Čitrāl* mentions gold, silver, lapis-lazuli, topaz and also turquoise among the rare minerals found.

Communications are a great problem; no roads worthy of the name exist. However, a good motor road, mainly for strategic purposes, is under construction across the Lowarā'ī Pass and is expected to be completed by the end of 1959. A proposal to construct an all-weather road, through a tunnel under the Lowarā'ī Pass, connecting Pēshāwar with Čitrāl, was also mooted but, in view of the huge cost involved, has been abandoned.

Since her accession to Pakistan in 1947, Čitrāl has made rapid progress in almost all spheres of life. There are now 85 regular schools including two high schools and two *dār al-ʿulūm*s for religious instruction, as compared to two middle schools and a few *maktab*s before accession. Education up to matriculation standard is free, and facilities are also provided for higher education outside the state. Two well-equipped hospitals and a number of dispensaries have been opened to provide free medical aid to the people. Small-scale and cottage industries have been set up and a fruit-crushing factory has been established at Dolomus, near Čitrāl. Other measures for raising the standard of living of the people have also been taken.

Very little is known about the early history of Čitrāl. The aborigines have been called Pishāčas and described as cannibals. They are said to have been subdued by the Chinese in the first century B. C. Nothing reliable is known thereafter till the 3rd/10th century when we have archaeological evidence to prove that Čitrāl was under the sway of king Djaypāl of Kabul in 287/900 and that the people were Buddhists. Čingīz Khān is also said to have made inroads into Čitrāl, but this lacks historical confirmation.

The founder of the present ruling dynasty was one Bābā Ayyūb, an alleged grandson of Bābur, who after the departure of his father, Mīrzā Kāmrān, to Mecca, wandered into Čitrāl and took up service with the ruling monarch, a prince of the Ra'īsīyya dynasty. His grandson Sangīn ʿAlī I is said to have found favour with the ruler, who appointed him his first subject. Gradually he assumed great power, and on his death in 978/1570 his two sons Muḥammad Riḍā' and Muḥammad Bēg succeeded to the offices he had held. On the death of the Ra'īsiyya prince, Muḥammad Riḍā' became the virtual ruler, but soon after he was murdered by his nephews for the excesses which he had perpetrated against them and their father, Muḥammad Bēg. In 993/1585 Muḥtaram Shāh I, one of the sons of Muḥammad Bēg, peacefully dethroned the last Ra'īsiyya ruler of Čitrāl, whose descendants he deported to Badakhshān, and himself assumed the reins of government. In 1024/1615 Maḥmūd b. Nāṣir Ra'īsiyya attacked Čitrāl with a large force of Badakhshānī troops, defeated Muḥtaram Shāh I, granted him pardon but expelled him from Čitrāl. In 1030/1620 Muḥtaram Shāh I returned to Čitrāl after murdering Mahmūd Ra'īsiyya, only to be attacked for the second time in 1044/1634. Subsequently Muḥtaram Shāh I had to leave the country because of the defection of his

troops. He was driven from pillar to post and was ultimately killed in an encounter with the people of Gilgit [*q.v.*], who were, however, very severely punished in 1124/1712 by his son and successor Sangīn ʿAlī II, for the murder of his father. Sangīn ʿAlī II, having despaired of regaining his lost principality went to Afghānistān, then a province of the Indian Mughal empire.

On the accession of Shāh ʿĀlam Bahādur Shāh I [see BAHĀDUR SHĀH I] to the throne of Delhi, Sangīn ʿAlī II came down to India and entered in 1120/1708 the service of Shāh ʿĀlam, who appointed him custodian of the shrine of Aḥmad Sirhindī [*q.v.*]. With the monetary assistance rendered by the Mughal emperor Sangīn ʿAlī II was able to enrol Swāt levies who helped him reconquer the lost territory. Sangīn ʿAlī II was murdered in 1158/1745 by some members of the Raʾīsiyya dynasty and was followed by a number of weak and effete rulers. In 1189/1775 Frāmarz Shāh, a nephew of Muḥtaram Shāh I, came to the throne. He was a military adventurer and led a number of campaigns against the neighbouring territories of Gilgit, Nāgar and Kāfiristān. He also attacked Čaght Serai in Afghānistān and occupied it after a fierce battle. He was murdered in 1205/1790 by one of his uncles, Shāh Afḍal, who occupied the throne. On his death in 1210/1795 his brother Shāh Fāḍil succeeded him. Then follows a series of internecine battles, and the picture becomes so confused that it is difficult to follow the events with historical precision.

Shāh Fāḍil was succeeded in 1213/1798 by Shāh Nawāz Khān, his nephew, who repulsed with heavy losses an attack on Čitrāl in 1223/1808 by Khayr Allāh Khān b. ʿIṣmat Allāh Khān, one of his cousins. He was, however, forced to quit the throne but was proclaimed ruler for the third time in 1234/1818. In the meantime Muḥtaram Shāh II, one of the brothers of Shāh Nawāz, had become a prominent figure in state affairs. Čitrāl was then divided into small units each under a local chieftain, the most powerful of whom was Mulk Amān, the ruler of Čitrāl proper. On his death in 1249/1833 Muḥtaram Shah II, entitled Shāh Katōr, assumed power, brushing aside the minor sons of Mulk Amān. After a hectic and picturesque political career of 28 years Muḥtaram Shāh II, burdened with age, died in 1253/1837 and was succeeded by his son Shāh Afḍal II. In 1257/1841 Gawhar Amān, a son of Mulk Amān and ruler of Warshigūm (Yāsīn and Mastūdj) unsuccessfully invaded Gilgit whose ruler appealed for help to his over-lord, the Dōgrā Rādjā of Kashmīr. In 1265/1848 Gawhar Amān again attacked Gilgit but was forced to retire by the Kashmīr troops who occupied Gilgit. In 1269/1852 the inhabitants of Gilgit, sick of the Dōgrā excesses, secretly invited Gawhar Amān who, after a pitched battle, defeated the Sikhs and occupied Gilgit.

The Mahārādjā of Kashmīr, smarting under the blow, again invaded Gilgit in 1273/1856 but the very next year Gawhar Amān, taking advantage of the Kashmīr ruler's preoccupation with the tumult in India, drove out the Sikh garrison. A series of skirmishes then followed, neither side gaining the upper hand. Meanwhile Gawhar Amān died and the fort of Gilgit was recaptured by the Kashmīr troops in 1277/1860. Earlier in 1271/1854 Gulāb Singh, the ruler of Kashmīr was said to have entered into an alliance with Shāh Afḍal, the Mehtar of Čitrāl, against Gawhar Amān, but this statement is without foundation as Shāh Afḍal had already passed away in 1270/1853 and succeeded by his son Muḥtaram Shāh III, nick-named Ādam-Khʷur (man-eater). In spite of his valour, generosity and prowess he was disliked by the people who deposed him and placed Amān al-Mulk on the throne. In 1285/1868 Čitrāl was attacked by Maḥmūd Shāh, the ruler of Badakhshān, who suffered an ignominious defeat. In 1296/1878 the Mehtar of Čitrāl made an engagement with the Mahārādjā of Kashmīr by which the latter acknowledged the supremacy of the former, accepting in return a subsidy of 12,000 rupees (Śrīnagar coinage) annually.

In 1297/1880, after the defeat of Pahlwān Bahādur, ruler of Upper Čitrāl, the entire territory became united for the first time under one chief, Mehtar Amān al-Mulk, who also became the master of Mastūdj, Yāsīn and Ghizr. In 1303/1885-6 Čitrāl was visited by the Lockhart Mission followed in 1306/1888 by another under Captain Durand which was instrumental in getting the annual subsidy, paid by the Kashmīr Darbār, raised to 12,000 rupees in 1309/1891. In 1310/1892 Afḍal al-Mulk succeeded his father, Amān al-Mulk, who had died suddenly, but was soon afterwards murdered by his uncle, Shīr Afḍal, who was, in turn attacked and expelled by Niẓām al-Mulk, governor of Yāsīn and an elder brother of Afḍal al-Mulk, then a refugee in Gilgit. In 1312/1895 Niẓām al-Mulk was shot dead by his half-brother, Amīr al-Mulk, who seized the fort. Čitrāl was soon invaded by ʿUmrā Khān, the *wālī* of Djandōl and master at that time of Dīr [*q.v.*]. He was joined by Shīr Afḍal, an exile in Afghānistān. Both ʿUmrā Khān and Shīr Afḍal made common cause against the small British Indian force which, according to the treaty of 1307/1889, had been stationed at Čitrāl. When it was learnt that Amīr al-Mulk had made secret overtures to ʿUmrā Khān and his ally, the British Agent placed him under detention and provisionally recognized Shudjāʿ al-Mulk, a boy of 14 years, and a son of Amān al-Mulk as the Mehtar.

The British Political Agent, with a mixed force of 400 native and British troops, had occupied the fort before placing Shudjāʿ al-Mulk on the throne. The garrison attacked the forces of ʿUmrā Khān and Shīr Afḍal but met with little success. Then began the historic seige of Čitrāl by ʿUmrā Khān and his confederates which lasted from 3 March 1895 to 19 April 1895, and was finally raised by the entry into Čitrāl of the advanced guard of the main relief force on 26 April 1895 which had been despatched *via* Malākand and Dīr. Shīr Afḍal fell a prisoner into the hands of the British while ʿUmrā Khān escaped to Afghānistān. Amīr al-Mulk and his leading men were deported to India as a punishment for their complicity in the trouble which necessitated large-scale military operations. Shudjāʿ al-Mulk was confirmed as the Mehtar and since then Čitrāl has enjoyed an unbroken period of peace and progress. During the Afghān War of 1338/1919 the Čitrāl Scouts fully co-operated with the British. The Mehtar was allowed a sum of 100,000 rupees as his contribution to the expenses of the war, and the same year the title of His Highness, with a personal salute of 11 guns, was conferred on him. In 1345/1926 the Mehtar entered into an agreement with the Government of India for the prevention of smuggling of narcotics through Dīr and Swāt, into British India.

An enlightened ruler, Shudjāʿ al-Mulk introduced modern amenities like electricity, tele-communications and automobiles into the state and constructed roads, forts, grain godowns, irrigation channels and schools. He also built a Djāmiʿ Masdjid, said to be

the most beautiful and the largest building between Gilgit and Pēs͟hāwar. He is known as the 'Architect' of modern Čitrāl.

On his death in 1355/1936 he was succeeded by his son Nāṣir al-Mulk. A ruler endowed with literary taste, his Persian poetic work, the *Ṣaḥīfat al-Takwīn*, a study of the theory of evolution in the light of the Ḳur'ānic teachings, has won him praise and admiration from indigenous scholars. In 1362/1943 his younger brother Muẓaffar al-Mulk succeeded him. It was he who offered the accession of Čitrāl to Pakistan in 1367/1947. He was succeeded by Sayf al-Raḥmān in 1369/1949 who, on his death in an air-crash in 1374/1954, was succeeded by his infant son, Sayf al-Mulk Nāṣir, a boy of 3 years of age. The state is now ruled by a Council of Regency presided over by the Political Agent, Malākand Agency through the *Wazīr-i Aʿẓam*, an officer appointed by the Government of Pakistan.

II. Name, languages and tribes.

Khowar Çhetrár, together with corresponding forms in neighbouring languages, goes back to *Kṣetrāt(ī ?). Sanglēčī Šām-Čatrād, etc. contains an ancient name of N. Chitral (cf. *BSOS*, vi, 441f.).

Of the 105,529 (1951) inhabitants of Chitral the great majority (90,000) speak Khowár, the language of the Kho tribe and of the state. It extends east of the S͟handur pass as far as G͟hizr in Yasīn. Khowár is an Indo-Aryan language of archaic type, cf., *e.g.*, *šron* hip, *ašru* tear, *hardi* heart, *išpašur* father-in-law, etc. But it contains, apart from more recent borrowings from Pers., Ar. and Hind., also loan-words from the Pamir dialects, as well as a number of words of Middle Iranian origin. Some words are borrowed from, or shared with Burus͟haski and Ṣinā, and several of the most common words are of unknown origin.

Other Indo-Aryan languages are: Kalaṣa (3,000) spoken, mainly by pagans, in two dialects in the side-valleys of S. Chitral. Kalaṣa is closely related to Khowar. The Kalaṣ are said to have occupied Chitral right up to Reṣun, and to have been pushed back within the last few hundred years by the Khos, whose original home was in Torikho and Muḷikho in N. Chitral.—Phalūṛā (Ḍangarīk) (3,000) is spoken in some side valleys of S. E. Chitral by original immigrants from Cilās. It is an archaic form of Ṣinā. — Gawar-Bātī is spoken at Arandū, close to the Afg͟hān border, and also across it. In the same neighbourhood we find Damēlī in one village.—Gud͟jurī (2,000) is spoken by Gud͟jur herdsmen who have filtered through from Swāt and Dīr.

Katī, a Kāfir language, has been introduced into S. Chitral within the last few generations by settlers from Kāmdēsh and the upper Bas͟hgal valley in Nūristān.

Iranian languages: Persian (Badak͟hs͟hī) (1,000) at Madaglas͟ht in the S͟his͟hi Kuh valley.—Pas͟hto (at least 4,000) in the Arandū district.—Wak͟hī, spoken by a few settlers in upper Yārk͟hūn. Yidg͟hā, an offshoot of Mund͟jī in Mund͟jān, is spoken by the Yidg͟h (Idəg͟h, etc.) tribe, settled since long in the upper Loṭkuh valley, below the Dōrāh pass.

At a not too remote date we must suppose that Chitral was divided between Khos and Kalaṣes, and the ancestors of these languages must have been introduced from N.W. India at a very early stage of development. A couple of short Sanskrit inscriptions have been found. Khowar has no written literature, [except a translation of the Gand͟j-i Pas͟htō (Calc., 1902, romanized), and a short prayer book in Urdū script (Nimež, 1958).] But the language is rich in songs and popular tales (šilog͟h < šloka).

With the exception of most Kalaṣes the inhabitants are Muslim, mainly Maulaīs. The last pagan Katīs were converted in the 1930s. But many traces of pre-Islamic customs and festivals remain. Note also Khowar *daṣman* priest, probably < Skt. *dakṣamant.

The Khos are divided into three social classes: Ādamzādas, nobles, or at any rate free-holders; Arbābzādas, comparatively well off, being paid for their services to the Mehtar, and on that account with a higher status than the very poor Faḳīr Miskīn.

Each class contains a number of clans, some of which carry patronymical names, other such indicating foreign origin, while others are difficult to analyse. Also the Kalaṣ and Yidg͟h tribes are divided into clans.

The Khos are dolicho- to mesocephalic, of middle height, and often with eyes and hair of medium colour, a few are fair-haired and blue-eyed. Kalaṣes and Katis are more decidedly dolichocephalic, and the Katis also of greater height.

CHITTAGONG, Tset-ta-gong, Čātigrāma, or Čātgām is the main sea-port in East Pakistan and the head-quarter of the district bordering on Arakan. The town, which has a population of 294,046 (1951 census) inhabitants, stands on the right bank of the Karnaphūli river, ten miles from the sea, and has a good natural harbour away from the flooded plains of Bengal and the silt-depositing

mouths of the Ganges. Its origin is obscure. The early Arab geographers speak of only Samandar on the bank of probably the Brahmaputra as a sea-port in this region. Chittagong comes in to prominence from the 8th/14th century onward, and is referred to as the *Porto Grando* by the Portuguese. It was first conquered by the Muslims in 738/1338 possibly from the Arakanese who often disturbed the peace of the city. In 918/1512 the Bengal Sulṭān ʿAlāʾ al-Dīn Ḥusayn Shāh ousted the Arakanese and named it Fatḥābād. For about a hundred years when the Mughals were consolidating their position in Bengal, Chittagong again reverted to the Arakanese, and only in 1076/1666 it was finally conquered by the Mughal governor Shāyistā Khān, who renamed it Islāmābād and had a Djāmiʿ mosque built there.

The district of Chittagong has a large mixture of foreign populace, the men of Arab descent being in good proportion. The Arab influence is also observable in the Chittagonian dialect. Several stories about the *Māhī Sawār* (riding on fish, *i.e.*, coming by sea) saints are current here. About four miles from the town stands the locally famous *dargāh* dedicated to the memory of Bāyazīd Bisṭāmī. Within the city can be seen the tomb of Shaykh Badr al-ʿĀlam, a saint of the 14th century, and the *dargāh* of *Pāñč Pīr* [*q.v.*], a group of five saints not definitely specified but very popular in this region. Another object of great local reverence is the *Ḳadm-i Rasūl* [*q.v.*] (a stone replica of the foot-print of the Prophet), preserved in a 17th century mosque.

CHIVALRY [see furūsiyya]

CHOCIM [see khotin]

CHRISTIANITY, CHRISTIANS [see naṣārā]

CHRONOLOGY [see taʾrīkh]

CID [see al-sīd]

ČIFT-RESMI also called *čift-ḥakkî* or *ḳulluk-akčasi*, in the Ottoman empire the basic *raʿiyyet* (see reʿāyā) tax paid in principle by every Muslim peasant, *raʿiyyet*, possessing one *čift*. The term *čift* (original meaning = "pair") was used to denote the amount of agricultural land which could be ploughed by two oxen. It was fixed as from 60 to 150 *dönüms* according to the fertility of the soil (one *dönüm* was about 1000 sq. m. = 1196 sq. yds.). We find a *čift-akčasi* in Anatolia under the Saldjūḳids at the rate of one dīnār [*q.v.*]. On the other hand the Ottoman *čift-resmi* had striking similarities with the Byzantine taxes paid by the *paroikoi* to the *pronoïa*-holders. It is to be noted that, as an *ʿurfī* tax, it appeared in its original form in the lands conquered from the Byzantines in Western Anatolia and Thrace, and was applied there both to the Muslim and Christian *reʿāyā* alike, whereas in other parts of the empire the Christians were subjected to a different *raʿiyyet* tax, namely the *ispendje* or *ispenče*.

In the *Ḳānūnnāme* of Meḥemmed II it is stated that *čift-resmi* was the money equivalent of seven services such as the provision of hay, straw, wood etc., for the *tīmār*-holder. For these services, *khidmet*s or *ḳulluḳ*s, twenty-two *akča* [*q.v.*] were to be paid as *čift-resmi*. Those possessing half a *čift*, *nīm-čift*, were to pay half. Regardless of his personal condition, every *raʿiyyet* possessing a *čift* or half a *čift* had to pay this tax, and this gave it the character of a land-tax. In the 10th/16th century Abu 'l-Suʿūd and others attempted to include it among the *sharʿī* taxes as *kharādj-i muwaẓẓaf*.

Married peasants with land amounting to less than half a *čift*, or possessing no land of their own, were called *bennāk* [*q.v.*], and were subject to lower rates, for example 6 or 9 *akča*s, which were later increased to 9, 12 and 18. In the *Ḳānūn-nāme* of Meḥemmed II the *bennāk* were supposed to be subject only to three services, the money equivalent of which was 6 or 9 *akča*s. Lastly the *reʿāyā* classified as *ḳara* or *müdjerred*, the very poor or bachelors, who possessed no land of their own, paid this tax at the lowest rate of 6 *akča*s.

Thus *čift-resmi* can be regarded as the basic unit of a graduated tax system, and even *tütün-resmi* and *dönüm-resmi* can be included in the same system.

Originally the rate of *čift-resmi* was 22 *akča*s, but in 862/1458 it was raised to 33 *akča*s in the *sandjaḳ*s of the *eyālet* of Anadolu. It was further raised in some parts of Anatolia with additions made in favour of *subashī*s [*q.v.*] and *sandjaḳ-beg*s [*q.v.*], but under Süleymān I this innovation was abolished as causing confusion. Applied to Syria after its conquest with a higher rate of 40, and in Eastern Anatolia of 50 *akča*s it remained however, 22 *akča*s in Rūmeli (see the list in my *Osmanlılarda Raiyyet Rüsûmu*, in *Belleten*, no. 92, 1959). Partial or total exemptions from *čift-resmi* were granted by imperial *berāt*s in return for some public services required from the *reʿāyā*. But in the 10th/16th century many such exemptions were abolished.

As a rule *čift-resmi* was included in the *tīmār* [*q.v.*] revenue of the *sipāhī*. But it lost its importance when after 990/1582 the *akča* decreased in value and the *ʿawāriḍ* [*q.v.*] became a form of regular taxation imposed on the *reʿāyā*. (Halil Inalcik)

ČIFTLIK is the ordinary word for farm in Turkish, but in the Ottoman times it designated, at first, a certain unit of agricultural land in the land-holding system, and then, later on, a large estate. It was formed from *čift* (pair, especially a pair of oxen) from the Persian *djuft* with the Turkish suffix, *lik*. Originally, a *čiftlik* was thought of as the amount of land that could be ploughed by two oxen. *Čift* and *čiftlik* were used synonymously. In the Slav areas of the Ottoman empire the term *bashtina* was often substituted for *čiftlik*. In the Ottoman land-holding system during the period in which the *tīmār* [*q.v.*] organization prevailed, *čiftlik* was a term applied to a holding of agricultural land comprising 60 or 80 to 150 *dönüms* (one *dönüm* equals approximately 1000 sq.m.), the size varying with the fertility of the soil. The *čiftlik* was the basic land unit used in all forms of land-holding, *mīrī*, *waḳf*, and *mülk* or *mālikāne*. From the legal point of view, however, the kind of *čiftlik* varied with the type of tenure.

The *raʿiyyet čiftlik*s which the *reʿāyā*, Christian and Muslim peasants, possessed by *tapu* [*q.v.*] and for which they paid the *ʿushr* [*q.v.*] and *čift-resmi* [*q.v.*] taxes to the land-holder, made up by far the greater part of the agricultural lands. As a rule, *čiftlik*s were not to be subdivided because such a situation would, in the judgement of Abu 'l-Suʿūd, make it impossible to collect the taxes imposed on a *čiftlik* as a whole. In reality, however, during the land surveys, *taḥrīr* [*q.v.*], it was found that many *čiftlik*s had lost their original form as a result of sub-division, and the *čift-resmi* were no longer being collected. In order to preserve the *čiftlik*, which was essential to the land-holding system of

the time, and which had been the basis for land and hearth taxes in the area even before the Ottomans, it was decreed that if land recorded in the *defters* [see DAFTAR] as *čiftlik* was found divided among several persons it was to be restored to its original form, and if a *raʿiyyet* in possession of a *čiftlik* died leaving several sons, they were to possess it collectively, *meshāʿan*.

In addition to the *raʿiyyet čiftliks* we also find what we can call the military *čiftliks* which, unlike the former, were in the direct possession of the military. In this category we find the *khāṣṣa čiftliks* of the *tīmār*-holders and the *čiftliks* in the military organizations of the *yaya*, *müsellem* and *doghandjï* etc. Their common feature was that they were not subject to the *raʿiyyet* taxes. But, while the *khāṣṣa čiftliks*, also known as *kïlïč-yeri*, were exploited by the *tīmār*-holders under a sharecropping system, *ortaḳdjïlïḳ* or *muḳāṭaʿa* [*q.v.*], the *yaya* and *müsellem čiftliks* were cultivated, as a rule, by the *yayas* and *müsellems* themselves. These *čiftliks* were never to change their original character and usually were named by their original possessors as Meḥmed-yeri, ʿAlī-yeri, etc. There were attempts by the military to add *raʿiyyet* lands illegally to their *khāṣṣa čiftliks*. But, in the 10th/16th century, most of the military *čiftliks* were transformed by the government into *raʿiyyet čiftliks* and assigned as *tīmārs*. In the case of the *khāṣṣa čiftliks* in Bosnia [see BOSNA], the reason given for their transformation in 936/1530 was that they lay uncultivated.

The *čiftliks* in the *waḳf* and *mülk* or *mālikāne* lands were the same in size as other *čiftliks* and were usually cultivated by the *raʿiyyet*. During the reigns of Bāyazīd I, Meḥemmed II, and under the 10th/16th century Sultans, a great part of these *čiftliks* too was converted into *tīmārs*. For example, in Erzindjan in 947/1540, each *zāwiye* [*q.v.*] under a *shaykh* was assigned a *čiftlik* while the rest of the land was distributed among the *tīmārs*.

As early as the 8th/14th and 9th/15th centuries the Ottoman Sultans granted influential men whole villages or large *tīmārs* as *čiftliks*. In these instances we are no longer dealing with the *čiftlik* as a land measure, but as a personal estate, granted by the Sultan. For example, in the *defter* of Pasha-sandjaghï dated 859/1455 (Belediye Küt. Istanbul, Cevdet kit. no. 0.89) we find a number of people, among them the Court physician Meḥmed Shirwānī and the Sultan's tutor Seydī Ahmed, in possession of *tīmārs* as *čiftlik* (*ber wedjh-i čiftlik*). Such large lands were sometimes given as *mülk* (*ber wedjh-i mülkiyyet*). The revenues of these *čiftliks* were farmed out by their possessors, who usually lived in the towns, for a sum of money which was called *muḳāṭaʿa*. The possessor of the *čiftlik* was usually required to equip one soldier (*eshkündji*) for the Sultan's army.

Even in this early period we find some newly opened lands or *mazraʿas* [*q.v.*] held directly as *čiftliks* by members of the military class who, as a rule, paid the government a sum of money which was also called *muḳāṭaʿa*. Therefore, these *čiftliks* were also known as *muḳāṭaʿalï čiftliks*. In central and northern Anatolia the *čiftliks* which were possessed by the pre-Ottoman aristocratic families under the names of *mālikāne* or *yurd* were given the same status with the obligation of supplying an *eshkündji*. The *čiftliks* which were opened in the uncultivated lands by the military were subject only to the *ʿushr* tax. By the end of the 10th/16th century the number of such *čiftliks* in the hands of the Janissaries increased rapidly. But, in general, the tendency in the 10th/16th century was to convert all types of military *čiftliks* into *raʿiyyet čiftliks* so that the *raʿiyyet* taxes might be included in the *tīmārs*.

With the disruption of the *tīmār* system, this course of development was reversed. During and after the period of confusion between 1003/1595-1018/1609, a great part of the *raʿiyyet čiftliks* found their way into the hands of the *ḳapï-ḳulu* and palace favourites, and the old practices such as possession of *tīmārs* as *čiftliks*, *mülk* or *muḳāṭaʿalï čiftliks* were now widespread. In the same period, moreover, when the peasantry abandoned their lands *en masse* and scattered throughout Anatolia, which is known in Ottoman history as the Great Flight, the Janissaries and others took possession of the *reʿāyā čiftliks* by *tapu*. The accumulation of *čiftliks* in the hands of *aʿyān* [*q.v.*], rich and influential men in the provinces, however, was mainly due to the *muḳāṭaʿa* system. This again was an old practice but now, with the disorganization of the *tīmār* system, the *tīmār* lands were increasingly rented as *muḳāṭaʿa* to private persons bidding the highest price. In reality however, through administrative abuses, the influential men managed to obtain them. *Aghas* and *aʿyān* with large *muḳāṭaʿa* holdings, *čiftliks*, emerged everywhere in the empire, especially during the 12/18 century. Nedjātī (Süleymaniye Küt. Esad ef. no. 2278, v. 43), writing in that century, complained that many *tīmārs* had been seized by the *aʿyān* and *ahl-i ʿurf*, officials, in the provinces. It was on the *muḳāṭaʿa* lands that the power of the great *aʿyān* rested in that century, and from this period on the word *čiftlik* was used to designate large personal estates. The attempts to break up these *čiftliks* made by the *Tanẓīmāt* [*q.v.*] reformers did not meet with any great success and this became the underlying factor in the peasant uprisings in the Balkans in the 13th/19th century. Under the Turkish Republic a law passed in 1945 (modified in 1950) provided that the large estates were to be broken up and distributed to the peasants in need of land.

ČIGHĀLA-ZĀDE (DJIGHĀLA-ZĀDE) YŪSUF **SINĀN PĀSHĀ** (c. 1545-1605), also known as Čaghal (Djaghāl)-oghlu, belonged to the Genoese house of Cicala. He was born at Messina in Sicily and received the Christian name Scipione Cicala. His father, the Visconte di Cicala, was, according to Gerlach, a "corsair" in the service of Spain, while his mother is said (cf. *L'Ottomanno*, of L. Soranzo) to have been "Turca da Castelnuovo". The Visconte and his son, captured at sea by Muslim corsairs in 968/1561 (some of the sources give the year as 967/1560), were taken first to Tripoli in North Africa and then to Istanbul. The father was in due course redeemed from captivity and, after living for some time at Beyoğlu, returned to Messina, where he died in 1564. His son, Scipione, became, however, a Muslim and was trained in the Imperial Palace, rising to the rank of *silaḥdār* and later of Ḳapïdjï Bashï. Čighāla-zāde, through his marriage first to one (980-981/1573) and afterwards (983-984/1576) to another great-grand-daughter of Sulṭān Sulaymān

Ḳānūnī, found himself assured of wealth, high office and protection at the Porte.

He became Agha of the Janissaries in 982/1575 and retained this appointment until 986/1578. During the next phase of his career he saw much active service in the long Ottoman-Persian war of 986/1578-998/1590. He was *Beglerbeg* of Van in 991/1583, assumed command, in the same year, of the great fortress of Erivān—he was now raised to the rank of Vizier—and also had a prominent rôle. once more as *Beglerbeg* of Van, in the campaign of 993/1585 against Tabrīz. As *Beglerbeg* of Baghdād, an appointment which he received in 994/1586, Čighāla-zāde fought with success in western Persia during the last years of the war, reducing Nihāwand and Hamadān to Ottoman control.

After the peace of 998/1590 he was made *Beglerbeg* of Erzurum and in 999/1591 became Ḳapudān Pāshā, *i.e.*, High Admiral of the Ottoman fleet—an office that he held until 1003/1595. During the third Grand Vizierate (1001-1003/1593-1595) of Khodja Sinān Pāshā he was advanced to the rank of fourth Vizier. The Ottomans, since 1001/1593, had been at war with Austria. Čighāla-zāde, having been appointed third Vizier, accompanied Sulṭān Meḥemmed III on the Hungarian campaign of 1004-1005/1596. He tried, but in vain, to relieve the fortress of Khaṭwān (Hatvan), which fell to the Christians in Muḥarram 1005/September 1596, was present at the successful Ottoman siege of Eğri (Erlau) (Muḥarrem-Ṣafer 1005/September-October 1596) and, at the battle of Mezö-Keresztes (Ḥāç Ovasî) in Rabīʿ I 1005/ October 1596, shared in the final assault that turned an imminent defeat into a notable triumph for the Ottomans. Čighāla-zāde, in reward for his service at Mezö-Keresztes, was now made Grand Vizier, but the discontent arising from the measures which he used in a effort to restore discipline amongst the Ottoman forces, the troubles which followed his intervention in the affairs of the Crimean Tatars, and the existence at court of powerful influences eager to restore Dāmād Ibrāhīm Pasha [*q.v.*] to the Grand Vizierate, brought about his deposition from this office, after he had been in control of the government for little more than a month (Rabīʿ I-Rabīʿ II 1005/ October-December 1596).

Čighāla-zāde became *Beglerbeg* of Shām (Syria) in Djumādā I 1006/December 1597-January 1598 and then, in Shawwāl 1007/May 1599, was made Ḳapudān Pāshā for the second time. He assumed command, in 1013/1604, of the eastern front, where a new war between the Ottomans and the Persians had broken out in the preceding year. His campaign of 1014/ 1605 was unsuccessful, the forces that he led towards Tabrīz suffering defeat near the shore of Lake Urmiya. Čighāla-zāde now withdrew to the fortress of Van and thence in the direction of Diyārbekir. He died, in the course of this retreat, during the month of Radjab 1014/November-December 1605.

CILICIA. The name. In Assyrian writings the name Khilakku refers primarily to the western part of the region, Cilicia Trachea, but also includes a part of Cappadocia, whilst the Cilician plain is called the Ḳué. In classical times the name Cilicia covered both western and eastern parts, Cilicia Trachea and the plain of Cilicia. The name does not occur among the Arab geographers, who call Cilicia simply the region of the *thughūr* [*q.v.*], or frontier towns. The form Ḳīlīḳiya (or Ḳilīḳiyā) is not met until modern times (see Ibn al-Shiḥna, *al-Durr al-muntakhab*, 180), but it is a direct derivation of the ancient name if, as is thought, the Turkish name for Cilicia Trachea, Ič-Il or Ičel [*q.v.*] (lit. 'the interior region') in fact comes from Kilikia.

Geographical outline. Cilicia is wedged

between the Anatolian plateau to the north-west and the Syrian frontier to the south-east. Its southern edge is fringed by the Mediterranean, which here reaches its most easterly extremity, and it is guarded to the north by the Taurus range, over which the Cilician Gates assure communication with the plateau. To the east are the Amanian Gates (al-Lukām), and to the west, a short distance beyond Selindi (ancient Selinonte), begins the province of Pamphylia (region of Adalia). Cilicia has at all times possessed a great strategic importance on account of the Cilician and Amanian Gates. Although the mountains and sea which isolate Cilicia have given it a marked individuality, it has rarely been able to maintain its own independance for long, even when it was the kingdom of Lesser Armenia or the Turcoman principality of the Ramaḍān-oghlus. Most of the time, from the Hittites to the Ottomans, it has been incorporated by conquest into the great empires of the eastern Mediterranean.

Cilicia falls naturally into three geographical regions, Cilicia Trachea, the Cilician Taurus, and the Plain of Cilicia. Cilicia Trachea (lit.: 'rough, rugged') is a mountainous region to the west, its coast dotted with ports where pirates took refuge when chased by Pompey's ships. It is virtually without means of communication to the Turkish interior, and has patches of cultivable land only in a few valleys, such as Gök Su (ancient Calycadnus) whose waters flow into the sea near Silifke. It is consequently a very poor region, and contains only a few small towns (Silifke, ancient Seleucia, Mut, on the road from Silifke to Karaman and Konya, and in the west Anamur on the coast and Ermenek inland).

The frontier between Cilicia Trachea and the coastal plain on the one hand and the Taurus on the other is the small river Lamos which has its spring in the Taurus. The Cilician Taurus is a strip 300 km. long by only 50 km. wide stretching in a south-west-north-east direction, and including the massifs of Dumbelek, Bulghar Dagh (corruption of Bughā, the Turkish translation of Taurus) and the Ala Dagh, one peak of which rises to 3600 m. The Ala Dagh continues northwards to the Ḥadjīn Dagh. The Anti-Taurus begins to the east, on the left bank of the Zamanti Su, formerly Karmalas, a tributary of the Sayhān (Saros). Its mountains can easily be crossed, however, as the high waters have cut many valleys through them in forcing their way from the Cappadocian plateau down to the Mediterranean. The Ṭarsūs Čay, ancient Cydnus, in Arabic Baradān, rises in the Bulghar Dagh massif and brings Tarsus its water. Between the Bulghar Dagh and the Ala Dagh are the valleys of the Čakît Su and Körkün Su, the Čakît being a tributary of the Körkün which in turn is a tributary of the Sayḥān. The road called the Cilician Gates climbs over passes and runs through these valleys. On the northern side it connects Tarsus with Ulukîshla via Bozantî (ancient Podandos-Budandūn) where the narrowest defile, the Cilician Gates properly so called, is at Gülek Boghaz, 1160 m. high on the upper reaches of the Ṭarsūs Čay.

The most important part of Cilicia is the plain (Greek Pedias, Turkish Čukurova), a product of the alluvial deposits of its two large rivers, the Sayḥān (ancient Saros) and the Djayḥān (ancient Pyramus). Along the left bank of the Djayḥān's lower reaches is a less elevated outcrop of the Taurus range, the Djabal al-Nūr or Djabal Miṣṣīṣ. Sheltered from the north by the great mountain barrier, the Cilician plain is open to the southern winds, enjoys the climate and flora of Mediterranean regions, and is extremely fertile. Crops peculiar to hot countries can be grown there, and apart from sugar-cane plantations there is also intensive cultivation of cotton. The main towns of Cilicia were always situated in this area. To the north, at the foot of the Taurus but still Mediterranean in climate, lie Sīs (at the present day Kozan) and ʿAyn Zarba (ancient Anazarba), to the south Miṣṣīṣa (Mopsuestia) on the Djayḥān, Adana on the Sayḥān, Tarsus, Ayās (ancient Aigai) on the western coast of the gulf of Alexandretta, and Alexandretta on its eastern side. Mersīn, to the west of Tarsus, is a relatively recent town, today named Ičel.

In the Islamic epoch Cilicia Trachea and Seleucia belonged to the Greeks, the frontier between the two empires being formed by the Lamos (in Arabic Lāmis).

Under the Ottomans Cilicia constituted the *wilāyet* of Adana, and was divided between the *sandjaks* of Ič-Il, Adana and Kozan in the north, and of Djebel Bereket around the gulf of Alexandretta.

The main towns of Cilicia are connected by the Aleppo-Fevzipasha-Adana-Ulukîshla railway, with a branch line running via Tarsus to Marsîna.

Cilicia has often been stricken by earthquakes; Michael the Syrian (iii, 17) and Ṭabarī (iii, 688) record the one which occurred on 23 June 803; it blocked the river Djayḥān and partly destroyed the walls of Miṣṣīṣa. Another one occurred in 1114 (see *EI*[1] s.v. MIṢṢIṢ). The most recent occurred in 1952.

Historical outline. When the Arabs had conquered Syria, Heraclius ordered the garrisons of towns between Alexandretta and Tarsus to evacuate their positions (see MIṢṢĪṢ). It is probable that part of the civilian population had to do likewise. The Arabs did not immediately take over these towns, but restricted themselves to raids into the region or across it into Anatolia, leaving small garrisons behind them as a security measure. On his return from an expedition in 31/651-652, Muʿāwiya is said to have destroyed all the fortresses as far as Antioch. However, records exist of the Arabs' capture of Tarsus in 53/672-673, which seems to indicate that it had been reoccupied by the Greeks or defended by its inhabitants. In 65/685, furthermore, the army of Constantine Pogonatus advanced as far as Mopsuestia (Miṣṣīṣa). From 84/703 onwards the Arabs began to settle in Miṣṣīṣa, stationing a garrison there during part of the year. They realized the advantage which would accrue in permanently

holding the Cilician positions, and ʿUmar b. ʿAbd al-ʿAzīz abandoned his plan to destroy all the fortresses between Miṣṣīṣa and Antioch. Sīs, at the foot of the Taurus, was captured in 103/751-732. In the first decades of the second century of the *hidjra* it became apparent that the Arabs intended to settle in the area; Miṣṣīṣa was colonized by the Zoṭṭ [*q.v.*] with their buffaloes, and a bridge was built over the Sayḥān to the east of Adana, in order to secure communications across the country. Although the Arab armies had no difficulty in traversing the country by way of the Cilician Gates, its occupation was still precarious. There was as yet no systematic organization of the frontier strongpoints, or *thughūr*, still dependant on the *djund* of Ḳinnasrīn, which Muʿāwiya or Yazīd b. Muʿāwiya had detached from Ḥimṣ (cf. Ibn al-Shiḥna, 9). But already the positions had been transformed into *ribāt*, that is to say posts manned by voluntary defenders of the faith, noted for both their religious and military zeal. Al-Dīnawarī, 345, points out that after his dismissal from office Khālid al-Ḳaṣrī [*q.v.*] obtained from the caliph Hishām permission to go to Tarsus, where he remained for some time *murābit*[an].

After the ʿAbbāsid revolution the Byzantines did not take advantage of the disturbed situation to reconquer Cilicia, but instead concentrated their attention on the regions of Malaṭya and Ḳālīḳalā. After the dynasty had become firmly established, and particularly in al-Mahdī's reign, the ʿAbbāsids undertook to fortify and populate the Cilician positions, above all at Miṣṣīṣa and Tarsus. Hārūn al-Rashīd was the most vigorous exponent of the frontier policy. In 170/786-787 he detached the frontier strongholds from the Djazira and djund of Ḳinnasrīn and put them under a separate government called al-ʿAwāsim [*q.v.*] (al-Tabarī, iii, 604; Ibn al-Shiḥna, 9); Cilicia now became part of the ʿAwāsim *djund*. Its reorganization served both defensive and offensive purposes; it helped protect Muslim territory against Byzantine incursions (cf. a poem of Marwān b. Abī Ḥafṣa in Ṭabarī, iii, 742), provided a secure operational base for the Muslim armies which, by tradition, carried out one or two raids each year into Greek territory, and served as a permanent base for volunteer troops and *murābiṭūn*. The fortification of the positions went in hand with the launching of expeditions across the Cilician Gates during the reign of Hārūn al-Rashīd and his successors. A vital step in the successful execution of these operations was the Muslim capture of Lulon (al-Luʾluʾa) in 217-832. Its fortress guarded the northern side of a pass which led over the Cilician Gates from Podandos (Budandūn, present-day Bozantı) to Tyana.

A considerable Christian population lived in the strongholds or the countryside around them. The Muslims recruited some of them as guides for their expeditions (see *AIEO Alger*, xv, 48), but they also sometimes acted as informers for the Byzantines, and it was perhaps as an act of reprisal that al-Rashīd had all the *thughūr* churches destroyed in 191/807 (Ṭabarī, iii, 712-713; Michael the Syrian, iii, 19 ff.).

The small river Lamos, demarcation line between Cilicia Trachea and Arab Cilicia, was periodically the scene of the exchange of prisoners or their resale to the enemy; historians have left their records of these dealings, in particular al-Masʿūdī in *Tanbīh*, 189-196.

After Muʿtaṣim's famous campaign against Amorium in 223/838, which marks the end of the spectacular expeditions into Anatolia, it gradually became the custom to appoint special amīrs to Cilicia, mostly resident in Tarsus. Although nominally dependant on the ʿAwāsim governor or the ruler of Syria, they enjoyed a certain degree of autonomy and were responsible for the defence of the country and the organization of annual land and sea expeditions. Some of the amīrs of Tarsus became quite famous, *e.g.*, ʿAlī al-Armanī, the eunuch Yāzmān (Greek Esman), Ghulām Zurāfa (alias Leo of Tripoli and Rashīk al-Wardāmī) Damyāna, Thamal, Naṣr al-Thamalī. For some time Cilicia, with its *ʿAwāṣim* and *thughūr*, passed from the control of the central government and became a dependency of Ṭūlūnid Egypt (260/873-286/891). This was a troubled chapter of its history, due to the dispute between the Ṭūlūnids and the central power, the intractability of the amīrs, and the ravages incurred through Byzantine raids. The return of Luʾluʾa (Lulon) to Byzantium in 263/876-877 constituted a serious threat to Cilicia. Nevertheless the *ribāt* of Tarsus developed during that period, and assumed greater proportions, as is shown by the sources used by Kamāl al-Dīn in the geographical introduction to his *Bughyat al-Ṭalab* (see *AIEO Alger*, xv, 46 ff.) and the descriptions of al-Iṣṭakhrī and Ibn Ḥawḳal (see ṬARSŪS). In particular, the caliph al-Muʿtazz and his mother spent great sums on maintaining special units of *murābiṭūn* under military and religious leaders. At a time when the spirit of holy war gave a particular character to Cilicia, there flocked to the country a great number of scholars, traditionists, ascetics and fervent religious men, intent on fulfilling the personal obligation of *djihād*, teaching the old traditions and spreading a spirit of purest orthodoxy among the soldiers and the civilian population. The more well-known of them were Ibrāhīm b. Adham b. Manṣūr [*q.v.*], who died some time between 160 and 166 (776-783), and Ibrāhīm b. Muḥammad al-Fazarī (d. 188/804) (Ibn ʿAsākir, ii, 254). Several of these persons are mentioned in the obituaries of al-Dhahabī and Abu 'l-Maḥāsin, often carrying the *nisba* of *Thagrī* or *Ṭarsūsī* (see under 181, 196, 273, 297 etc.). Yāḳūt (iii, 526) also noted their arrival in great numbers (cf. i, 529). It is known that Aḥmad b. Ṭūlūn was educated at Tarsus. Muslim festivals were celebrated in great brilliance there. Abu 'l-Maḥāsin (iii, 60) considered the feast of breaking the fast in Tarsus to be one of the four wonders of Islam.

In the first part of the 4th/10th century Cilicia came under the rule of the Ikhshīd, the governor of Egypt, who received his investiture from the caliph. After the clash between the Ikhshīd and the Ḥāmdanīd amīr Sayf al-Dawla, who won control of northern Syria and Aleppo, the governor of the frontier province submitted to the amīr of Aleppo, and the amīrs of Tarsus henceforth participated in Sayf al-Dawla's expeditions. But the Tarsus fleet, weakened by the policy of the caliph al-Muʿtaḍid, who had had it destroyed, was only a minor factor in the struggles of the 4th/10th century. In the second half of the century the threat of Byzantium from the north caused constant disturbances and rebellions, and the operations of 352/963-354/965 resulted in the complete reconquest of Cilicia by the Greeks (or Byzantines). It remained Byzantine for more than a century, during which time the outflow of Muslims was accompanied by a considerable inflow of Armenians, stimulated by the Byzantine practice of using Armenian officers to administer the country. After the Saldjūḳid raids had driven back those Armenians

who had settled in Cappadocia after the Turkish conquest of Armenia, their number now increased once more, and, after the battle of Manzikert in 1071, a virtual Armenian principality was created, stretching from Melitene to Cilicia. Its head was the Armenian Philaretus, a former general of Romanus Diogenes, and he established his capital at Marʿash (see Chalandon, *Alexis Comnène*, 95 ff.; J. Laurent, *Byzance et les Turcs Seldjoucides*, 81 ff.; idem, *Byzance et Antioche sous le curopalate Philarète*, in *Rev. des Et. arm.*, ix (1929), 61 ff.; Grousset, *Histoire des Croisades*, I, xl, ff.). The Armenian chiefs Oshin of Lampron (present-day Namrūn Yayla, north-west of Tarsus) and Ruben of Partzepert (north of Sīs) were perhaps his vassals. They retained their fiefs when Philaretus departed from the scene, defeated by the Turks. The Turks had ravaged Cilicia even before Manzikert, and shortly before the arrival of the Crusaders (Michael the Syrian, iii, 179) they seized the main towns, though failing to subjugate the Armenian princes in the Taurus. The latter joined forces with the Crusaders in 1097 and helped Baldwin of Boulogne and Tancred to reconquer the Cilician towns. There followed a period in which the towns continually changed hands in the struggle between Byzantium and the Frankish principality of Antioch. Alexis Comnenus recaptured them from Bohemond of Antioch, only to lose them once more to the latter's nephew Tancred, who in 1103 handed them over to his uncle upon his release from the imprisonment inposed by the Dānishmandid of Malaṭya. In 1104 they were retaken by the Byzantine general Monastras (Anna Comnena, XI, xi, 6; ed. Leib iii, 49). They remained the scene of dispute until 1108, when Bohemond was forced to sign a treaty acknowledging the authority of Alexius Comnenus over the whole of Cilicia (Anne Comnena, XIII, xii, 21; ed. Leib iii, 134-135). His nephew Tancred however did not abide by the treaty.

The descendants of Ruben continued to consolidate the development of an Armenian state, and sought to bring all of Cilicia under their control. Thoros I, who had driven off the Saldjūḳids in 1107-1108 (Tournebize, *Histoire politique et religieuse de l'Arménie*, 171; Cahen, *La Syrie du Nord à l'époque des Croisades*, 253; Matthew of Edessa, in *Hist. arm. des Croisades*, i, 84-85), captured Sīs and Anazarba from the Greeks. During the reign of his successor Leo I (1129-1137), Bohemond of Antioch attempted to re-establish his authority in Cilicia, but this brought him unto a fatal conflict with another aspirant to Cilicia, the Dānishmendid of Cappadocia (Michael, iii, 227). Around 1132 Leo captured Tarsus, Adana and Miṣṣīṣa from the Greeks (Chalandon, i, 235, ii, 108-109) (or from the Franks, according to Cahen, 354). He followed this up with the seizure of Sarvantikar, on the western flank of the Amanus. This led to a rupture with Raymond of Poitiers, count of Antioch, but the quarrel was patched up shortly afterwards when Leo was faced with a new Byzantine threat from the north, and as a token of reconciliation he ceded the plain of Cilicia to Raymond. John Comnenus invaded Cilicia in 1137, and regained all the towns except Anazarba, and in the following year took Leo and his son prisoner. Leo was carried off to Constantinople, where he died in 1142. Once more Cilicia was Byzantina, and remained so until Leo's son, Thoros, who had escaped from Constantinople after accession of Manuel Comnenus in 1143, regained a foothold in upper Cilicia; Thoros II (1145-1169) retook ʿAyn Zarba and the other towns in Cilicia in 1151-52, and defended them successfully against Masʿūd, the Saldjūḳid of Konya, who fought at the instigation of Manuel Comnenus. Thoros also aided Reynald of Châtillon, count of Antioch, in his attack on Byzantine Cyprus. Manuel Comnenus, however, was not willing to allow the situation to deteriorate any further. In 1158 he invaded Cilicia, reoccupied all the towns, and reduced the country once more to a Byzantine province. The emperor's camp was established at Mardj al-Dībādj (Baltolibadi, north of Miṣṣīṣa; see Honigmann, *Ostgrenze*, 121, and Cahen, 152), and Reynald of Châtillon went there to tender his submission. Thoros, who had taken refuge at Vahka, north of Sīs on the upper Sayhān, subsequently did likewise, and in return the emperor made him governor of Miṣṣīṣa, ʿAyn Zarba and Vahka, bestowing on him the title of Sebastos. But in 1162, when his brother Sdefanè perished in an ambush laid by the Byzantine governor Andronicus Comnenus, Thoros once more raised the standard of revolt, and seized ʿAyn Zarba together with other Cilician towns. Amalric, king of Jerusalem, intervened to re-establish peace. In 1164 Thoros sided with the Franks in their conflict with Nūr al-Dīn. He died in 1169. His brother Mleh, whom he (Thoros) had exiled, rallied to the side of Nūr al-Dīn, and with the aid of the latter's troops regained possession of Cilicia and obtained official recognition by Manuel Comnenus. He was assassinated in 1175, and his nephew Ruben III succeeded him. The latter was driven by betrayal into the hands of Bohemond III of Antioch, and the price of his release, negotiated by his brother Leo with Hethoum (Hetʾum, Haythūm) of Lampron, was the cession of Miṣṣīṣa, Adana and Tell Ḥamdūn to Antioch. However, he recaptured them later. In 1187 he abdicated in favour of his brother Leo (1187-1198), who in 1198 became the first king of Armenia-Cilicia when crowned in Tarsus by the Catholicos and the papal delegate. It was in Leo's reign that Frederick Barbarossa's Crusade arrived in Cilicia. Frederick was drowned in the Calycadnus (Gök Su), and part of his forces returned to Germany. The remainder were greeted by Leo upon their arrival in Tarsus. His reign was marked by a long conflict with the Saldjūḳid of Konya, Kaykāʾūs (1210-1219); the king's troops succeeded in taking the stronghold of Laranda (present-day Ḳaraman) in 1211, but as a consequence of their defeat in 1216 he had to cede Laranda, Luʾluʾa (in the Bozantı region, north of the Cilician Gates) and a part of Cilicia Trachea to the Saldjūḳid (Grousset, iii, 266; *Documents arméniens*, i, 644). Another feature of Leo's reign was his constant attempt, after Bohemond's death in 1201, to secure the succession to Antioch for Raymond Ruben. Although Raymond was Bohemond's grandson, he was also the son of Leo's niece Alice, and moreover had been brought up in Armenia. But Raymond had a strong competitor in Bohemond IV, count of Tripoli, who had the support of al-Malik al-Ẓāhir of Aleppo, and Bohemond IV in the end triumphed.

After Leo's death in 1219, Raymond Ruben tried in vain to win possession of Cilicia. He was taken prisoner at a battle near Tarsus by the bailiff of Constantine, of the Lampron family, and died in captivity (1222). Philip, son of Bohemond IV and his wife Isabelle (Leo's daughter), was crowned his successor. But as he was considered too 'Frankish' and not sufficiently Armenian, he was arrested by Constantine and put to death by poison. This act was one of the reasons which provoked an inter-

vention by ʿAlāʾ al-dīn Kayḳubād (1219-37). On the instigation of Bohemond IV, he laid waste the region of Upper Cilicia in 1225 and reduced Constantine to subjection. The latter persuaded the Hospitallers to give him their stronghold at Seleucia, which they had occupied ever since Leo had handed it over to them in 1210. In 1226 Constantine obtained the succession for his son Hethoum, who married Philip's widow Isabella.

Hethoum reigned until 1270, and from the bilingual coins minted under his and Kayḳubād's name we know that in the early years of his reign he acknowledged Sald̲j̲ūḳid suzerainty (de Morgan, *Histoire du peuple arménien*, 202-3). With other Muslim and Christian princes he took part in the struggle against Čingiz K̲h̲ān, but when the Mongol general Bāyd̲j̲ū crushed the Sald̲j̲ūḳid Kayk̲h̲usraw in 1243, he transferred his obedience to the Mongols and surrendered them Kayk̲h̲usraw's mother, wife, and daughter. In consequence the Sald̲j̲ūḳids reacted sharply against Cilicia in 1245, and Hethoum was able to avert defeat only by summoning Mongol assistance. His position as a vassal of the Mongols was formalized on several occasions; in 1247 he dispatched the High Constable Sempad to Mongolia; in 1254 he paid a personal visit to the Mongolian court; he supplied Armenian contingents for the Mongolian expedition to Syria, and co-operated in the economic blockade of Egypt by withholding exports of Cilician timber (see Mas-Latrie, *Histoire de Chypre*, i, 412; Grousset, iii, 632). From that time onwards the Armeno-Cilician kingdom, or the land of Sīs as Arab historians call it, increasingly became the object of Mamlūk attacks, as the following examples bear witness: (i) 664/1266, a retaliatory expedition under Baybars captured, pillaged, and burnt down Sīs, Miṣṣīṣa, Adana, Ayās and Tarsus; (ii) 673/1275, another expedition by Baybars seized Miṣṣīṣa, Sīs, Tarsus and Ayās, and carried out raids into the Taurus; (iii) 682/1283, a campaign under Ḳalāʾūn against Alexandretta, Ayās and Tell Ḥamdūn; (iv) 697/1297, an expedition led by Lad̲j̲īn against Alexandretta, Tell Ḥamdūn, Sīs, Adana, Miṣṣīṣa, Nud̲j̲ayma, etc., during which the strongholds were occupied and a tribute of 500,000 dirhams was imposed; (v) in 703/1303, as the payments had not been made regularly, and as the strongholds were firmly held, a new expedition forced the Armenians to pay the tribute in advance and conformed the surrender of the strongholds; (vi) 705/1305, as a result of further defaults in payment, a new expedition was launched, in which the Mongols rendered assistance to the Armenians and defeated the Mamlūks; but when Egyptian reinforcements arrived, the king had to pay; (vii) 715/1315, the tribute was raised to one million dirhams; (viii) 720/1320; (ix) 722/1322, Ayās was captured, and to the tribute were added 50% of the revenues from the Ayās customs authority and the sale of salt; (x) 735/1335, a further expedition following a reprisal raid by the populace of Ayās on the merchants of Bag̲h̲dād; (xi) 737/1337, a new expedition launched by Malik Nāṣir Muḥammad because payments of the tribute had stopped. It captured Sīs (destroying its citadel in the process) and secured surrender of the forts under the name al-Futūḥāt al-D̲j̲ahāniyya (from the Armenian corruption of D̲j̲ayḥān). They included Miṣṣīṣa, Kawarrā, Hārūniyya, Sarvantikār, Bayās, Ayās, Nud̲j̲ayma, and Ḥumaysa. Further raids were carried out in 756/1355 and 760/1359. The frequency of Mamlūk incursions indicates that they did not consolidate their occupation of the country after each expedition. Then, in 776/1375, a final expedition brought the end of Sīs as an independent kingdom. Sīs itself fell to the Mamlūks, and Leo V was captured and was not released until 1382. The Armeno-Cilician kingdom became incorporated into the Mamlūk empire (on the above events see the following under relevant dates: al-Maḳrīzī, *Sulūk*, ed. Muṣṭafā Ziyāda, and Quatremère's translation, *Hist. des sult. maml.*; Mufaḍḍāl b. Abi 'l-Faḍāʾil, trans. and ed. Blochet, *Patr. Or.* xii & xiv; Abu 'l-Fidāʾ and his continuator Ibn al-Wardī, Ibn Iyās, Ibn Kat̲h̲īr, *Bidāya*, Abu 'l-Maḥāsin. See also note on the expeditions in *AIEO Alger*, 1939-41, 53-54, with other references, and G. Wiet, *L'Egypte arabe*, vol. iv of the *Histoire de la Nation égyptienne*, 417, 425, 449, 466, 475, 483-484. See also Zettersteén, *Beiträge zur Geschichte der Mamluken Sultane*, index; the articles on MIṢṢĪṢ, ADANA, AYĀS, SĪS. For the relations between the Armenians and the Ḳaramān-og̲h̲lus, see the article ḲARAMĀN and F. Taeschner, *Al-Umarī's Bericht über Anatolien*, index).

A Mamlūk governor, the Turcoman Yüregirog̲h̲lu Ramaḍān, who established himself at Adana in 1378, inaugurated the small Ramaḍān-og̲h̲ullarī [*q.v.*] dynasty, nominally vassals of the Mamlūks. In 1467 Cilicia was invaded by S̲h̲āhsuwār, of the D̲h̲u 'l-Ḳadr [*q.v.*] dynasty. Between 1485 and 1489 the Ottomans attempted to win control of Cilicia, but it was not until 1516 that they succeeded in doing so, Sulṭān Selim I capturing it during his expedition to Egypt. The Ramaḍān-og̲h̲ullarī were not removed from power however, and they remained vassals of the Ottomans until the end of the 16th century. Cilicia was then fully integrated into the Ottoman Empire. In 1833 Ibrāhīm Pas̲h̲a, the son of Meḥmet ʿAlī who had revolted against the Porte, carried out a victorious campaign in Cilicia, and the province was ceded to his father by the treaty of Kütahya. To this day traces of the campaign can be seen in the Cilician Gates. Cilicia was returned to Turkey in 1840 and became part of the vilayet of Aleppo. In 1866 a military force was sent from Istanbul to assert the authority of the central government over the local derebeys [*q.v.*] and tribal chiefs. This prepared the way for extensive agricultural settlement, which was accomplished in part with the help of Muslim migrants and repatriates from the Crimea and from the lost Ottoman territories in Europe and North Africa. (D̲j̲ewdet Pas̲h̲a, *Maʿrūḍāt*, *TTEM*, no. 14/91, (1926), 117 ff.; W. Eberhard, *Nomads and Farmers in south eastern Turkey; problems of settlement*, *Oriens*, vi (1953), 32-49). It was occupied by French troops from 1918 to 1922, and handed back to Turkey by the Franco-Turkish treaty of Ankara. The plain of Cukurova is now one of the most flourishing agricultural areas in Turkey.

ČILLA [see KHALWA]

ČIMKENT, chief town of the region of South Kazakhstān of the Soviet Socialist Republic of Kazakhstān, situated on the river Badām, which flows into the river Arīs, tributary of the Sīr-Daryā.

The town is mentioned in the *Ẓafar-nāma* of Sharaf al-Dīn Yazdī as a "village" near the city of Sayrām. After its capture by the Kalmüks in 1864, Sayrām declined to the advantage of Čimkent; but at the time of the Russian conquest (1281/1864) Čimkent was still only a fortified market-town, surrounded by a clay wall and dominated by a small citadel. According to the Russian census carried out a little after the conquest, the town comprised 756 houses.

On the eve of the October Revolution, Čimkent was mainly known as a summer resort frequented by the residents of Tāshkent on account of the mildness of its climate and the excellence of its water. It had in 1897 12,500 inhabitants, of whom 800 were Russians and 150 Jews. The environs of Čimkent included at the end of the 19th century numerous prosperous Russian villages and several native villages, of which the most important were Sayrām, and the Asbīdjāb or Asfīdjāb of the Arab geographers.

The very rapid development of the city dates from the Soviet period. In 1926 it comprised 21,000 inhabitants, in 1939 74,200 and in 1956 130,000. Čimkent is an important road centre at the junction of the roads which wend their way from Russia (by way of Aktübinsk and Ḳzyl-Orda) and from Siberia (by way of Alma-Ata) towards Tāshkent, and is an important railway junction where the Djambul-Arīs, Ḳzyl-Orda and Čimkent-Lenger railways intersect.

Before the Revolution Čimkent was an agricultural centre which subsisted principally from the plantations of cotton (introduced in 1897) and from the harvesting of the medicinal plant *artemisia cinae* from which santonin is prepared.

Since the discovery in 1932 of veins of lead at Ačisay and Karamazor, and of coal at Lenger, Čimkent has become an important industrial city (factories of chemical and pharmaceutical products, combined with non-ferrous metals). The city included in 1956 35 primary and secondary schools, 19 secondary technical schools and two colleges (the Teachers' Institute and the Technological Institute of Building Materials).

The population of the city is very mixed, the Russians now constituting the majority of the inhabitants; the Muslim community includes Kazakhs and some Özbeks. (CH. QUELQUEJAY)

ČĪN [see AL-ṢĪN]

CINEMA (*sinimā*). History. Cinema is a newly imported art into the Muslim world; as such, it is a facet of the Western impact on the inhabitants and expresses their interest in Western technical achievements and forms of entertainment. Silent films were apparently first imported into Egypt by Italians (1897), attracting considerable interest. Film shows for Allied troops, during World War I, familiarized many Near Easterners with the cinema. The influx of foreign films, the construction of entertainment halls, and the intellectual curiosity of the local intelligentsia made Egypt the centre of film shows and afterwards of local production. Most films shown then in the Near East were comedies or Westerns; in Egypt, mainly the former were emulated. Local production by foreign technicians, with Egyptians starring, started on silent films (1917); despite their mediocrity, they were warmly received. Simultaneously, cinema clubs sprang up, which eagerly discussed film-techniques and published in Arabic short-lived cinematic periodicals. Full-length Egyptian silent films were first produced (1927) by, respectively, the directors Widād ʿUrfī and Lāma Brothers, at a minimum cost. All rather resembled photographed sequences of a play, but were nonetheless welcomed by the public. This success encouraged Yūsuf Wahbī to experiment with a sound film: he took to Paris, for synchronization, an Arab silent film, *Awlād al-dhawāt* (apparently patterned after Fr. Coppée's *Le coupable*), in which he himself had starred. Its enthusiastic reception in Egypt assured the future of the Arabic-speaking film. Arabic film production has been speeded up in the last generation. In 1934, the large *Studio Miṣr* was founded near Cairo; others followed. Halls were built, chiefly in the towns. Production was encouraged, during World War II, by the lack of Italian and German competition. Commercial success led to quantity predominating over quality; the resulting lower standards were due also to inexperience in direction and photography, and to shortage of technical equipment.

Acting and actors. Most Arab filmstars are in Egypt. Some former theatre actors or singers are idolized, *e.g.*, leadingmen: the late comedians ʿAlī al-Kassār and Nadjīb al-Rīḥānī, the living Yūsuf Wahbī, protagonist of the "social" film on local themes. Some leading ladies can act in character roles; most others sing well.

Characteristics and Themes. The Arabic-speaking film has been, until recently, rather imitative of its European or American counterpart, but artistic and technical standards are generally lower. While in recent years the overriding importance of music has somewhat declined, it is still customary to introduce a sub-plot that includes vocal and instrumental Arabic music and dancing. Another drawback to the plot is the somewhat faulty script-writing, due to the limited experience of local actors-authors. While scripts adapted from foreign films, plays or novels (*e.g.*, *al-Buʾasāʾ* = *Les misérables*, with ʿAbbās Fāris) were usually successful, those frequently composed at the bid of a producer-actor have often resulted in an unimaginative plot. The main types of films are: *a.* the historical (generally on themes chosen from Arab or Islamic history; in Egypt—also from Pharaonic times). *b.* the social drama or melodrama (once popular for its tear-jerking appeal, later for its social aims). *c.* the musical. *d.* the comedy or slapstick farce (usually on local background). *e.* adventure

and detective films. The first two are the best, artistically. Colloquial Arabic (Egyptian dialect) is employed in most.

Attitudes. While encouraging the cinema financially, to a degree, Arab governments have supervised and censored it. Censorship has been on socio-political lines, often also on moral and religious grounds. Pressure of Muslim religious circles prevented filming a script on Muḥammad and the Four Caliphs (Egypt); on other occasions, it has opposed love films (Egypt), attendance of adolescents (Jordan) and women (Syria, Jordan). Conservative circles still regard acting as lewd. Features, documentaries and educational films have been initiated by the United Arab Republic for propaganda amongst civilians and soldiers.

The Arab countries. Outside Egypt, there is little film production. Morocco and Tunisia produce short films and occasional newsreels. Similar experiments in Syria and, more recently, in ʿIrāḳ, were short-lived. With few exceptions, most rural and lower urban audiences, in Arabic-speaking communities, prefer Egyptian films. Yemen imports very few films, while Saudi Arabia has banned their public showing on ethical grounds.

Other countries. The above applies, in varying degrees, to other Muslim countries too. In most, a part of the film production and distribution is in governmental hands, particularly documentaries and educational films. Legislation in most provides for censorship on national and political grounds (internal tranquillity, avoiding offence to friendly States), as well as religious succeptibilities and public morals. Turkey appears to have the most active film industry, although most films shown are American. Educational films are provided gratis to cinema owners (who must exhibit them). Good feature-films on local themes have been produced, with marked American influence (*e.g.*, *Ebediyete kadar*). Belly-dancing (of the Arabic-film type) and music continue, however, as an integral part of many films. Iran has started its own film production in Tehran only since 1945, on a modest scale. Most feature-films are comedies or have simple plots, often describing the rich city heir who falls in love with the peasant girl; kissing on the screen is discouraged. Sub-titling of foreign films or post-synchronizing them in Persian (the latter very efficiently done) is compulsory. In addition to other cinema halls, in Teheran a cinema club holds regular showings of good foreign films for its members and friends. In Afghanistan, the Government has established, by decree, a State monopoly of the cinema. There is no film production. Cinema halls are in Ḳābul and Ḳandahār. Women hardly ever go to the cinema, unless it is for rare private showings, specially arranged for them. Pakistan. Before partition, Indians controlled production and exhibition, as well as all technical work; their departure left Pakistan with hardly any film industry. Eventually this rallied and Pakistani companies now produce full-length and short films; their main studios are in Lahore. Urdū films are also made in India. In Indonesia, a Government-controlled company produces a few feature-films annually, as well as a weekly newsreel and some documentaries and short educational films. Private companies produce only few feature-films. Indonesia-produced films are exported to Singapore, Malaya and North Borneo.

ČINGĀNE, one of the names applied to the gipsies in the east, which has passed into various European languages (*e.g.*, Hungarian *Czigány*, French *Tsigane*, Italian *Zingari*, German *Zigeuner*) and appears in Turkish as *Čingene*. The origin of the name is still uncertain; one suggestion is that it comes from Čangar or Zingar, said to be the name of a people formerly dwelling on the banks of the Indus. It is supposed that the Sāsānid Bahrām V Gūr (420-438 A.D.) first brought the gipsies from India to Persia, and that they spread thence over the world. In the relevant passages in Firdawsī and Ḥamza Iṣpahānī these Indians are called Lūlī or Zoṭṭ [*qq.v.*]. Other names commonly used are Nawar in Syria, G͟hurbat or Ḳurbat in Syria, Persia, Egypt and elsewhere. In Egypt the name G͟had͟jar is also in use, while the gipsies of Egypt are fond of calling themselves Barāmika (descendants of the Barmakids).

Although the Indian origin of the gipsies is now generally accepted, various groups of them have long claimed Egypt as their earliest home; hence their English name, and hence too the Spanish *Gitano*, French *Gitane*, Turkish *Kiptî* and Hungarian *Faraonépe*. The term *Bohémien*, by which they are also known in France, is due to their having first come to that country via Bohemia. Other names may be found in the works of Anastase, De Goeje and Gökbilgin cited below. Their name for themselves in their own language is Romany, the adjective of *rom*, 'man'.

As in other countries, the gipsies of the east are smiths, tinkers, pedlars, jugglers, musicians and bear-trainers; some are sedentary while others lead a wandering life. The sedentaries are generally despised by those who adhere to the old ways.

No reliable statistics about them exist, but they are certainly quite numerous in Persia and Turkey. It has been fairly conclusively shown (by G. L. Lewis; see *Bibliography*) that one tribe of 'Yürüks' in western Anatolia is in fact gipsy, and it seems likely that other Turkish gipsies are similarly hiding behind this blanket-term.

Some gipsies are nominally Christian, others nominally Muslim (thus the Geygellis are said to be ʿAlewī but not to intermarry with other ʿAlewīs); in reality they have their own religion and political organization, which need not be discussed here; a useful short account will be found in Funk and Wagnall's *Standard Dictionary of Folklore*, s.v. Romany Folklore.

In the Soviet Union Čingānes are found in the Crimea, in Ādharbaydjān and in Central Asia. The census of 1926 gave a number of 4,000 Muslims out of the 61,294 gipsies included in the census, but it is probable that the real figure is higher. S. A. Tokarev (*Étnografiya Narodov SSSR*, Moscow 1958) estimates the number of Muslim gipsies in Central Asia at 5,000, and that of Ādharbaydjān as "some thousands". According to the statistics of 1926, there were at that time 3,710 Muslim gipsies still in Özbekistān, 300 in Turkmenistān, and an indeterminate number, probably quite high, in the region of Kuliāb and in the Soviet Socialist Republic of Tādjīkistān.

The Čingānes of the Soviet Union comprise several groups, which are fairly distinct from each other by their language and customs. They are known either by local names: "Karačī", "Lülī", "Mazang", "Djugī", "Kavol", or by names of trades: Zargarān, Kāsagarān, Mardjān-furūsh. They call themselves "*lom*" or "*dom*". The Lülī and the Djugī live in Özbekistān and speak mainly Persian (Tādjīkī); a Turkish-speaking minority speak Özbek. The gipsies of Ādharbaydjān (Karačī) and Kuliāb (Kavol) speak only Persian. A group from the region of Kuliāb still uses a distinctive language of its own which has not yet been studied, and which I. M. *Oranskiy* (*Indoyazičnaya etnografičeskaya gruppa "AFGON" v Sredney Aziy*, in *Sov. Etn.*, no. 2, 1956, 117-124) considers to be an Indian dialect. Their Tādjīk neighbours call them 'Afghāns', and wrongly confuse them with the latter, who are quite numerous in the southern part of the Kuliāb region. According to Oranskiy and Tokarev the Djugī, the Lülī, and the Mazang still use a 'secret language'. The gipsies of Central Asia and of the Crimea are theoretically Sunnīs and those of Ādharbaydjān Shīʿīs.

(Ch. Quelquejay)

ČINGIZ-KHĀN, the founder of the Mongol world-empire, was born in 1167 A.D. on the right bank of the Onon in the district of Deli'ün-Boldoḳ in the present-day Chita Region in eastern Siberia. The ultimate sources for the details of his early life are two Mongolian works, the *Secret History of the Mongols*, composed in 1240 (or perhaps as late as 1252), and the *Altan Debter* or "Golden Book", the official history of the Imperial family. This latter work has not survived in the original, but the greater part of it is reproduced in the *Djāmiʿ al-Tawārīkh* of Rashīd al-Dīn and there is likewise an abridged Chinese translation, the *Shêng-wu chʿin-chêng lu* or "Account of the Campaigns of Čingiz-Khān", composed some time before 1285. There is naturally in both sources a great deal of purely legendary material. The *Secret History* begins with a long genealogy in which Čingiz-Khān's line of descent is traced back through many generations to the union of a grey wolf and a white doe; and in both authorities the new-born child is represented as clutching in his hand, in token as it were of his future career as a world-conqueror, a clot of blood of the size of a knuckle-bone.

Čingiz-Khān's father, Yesügei, was the nephew of Ḳutula, the last ḳhān or ruler of the Mongols proper, who were afterwards to give their name to all the Mongolian-speaking peoples. The Mongols had been the dominant tribe in Eastern Mongolia during the first half of the 12th century but had been forced to yield place to the Tatar, a tribe in the region of the Buir Nor, who in 1161, in alliance with the Chin rulers of Northern China, had inflicted a crushing defeat upon them. Though now leaderless and disorganized the Mongols still continued the struggle against the Tatar, for we find that at the time of Čingiz-Khān's birth his father had brought in two Tatar chieftains as prisoners of war. One of these was called Temüdjin-Üke and it was after him that Čingiz-Khān received his original name of Temüdjin. The word means "blacksmith" and this gave rise to the legend, already current at the time of William of Rubruck, that the world-conqueror had begun his career at the forge.

When Temüdjin was nine years old his father, following the exogamous practice of the Mongols, took the boy with him upon a journey into the extreme east of Mongolia to find him a bride amongst his mother's people, the Ḳonḳlrat. According to the custom Yesügei left his son to be brought up in the tent of his future father-in-law, whose daughter, the 10-year old Börte, was destined to be the mother and grandmother of Emperors. Upon the homeward journey Yesügei fell in with a party of carousing Tatar. Unable to refuse the invitation to share in their feast he was recognized by his former enemies, who poisoned his food; and he lived only long enough to reach his own encampment and dispatch a messenger to fetch back Temüdjin from the Ḳonḳlrat.

With Yesügei's death his family was deserted by his followers under the instigation of the Taičiʿut, a clan with aspirations to the leadership of the tribe. His widow, a woman of spirit, attempted, at first with some success, to rally the people to her; but in the end she and her young children were left to their own resources in the expectation that they would die of starvation. They survived however upon a diet of roots and berries eked out with such fish as Temüdjin and his brothers were able to catch in the Onon and such small prairie birds and animals as they were able to shoot with their bows and arrows. It was in a quarrel over game of this sort that Temüdjin is said to have been involved in the murder of one of his half-brothers.

He had grown almost into manhood when the Taiči'ut, learning of the family's survival, made a raid upon the little encampment with the object of seizing Temüdjin and preventing any possibility of his succeeding to his father's position. He escaped into the forests and for some days eluded his pursuers. When finally captured he was not put to death but was kept as a perpetual prisoner, the Taiči'ut taking him with them from encampment to encampment with a *cangue* or wooden collar about his neck. One evening, when they were feasting along the bank of the Onon, he made off in the dark and, to avoid detection, submerged himself in the river with only his face above water. When the pursuit started his hiding-place was discovered by a member of a kindred tribe, who however befriended the young

man and saved him from immediate danger by persuading the Taiči'ut to postpone their search till the morning. In the meanwhile Temüdjin found his way to the tent of his benefactor, who concealed him once again from his enemies and then provided him with the means of escape.

It was soon after this adventure that Temüdjin bethought himself of the bride awaiting him in Eastern Mongolia and he paid a visit to the Ḳonḳïrat to lay claim to her. Börte brought him as her entire dowry a black sable skin, a circumstance worthy of mention, since with this sable skin Temüdjin was to lay the foundations of his future fortune. He offered it as a present to Toghrïl, the ruler of the Kereyt, a Nestorian Christian tribe, whose territory lay along the banks of the Tula in the region of the present-day Ulan Bator. Toghrïl, better known to history as Ong-Khān (he is the Prester John of Marco Polo), had been the *anda* or blood-brother of Temüdjin's father. He expressed his pleasure at the gift and took the young man under his protection. Not long passed before Temüdjin had need of his patron's assistance. The Merkit, a forest tribe on the southern shores of Lake Baikal in what is to-day the Buryat A.S.S.R., raided Temüdjin's encampment and carried off his newly married bride. With the aid of Toghrïl and Djamuḳa, a young Mongol chieftain, who was his own *anda*, Temüdjin was able to defeat the Merkit in battle and to recover his wife. For a time, after this campaign, Temüdjin and Djamuḳa remained firm friends, pitching their tents and herding their animals side by side; but then an estrangement arose between them and they parted company. The reason for this estrangement is not clear but Barthold's theory, according to which Temüdjin represented the Mongol aristocracy whilst Djamuḳa was the champion of the common people, no longer finds acceptance.

It was immediately following the break with Djamuḳa that the Mongol princes acclaimed Temüdjin as their *khān* and conferred upon him the title by which he is known to history: Čingiz-Khān or, in its Anglicized form, Genghis Khan. The meaning of this title is not clear. The most likely interpretation is that offered by Pelliot, who sees in Čingiz a palatalised form of the Turkish *tengiz* "sea" and translates the title accordingly as "Oceanic Khān", *i.e.*, "Universal Ruler". It is not without significance in this connexion that when shortly afterwards Djamuḳa set himself at the head of a rival confederation of tribes he received the title of Gür-Khān,. which also means something like "Universal Ruler".

With his elevation to the Khānate of his tribé Čingiz-Khān was now a power to be reckoned with in the domestic wars of the Mongol peoples. In 1196 his patron Toghrïl was expelled from his throne and was for a time an exile at the court of the Ḳara-Khitay. He owed his restoration, in 1198, to the intervention of Čingiz-Khān. In the same year both rulers were the allies of the Chin in an expedition against the Tatar. For their contribution to the Chinese victory Toghrïl received the title of *wang* or "prince", whence his name of Ong-Khan, and Čingiz-Khān a much lesser title. In 1199 Čingiz-Khān and Ong-Khān launched a joint attack on the Nayman, a largely Christian tribe, apparently of Turkish origin, in Western Mongolia. The success of this campaign was nullified by the pusillanimous conduct of Ong-Khān, who first of all deserted Čingiz-Khān on the eve of a battle and then had to appeal for aid from his protégé when himself attacked by the Nayman. Despite this experience the two princes remained allies and on several occasions in 1201 and 1202 defeated the confederation of tribes headed by Čingiz-Khān's former friend Djamuḳa. In 1202 Čingiz-Khān took his final revenge upon his old enemies the Tatar in a campaign which resulted in their total extermination as a people. Meanwhile his relations with Ong-Khān had been steadily worsening and it now came to open war. The first battle was indecisive and seems in effect to have been a defeat for Čingiz-Khān, who withdrew for a while into the extreme N.E. of Mongolia to a lake or river called Baldjuna, the identity of which has not been satisfactorily established. He soon rallied however and in a second battle (1203) gained an overwhelming victory over his opponent. Ong-Khān fled westwards to meet his death at the hands of a Nayman frontier guard, and the Kereyt ceased to exist as a people, being forcibly absorbed into the Mongols.

Čingiz-Khān was now in complete control of eastern and central Mongolia. Only in the west, where the Nayman had been joined by Djamuḳa and the Merkit chieftain Toḳto'a, was his supremacy still challenged. Forestalling an attack by his enemies Čingiz-Khān defeated them in a battle in which the Nayman ruler lost his life (1204). His son, Küčlüg, fled westwards, along with the Merkit Toḳto'a, to make a last desperate stand on the upper reaches of the Irtish: Toḳto'a was killed by a stray arrow and Küčlüg, continuing his flight westwards, was granted asylum in the territory of the Ḳara-Khitay. Djamuḳa, meanwhile, deserted by his followers, had been betrayed into the hands of Čingiz-Khān, who, with the execution of his one-time *anda*, at last found himself the absolute master of Mongolia. At a *ḳuriltay* or assembly of the Mongol princes held near the sources of the Onon in the spring of 1206 he caused himself to be proclaimed supreme ruler of all the Mongol peoples. Having also at this *ḳuriltay* reorganized his military forces he was now in a position to embark upon foreign conquests.

Already in 1205 he had attacked the kingdom of the Tangut or Hsi Hsia, a people of Tibetan origin who inhabited the region of the great bend in the Yellow River, *i.e.*, what is now the province of Kansu and the Ordos Region. Two further campaigns (in 1207 and 1209) reduced the Tangut to the status of tributaries and the way lay open for an assault upon North China proper. In 1211 the Mongols invaded and overran the whole area north of the Great Wall, but the Wall itself presented a barrier to further advance. In the following year their cause was promoted by the rising of a Khitan prince in southern Manchuria; and in the summer of 1213 they finally forced their way through the Wall and spread out over the North China plain. By the spring of 1215 they controlled the whole area north of the Yellow River and were converging from three directions upon Pekin. The Chin Emperor was now offered and accepted terms of peace and secured the withdrawal of the Mongol forces by the payment of tribute which consisted, in effect, in the immense dowry of a Chin princess bestowed in marriage upon Čingiz-Khān. Circumstances however led to the Mongols' almost immediate return. Pekin was captured and sacked (summer of 1215), and the Emperor fled to Kʿai-fêng on the southern banks of the Yellow River. Though the war still continued —and, in fact, the subjugation of North China was not finally completed until 1234, seven years after Čingiz-Khān's death—Čingiz-Khān now left the

command of operations in the hands of one of his generals, Muḳali of the Djalayir tribe, and, in the summer of 1216 returned to his headquarters in Mongolia, there to turn his attention to events in Central and Western Asia.

Küčlüg the Nayman, who had sought refuge with the Ḳara-Khitay, had dethroned the last of their rulers and made himself master of their territories. In 1218 a Mongol army under the famous general Djebe invaded Semirechye and Sinkiang and pursued Küčlüg from Kashghār over the Pamirs into Badakhshān, where with the co operation of the local population he was captured and put to death.

The accession of Semirechye and Sinkiang to his Empire gave Čingiz-Khan a common frontier with Sulṭān Muḥammad Khwārizm-Shāh [*q.v.*]. Relations between the two rulers had been established already in 1215, when Čingiz-Khān had received an embassy from the Sultan before Pekin. In 1216, or more probably in 1219, a battle took place to the N.E. of the Aral Sea between a force commanded by Sulṭān Muḥammad and a Mongol army led by Čingiz-Khān's eldest son Djoči which was returning from a successful campaign against the remnants of the Merkit. The encounter was indecisive and does not in any case seem to have contributed to the ultimate outbreak of hostilities. This was the result of the execution, ordered by the governor of Otrar, of an ambassador of Čingiz-Khān and a caravan of Muslim merchants accompanying him, a massacre apparently sanctioned by the Sultan himself. A second ambassador sent by Čingiz-Khān to demand satisfaction was likewise executed; and war became inevitable. Massing his forces on the Irtish in the spring of 1219, Čingiz-Khān had by the autumn of that year arrived before the walls of Otrar. He left a detachment under the command of his sons Čaghatay and Ögedey to lay siege to the town, at the same time sending Djoči upon an expedition down the Sir-Daryā, whilst he himself with the main army advanced upon Bukhārā. Abandoned by its defenders, the town surrendered after a siege of only three days (first half of February, 1220). Samarḳand, the next objective, offered as little resistance: it fell on 10 Muḥarram/19 March. Otrar had already capitulated and the besiegers of that town took part in the capture of Samarḳand.

From Samarḳand Čingiz-Khān dispatched his two best generals, Djebe and Sübetey, in pursuit of Sulṭān Muḥammad, who upon receiving news of the Mongols' rapid advance had fled panic-stricken to the West. Doubling backwards and forwards across Persia the Sultan finally found refuge in an island off the eastern shores of the Caspian, where he died, it was said, of a broken heart. The generals continued their westward drive and passing through Ādharbaydjān and over the Caucasus descended into the steppes of what is now Southern Russia to defeat an army of Russians and Ḳipčaḳ on the River Kalka in the Crimea. They then returned along the northern shores of the Caspian to rejoin Čingiz-Khān in Central Asia.

Čingiz-Khān meanwhile had passed the summer of 1220 resting his men and animals in the pastures of the Nakhshab area. In the autumn he captured Tirmidh and then proceeded up the Oxus to spend the winter of 1220-1 in the conduct of operations in the region of the present-day Stalinabad, as also in Badakhshān. Early in 1221 he crossed the Oxus and captured Balkh. Already after the capture of Samarḳand he had dispatched Čaghatay and Ögedey northwards to lay siege to Sulṭān Muḥammad's capital at Gurgandj. He now sent Toluy, his youngest son, to complete the conquest of Khurāsān, a task he accomplished with a thoroughness from which that province has never recovered. At Marw there were massacred according to Ibn al-Athīr a total of 700,000 men, women and children, whilst Djuwaynī gives the incredible figure of 1,300,000. As for Nīshāpūr, "it was commanded", says Djuwaynī, "that the town should be laid waste in such a manner that the site could be ploughed upon; and that in the exaction of vengeance [for the death of a Mongol prince] not even cats and dogs should be left alive". After the capture of Harāt Toluy rejoined his father, who was laying siege to the town of Ṭālaḳān between Balkh and Marw ar-Rūdh (not to be confused with another town of similar name, the present-day Ṭālikhān in the Afghān province of Badakhshān).

The summer of 1221 Čingiz-Khān passed in the mountains to the south of Balkh. In the meantime Djalāl al-Dīn, the son of Sulṭān Muḥammad, had made his way to Ghazna and at Parwān to the N.E. of Čārīkār had inflicted a crushing defeat upon the Mongol force dispatched against him, the only reverse suffered by the Mongols during the whole campaign. Čingiz-Khān, upon receiving news of this battle, advanced southwards at great speed in pursuit of Sulṭān Djalāl al-Dīn, whom he finally overtook on the banks of the Indus. Hemmed in on three sides by the Mongol armies and with the river behind him Djalāl al-Dīn, after offering desperate resistance, plunged into the water and swam to the farther side, surviving to conduct sporadic warfare against the Mongols for three years after Čingiz-Khān's death.

The Battle of the Indus, which took place according to Nasawī on the Shawwal 618/24th November 1221, marks the end of Čingiz-Khān's campaign in the West. He began to prepare for the homeward journey and having explored the possibility of returning though India via Assam and Tibet finally turned back along the route he had been following. He travelled by easy stages, spending the summer of 1222 in mountain pastures on the Hindū-Kush and the following winter in the neighbourhood of Samarḳand. The spring and summer of 1223 he passed in the region of the present-day Tashkent; in the summer of the following year he was on the upper reaches of the Irtish; and it was only in the spring of 1225 that he finally reached his headquarters in Mongolia.

In the autumn of the following year he was again at war with the Tangut, but did not live to see the victorious outcome of this final campaign. He died on 25 August 1227 whilst resting in his summer quarters in the district of Chʿing-shui on the Hsi River in Kansu. The authorities give no clear indication as to the cause of his death but a fall from his horse which he sustained whilst hunting during the previous winter may well have been a contributory factor.

Of his personal appearance there appears to have survived only one contemporary record, that of Djūzdjānī, who describes him as being at the time of his invasion of Khurāsān "a man of tall stature and vigorous build, robust in body, the hair on his face scanty and turned white, with cat's eyes".

Bibliography: Of the *Secret History of the Mongols* there is a Russian translation by S. A. Kozin (Leningrad 1941), a German translation by Erich Haenisch (2nd ed., Leipzig 1948), a Turkish translation by Ahmet Temir (Ankara 1948), an incomplete French translation by Paul Pelliot

(Paris 1949), and an English translation by F. W. Cleaves (Cambridge, Mass. 1960). Of a French translation of the *Shêng-wu ch'in-chêng lu* by Paul Pelliot and Louis Hambis (*Histoire des Campagnes de Genghis Khan*) only the first volume has so far appeared (Leiden 1951). See also Haenisch, *Die letzten Feldzüge Cinggis Han's und sein Tod nach der ostasiatischen Überlieferung*, in *Asia Major*, ix (1933). Djuwaynī's history is now available in the translation of J. A. Boyle (*The History of the World-Conqueror*, 2 vols., Manchester 1958) and the relevant portions of Rashīd al-Dīn in the translations of A. A. Khetagurov and O. I. Smirnova (*Sbornik letopisei*, i, 1, and i, 2, Moscow 1952). See also René Grousset, *Le Conquérant du Monde* (Paris 1944).

(J. A. Boyle)

ČINGIZIDS, the four sons of Čingiz Khān [*q.v.*] by his marriage with his favourite wife Börte, and their descendants. In contrast to them Čingiz Khān's brothers and their sons, as well as the descendents of Čingiz Khān by other marriages, were of importance only in the first decades of the Mongol Empire, after which they fell into the background.

In accordance with the will of Čingiz Khān, the empire conquered by him (including the parts whose acquisition had not yet been accomplished and which did not in fact take place until 1236/42 or 1255/59) was divided among his four sons: I) Djoči (Djöči), who may not have been a real descendent of Čingiz Khān (see further Čingiz Khān); II) Čaghatāy (Djaghatāy); III) Ögedey (Ögödäy, Ogotay, Pers. Ūk/gadāy); IV) Toluy (Tuluy, cf. these articles).

I) Djoči died before his father, in about February 1227. His legacy (Ulus), the Ķipčaķ Plain and West Siberia (including Khwārizm) passed to his descendants. These were in part as early as the 13th century (Berke [*q.v.*]), and certainly by the first half of the 14th century, Muslims (Sunnī), and played an extraordinary role in the spread of Islam.

A) His second son Batu (d. 1255) took over the Ķipčāķ Plain and founded the empire of the Golden Horde. His descendants ruled there until 1360 (for details cf. Bātū'ids, with a genealogical table).

B) After 16 years' confusion the rule of the Golden Horde 1376. passed to the descendants of Batu's older brother Orda, who had taken control of the so-called "White Horde" in Western Siberia. Little is known about him, his immediate descendants and the situation in that region. After the two year rule of his seventh generation descendants Urus Khan and two of his sons, Toķtamïsh [*q.v.*] finally appears in the full light of history. Expelled by Tīmūr [*q.v.*] in 798/1395, four of his sons were later (815-822/1412-1419) able to assert themselves as nominal rulers of the Golden Horde (apart from the *major domus* Edigü, Russ. Yedigey, d. 1419, who exercised actual power). Since that time (and already from 1395 of 1412) the progeny of Urus Khān ruled as Khāns.

After 842/1438 the territory of the Golden Horde dissolved into several separate states in which descendants of Čingiz Khān likewise ruled:

a) The "Great Horde" in which a great-great grandson of Urus Khān, Küčük Meḥmed (Muḥammad), assumed power about 1438, and whose descendents were able to retain it until 908/1502.

b) The Khānate of Astrakhān [*q.v.*] where successors of Küčük Meḥmed ruled until 965/1557.

C) Parallel to that the descendants of a hitherto insignificant third line, that of Bātū's and Orda's brother Togha Temür (Tūķā Tīmūr), managed to share in the dismemberment of the Ķipčaķ. Of these, the following succeeded:

c) Ulugh Meḥmed (murdered in 850/1446), after his expulsion from the "Great Horde", to the Khānate of Ķazan (Russ. Kazán [*q.v.*]) which his successors (among whom were the princes of Kasimov, see "e") lost in 960/1552 to the Russians.

d) Ulugh Meḥmed's nephew, Ḥādjdjī Girāy ([*q.v.*]; d. 870/1466), held fast (definitively in 1449) to the Crimea (see Ķïrïm) where his successors, under the dynastic name Girāy, ruled as the last descendants of Čingiz Khān in Europe, until the annexation of the Crimea by the Russians in 1783.

e) In the small Tatar principality of Kasimov ([*q.v.*], region of Ryazań), various princes (finally a princess) of the line of Ulugh Meḥmed (see ,'c"), of Küčük Meḥmed (see "a"), of Girāy (see "d"), and of the Siberian Shaybānids (cf. "E d") ruled between 856-861/1452-56 and about 1092/1681. Some of them (including the last ruler) became converted to Orthodox Christianity and became the forefathers of Russian noble families.

f) Descendants of the branch ruling in Astrakhān (see 'b") had fled after the Russian conquest to the Shaybānids in Bukhārā (see "E a"). One of them, Prince Djān b. Yār Muḥammad, married the daughter of the Shaybānid Khān Iskandar (968-991/1560-83). After the extinction of the male line of the Bukhārā dynasty in 1006/1598, their son Bāķī Muḥammad assumed the rule of the land. The new dynasty was called "Astrakhānid", "Ashtarkhanid" or "Djānid" [*q.v.*], and ruled in Bukhārā [*q.v.*] until their displacement in 1200/1785 by the House of Mangit [*q.v.*].

D) Among the descendants of a further son of Djoči, Moghol (or Tewal?; P. Pelliot, Notes 52/54 considers "Boal" better), his grandson Noghay ([*q.v.*]; Mongol "Nokhay" 'dog') played a significant role as *major domus* for several rulers of the Golden Horde, until he was killed in a civil war in 699/1299. His descendants are known for a further two generations before they disappear. — Apparently the Nokhay people [*q.v.*] is called after him.

E) Finally, the descendants of Djoči's youngest son Shiban (Arabicized "Shaybān") lived originally in the region southeast of the Urals (somewhere between the source of the Tobol in the west and the Upper Irtïsh in the east, modern Ķazakhstān) where they preserved their nomadic life. When the inhabitants of Orda's "White Horde" under Toķtamïsh migrated far into the Ķipcaķ Plain, the Shaybānids [*q.v.*] occupied their territory, and the peoples under their rule came to be called Özbek (*q.v.*]; Russ. Uzbek). Of Shiban's descendents, the Shaybānids, Abu 'l-Khayr ([*q.v.*], i, 135) expelled in 851/1447 the Tīmūrids [*q.v.*] from Khwārizm [*q.v.*] and in the region north of the Sïr Dārya [*q.v.*]. He ruled the area from there to the neighbourhood of Tobol'sk, but was weakened by the devastating attacks of the Oirats ([*q.v.*]; Kalmuks) into his territory as well as by the struggles with the Ķazakhs [*q.v.*] and died in 873/1468. His grandson Muḥammad Shaybānī [*q.v.*] conquered Transoxania in 906/1500, where he broke the rule of the Tīmūrids, penetrating finally into modern Afghānistān [*q.v.*] as well as Khurāsān [*q.v.*]. The founder of the Ṣafawid dynasty [*q.v.*], Ismā'īl I [*q.v.*] managed to expel him from there and to defeat him near Marw in 916/1510, where Muḥammad Shaybānī was killed. With that move, the power of the Čingizids was restricted to the area north of the Amū Daryā, and of this to a frontier zone between Persian Shī'ī and Turkish Sunnī influence (not without isolated shifts in both directions in the course of time).

The reign of the Shaybānids endured in Transoxania, where they ruled:

a) until 1007/1598 in Bukhārā, where the ruling family died out with ʿAbd Allāh II ([*q.v.*], i, 46 ff.; 991-1007/1583-98). The Djānids succeeded (see "C f").

b) in Khwārizm [*q.v.*], later called for the most part Khīwa, which had fallen in 911-912/1505-6 to Muḥammed Shaybānī, the tributary line of the ʿArabshāhids succeeded in 911/1512 in the person of Ilbars I (1512-25). To this line belongs the famous historian Abu 'l-Ghāzī Bahādur Khān ([*q.v.*], i, 120 ff.; 1053-1076/1643-65), the author of the "Shadjarat al-Atrāk". The line ruled until 1106-7/1694-95, when the power passed to the erstwhile "Condottieri" (Inaḳ) of the Ḳungrat family [*q.v.*] who after 1219/1804 called themselves "Khān".

c) A further branch of the Shaybānids under Shāh Rukh I, a descendent of Abu 'l-Khayr, established himself in Farghāna [*q.v.*] in 1122/1710. He founded the Khānate of Khoḳand [*q.v.*] which was annexed in 1876 by the Russians.

d) Finally in 886/1481 the Shaybānid prince Ibak (d. 899/1493) was able to wrest the neighbourhood of the town of Tümen (Russ. Tyumeń) from the hands of the Khān of Sibir (who was not a Čingizid). In 973/1565 his grandson Ḳučum expelled the last Khān of Sibir [*q.v.*] and put down his successors, though after 1579 found himself oppressed by Russian attacks and gradually pushed out of his territory, until he had to flee to the Noghays after a defeat on the Ob' in 1007/1598, dying there in 1009/1600. His son Ishim Khān managed to hold out on the Upper Tobol' until about 1035/1625.

e) Kasimov (cf. "C e").

II) The descendants of the second son Čaghatāy ([*q.v.*], d. 640/1242) persisted for almost as long, managing to hold their ground against the descendents of Ögedey (see III) in the 7th/13th century, and to win out against them in 700/1309 [See ČAPAR]. After that date inner Asia belonged to their area of rule (Ulus). From then on there were various struggles with the Īlkhāns ([*q.v.*]; see also under "IV B") in Persia, and invasions into India, particularly between 697/1297 and 706/1306.

Čaghatāy's great grandson Baraḳ ([*q.v.*]; usually called by Muslims "Burāḳ") and the latter's son Duwa (about 691/1291 to 706/1306) had with Chinese aid asserted themselves against Ḳaidū (see III). Duwa's son Kebek (Köpek) was able in 709/1309 to take possession of the latter's inheritance. (d. 726/1326) His brother Termashīrīn (727-735/1326-34) was converted to Islam, taking with him the dynasty and gradually (though not without setbacks) the territory it ruled into the sphere of Islam. His death was followed by a temporary cleavage in the Ulus of Čaghatāy:

a) The branch of the house ruling in Transoxania was converted to Islam.

b) In the eastern part of the Ulus, since called Mogholistān (the land of seven rivers/Djeti suw/Semirečye; the area round Issiḳ Kul as well as the western Tarim Basin with Kāshgar) ruled a line under whom Islam only spread slowly.

A renewed unity of the two parts by Tughluḳ Temür [*q.v.*] was finally broken by Tīmūr's victory in 765/1363 by which Transoxania came to develop a separate character, where Turkish now definitely attained to leadership. Beside Tīmūr Čaghatāyids continued to rule as nominal Khāns until 805/1402. The Khāns in Mogholistān could not be eliminated, despite Tīmūr's persistent efforts.

Rather after Tīmūr's death in 808/1405, they were able gradually to regain influence in Transoxania. In particular, Esen Bogha II (833-867/1429-62) proved himself a dangerous opponent of the Tīmūrids. Between him, the Ḳara Ḳoyunlu [*q.v.*], the Aḳ Ḳoyunlu and finally, the rising Ṣafawids [*q.v.*], the Tīmūrids (with the exception of the Great Moghuls) were gradually worn down. Their territory fell finally to the Shaybānids ([*q.v.*]; see also above "I E") and to the (eastern) Čaghatāyids from Mogholistān, among whom Yūnus (874-891/1469-86), raised as a hostage in Shīrāz, took possession in 889/1484 of Tashkent [*q.v.*] and Sayrām [*q.v.*]. His successors maintained themselves there, reaching out at the same time—in opposition to China—towards Ha-mi and Turfān [*q.v.*], to whose islamization they decisively contributed. In Transoxania the Čaghatāyids were definitively eliminated in 914-15/1508-09 by the Shaybānids. Only Mogholistān east of Tʿien-shan remained in the hands of this dynasty, who were forced to share their power with the clan of Dughlat [*q.v.*], centred at Kāshghar. Living for the most part in harmony, both families took part in the struggle for Ha-mi and Turfān against China, a struggle which lasted still in the 16th century. Apparently at the end of that century a particular branch of the Čaghatāyids established itself in Turfān, and in 1057/1647 and 1068/1657 sent embassies to China. By the end of the 16th century Čaghatāyid power had split in several parts. It was fully ended in 1089/1678 when Khān Ismāʿīl of Kāshghar [*q.v.*] attempted to get rid of the control of the Khōdja [*q.v.*] which, divided in two parts, since the end of the 10th/16th century had been the real leaders in that region, which was organised in separate city states in the form of theocracies.

III) Čingiz Khān's third son Ögedey [*q.v.*], in accordance with his father's will and with the approval of his agnates, succeeded his father as the Great Khān from 627/1229 until 639/1241. His son Göyük (Pers. Gūyūk) too had his honour from 644/1246 to 646/1248. The widows of both, Töregene (Pers. Tūrākīnā) and Oghul Ḳaymish, conducted the regency in 639-644/1241-46 and 646-649/1248-51. Under Batu's influence however this line was unable to maintain itself in the Great Khānate, which passed to the line of Tolui (see IV). None the less, Ḳaydū, a nephew of Göyük, held his own in Ögedey's Ulus on the Imil, in the Tarbagatay Mountains and in modern Afghānistān. He conducted long wars with the princes of the House of Čaghatāy (II), especially Baraḳ, as well as with the Great Khān Ḳubilay, whose "nomadic" rival he was. He adhered to the old Mongolian religious traditions, and died in 1301 on the return march from an assault on Ḳaraḳorum [*q.v.*]. His son and successor Čäpär (Čapar; [*q.v.*]) resumed the struggle against the descendents of Čaghatāy and Ḳubilay, but had to flee from Kebek (see II) in 1309 to the court of the Mongol Emperor of China. Thereupon the Ulus of Čaghatāy ceased to exist.

IV) Čingiz Khān's youngest son Toluy had a such received as Ulus the territory of the actuals Mongolia. Since his sons Möngke (Pers. Mängū; [*q.v.*]) 1251-1259, and Ḳubilay [*q.v.*] 1259-94, were Great Khāns into whose hands until 1280 all of China had fallen, there was a dynastic connexion between Mongolia with its capital Ḳaraḳorum and the Middle Kingdom, where the Mongol dynasty was called Yüan. A third brother Ariḳ (Erik) Böge, who attempted to establish himself in Mongolia, was forced to surrender in 1264 and died in 1266 in Ḳubilay's custody. His great-grandson Arpa ruled

ČINGIZIDS

    - Erik Böge † 1266 ⋮ 2 generations
      - Arpa Īlkhān 1335-6

The numbers and letters of this geneological table correspond with the numbers and letters of the article "ČINGIZIDS".

for a few months in 1335/36 as Īl̲kh̲ān (see "IV B").

A) Ḳubilay inclined more and more towards Buddhism, and his successors as emperors of China were completely absorbed in the indigenous culture and in the Chinese religion. The essential cause of this was that after Ḳubilay's death in 1294 the entire Mongol network collapsed, as the other branches of the house had sooner or later converted to Islam, even the Īl̲kh̲āns of Iran in 695/1295, who had hitherto particularly cultivated their relations with K̲h̲ānbaligh ("K̲h̲ān-city"; Peking). The Yüan dynasty, driven out of China in 1368, maintained the rule in Mongolia, where the various branches of the house drifted apart, though having nothing to do with Islam. At the end of the 16th century among the Mongols (as a linguistic community) Buddhism was established in its Tibetan form of "Lamaism" of the "Yellow Church". The Kalmuks [*q.v.*] too brought this religion to the Volga where they preserved it. After 1649 the Mongols in the Ordos region were again subject to Chinese authority.

B) A fourth brother of Ḳubilay, Hülegü (Pers. Hūlāgū; [*q.v.*] d. 1265) conquered in 653-658/1255-59 Persia, ʿIrāḳ and Mesopotamia and, temporarily, Syria. He destroyed the ʿAbbāsid caliphate and founded the empire of the Īl̲kh̲āns [*q.v.*]. He and his successors were in the beginning more or less inclined to Buddhism, but with G̲h̲āzān [*q.v.*] in 695/1295 were converted to Islam, in which they vacillated openly between Sunnī and S̲h̲īʿī (Öld̲j̲eytü, d. 716/1316). The Īl̲kh̲ān empire collapsed after 736/1335 in civil wars, and the last offspring of this line, (A)Nūs̲h̲irwān disappeared from history in 754-5/1353-4. The heritage of the Īl̲kh̲āns was finally taken over by Tīmūr.

In addition, see the bibliography for the individual branches of the Čingizids, for the individual members of the family, and for the abovementioned geographical and town names.

(B. Spuler)

ČINĪŌT (Činyōt), An ancient town in the district of D̲j̲hang (West Pakistan), situated in 31° 43′ N. and 73° 0′ E., on the left bank of the Čīnāb with a population of 39,042 in 1951. It was, in all probability, once a settlement of Chinese who not only gave their name to the town but also to the river that flows past at a distance of 2 miles only. Attempts have been made to identify it with Sākala, the capital of the White Huns, visited by the Chinese traveller Hiuen Tsiang. In 800/1398 it was captured by Tīmūr, during his Indian campaign, and remained thereafter in the possession of his dependents. In 876/1471 Sulṭān Ḥusayn b. Ḳuṭb al-Dīn Lingāh, the *wālī* of Multān, dispossessed Malik Mānd̲j̲hī Khōkhar, agent of Sayyid ʿAlī K̲h̲ān, the governor of Činīōt under Buhlūl Lōdī. In the meantime Buhlūl Lōdī appointed his son Bārbak S̲h̲āh as the governor of the Pand̲j̲āb. His appointment was, however, resented by Sulṭān Ḥusayn who met him in a fierce combat near Multān; defeated his troops and pursued them right upto Činīōt. The troops of Bārbak S̲h̲āh, however, succeeded in occupying the town and killed the local commandant. In 925/1519 Bābur occupied it in pursuance of a resolve to regain the territory which once was held by his ancester, Tīmūr. He ordered his troops not to indulge in plundering or over-running because he considered it to be a part of his patrimony. Prior to Bābur's occupation the town was in the possession of ʿAlī K̲h̲ān b. Dawlat K̲h̲ān Yūsuf-K̲h̲ayl, governor of the Pand̲j̲āb.

Thereafter it remained under the Mug̲h̲als and in the days of Akbar it had a brick-fort garrisoned by 5,000 infantry. During the second half of the 12th/18th century it suffered heavily from Durrānī inroads and Sikh depredations; the town was badly disturbed and the residents knew neither peace nor security. In 1264/1848 it again suffered under Narāyan Singh, the Sikh commandant. The very next year it became a British possession with the annexation of the Pand̲j̲āb in 1265/1849.

Činīōt now consists of the main town and two suburbs, one of which has grown up round the tomb of S̲h̲ayk̲h̲ Ismāʿīl. It is a well-built town and many of the houses, owned by the K̲h̲ōd̲j̲ās, are lofty and commodious. The K̲h̲ōd̲j̲ās are well-known for their great wealth and extensive business relations. They came to this town after its occupation by Rand̲j̲īt Singh, the Sikh Mahārād̲j̲ā.

Saʿd Allāh K̲h̲ān ʿAllāmī al-Tamīmī the celebrated chief Minister of S̲h̲āhd̲j̲ahān and the physician ʿIlm al-Dīn al-Anṣārī, better known to history as Wazīr K̲h̲ān, the Mug̲h̲al governor of Lahore during the reign of S̲h̲āhd̲j̲ahān, were both natives of Činīōt. Saʿd Allāh K̲h̲ān made a gift to his townsmen of the exceedingly handsome D̲j̲āmiʿ Masd̲j̲id built of stone obtained from the neighbouring hills; Wazīr K̲h̲ān built the famous mosque of Lahore still known after him and founded the town of Wazīrābād. Some of the masons employed on the Tād̲j̲ Maḥall (Agra) are said to have been drawn from Činīōt, most probably at the instance of Saʿd Allāh K̲h̲ān, who knew all about their skill in masonry, and one of those who built the (Sikh) Golden Temple at Amritsar was also a resident of Činīōt. This town was also famous for wood-carving and some very fine specimens of wood-work can still be seen in the old town.

CINTRA [see S̲h̲intara]

ČIRĀG̲H̲-I DIHLĪ ("Light of Dihlī"), the *laḳab* of S̲h̲ayk̲h̲ Naṣīr al-Dīn Maḥmūd b. Yaḥyā Yazdī, Awadhī, said to be based on a remark of his contemporary S̲h̲ayk̲h̲ ʿAbd Allāh b. Asʿad al-Yāfiʿī (d. 768/1367) (*Firishta*, ii, 781⁷, 747³, D̲j̲amālī, 141b). He was one of the most eminent

disciples of Shaykh Niẓām al-Dīn Awliyā'. His father Yaḥyā was born in Lāhore. Later the family settled at Awadh (Ayōdhyā), where his father traded in woollen cloth or cotton (*pashmīna* in *Khayr al-Madjālis*, var. *panbe* in *Akhbār* 80). It was in Awadh that Maḥmūd was born, but he was not yet nine, when his father died. His widowed mother arranged for his education with a distinguished scholar of those days Mawlānā ʿAbd al-Karīm Sharwānī (*Nuzhat al-Khawāṭir*, ii, 70), with whom he studied up to al-Marghīnānī, *Hidāyat al-Fiḳh*, and Pazdawī, *Uṣūl*, (Brockelmann, I 373, S I 637). When Sharwānī died the young Maḥmūd completed his education in the usual sciences with Mawlānā Iftikhār al-Dīn Muḥammad al-Gīlānī (*Nuzha*, ii, 15). When he was about twenty-five, he renounced the world and for seven years went through a rigorous course of self-discipline and self-mortification, and fought against the passions with prayer and fasting. At forty-three he moved to Dihlī and became a disciple of Shaykh Niẓām al-Dīn Awliyā', *i.e.*, Muḥammad Badā'ūnī. After this he visited Awadh only occasionally and was mostly attending on his *murshid* at the *Djamāʿat Khāna* at Kīlokharī, on the bank of the Djamnā.

He resided in Dihlī in the house of his old friend and fellow-disciple Shaykh Burhān al-Dīn Gharīb [*q.v.*]. Towards the end of 724/1324, or a few months later, his Shaykh, who was then about 94, appointed him his successor in Dihlī, to carry on his life-work and passed on to him the souvenirs (*khirḳa*, rosary etc.) of his own Shaykh (Farīd al-Dīn) (Māndwī, 115, cf. Kirmānī, 220-2). He followed his Shaykh punctiliously in the path of poverty and patience, resignation (in the will of God) and acceptance (*taslīm wa riḍā*) and remained celibate like him. After the death of his Shaykh he guided the people for thirty-two years. Kirmānī (242 ff.) gives several instances of his remarkable power of thought-reading.

He and most of his *khalīfas* lived in strict obedience to the *sharīʿa*, and engaged themselves in teaching religious sciences and the spreading of knowledge (cf. Ghulām ʿAlī Āzād, *Subḥat al-Mardjān*, 30). A contemporary *faḳīh*, Kamāl al-Dīn, the author of *Ṭurfat al-Fuḳahā'* (in verse), who visited his *khānaḳāh*, confirms it thus:

> "On every side Jurisprudence and (its)
> Principles were being taught,
> On every side God, and the Apostle were
> being mentioned".
>
> *Har ṭaraf dars-hā zi fiḳh u uṣūl,*
> *Har ṭaraf dhikr az Khudāwa Rasūl.*
> (Panjab University MS. f. 12[a])

When Sulṭān Muḥammad Tughluḳ 725-52/1324-51) adopted a hostile policy against the *ʿulamā'* etc. (for reasons discussed by Mahdī Ḥusayn), he created difficulties for the Shaykh too in various ways. The sultan would take him along with him on his travels and on one occasion he put him in charge of his wardrobe. The Shaykh bore all these troubles and annoyances patiently, keeping in view the injunctions of his master (Kirmānī 245 f.; Djamālī 138b; Māndwī 115; *Akhbār* 81, 91; Firishta, ii, 747; Badā'ūnī, i, 242). However his relations with the sultan's successor, Fīrūz Shāh, were much better, and the Shaykh supported the sultan's ascent to the throne (Baranī (Bib. Ind.), 535; ʿAfīf (Bib. Ind.) 29; *Mubārak Shāhī* (Bib. Ind.) 121; Badā'ūnī, i, 241f.; *Ṭabaḳāt-i Akbarī*, i, 225). True to the tradition of the great Čishtī Saints, he compiled no book (*Akhbār*, 81) but his *obiter dicta*, and anecdotes about him, were collected by Ḥamīd Ḳalandar (*Akhbār*, 109, 86). The work called *Khayr al-Madjālis*, begun in 755/1354 and completed in 756/1355, is divided into 100 *Madjālis* (Assemblies). The Shaykh himself revised this work. A *takmila* (supplement) was added to it by the author, after the death of the Shaykh. The narrative is given in simple Persian and the account is full and detailed. For quotations from it see *Akhbar*, 109-112, 82-5. An Urdū translation of it exists (*Ta'rīkh Mashayikh Čisht* 162n, 183n). A number of his sayings reveal a learned and illumined personality. For an Arabic verse of his see *Akhbār*, 97.

The enormous influence which he wielded in Dihlī and outside it (northern India and Deccan) in his own and the following generations, becomes clear from the lengthy list of his notable disciples and *khalīfas*, who are noticed in detail in the *Akhbār*, 129-148, 141, 142-146, 147-149 and 85, (see also *Nuzhat al-Khawāṭir*, ii, 159), including as it does, among others such names as those of Ḳāḍī ʿAbd al-Muḳtadir (d. 791/1389; see also *Subḥa*, 29, *Nuzhat al-Khawāṭir*, (ii, 70), Sayyid Muḥammad b. Yūsuf, usually known as Gēsūdarāz (died in Gulbarga in 825/1422, see Firishta, ii, 748, Rieu, 347), Sayyid Djalāl Bukhārī Makhdūm-i Djahāniyan (d. 785/1384 in Sindh), Aḥmad Thānesarī (died in Kālpī; who won consideration from Amīr Tīmūr (*Akhbār*, 142), Muṭahhar of Kaṛa (for whom see the *Oriental College Magazine*, Lāhore, May 1935, 107-160, Aug. 1935, 48-216, *Akhbār*, 85 f.), and Mawlānā Khwadjagī (*Akhbār* 141). To this list may be added the names of (Akhī Sirādj Parwāna, the Shaykh's *khalīfa* in Bengāl, Ḥusām al-Dīn of Nahrawālā (Gudjarāt) (Firishta, ii, 748, 747), and Muḥammad Mudjīr Wadjīh al-Dīn Adīb, author of the *Miftāḥ al-Djinān* (Rieu, 40 f.).

The Shaykh died after a short illness on the 18th Ramaḍān 757/15 September 1356, and was buried in his own house (Kirmānī, 247), appointing no successor, and the relics he had received from his Shaykh were buried with him. This symbolised the end of the first series of the great Čishtī Saints in India. A mausoleum was built on his tomb by Sulṭān Fīrūz Shāh. A tomb close to the Shaykh's is popularly supposed to be that of Sulṭān Bahlol Lodī. For a description of it see *List of Muhammadan and Hindu Monuments, Delhi Province*, iii, *Mahrauli Zail*, Calcutta 1922,

ČIRĀGHĀN (plur. of *čirāgh*, means of illumination such as candle, torch or lamp), the name of a palace on the European side of the Bosphorus between Beshiktāsh and Ortaköy. First built by Sulṭān Murād IV for his daughter Kaya Sulṭān, it was rebuilt by Dāmād Ibrāhīm Pasha, the Grand Vizier of Sultān Aḥmad ,for his wife Faṭima Sultān. During the sultan's frequent visits, the famous *čirāghān* festivities (the illumination of tulip gardens with candles and lamps, tortoises with candles on them also wandered about in the gardens) were celebrated here. It was rebuilt of wood by Sulṭān Muṣṭafā III for this daughter Beyhan Sulṭān, with a magnificient hall 180 tr. in length, various ceremony halls, valuable floors and interior decorations. Demolished in 1859 by Sulṭān ʿAbd al-Medjīd, the reconstruction began in the time of Sulṭān ʿAbd al-ʿAzīz in 1863 and was completed in 1869. Made of stone, its architectural style was a mixture of classical styles to suit eastern taste. The building on the beach consisted of three parts, the façade with its mosaics, marble columns and stone work, the interior with its interior decorations, ceilings, wooden wall linings and doors inlaid with mother of pearl were separate works of art. After his deposition in 1876, Sulṭān ʿAbd al-ʿAzīz stayed there until his suicide. The deposed Sulṭān Murād V was forced to live there for 27 years. With small alterations, it was used as a Parliament house for the Senate and the Chamber of Deputies and was destroyed by fire three months later on 7 Muḥarram 1328/19 January 1910. The walls and the imperial doors are the only remnants.

CIRCASSIANS [see ČERKES]

CIRCUMCISION [see KHITĀN]

ČIRMEN, located at the site of Burdipta, a fortress of the ancient Thracians (cf. Tomaschek, 325), is called Τζερνομιάνον in the chronicle of the Byzantine historian Kantakuzenos (cf. also Chalkokondyles, who mentions a Κερμιανόν χῶρον and Črŭnomêcĭ in the Serbian sources. It lies on the south side of the river Maritsa, not far above Adrianople (Edirne) and was, at the time of the earlier Ottoman conquests in the Balkans, a point of some strategic importance, since it commanded a ford across the river. At Čirmen, in September 1371/Rabīʿ I 773), the Ottomans inflicted a crushing defeat on the southern Serbs led by the princes Vukašin and Uglješa. As the tide of Ottoman conquest in the Balkans advanced further towards the north and west, so the significance of Čirmen as a fortress began to decline. Ewliyā Čelebī describes it as *ič il ḳalʿesi*, *i.e.*, a fortress of the interior, without garrison and equipment and with its walls in a state of disrepair. Čirmen was during the 14th-19th centuries the centre of a *sandjaḳ* in the *eyālet* of Rūmeli, but sank thereafter to the status of a *nāḥiye* in the *ḳaḍā'* of Muṣṭafā Pāshā Köprüsü belonging to the *wilāyet* and *sandjaḳ* of Edirne.

ČISHTĪ, KHWĀDJA MUʿĪN AL-DĪN ḤASAN, one of the most outstanding figures in the annals of Islamic mysticism and founder of the Čishtiyya order [see the following article] in India, was born in or about 536/1141 in Sidjistān. He was in his teens when his father, Sayyid Ghiyāth al-Dīn, died leaving as legacy a grinding mill and an orchard. The sack of Sidjistān at the hands of the Ghuzz Turks turned his mind inwards and he developed strong mystic tendencies. He distributed all his assets and took to itineracy. He visited the seminaries of Samarḳand and Bukhārā and acquired religious learning at the feet of eminent scholars of his age. While on his way to ʿIrāḳ, he passed through Harvan, a *ḳaṣaba* in the district of Nīshāpūr. Here he met Khwādja ʿUthmān and joined the circle of his disciples. For twenty years he accompanied his mystic teacher on his *Wanderjahre*. Later on he undertook independent journeys and came into contact with eminent saints and scholars like Shaykh ʿAbd al-Ḳādir Gīlānī, Shaykh Nadjm al-Dīn Kubrā, Shaykh Nadjīb al-Dīn ʿAbd al-Ḳāhir Suhrawardī, Shaykh Abū Saʿīd Tabrīzī, Shaykh ʿAbd al-Waḥid Ghaznawī—all of whom were destined to exercise great influence on contemporary religious thought. He visited nearly all the great centres of Muslim culture in those days—Samarḳand, Bukhārā, Baghdād, Nīshāpūr, Tabrīz, Awsh, Iṣfahān, Sabzawār, Mihna, Khirḳān, Astarābād, Balkh and Ghaznīn—and acquainted himself with almost every important trend in Muslim religious life in the middle ages. He then turned towards India and, after a brief stay at Lahore, where he spent some time in meditation at the tomb of Shaykh ʿAlī al-Hudjwīrī, reached Adjmēr before its conquest by the Ghūrids. It was here that he married at an advanced age. According to ʿAbd al-Ḥaḳḳ Dihlawī (d. 1642) he took two wives, one of them being the daughter of a Hindu rādjā. He had three sons—Shaykh Abū Saʿīd, Shaykh Fakhr al-Dīn and Shaykh Ḥusām al-Dīn—and one daughter, Bībī Djamāl, from these wives. Bībī Djamāl had strong mystic leanings but his sons were not inclined towards mysticism. Nothing is known about Abū Saʿīd; Fakhr al-Dīn took to farming at Mandal, near Adjmēr; while Ḥusām al-Dīn disappeared mysteriously. Muʿīn al-Dīn died at Adjmēr in 633/1236. His tomb is venerated by Hindus and Muslims alike

and hundreds of thousands of people from all over the Indo-Pakistan sub-continent assemble there on the occasion of his *ʿurs* (death anniversary).

The *dargāh* area contains many buildings—gates, mosques, hospices, *langars* etc.—constructed by the rulers of Malwa, the Mughal emperors, nobles, merchants and mystics during the past several centuries. Muḥammad b. Tughluḳ (626-752/1325-1351) was the first Sultan of Dihlī who visited his grave (*Futūḥ al-Salāṭīn*, Madras, 466). The Khaldjī Sultans of Malwa constructed the tomb of the saint. It was during the reign of Akbar (963-1014/1556-1605) that Adjmēr became one of the most important centres of pilgrimage in the country. The Mughal emperors displayed great reverence for the mausoleum of the saint. Akbar undertook a journey on foot to Adjmēr, and Shāh Djahān's daughter, Djahān-Ārā, cleansed and swept the tomb with her eyelids.

Khwādja Muʿīn al-Dīn laid the foundations of the Čishtī order in India and worked out its principles at Adjmēr, the seat of Čawhān power. No authentic details are available about the way he worked in the midst of a population which looked askance at every foreigner. It appears that his stay was disliked by Prithvī Rādj and the caste Hindūs but the common people flocked to him in large numbers. He visited Delhi twice during the reign of Iletmish (1210-1235), but kept himself away from the centre of political power and quietly worked for a cultural revolution in the country. His firm faith in *waḥdat al-wudjūd* (Unity of Being) provided the necessary ideological support to his mystic mission to bring about emotional integration of the people amongst whom he lived. Some of his sayings, as preserved in *Siyar al-Awliyāʾ*, reveal him as a man of wide sympathies, catholic views and deep humanism. He interpreted religion in terms of human service and exhorted his disciples "to develop river-like generosity, sun-like affection and earth-like hospitality". The highest form of devotion (*ṭāʿat*), according to him, was "to redress the misery of those in distress; to fulfil the needs of the helpless and to feed the hungry". The Čishtī order owes to him the ideology which is expounded in the conversations of Shaykh Niẓām al-Dīn Awliyāʾ (*Fawāʾid al-Fuʾād*) and other Čishtī mystic works of the 7th/13th and the 8th/14th centuries.

Bibliography: No contemporary record of the saint's life or teachings is available. The works attributed to him—*Gandj al-Asrār*, *Anīs al-Arwāḥ*, *Dalīl al-ʿĀrifīn* and *Dīwān-i Muʿīn*—are apocryphal. (See Prof. M. Ḥabīb, *Chishti Mystic Records of the Sultanate Period*, in *Medieval India Quarterly*, Vol. i, no. 2, 15-22; K. A. Niẓāmī, *Studies in Medieval Indian History*, Aligarh 1956, 40-42). The earliest notices are found in *Surūr al-Ṣudūr* (conversations of Shaykh Ḥamīd al-Dīn al-Ṣūfī, a disciple of the saint, compiled by his grandson—MSS Ḥabībgandj and personal collection) and *Siyar al-Awliyāʾ* (Delhi 1301, 45-48), but they contain very few details about his life. The first detailed account of his life is given by a sixteenth century mystic, Shaykh Djamālī (*Siyar al-ʿĀrifīn*, Delhi 1311, 4-17) who collected whatever material he could in foreign lands. All later hagiological works, with a few exceptions, have confused fact with fiction and incorporated all kinds of legends. This literature may be of value in tracing the growth of legends round the Khwādja's person; its historical value is, nevertheless, very meagre. For later authorities, Abu 'l-Faḍl, *Āʾīn-i Akbarī*, Sir Sayyid ed., 207; Ghawthī, *Gulzār-i Abrār*, As. Soc. of Bengal Ms. D. 262, f. 8v-10; *Taʾrīkh-i Firishta*, Nawal Kishore, 1281, ii, 375-378; ʿAlī Aṣghar Čishtī, *Djawāhir-i Farīdī*, Lahore 1301, 146-163; ʿAbd al-Ḥaḳḳ Dihlawī, *Akhbār al-Akhyār*, Delhi 1309, 22-24; ʿAbd al-Rahmān, *Mirʾāt al-Asrār*, MS personal collection, 408-426; *Siyar al-Aḳṭāb*, Nawal Kishore, Lucknow 1331 100-141; Ghulām Muʿīn al-Dīn, *Maʿāridj al-Walāyat*, MS personal collection, i, 3-27; Tādj al-Dīn Rūḥ Allāh, *Risāla Ḥāl Khānwāda-i Čisht*, MS. personal collection, f. 2a-5b; Bahā *alias* Radja, *Risāla Aḥwāl Pīrān-i Čisht*, MS personal collection, 77-80; Dārā Shukōh, *Safīnat al-Awliyāʾ*, Agra 1269, no. 110; Djahān-Ārā, *Munis al-Arwāḥ*, (MSS Storey, 1000); Ikrām Baraswī, *Iḳtibās al-Anwār*, Lahore 132-147; Raḥīm Bakhsh Fakhrī, *Shadjarat al-Anwār*, MS personal collection, 141b-162b; Nadjm al-Dīn, *Manāḳib al-Ḥabīb*, Delhi 1332; Muḥammad Ḥusayn, *Taḥḳiḳāt-i Awlād-i Khwādja Ṣāḥib*, Delhi; Imām al-Dīn Khān, *Muʿīn al-Awliyāʾ*, Adjmēr 1213; Bābū Lāl, *Waḳāʾ-i Shāh Muʿīn al-Dīn*, Nawal Kishore; K. (K. A. Nizami)

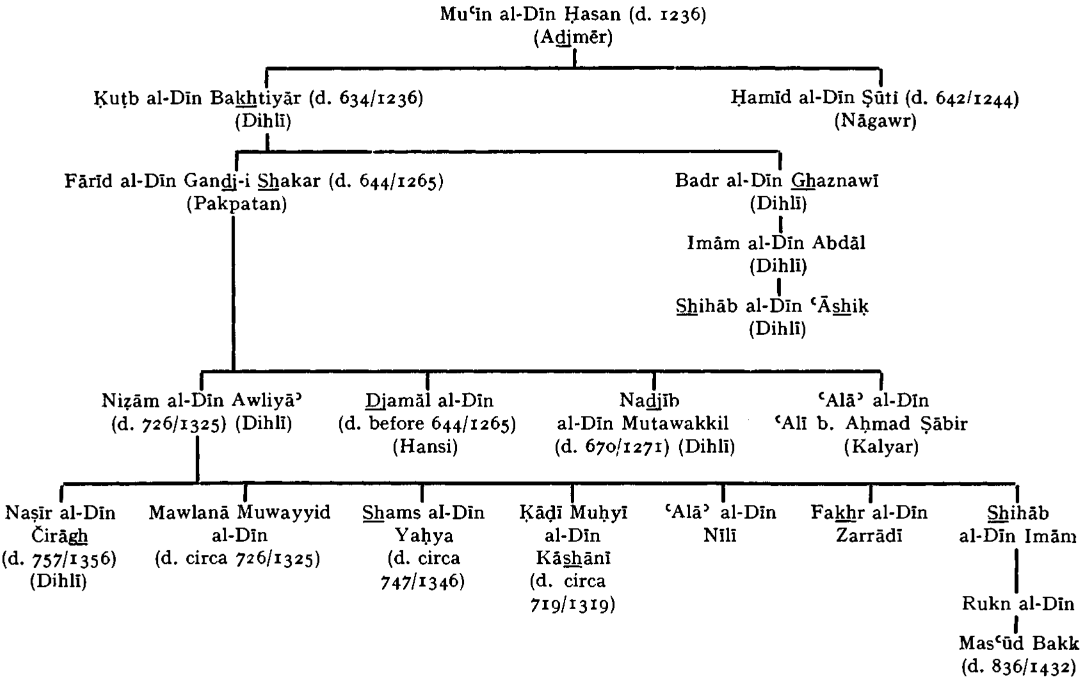
ČISHTIYYA, one of the most popular and influential mystic orders of India. It derives its name from Čisht, a village near Harat (marked as Khwādja Čisht on some maps), where the real founder of the order, Khwādja Abū Isḥāḳ of Syria (Mīr Khurd, *Siyar al-Awliyāʾ*, Delhi 1302, 39-40; Djāmī, *Nafaḥāt al-Uns*, Nawal Kishore 1915, 296) settled at the instance of his spiritual mentor, Khwādja Mamshād ʿUlw of Dinawar (a place in Ḳuhistān, between Hamadān and Baghdād). The *silsila* is traced back to the Prophet as follows: Abū Isḥāḳ, Mamshād ʿUlw Dinawarī, Amīn al-Dīn Abū Hubayrat al-Baṣrī, Sadīd al-Dīn Huzayfat al-Marʿashī, Ibrāhīm Adham al-Balkhī, Abu 'l-Fayḍ Fuḍayl b. ʿIyāḍ, Abu 'l-Faḍl ʿAbd al-Wāḥid b. Zayd, Ḥasan al-Basrī, ʿAlī b. Abī Ṭālib, the Prophet Muḥammad. Shāh Walī Allah (d. 1763) has doubted the validity of the tradition which makes Ḥasan al-Baṣrī a spiritual successor of ʿAlī (*Al-Intibāh fī Salāsil-i Awliyāʾ Allāh*, Delhi 1311, 18), but his views have been criticised by Shāh Fakhr al-Dīn Dihlawī (d. 1784) in his *Fakhr al-Ḥasan* (commentary on this, by Mawlānā Aḥsan al-Zamān, *Al-Ḳawl al-Mustaḥsin fī Fakhr al-Ḥasan*, Ḥaydarābād 1312). The pre-Indian history of the Čishtī order cannot be reconstructed on the basis of any authentic historical data. Khwādja Muʿīn al-Dīn Sidjzī Čishtī [see preceding article] brought the *silsila* to India in the 12th century and established a Čishtī mystic centre at Adjmēr, whence the order spread far and wide in India and became a force in the spiritual life of the Indian Muslims. Khwādja Muʿīn al-Dīn was connected with the founder of the *silsila* by the following chain of spiritual ancestors: Muʿīn al-Dīn Ḥasan, ʿUthmān Harvanī, Ḥādjī Sharīf Zindānī, Mawdūd Čishtī, Abī Yūsuf, Abī Muḥammad b. Aḥmad, Abī Aḥmad b. Farasnafa, Abū Isḥāḳ. (The earliest lists of the great Čishtī saints in the order of their spiritual succession are given in *Futūḥ al-Salāṭīn*, Madras, 7-8; *Khayr al-Madjālis*, Aligarh, 7-8; *Siyar al-Awliyāʾ*, Delhi, 32-45; *Aḥsan al-Aḳwāl*, MS personal collection).

A: History of the Order

The Čishtiyya order had four distinct phases of its activity in India: (i) Era of the Great

Shaykhs (circa 597/1200 to 757/1356), (ii) Era of the Provincial Khānaḳāhs (8th/14th & 9th/15th centuries), (iii) Rise of the Ṣābiriyya Branch (9th/15th century onwards), and (iv) Revival of the Niẓāmiyya Branch 12th/(18th century onwards).



The saints of the first cycle established their *khānaḳahs* mainly in Radjputāna, U.P. and the Pandjāb. Some of them, like Ḥamīd al-Dīn Ṣūfī, worked out the Čishtī mystic principles in the rural areas; others lived in *ḳaṣabas* and towns but scrupulously avoided identification with the centre of political power. They refused to accept *djāgīrs* and government services; did not perpetuate spiritual succession in their own families and looked upon 'learning' as an essential qualification for spiritual work. Under Shaykh Farīd Gandj-i Shakar and Shaykh Niẓām al-Dīn Awliyā', the influence of the order was extended to the whole of India, and people flocked to their hospices from distant parts of the country. The *silsila* possessed during this period a highly integrated central structure which controlled and guided the activities of those associated with it. Muḥammad b. Tughluḳ's policy (1325-1351) of forcing the saints to settle in different parts of the country paralysed the central organization of the Čishtīs. Shaykh Naṣīr al-Dīn Čirāgh and a few other elder saints refused, at the risk of their lives, to co-operate with the Tughluḳ Sulṭān, but many of the younger mystics entered government service. Shaykh Naṣīr al-Dīn was also called upon to protect the mystic ideology and institutions against the attacks levelled by Ibn Taymiyya [*q.v.*]. After him the central organization of the Čishtī order broke down and provincial *khānaḳāhs*, which did not owe allegiance to any central authority, came into existence.

It was mainly through the disciples of Shaykh Niẓām al-Dīn Awliyā' that the Čishtī order spread in the various provinces of India. Some of them had taken up their residence in provincial towns at the instance of their master; others were forced by Muḥammad b. Tughluḳ to settle there. It is significant that the arrival of these saints in provincial towns coincided with the rise of provincial kingdoms. In these circumstances many of these saints could not keep themselves away from the provincial courts. The traditions of the saints of the first cycle were consequently discarded and the comfortable theory was expounded that mystics should consort with kings and high officers in order to influence them for the good. State endowments were accepted and, in return, spiritual blessings and moral support was given to the founders of the new provincial dynasties. The principle of hereditary succession was also introduced in the *silsila*.

Shaykh Sirādj al-Dīn, popularly known as Akhī Sirādj, introduced the *silsila* in Bengal. His disciple Shaykh 'Alā' al-Dīn b. As'ad was fortunate in having two eminent disciples—Sayyid Nūr Ḳuṭb-i 'Alam and Sayyid Ashraf Djahāngīr Simnānī—who played a very important role in popularising the Čishtī *silsila* in Bengal, Bihar and eastern U.P. When Rādjā Kans established his power in Bengal, Sayyid Nūr Ḳuṭb-i 'Alam organized public opinion against him and persuaded Sulṭān Ibrāhīm Sharḳī of Djawnpūr (1402-1440) to invade Bengal. Nūr Ḳuṭb-i 'Alam and his descendants had a share in creating that religious stir which ultimately led to the rise of the Bhakti movement in Bengal and Bihār.

The Čishtiyya order was introduced in the Deccan by Shaykh Burhān al-Dīn Gharīb who settled at Dawlatābād and propagated the Čishtī mystic principles. The city of Burhānpur was named after him. His disciple, Shaykh Zayn al-Dīn, was the spiritual master of 'Alā' al-Dīn Ḥasan Shāh (1347-1359), the founder of the Bahmanī kingdom. Later

(i) ERA OF THE GREAT SHAYKHS:

(ii) ERA OF THE PROVINCIAL KHĀNAḲĀHS:

- Sirādj al-Dīn Akhī Sirādj (d. 759/1357) (Gawŕ, Bengal)
  - ʿAlāʾ al-Dīn b. Asʿad Lāhurī Bengali (d. 801/1398) (Pandwa)
    - Nūr Ḳuṭb-i ʿAlam (d. 313/1410) (Pandwa)
      - Ḥusām al-Dīn (d.822/1477) (Mānikpur)
        - Rādjī Ḥāmid Shāh (d. 901/1495) (Mānikpur)
          - Ḥasan Ṭāhir of Djawnpur (d. 901/1503) (Dihlī)
      - Sayyid Shams al-Dīn Ṭāhir (Ranthambor)
    - Sayyid Ashraf Djāhangīr Simnānī (d. 808/1405) (Kačoča)
- Ḳuṭb al-Dīn Munawwar (d. circa 760/1358) (Hānsī)
  - Nūr al-Dīn
  - Tādj al-Dīn Shīr Suwār (d. circa 784/1382) (Narnawl)
- Naṣīr al-Dīn Čirāgh (d. 757/1356) (Dihlī)
  - Sayyid Muḥammad Gīsū Darāz (d. 826/1422) (Gulbarga)
    - Mīr Sayyid Yād Allāh (d. 849/1445)
      - Shaykh Piyāra (d. 865/1460)
        - Shāh Djalāl Gudjrātī (d. 881/1476)
          - Shaykh Muḥammad (d. 900/1494). (Malawa, near Kanawdj)
            - Shaykh Saʿd Allāh (grandfather of Shaykh ʿAbd al-Ḥaḳḳ Muḥaddith Dihlawi)
  - Ḳāḍī ʿAbd al-Muḳtadir (Dihlī)
    - Shaykh ʿAbd al-Fatḥ (Djawnpur)
  - Kamāl al-Dīn ʿAllama (Gudjarāt)
    - Sirādj al-Dīn (d. 814/1411) (Aḥmadābād)
      - ʿAlam al-Ḥaḳḳ
        - Maḥmūd known as Shaykh Rādjan
          - Ḥasan Muḥammad
            - Yaḥyā Madani
              - Shāh Kalīm Allāh Djahānābādī (Dihlī)
  - Mawlānā Khwādigī (Nalpí)
- Burhān al-Dīn Gharīb (d. circa 741/1340) (Dawlatābād)
  - Zayn al-Dīn
- Sayyid Ḥusayn (Nahrwala)
- Ḥusām al-Dīn Multānī (d. circa 755/1354) (Nahrwala)
- Shāh Barak Allāh (Gudjarāt)
- Wadjīh al-Dīn Yūsuf (d. circa 729/1328) (Čanderī)
- Kamāl al-Dīn (Mālwa)
- Mughīth al-Dīn (Udjdjayn)

(iii) RISE OF THE ṢĀBIRIYYA BRANCH:

- Shaykh ʿAlāʾ al-Dīn ʿAlī b. Aḥmad Ṣābir (d. 691/1291) (Kalyar)
  - Shams al-Dīn Turk (Panīpat)
    - Djalāl al-Dīn Maḥmūd (Panipat)
      - Aḥmad ʿAbd al-Ḥaḳḳ (d. 838/1434) (Radawlī)
        - Shaykh ʿArif (Radawli)
          - Shaykh Muḥammad
            - ʿAbd al-Ḳuddūs (d. 944/1537) (Gangū)
              - ʿAbd al-Aḥad (father of Shaykh Aḥmad Sirhindī)
              - Djalāl al-Dīn Fārūḳī (Thanesar) (d. 990/1582)
                - Niẓām al-Dīn Fārūḳī (Balkh) (d. circa 1036/1626)
                  - Abū Saʿīd (Gangū)
                    - Muḥammad Ṣādiḳ
                      - Muḥammad Dāʾūd
                        - Shāh Abu'l-Maʿālī (d. 1112/1700)
                          - Muḥammad Saʿīd
                            - Sayyid Muḥammad Sālim (d. 1175/1761)
                              - Sayyid Muḥammad ʿAẓam (d. 1227/1812)
                                - Ḥāfiẓ Mūsā Mānikpurī (d. 1280/1863)
                                  - Sayyid Amānat ʿAli (d. 1280/1863)
                                    - Ḥāfiẓ Muḥammad Ḥusayn (author of *Anwār al-ʿĀrifīn*)
                                      - Ḥādjī Imdād Allāh of Thānā Bhawan (d. 1317/1899) (Mecca)
                        - Shaykh Saundhā (d. 1119/1707)
                          - Muḥammad Ikram (author of *Iḳtibās al-Anwār*)
                    - Muḥibb Allāh Ṣadrpurī (d. 1058/1648) (Allāhābād)
                      - Shāh Muḥammadī Fayyāḍ (d. 1107/1695) (Agra)
                        - Shāh ʿAḍd al-Dīn (d. 1172/1758)
                          - Shāh ʿAbd al-Hādī (d. 1190/1776) (Amroha)
                            - Shāh ʿAbd al-Bārī (d. 1226/1811)
                              - Sayyid ʿAbd al-Rahīm Fāṭimī (d. 1247/1831) (Balakot)
                                - Miyāndjī Nūr Muḥammad (d. 1259/1843) (Djhandjhāna)
                                  - Ḥādjī Imdād Allāh of Thānā Bhawan (d. 1317/1899) (Mecca)
            - Shaykh Budh
              - Shaykh Pīr
                - Ḳuṭb al-Dīn
                  - Shaykh Ḥāmid (d. 1033/1623)
                    - ʿAbd al-Raḥmān (author of *Mirʾāt al-Asrār*)
              - Shaykh Manṣūr
                - Shaykh ʿAlam

- Ḥādjī Imdād Allāh of Thānā Bhawan (d. 1317/1899) (Mecca)
  - Muḥammad Ḳāsim Nanawtawī (d. 1295/1878) (founder of the *madrasa* of Deoband)
  - Ashraf ʿAlī (Thāna Bhawan)
    - Sayyid Sulaymān Nadawī (d. 1953) (Karachi)
  - Rashīd Aḥmad (d. 1905) (Gangū)
    - Maḥmūd Ḥasan, *Shaykh al-Hind* (d. 1920) (Deoband)
    - Ḥusayn Aḥmad Madanī (d. 1957) (Deoband)
    - Khalīl Aḥmad Anbethawi (d. 1927) (Medina)
      - Muḥammad Ilyās Kandhlawī (d. 1944) (Dihlī)
    - ʿAbd al-Raḥmān Muḥaddith (Amroha)
  - Aḥmad Ḥasan Muḥaddith (d. 1911) (Amroha)

on, a disciple of Shaykh Naṣīr al-Dīn Čirāgh, Sayyid Muḥammad Gīsū Darāz, set up a Čishtī centre at Gulbarga. He was a prolific writer and a scholar of several languages. Through him the *silsila* spread in the Deccan and Gudjarāt.

In Gudjarāt, the *silsila* was introduced by two less known disciples of Khwādja Ḳuṭb al-Dīn—Shaykh Maḥmūd and Shaykh Ḥamīd al-Dīn. Later on, three disciples of Shaykh Niẓām al-Dīn Awliyā'—Sayyid Ḥasan, Shaykh Ḥusām al-Dīn Multānī and Shaykh Barak Allāh reached there. But the work of organizing it on effective lines was undertaken by ʿAllama Kamāl al-Dīn, a nephew of Shaykh Naṣīr al-Dīn Čirāgh. His son, Sirādj al-Dīn, refused to accede to the request of Fīrūz Shāh Bahmanī (1397-1422), to settle in the Deccan and applied himself to the task of expanding the *silsila* in Gudjarāt. Besides, some other saints of the Čishtī *silsila* settled in Gudjarāt. Shaykh Yaʿḳūb, a *khalīfa* of Shaykh Zayn al-Dīn Dawlatābādī, set up a Čishtī *khanaḳāh* at Nahrwala; Sayyid Kamāl al-Dīn Ḳazwīnī, who belonged to the line of Gīsū Darāz, settled at Bharoč. Shaykh Rukn al-Din Mawdūd, another saint of the *silsila*, became a very popular figure in Gudjarāt. His disciple, Shaykh ʿAzīz Allāh al-Muta wakkil-ila'llāh, was the father of Shaykh Raḥmat Allāh, the spiritual mentor of Sulṭān Maḥmūd Bēgaŕā (862-917/1458-1511).

The Čishtiyya order was organized in Mālwa by the following three disciples of Shaykh Niẓām al-Dīn Awliyā': Shaykh Wadjīh al-Dīn Yūsuf, Shaykh Kamāl al-Dīn and Mawlānā Mughīth al-Dīn. Wadjīh al-Dīn settled at Čanderī, Shaykh Kamāl-al-Dīn and Mawlānā Mughīth settled in Mandū.

Very little is known about the founder the Ṣābiriyya branch, which came into prominence in the 9th/15th century when Shaykh Aḥmad ʿAbd al-Ḥaḳḳ set up a great mystic centre at Rudawli. The main centres of this branch of the Čishtī *silsila* were Kalyar (near Roorkee in the Saharanpur district of U.P.), Panīpat, Rudawli (38 miles from Bārā Bankī in Awadh), Gangu (23 miles u.c. of Saharanpur, in U.P.), Thanesar (near Panīpat), Djhandjhānā (in Muẓaffarnagar district, U.P.) Allāhābād, Amroha (in the Murādābād district of U.P.) Deoband (in Saharanpur district, U.P.); Thāna Bhawan (in Muẓaffarnagar district, U.P.) and Nānawta (in Saharanpur district). Shaykh ʿAbd al-Ḳuddus was the greatest figure of the Ṣābiriyya branch. He left Rudawli in 1491, at the suggestion of the famous Afghān noble, ʿUmar Khān, and settled at Shāhābād, near Dihlī. In 1526, when Bābur sacked Shāhābād, he went to Gangū and settled there. His epistolary collection, *Maktūbāt-i Ḳuddūsī*, contains letters addressed to Sikandar Lōdī (1488-1517), Bābur (1526-1530) Humāyūn (1530-1556) and a number of Afghān and Mughal nobles. The relations of the Ṣābiriyya saints with the Mughal emperors were not always very cordial. Akbar (1556-1605) no doubt paid a visit to Shaykh Djalāl al-Dīn Fārūḳī at Thanesar, but Djahāngīr (1605-1627) became hostile towards his disciple, Shaykh Niẓām al-Dīn Fārūḳī, because he had met the rebel prince, Khusraw, when he was passing through Thanesar. Djahāngīr forced him to leave India. Darā Shukoh had great respect for and carried on correspondence with Shaykh Muḥibb Allāh, but Awrangzīb was very critical of his religious views. Shāh ʿAbd al-Raḥīm joined the movement of Sayyid Aḥmad Shahīd and died fighting at Balākot in 1830. Hādjī Imdād Allāh migrated from India in 1857 and settled at Mecca. He attracted a very large number of externalist scholars to his mystic fold. Many of the outstanding Indo-Muslim

(iv) REVIVAL OF THE NIẒĀMIYYA BRANCH:

Shāh Kalīm Allāh Djahānābādī (d. 1142/1729) (Dihlī)
- Shāh Niẓām al-Dīn (d.1142/1729) (Awrangābād)
  - Shāh Fakhr al-Dīn (d. 1199/1784) (Dihlī)
    - Nūr Muḥammad (d. 1205/1790) (Mahārān, in Bahawalpur)
      - Muḥammad ʿĀḳil (d. 1229/1813) (Čačrān, Pandjāb)
        - Gul Muḥammad Aḥmadpuri (d. 1243/1827) (author of *Takmilah-i Siyar al-Awliyā'*)
      - Ḥāfiẓ Djamāl (d. 1226/1811) (Multān)
        - Khudā Bakhsh (Multān)
          - Allāh Bakhsh (d. 1901) (Taunsa)
            - Ḥāfiẓ Mūsā (d. 1906) (Taunsa)
          - Shams al-Dīn (d. 1300/1882) (Siyāl, Pandjāb)

          - Muḥammad ʿAlī (d. 1266/1849) (Khayrābād, U.P.)
          - Hādjī Nadjm al-Din (d. 1287/1870) (Fatḥpur, near Djhundjhunu, Rādjputāna)
            - Ḥakīm Muḥammad Ḥasan (d. 1904) (Amroha)
      - Shāh Muḥammad Sulaymān (d. 1267/1850) (Taunsa, near Dera Ghazī Khan)
    - Shāh Niyāz Aḥmad (d. 1250/1834) (Bareilly)
      - Sayyid Niẓām al-Dīn (Bareilly)
        - Shāh Muḥyī al-Dīn (Bareilly)

ʿulamāʾ of the post-1857 period, like Mawlānā Rashīd Aḥmad Muḥaddith of Gangu, Mawlānā Muḥammad Ḳāsim Nanawtawī, Mawlānā Ashraf ʿAlī Thānawī, Mawlānā Maḥmūd al-Ḥasan Deobandī, Sayyid Sulaymān Nadawī, Mawlānā Ḥusayn Aḥmad Madanī, Mawlānā Khalīl Aḥmad, Mawlānā Muḥammad Ilyās Kandhlawī, Mawlānā Aḥmad Ḥasan Muḥaddith Amrohwī, may be counted amongst his spiritual descendants. Almost all the great *ʿulamāʾ* of Deoband [*q.v.*] are spiritually associated with the Čishtiyya *silsila* through him.

The Niẓāmiyya branch of the Čishtiyya *silsila* was revitalised by Shāh Kalīm Allāh Djahānābādī. He belonged to that famous family of architects which had built the Tādj Maḥall of Agra and the Djāmiʿ Masdjid of Dihlī, but he dedicated himself to spiritual work and infused new life into the almost defunct Čishtī organization. After Shaykh Naṣīr al-Dīn Čirāgh, he was the greatest Čishtī saint who revived the old traditions and strove to build up a central organization of the *silsila*. His disciples spread in the distant south also. His chief *khalīfa*, Shaykh Niẓām al-Dīn, worked in Awrangābād. The latter's son, Shāh Fakhr al-Dīn, came to Dihlī and set up a mystic centre there. It was through his two *khalīfas*, Shāh Nūr Muḥammad of Mahārān and Shāh Niyāz Aḥmad of Bareilly, that the *silsila* spread in the Pandjāb, N.W. Frontier, and U.P. Shāh Nūr Muḥammad's disciples set up *khānaḳāhs* at the following places in the Pandjāb: Taunsa, Čačrān, Kōt Mithan, Aḥmadpur, Multān, Siyāl, Gulra, and Djalālpur. Shāh Niyāz Aḥmad worked mainly in Dihlī and U.P.

B: Ideology

The early Čishtī mystics of India had adopted the *ʿAwārif al-Maʿārif* of Shaykh Shihāb al-Dīn Suhrawardī as their chief guide book. On it was based the organisation of their *khānaḳāhs*, and the elder saints taught it to their disciples. The *Kashf al-Maḥdjūb* of Hudjwīrī was also a very popular work and Shaykh Niẓām al-Dīn Awliyāʾ used to say: "For one who has no spiritual guide, the *Kashf al-Maḥdjūb* is enough". Apart from these two works, the *malfūẓāt* (conversations) of Shaykh Niẓām al-Dīn Awliyāʾ, Shaykh Naṣīr al-Dīn Čirāgh, Shaykh Burhān al-Dīn Gharīb and Sayyid Muḥammad Gīsū-Darāz give a fairly accurate idea of the Čishtī mystic ideology. (i) The cornerstone of Čishtī ideology was the concept of *waḥdat al-wudjūd* (Unity of Being). It supplied the motive force to their mystic mission and determined their social outlook. The early Čishtī saints, however, did not write anything about *waḥdat al-wudjūd*. Masʿūd Bakk's *Mirʾāt al-ʿĀrifīn* and his *dīwān*, *Nūr al-ʿAyn*, gave currency to these ideas and his works became a popular study in the Čishtī *khānaḳāhs*. Later on, Shaykh ʿAbd al-Ḳuddūs wrote a commentary on Ibn al-ʿArabī's books and he was followed by Shaykh Niẓām al-Dīn Thānesarī, who wrote two commentaries on ʿIrāḳī's *Lamaʿāt*. One of his *khalīfas*, Shaykh ʿAbd al-Kārim Lāhurī, wrote a Persian commentary on the *Fuṣūṣ al-Ḥikam*. Shaykh Muḥibb Allāh of Allāhābād was a very powerful exponent of the ideology of *waḥdāt al-wudjūd*. Awrangzīb, who was more influenced by the school of Shaykh Aḥmad Sirhindī, ordered his books to be burnt. (ii) The Čishtīs looked down upon possession of private property as a negation of faith in God. They rejected all worldly goods and material attractions (*tark-i dunyā*) and lived on *futūḥ*, which were not demanded as charity. (iii) They believed in pacifism and non-violence and considered retaliation and revenge as laws of the animal world. They lived and worked for a healthy social order—free from all dissensions and discriminations. (iv) In no form was contact with the state permitted. "There are two abuses among the mystics", says an early Čishtī mystic, "*djirrat* and *muḳallid*. *Muḳallid* is one who has no master; *djirrat* is one who visits kings and their courts and asks people for money". (v) The *summum bonum* of a mystic's life, according to Čishtīs, is to live for the Lord alone. He should neither hope for Heaven nor fear Hell. Man's Love towards God may be of three kinds: (a) *maḥabbat-i Islāmī*, *i.e.*, love which a new convert to Islam develops with God on account of his conversion to the new faith; (b) *maḥabbat-i muwahhibī*, *i.e.*, love which a man develops as a result of his 'effort' in the way of following the Prophet; and (c) *maḥabbat-i khāṣṣ*, *i.e.*, love which is the result of cosmic emotion. A mystic should develop the last one. (vi) The Čishtī mystics did not demand formal conversion to Islam as a pre-requisite to initiation in mystic discipline. Formal conversion, they said, should not precede but follow a change in emotional life. The Čishtī attitude contrasted sharply with the Suhrawardī principles in this respect.

C: Practices

The following practices were adopted by the Čishtīs in order to harness all feelings and emotions in establishing communion with Allāh: (i) *Dhikr-i Djahr*, reciting the names of Allāh loudly, sitting in the prescribed posture at prescribed times; (ii) *Dhikr-i Khafī*, reciting the names of Allāh silently; (iii) *Pās-i Anfās*, regulating the breath; (iv) *Murāḳāba*, absorption in mystic contemplation; (v) *Čilla*, forty days of spiritual confinement in a lonely corner or cell for prayer and contemplation. The efficacy of audition parties (*samāʿ*) in attuning a mystic's heart to the Infinite and the Eternal was also emphasised. Some Čishtī mystics believed in *Čilla-i maʿkūs* ("inverted *Čilla*") also. One who practised it tied a rope to his feet and had his body lowered into a well, and offered prayers in this posture for forty nights.

D. Literature

The literature of the *silsila* may be considered under five heads: (a) *malfūẓāt* (conversations) of the saints, (b) *maktūbāt* (letters) of the saints (c) works on mystic ideology and practices, (d) biographical accounts of saints and (e) poetical works. Only major and representative works have been indicated here.

(a) Malfūẓāt: The *malfūẓ* literature of the Čishtī saints throws valuable light on their thought and activities. The art of *malfūẓ*-writing was introduced in India by Amīr Ḥasan Sidjzī, who compiled the conversations of Shaykh Niẓām al-Dīn Awliyāʾ in his *Fawāʾid al-Fuʾād*, Nawal Kishore 1302. Other important collections of *malfūẓāt* are the following: *Khayr al-Madjālis*, conversations of Shaykh Naṣīr al-Dīn Čirāgh, compiled by Ḥamīd Ḳalandar (ed. K. A. Niẓāmī, Aligarh); *Surūr al-Ṣudūr*, conversations of Shaykh Ḥamīd al-Dīn Ṣūfī, compiled by his grandson (MSS Ḥabībgandj and personal collection; see *Proceedings of the Indian History Congress*, Nagpur Session, 1950, 167-169); *Aḥsan al-Aḳwāl*, conversations of Shaykh Burhān al-Dīn Gharīb, compiled by Mawlānā Ḥammād Kāshānī (MS personal collection, see *J.Pak.H.S.*, vol. iii Part I, 40-41). *Djawāmiʿ al-Kalām*, con-

versations of Gīsū-Darāz, compiled by Sayyid Muḥammad Akbar Ḥusaynī (Uthmāngandj); *Anwār al-ʿUyun*, conversations of Shaykh Aḥmad ʿAbd al-Ḥakk (compiled by Shaykh ʿAbd al-Kuddūs), Aligarh 1905. *Laṭāʾif-i Kuddūsī*, conversations of Shaykh ʿAbd al-Kuddūs by Rukn al-Dīn, Delhi 1311; *Fakhr al-Ṭālibīn* (conversations of Shāh Fakhr al-Dīn, compiled by Rukn al-Dīn Fakhrī), Delhi 1315; *Nāfaʿ al-Sālikīn*, conversations of Shāh Sulaymān of Taunsa, by Imām al-Dīn, Lahore 1285. The following collections of the conversations of the Čishtī saints, *Anīs al-Arwāḥ*, *Dalīl al-ʿĀrifīn*, *Fawāʾid al-Salikīn*, *Asrār al-Awliyāʾ*, *Rāḥat al-Kulūb*, *Rāḥat al-Muḥibbīn*, *Miftāḥ al-ʿĀshiḳīn*, *Afḍal al-Fawāʾid*, are apocryphal, but are useful in so far as they represent the popular interpretation of Čishtī ideology.

(b) Maktūbāt: *Ṣaḥāʾif al-Sulūk*, letters of Aḥmad Fakīr, Djhadjdjar; *Bahr al-Maʿānī*, letters of Sayyid Djaʿfar Makkī, Murādābād 1889; *Maktūbāt-i Ashrafī*, letters of Sayyid Ashraf Djahāngīr Simnānī (MS Aligarh); *Maktūbāt* of Sayyid Nūr Kuṭb-i ʿĀlam (MS Aligarh); *Maktūbāt-i Kuddūsī* of Shaykh ʿAbd al-Kuddūs (Delhi); *Maktūbāt-i Kalīmī* of Shāh Kalīm Allāh Djahānabādī, Delhi 1301. Copies of some letters said to have been addressed by Khwādja Muʿīn al-Dīn to Khwādja Kuṭb al-Dīn are also available, but their authenticity has not been established.

(c) Works on mystic ideology and practices: The two earliest Čishtī works on mystic ideology are in the form of aphorisms—the *Mulhamāt* of Shaykh Djamāl al-Dīn Hānswī, Alwar 1306, and *Mukh al-Maʿanī* of Amīr Ḥasan Sidjzī (MS Muslim University Library, Aligarh). The *Uṣūl al-Samāʿ* of Fakhr al-Dīn Zarradī, Djhadjdjar 1311, contains an exposition of Čishtī attitude towards music parties. Amongst other Čishtī works, the following may be particularly noted: Rukn al-Dīn ʿImād, *Shamāʾil-i Ankiyya* (MS As. Soc. of Bengal); ʿAbd al-Kuddūs, *Gharāʾib al-Fuʾād* (Muslim Press, Djhadjdjar); Niẓām al-Dīn Balkhī, *Riyāḍ al-Kuds*, Bidjnor 1887; Shāh Kalīm Allāh, *Murakka-i Kalīmī*, Delhi 1308; *Siwa al-Sabīl* (MS Rampur); Niẓām al-Dīn Awrangābādī, *Niẓām al-Kulūb* (Delhi 1309); Fakhr al-Dīn Dihlawī, *Niẓām al-Akāʾid* (Urdu trans., Delhi 1312); *Risāla ʿAyn al-Yakīn*, Delhi.

(d) Biographical works: The earliest biographical account of the Čishtī saints of the first cycle is found in Mīr Khurd's *Siyar al-Awliyāʾ* compiled in the 8th/14th century. Late in the 19th century, Khwādja Gul Muḥammad Aḥmadpurī wrote a *Takmila* to the *Siyar al-Awliyāʾ*, Delhi 1312. Other important biographical works include, Djamālī, *Siyar al-ʿĀrifīn*, Delhi 1311; Niẓām al-Dīn Yamanī, *Laṭāʾif-i Ashrafī*, Delhi 1395; Tādj al-Dīn, *Risāla Ḥāl Khānawāda-i Čisht* (MS personal collection); Bahā *alias* Rādjā, *Risala Aḥwāl Pīrān-i Čisht* (MS personal collection); ʿAlī Asghar Čishtī, *Djawāhir-i Farīdī*, Lahore 1301; ʿAbd al-Rahmān, *Mirʾāt al-Asrār* (MSS, Storey 1005); Allāh Ḍiyāʾ, *Siyar al-Aḳṭāb*, Lucknow 1881; Muʿīn al-Dīn, *Maʿāridj al-Wilāyat* (MS personal collection); ʿAlāʾ al-Dīn Barnawī, *Čishtiyya-i Bihishtiyya* (MSS., Storey 1008); Akram Baraswi, *Iḳtibās al-Anwār*, Lahore 1895; Muḥammad Bulāk, *Maṭlūb al-Ṭālibīn* (MSS, Storey 1014), *Rawḍa al-Aḳṭāb*, Delhi 1304; Mīr Shihāb al-Dīn Niẓām, *Manāḳib-i Fakhriyya*, Delhi 1315; Raḥīm Bakhsh, *Shadjarat al-Anwār* MS, personal collection); Muḥammad Ḥusayn, *Anwār al-ʿĀrifīn*, Lucknow 1876; Nadjm al-Dīn, *Manāḳib al-Maḥbūbayn*, Lucknow 1876; Ghulām Muḥammad Khān, *Manāḳib-i Sulaymānī*, Delhi 1871; Aḥmad Akhtar Mīrzā, *Manāḳib-i Farīdī*, Delhi 1314; Hādī ʿAlī Khān, *Manāḳib-i Ḥāfiziyya*, Kanpur 1305; Nithār ʿAlī, *Khawāriḳ-i Hādwiyya*, Delhi 1927.

(e) Poetical works: The *dīwāns* attributed to Khwādja Muʿīn al-Dīn and Khwādja Kuṭb al-Dīn Bakhtiyār are apocryphal. The *Surūr al-Ṣudūr* says that Shaykh Ḥamīd al-Dīn had left poetic compositions in Arabic, Persian and Hindwī. Only a few couplets are now available. The earliest poetical work of an Indian Čishtī mystic is the *Dīwān-i Djamāl al-Dīn Hānswī*, Delhi 1889. Amīr Khusraw, though associated with the Čishtī order, did not produce any work exclusively on mysticism, but some of his poems contain verses which throw light on mystic tendencies of the period. Masʿūd Bakk's *Dīwān*, Yūsuf Gadā's *Tuḥfat al-Naṣāʾiḥ*, Lahore 1283, and Shāh Niyāz Aḥmad's *Dīwān-i Bāy Niyāz*, Agra 1348, are steeped in Čishtī ideology.

(K. A. NIZAMI)

ČITR [see GHĀSHIYA]

ČIWI-ZĀDE, Ottoman family of scholars, two of whom held the office of *Shaykh al-Islām* in the 10th/16th century; they take their name from the *mudarris* Čiwi Ilyās of Menteshe (d. 900/1494-5).

1. Muḥyi al-Dīn Shaykh Muḥammad ('Kodja Čiwizāde'), the son of Čiwi Ilyās, b. 896/1490-1, was appointed *Kāḍī* of Cairo in 934/1527-8, *Kāḍī ʿasker* of Anadolu in 944, and *Shaykh al-Islām* (on the death of Saʿdī Ef.) in Shawwāl 945/Feb. 1539. He was dismissed (the first *Shaykh al-Islām* not to hold office for life) in Radjab 948 (?or 949), on the pretext that he had given an unsound *fatwā* (Luṭfī Pasha, *Taʾrīkh*, 390): the real reason was probably his hostility to *taṣawwuf* (*Shakāʾiḳ* [Medjdī], 446, and cf. Ḥ. Kh. [Flügel], iv, 429). In 952/1545 he replaced Abu 'l-Suʿūd, now *Shaykh al-Islām*, as *Kāḍīʿasker* of Rumeli, in which office he died (Shaʿbān 954/ Sept. 1547).

His brother ʿAbdī Čelebi, who trained the young Ferīdūn [*q.v.*], was *Bash-Defterdār* from 954/1547 (cf. L. Forrer, *Rustem Pascha*, 145) until his death in 960, and his son-in-law Ḥāmid Ef. was *Shaykh al-Islām* from 982/1574 to 985.

2. Muḥammad, son of the above, b. 937/1531, was successively *Kāḍī* of Damascus (977/1569), Cairo, Bursa, Edirne and Istanbul, then *Kāḍī ʿasker* of Anadolu (983/1575) and of Rumeli (985), in which posts he won a great reputation for uprightness. Having incurred the enmity of Sokollu Meḥemmed Pasha, he was dismissed, but in 989/1581 he was re-appointed to Rumeli; he became *Shaykh al-Islām* in the same year, and died in office (28 Djum. I 995/6 May 1587).

His son Muḥammad Ef. (d. 1061/1651) and his grandson ʿAṭāʾullāh Ef. (d. 1138/1725) both rose to be *Ḳāḍīʿasker*.

Works: Besides the recorded works of Muḥyi al-Dīn (Ḥ. Kh. [Flügel] nos. 5990, 8721 [*fetwās*, = *GAL* II², 569, to which add MS. Esad Ef. 958] and 11585; *GAL* S II 642, S III 1304) and Muḥammad (Ḥ. Kh. nos. 774 [MS. Nur-iʿ Osm. 2061, which is now lost] and 8805 [MSS. Nur-iʿ Osm. 1959, Ist. Un. Lib. AY 610/3]; *GAL* II² 573 [where the Nur-iʿ Osm. reference should read 2060]), there are in the various collections in the Süleymaniye Library of Istanbul several *risālas*, attributed simply to 'Çivizade'.

Bibliography: The main sources are, for Muḥyi al-Dīn, *Shaḳaʾiḳ* [Medjdī], 446; for Muḥammad, ʿAṭāʾī's *dhayl* to the *Shaḳāʾiḳ*, 292; and for both, Taḳī al-Dīn al-Tamīmī, *al-Ṭabaḳāt al-saniyya fī tarādjim al-Ḥanafiyya* (in MS.). Further references in *IA*, s.v. Çivizāde [M. Cavid Baysun]; detailed biographies of these and other members of the family in the unpublished thesis *Çivizade ailesi* by Şerafettin Tunçay (Istanbul Univ. Lib., Tez 1872). (V. L. Ménage)

CLAN [see ĀL]

COFFEE [see ḲAHWA]

COIMBRA [see ḲULUMRIYA]

ČOKA [see ḲUMĀSH]

ČOKA ADASÏ, the Turkish name for Kythera (Cerigo), one of the Ionian islands. In early Ottoman times possession was disputed or shared between the Venetian state and the Venieri. Čoka Adasï was an important post for watching shipping, especially after the loss of the Morea, and was often attacked. In 943-4/1537 the Turks carried off 7000 captives; many survivors fled to the Morea. Čoka Adasï was again raided in 1571 and 1572, when an indecisive naval battle took place there. It was taken by the Turks in 1127/1715 but restored at the Peace of Passarovitz. It now became the easternmost Venetian colony and lost all importance, though it was again raided in the war of 1787-92.

Bibliography: V. Lamansky, *Secrets d'état de Venise*, St. Pétersbourg 1884, 641-2, 660-70; C. Sathas, Μνημεῖα, vi, 1885, 286-311; allusions in many travellers and chroniclers, especially Ḥādjdjī Khalīfa, *Tuḥfat al-Kibār*. (C. F. Beckingham)

ČÖLEMERIK (old form, Djūlāmerg or Djulamerik), a small town in eastern Anatolia, in the extreme south-east of the present-day region of Turkey, 37° 45′ N, 43° 48′ E, altitude 5,413 ft. (1650 m.), surrounded by mountains of over 9,840 ft. (3000 m.), about 3 km. from the Great Zab, a tributary of the Tigris. It is the capital of the *wilāyet* of Hakkâri; in the 19th century it was the capital of a *sandjaḳ* of the same name, in the *wilāyet* of Van, formerly belonging to the *ḥukūmet* of Ḥakkārī (Kātib Čelebi, *Djihānnümā*, 419). The place was destroyed in the First World War, but rebuilt again in 1935. At the census of 1950 it numbered 2,664 inhabitants (the *ḳaḍāʾ* had 14,473 inhabitants). There are hot sulphur springs nearby.

Andreas assumes (cf. Pauly-Wissowa, i, 1699; see also M. Hartmann, *Bohtān*, in *Mitteilungen der Vorderasiatischen Gesellschaft* 1896, 143) that Čölemerik is identical with the τὸ χλωμάρων of antiquity. This view is opposed by Marquart (*Ērānshahr*, 158 f.). The place Čölemerik has lent its name to a branch of the Kurds, the Djūlamerkiye; concerning these cf. Ibn Faḍlallāh al-ʿUmarī (*Notices et Extraits* xiii, 317 ff.).

COLOMB-BÉCHAR, chief town of the department of the Saoura (Organisation Commune des Régions Sahariennes), created by a decree of 7 August 1957.

This town is quite recent; before the French occupation, which dates from 13 November 1903, a few villages, with no historical importance, had been built unevenly along the banks of the Oued Bechar (Wādī Bashshār), which sustained a scanty group of palms. From 1857 the region had been explored by Captain de Colomb, whose name has been used for the new town; to this has been joined the name Bechar which, according to local tradition, derives from the fact that a Muslim sent to explore the region by a Turkish sultan (?) of the 15th century, brought back a flask of clear water; hence the epithet, taken from the root *b . sh . r* (to bring good news), which would be given to him and to the region from which he came.

The French occupation, following on Franco-Moroccan talks, was designed to protect southern Oran against incursions of Berber tribes from Tafilalt and neighbouring regions. At first a military post, Colomb-Béchar became in 1905 the terminal of a railway line from Oran Tell, and an important caravan centre, then in 1919 the main town of a mixed commune and in 1930 the main town of the territory of Ain Sefra (ʿAyn Ṣafrāʾ) (territories of southern Algeria). At the time of the Second World War, the coal mines which had been discovered in 1917 in the neighbourhood of the town were fully exploited, from 1941; at the same time the decision was made to build the railway from the Mediterranean to the Niger, which gave a new stimulus to the town. Since the war the output from the surrounding coal basin has remained at roughly 300,000 tons a year; in 1956 plans were made to build a thermo-electric power station, and important mineral deposits were discovered in the region. Finally the French government has installed at Colomb-Béchar and in the surrounding district an important practice centre for guided missiles. The result of this is that the population has risen from 750 inhabitants in 1906, to more than 16,500 in 1954, 3,350 of whom are Europeans (according to the census of 1954).

CONGO, River and Country in Africa. The river forms the sole outlet of the great Central African basin, which is limited on the east by the western flanks of the Great Rift, on the north by the Monga mountains, on the west by the Cristal range, and on the south by the Lunda plateau. Since its tributaries drain areas both to the north and to the south of the Equator, the Congo maintains a relatively constant flow. Its waterways are broken here and there by cataracts, especially between Stanley Pool and the sea, but they nevertheless provide long navigable stretches which have permitted a certain amount of movement, both of people and of trade, through an otherwise impenetrable forest region. In the recesses of the great forests Africa's most primitive people, the pygmies, have maintained to this day a distinctive way of life based mainly on hunting and gathering. Along or near the rivers, and nowadays increasingly along the roads which are beginning to traverse the forest region, live negroid tribes, most of whom speak languages of the Bantu family, and all of whom use iron tools and are to some degree cultivators as well as hunters and fishermen. Doubtless on account of their relative inaccessibility, the forest tribes have in general remained the most backward of the Bantu peoples.

It is only the central part of the Congo basin, however, which is densely forested. The higher country all round its periphery is mostly covered with the light forest known as "orchard bush", in which grain crops can be grown by the simple, "slash and burn" system of shifting cultivation. In the east and in the west there are even considerable stretches of open savannah grasslands suitable for cattle-raising. Above all, these peripheral regions have been relatively open to the influences of migration and conquest, and it is consequently in these regions that the indigenous peoples have achieved their most significant political groupings. To the north of the forest on the Nile-Congo watershed the multiple states of the Zande are the result of seventeenth and eighteenth century colonization and conquest from the southern fringes of the Sudan. To the east of the forest, in the highlands of the Western Rift, the Kingdoms of Ruanda and Urundi and their related states are the creation of conquering immigrants from the Nilotic Sudan or South-West Ethiopia, who appear to have been in the area since the fourteenth or fifteenth centuries. To the west of the forest, in the highlands of light bush and open savannah separating the Congo basin from the Atlantic seaboard, the important kingdom of the Bakongo, with which the Portuguese entered into relations towards the end of the fifteenth century, and which then extended its influence in some sense from the Gaboon to Angola, had been built by another immigrant minority, stemming perhaps from the direction of Lake Chad. The Congo kingdom had many southward offshoots, among them certainly the kingdom of the Bakuba on the upper Kasai. The Luba-Lunda states of the Congo-Zambezi watershed, were equally founded by immigrants, but whether these came from the west or the east of the forest is not yet established.

The ideas diffused into western Bantu Africa by these movements were essentially remnants from the ancient world of the Nile Valley. They came from the still unislamized southern fringes of the Sudan. Meanwhile, for nearly four hundred years, from the late fifteenth century to the mid-nineteenth, European influences played remotely on a Congo basin whose inhabitants were still solidly pagan and animist. The dominant European interest in the region was the slave-trade, which soon undermined and killed off the early attempts at Christian evangelization. Portuguese mulatto traders, called *pombeiros*, operating from Loanda and other ports in Angola during the seventeenth and eighteenth centuries, penetrated deeply into the southern periphery of the Congo basin, and it is likely that in the copper-bearing region of the Katanga they occasionally encountered traders from the Swahili ports on the East African coast, who were probably no more seriously Muslims than the *pombeiros* were Christian. The indications are, indeed, that such early long-distance trade as there was in eastern Bantu Africa before the nineteenth century was conducted more by Africans from such interior tribes as the Nyamwezi and the Bisa than by coastmen whether Arab or Swahili.

It was not, therefore, until the nineteenth century, with the penetration of the southern Sudan by slave and ivory traders from Egypt, and still more with the penetration of East Africa by subjects of the Būsaʿīdī dynasty of Zanzibar, that Muslims began in any numbers to reach the borders of the Congo basin. The Arab settlement at Ujiji, from which dhows crossed to the Congolese shore of the Tanganyika Lake, was founded within a few years of 1840. It was from then until the partition and occupation of tropical Africa by the European powers in the late 'eighties and early' nineties of the century that the serious commercial exploitation of the eastern and central parts of the Congo Basin by Muslim Arabs and Swahili mainly took place. The foundation by King Leopold II of the Belgians of the Congo Independent State resulted in the suppression of the slave-trade and in the elimination of the Arab and Swahili war-lords whose activities had been so vividly described by Livingstone, Stanley and other explorers. But many of the Arabs and their East African followers settled permanently in the Congo under its new colonial administration, and, as in so many other parts of Africa, the transition from freebooting exploitation to a more settled form of petty commerce marked an intensification of religious proselytism.

The great majority of the Congo Muslims, who number to-day about 200,000, are S̲h̲āfiʿīs and belong to the Ḳādirī *ṭariḳa*. There are a few hundred K̲h̲od̲j̲as [*q.v.*], mainly in Ruanda-Urundi and in the eastern part of the Kivu Province, also in Stanleyville and Kasongo; they are active in trade, and are well-organized and well instructed. The Aḥmadiyya [*q.v.*] number only a few dozens, but are active in propaganda by distributing books and literature.

In the Eastern Province, the Kivu Province and Ruanda-Urundi there are at least 175 recognized mosques. There are Ḳurʾānic schools at Rumungwe, Lake Nyanza, Stanleyville, Ponthierville, Kirundu and Kindu. The great centre of attraction, however, is Ujiji, where there is an important *madrasa*, attended by young people who desire a little instruction in Arabic.

Islamized villages have a mosque, a brotherhood banner (drapeau de confrérie), a *muʿallimu* and an *imām*. Unlike the Zanzibaris, the Muslims of the eastern Congo are not well instructed. There are some who read al-Damīrī or al-Suyutī. But in general their reading matter is limited to popular devotional books of the Ḳādiriyya. The initiation to the *Ṭariḳa*, in the form known as *murīdī*, which is widespread in Sénégal too, is also highly esteemed

by the negro, who finds membership both dignified and authoritative. The mosques which are specially designed are of the Zanzibar type, but the majority are nothing more than large huts. Only a few educated people know any Arabic. The *lingua franca* is Kiswahilī, the Bantu language showing some Arabic influence, which is spoken as a mother tongue by the people of the Zanzibar coast. The negro Muslims who have started to enter the western Congo from the North, from the Middle Congo Republic and Chad, sometimes have a much higher cultural standard. Many of them are merchants, who sell books of devotion and talismans inscribed in Arabic. The Muslim customary courts are becoming increasingly subject to a Shafiʿī version of the *sharīʿa*.

The limited cultural level to which black Muslims attain, leaves them with too little Arabic and even with too little Swahili to understand the Islamic propaganda broadcast by radio. Among the books currently in favour one finds, besides the Ḳurʾān, the *Miʿrādj* of al-Dardīr, a work by a Zanzibar Shaykh called Ḥasan b. Amīr al-Shīrāzī; *al-ʿIḳd al-iḳyān ʿalā Mawlid al-Djīlānī*; the *Kitāb Dalāʾil al-Khayrāt*, enriched with numerous accessory texts such as the *Ḥizb al-Barr*, the *Ḥizb al-Baḥr*, the *Ḥizb al-Naṣr* of al-Shādhilī, etc. To this should be added the full or partial Swahili translation of the Ḳurʾān, published by the Aḥmadiyya Society of Lahore, the sūrat Yāsīn in Swahili, a treatise on *Mirathi* (inheritance) by Shayikh al-Shīrāzī, and a very popular treatise on prayer called "Sula na Manrisho Yake".

CONSTANTINE [see ḳusṭanṭīna]

CONSTANTINOPLE [see istanbul]

CONSTANTINUS AFRICANUS (Constantine the African), who first introduced Arab medicine into Europe, was born in Tunis in the early 5th/11th century (1010 or 1015 A.D.), and died at Monte Cassino in 1087.

His arrival in Salerno marked the beginning of what historians have labelled the 'golden age' of its famous medical school. But about the life of the man himself singularly little is known, and the details can only be sketched in conjecturally.

Various facts relating to him are to be found in the works of Petrus Diaconus who entered Monte Cassino in 509/1115, less than 30 years after Constantine's death. But they were adapted to suit the purposes of a story rather than set down objectively for their own sake. Like most other science historians, Petrus Diaconus traces Constantine's place of birth to Carthage (he probably means Tunis). By the age of 39 or 40, after many adventures, he had found his way to Italy. Petrus asserts that beforehand he had travelled to Egypt, Baghdād, India and Ethiopia, learning on the way Hebrew, Syriac, Chaldean, Greek, Ethiopian and even 'Indian'. His great talents roused such jealousy upon his return to Tunisia that, in order to avoid any harmful consequences, he left the country for Sicily. Karl Sudhoff is at variance with Petrus, and maintains that he journeyed to Italy as a merchant. It is there that he is said to have become acquainted with the reigning prince's brother, who was a doctor. His experiences made him realise the poverty of medical literature in Latin, and he returned to study medicine for three years in Tunisia; then, having collected together several treatises on Arab medicine, he departed, with his precious treasure, for southern Italy. The ship ran into a storm off the coast of Lucania, outside the gulf of Policastro, and the manuscripts were badly damaged. Constantine managed to salvage some of them, and when he arrived in Salerno he became a Christian convert.

It is not yet possible to establish the exact date of these events. But it is certain that he translated into Latin the best works on Arab medicine which had appeared up to the 5th/11th century, albeit omitting to acknowledge the names of their authors and thus earning the reputation of a plagiarist. He adapted the writings to the conditions of his new homeland, Italy. Many passages which he considered prolix were condensed, and other parts where the meaning remained obscure were simply translated literally. Nevertheless, Constantine's work infused new life into the medical school of Salerno, and indeed into the teaching of medicine in Europe for centuries to come. The most important translations are: (i) works of Greek origin which had been translated into Arabic, especially by Ḥunayn b. Isḥāḳ and his followers: maxims, prognoses and diet in the severe illnesses of Hippocrates, together with

notes by Galen, the Great Therapeutics of Galen (*megatechne*) and the Small Therapeutics to Glaucon (*microtechne*), and pseudo-Galenian works; Ḥunayn b. Isḥāḳ's edition of Galen's introduction to therapeutics, with notes by ʿAlī b. Riḍwān (an Egyptian doctor of the 5th/11th century) (ii) works by Arab authors: the Oculistics (*al-ʿas͟hr maḳālāt fi 'l-ʿayn* of Ḥunayn b. Isḥāḳ (*Constantini liber de oculis*); the works of Isḥāḳ b. Sulaymān al-Isrāʾīlī (about 286/900) on the elements, urine, fever and diet; the *Zād al-Musāfir* of Ibn al-D̲j̲azzār, translated under the title *Viaticum*; the medical encyclopaedia *Kāmil al-Ṣināʿa al-Ṭibbiyya* of ʿAlī b. al-ʿAbbās al-Mad̲j̲ūsī (Persian, 4th/10th century) translated under the title *Pantechne*; Constantine's book *De Melancholia* was originally the *Kitāb al-Malīk͟hūliyā* of Isḥāḳ b. ʿImrān (late 9th-early 10th century). Finally, Constantine translated and claimed the authorship of several less important works by al-Rāzī and others unknown by name.

The works were poorly translated into Latin and full of technical Arab expressions which had simply been transcribed. Constantine was nevertheless responsible for extending the knowledge of classical medicine as it existed in Europe at the beginning of the Middle Ages, and bringing into circulation many important Greek and Arab works.

CONSTANZA [see köstend̲j̲e]

CONSUL (Arab. *Ḳunṣul*; Pers. *Ḳunṣūl*; Turk. *Konsolos*), consuls as representatives of the interests of foreign states in Islamic countries (and similarly in Byzantium). The institution of the consul was formed in the 12th and 13th centuries in the Italian merchant republics. The Genoese put their possessions in the Crimea (see Ḳirim; since 1266), nominally subject to the K͟hān of the Golden Horde, in the charge of a consul (B. Spuler: *Die Goldene Horde*, Leipzig 1943, 392-8, with further bibl.; E. S. Zevakin and N. A. Penčko: *Očerki po istorii genuèzskik͟h koloniy* ..., ('*Sketches on the History of the Genoese Colonies*') in *Istoričeskiye Zapiski* 3, 1938, 72-129). For the most part called Bailo [see balyos] until the 15th century, these representatives of foreign states in Islamic countries (for the first time in 1238, when Venice had a representative in Egypt) were occupied above all with the protection of the merchants of their nations, the adjustment of difficulties among them, and the regulation of all questions having to do with trade.

It was only when Ottoman hegemony extended over the entire east and south coasts of the Mediterranean as well as the Balkan peninsula, that it became necessary to grant to the ambassadors of the individual powers at Constantinople consuls in other places. For the first time in 1528, France obtained the right to provide its own consul in Alexandria, recently become Ottoman. He was able in all circumstances to negotiate directly on behalf of his countrymen with the local authorities, to adjust internal difficulties and to regulate financial conditions (including questions of inheritance). He might import his personal needs free of customs, and ships despatched by him were not subject to distraint or injury. The right to maintain a consul was extended to other cities in the treaty between the Porte and France in 1535, thus granting the latter a considerable extension of its influence, especially along the Syrian-Lebanese coast as well as in Asia Minor (a consulate in Aleppo since 1557; cf. the maps of the French Consulates in 1715 in P. Masson, *Histoire du Commerce Français* ..., Paris 1896, p. xxxviii of the appendix). In 1580 England received corresponding rights. Between 1606-15 the German Emperor followed and later in the 17th century Venice, the Netherlands and Sweden. Only after the Peace of Küčük Ḳaynard̲j̲a [*q.v.*] in 1774, could Russia establish consulates (in particular in the Balkans and the Holy Land). Persia followed in 1839. All consuls, as well as ambassadors, were regarded as hostages to guarantee the behaviour of their home powers, and were repeatedly arrested and otherwise impeded.

Out of the consular rights the "Capitulations" developed, confirmed for the first time specifically in a treaty with France in 1740 (though in fact existing already in the 16th century). They conceded to the consuls extensive juridical and civil rights, and released foreign subjects more and more from local jurisdiction (for details cf. Türkiye, History). Beside these, local Honorary Consuls appeared in increasing number in the 19th century, who held certain diplomatic rights, so that this position was much sought after. From 1862 Turkey fought with growing intensity against the distortion of this

privilege, and a considerable limitation of the abuses was attained. After the gradual abrogation of the Capitulations combined with the renunciation of them by foreign states, the consuls in the Islamic world assumed the same position which they occupy internationally today.

In her own behalf Turkey first appointed consuls in foreign lands in 1802 (Turk. *Shehbender*; or, rarely at first, *Ḳonṣolos*), frequently from among Greeks and Levantines in the first decades.

ČOPAN-ATA (Turkish "Father-Shepherd"), the name of a row of hills ½ mile long on the southern bank of the Zarafshān [*q.v.*], close by the city walls of Samarḳand [*q.v.*]. There is no written evidence for this name before the 19th century; up to the 18th century, it was referred to in written sources (Persian) as Kūhak ('little mountain'), and the Zarafshān (only known as such in the written language since the 18th century) also sometimes carried this name. Under the name of Kūhak, the range is mentioned in Iṣṭakhri (*BGA* I, 318), and it contained quarries and clay pits for Samarkand.

There is an aetiological legend which gives the following explanation: "well over a thousand years before Muḥammad" there was an enemy besieging Samarḳand. The inhabitants of the town prayed fervently for deliverance, and in answer a mountain came and buried the attackers, having been transplanted from Syria, complete with a shepherd on it. Čopan-Ata is also regarded as a Muslim saint, and the shrine to him, which is on the summit of the hill, is attributed to Tīmūr (thus in al-Ḳandiyya, partly edited by W. Barthold, *Turkestan, MSS. I*, St. Petersburg 1900, 48/51).

Upon the Čopan-Ata the troops of the Khān of Bukhārā made a vain attempt to oppose the advancing Russians under general Konstatin Petrovič von Kauffmann on May 13th (new style) 1868. The latter succeeded in occupying Samarḳand the following day, and since then it has belonged to Russia.

COPTS [see ḳibṭ]

CORAN [see ḳurʾān]

ČORBADJĪ (literally: soup-provider). (1) The title applied among the Janissaries to commanders of the *ortas* and the *agha bölükleri*, though in official Ottoman terminology the commanders of the *djemāʿat ortalarī* were known as *Serpiyādegān* or (the Turkish equivalent of this Persian term) *Yayabashī*, while commanders of the *agha bölükleri* were called *Odabashī*.

As the 101 *djemāʿat ortalarī* were prior in foundation to the 61 *agha bölükleri*, the *Čorbadjīs* of the former had certain privileges over those of the latter: on frontier duty they kept the keys of the fortresses; they could ride on horseback in the presence of their superiors; they wore yellow gaiters and shoes. In the *agha bölükleri*, on the other hand, yellow gaiters and shoes were the prerogative of the *Odjaḳ Ketkhudāsī* and the *Muḥdir Agha*, the other *Čorbadjīs* wearing red.

The crested headdress generally worn on ceremonial occasions by the *Čorbadjīs* was called *ḳalafat* or *čorbadjī kečesi*. The crest of the *Yayabashīs'* *ḳalafāt* was of cranes' feathers, whereas that of *Čorbadjīs* of the *agha bölükleri* was of herons' feathers. The ordinary headdress of all *Čorbadjīs* was a red *ḳalafāt* narrow at the bottom and broad at the top. The *Čorbadjī* applied the bastinado to minor offenders among his men. His aide was known as the *Čorbadjī Yamaghī*.

Sometimes the *Čorbadjīs* were entrusted with police duties, thus performing the function of the *Subashī*. At the Čardaḳ, the customs station by the Yemish quay in Istanbul, there was a *Čardaḳ Čorbadjīsī*, who commanded the 56th Janissary *orta*, assisted the *ḳāḍī* of Istanbul who supervised the city's food-supply, and was responsible for maintaining public order in this locality.

Yayabashīs were appointed to collect the *devshirme* boys who were recruited into the *ʿAdjemī Odjaghī* from the provinces. The *Čorbadjīs* of the *ʿAdjemī Odjaghī* were under the orders of its commander, the *Istanbul Aghasī*.

(2) The title of *Čorbadjī* was also given to the village notables called *Mukhtar* and *Aḳ-ṣaḳal*, who entertained travellers. Later, until a half-century ago, it became an appellation of merchants and rich Christians. In colloquial Turkish it is still used for 'boss', 'skipper'.

CORDOVA [see ḲURṬUBA]

COREA [see AL-SĪLĀ]

CORINTH [see KORDOS]

ČORLU, town in E. Thrace, the Byzantine Τζουρουλὸς (for the various forms of the ancient name see Pauly-Wissowa, s.v. Tzurulon (E. Overhummer]); it lies on the main road and railway between Istanbul and Edirne, 155 kms. by rail from Istanbul, facing N. over the Čorlu Su, a tributary of the Ergene. The town was taken by the Ottomans early in the reign of Murās I. In Djum. I 917/Aug. 1511 Bāyezīd II defeated Prince Selīm near Čorlu, at a place called Ṣîrt-köyü by Luṭfī Pasha (*Taʾrikh*, Ist. 1341, 202).

There were extensive *waḳf*s at Čorlu for Meḥemmed II's *külliyye* at Istanbul (cf. M. Tayyib Gökbilgin, *Edirne ve Paşa Livasî*, Ist. 1952, 300 ff.). When Ewliyā Čelebi visited it in 1061/1651 (*Seyaḥat-nâme*, III, 295 ff.) it had 3000 houses, in 15 Moslem and 15 Christian *maḥalles*, and was thriving centre of trade with 18 *khāns*. It was in a rich sheep-rearing region and was renowned for its cheese. At this time it was the centre of one of the five *ḳaḍā*'s of the *sandjaḳ* of Vize (Ḥādjdji Khalfa, *Djihân-numâ* = Hammer, *Rumeli und Bosna*, Vienna 1812, 19). It was the third stage on the main road from Istanbul: in 1717 Lady Mary Wortley Montague visited a *ḳonaḳ* built here as a rest-house for the Sultan (Letter xxxv).

Čorlu is now the centre of a *kaza* of the *vilayet* of Tekirdağ, population of the town (1955) 17,025.

ČORLULU [see ʿALĪ PASHA]

COROMANDEL [see MAʾBAR]

ČORUH (Čorukh). I. River in the extreme north-east of Anatolia, flowing mainly through Turkey, but emptying into the Soviet Russian area of the Black Sea.

II. *Wilâyet* on the Black Sea, called after the river of the same name (cf. I) in the extreme north-east of Turkey. The modern *vilayet* of Čoruh covers roughly the same area as the former *sandjaḳ* of Lazistan which belonged to the *wilâyet* of Trabzon (Trebizond). Until the war between Russia and Turkey in 1878 (Treaty of San Stefano), Batum was the capital of the *sandjaḳ* of Lazistan. Subsequently, the capital of the *sandjaḳ*, or of the *wilâyet*, Lazistan became Rize. In 1935, Rize became a *vilayet* of its own, and Artvin became the capital of the remainder of the *vilayet* of Čoruh. According to the last census (1950) the *vilayet* of Čoruh had 174,511 inhabitants, and its capital Artvin had 4,547 inhabitants. Its *Ḳaḍā*'s are: Artvin, Ardanuč, Borčka, Fîndîklî, Hopa, Šavšat and Yusufeli.

ČORUM, town in the north of Central Anatolia, 40° 34′ north, 34° 55′ east, some 7 km. east of the Čorum Čay, a tributary of the Mecitözü, which in turn flows into the Čekerek Irmak, a tributary of the Yešil Irmak. It lies in a large fertile valley and is the capital of the *wilâyet* of the same name. The *wilâyet* has the following *ḳaḍā*'s: Čorum, Alaca, Iskilip, Mecitözü, Osmancîk and Sungurlu. Before the Republic, the *ḳaḍā*' of Čorum formed part of the *sandjaḳ* of Yozgat belonging to the *wilâyet* of Ankara, formerly a *sandjaḳ* (*liwa*') in the *Eyâlet* of Sîwâs (or Rûm). According to the last census (in 1950), the town had 22,835 inhabitants, the *ḳaḍā*' had 87,965, and the *wilâyet* 342,290.

Čorum has erroneously been taken to be the Tavium of antiquity. The latter has been proved to have been situated near Nefezköy, south of Sungurlu, in the *wilâyet* of Yozgat (concerning this, cf. the article on Tavium by W. Ruge in Pauly-Wissowa, iv, cols. 2524-26).

The modern Čorum shows few traces of historical interest. Its main Mosque, Ulu Djāmʿ, is a modern building (1909), but probably erected on the foundations of an older building of the 18th or 19th century. It contains a beautiful large Minbar of late Saldjūḳ times, which is said to have come from Karaḥiṣār.

The village of Elvančelebi, some 20 km. east of Čorum, belongs to the Kaza Mecitözü in the *wilâyet* of Čorum. There are the Tekye (mentioned by Kātib Čelebi, *Djihânnümâ*, 625, l. 20, as Sheykh ʿUlwān Tekyesi, and also by Ewliyā Čelebi, *Seyāḥatnâme*, ii, 410, l. 8), *turbe* and mosque of Elvan Čelebi, the son of the famous poet ʿĀshîḳ Pasha (died in 733/1333, [*q.v.*]), and descendant of Baba Ilyās, the founder of the Dervish Order of the Bābāʾiyya [see BĀBĀʾĪ]. The shrine of Elvan Čelebi used to be a much frequented place of pilgrimage. Dernschwam visited it as a member of the retinue of the Imperial Envoy Busbecq in 1555 on his way to Amasya (cf. Hans Dernschwam's *Tagebuch einer Reise nach Konstantinopel und Kleinasien* (1553/55), ed. Franz Babinger, Munich and Leipzig 1923, 201-203, with a not particularly clear plan in Dernschwam's hand); concerning Elvan Čelebi in general, cf. Neşet Köseoğlu, *Elvan Çelebi*, in the periodical *Çorumlu*, of 1944, no. 46, 1373-79; no. 47, 1405-08; no. 48, 1437-41; in no. 11 of 1939 there are pictures of the shrine of Elvan Čelebi).

In some *ḳaḍā*'s of the *wilâyet* of Čorum there are famous Hittite excavations, particularly Boğazköy (Hattušaš) in the *ḳaḍā*' of Sungurlu, and also Alaca Hüyük in the *ḳaḍā*' of Alaca.

Bibliography: S. Sāmī, *Ḳāmūs al-Aʿlām*, iii, 1886 f.; Kātib Čelebi, *Djihânnümâ*, 625; Ewliyā Čelebi, *Seyāḥat-nâme*, ii, 407-410.

COS [see ISTANKÖY]

COSTUME [see LIBĀS]

CÔTE D'IVOIRE, the usual name of the Ivory Coast, a Republic, and member of the French Community. It is situated on the coast of the Gulf of Guinea, adjoins Ghana to the east, Liberia and the Republic of Guinea to the west, and the French Sudan and the Upper Volta to the North. It extends over 519,000 square kilometres and has a population of 2,500,000, including 12,000 non-Africans.

Although the first French settlements on the coast were founded at the end of the seventeenth century, colonization dates only from the end of the nineteenth century. The Ivory Coast became a self-governing colony in 1893, then, in 1900, it became part of the Government-General of French

West Africa. In 1957 it enjoyed a semi-autonomous domestic régime within the group of territories, with its Territorial Assembly and Government Council at Abidjan. Its administrative organization is that of the rest of French West Africa: circles, subdivisions and communes. After the referendum of 1958 the Ivory Coast, with its new status of autonomous Republic, refused to federate with the new state of Mali (formed by the union of Senegal with the French Soudan), and formed with the former territories of Upper-Volta, Dahomey and Niger the Benin-Sahil Alliance.

From south to north, it covers a narrow belt of lagoons, a densely forested belt about 300 kilometres wide, and, finally, a belt of Sudan type savanna. In the south, the population belongs to the Guinean and Apollonian groups, and, in the North, to the Sudanese and Voltaic groups.

The economy is based on agriculture (coffee, timber, bananas, cocoa, oil, cotton) with a little livestock-rearing and fishing. Industrialization has hardly been tackled, although some prospecting has been undertaken with a view to mining. The chief towns are: Abidjan, the capital and port (130,000), Bouaké (25,000), Grand-Bassam, Bondoukou.

The influence of Christianity is widespread in the south, with 160,000 Catholics, 65,000 Protestants, and syncretistic sects.

The number of Muslims is about 450,000, found mainly in the north, especially among the Malinké or Mandé tribes. But at the same time Islam seems to be making rapid inroads among the animist tribes of the Savannas and among the town immigrants.

The first Islamic settlement on the Ivory Coast must go back to the thirteenth century, at the height of the Mâli ascendancy throughout the north of the country. The chief centres were Touba, Kong, Bondoukou, Odienné and Séguéla. Muslim influence seems to have receded after the collapse of the Malinké power (15th century). It had a reflux of strength during the first half of the nineteenth century, when the influence of El Hadj Omar Tall made itself felt throughout the whole of western Sudan. At the end of the century, Samory Touré lent his authority to proselytizing, and forcibly—albeit temporarily—converted a section of the Senoufo animists of the North. But, at the same time, he massacred the Malinké Muslims that resisted his conquest, and, above all, annihilated, in 1897, the kingdom of Kong which had remained the main seat of Islamic culture in the region. After the defeat of Samory, Islam fell into another temporary decline, from which it recovered fairly quickly, thanks to the sociological conjuncture that arose out of colonization.

It was spread by the influence of the *Dioula*, Malinké, or sometimes Hausa, traders, who had settled along the great trade routes and dealt chiefly in cola with the farmers from the forest region. Every year it made further progress towards the South, and eventually counted converts even among the coastal population. In addition to the traditional centres are found to-day important centres at Man, Bouaké, Gagnoa, Bouna, Daloa, Samatéguéla and Boundiala, as well as Abidjan.

The chief brotherhood is the Tidjāniyya, which forms the majority everywhere except at Man. Its adherents are divided more or less equally between the "twelve grains" who owe obedience to El Hadj Omar, and the "eleven grains" or Hamallists, followers of Shaykh Hama Allāh. Hamallism has, in addition, given rise to a new way, known as Yaʿkūbite after its founder, Yakouba Sylla, whose teaching is reminiscent of that of the Senegalese *Mourids* of Ahmadou Bamba (work of the *talibé* on behalf of the Shaykh, importance of economic activity).

The Ḳādiriyya brotherhood exists in all regions, but is as important as the Tidjāniyya only in the Man district. It is considered favourable to the interests of the Wahhābīs, whose importance has developed considerably since 1946 under the influence of rich Mecca pilgrims and of *Karomoko* (scholars) educated in Egypt or Arabia. The chief Wahhābite centre is Bouaké.

Occasional Mahdists are to be found—these seem to be under Wahhābite influence. And, on the coast, is a small Aḥmadiyya community, formed around natives of Ghana and Nigeria. Certain dissident sects of the coastal region show Christian, Muslim and animist influences.

The level of Islamic teaching has never recovered from the massacres of Samory Touré, in spite of the recent endeavours of the young Wahhābīs and of certain Hamallists.

CRUSADES. Originally applied to military and religious expeditions organized in Western Europe and intended to take back from and defend against Islam the Holy Places of Palestine and nearby Syria, the term was later extended to all wars waged against "infidels" and even to any undertaking carried out in the name of a worthy or supposedly worthy cause; naturally these extensions of meaning are not part of our present concern.

The first Crusade (1096-99), following on from expeditions against the Muslims in the West, led to the establishment around Jerusalem, Tripoli, Antioch and Edessa of four States constituting (and later including Cyprus, then the Latin Empire of Constantinople) the Latin East, which from then on until the recapture of its last citadel Acre by the Muslims in 1291 was an essential factor in the history of the Middle East. The second Crusade started by the fall of Edessa bore no concrete results; the third, started by the fall of Jerusalem, ensured the maintenance of "Frankish" possessions on the Syro-Palestinian coast; the fourth was only concerned with Constantinople, the fifth failed at Damietta in Egypt, the sixth was more of a diplomatic journey by Frederick II and brought about the temporary restitution of Jerusalem to the Franks, the seventh led by St. Louis after the loss once more of the Holy City ended in another disaster at Damietta and the eighth, which brought the same king to Tunis, ended with his death. One might add to this traditional number of Crusades other less important ones and later Crusades against the Ottomans (Nicopolis, Varna, etc.). The Crusades

in Syria-Palestine alone had a lasting effect on the history of Muslim countries, in view of the Frankish dominance in the East, uninterrupted for nearly two centuries, which was initiated by the first Crusade and maintained by those that followed.

In an encyclopaedia of Islam there can of course be no question of giving the history even of only these Crusades in its entirety; it would even be somewhat odd to speak of them at all, were it not that the Crusades when considered in terms of Islam give rise to certain problems which alone will be discussed here.

The specific character of the Crusades was not and could not be understood by Muslims. The very term, *ḥurūb al-ṣalībiyya*, used to designate them in modern Arab literature, was unknown to ancient authors, who referred to Crusaders by the plain ethnical term "Franks", and seems to have made its appearance during the Ottoman period in Christian circles of the East influenced by French culture. The theory of the Crusade, a war for the defence or liberation of oppressed co-religionists, differs from the theory of the *dj̲ihād*, a war for the expansion of Islam; but in practice almost the very reverse appears to have obtained at the time of the first Crusade, *dj̲ihād* in the majority of Muslim countries being no more than a memory and Christendom from the time of Charlemagne onwards having elaborated campaigns for the expansion of Christianity by force of arms. No doubt, in one sense the Crusades appear as a reaction, which had gradually been desired and made possible, against the humiliation of four centuries caused by the Muslim conquest of half the Mediterranean basin; but the example of Spain and Sicily proves that the Christian West did not need any deterioration in the generally reasonable treatment of Christians in Muslim countries as a spur to move onto the offensive or counter-offensive. In the East it is true that the Turkoman invasion of Asia Minor revived amongst a particular social group the tradition of Muslim Holy War in the form of *g̲h̲azwa*, bringing disaster to Byzantine Christendom; but in the old Muslim countries and particularly in Palestine the forming of the Sald̲j̲ūḳid Empire brought no fundamental change to the lot of autochthonous Christians or to the treatment of foreign pilgrims; the precise motivation of crusading, however sincere it was, could not therefore occur to the Muslim mind. Muslims obviously saw that they were dealing with Christian warriors who as such were attacking Islam, but apart from the distance from which they came they saw in them roughly the equivalent of the Byzantines whose Christian-inspired attacks and counter-attacks they had been sustaining for two centuries.

The Crusaders' conquests only affected territory which was incompletely Islamized, relatively small and quickly reduced by gradual Muslim reconquest, and even in Syria-Palestine did not reach any of the large Muslim centres. Nevertheless, the constant menace to vital sea and land routes between Muslim countries in the Middle East, the knowledge of Muslim abasement under Frankish rule, above all the repetition of Crusades, the non-assimilation of Franks into the native *milieu* and the permanence of a state of at least "cold" war finally conferred indisputable importance on the Crusades and the existence of the so-called "Latin" East in the history of Middle Eastern Islam. It would be interesting to examine more thoroughly than has hitherto been the case how Muslims, according to time and place, reacted to this phenomenom.

The Crusades found the Muslim Middle East in a state of division and dissension which alone made their initial success possible. Preceding generations had seen many examples of Islamo-Christian co-operation in Syria even against other Christians or Muslims. Although the Frankish invasion brought death or exile to many Muslims in Syria-Palestine, minor chieftains and certain isolated populations apparently at first assumed that it would be possible to adapt themselves to a state of small-scale war alternating with periods of peace, such as the former lord of S̲h̲ayzar, Usāma b. Munḳid̲h̲, by drawing on his early memories, was able to depict for us in his Memoirs. Soon, however, more directly threatened or more intensely Muslim communities, angered by the disgraceful indifference to the Frankish danger of Muslims beyond Syria-Palestine, attempted to rouse them from it by for example demonstrating in Bag̲h̲dād. Although individual volunteers, subsidies (particularly for prisoners' ransoms) and exhortations were sometimes forthcoming from the rest of the Muslim world, the backbone of resistance came really from the immediate neighbours of the Franks. A necessary condition for that, and this was bound to be one consequence of the Crusades, was some degree of *rapprochement* between various Muslim elements which only recently had been suspicious of each other: Arabs from the plains and the towns, Turks from the official armies that had come into being under the Sald̲j̲ūḳid regime, Turkomans lacking discipline but ready for *g̲h̲azwa*, warlike Kurds joining up with the Turkish armies that shortly before they had been fighting and so on. D̲j̲azīra constituted the hinterland, a source of manpower, such as Syria with its meagre resources could never be, and there followed a process of political unification between the two regions (remaining however somewhat incomplete in D̲j̲azīra). From a religious point of view, the Frankish menace certainly contributed without being its sole cause to the progress of Sunnism, which was already developed in the Sald̲j̲ūḳid domains of Irano-Mesopotamia, but until then scarcely of any importance in Syria. For one thing, intransigent elements denounced the heterodox as accomplices of the Franks and responsible for the misfortunes of Islam; more important, however, moderate S̲h̲īʿīs and even sometimes the Fāṭimids, no longer sustained by unanimous Ismāʿīlism, in the face of common enemies rallied to the Sunnī Turkish princes; the only group to remain outside this alliance were the Assassins, violent and irreconcilable enemies of Sunnī orthodoxy, who were massacred by the Muslim majority and who sometimes collaborated with the Franks from their frontier strongholds. Naturally, the anti-Crusade movement never affected the whole of the Muslim population even amongst the neighbours of the Franks; devout Muslims lamented the fact that some of their brethren, who were subjects or neighbours of the Franks, found it less dangerous to come to terms with them than to fight them and minor princes were hesitant about involving themselves in coalitions which could only serve to increase the authority of the more important. The ability of Zengī, Nūr al-Dīn and Saladin lay in realizing, each in his own manner, that the struggle against the Franks, by necessitating and favouring the unification of Muslims, played into the hands of anyone able to lead such a movement, although it is not possible for us of course, any more no doubt than it was for them, to say how far they were prompted by ardent con-

viction and how far by self-interest. This policy appeared to reach its final objective when after Jerusalem Saladin conquered almost the whole of the Latin East.

It would be interesting to know whether in the Muslim States concerned the war against the Franks or their neighbours brought about any deeper or broader changes than this partial "moral rearmament". The period of the Crusades certainly coincides with a remarkable rise of inland Syria, starting with Damascus, then of Egypt which replaced Baghdād, linked too closely with the Iranian States, as the liveliest area of Arab Islam; but it is difficult to indicate the exact role of the various factors in this development, as it is to say whether the militarization of the politico-social order common to the whole of the Muslim world was more extensive here than elsewhere. In the art of warfare it is probable that some progress in siege armament and artillery is due to contact with the Franks; the mutual borrowings which appear to have taken place between the two sides in the technique of fortification have still never been properly studied. Peaceful trading relations between Frankish and Muslim territories co-existed with war; but Alexandria, not Acre, was the great international trading centre of the Mediterranean and the fall of the Latin East was to have little effect on commerce.

It would be normal to expect the anti-Frankish reaction to have brought about some original movement of ideas. But Islam was no longer in a progressive phase and the conflict was after all limited. Subject to future research, therefore, the impression is that there was not really any ideological fermentation. The ancient themes of *djihad* were rediscovered, the old accounts (pseudo-Wāķidī) of the Conquests and anti-Byzantine *ghazwa* were taken out and developed, emphasis was laid on devotion to the holy places of Jerusalem: but there was nothing really new and it must be admitted that the struggle against the Crusaders did not give rise to any doctrinal study of holy war or any popular works comparable with the epics about the Conquests or anti-Byzantine wars.

Furthermore, diplomatically, whereas Saladin in particular tried to play off Westerners and Byzantines against each other, no unity comparable with the unity, however slight, of Western Christendom against Islam was ever achieved between the East and West of the Muslim world, for each part was involved in its own struggles with neighbouring Christians. Even in the East, leaving aside the Iranians who were far away and shaken by successive crises, the Turks of Asia Minor, after involuntarily setting the Crusades in motion by their invasion, practically restricted their efforts to attacks against Byzantium and, showing little interest in Syria, only took some part in the struggle against the Crusaders in the first century of the Latin East, when the latter crossed their territory. The Caliphate itself does not appear to have taken a very deep interest in the anti-Frankish struggle.

Furthermore, at the end of Saladin's reign, the very seriousness of the Frankish defeat stirred the West, so that before his death in spite of all efforts he had to resign himself to certain losses and to the maintenance of a Frankish seaboard, emphasizing the extent of material sacrifices made practically in vain. Whence arose under the Ayyūbids the desire for a new policy which, recognizing both the presence of Franks in the trade ports of Syria-Palestine and the lessening of the Frankish menace, now that, left to their own devices, the Eastern Franks could hardly contemplate further aggrandisement, sought to set up a *modus vivendi* economically favourable to both sides. This policy, compromised by the Crusading activities of the West, nevertheless continued a fairly successful existence for half a century, finding its most spectacular and in the eyes of the devout its most scandalous expression when, with certain reservations, al-Kāmil restored Jerusalem to Frederick II. Could such a policy have been kept up for a long time? The unleashing of the Mongol conquest made it in any case impracticable. That invasion, much more dangerous for the time being than the Crusades could ever be, produced in the Mamlūk State, established in Egypt and Syria as the final redoubt of Muslim resistance, an uncompromising tension of all forces and the unquestionable predominance of an intransigent army. Some of the Franks had come to terms with the barbarians: their extermination or expulsion became a matter of supreme urgency and this time Europe did not prevent it.

With the exception of the Armenians in the North, native Christians had remained practically outside the Crusades; Muslims therefore did not at first change their attitude to local Christians and even occasionally supported members of the Greek Church who had serious grounds for complaint against Latin dominance, as well as the Jews. Tolerance of this kind contrasted with the treatment of Muslims under Frankish rule who, except in some special localities, had neither mosque nor *ķāḍī* and were frequently considered as virtual enemies or spies. The over-quoted passage of Ibn Djubayr, shaming his co-religionists for Muslim satisfaction with good Frankish administration in the rich district of Tyre, cannot outweigh many cases where the opposite applied nor can it the legal status of Muslims; because of its warlike spirit, the Latin East was backward compared with the understanding which the Norman sovereigns of Sicily and the Spaniards were showing at the same time. In the long run the presence of Franks eventually jeopardized the native Christians of Muslim countries as well. For the lack of any future possibility of triumphing by the force of arms prompted the Franks to try to establish relations with Christians of Muslim states. It was inevitable that such a move should give rise to at least some suspicion amongst the Muslims. The most unfortunate individual case was that of the Maronites. This purely Lebanese minority living entirely within Frankish territory had rallied to the discipline of the Church of Rome and to a certain extent, in the coastal towns at least, had become intermingled with the Franks. Muslim reconquest did not wipe out the danger of Frankish attacks on the Syrian coast and, to prevent any Maronite complicity, the Mamlūks had many of the Maronite districts along the coasts evacuated. The fortunes of the Armenians, who had been the Mongols' quartermasters and were linked politically with the Christian West, were even less happy; in the fourteenth century their Cilician kingdom was destroyed and its population decimated. Generally speaking, the hardening of the Muslim attitude was bound to undermine the position of Christians and it is necessary to realise that the Crusades alone must bear, if not the sole responsibility, at least the greater part of it, for a development completely opposite to their avowed object.

Did they at least help to increase the interpenetration of peoples, the knowledge of Islam in the

West, or of the West in Muslim countries? It would of course be paradoxical to contend that among the members of the two geographically close populations there was no exchange of knowledge. But examination of institutions in the Latin East shows fewer borrowings from the Muslim past and less social intermingling than in the Christian States of Sicily and Spain. Similarly, from a cultural point of view, objective comparison leads to the categorical conclusion that where the West has acquired knowledge of Muslim civilization, it has done so mainly through Spain or Sicily and not through Western settlements in the East or Crusaders from the West; moreover, Islam as such nearly always remained misunderstood and the few accurate ideas about it that the West finally acquired are due to the efforts of missionaries, in other words to work undertaken in an entirely different spirit from the spirit of the Crusades. As for the Muslims, although some showed a certain curiosity about the Franks in the East or about a Western leader as exceptional as Frederick II, it must be acknowledged that their historians, geographers and anti-Christian polemists still had after the Crusades the same few notions about the European West, gleaned from their co-religionists in the West, that they had had before. Therefore, and contrary I regret to current opinion, it seems to me an anachronism to repeat with those who have worked on the cultural or political influence, indeed a very real one, of modern France in the East, or written within that context, that the Crusades laid their foundations; if in their own way they bore witness to the beginning of a process of interpenetration, the atmosphere they created proved subsequently more of a hindrance than a help.

Bibliography: The Arabic sources of the history of the Crusades are catalogued in C. Cahen, *La Syrie du Nord à l'époque des Croisades*, 1940, 33-94, without however certain elucidations which may be found particularly in (besides a forthcoming work by N. Elisséeff on Nūr al-Dīn) H. A. R. Gibb, *The Arabic sources for the life of Saladin*, in *Speculum*, xxv (1950); B. Lewis, *The sources for the history of the Syrian Assassins*, *ibid.*, xxvii (1952); H. Gottschalk, *al-Malik al-Kāmil*, 1958, Introduction. The five volumes of *Historiens Arabes* in the *Recueil des Historiens des Croisades* published by the Académie des Inscriptions suffer from lack of method in the choice of extracts and insufficient care in the establishment and translation of texts (not to mention their inconvenient format); they have still not yet however been replaced by editions or above all, for those who need them, by better translations. Since 1940 have appeared—and we quote only the essential—a French translation by R. Le Tourneau of Ibn al-Ḳalānisī's Damascus chronicle (*Damas de 1075 à 1154*, French Institute in Damascus, 1952), vol. i of a new and this time good edition of Abū S̲h̲āma's *K. al-Rawḍatayn* by M. A. Ḥilmī (Cairo 1957), as well as an edition of his *D̲h̲ayl* (Cairo 1947); the first two volumes, less important than those to follow, of a good edition of Ibn Wāṣil's *Mufarrid̲j̲ al-Kurūb* by al-S̲h̲ayyāl (Cairo 1953 and 1957); an edition of the Ayyūbid part of al-Makīn b. al-ʿAmīd's chronicle by C. Cahen (in *BEO*, Damascus, xv, 1955-57); the edition of part of Ibn ʿAbd al-Ẓāhir's life of Baybars, under the title *Baybars the First*, by S. F. Sadeque, Oxford and Dacca 1956; the first two volumes out of the three of the excellent edition of (Kamāl al-Dīn) Ibn al-ʿAdīm's *Zubda* by Sāmī Dahān (Fr. Inst. Damascus, 1951 and 54) and, by the same editor, the part on Damascus of Ibn S̲h̲addād's *Aʿlāḳ* (Fr. Inst. Damascus, 1956), with the part on Aleppo edited by D. Sourdel (*ibid.*, 1958); of the extant half of the *Life of Baybars* by the same author (in the absence of any edition) there is a Turkish translation by Şerefuddin Yaltkaya, Istanbul 1941; an edition by C. Zurayk and S. Izzedin, 1939-42, of the two volumes by Ibn al-Furāt on the years 672-696; an edition at Ḥaydārābād, 2 vol. 1954-55, of the part of Yūnīnī covering the years 664-670; and finally for the years 689-698 an analysis of D̲j̲azarī by J. Sauvaget, 1949. None of these authors of course deals specifically with the Crusades. A good number of selected and translated texts, together with useful introductions, has been given by Fr. Gabrieli, *Storici Arabi delle Crociate*, 1957.

For the general history of the Crusades in their Eastern setting reference should be made to the general works of Grousset, Runciman, my *Syrie du Nord* and the collective *History of the Crusades* by the University of Philadelphia under the supervision of K. M. Setton, vol. i (twelfth century) 1955, vol. ii (thirteenth century) in the press, and three further volumes on the later Crusades, institutions and civilization. A broadly conceived general bibliography of the Crusades will be found in H. E. Mayer, *Bibliographie zur Geschichte der Kreuzzüge*, Hanover 1960. It seems useful here only to indicate the few studies devoted particularly to aspects of the problems treated above: C. Cahen has given the outlines of a forthcoming *Autour des Croisades, Points de vue d'Orient et d'Occident*, in *En quoi la Conquête turque appelait-elle la Croisade* (*Bulletin de la Faculté des Lettres*, Strasbourg, Nov. 1950), *An Introduction to the First Crusade* (*Past and Present*, 1954) and *Les Institutions de l'Orient Latin*, in *Oriente e Occidente, XII Convegno Volta*, 1956. The only other studies which need be quoted here are: H. A. R. Gibb, *The achievement of Saladin* in *Bull. of the John Rylands Library*, 1952; A. S. ʿAṭiya, *The Crusades, Old ideas and new conceptions*, in *Cahiers d'Histoire Mondiale/Journal of World History*, ii/2, 1954; and, on a much broader theme, U. Monneret de Villard, *Lo studio dell' Islam nel XII e XIII secolo*, in *Studi e Testi*, cx (1948), and A. Malvezzi, *L'islamismo e la cultura europea*, n.d. [1957] (the history of the knowledge of Islam).

(C. CAHEN)

CRYSTAL [see BILLAWR]

ČU, a river in Central Asia, 1090 km. long, but not navigable because of its strong current. It is now known as *S̲h̲u* (Barthold, *Vorl.* 80) by the Kirgiz who live there (and it probably had this name when the Turks lived there in the Middle Ages); Chinese: *Su-yeh* or *Sui-s̲h̲e*. modern Chinese: Čʿuci (for the problem of the indication of Ču = Chinese 'pearl' with the 'Pearl River' [Yinčü Ögüz] in the Ork̲h̲on Inscriptions, cf. the article SIR DARYĀ). The river Ču has its source in Terskei Alaltau, and then flows to the north-east until 6 km. from the western end of the Issik Kul [*q.v.*], known as Ḳočḳar in its upper regions (for the first time in S̲h̲araf al-Dīn ʿAlī Yazdī, ed. Ilāhdād, i, Calcutta 1885, 274). It send a branch (called the Kutemaldi) to the lake, whose outlet it earlier was. Subsequently the Ču turns northwards through the Būg̲h̲ām (Russian: Buam) ravine (this is mentioned first in S̲h̲araf al-

Dīn, *loc. cit.*; in Gardīzī, 102: Dj̲ūl, supposedly 'narrow'), which lies to the north-west of the western end of the Issik Kul, and then flows in a north-westerly direction. In this region it receives the waters of the Great and the Little Kebin from its right, and the Aḳsu and Kuragati from the left. The river then flows through dreary waste-land in its middle and lower course. 110 km. east of the Āmū Daryā [*q.v.*], it ends in the small desert lake Saumal-Kul.

The regions adjoining the upper Ču, which were good grazing land and could be easily irrigated, were already inhabited in the times of the Middle Siberian Andronovo culture (1700-1200 B.C.) (Bernstamm, 20). Later on, Sacae and Wusun (pseudo Tokharians?) lived on its banks. In the 6th and 7th centuries, these were joined by the Sogh̲dians (see SUG̲H̲D) (Altï Čub Sogh̲daḳ, in the Orkh̲on inscriptions: Bernstamm, 269). Archaeological traces of these peoples have been found and described by the Soviet expert Aleksandr Natanovič Bernstamm (1910-1956). From his research, it has become evident that Syrian and some Byzantine influences had reached as far as this, and that the traffic from Further Asia to the Land of the Seven Rivers (Yeti Suw; Russ. Semireč'e; cf. also Ili) passed through this region along two ancient trade-routes (through the Kastek pass to the Ili valley, and through the Būgh̲ām pass to the south side of the Issik Kul). Thus two cultures met on the banks of the Ču (down to the Land of the Seven Rivers and the Fargh̲āna Basin [Bernstamm, 147, 262]).

In 776, the Ḳarluḳ [*q.v.*] occupied the valley of the Ču and that of the Ṭarāz (Talas), and the area along both sides of the Alexander Mountains. The Tukh̲s(ī) also settled there (*Ḥudūd al-ʿĀlam*, 300; Barthold, *Vorl.*, 75). Sūyāb [*q.v.*] was the *capital* of the Ču valley (Kās̲h̲g̲h̲arī, iii, 305; Hsüan-Čuang, ed. St. Julien, Paris 1857-8); the residence of the ruler of this area was usually in Ḳuz Ordu (Balāsāghūn; [*q.v.*]). Judging from the traces of settlements found, the valley was well populated at that time. The inhabitants developed a particular multi-coloured style in ceramics, and later also a distinct special form of ornamental Kūfic writing. There was a marked distinction between them and the other Transoxanians (Bernstamm, 157, 161/66).

Islamic armies reached the western part of the Ču valley only once, in 195/810 (battle against Kūlān, cf. Ibn al-Ath̲īr, vi, 164), and the name of the river is not mentioned in Muslim sources of pre-Mongol times, although there is mention of some of the places in the region (Ibn Kh̲urradādh̲bih (*BGA* VI, 29); Ḳudāma, *K. al-Kh̲arādj̲* [*BGA*], 206). Islam reached the population only in the 4th/10th century, and even around the year 372/982, only a part of the inhabitants of Ṭarāz and Nawēkath̲ had become Muslims (*Ḥudūd al-ʿĀlam*, 119, no. 93; 358, with mention of individual places); Nestorian Christianity was widespread for a considerably longer time. The rule of the Ḳara Kh̲itāy [*q.v.*] followed that of the Ḳarluḳs in 535/1141. Thus there was a renewed influence of Chinese cultural elements (Nephrit, Sung porcelain) in the area, and these mixed again with those of Transoxania (Bernstamm, 168, 171 f.). Meanwhile, the numerous wars of the 6th/12th and 7th/13th centuries resulted in a decrease of the population of the Ču valley. Where the Chinese traveller Čʿang Čʿun still met several towns and villages in 616/1219, and crossed the Ču by a wooden bridge (E. Bretschneider, *Med. Researches*, i, London 1888, 71 f., 129 f.; A. Waley, *The Travels of an Alchemist*, London 1931), many ruins are reported already in 658/1259. At that time (651/1253), the region formed the border line between the areas of influence of the two Mongol Kh̲āns Batu [*q.v.*] and Möngke (Mangū [*q.v.*]). Sh̲iban (Sh̲aybān), the founder of the "Blue" (White) Horde (see BĀTŪʾIDS) had his winter quarters here. But the main cause of virtual de-population of the area, was war amongst the Mongols in the 8th/14th century (see ČAG̲H̲ATĀY), plague (acccording to epitaphs of 739/1338), and the campaigns of Tīmūr [*q.v.*]. Our sources for these last already fail to mention any place-names in the Ču valley. The Nestorian settlements near Pis̲h̲pek and Toḳmaḳ [*q.v.*], of which we have epitaphs of the 7th/13th and 8th/14th centuries, also seem to have perished at this time. Muḥammad Ḥaydar Dūgh̲lāt, *Taʾrīkh̲-i Ras̲h̲īdī*, ed. N. Elias and E. D. Ross, London 1895-98, 364 f., *ca.* 1546, mentions only ruins with a minaret rising above them. The modern name Burana for a tower in the ancient Toḳmaḳ also derives from Manāra (according to Perovskiy in the *Zap. Vost. Otd.*, viii, 352).

Later the Ču valley occasionally came under the Kalmuks and the (Ḳara-) Kirgh̲iz. Then it came under the rule of the Kh̲āns of Kh̲oḳand, who founded the fortresses of Pis̲h̲pek (in the Kh̲oḳand historians' writings: Pis̲h̲kek) and Toḳmaḳ on the Ču. These came into Russian hands in 1860. Since then the Ču valley has belonged to Russia, and has become a target of eastern Slav settlement (cf. Herrmann, *Atlas*, 66-67). The upper course is in the Kirgiz S.S.R., the middle and lower reaches in the Kazak S.S.R. Since 1932, a great agricultural combine (hemp and other fibre plants) has developed in the area of the middle Ču. Two arms of the "Great Ču Canal" have been under construction since 1941; these should irrigate a further area. The Turksib railway crosses the river near the station of Ču, thus opening it up to traffic.

Historical Maps of the region of the Ču: A. Herrmann, *Atlas of China*, 1925, several maps, 37 and 60 in particular; *Ḥudūd al-ʿĀlam*, 279, 299; Bernstamm, maps ii and iii (at the end). Islamic Maps: C. Miller, *Mappae Arabicae*, iv 78/82, 86*-91*.

ČŪBĀNIDS (ČOBANIDS), a family of Mongol *amīrs* claiming descent from a certain Sūrgh̲ān

Shīra of the Suldūz tribe who had once saved the life of Čingiz Khān. The most notable members of this family were:

(1) Amīr Čūbān. An able and experienced military commander, Amīr Čūbān, according to Ḥamd Allāh Mustawfī, fought his first battle in Rabīʿ II 688/April-May 1289 (*Taʾrīkh-i Guzīda* (GMS), 588); thereafter he served with distinction under the Ilkhāns Arghūn, Gaykhātū, Ghāzān and Uldjāytū [*qq.v.*]. He was appointed *amīr al-umarāʾ* by Abū Saʿīd in 717/1317, and married the latter's sister Dūlandī. During the reign of Abū Saʿīd, who succeeded Uldjāytū at the age of twelve, Amīr Čūbān acquired great power in the affairs of state; in addition, all the important provinces of the Ilkhānid empire were governed by his sons. In Radjab 719/Aug.-Sept. 1319 a group of *amīrs* plotted to assassinate Amīr Čūbān, but the latter, supported by Abū Saʿīd, crushed the revolt with great severity. After the death of Dūlandī, Amīr Čūbān married Abū Saʿīd's other sister, Sātī Beg (719/1319). In 725/1325 Amīr Čūbān prevented Abū Saʿīd from marrying his daughter Baghdād Khātūn [*q.v.*], who was at that time the wife of Shaykh Ḥasan Buzurg the Djalāʾirid. Abū Saʿīd determined to break the power of the Čūbānids and, two years later, when Amīr Čūbān was absent in Khurāsān, he put to death Amīr Čūbān's son Dimashḳ Khwādja and issued orders for the execution of Amīr Čūbān at Harāt and of his family throughout the Ilkhānid dominions. Amīr Čūbān, forewarned, advanced as far as Rayy and attempted to negotiate with Abū Saʿīd, but without success. Deserted by most of his troops, he fled back to Harāt and took refuge with Malik Ghiyāth al-Dīn the Kurt. A few months later (Oct.-Nov. 1327, or perhaps in Muḥarram 728, which began on 17 Nov. 1327), the rewards offered by Abū Saʿīd induced Malik Ghiyāth al-Dīn to put to death Amīr Čūbān and his son Djilaw Khān. Their bodies were taken to Medina for burial.

(2) Dimashḳ Khwādja. The third son of Amīr Čūbān, Dimashḳ Khwādja remained at court in 726/1326 when his father left to defend Khurāsān against the Mongols of the house of Čaghatay, and became the virtual ruler of the Ilkhānid empire. His dissolute nature provided Abū Saʿīd with the excuse for destroying the Čūbānids which he had been seeking. Dimashḳ Khwādja was convicted of a liaison with a member of the royal harem, and was put to death on 5 Shawwāl 727/24 August 1327. One of his daughters, Dilshād Khātūn, was later married first to Abū Saʿīd (734/1333-4), and then to Shaykh Ḥasan Buzurg the Djalāʾirid.

(3) Tīmūrtāsh, the second son of Amīr Čūbān. He had acted as *wazīr* to Uldjāytū. In 716/1316 he was appointed by Abū Saʿīd governor of Rūm, and for the first time carried Mongol arms to the shores of the Mediterranean. In 721/1321-2 he rebelled; he minted coinage in his own name, had his name included in the *khuṭba*, and styled himself the Mahdī. His father Amīr Čūbān took him a prisoner to Abū Saʿīd, but the latter pardoned him for the sake of Amīr Čūbān. After the execution of his brother Dimashḳ Khʷādja, he fled to Egypt. At first the Mamlūk sultan al-Nāṣir Muḥammad treated him with great honour, but the intrigues of enemies of the Čūbānid family, and Abū Saʿīd's repeated demands for the extradition of Tīmūrtāsh, were a source of embarrassment to the Mamlūk sultan, who eventually decided to put him to death on 13 Shawwāl 728/21 August 1328.

(4) Ḥasan b. Tīmūrtāsh, known as Ḥasan Küčük to distinguish him from his rival Shaykh Ḥasan Buzurg the Djalāʾirid. After the death of Abū Saʿīd in 736/1335, he gained the support of his father's followers in Rūm by a ruse, and in Dhu 'l-Ḥidjdja 738/July 1338 he defeated Ḥasan Buzurg near Nakhčiwān. He then gave his allegiance to the princess Sātī Beg, the widow of Amīr Čūbān and Arpa Khān, at Tabrīz (739/1338-9), and came to terms with Ḥasan Buzurg. The following year he transferred his allegiance to a descendant of Hülegü, Sulaymān Khān, to whom he married Sātī Beg. For some years he continued to wage war on his rival Ḥasan Buzurg and the various puppet khāns nominated by the latter, but on 27 Radjab 744/15 December 1343, he was murdered at Tabrīz by his wife ʿIzzat Malik. See further the article ilkhānids.

CUENCA [see kūnka]

ČUKA [see ḳumāsh]

ČUKUROVA [see cilicia]

ČULÏM. The term 'Tatars of Čulïm' (in Russian 'Čulïmtzï', a word invented by Radloff, *Aus Sibirien*, i, 211) includes several small Turkish-speaking groups of Central Siberia whose ancestors would have been Selkups of the Ob' and Ketes of the Yenisseï brought under Turkish influence by the Altaic tribes originating in the south and by the Tatars of Baraba [*q.v.*] and of Tobol' [*q.v.*] originating in the west.

The Tatars of Čulïm form three principal blocks: 1. On the river Kiya, tributary of the Čulïm, in the *oblast'* of Kemerovo who were formerly called "Ketzik" (to the south of the town of Mariinsk) and "Küerik" (to the north of that town). 2. On the central Čulïm, in the district of Ačinsk of the *Krraï* of Krasnoyarsk, whom ancient ethnographers called "Tatars of Meletzk". 3. On the lower Čulïm and the Ob', in the districts of Asino and Ziryansk of the *oblast'* of Tomsk, formerly known as "Tatars of Tomsk".

The present number of the Tatars of Čulïm is unknown. The Russian census of 1897 counted 11,123. The censuses of 1926 and 1939 included them with the "Tatars of the Volga". S. A. Tokarev, *Étnografiya narodov SSSR*, Moscow 1958, 428-429, estimates their number at 11,000. They speak a Turkish dialect akin to the Kïzïl speech of the Hakas, but strongly Russianized.

Previously Shamanists, the Tatars of Čulïm officially adopted orthodox Christianity in the 18th century. Sunnī Islam of the Ḥanafī school was brought to them in the second half of the 19th century by the Tatars of Ḳazan, but it has made no appreciable progress.

Nowadays the Tatars of Čulïm are dispersed among the Russian villages and are exposed to Russian cultural influence; they adopt Russian as their chief language, and merge fairly quickly into the Russian masses.

Bibliography: Ivanov, *Tatarï Čulïmskie*, in *Trudï Tomskogo oblastono Muzeya*, ii, Tomsk 1929;

A. M. Dul'zon, *Čulîmskie Tatarî i ikh yazîk*, in *Učenîe Zapiski Tomskogo Gosud. Pedagogič. In-ta*, ix, Tomsk 1925. (Ch. Quelquejay)

ČŪPĀN, 'herdsman, shepherd'. This word of Iranian origin was adopted by Turkish peoples in close contact with the Iranian language-area, namely speakers of the dialects of the S.W. group of Turkish languages (Anatolia and neighbouring areas) and the S.E. group (Čaghatay etc.). This derivation is supported by the fact that the word is not found in Turkish languages outside these two groups.

Shubān or *shabān*, the form in general use in modern Persian (= herdsman, < Phl. *špāna* < Late Av. **fšupāna*; cf. *fšūmå* 'owner of herds'), must have passed into Turkish via the *č-* dialects (cf. *Shāh-nāma, čōbān, čōpān*; Kāš *čepūn, čūpūn, čapō*; Kurd. *čuvān*, 'herdsman'; *čîpan* 'butcher' [*Grundr. d. iran. Philologie*, i, 13, 148 etc.; ii, 71, 79, 89, 188, 195]). In modern dictionaries of Persian there are attested besides *shubān* (popular pronunciation *shabān*) and *shūbān* (cf. also *shubāngāh* 'mansio pastoris' [Vullers]), the forms *čobān* 'a shepherd, a horsekeeper' (*čobānī* 'a pastoral office'), *čopān* (Steingass), *čūban*, vulg. *čoban* (Redhouse, '1. a shepherd, 2. a man who has charge of any kinds of beasts out at pasture, 3. a rustic, a boor'), *čūbān* (Zenker), *čūpān, čūbān* (Shaksp. *ğawpān*).

The fact that there is no general word for 'shepherd' in Turkish can be explained in the light of the historical development of Turkish society: in the economic life of the nomadic Turks stock-raising was the main activity of the whole tribe, and thus the idea of the herding of beasts as a distinct occupation had not developed. When later, with the increasing complexity of society, the occupation came into existence this task must have been delegated by the Turks, who formed the governing class, to non-Turks, as the Iranian origin of the word indicates.

Though the verbs *kü-, küdez-, küzet-* etc. were in general use in Old Turkish with the meaning of 'protect' 'guard', it is clear that they had not yet acquired the meaning of 'tend animals'; cf., *e.g.*, *koyuġ ked küdezgil* 'guard the sheep well' (*Kutadgu Bilig*, 5164), *koyuġ ked küdezip yorı* (*KB* 1413); *küzet* 'guard' (Index), *küdezči* (*yorıġlı binigli küdezčisi ol, KB* 1741). For a use with a meaning approaching that of 'shepherd' cf. *KB* 1412 (*budun koy sanı ol begi koyčısı: bağırsak kerek koyka koy kütčisi* 'the people are like sheep and the *beg* is their shepherd: the shepherd must be kind to the sheep'), 5590 (*tarıġčı tarıġka irig bolsunı: yime yılkıčı igdiš öklitsüni* 'let the farmers work hard at their farming, and those that tend the animals see that they increase').

Among the Kazan Turks the word *kütüčī* (< *küt-*, Ott. *güt-*; *kütü* = Ott. *sürü*, but Ott. *sürücü* has developed with a different meaning) is used; from which no doubt comes the Čuvash *kĕtüčĕ* or *kĕtü păxaka*. Among the Kazak and the Kirghiz, for whom stock-raising still constitutes the main activity, the words *malšı* (< *mal-čı*) and *baktašı* are generally used instead of *čoban*, or, if greater precision is required, the expressions *koyšu, ğılkıšı, sıyıršı, tüyeši* etc. are employed. The examples given by W. Barthold in *EI*[1] for the use of the word *čoban* for the inferior classes and for the ruling members of society are not of general application: the first belongs to a very late period, while the name of the Amīr Čoban, who was viceroy in Iran in the reign of Abū Saʿīd (1316-1327), is more probably connected with the word *čupan*, defined by Maḥmūd Kāshgharī as 'village headman's assistant'.

In Turkish languages in which the word *čoban* is used, it is found not only in the derivatives *čobanğa, čobanlık*, but in a number of compounds, chiefly for plant-names (many of them no doubt calques from Persian), *e.g.*, *čoban değneği* (*tayağı, tarağı*) 'knot-grass', *č. püskülü* 'ilex aquiflium, holly', *č. düdüğü* 'hazel', *č. dağarğığı* 'a creeper', *č. kaldıran* 'lychnis calcedonia', *č. kalkıdan* 'caltrop', *č. iğnesi* 'cranes-bill'; *č. kepeği*, 'sheepdog', *č. kušu* 'a bird like a sparrow', and especially *čoban aldatan* (*č. aldatğučı, č. aldatkıčı*, cf. TTS IV).

The expression of particular interest for cultural history is *čoban yıldızı* 'the planet Venus', in which one sees the mutual influence of T. *čolpan* and P. *čuban*. *Čolpan* (Čagh. Ott. Tar. O.T.), *čolpon* (Kır.), *čulpan* (Kazan), *šolpan, šulpan* (Kaz.), *čolmon* (Tel.), *čulmon* (Alt.), *čolban* (Shor), *čölbön* (Tob. Leb.) and *tsolman* (*čolman, čolmun, čolbun*) (Mong.). *Čolpan* (*č. yulduz* [or *yulduzı*], *tañ čolmonu iñir čolmonu* ['morning- and evening-star']) has in this case presumably been identified with *čoban*.

With Čoban-Ata, the name of a line of hills on the S. bank of the Zarafshān near Samarkand (which derives, according to W. Barthold in *EI*[1], from a legend of a shepherd seen on the hills, or from the name of a Muslim saint) cf. Kirghiz *Čolpan-Ata* 'the guardian of the sheep' and hence 'sheep', *Kamber-Ata* 'guardian of the horses', *Čıčan-Ata* 'guardian of the goats', *Oysul-Ata* 'guardian of the camels' (and hence 'horses', 'goats', 'camels' respectively).

ČŪPĀN-ATA [see čopan-ata]

ČUWASH (Čuvash), (native name Čăvash), a Turkish-speaking people of the Middle Volga, numbering (in 1939), 1,369,000, who form the Soviet Socialist republic of the Čuvash (18,300 square kilometres, 1,095,000 inhabitants in 1956), situated on the southern bank of the Volga, to the west of the Autonomous Soviet Socialist Republic of the Tatars. The Čuvash also inhabit the neighbouring regions: the Autonomous Republics of Tataristān and Bashkiria, the *oblast'*s of Ulianovsk, Kuybishev, Saratov, and in Western Siberia.

The name Čuvash only appears in its present form in Russian chronicles of later than the 15th century, and is not found in such Arabic writers as Ibn Faḍlān, al-Mukaddasī, Yākūt, etc., yet the Čuvash are according to general opinion, one of the oldest established peoples in the Volga region. Their origin is still the subject of controversy. According to a theory which has now been abandoned, the Čuvash were descendants of the Khazars (Hunfalvy, *Die Ungern Magyaren*, 1881; Fuks, *Zapiski o Čuvashakh i čeremisakh Kazanskoy Gubernii*, Kazan 1840). Other writers trace their descent to the Burtās [*q.v.*] or the Huns (for example W. Barthold, *Sovremennoe sostoyanie i bližayshie zadači izučeniya istorii turetskikh narodov*, Moscow 1926, 5). More popular and more likely is the theory that they are of Bulghār origin, which is based, among other things, on the analogy between the present-day Čuvash language and the funeral inscriptions found in the ruins of the town of Bulghār and on the Danube. Several historians and linguists have defended this theory and it still has many supporters: Husein Feizkhanov, Il'minskiy, *O fonetičeskikh otnosheniyakh meždu čuvashskim i türkskimi yazîkami*, in *Izv. Arkh. Obshč.* v, (1965) 80-84. N. I. Ashmarin, *Bolgarî i Čuvashî*, St. Petersburg 1902, Howorth, etc.; A. P. Kovalevskiy, *Čuvashî i Bulgarî po dannîm Akhmeda*

ibn Fadlana, Čeboksarī 1954, and P. N. Tretyakov, *Vopros o proizkhoždenii Čuvashskogo naroda v svete arkheologičeskikh dannīkh*, in *SE*, iii, 1950, 44-53, trace the descent of the Čuvash from the Bulghār tribe of the Savak (or Savaz) who, contrary to the Bulghārs properly so-called, refused to adopt Islam and remained animists.

Finally, according to a new theory, based on the existence of a pre-Turkish Finno-Ugrian substratum in the Čuvash language which has been recognized for some time by the majority of Soviet ethnologists, the ancestors of the Čuvash were Finno-Ugrian tribes who were influenced by Turkish culture through various Turkish tribes originating in the south or the south-east, before the arrival of the Bulghārs on the Middle Volga in the 7th century.

The infiltration of Turkish culture among the Finno-Ugrians continued during the Bulghār era until the 13th century or even later, under the Golden Horde and the Khanate of Ḳāzān. Whatever their racial origins may be, the Čuvash, a Turkish-speaking people, but animists (they were converted to Christianity in the 18th and 19th centuries) were exposed to the influence of Islam by contact with the Muslims, the Bulghārs, and then the Tatars; this influence is be found particularly in certain terms such as "*psemelle*", the word by which prayers begin, "*pikhampar*" (payghambar),'wolf-god', "*kiremet*", 'spirit'. Other Čuvash, placed in immediate contact with the Tatars of Ḳazan, were converted to Islam. This phenomenon, which began at the time of the Khānate of Ḳazan, continued almost to the present day. It is impossible to appreciate its extent, for the Čuvash who were converted to Islam adopted the language of the Tatars, at the same time as their religion, and were "Tatarized". Tokarev, *Étnografiya narodov SSSR*, Moscow 1958, considers that at the beginning of the 19th century the Čuvash were three times as numerous as the Tatars in the "government" of Ḳazan, while in the census of 1897, their number was twice as small as that of the Tatars. According to him this decrease is due to the fact of "Tatarization" alone. Finally among the Čuvash who are animists or Christians, and the Muslim Čuvash there were still to be found at the beginning of the 20th century several semi-Muslim groups, such as, for example, the *Nekreshčenie Kryasheni* of the district of Kaybitzk of the Autonomous Soviet Socialist Republic of Tataristān, who are semi-islamized animists, or again the Čuvash group of the region of Ulianovsk, who were considered before 1917 as Christians of the Orthodox church, while still observing the Muslim festivals and the fast of Ramaḍān.

CYPRUS [see ḳubrus]

CYRENAICA [see barḳa]

D

al-**DABARĀN** [see nudjūm].

ḌABB, the thorn-tail lizard (*Uromastix spinipes*). Cognate synonyms exist in other Semitic languages.

The animal, found in abundance in the homeland of the Arabs, is often mentioned and described in ancient poetry and proverbs. Much of the information on the animal derives from just these sources which are freely quoted in later zoological works. The *ḍabb* was eaten by the ancient Arabs who relished it as tasty food; still it is reported that the tribe of Tamīm, who were especially fond of eating it, were ridiculed on that account by other Arabs. In Islamic times, the lawfulness of its use as human food was expressly pointed out by some *ḥadīth*s. Bedouin eat it to the present day.

The *ḍabb* is described as clever but forgetful; it may even not find its way back to its hole, wherefore it chooses a conspicuous place for its habitation. It digs its hole in solid ground—whereby its claws become blunt—lest it collapse under the tread of hoofed animals. It does not brood over the eggs but lays them in a small cavity of the soil and then covers them with earth. The young hatch after forty days and are able to take care of themselves (autophagous). The *ḍabb* lays seventy eggs and more, which resemble the eggs of the pigeon. Its tail is jointed. It has such great strength in its tail that it can split a snake with it. If it is killed and left for one night and then is brought near a fire, it will move again. It devours its young when hungry and eats its vomit again; yet it is highly capable of enduring hunger, being second, in this respect, only to the snake. It likes eating dates. Its teeth are all of one piece. It is afraid of man but lives on friendly terms with the scorpion, which it takes into its hole as a protection from the human foe. It does not leave its hole in winter. When exposed to the sun, it assumes various colours like the chameleon. It lives seven hundred years and more. When old it foregoes food and is satisfied with air. The male has two penes and the female two vulvae. A certain kind has two tongues. The *ḍabb* drinks little or does not drink at all and voids one drop of urine in every forty days.

Some of the fabulous accounts have their origin in ancient popular tradition, mainly laid down in poetry and proverbs, as pointed out in the zoological works themselves.

Various medicinal properties were ascribed to the heart, spleen, skin, blood, fat and dung of the *ḍabb*. Its significance when seen in dreams has been

treated by Damīrī and in special works on that subject.

DĀBBA, (plur. *dawābb*), any living creature which keeps its body horizontal as it moves, generally quadruped. In particular, beast of burden or pack-animal: horse, donkey, mule, camel (cf. Lane, s.v.). Burāḳ, the legendary steed ridden by the Prophet at his ascension (*miʿrādj*), is given the name *dābba* by al-Ghīṭī and in the commentaries. The word acquires a particular significance from its use in the Ḳurʾān, XXVII, 82 in the sense of the archetypal "Beast", equivalent to the term θήριον in the Apocalypse of St. John. The text is laconic and gives no explanation: "And when the final word has been spoken against them (cf. XXVII, 85), we shall call forth before them *the Beast sprung from the earth*, that shall tell them that mankind had no faith in our signs". The formula is no doubt based purely on recollections of the Apocalypse: καὶ εἶδον ἄλλον θήριον ἀναβαῖνον ἐκ τῆς γᾶς ... (Rev., xiii, 11).

Exegesis carried out in the course of time has derived from the text, which has been reconsidered in respect of certain images relating to the Day of Judgment. Commentaries by al-Ṭabarī, al-Zamakhsharī, al-Rāzī, and al-Bayḍāwī repeat each other. The key point is, apparently, a *ḥadīth* which has been traced back to the Prophet (al-Ṭabarī): "I said: Oh Prophet of God, where will it (the Beast) appear? He answered: from the greatest of mosques, a thing sanctified by God. While Jesus shall perform the *Ṭawāf* in the House of God, and with him the Muslims, the Earth shall tremble beneath their feet at the movements of the vast Beast. And Ṣafā shall be torn apart at the place where it will appear". The Beast will emerge at Ṣafā. The forefront of its head will have a hairy mark, and its ears will be entirely covered with hair. Those who try to capture it will not succeed, nor will those who take to flight escape from it. It will speak Arabic. It will name people as either "believers" or "ungodly". The believers it will leave, their faces gleaming like stars, and between their eyes it will inscribe the word "believer"; as for the ungodly, it will set between their eyes the black mark of the ungodly.

Other traditions have extended this last part: it is with Moses' rod that the Beast will mark the believer with a white spot, which will expand until it makes the whole face gleam, whilst Solomon's seal, affixed to the nose of the ungodly man, will spread until all his features become black.

Around this nucleus later traditions have given rise to a mass of detail, some concerned with the Beast's essential actions: the Imām of the Mosque of Mecca, on its third appearance will recognize it as the sign of Universal Death (al-Ṭabarī). It will make men ashamed of their ungodliness or hypocrisy (*id.*). It will emphasize that it is now too late to begin to pray, and will castigate this belated way of returning to God. For al-Zamakhsharī, it is the "watchful" (*djassās*). The involuntary element of caricature in its appearance seems to derive from the desire to combine all the figurative features of the animal kingdom. One tradition insists upon its gigantic size: "only its head will appear, which will reach the clouds in the sky" (al-Zamakhsharī; Fakhr al-dīn al-Rāzī), a conception which seems to be influenced by the description of the appearance of Gehenna recorded in the Ps. Ghazzālī, *al-Durra al-fākhira* (Brockelmann, I, 538, no. 6; S I, 746, no. 6; cf. comm. on *Ḳurʾān*, XVIII, 100). Abū Hurayra [*apud* Rāzī] says that the horns on its bull-like head are a parasang apart. It will appear three times. Al-Zamakhsharī makes it travel in turn through the Maghrib, the East, Syria and the Yemen, proclaiming the vanity of all religions foreign to Islam. Al-Rāzī speaks of a long period of hiding in the mosque at Mecca between its second and third appearances.

All these descriptions which, one after another, betray the influence of vague notions deriving from the Scriptures, popular and apocalyptic accounts, are of late date. Al-Rāzī stresses that "out of all this there is nothing authentic in the Book, unless the words attributed to the Prophet are genuine".

In any case, it is not the Beast of the Apocalypse since it arrives *after* judgement has been pronounced (al-Rāzī states that the *warrāḳs* interpret the words "and when the final word has been spoken against them" in this sense). This is confirmed by traditions which depict it denouncing the futility of sinners seeking too late to be converted, after the time when, according to the Ḳurʾān, repentance will no longer avail. This explains the confusion with the idea of Gehenna in the Ps. Ghazzālī. (A. Abel)

ḌABBA b. Udd b. Ṭābīkha b. al-Yās (Khindif) b. Muḍar b. Nizār b. Maʿadd was the eponymous hero of the well known Arab tribe of that name. With their "nephews" ʿUkl b. ʿAwf, Taym, ʿAdī, and Thawr b. ʿAbd Manāt b. Udd, Ḍabba formed a confederacy called al-Ribāb. The Ribāb were in alliance with Saʿd b. Zayd Manāt, the greatest clan of Tamīm. This alliance has never been broken by the other confederates. These, indeed, were formations of rather moderate size, whereas the Ḍabba by means of their power sometimes were able to follow their own policy.

Of the three clans of Ḍabba, Ṣuraym had in the course of the 7th/13th century shrunk to a small number of families. But the second, Bakr, had vastly increased, thus leaving the once powerful Banū Thaʿlaba far behind.

From the second half of the 6th/12th century onwards, the domiciles of al-Ribāb were in the region al-Shurayf between the right bank of Wādī Tasrīr and the depression al-Sirr. In the spring they used to migrate to (Baṭn) Faldj and to the sands of the Dahnāʾ by way of Tiʿshār (= Ḳayʿiyya?) or Wādī al-ʿAtk farther south. But as their spring pastures lay as late as the eighties far in the N.W., in regions held in other seasons by Asad [*q.v.*] and Dhubyān, we may conclude that their domiciles before this time were farther in the west than they were later on.

We find al-Ribāb mentioned for the first time in the *Dīwān* of ʿAbīd b. al-Abraṣ (no. 17, 12) as fighting against Asad (not later than 540). In the eighties Ḍabba and Tamīm stood their ground in a long battle against the Kilāb (b. Rabīʿa b. ʿĀmir b. Ṣaʿṣaʿa [*q.v.*]) and ʿAbs (yawm al-Ḳurnatayn = al-Suʾbān, Aws b. Ḥadjar, no. 1, 9; 16; 17, 3-15; Labīd, no. 16, 41-42; ʿAntara in *Six Poets*, ed. Ahlwardt, no. 7, 19). Some years later al-Aswad,

brother to al-Nuʿmān III of al-Ḥīra, began to restore by several campaigns in Arabia the lost prestige of the dynasty. The Ribāb hesitated to surrender until al-Aswad set on them Asad and D̲h̲ubyān. Next year al-Ribāb, together with mercenaries of al-Ḥīra, led by al-Aswad, defeated the Kilāb at Arīk. One year later Asad and Ḍabba again defeated the Kilāb and other ʿĀmir b. Ṣaʿṣaʿa (al-Aʿs̲h̲ā, ed. R. Geyer, no. 1, 62-74; The *Naḳāʾid* of D̲j̲arīr and al-Farazdaḳ, ed. Bevan, 240, 18-19; Yāḳūt, 1, 229; The *Mufaḍḍaliyyāt*, ed. Lyall, no. 96, 8-19; 99, 9). Their last feat in the *D̲j̲āhiliyya* was the murder of Bisṭām b. Ḳays, the hero of the S̲h̲aybān (of Bakr b. Waʾil [*q.v.*]), who were driving away their herds (E. Bräunlich, *Bisṭām Ibn Qais*, Leipzig 1923).

There is hardly any information on their conversion to Islam. In the first division of the population of al-Kūfa Ḍabba seem to be missing. Mentioned are only "the remaining Ribāb". That is to say, Ḍabba together with Bakr and Ṭayyiʾ formed the quarter missing in the enumeration Ṭabarī 1, 2495. The bulk of the tribe emigrated to Baṣra. In the Battle of the Camel they fought against ʿAlī. Later on they belonged to the quarter, *k̲h̲ums*, of Tamīm. The same applies to K̲h̲urāsān, where the Tamīm numbered (in 96/715) 10,000 warriors led by Ḍirār b. Ḥuṣayn, scion of the old leading family of Ḍabba.

The part of the tribe remaining in Arabia used to camp in the region S.W. of modern Kuwayt. In 287/900 308 Ḍabba joined the Basrian army against the East Arabian Carmathians, but suspecting coming defeat, deserted at a distance of a two days' march from Ḳaṭīf.

There is no outstanding poet amongst the Ḍabba, but a number of soldiers, judges and administrators in Umayyad and ʿAbbāsid times, *e.g.*, Abū Ḥātim ʿAnbasa b. Isḥāq, 238-242 AH governor of Egypt, a righteous man, the last Arabian ruling Egypt, and the last Amīr lead in prayer and hold Friday services.

(W. Caskel)

al-ḌABBĪ, ABŪ D̲J̲AʿFAR Aḥmad b. Yaḥyā b. Aḥmad b. ʿAmīra, an Andalusian scholar of the 6th/12th century. According to the information that he gives us in his works concerning himself and his family, he was born at Vélez, to the west of Lorca, and he began his studies in Lorca. He travelled in North Africa (Ceuta, Marrākus̲h̲, Bougie) and even reached Alexandria, but he appears to have spent the greater part of his life at Murcia. He died at the end of Rabī II 599/beginning of 1203. Of his writings only a biographical dictionary of Andalusian scholars is preserved, preceded by a short survey of the history of Muslim Spain which continues and completes the introduction of ʿAbd al-Wāḥid al-Marrākus̲h̲ī (*Histoire des Almohades*, ed. Dozy). In addition al-Ḍabbī was closely connected with the *D̲j̲ad̲h̲wat al-muḳtabis* of al-Ḥumaydī, which goes as far as 450/1058, and which he completed with the help of later biographical works. His collection of biographies, entitled *Bug̲h̲yat al-multamis fī Taʾrīk̲h̲ Rid̲j̲āl Ahl al-Andalus*, was edited in 1885 by Codera and Ribera (vol. iii of the *Bibl. Arabico-Hispana*).

Bibliography: Maḳḳarī, *Analectes*, ii, 714; Amari, *Bibl. ar. sic.*, i, 437; Wüstenfeld, *Geschichtschreiber*, no. 282; Pons Boygues, *Ensayo*, no. 212; Brockelmann, S I, 580. (C. F. Seybold*)

al-ḌABBĪ, ABŪ ʿIKRIMA [see al-mufaḍḍal].

DĀBIḲ, a locality in the ʿAzāz region of northern Syria. It lies on the road from Manbid̲j̲ to Anṭākiya (Ṭabarī, iii, 1103) upstream from Aleppo on the river Nahr Ḳuwayḳ. In Assyrian times its name was *Dabigu*, to become *Dabekôn* in Greek. It lies on the edge of the vast plain of Mard̲j̲ Dābiḳ where, under the Umayyads and ʿAbbāsids, troops were stationed prior to being sent on operations against Byzantine territory. The Umayyad caliph Sulaymān b. ʿAbd al-Malik lived in Dābiḳ for some time, and after his death and burial there in Ṣafar 99/Sept. 717 his successor ʿUmar b. ʿAbd al-ʿAzīz was appointed caliph. According to al-Masʿūdī, his tomb was desecrated by the ʿAbbāsids, but the version told by al-S̲h̲ābus̲h̲tī conflicts with this (*K. al-Diyārāt*, Bag̲h̲dād 1951, 149).

In the Ayyūbid era pilgrims visited a monument called *maḳām Dāwūd* on Mt. Barṣāyā near Dābiḳ. The spot today has the name Nabī Dāwūd.

Dābiḳ is known above all for the decisive battle which was fought there on 15 Rad̲j̲ab 922/24 August 1516 between the armies of the sultan Kanṣūh al-G̲h̲ūrī and the Ottoman sultan Selīm I. The Ottoman artillery proved superior, the bravest elements of the Mamlūk cavalry were decimated, and Kanṣūh himself was killed. The Ottoman victory paved the way for their occupation of Syria and Egypt.

DABĪḲ (variant forms *Dabḳa* and *Dabḳū*) was a locality in the outer suburbs of Damietta, noted for the manufacture of high quality woven material, which it exported to the whole of the Muslim empire. The location of Dabīḳ cannot be fixed more exactly. It is found mentioned along with other cities that have disappeared, such as S̲h̲aṭā, Tinnīs, or Tūna, which were probably on the islands of Lake Menzāleh.

Fine cloths embossed with gold were made there, and, during the Fāṭimid period, turbans of multi-coloured linen. These textiles were so sumptious that *dabīḳī* soon became known, and its fame grew to such an extent that the word came to designate a type of material. *Dabīḳī* came to be manufactured more or less everywhere, at Tinnīs and at Damietta, in the Delta, at Asyūṭ, in Upper Egypt, and even in Persia, at Kāzirūn. The quality of the cloth made at Dabīḳ must have dropped, because, according to al-Idrīsī, although these materials were very fine, they could not be compared with those of Tinnīs and Damietta, and this fact can already be deduced from the customs tariff of D̲j̲edda, given by al-Muḳaddasī.

At the present moment, three fragments of material are known—one ʿAbbāsid and two Fāṭimid—that include in their inscriptions the name of Dabīḳ.

The place name is not mentioned by Ibn Mammātī, who, however, mentions the *dabīḳī*.

Ibn Duḳmāḳ (v, 89) and Ibn Dji'ān (76; ʿAbd al-Laṭīf, *Relation de l'Egypte*, 638) mention a place called Dabīḳ in the province of Gharbiyya, but this cannot be the town in the Damietta neighbourhood, which these two writers treat separately (Ibn Duḳmāḳ, v, 78; Ibn Djiʿān, 62 and ʿAbd al-Laṭif, 630).

For the same reason of distance, one could not possibly identify the old Dabīḳ with the modern Dabīdj, twelve kilometres south of Sinballāwayn, which could, on the other hand, well be the Dabīḳ of Ibn Duḳmāḳ and Ibn Djiʿān.

DABĪL [see dwīn]

DABĪR, SALĀMAT ʿALĪ, Mīrzā, Lakhnawī, an Urdū poet, who devoted himself to writing and reciting highly devotional elegies on the death of the martyrs of Karbalā. He was a son of Mīrzā Ghulām Ḥusayn, who is claimed to be a grandson of Mullā Hāshim Shīrāzī (a brother of the famous Ahlī of Shīrāz, d. 934/1536-7). Salāmat ʿAlī was born in Ballīmārān, Dihlī on 11 Djumāda I 1218/ 29 August 1803; he accompanied his father as a child to Lucknow and there received a good education. He studied all the usual Persian and Arabic texts on religious and foreign sciences (*manḳūl wa maʿḳūl*) from well-known *ʿulamāʾ* of the city. He had finished his studies by the time he was 18. He began to write poetry at an early age (c. 1230 or 1232) and continued doing so along with his studies, under the guidance of Mīr Muẓaffar Ḥusayn Ḍamīr of Gurgāon. He soon acquired fame and won the appreciation of the rulers of Awadh, members of their family and the noblemen of the Court. For about 60 years of his life he wrote *marthiyas* (elegaic poems). Towards the end of his life he became almost blind. He, therefore, gladly accepted the suggestion of Wādjid ʿAlī Shāh, then living in Calcutta in exile, that he should go there for treatment; he reached there about Dhu 'l-Ḥidjdja 1290/c. Jan. 1874. A successful operation by a German eye-specialist, who was staying with Wādjid ʿAlī Shāh in Calcutta, restored his sight. He returned to Lucknow, where he had spent the major part of his life, and which he had only left for short periods in the disturbances of 1857 he had moved to Sītāpur for a while; about 1858 he went to Kānpur and in 1859 to ʿAẓīmābād; he visited ʿAẓīmābād again in 1292/1875 and died there on 30 Muḥarram 1292/8 March 1875, he was buried in his own house in a lane which is now known as *Kūča-i Dabīr*, after him. In his old age he suffered much tribulation on account of his loss of sight, and he was grieved by the death of a grown-up son and of a brother.

Dabīr is described as a pious, ascetic, generous, hospitable and serious-minded person. As a poet he was extremely prolific, and had the gift of composing good verses quickly. His compositions consisted mostly of *marthiyas*, *Salāms* (for them see *al-Mīzān*, 485) and *rubāʿīs* (*Ḥayāt-i Dabīr*, i, 272). His rival in this genre of poetry was his contemporary Mīr Anīs, who appeared in Lucknow long after Dabīr had established his fame as a poet. Their rivalry divided their admirers into two rival groups called Dabīrīs and Anīsīs and a considerable literature was produced on their comparative merits and failings (see, for example, Shiblī Nuʿmānī, *Muwāzana Anīs wa Dabīr*, Āgra 1907; Sayyid Nāẓir al-Ḥasan Fawḳ Raḍawi, *al-Mīzān*, ʿAlīgaṙh n.d.; ʿAbd al-Ghafūr Khān Nassākh, *Intikhāb-i Naḳs* 1879; Mīrzā Muḥammad Riḍā Muʿdjiz, *Taṭhīr al-Awsākh*; Mīr Afḍal ʿAlī Daw, *Radd al-Muwāzana*, etc. etc.).

While Anīs is usually praised for the simplicity of his style, easy flow of his verse, and his relatively eloquent (*faṣīḥ*) descriptions, Dabīr is eulogized for his brevity, freshness of his poetical ideas (*maḍāmīn*) and frequent and full use of rhetorical figures, and his touching laments and wailings (Urdū: *bayn*). As an Arabic and Persian scholar he drew freely on the literatures of these languages, incorporating in his poems materials taken from the Ḳurʾān, *ḥadīth* and the works on *Maḳātil*, etc. (cf. a comparative view quoted in *Ḥay. Dab.*, i, 290: The Mīr is eloquent and sweet (*faṣīḥ wa namakīn*)). The fact remains that it was due to the efforts of these two poets that *marthiya* attained such an important position in Urdū Poetry.

Works: Most of Dabīr's poems have been lithographed, though some are still unpublished. These editions are marred by interpolations, *e.g.*, (1) an edition of *marthiyas* in 2 vols. (*Ḥay. Dab.* i, 624); (2) *Daftar-i Mātam*, 20 vols. Lucknow 1897. For an analysis of the contents see *Ḥay. Dab.*, i, 276 ff. These *marthiyas* etc. were lost in the disturbances of 1957 and after, and were collected again later; (3) *Marāthī-i Dabīr*, 2 vols. (*ibid.* i, 490, 493); (4) *Marthiya-i Mīrzā Dabīr*, 2 vols., Lucknow 1875-76 (several editions in the following years), Kānpur 1890-99 (several editions in the following years); (5) *Marthiyahā-yi Mīrzā Dabīr*, Lucknow 1882 (several editions in the following years)); (6) *Abwāb al-Maṣāʾib*, a prose work, relating to the story of Joseph, compared to the story of the martyr of Karbalā, Dihlī (*Ḥay. Dab.*, i, 280); (7) *Rubāʿiyyāt Mīrzā Dabīr*, Lucknow n.d., containing 197 *rubāʿīs*. A smaller collection of these was also published along with those of Anīs in Āgra.

In his younger days the Mīrzā also composed three *dīwāns* of *ghazals*, but later destroyed, lost or withdrew them.

Bibliography: In addition to the references given in the text: Mīr Muḥsin ʿAlī, *Sarāpā-Sukhun*, Lucknow 1292/1875, 108; Mīr Ṣafdar Ḥusayn, *Shams al-Duḥā*, Lucknow 1298/1880-81; Sayyid Afḍal Ḥusayn, Thābit Raḍawī Lakhnawī, *Ḥayāt-i Dabīr*, Lahore, vol. i, 1913, vol. ii, 1915; Muḥammad Ḥusayn Āzād, *Āb-i Ḥayāt*, Lahore 1883, 550-562; Rām Bābū Saksena, *A History of Urdu Literature*, Allāhābād 1940, 131 f. (Urdū version by Mirzā Muḥammad ʿAskarī, Lucknow 1952, 248 f.); Abu 'l-Layth, *Lakhnaʾū kā Dabistāni-Shāʿiri*, Lahore c. 1955, 690 f.; J. F. Blumhardt, *Cat. of Hind. Printed Books in the Br. Mus.*, London 1889, col. 7, 6, 308, *Suppl.*, London 1909, col. 421. (Mohammad Shafi)

DABISTĀN AL-MADHĀHIB, "The school of religions", a work in Persian describing the different religions of and in particular the religious situation in Hindustān in the 11th/17th century; it is the most complete account in the Persian language, later than the *Bayān al-adyān* (6th/12th century), which is accurate but concise, and than the *Tabṣirat al-ʿawāmm* (7th/13th century), written from the Shīʿite point of view. The sources of the *Dabistān* derive partly from the sacred books of the different religious persuasions, partly from verbal information given to the author, and partly from the latter's personal observations. In many chapters he also makes use of the earlier Arabic literature concerning these matters. First of all the religion of the Pārsīs is examined extensively; then that of the Hindūs; after some very short chapters concerned with the Tibetans, the Jews and the Christians, the author passes to the study of Islam and its sects; finally there are some chapters on the philosophers (the Peripatetics and the Neoplatonists) and on the Ṣūfīs. For a long time Muḥsin Fānī was thought (mistakenly) to be the author of this work; in some manuscripts he is mentioned solely in his capacity as the author of a *rubāʿī* which is quoted (see trans. by Shea-Troyer, i, 3); it was certainly an enlightened believer in the Pārsī religion who wrote the *Dabistān*, and we must probably accept those manuscripts which, in agreement with Sirādj al-Dīn Muḥammad Arzū (in a passage from his *Tadhkira*), attribute its composition to Mūbad Shāh or Mullā Mūbad (cf. also Ouseley, *Notices*, 182). It is apparent from the book itself that the author was born in India shortly before 1028/1619, went to Āgra as a youth, spent several years in Kashmīr and at Lahore, visited Persia (Mashhad) and acquired some knowledge of the west and south of India. The *Dabistān* was finished no doubt between 1064 and 1067/1654-57.

Bibliography: *Dabistān al-madhāhib* (Calcutta 1224/1809; other editions from Tehran, Bombay, Lucknow; *The Dabistan or school of manners*, trans. David Shea and Anthony Troyer, Paris 1843, 3 vols. (not always accurate); *JA*, vi, (1845) 406-11; Rieu, *Cat. Persian Mss. of the British Museum*, i, 141 & iii, 1081. (Useful references to other catalogues of manuscripts and to old translations of isolated chapters): Éthé, *Cat. of the Persian Mss. of the India Office Library*, i, no. 1369 (useful references to other catalogues of manuscripts). (J. HOROVITZ-[H. MASSÉ])

ḌĀBIṬ, in Turkish *zabit*, an Ottoman term for certain functionaries and officers, later specialized to describe officers in the armed forces. In earlier Ottoman usage *Ḍābiṭ* seems to indicate a person in charge or in control of a matter or of (? the revenues of) a place (*e.g. Ewḳāf ḍābiṭi, Wilāyet ḍābiṭi* etc.; examples, some with place-names, in Halit Ongan, *Ankara'nın I Numaralı Şer'iye Sicili*, Ankara 1958, index, and L. Fekete, *Die Siyāqat-Schrift*, i, Budapest 1955, 493 ff.; cf. the Persian usage in the sense of collector — Minorsky, *Tadhkirat al-Mulūk*, index). The term seems to have remained in occasional use in this sense until quite a late date (see for example Gibb and Bowen, i, 259, and Dozy, *Suppl.* s.v.). By the 11th/17th century, however, it was already acquiring the technical meaning of army officer. In a *fāʾide* inserted under the year 1058/1648-9 Naʿīmā remarks that in the janissary corps the seniors of each *oda* are as *ḍābiṭs* (*ḍābiṭ gibidir*) to the other soldiers (*nefer*), and proceeds to name the ranks of the janissary officers (Naʿīmā⁴, iv, 351). By the 12th/18th century the term was already in common use in this sense (*e.g.* Resmī, *Khulāṣat al-Iʿtibār*, 5, *'ridjāl we ḍābiṭān'*) and documents cited by Djewdet (i, 360; vi, 367 etc.). From the time of the westernizing reforms onwards it becomes the standard Ottoman equivalent of the European term 'officer'. In the Turkish republic it has been replaced by *subay*, but it remains current in the Arab successor states of the Ottoman Empire. (B. LEWIS)

ḌABṬ, assessment of taxable land by measurement, applied under the later Dihlī sultanate and the Mughals; land so measured is called *ḍabṭī*. See ḌARĪBA, 6.

ḌABṬIYYA, in Turkish *zabtiyye*, a late Ottoman term for the police and gendarmerie. Police duties, formerly under the control of various janissary officers, were placed under the jurisdiction of the Serʿasker ([*q.v.*] see also BĀB-I SERʿASKERĪ) in 1241/1826, and in 1262/1846 became a separate administration, the *Ḍabṭiyye Mushīriyyeti* (Luṭfī viii 27-8). At about the same time a council of police (*medjlis-i ḍabṭiyye*) was established, which was later abolished and replaced by two quasi-judicial bodies, the *dīwān-i ḍabṭiyye* and *medjlis-i taḥḳīḳ*. After several further changes the *mushīriyyet* became a ministry (*neẓāret*) of police in 1286/1870. On 17 July 1909 the name ministry of *Dabṭiyye* was abolished and replaced by a department of public security (*Emniyyet-i ʿUmūmiyye*) under the Ministry of the Interior.

Bibliography: ʿOthmān Nūrī, *Medjelle-i Umūr-i Belediyye*, i, Istanbul 1338/1922, 934 ff. Laws and regulations on police matters will be found in the *Destūr*, (French translations in G. Young, *Corps de Droit Ottoman*, Oxford 1905-6, and G. Aristarchi, *Législation ottomane*, Constantinople 1873-88. See further KARAKOL, SHURṬA. (B. LEWIS)

DĀBŪYA (DĀBŌĒ), the founder of the Dābūyid dynasty in Gīlān [*q.v.*]. The tribe claimed to be of Sāsānid extraction through Dābūya's father, Gīl Gāwbāra. Their residence was the town of Fūman [*q.v.*]. The dynasty clung to Zoroastrianism for a long time, and repeatedly defended the land against the Arabs, until the last ruler, Khūrshīdh II (758/60, 141 or 142 A.H.) had to flee before the superior force of the ʿAbbāsids, and put an end to his own life in Daylam (Ṭabarī, iii, 139 f.). One of his daughters, whose name is unknown, became the wife of the Caliph al-Manṣūr.

The names of the members of the dynasty are as follows: Dābōē, 40 to 56/660-1 to 676.—His brother Khūrshīdh I, 56 to 90/676 to 709.—His son Farrukhān, 709 to 721-22, 90 to 103 A.H., who took the title Ispāhbadh [*q.v.*] ("leader of the army"), and warded off an Arab assault in 717.—His son Dādhburzmihr (Dādhmihr), 103 to 116/721-22 to 734.—His brother Sārūya (Sārōē), for a few months in 116/721-22.—Khūrshīdh II, the son of Dādhburzmihr, 116 to 141 or 142/721-22 to 758-60 (see above).

A dynasty descended from Dābūya's brother Pādhūspān (title), ruled until 1567 and 1576 respectively (from 1453 in two branches) in Rūyān [*q.v.*] and some neighbouring districts.

DACCA [see DHĀKĀ].

ḌĀD, 15th letter of the Arabic alphabet, conventional transcription *ḍ*; numerical value, according to the oriental order, 800 [see ABDJAD].

The definition of the phoneme presents difficulty. The most probable is: *voiced lateralized velarized interdental fricative* (see J. Cantineau, *Consonantisme*, in *Semitica*, iv, 84-5). According to the Arab grammatical tradition: *rikhwa madjhūra muṭbaḳa*. For the *makhradj*, the *shadjriyya* of al-Khalīl (al-Zamakhsharī, *Mufaṣṣal*, 2nd ed. J. P. Broch, 190, line 20) is difficult to define exactly (see De Sacy, *Gr. Ar.*², i, 26, n. 1; M. Bravmann, *Materialien*, 48 and 51). The most plausible meaning for *shadjr* is 'commissure of the lips' according to al-Khalīl's own explanation (*Le Monde Oriental*, 1920, 45, line 8): *mafradj al-fam* (repeated in *Mufaṣṣal*, *ibid.*; Raḍī al-Dīn al-Astarābādhī, *Sharḥ al-Shāfiya*, iii, 254, line 6); *ḍ* is thus in the lateral position.

Sībawayh represents *ḍ* as a lateral simply, and thus describes the *makhradj*; 'between the beginning of the edge of the tongue and the neighbouring molars' (Sībawayh, Paris edition, ii, 453, lines 8-9): a retracted lateral, for this beginning is to be taken as starting from the root of the tongue, and *lām* follows *ḍ* (*ibid.*, lines 9-11; *Mufaṣṣal*, 188, line 19). This does not indicate, for the peculiarity of *istiṭāla* of *ḍ*, a great extent for the place of articulation but rather a dwelling on it, a special prolongation of it. In modern Arabic dialects the passage from *ḍ* to *ḷ* is known (Landberg, *Ḥaḍramoût*, 637), but the almost universal treatment of *ḍ* is its confusion with *ẓ* (voiced emphatic interdental fricative), whose evolution it shares [see ẒĀʾ]. One is thus led to include in the articulation of *ḍ* an activity of the tip of the tongue in the region of the teeth similar to the corresponding lateralized articulation of modern South Arabian (Mehri, Shkhawri, but not the lateralized occlusive of Soḳoṭri), whence the definition proposed above.

A lateral character is to be claimed for *ḍ*, as N. Youshmanov, G. S. Colin, J. Cantineau, and others have done (J. Cantineau, *Consonantisme*, 84). The *ḍ* phoneme of Classical Arabic continues an autonomous phoneme of common Semitic which is even more difficult to define precisely. M. Cohen sees in it a consonant 'of the dental region of which the articulation was doubtless lateral: *ḍ* [conventional transcription]. As an emphatic, this consonant may anciently have formed one of a lateral series (triad?)' (*Essai comparatif*, 149). In Classical Arabic *ḍ* is isolated.

In ancient Semitic, the South Arabian inscriptions assign a special character (of unknown pronunciation) to the phoneme corresponding with the *ḍ* of Classical Arabic. Geez does the same, but in the traditional nunciation it is a *ṣ*; *ṭ* in South Ethiopic. It is represented in Akkadian, Hebrew, and Ugaritic, by *ṣ*, but in Aramaic by *ḳ* in the oldest texts (preserved in Mandean), then by ʿ, a special evolution which represents a thorny problem. See the Table of correspondences in W. Leslau, *Manual of Phonetics*, 328.

For the phonological oppositions of the *ḍ* phoneme in Classical Arabic see J. Cantineau, *Esquisse*, in *BSL* (No. 126), 96, 7th; for the incompatibles, *ibid.*, 134. In view of the latter, J. Cantineau would see in *ḍ* a *lateralized* rather than a *lateral* consonant (*ibid.*, no. 1).

Ḍ undergoes few assimilations in Classical Arabic (see J. Cantineau, *Cours*, 69).

The Arabs saw in *ḍ* one of the *khaṣāʾiṣ* 'special features' of their language (Ibn Djinnī, *Sirr ṣināʿa*, i, 222; al-Suyūṭī, *Muzhir*³, i, 329) and boasted of it (see the line of al-Mutanabbī quoted by Ibn Djinnī, *ibid.*). But Sībawayh (ii, 452, lines 14-5, 17 f.) already registers a corrupt pronunciation: *al-ḍād al-ḍaʿīfa* (M. Bravmann, *Materialien*, 53). In fact the articulation of *ḍād* has disappeared in the modern dialects and Ḳurʾānic recitation and either *ẓ* (voiced velarized interdental fricative) or *ḍ* (voiced velarized dental plosive) is used, according to the treatment of the phoneme in dialect.

In Persian and in Urdū, *ḍād* is a voiced alveolar fricative, and no differentation is made in pronuncation between *dh*, *z*, *ḍ* and *ẓ*.

Bibliography: in the text and s.v. ḤURŪF AL-HIDJĀʾ. (H. FLEISCH)

DADALOGHLU, ĀSHIḲ MŪSĀ-OGHLU WELI, 19th century Turkish folk poet (1790?-1870?), was a member of the Afshār tribe which lived in the Taurus Mountains in S. Anatolia. His father was also a poet and took his *makhlaṣ* from the same family name. It is said that for a time Dadaloghlu acted as imām in the villages and as secretary to the tribal chiefs. As a result of government action against his tribe, which rebelled because it was unwilling to undergo conscription or taxation, he was transported with the rest of the Afshārs to the village of Sindel near ʿAzīziyye in the province of Sīwās (1866-8). It is difficult to establish how well founded are reports that at the end of his life he returned to the Čukurova region and recited his poems in the bazaars of Adana. His poems were not collected during his lifetime. Among them are to be found the chief forms of folk poetry such as *türkü*, *koshma*, *semai*, *varsaghı*, and *destān*. He embellished and enriched the story of Genč ʿOthmān in a number of poems with a local setting. His poetry is harsh and emotional in manner and shows the pure and sincere feelings of a bold, daring, upright, and sensitive tribesman. From passages in his poems one can understand the warlike psychology and nomadism of the society in which he lived. He was one of the last powerful representatives of epic, lyric, and pastoral Turkish folk poetry and story-telling which had continued ever since the composition of *Dede Korkud* and of which *Köroghlu* and *Karadja oghlan* are the leading examples.

DADJĀDJA, the domestic fowl. The word is a noun of unity which, according to Arab lexicographers, may be applied to both the male and the female. Alternative pronunciations are *didjādja* and *dudjādja*. In more recent local usage (cf. Jayakar, Malouf), *didjādjat al-baḥr* and *didjādjat al-ḳubba* denote certain kinds of fish, just as the corresponding Hebrew דָּג.

The animal, which is not mentioned in the Hebrew Bible, was known to the Arabs from pre-Islamic times. Djāḥiẓ reports (ii, 277 f.) that it was given to poets as a reward for their literary achievements. Although it eats dung, it is permitted as human food by Islamic law because the Prophet was seen partaking of it.

The ample information on the fowl and its eggs, which is given in Arabic zoological writings, can partly be traced back to Aristotle's *Historia Animalium*. The fowl has no fear of beasts of prey except the jackal, an inherent enmity existing between the two. It is fearful at night and therefore seeks an elevated sleeping place. It shares the characteristics of both birds of prey and seed-feeding birds, since it eats flesh as well as grains. The hen lays, mostly one egg a day, throughout the year, except in the two winter months (in Egypt, according to Nuwayrī, all the year round without interruption); if she lays twice a day it is a portent of her approaching death. The chicken is produced from the white of the egg, while the yolk provides the nourishment for the embryo. From elongated eggs female chickens are born and males from round ones. Two chickens are produced from double-yolked eggs. If the hen while sitting hears thunder, the eggs are spoiled; if she is old and weak, the eggs have no yolk and produce no chickens. She also lays eggs without being covered by the cock (wind-eggs), but such eggs produce no chickens. When hens become fat they no longer lay, just as fat women do not become pregnant.

The sources mention and describe several kinds of *dadjādj*, some of them reaching the size of a goose. Numerous medicinal uses of eggs, fat, bile, gizzard, dung, etc. are mentioned by Arab zoologists and pharmacologists, partly from classical sources. The meat was considered a wholesome food, although its continual eating was said to cause gout and piles. Half-cooked eggs were credited with special efficacy as an aphrodisiac. The significance of fowl when seen in dreams has been treated in pertinent works.

The Arab astronomers give the name *al-Dadjādja* to the constellation of the Swan, which is also called *al-Ṭā'ir*.

(L. Kopf)

AL-DADJDJĀL, the "deceiver", adjective of Syriac origin, *daggālā*, joined to the word *meshīḥā* or *nebīyā* (Peshitto, Matth., xxiv, 24). In Arabic, used as a substantive to denote the personage endowed with miraculous powers who will arrive before the end of time and, for a limited period of either 40 days or 40 years, will let impurity and tyranny rule the world which, thereafter, is destined to witness universal conversion to Islam. His appearance is one of the proofs of the end of time. The characteristics attributed to him in Muslim eschatological legends combine features from Christ's sermon to his disciples (Matth. xxiv, Mark xiii) with some elements taken from the Apocalypse of St. John of Patmos (xi 7, xii, xiii, xx 5-18, 8-10).

These elements reappear in the pseudo-apocalyptic literature of later periods. After the invasions of the Huns, St. Ephraem makes him appear from Chorasé (Chorasène, Khurāsān), in his sermon on the end of time (Scti. Ephremi Syri, *Sermo II de fine extremo*, trans. T. J. Lamy, iii, 187-214, §§ 9-13). His essential activity is to lead the crowds astray, to accomplish miracles (short of restoring the dead to life), to kill Elias and Enoch, the two witnesses put forward by God against him—they will immediately come to life again—and finally to be conquered and dismembered at the coming of the Son. The Ps. Methodius (*Monumenta SS. Patr. Orthodoxographa graeca*, Bale 1569, 99) speaks of a "son of the destruction" coming from Chorasé, and finally perishing at the hands of the king of the Romans, before the Second Coming. In a similar passage, the relationship being unconcealed, the Apocalypse of Baḥīrā speaks in the same terms of one Ibn al-Halāk who will perish at the hands of the angel of Thunder (MS. Arab. Paris, 215, f° 171).

Unknown in the Ḳur'ān, the same figure appears in Muslim traditions. Ibn Ḥanbal repeats the legends about the ass on which he rides, the sinners and hypocrites who attend him, his end before Jesus (iii, 867, iii, 238, ii, 397-98, 407-408). Similarly, in the *Kitāb al-Fitan* of the two *Ṣaḥīḥs*, there is a chapter *Bāb dhikr al-Dadjdjāl*, which describes him as a corpulent, red-faced man with one eye and frizzy hair, who brings with him fire and water, the water being of fire and the fire of cold water. The Prophet will have announced his coming and will have prayed to God for help against his *fitna*. Conquering the world, he will be unable, at Medina (and Mecca), to cross the barrier formed by angels standing at the gates of the town (al-Bukhārī, ed. Munīriyya, ix, 107-110). These traditions derive their details from St. Ephraem: he will bring with him a mountain of bread and a river of water, and also the episode, though condensed and distorted, of his meeting with Elias and Enoch (an upright man among upright men who will denounce him, and whom he will kill and bring to life again, but will be powerless to put to death once more). On his brow he will bear the mark *Kāfir* (for detailed references see art. by Wensinck in *Shorter Encyclopaedia of Islam*, 67, and s.v., *Handbook of Early Muhammadan Tradition*).

Later apocalyptic writings: the revelations of Kaʿb al-Aḥbār (Ms. Arab. Paris, 2602, f° 128 sqq., cf. f° 134 v°), *Ṣayḥat al-Būm fī ḥawādith al-Rūm* (ibid. f° 119, 120 v°), *Shams al-Ghuyūb fī ḥanādis al-Ḳulūb* (Ms. Arab. Paris, 2669, f° 55n-56 v°), and also the Christian pamphlet on the capture of Constantinople in 1204, repeating the old Revelations of Sibylla, daughter of Herael (Ms. Arab. Paris, 70, 74, f° 126 v° ff., 178, f° 175 ff.), reproduce the description of Dadjdjāl's coming, his false miracles, his conquests and his end. But clearly in the Muslim apocalypses it is at the hands of the Mahdī that the false claimant who had usurped his title is to perish, whilst the Revelation of Sibylla makes him die at the hands of Jesus, at the very moment of the end of time. These accounts insist upon Dadjdjāl's beauty and powers of seduction, and repeat the

episode of the righteous men denouncing him. The apocalypse of Sibylla believes that the decisive proof of his imposture is his inability to raise up the dead.

In considering these eschatological documents it appears that, from the 11th century at least until the 16th century, Judeo-Christian traditions regarding Dadjdjāl remained alive and formed an indispensable element in descriptions of the period preceding the Judgment. Conflating two traditions, ʿAbd al-Ḳāhir al-Baghdādī, *K. al-Farḳ bayn al-Firaḳ* (Cairo 1910, 266 and 332-333) regards him as the ultimate term of comparison to describe false doctrine and going astray—though his sedition is only to last 40 days—and recalls that Christians believed that he would perish at the hands of Jesus who, in that way, would be converted to Islam after killing pigs, scattering wine and taking his place for prayer at the Kaʿba.

The body of legend about Dadjdjāl is completed by statements about his origin. Apocalyptic texts make him come from the most remote regions. In St. Ephraem and the apocalypse *Shams al-Ghuyūb* (Ms. Paris, 2559), he comes from Khurāsān (cf. Ibn al-Wardī, al-Bīrūni). According to Ps. Kaʿb al-Aḥbār and the *Ṣayḥat al-Būm* (Ms. ar. Paris, 2502), he must come from the West. Geographers and travellers of the classical period state that he dwelt in the countries which the *ʿAdjāʾib al-Hind* habitually peopled with extraordinary beings, following the traditions of the Alexander Romance. Generally it was the East Indies which were the chosen place, from the time of Ibn Khurradādhbih and al-Masʿūdī to Ibn Iyās. A giant, false prophet, king of the Jews, representations of him vary according to the degree of literary information available or the predominating prejudices. It is interesting to note the allusion to the legend of Prometheus which makes him live chained to a mountain on an island in the sea (*Mukhtaṣar al-ʿAdjāʾib*, 130; al-Masʿūdī, *Murūdj*, iv, 28) where demons bring him his food. (A. Abel)

ḌAFĪR, an important, purely nomadic camel-breeding Sunnī (Mālikī) tribe of south-western ʿIrāḳ, whose *dīra* has been for the last 150 years in the steppe south of the Euphrates and Shaṭṭ al-ʿArab from the neighbourhood of Zubayr to that of Samāwa. Their immigration into ʿIrāḳ, dating from about 1220/1805, was caused by bad relations with the then powerful and fanatical rule of Ibn Saʿūd, who forcibly demanded their obedience. Their earlier history traces legendary origins in Nadjd and even in the Ḥidjāz; but in fact the modern tribe represents evidently a conglomeration of various *badw* elements from many parts of Arabia, more or less unified by the ruling family of Ibn Suwayṭ. Tribal traditions record many wars and raids of the usual Arab type, with the Muṭayr, Banī Khālid, Shammar and others. They were, while still in Nadjd, occasionally tributary to the Shammar, the Shaykh of Kuwayt, and the family of Ibn Saʿūd.

Administratively, the Ḍafīr are now grouped under the *liwā* headquarters of Baṣra, but move seasonally into Kuwayt territory or that of Saʿūdī Arabia. Their relations with the Turkish and ʿIrāḳ Goverments since the early 13th/19th century have been fairly good, with lapses especially when they habitually looted caravans on the Nadjf—Ḥāʾil road; and they have now lost much of their wild and inaccessible, though not their nomadic, character. Varying, but on the whole amicable, relations have been maintained with the Muntafiḳ, their eastern and riverain neighbours; bad, with the Muṭayr and Shammar and ʿAniza. The tribe was heavily involved in the serious raiding into ʿIrāḳ by Saʿūdī (chiefly Muṭayr) forces in the period 1340/1344 (1921/25).

(S. H. Longrigg)

DAFN AL-DHUNŪB [see Dhunūb, dafn al-].

DAFTAR, a stitched or bound booklet, or register, more especially an account or letter-book used in administrative offices. The word derives ultimately from the Greek διφθέρα "hide", and hence prepared hide for writing. It was already used in ancient Greek in the sense of parchment or, more generally, writing materials. In the 5th century B.C. Herodotus (v, 58) remarks that the Ionians, like certain Barbarians of his own day, had formerly written on skins, and still applied the term *diphthera* to papyrus rolls; in the 4th Ctesias (*in* Diodorus Siculus ii, 32; cf. A. Christensen, *Heltedigtning og Fortællingslitteratur hos Iranerne i Oldtiden*, Copenhagen 1935, 69 ff.) claimed, somewhat unconvincingly, to have based his stories on the βασιλικαὶ διφθέραι—presumably the royal archives—of Persia. The word also occurs in pre-Islamic and even pre-Christian Jewish Aramaic texts (V. Gardthausen, *Griechische Paläographie*², i, Leipzig 1911, 91 f.; M. Jastrow, *A Dictionary of the Targumim etc.*², New York 1926, 304. Attempts to derive it from an Iranian root meaning to write (also found in *dabīr*, *dīwān*) are unconvincing; on the other hand, in view of the testimony of the Arab authors, it is probable that the word reached Arabic via Persian.

I. The Classical Period

In early Islamic times *daftar* seems to have been used to denote the codex form of book or booklet, as opposed to rolls and loose sheets. It was at first applied to quires and notebooks, especially those said to have been kept by some collectors of traditions as an aid to their memories; later, when sizable manuscript books come into existence, it was applied to them also (N. Abbott, *Studies in Arabic Literary Papyri*, i, Chicago 1957, 21-24; cf. Goldziher, *Muh.St.*, ii, 50-52 and 180-1. Stories of personal libraries and record collections in the first century A.H. must be treated with caution, cf. the comments of J. Schacht on the spurious tradition of the archives of Kurayb, *On Mūsā b. ʿUqba's Kitāb al-Maghāzī*, *AO*, 1953, xxi, 296-7. On the earliest Arabic papyrus quires see A. Grohmann, *The Value of Arabic Papyri*, *Proc. of the Royal Soc. of Hist. Studies*, i, Cairo 1951, 43 ff.).

The creation of the first Islamic record office is usually ascribed to the Caliph ʿUmar, who instituted the muster-rolls and pay-rolls of the fighting-men (see dīwān). The initial form of these is not known, but before long they were probably kept on papyrus, which after the conquest of Egypt became the usual writing material in the administrative offices of the Caliphate. The papyri show that records of land, population, and taxes were kept in Egypt; surviving documents include quires as well as rolls and loose sheets, though the latter seem to have been the usual form, and no quire in Arabic appears until a comparatively late date (see A. Grohmann, *New Discoveries in Arabic Papyri. An Arabic Tax-Account Book*, *BIE*, xxxii, 1951, 159-170. In general, the Umayyad Caliphs seem to have followed Byzantine bureaucratic practices, and kept their records on papyrus. This did not lend itself to the codex form. There was, however, also another bureaucratic tradition. The Sāsānids clearly could not have relied on supplies of imported Egyptian papyrus for

their administration, and made use of a variety of prepared skins as writing materials (cf. Ibn al-Nadīm, *Fihrist*, 21). According to Ḥasan al-Ḳummī, quoting Hamadānī on the authority of al-Madāʾinī (*Taʾrīkh-i Ḳumm* 180), the Sāsānid Emperor Kobād kept a land-tax office at Ḥulwān; this is indirectly confirmed by Yaʿḳūbī's story (*Taʾrīkh*, ii, 258) of the procuring, in Muʿāwiya's time, of lists of Sāsānid domain lands from Ḥulwān (A. K. S. Lambton, *Landlord and Peasant in Persia*, London 1953, 15 n. 1). It is possible that some of the army lists of the earlier period, at least in the ex-Persian provinces, were already in codex form. Balādhurī (*Futūḥ* 450; ed. Cairo 1901, 455) has ʿUmar say to the Banū ʿAdī "if the *daftar* is closed (*yuṭbaḳ*) on you', and explains it as meaning "if you are registered last". Abū Muslim is said to have prepared a pay-roll called *daftar* instead of the usual *dīwān* of his followers in Khurāsān in 129/766-7 (Ṭabarī, ii, 1957, 1969; see further N. Fries, *Das Heerwesen der Araber zur Zeit der Omaijaden*, 1921, 9; W. Hoenerbach, *Zur Heeresverwaltung der Abbasiden*, *Isl.*, xxix, 1949-50, 263). These may, of course, be no more than a projection backwards, by later historians, of a term common in their own time, though it is significant that the first example comes from the East.

According to the bureaucratic tradition, it was Khālid b. Barmak who, during the reign of al-Ṣaffāḥ, introduced the codex or register into the central administration. Until that time, says Djahshiyārī (fol. 45 b; ed. Cairo 89) the records of the *dīwāns* were kept on *ṣuḥuf*; Khālid was the first to keep them in *daftars*. Maḳrīzī (*Khiṭaṭ*, i, 91) goes further and says that the *ṣuḥuf mudradja* (? papyrus rolls, cf. Ḳalḳashandī, *Ṣubḥ*, i, 423—*adrādj min kāghid waraḳ*) which had hitherto been used were replaced by *dafātir min al-djulūd*—parchment codices. In the time of Hārūn al-Rashīd, Khālid's grandson, Djaʿfar b. Yaḥyā al-Barmakī, was responsible, it is said, for the introduction of paper. In this story there is some element of exaggeration. An incident told by Djahshiyārī (fol. 79 b; ed. Cairo 138) shows that under Manṣūr papyrus was still much used in government offices, and the supply from Egypt a matter of concern; it was still used under Hārūn al-Rashīd, and even as late as the time of Muʿtaṣim, an abortive attempt was made to set up a papyrus factory, with Egyptian workmen, in Sāmarrā (W. Björkman, *Beiträge zur Geschichte der Staatskanzlei im islamischen Ägypten*, Hamburg 1928, 7; A. Grohmann, *From the World of Arabic Papyri*, Cairo 1952, 23 ff., 45 ff., 52; *Corpus Papyrorum Raineri Archiducis Austriae*, iii, *Series Arabica*, ed. A. Grohmann, i/I, *Allgemeine Einführung in die arabischen Papyri*, Vienna 1924, 32 ff., 54 ff., etc.). It is, however, broadly true that from the accession of the ʿAbbāsids the register in codex form came to be the normal method of keeping records and accounts in government offices. Its use was confirmed and extended with the general adoption of paper from the 9th century onwards, and from this time the term *daftar* is in the main confined to administrative registers and record-books. The system of *daftars* seems to have been first elaborated in Iran and ʿIrāḳ. In Egypt papyrus remained in use until the 4th/10th century, but the eastern form of *daftar* seems to have been introduced even before the general adoption of paper. Surviving specimens of papyrus account-books in quire form (described by A. Grohmann, *New Discoveries*.., and idem, *New Discoveries*.. II, *BIE*, xxxv, 1952-3, 159-169) tally fairly closely with literary descriptions of the *daftar* in eastern sources (see below). From Egypt the *daftar* spread to the western Islamic world. In 373/985, al-Muḳaddasī (239) found it worthy of note that the people of Andalusia had their account-books as well as their Ḳurʾāns on parchment. (On writing materials see further DJILD, KĀGHID, ḲIRṬĀS, RIḲḲ, WARAḲ).

Types of Daftar.

With the development of elaborate bureaucratic organizations, the keeping of *daftars* became a task calling for special skills and knowledge, and *daftars* of many different types emerge. The first systematic account that we possess of the records and registers of a Muslim administrative office is that given by Muḥammad b. Aḥmad al-Khwārizmī in the late 4th/10th century. He enumerates the following:

(1) *Ḳānūn al-Kharādj*—the basic survey in accordance with which the *Kharādj* is collected.

(2) *Al-Awāradj*—Arabicized form of *Awāra*, transferred; shows the debts owed by individual persons, according to the *Ḳānūn*, and the instalments paid until they are settled. (On *Awāradj* see V. Minorsky in his edition of *Tadhkirat al-Muluk*, London 1943, 144; to be modified in the light of W. Hinz, *Rechnungswesen*, 120 ff.).

(3) *Al-Rūznāmadj*—day-book; the daily record of payments and receipts.

(4) *Al-Khatma*—the statement of income and expenditure presented monthly by the *Djahbadh*.

(5) *Al-Khatma al-Djāmiʿa*—the annual statement.

(6) *Al-Taʾrīdj*—an addition register, showing those categories (*abwāb*) which need to be seen globally, arranged for easy addition, with totals. Receipts for payments made are also registered here.

(7) *Al-ʿArīḍa*—a subtraction register, for those categories where the difference between two figures needs to be shown. It is arranged in three columns, with the result in the third. Such is the *ʿArīḍa* showing the difference between the original and the revised figures, the latter being usually smaller, (that is, presumably, the estimates and the amounts actually received. This seems to be the meaning of *aṣl* and *istikhrādj*, rather than income and expenditure, as assumed by Cevdet and Uzunçarşılı. On *istikhrādj* in the sense of revision cf. Uzunçarşılı, *Medhal*, 278 and Hinz, *Rechnungswesen* 18, On *Aṣl* cf. Māwardī, *al-Aḥkām al-Sulṭāniyya*, ed. Enger 373, ed. Cairo 209. The expression *dafātir-i aṣl wa istikhrādj* occurs in a text from Saldjūḳ Anatolia—O. Turan, *Türkiye Selcukları hakkında Resmi Vesikalar*, Ankara 1958, text xxvi). These are itemized in the first and second columns, with the differences between them in the third column. Grand totals are shown at the foot of each of the three columns.

(8) *Al-Barāʾa*—a receipt given by the *Djahbadh* or *Khāzin* [*qq.v.*] to taxpayers. (It is not clear whether Khwārizmī means a register of copies and receipts, or is merely naming the *barāʾa* as a kind of document).

(9) *Al-Muwāfaḳa wa 'l-djamāʿa*—a comprehensive accounting (*ḥisāb djāmiʿ*) presented by an *ʿāmil* on relinquishing his appointment. If it is approved by the authority to whom he presents it, it is called *muwāfaḳa*, if they differ, it is called *muḥāsaba*.

Passing to the registers of the army office (*dīwān al-djaysh*), Khwārizmī lists:

(10) *Al-Djarīda al-Sawdāʾ*—prepared annually for each command, showing the names of the soldiers, with their pedigree (*nasab*), ethnic origin (*djins*), physical descriptions (*ḥilya*), rations, pay etc. This is the basic central register of this *dīwān*.

(11) *Radj*ʿ*a*—a requisition (*ḥisāb*) issued by the paymaster (*muʿṭī*) for certain troops stationed in outlying areas, for one issue of pay (*ṭamaʿ*) on reference to the *dīwān*.

(12) *Al-Radj*ʿ*a al-Djāmiʿa*—a global requisition issued by the head of the army office for each general issue (*ṭamaʿ*) of army pay, rations, etc.

(13) *Al-Ṣakk*—an inventory (*ʿamal*—cf. Dozy, *Suppl.* ii, 175) required for every *ṭamaʿ* showing the names of the payees, with numbers and amounts, and bearing the signed authority to pay of the sultan. The *Ṣakk* is also required for the hire of muleteers and camel-drivers.

(14) *Al-Muʾāmara*—an inventory of orders issued during the period of the *ṭamaʿ*, bearing at its end a signed authorization (*idjāza*) by the sultan. A similar *muʾāmara* is prepared by every *dīwān*.

(15) *Al-Istiḳrār*—an inventory of the supplies remaining in hand after issues and payments have been made.

(16) *Al-Muwāṣafa*—a list (*ʿamal*) showing the circumstances and causes of any changes occurring (*i.e.*. transfers, dismissals, deaths, promotions, etc.).

(17) *Al-Djarīda al-Musadjdjala*—the sealed register. The *Sidjill* (seal) is the letter given to an envoy or messenger, authorizing him, on arrival, to recover the expenses of his journey from any *ʿĀmil*. The *Sidjill* is also the judicial verdict (*maḥḍar*) prepared by a *ḳāḍī*.

(18) *Al-Fihrist*—a repertory of the inventories and registers in the *dīwān*.

(19) *Al-Dastūr*—a copy of the *djamāʿa* made from the draft.

Finally, Khʷarizmī gives the names of three registers (*daftar*) used by the scribes of ʿIrāḳ. They are (as given in the edition) (1) الانجيج
(2) الاوشنج
(3) الدروزن

The third is explained as a register of the land measurement survey (*misāḥa*). (Khwārizmī, *Mafātīḥ al-ʿUlūm*, ed. Van Vloten, 54-8, cf. Mez, *Renaissance*, 103, Eng. tr. 109, where however Mez's meaning is not very clearly rendered. An abridged Turkish paraphrase of Khʷārizmī's text was made, in the light of Ottoman bureaucratic experience, by M. Cevdet, *Defter*, 88-91; there is also a rather more rapid Turkish summary by I. H. Uzunçarşılı, *Osmanlı Devleti Teşkilâtına Medhal*, Istanbul 1941, 479-480. This last has been translated into German by B. Spuler, *Iran in früh-islamischer Zeit*, Wiesbaden 1952, 338 n. 1).

It is probable that Khʷārizmī's account refers to Samanid rather than ʿAbbāsid offices in this first instance. It is, however, almost certainly applicable in great part to ʿAbbāsid administration, and much of what he says is attested by passing references in the historians of ʿIrāḳ and Persia.

Khʷārizmī's registers fall into two main groups, the fiscal and the military, which may now be considered separately.

Fiscal Registers.

The most important register of the tax-office is the *Ḳānūn*, the survey of land and taxable crops, (this would seem to be the meaning of the term *ḳānūn* in Māwardī, *Al-Aḥkām al-Sulṭāniyya*, ed. Enger 370, ed. Cairo 207).

This served as the basis for the assessment and collection of the land-tax and was thus the main instrument and authority for the department's activities. The term *Ḳānūn*, already recognized by Khʷārizmī as arabicized Greek (*yūnāniyya muʿarraba*), was employed chiefly in ʿIrāḳ and the East, and was still in use in the 13th and 14th centuries, when it designated a kind of cadastral and fiscal survey (M. Minovi and V. Minorsky, *Nasīr al-Dīn Tūsī on Finance*, *BSOAS*, x, 1940, 761, 773, 781; Hinz, *Rechnungswesen*, 134 ff.). In later times the term *ḳānūn* in this sense seems to have fallen out of use, and was replaced by others. In Egypt the term *mukallafa* was used to designate the land survey registers, which were prepared by a *māsiḥ* and arranged by villages (Grohmann, *New Discoveries*.., 163). According to Maḳrīzī, *Khiṭaṭ*, i, 82, a new survey was made in Egypt every thirty years. (For specimens of land-tax registers from Egypt, on papyrus rolls, see A. Dietrich, *Arabische Papyri*, Leipzig 1937, 81 ff. (see further DAFTAR-I KHĀḲĀNĪ, MISĀḤA, RAWK, TAḤRĪR and TAPU).

The *Rūznāmadj* or *Rūznāmče* is mentioned in an anecdote attributed to the time of Yaḥyā b. Khālid al-Barmakī. A Persian taunts an Arab with the dependence of Arabic on Persian for terms and nomenclature, "even in your cookery, your drinks, and your *dīwāns*", and cites the word *Rūznāmadj*, as an example in the last-named group. (Muḥammad b. Yaḥyā al-Ṣūlī, *Adab al-Kātib*, Cairo 1341, 193). A passage in Miskawayh throws some light on how the *Rūznāmadj* was kept, in the treasury, in early 4th/10th century Baghdad. In 315/927, he tells us, the wazīr ʿAlī b. ʿĪsā 'relied on Ibrāhīm b. Ayyūb (a Christian treasury official, appointed head of the *Dīwān al-Djahbadha* in the following year—ʿArīb, *Tab. Cont.* 135; on him see also Ṣūlī, *Akhbār al-Rāḍī* 199; Hilāl al-Sābī, *Wuzarāʾ*, 136, 279, 296) to report to him on financial matters, to instruct the Treasurer (*Ṣāḥib bayt al-māl*) concerning his daily disbursements, and to require of him the weekly presentation of the *Rūznāmadjāt*, so that he might quickly know what had been paid out, what received, and what the deficit was (*mā ḥalla wa-mā ḳabaḍa wa-mā baḳiya*). The previous practice in making up the account (*khatma*) had been to present a monthly statement to the *dīwān* in the middle of the following month'. (*Tadjārib al-Umam*, ed. Amedroz, i, 151-2).

Two other passages in the same work indicate that the functionary in the treasury whose task it was to prepare the *khatma* was the *Djahbadh* [*q.v.*] (ibid., 155 and 164. The rendering of these passages in the English translation of Miskawayh by D. S. Margoliouth does not bring out their technical significance). Two documents of the time of al-Muḳtadir, quoted in the *Taʾrīkh-i Ḳumm*, shows how the *Rūznāmadj* functioned in Ḳumm and Fārs. Here the writer (*Kātib*) of the *Rūznamādj* is distinct from the *djahbadh*, and is a government official. His task is to register the sums received in taxes and issue receipts, called *Barāʾa* [*q.v.*], and to act as a kind of auditor on the operations of the *Djahbadh* (*Taʾrīkh-i Ḳumm*, 149 ff.; cf. Ann K. S. Lambton, *An Account of the Tarikhi Qumm*, *BSOAS*, xii, 1948, 595; C. Cahen, *Quelques problèmes économiques et fiscaux de l'Iraq Buyide* ... *AIEO*, x, 1952, 355. On the *Rūznāmadj* see further F. Løkkegaard, *Islamic Taxation in the Classic Period*, Copenhagen 1950, 149 and 159). In Ayyūbid Egypt Ibn Mammātī still includes the preparation of the *Rūznāmadj* and the *Khatma* among the duties of the *Djahbadh* (*Kitāb Ḳawānīn al-Dawāwīn*, ed. A. S. Atiya, Cairo 1943, 304), For examples of *Rūznāmadj* from Egypt see Grohmann, *New Discoveries*..; for a discussion of the systems of accountancy they reveal, C. Leyerer,

Die Verrechnung und Verwaltung.. See further ḤISĀB and MUḤĀSABA.

Many scattered references to the *daftar*s kept in ʿAbbāsid offices will be found in the writings of Miskawayh, Hilāl, and others especially interested in administrative affairs. Some idea of the scale and presentation of the accounts of the state may be gathered from a few individual balance sheets of imperial revenue and expenditure that have been preserved by the historians. The earliest, dating from the time of Hārūn al-Ras͟hīd, is preserved by D̲j̲ahs͟hiyārī (fol. 179a-182b; ed. 281-8) and, in a variant version, by Ibn K͟haldūn (*Muḳ*. i, 321-4= Rosenthal, i, 361-5. See further R. Levy, *The Social Structure of Islam*, Cambridge 1957, 317-320. A budget for 306/908 is given by Hilāl, *Wuzarāʾ*, 11-22, and was analysed, together with other sources, by A. von Kremer, *Über das Einnahmebudget des Abbasiden-Reiches, Denkschrift d. Phil. hist. Kl. d. Wiener Ak.*, xxxvi, 1888, 283-362. A statement of the revenues of the privy purse (*Bayt māl al-K͟hāṣṣa*) in the 4th/10th century is given by Miskawayh (Mez 115-6. See further BAYT AL-MĀL).

Military Registers.

The muster-rolls of fighting-men date back to the beginnings of the Islamic state. These tribal rolls were, however, of quite a different character from the regular army lists described by K͟hʷārizmī. It may be that Abū Muslim was the first to introduce the *daftar* of soldiers; certainly the practice became general under the ʿAbbāsids. Besides K͟hʷārizmī's notes, we have a fuller description of the army lists kept in the *dīwān al-d̲j̲ays͟h* in Ḳudāma's treatise on the land-tax, and in a late anonymous treatise on tactics (Tr. Wüstenfeld, in *Das Heerwesen der Muhammedaner*, Göttingen 1880, 1-7. Both are examined, with other evidence, by W. Hoenerbach, *Zur Heeresverwaltung* ... 269 ff. See further ʿAṬĀʾ). Similar lists were kept in the *dīwān al-d̲j̲ays͟h* and *dīwān al-rawātib* (army office and pay office) of the Fāṭimids in Egypt (Ḳalḳas͟handī, *Ṣubḥ*, vi, 492-3 = Wüstenfeld, *Die Geographie und Verwaltung von Ägypten*, Göttingen 1879, 190-1). The common term for the army lists was *D̲j̲arīda*.

Diplomatic Registers.

K͟hʷārizmī's description is confined to financial and statistical registers—to accounts, inventories and the like in the tax and pay offices. Besides these there were also letter-books and other diplomatic registers, used in the chancery offices. A description of those kept in the Fāṭimid chancery (*dīwān al-rasāʾil*) is given by the Egyptian scribe Ibn al-Ṣayrafī (463-542/1070-1147). In the 12th chapter of his *Ḳānūn Dīwān al-Rasāʾil* (ed. ʿAlī Bahd̲j̲at, Cairo 1905, 137-141, Fr. trans. by H. Massé in *BIFAO*, xi, 1914, 104-8; cf. Ḳalḳas͟handī, *Ṣubḥ*., i, 133-5, where they are given in a slightly different order, and Björkman, *Beiträge*, 24-5), he considers the registers (*daftar*) and memoranda (*tad̲h̲kira*; Massé translates 'bulletin') which should be kept in this office, and the qualities of their keeper. This, he says is one of the most important tasks in the *dīwān*. The registrar must be reliable, long-suffering, painstaking, and work-loving, and should keep the following memoranda and registers.

(1) Memoranda (*tad̲h̲ākir*) of important matters (*muhimmāt al-umūr*) which have been dealt with in correspondence, and to which it may be necessary to refer. These memoranda ((*tad̲h̲ākir*) are much easier for reference than papers in bundles (*aḍābīr*; Massé translates 'dossier'). All letters received must therefore, after being answered, be passed to the registrar, who will consider them and record what is needed in his memoranda, together with any reply sent. He will assign a number of sheets (*awrāḳ*) in his memoranda to each transaction (*ṣafḳa*), with an appropriate heading. He will then register incoming letters, noting their provenance, date of arrival and contents, together with a note of the reply sent or, if such be the case, of the fact that no reply was sent. He will continue this to the end of the year, when he will start a new *tad̲h̲kira*.

(2) Memoranda of important orders (*awāmir*) in outgoing letters, in which are noted also the contents and dates of arrival of replies received to them. This is to ensure that orders are not disregarded and left unanswered.

(3) A register (*daftar*) showing the correct forms of *inscriptio* (*alḳāb*), *salutatio* (*duʿāʾ*), etc. to be used for various officials and dignitaries, as well as foreign rulers and other correspondents abroad, in different types of letters and diplomas. For each office or post (*k͟hidma*) there should be a separate sheet (*waraḳa mufrada*) showing the name of its occupant, his *laḳab*, and his *duʿāʾ*. Changes and transfers must be carefully noted.

(4) A register of major events (*al-ḥawādit͟h al-ʿaẓīma*).

(5) A specification (*tibyān*) of ceremonial (*tas͟hrīfāt*) and robes of honour (*k͟hilʿa*), to serve as a model when required. This should show grants made, with sartorial details, and prices.

(6) A repertory (*fihrist*), by year, month, and day, of incoming letters, showing provenance, date of arrival with a summary or, if needed, a transcript of the text.

(7) The same for outgoing letters.

(8) A repertory of diplomas, brevets, investitures, safe-conducts, etc. This is to be prepared monthly, accumulated yearly, and restarted each new year.

Finally, Ibn al-Ṣayrafī refers to the need to record Arabic translations of letters received in foreign scripts (*k͟haṭṭ*) such as Armenian, Greek or Frankish.

According to Ḳalḳas͟handī (*Ṣubḥ*, i, 139, cf. Björkman, *Beiträge*, 39), these Fāṭimid registers were in general maintained in the Cairo chancery until the end of the 8th/14th century. It is clear that this system of chancery registration and records originated in the eastern lands of the Caliphate, and continued there in one form or another, through the Middle Ages. Its later development can be seen in the Ottoman *Mühimme Defteri*, *Aḥkām Defteri*, *Tewd̲j̲īhāt Defteri*, *Tes͟hrīfātd̲j̲ī Ḳalemi Defteri*, etc.

II. The Turkish and Mongol Period.

In bureaucratic practice, as is in most other aspects of government and administration, the period of domination by the Steppe peoples, Turks and Mongols, brought noteworthy changes. Some of these may be due to Chinese influences, penetrating through the Uygurs, the Karak͟hitay, and above all through the Asian Empire of the Mongols. It seems likely that the system of registration owes something to East Asian examples (see for example D̲j̲uwaynī, i, 24-5 = Boyle, i, 33-4, and Ras͟hīd al-Dīn, *D̲j̲āmiʿ al-Tawārīk͟h*, ed. Blochet, 39-40, 56-7; cf. ibid. 483 on the *daftar*s of Pekin), but this whole question is still in need of further investigation.

Despite some evidence of reorganization under the Great Sald̲j̲ūḳs, the registrars and book-keepers of the Sultanate, as well as of Sald̲j̲ūḳid Anatolia and Ayyūbid Egypt, seem to have continued many of

the practices of the preceding period. What development there is seems to be in technical matters, especially in the collection and presentation of statistical data. Some idea of bureaucratic practice in the Sultanate of Rum can be obtained from Ibn Bībī, *Al-Awāmir al-ʿAlaʾiyya*, facsimile ed. Ankara 1956 (ed. N. Lugal and A. S. Erzi, part 1; Ankara 1937; abridgment, Houtsma, *Recueil*, ii; German trans. H. W. Duda, Copenhagen 1959; Turkish adaptation by Yazīdjīoghlu ʿAlī, Houtsma, *Recueil*, iii). Registers were kept at the *Dīwān-i Aʿlā*, and dealt with land and tax matters. As new territories were acquired or recovered, new surveys were conducted (Ibn Bībī, 146, Antalya; 153-4, Sinop; 428, Akhlāṭ). An addition by Yazīdjīoghlu (*Recueil*, iii 105—not in Ibn Bībī) tells that during the reign of ʿIzz al-Dīn Kaykāwūs the office of *Ṣāḥib-i Dīwān* and the care of the finance registers (*emwāl defātiri*) were entrusted to Khwādja Badr al-Dīn Khurāsānī, 'who was unequalled in the lands of Rūm in his knowledge of *khaṭṭ*, *balāgha*, *inshāʾ*, *siyāḳat*, and *ḥisāb*' [*qq.v.*]. At the same time Khwādja Fakhr al-Dīn ʿAlī Tabrīzī was put in charge of *inshāʾ* and *maktūbāt*, and each of the 12 *daftars* in the *dīwān-i wizārat* entrusted to a competent master (*ustād*). On another occasion the office of *amīr-i ʿāriḍ* was entrusted to Shams al-Dīn, also a specialist in *inshāʾ* and *siyāḳat* (Ibn Bībī 127), Yazīdjīoghlu adds the explanation that this office involved the control of the military registers (*čeri defteri*, *Recueil*, iii, 109. For similar appointments to the *dīwān al-ʿarḍ* by Sandjar see *K. ʿAtabat al-Kataba*, edd. Muḥ. Ḳazwīnī and ʿAbbās Iḳbāl, Tehran 1329, 39-40, 72-3). Another passage in the same work (*Recueil*, iii, 210) speaks of 24 registrars, 12 in the *dīwān-i wizārat* dealing with land and taxes, and 12 in the *dīwān-i ʿāriḍ* dealing with the lists of soldiers, pay and fiefs. A poem cited by Yazīdjīoghlu (254-5), repeats these figures, but awakens doubt of their authenticity by linking them with the recurring figure 12 in the Oghuz legend. The same poem claims complete coverage in the registration of lands (Cevdet 91-3).

From the Il-Khānid period we have, for the first time, detailed treatises on public accounting. Two important works, the *Saʿādat-nāma* of Falak ʿAlā-i Tabrīzī (compiled 707/1307) and the *Risāla-i Falakiyya* of ʿAbd Allah b. Muḥammad b. Kiyā al-Māzandarānī (ca. 767/1363) were discovered and analysed by Zeki Velidi [Togan] (*Moğollar devrinde Anadolu'nun Iktisadî Vaziyeti*, *THITM*, i, 1931, 1-42). A Tīmūrid manual, written in Herāt ca. 845/1441, was discovered by Adnan Erzi (W. Hinz, *Ein orientalisches Handelsunternehmen im 15 Jahrhundert*, *Welt des Orients*, 1949, 313-40) and a complete budget (*Djāmiʿ al-Ḥisāb*) of 738/1337-8 found by Z. V. Togan. The first two were studied in great detail by W. Hinz (*Das Rechnungswesen*), to whom we also owe a critical edition of the second of them (*Die Resalä-ye Falakiyyä*, Wiesbaden 1952).

These works reveal a system of book-keeping based on seven main registers, as follows:

(1) *Rūznāma*—'Daybook', Arabicized form *Rūznāmadj*, also called *Daftar-i Taʿlīḳ*.

(2) *Daftar-i Awāradja*—cash-book, showing the balance of moneys in hand.

(3) *Daftar-i Tawdjīhāt*—register of disbursements.

(4) *Daftar-i Taḥwīlāt*—an off-shoot of the preceding, dealing with disbursements for stocks and running expenses in state establishments and enterprises.

(5) *Daftar-i Mufradāt*—budget register showing the income and expenditure by cities, districts, and provinces.

(6) *Djāmiʿ al-Ḥisāb*—the master-ledger, from which the annual financial reports were prepared.

(7) *Ḳānūn*—the survey and assessment book, or Domesday Book of the Empire.

(For a full discussion of these registers, and of the variations in usage and nomenclature, see Hinz, *Rechnungswesen*, 113-137).

III. The Post-Mongol States.

As in so many other respects, the Muslim states of the post-Mongol period seem to have followed, to a very large extent, the bureaucratic practices of the Il-Khāns, some of which can be recognized as far afield as Mamluk Cairo, Ottoman Istanbul and Mughal Delhi. Of these states only one, the Ottoman Empire, has left a collection of registers that has survived to the present day, though individual *daftars* have come to light in other parts. The Ottoman *daftars* have been discussed elsewhere (see BAŞVEKALET ARŞIVI, DAFTAR-I KHĀḲĀNĪ, DIPLOMATIC, MÜHIMME DEFTERI, SIDJILL, etc.), and need not, therefore, be described here. Numbers of Ottoman registers have also come to light in the ex-Ottoman territories in Europe, Asia and Africa. For a description of their material form see L. Fekete, *Die Siyaqat-Schrift*, i, 70 ff.

Bibliography: For a general discussion see the unfortunately incomplete article of M. Cevdet, published in Osman Ergin's *Muallim M. Cevdet'in Hayatı, Eserleri ve Kütüphanesi*, Istanbul 1937, appendix, 69-96; on finance registers C. Leyerer, *Studien zum Rechnungswesen der arabischen Steuerämter*, *ArO*, xii, 1941, 85-112; idem, *Die Verrechnung und Verwaltung von Steuern im islamischen Ägypten*, *ZDMG*, N.F. 28, 1953, 40-69; W. Hinz, *Das Rechnungwesen orientalischer Reichsfinanzämter im Mittelalter*, *Isl.*, xxix, 1950, 1-29, 113-141; on military registers W. Hoenerbach, *Zur Heeresverwaltung der Abbasiden*, *ibid.*, 257-290. On Ottoman finance registers, L. Fekete, *Die Siyaqat-Schrift in der türkischen Finanzverwaltung*, i, Budapest 1955, 67-110; on the *Ḳāḍī*'s registers Halit Ongan, *Ankara'nın I Numaralı Şer'iye Sicili*, Ankara 1958, and J. Kabrda, *Les anciens registres turcs des Cadis de Sofia et de Vidin*, *ArO*, xix, 1951, 329-392; on Safavid Persia V. Minorsky, *Tadhkirat al-Mulūk*, London, 1943; on Central Asia, M. Yuldashev, *The State Archives of XIX century feudal Khiva*, in *Papers by the Soviet Delegation at the xxiii. International Congress of Orientalists, Iranian, Armenian and Central Asian Studies*, Moscow 1954, 221-30. Some *daftars* have been published in full. The earliest Ottoman survey register was edited by H. Inalcık, *Hicri 835 Tarihli Sûret-i Defter-i Sancak-i Arvanid*, Ankara 1954; an Ottoman survey register of Georgia was edited by S. Jikia, *Gurjistanis vilaiethis didi davthari. Defteri mufassali vilâyeti Gürcüstan.* Great register of the vilayet of Gurdjistan. Vol. 1, Turkish text. Vol. 2, Georgian translation. Izdatel'stvo Akademii Nauk Gruzinskoy SSR: Tiflis, 1941-1947. (B. Lewis)

DAFTAR-I KHĀḲĀNĪ, the collection of registers in which were entered, during the Ottoman period, the results of the surveys made every 30 or 40 years until the beginning of the 11th/17th century, in accordance with an old administrative and fiscal practice.

The imperial registers or *Daftar-i Khāḳānī* consisted primarily of a list of the adult males in the

villages and towns of the Empire, giving, by the side of their names and the names of their fathers, their legal status, their obligations and privileges according to the economic and social class to which they belonged, and the extent of the lands which they possessed.

These registers also contain a great deal of information on the way in which the land was used (fields, orchards, vineyards, rice-fields, etc.), on the number of mills, on sheep and bee-hives, with an indication of their approximate fiscal value in aspers.

Nevertheless the fiscal information contained in the registers is not confined to this agricultural inventory. They also refer to fisheries and mines as well as to the proceeds from customs, fairs, markets and weighhouses, with their locations, their regulations and the volume of the transactions carried out.

We can also, by referring to the *daftar-i khāḳānī*, obtain an exact idea of the distribution of the revenues of the country as between the imperial domain, the military fiefs, *waḳf*s and private properties (*mulk*). These registers in fact constitute a survey showing the form of ownership of each estate with a summary of the successive changes which it underwent.

The compilation of the registers arose from the administrative organization of the Empire. The great majority of Ottoman officials, both civil and military, did not draw salaries from the budget of the central government but were allowed, in return for their services, to levy taxes on a given region on their own account. Thus at the beginning of the 10th/16th century the possessors of *timar*s alone, whose numbers had risen to about 35,000, appropriated more than half of the taxes levied on the territory of the Empire. This proportion moreover was to rise throughout the 17th century together with the number of timariots.

In order for this system to operate successfully it was essential to know every detail of the different sources of the Empire's revenues, and to follow their modifications step by step through a given period. In this way it was possible to examine whether the emoluments, whose amounts were entered in the registers, and the deeds of grant (*berāt* [*q.v.*]) issued to the beneficiaries, tallied with the taxes they actually levied. During the period of expansion, when the population and the resources of the Empire were constantly increasing, the frequent surveys always disclosed new surpluses in the State revenues.

But from the 11th/17th century onwards the central power, as a result of the anarchic mismanagement of State affairs, did not possess the authority necessary to carry out these surveys. The disorganization of the institution of *timar*s moreover rendered the value of these measures illusory.

In addition to these "detailed registers" (*daftar-i mufaṣṣal*) in which were listed the results of the surveys, auxiliary registers were also required, in which were noted, as they occurred, changes in the distribution of the *timar*s, thus avoiding the additions and corrections which would otherwise have had to be made in the "detailed registers". For the system in force at the beginning of the 10th/16th century two or even three kinds of auxiliary books were used:

1. *Daftar-i idjmāl* or "synoptic inventory". This register was a summary based on the detailed register, omitting the names of the inhabitants and giving the revenues only as lump sums for each unit. The *idjmāl* can cover all classes of ownership in a *sandjaḳ*, but is normally limited to one or two; there are thus *idjmāl*s of *timars*—*i.e.*, nominal rolls of timariots, with brief statements of their holdings and revenues; *idjmāl*s of domain, *waḳf*, and *mulk*.

2. *Daftar-i derdest* or "book of changes". This register was a list of the villages or towns constituting the nucleus of the military fiefs. It showed the successive changes which each fief had undergone and the authorities could, on consulting it, easily determine the fiefs escheated or without possessors.

3. *Daftar-i rūznāmče* or "daybook", into which were copied as they occurred the deeds of grant (*berāt*) issued to new fief-holders.

Each time a new survey was made, the old registers were replaced by new and consigned to the archives of the register-office (*daftarkhāne*). The greater part of the old registers were lost or destroyed during their removal from one repository to another. There remain nevertheless over a thousand in the Başvekalet Arşivi [*q.v.*] at Istanbul as well as a few in certain Turkish and foreign archives and libraries. Among these registers are some which date from the time of Murād II (824-55/1421-51) and of Meḥemmed II the Conqueror (855-86/1451-81), and which allude to still earlier surveys.

The archives section of the survey and land register office, at Ankara, includes a complete collection of the registers relating to the last surveys made during the reigns of the sultans Selīm II (974-82/1566-74) and Murād III (982-1003/1574-95). To these registers have been added the results of the surveys made in such provinces as Crete, conquered after this date, or the Morea, recaptured from the Venetians. Even today this collection is, on rare occasions, consulted in lawsuits.

In this collection the "detailed registers" number 254, the "synoptic inventories" (*idjmāl*) 116, the "books of changes" (*derdest*) 169, and the "daybooks" (*rūznāmče*) 1363 volumes. The "detailed registers" contain about 300 pages, 15 cms. across and 42 cms. down.

During the period of more than three centuries which has elapsed since the last survey, these records have been brought up to date each time it has been necessary to register the modifications which have occurred in the legal status of certain lands upon the creation of new *waḳf*s. The fact that certain judgments made in favour of privileged individuals and relating to law-suits concerning the boundaries of villages and pastures have been entered in these registers only increases their value. Nevertheless it would be wrong to believe that all the transactions carried out by the registry office have found a place in these documents.

Certain writers have suggested that the *daftar-i khāḳānī* constitute a land-register. But in the system of domain-lands (*arāḍī-i mīriyye*), the peasant has never been the owner of the land which happens to be in his possession, and he could not therefore dispose of the title-deed. He could indeed transfer the possession of the land which he occupied, but this act, which took place under the control and with the approval of the local lord (*sipāhī*), was not made the subject of an entry in the imperial registers. Only from the second half of the 19th century onwards was a land register, in the modern sense of the word, established in Turkey.

DAFTARDĀR, in Turkish *defterdār*, keeper of the *daftar* [*q.v.*], an Ottoman term for the chief finance officer, corresponding to the *Mustawfī* [*q.v.*] in the eastern Islamic world. According to Ḳalḳa-shandī (*Ṣubḥ*, iii, 485, 494, 525, 526), the title *Ṣāḥib al-Daftar* already existed in the Fāṭimid administration, for the official in charge of the *Daftar al-Madjlis*, that is, of accounts and audits. The title *Daftarkhwān*—*Daftar*-reader—appears in the time of Saladin (B. Lewis, *Three Biographies from Kamāl ad-Dīn*, in *Fuad Köprülü Armağanı*, Istanbul 1953, 343), and reappears in the Muslim West (Maḳḳarī, *Analectes*, i, 660). The title *Daftardār* seems to originate with the Il-khāns, who appointed a *daftardār-i dīwān-i māmalik* or *daftardār-i mamālik* to make and keep the registers (Uzunçarşılı, *Medhal*, 229-30; Köprülü, *Bizans* 204-5; Hammer, *Geschichte der Goldenen Horde*, Pest 1840, 497-501).

The Ottoman *ḳānūnnāmes*, from the 9th/15th century onwards, show the development of the office of *defterdār* in the Ottoman Empire. In the *Ḳānūnnāme* of Meḥemmed II, the chief *Defterdār* is already a high ranking official who, under the general supervision of the Grand Vezir, is the officer responsible (*wekīl*) for the Sultan's finances (*Ḳānūnnāme-i Āl-i ʿOthmān*, *TOEM suppl.* Istanbul 1330, 10). He is named immediately after the Grand Vezir, and is comparable with him in status. At the *Dīwān* he sits immediately after the Grand Vezir and the two *Ḳāḍīʿaskers*, and shares with them the right to issue fermans on matters within his jurisdiction. He has the right of personal access to the Sultan, who rises to greet him (*ibid.*, 10-11, 16-17, 23-5). His duties include the presentation of an annual report or balance sheet of income and expenditure, for which he is rewarded with a robe of honour. His emoluments may be an appanage (*Khāṣṣ* [*q.v.*]) worth 600,000 aspers, or a Treasury stipend (*sālyāne*) of from 150,000 to 240,000 aspers a year. In addition, the *Defterdārs* are entitled to a registration fee (*ḥaḳḳ-i imḍā*) of 1,000 aspers per load (*yük* = 100,000 aspers) on all grants of *Khāṣṣ*, whether by farm or by commission (*iltizām* or *emānet* [*qq.v.*]; to a collection fee (*Kesr-i mīzān*) of 22 aspers per thousand on moneys paid into the Treasury, and to an issue in kind from the produce collected in tithes from the Imperial domains. On retirement they received a pension of 80,000 aspers. (*ibid.* 28-9). The chief *defterdār* (*bashdefterdār*) presided over a hierarchy of lesser finance officers; first the ordinary finance officers (*Māl defterdārī*), then, under them, their adjutants (*Defterdār ketkhudāsī*), and under them the registrars of *tīmārs* (*Tīmār Defterdārī*), all with a recognized and established ladder of promotion. From the time of Bāyazīd II the *Bashdefterdār* was concerned chiefly with Rumelia, and was also known as *Rumeli Defterdārī*. A second *Defterdār*, the *Anadolu Defterdārī*, was appointed to deal with the revenues of Anatolia. In the early 10th/16th century a further *defterdār*'s office was set up in Aleppo, to look after the remoter Asian provinces. Its head was called *Defterdār-i ʿArab wa ʿAdjam*. This office was later subdivided, with separate offices in Diyārbakr, Damascus, Erzurum, Aleppo, Tripoli, and elsewhere. In the mid-16th century a separate office for Istanbul was established, and at the end of the century yet another for the Danubian provinces. This last was of short duration. The three main offices came to be known as the first, second, and third divisions (*shiḳḳ-i ewwel, thānī, thālith*) corresponding to Rumelia, Anatolia, and the remoter provinces. A fourth division was set up by Selim III to deal with the budget of the new style army (see NIẒĀM-I DJEDĪD); it was abolished with the latter. In 1253/1838 the office of the *Defterdār* was renamed Ministry of Finance (*Māliyye* [*q.v.*]), but the term *Defterdār* remained in use for provincial directors of finances.

DĀGH, the *takhalluṣ* of Nawwāb Mīrzā Khān (originally called Ibrāhīm, *Āʾina-i Dāgh*), one of the most distinguished Urdū poets of modern times. He was a son of Nawwāb Shams al-Dīn Khān, ruler of Fīrūzpur Djhirkā, and Wazīr Begam (usually called Čhoṭī Begam). Nawwāb Mīrzā was born in Čāndnī Čawk, Dihlī on 12 Dhu 'l-Ḥidjdja 1246/25 May 1831 (cf. his horoscope in *Djalwa-i Dāgh*, 9). When Shams al-Dīn Khān was hanged (Oct. 1835) for his part in the murder of Mr. W. Fraser, Resident of Dihlī, Nawwāb Mirzā Khān's mother remarried, and he went and lived in Rāmpūr in 1844, because of the influence of his aunt, ʿUmda Khānam, a member of the *ḥarīm* of Nawwāb Yūsuf ʿAlī Khān. There he studied Persian with Mawlawī Ghiyāth al-Dīn. His mother, in the meanwhile (1844), entered the *ḥarīm* of Mīrzā Muḥammad Sulṭān Fatḥ al-Mulk (= Mīrzā Fakhrū), a son and the heir-apparent of Abū Ẓafar Bahādur Shāh. Nawwāb Mirzā (then 13 or 14 years old) also came to the Dihlī Fort and received his regular education there. He studied the usual Persian texts, learned calligraphy from Sayyid Muḥammad Amīr Pandja Kash (d. 1857, Ghulām Muḥammad, *Tadhkira-i Khwushnawīsān*, Calcutta 1910, 71 f.) and Mīrzā ʿIbād Allāh Beg (*ibid.*, p. 73); he also learned horsemanship and the use of various arms. But above all his sojourn in the Fort brought him into contact with the famous poets of the day, who assembled in the Fort for the *mushāʿaras* (poetical contests). This environment developed his latent aptitude for writing poetry. He began to write *ghazals* in Urdū at an early age and when Shaykh Muḥammad Ibrāhīm Dhawḳ adopted him as his pupil, his genius blossomed fully. The tutorship of Dhawḳ lasted from 1844 to 1854 and in this period Dāgh took part in the *mushāʿaras* both of the Fort and the City. But Fatḥ al-Mulk's death (10 July 1856) forced him to leave the Fort. About ten months later followed the upheaval of 1857, after which Dāgh once again went to his aunt in Rāmpūr but

occasionally visited Dihlī and sometimes stayed there. When Kalb ʿAlī Khān succeeded Nawwāb Yūsuf ʿAlī Khān (d. 21 April 1865) as Nawwāb of Rāmpūr, Dāgh had the honour of becoming his companion (14 April 1866). He was also appointed Superintendent (*dārūgha*) of the stables and carpet stores (*farrāsh-khāna*) at Rs. 70 p.m. Towards the end of the same year he had the privilege of accompanying the Nawwāb to Calcutta and a few years later (1289/1872-3) of performing the *ḥadjdj* in the retinue of the Nawwāb. Rāmpūr in this period was a rendezvous of distinguished poets, such as Amīr, Djalāl, etc. (see *Nigār*, 46) and Dāgh had ample opportunities of shining in their company. From here he visited Calcutta (and several other cities) in connexion with his love-affair described by him in the *Faryād-i Dāgh* (a *mathnawī*). The death of the Nawwāb (23 March 1887) scattered many of the poets; Dāgh resigned his post (July 1887), and a few months later left Rāmpūr (Dec. 1887), after serving the State for about 22 years. He visited Ḥaydarābād-Deccan, and after some years, was appointed (26 Djumāda II 1308/6 Feb. 1891) the *Ustād* or instructor (in poetry) of the Niẓām (Maḥbūb ʿAlī Khān), and in 1309/1891 was paid Rs. 450/- p.m. (local currency) retrospectively from the date of his arrival in Ḥaydarābād; this sum was raised to Rs. 1000 in 1312/1894 and he received many other favours.

In 1312/1894 he received from the Niẓām the titles of "Bulbul-i Hindūstān, Djahān Ustād, Nāẓim Yār Djang, Dabīr al-Dawla, Faṣīḥ al-Mulk, Nawwāb Mīrzā Khān Bahādur". He appears to have been signing his name only as Faṣīḥ al-Mulk Dāgh Dihlawī (see Nūrī opp. 12). His only son died at Rāmpūr; he adopted a daughter. He had an attack of paralysis and died on 9 Dhu 'l-Ḥidjdja 1322/14 Feb. 1905, and was buried on the ʿĪd day, in Ḥaydarābād. "Nawāb Mīrzā Dāgh" is the chronogram of his death. Dāgh was a tall person, with a somewhat pock-marked face and dark complexion, and he wore a beard. He had a pleasant personality, with a fine sense of humour, courtly manners, and an intense love of music.

His works: Dāgh composed four or five *dīwāns*. The earliest, comprising his poems of the Dihlī period up to 1857, is said to have been lost in that year, but was, later, partly rewritten by him from memory (Nūrī, 89); others say that he had it in Ms. form with marginal amendments by Dhawḳ. The other *dīwāns* were: *Gulzār-i Dāgh*, Rāmpūr 1296/1878-9; *Āftāb-i Dāgh*, Lucknow 1302/1884; *Mahtāb-i Dāgh*, Ḥaydarābād-Deccan 1310/1893; *Yādgār-i Dāgh* comprising his poems from 1310 till his death in 1322. The last one is said to have been lost, and was not published (*Wāḳiʿāt-i Dihlī*, ii, 451 f.). Dāgh's pupil Aḥsan Mārahrawī published in 1323/1905 what he could collect of the *Yādgār-i Dāgh* (Kāẓimī, 208) to which an appendix was published at Dihlī by Lāla Srī Rām. The above five *dīwāns* contain about 14,800 verses mainly in *ghazal* form, but there are also *ḳaṣīdas*, *rubāʿīs* etc. (Kāẓimī, 210). Dāgh also published in 1300/1882 the *mathnawī* called *Faryād-i Dāgh*. He composed a *dīwān-i muḥāwarāt* also (more than a thousand verses) which was surrendered by his relatives to Āṣaf Djāh VI.

Dāgh's prose: (i) *Inshā-i Dāgh*, his letters, collected and published by Aḥsan Mārahrawī, Dihlī 1941; (ii) *Zabān-i Dāgh*, his private letters collected and published by Rafīḳ b. Aḥsan Mārahrawī, Lucknow 1956. We may also mention *Bazm-i Dāgh*, (a diary compiled by Aḥsan & Iftikhār-i ʿĀlam, both of Mārahra, who had stayed with Dāgh for nearly 4 years from 15 August 1898 onwards) Lucknow 1956. The authenticity of these documents has been challenged (see Tamkīn Kāẓimī, *Dāgh*, 163 ff.).

Several selections from Dāgh have also appeared, viz. *Muntakhab-i Dāgh* (Allāhābād 1939), *Bahār-i Dāgh*, Lāhore 1940, *Kamal-i Dāgh* (Āgrā), and *Dīwān-i Dāgh* or *Intikhāb-i Dāgh* (Lucknow).

The art of Dāgh: Dāgh is famous for the purity and the charm of his diction, the easy and unaffected flow of his verse, and the simplicity and elegance of his style, all of which are especially suited to the *ghazal*. The artistic and realistic expression he gave to his amatory and other experiences made his appeal direct and vehement. His command of language is remarkable. He uses idiomatic phrases frequently and with masterly aptness (cf. Walī Aḥmad Khān, *Muḥāwarāt-i Dāgh*, Dihlī 1944; the author collects 4464 such phrases, arranges them alphabetically with brief explanations and citations from Dāgh; an earlier attempt by Aḥsan in his *Faṣīḥ al-Lughāt*, on similar lines, remained incomplete and only a few were published in some issues of the *Faṣīḥ al-Mulk* magazine). Dāgh made a powerful impression on Urdū poetry, especially on the *ghazal*, which he made once again primarily a vehicle of emotional expression couched in easy and simple language, free from unfamiliar, harsh-sounding Arabic and Persian words, as used, *e.g.*, by the school of Nāsikh and Ātish (cf. *Nigār*, 19). In fact, he defined Urdū as the language which is free from Persianisms (Nūrī, 65, 170; cf. *Djalwa-i Dāgh*, 142, for Dāgh's conception of what good Urdū poetry should be in form). Out of the three periods of his literary work, the earliest ends with his stay in Rāmpūr. In this he had already acquired the main characteristics of his poetry, *viz.*, a graceful and clear expression,—simple, fresh and forceful, and the boldness of his ideas. These were developed still further in the second or the Rāmpūr period, which is his best. His expressions become extremely sweet and elegant, almost unparalleled in Urdū literature, and the novel, dramatic and bold ways in which he clothes his ideas with words is to be rarely met with in other poets (*Kamāl-i Dāgh*, 50 f.). These outstanding features are embodied in the *Gulzār-i Dāgh* and the *Āftāb-i Dāgh*. The last of the three periods, that of Ḥaydārābād-Deccan, is the period of decay. The language is as correct, as perspicuous and smooth as ever, the composition is ingenious but there is nothing more. Towards the end, he became too fond of introducing in his verses idiomatic expressions. The characteristics of the period are to be seen in *Yādgār-i Dāgh*. Dāgh has been severely criticized for the low and degrading ideals which he consistently kept before himself when writing love poetry (cf. Čakbast, *Maḍāmin-i Čakbast*, Allāhābād, 1936, 69 f.), but his poetry to a considerable extent reflected the general trends of the effete society of his time (see *Nigār*, 18, 49).

He had numerous pupils in all parts of India (*Djalwa-i Dāgh*, 125; *Nigār*, 28, 131), a fact which shows the great popularity which his style had gained in the country (but see *Mirʾāt al-Shuʿarāʾ*, ii, 36).

(MUHAMMAD SHAFĪ)

DĀGHISTĀN "land of the mountains"; this name is an unusual linguistic phenomenon, since it consists of the Turkish word *dāgh*, mountain, and of the suffix which, in the Persian language, distinguishes the names of countries; this name seems to have appeared for the first time in the 10th/16th century). An autonomous Republic of the R.S.F.S.R. with an area of 19,500 sq. miles and a population of 958,000 inhabitants (1956), it is made up of two quite distinct parts: the Caucasian Range and the cis-Caspian Steppes, bordered in the north by the Terek and the Kuma, in the south by the Samur on one side and the Alazan, a tributary of the Kura, on the other.

Before the Russian conquest, the mountainous part of Dāghistān and the plain which lay beside the sea were never for very long united under the domination of one people or one dynasty. The coastal plain itself divided into two parts by the pass of Derbend, only 2 kms. wide. The southern section belonged principally to the civilized states of Asia Minor, while the northern section lay in the power of the nomadic kingdoms of southern Russia. Since history began, neither the people of the south nor those of the north have exerted any important influence on the ethnography of the mountain region. Before the establishment of Russian power, no foreign conqueror had succeeded in permanently subduing the inhabitants of this region. From time to time these people seized different parts of the coastal plain but each time these conquerors soon broke all political connexion with their brothers who remained in the mountains.

The southern part of the coastal plain as far as Derbend belonged in ancient times to Albania. North of this region, probably in the mountains, dwelt some small tribes whom Strabo (ch. 503) called Δῆγαι or Γῆλαι. Both the Romans and the Persians who succeeded them in the 4th century had to defend the pass of Derbend against the nomadic peoples. The condition in which the Arab conquerors found these regions suggests that the culture of the Sāsānid Empire and perhaps Mazdaïsm had some influence on the inhabitants of the neighbouring mountains. Some princes of these countries possessed Persian titles, *e.g.*, the Ṭabarsarān-Shāh, who governed a district west of Derbend. There also dwelt in Ṭabarsarān the Zirīhgarān (from the Persian *zirīh*, breastplate), famous armourers whose funeral customs, described by Abū Ḥāmid al-Andalusī (*Tuḥfat al-Albāb*, ed. Ferrand, *JA* 207 (1925), 82-3; also text in Barthold, *Zapiski Vostoč. Otdel. Arkheol. Obshčestva*, xiii, 0104) and others, seem to owe their origin to Persian religious influence. It appears that Christianity began to spread in Albania in the 4th and 5th centuries and thence to the tribes in the steppes and mountains of Dāghistān.

In spite of the success of Arab arms in the north of Dāghistān, notably under the Caliph Hishām (105-125/724-743), when Maslama b. ʿAbd al-Malik first established with some degree of permanence the Arab power at Derbend, this town nonetheless retained its importance as a frontier fort under the Arabs as under the Sāsānids. There, as everywhere, close relations with the neighbouring peoples seem to have deepened in the wake of the Arab conquest. It was nevertheless the Christians and the Jews who first profited from this resurgence of activity, and only afterwards the Muslims. The Khazars are supposed to have adopted Christianity under the Armenian patriarch Sahak III (677 to 703 A.D.). In the time of Hārūn al-Rashīd (170-193/786-809), the Jews succeeded in winning to their faith the sovereign and the nobility of this people.

The geographers of the 4th/10th century furnish us with exact information on the ethnographic distribution of Dāghistān and the spread of the three religions through this country. At that time the Arabs held, in addition to Derbend, the neighbouring castles which were only one *farsakh* or three miles away from the town, according to al-Masʿūdī, ii, 40). A Muslim, son of the sister of ʿAbd al-Malik, amīr of Derbend, ruled over Ṭabarsarān. Ibn Rusta (De Goeje ed., 147 ff.) relates that the sovereign of the neighbouring kingdom of Khajdān (a true account according to Marquart, *Osteuropäische und Ostasiatische Streifzüge*, 492) professed the three religions simultaneously and observed Friday with the Muslims, Saturday with the Jews and Sunday with the Christians. In al-Masʿūdī (*Murūdj*, ii, 39) the same prince appears as a Muslim and was even said to have had drawn up a genealogical tree showing his connexion with the Arab race. He was, however, the only Muslim initiate in his country. Further north reigned another Muslim, Barzbān, prince of the Gurdj. North of his principality lived the Christian Ghumīḳ; still further north lay the impenetrable mountains of the Zirīhgarān, where

the three religions each had their adherents, and finally the country of the Christian prince of Sarīr (which corresponds to present-day Avaristān), who bore the title of Fīlānshāh or Ḳīlānshāh. According to Ibn Rusta, only the inhabitants of the royal castle, built on a high mountain, were Christian; the prince's other subjects were pagan. According to al-Iṣṭakhrī, Sarīr's frontier was only two *farsakh* away from the seaboard town of Samandar. Governed by a Jewish prince related to the king of the Khazars, Samandar lay four days' march from Derbend according to al-Iṣṭakhrī, eight days' march according to al-Masʿūdī. It was probably situated in the northern part of the coastal region where the town of Ṭarkī or Ṭarkhū was later built. It is described as a flourishing city where there were, some say, 4000, others, 40,000 vineyards; there the Muslims had their mosques, the Christians their churches, and the Jews their synagogues. On the west the country of Samandar bordered the land of the Alans.

The Arabs seem to have given the name of Lakz (Lezgians) to the people of southern Dāghistān, whose geographical position they do not elsewhere indicate with any precision. According to al-Balādhurī (De Goeje ed., 208), the land of the Lakz lay in the plain which stretched from Samur to the town of Shāberān, south of present-day Dāghistān. According to al-Masʿūdī (*Murūdj*, ii, 5), on the other hand, the Lakz people dwelt in the highest mountains of the region. Among these were the "infidels" who were not subject to the prince of Shirwān. "Strange stories" went round about their family life and customs. The mention of Shirwān shows that al-Masʿūdī imagined the country of the Lakz to lie in the mountainous region of upper Semur. At first the Russians only used the name of "Lezgians" for the tribes of southern Dāghistān, as opposed to the "highlanders" of the northern territories or "*Tawli*", from the Turkish *taw*—mountain.

During the succeeding centuries, Islam seems to have made but slow progress in Dāghistān. In 354/965, the power of the Khazars was shattered by the Russians. Then the southern part of this state itself suffered the ravages of war. It was the Christian Alans who, it seems, profited from this upheaval, for their territory, at the time of the Mongol conquest, stretched much further to the east than in the 4th/10th century. At the time of their first incursion into these countries, according to Ibn al-Athīr (xii, 252), the Mongols encountered north of Derbend first the people of the Lakz who then included "Muslims and infidels", further north some other half-Muslim tribes—ancestors of the Avars—and lastly the Alans. According to William of Rubruk who visited these countries in November 1254, the mountains were inhabited by Christian Alans; "between the mountains and the sea" lived the Saracen Lezgians (Lesgi), that is to say Muslims; however Rubruk himself gave the name of "castellum Alanorum" to a fortress situated only one day's march north of Derbend. The Mongols at that time had still not succeeded in subjugating these tribes. It was necessary to assign to special detachments the defence of the passes leading from the mountains to the plain, in order to defend the herds grazing on the steppe against the raids of the highlanders (cf. Fr. M. Schmidt, *Rubruk's Reise*, Berlin 1885, 84 ff.).

In the 13th and 14th centuries, the region which stretched to the pass of Derbend, and partially the territories situated to the south of this town also, formed part of the empire of the Golden Horde. It is in the history of the campaigns of Tīmūr (797-798/1395-1396) that the names of the two chief peoples of Dāghistān, the Ḳaytāḳ (or Ḳaytāgh) and the Ḳāzī-Ḳūmūḳ (now Laks) appear for the first time in their modern forms. The territory of the Ḳaytāḳ, next to the pass of Derbend, belonged to the empire of Tokhtamīsh. Sharaf al-Dīn Yazdī (*Ẓafar-nāma*, India ed. i, 742 sqq.) describes the Ḳaytāḳ as people "without religion" (*bī-dīn*) or of "bad faith" (*bad kīsh*) which shows that they were still not subject to Islam. According to Barbaro (Ramusio, *Viaggi*, ii, 109-a), there were among the Ḳaytāḳ even in the 15th century many Greek, Armenian or Roman Catholic Christians. On the other hand, the prince of the Ḳaytāḳ (Khalīl Beg), mentioned by Afanasid Nikitin in his account of the voyage (1466), bore a Muslim name.

The Ḳāzī-Ḳūmūḳ were Muslim and were regarded as the champions of Islam against the pagan peoples around them. Their prince was called Shawkal. North of the Ḳāzī-Ḳūmūḳ lived the Ashkūdja (modern Darghins), who had not yet become Muslim. The account of Tīmūr's campaigns also mentions the town of Tarḳi. Between the Ḳāzī-Ḳūmūḳ and the Ḳaytāks, and therefore in the land of the present-day Köbeči, dwelt the Zirīhgarān who had retained their ancient fame as smiths and who offered to the conqueror coats-of-mail of their own making.

The Tīmūrid conquest and the Ottoman occupation (from 865-1015/1461-1606) marked the further advance of Islam into Dāghistān. From the beginning of the 10th/16th century, the Muslim faith won over the infidel populations in Dāghistān, often by recourse to force. From this period dates the somewhat superficial conversion to Islam of the Darghine (Ashkūdja) people and the permanent conversion of the Ḳaytāḳ. The Avars as well were gradually brought over to Islam, but Christianity survived amongst them throughout the 15th century, whilst the Andis and the Didos peoples remained firmly pagan. The Zirīhgarān (Kubačis), converted to Islam in the 15th century, preserved traces of Christianity until the end of the 18th century. The Lezgians were also superficially converted after the Tīmūrid period.

The Islamic conversion is not the only aspect of the historical evolution of Dāghistān at this time, in which we must include the formation of the feudal principalities which provided Dāghistān with the political structure which remained until the 19th century.

The feudal principalities which appeared or developed at that time claimed ancestry from the Arab conquest, but these fanciful allegations are today strongly disputed.

The account of Tīmūr's campaigns shows decisively that the situation in which the Ottomans found Dāghistān during their short domination dates from the 9th-15th to 10th/16th centuries only. Nevertheless this situation has been carried back to the first centuries of the *hidjra* by a historical tradition only invented during this era. Just as the Jews, perhaps before the Arab conquest, had located in Dāghistān certain events in their legends and history (cf. Marquart, *Streifzüge*, 20), just as today those called Dagh-Čufut or "mountain Jews" still claim that their ancestors were formerly led into these regions by the conquering Assyrians or Babylonians, so also did the Muslim peoples all claim to have been converted to Islam by Abū Muslim and the princes all claim to be descended from the Arab governors whom he left in Dāghistān. The title of Maʿṣūm, borne by the prince of Ṭabarsarān, was

identified with the Arabic word *maʿṣūm*. Likewise Arabic etymologies were invented for the Ḳaytāḳ title of *ūsmī* ("renowned", from *ism* = "name") and for the Ḳāzī-Ḳūmūḳ's *shāmkhāl*. The word *shāmkhāl* was alleged to derive from Shām = Syria. Another root was also found for this word, namely *shāh-baʿl*. It is not impossible that such etymologies also had some influence on the pronunciation of the titles in question. It is obviously not by chance that the title of the prince of the Ḳāzī-Ḳūmūḳ appeared in the oldest Russian documents in the same form (*shewḳal* or *shawḳal*) as in Sharaf al-Dīn Yazdī. Clearly the Persians and the Russians could not have corrupted *shāmkhāl* into *shawḳal* independently of each other; it is more likely if we assume that the present form of the title only took shape under the influence of the etymology described above. The subjects of the *shāmkhāl*, the Ḳāzī-Ḳūmūḳ, claimed to have been distinguished under Abū Muslim as defenders of the faith and to have won at that time from the Arabs the title of "*Ghāzī*" or victors.

Three great feudal principalities dominated Dāghistān in the 9th-10th/15th-16th centuries: the the Shāmkhālat Ḳāzī-Ḳūmūḳ, the Ūsmīyat of Ḳaytāḳ and the Maʿsūmat of Ṭabarsarān.

The first historical Ḳaytāḳ prince who bore the title of *ūsmī* seems to have been Aḥmad Khān, who died in 996/1587-88. He is credited with having founded the village of Madjālīs, where the representatives of the people assembled to discuss their affairs. He is supposed to have ordered the bringing together of the statutes of the popular law in a code to which the judges or *ḳāḍīs* had to conform, a measure which was considered a "great audacity" (*djasārat-i ʿaẓīma*) by Mīrzā Ḥasan Efendi, the author of *Āthār-i Dāghistān*, 65).

Towards the middle of the eleventh century (1050/1640), a number of the Ḳaytāḳ separated from their compatriots and proceeded to the regions south of Dāghistān. Husayn Khān, leader of these emigrants, succeeded in setting up a new principality at Sāliyān and Kūba. The Ottoman traveller Ewliyā Čelebi (*Siyāḥat-nāma*, ii, 291 ff.) met these Ḳaytāḳ emigrants in 1057/1647 between Shaki (today Nukha) and Shamākhī. The glossary compiled by Ewliyā Čelebi proves that the Ḳaytāḳ did not then, as today, speak Lezgian but Mongol.

The *shāmkhāls* of the Ḳāzī-Ḳūmūḳ (today the Laks) extended their domination little by little beyond their mountains north-east as far as the coast, into Turkish country (Ḳumīḳ). In the 10th/16th century, these princes used to spend the winter at Būynāḳ, a village on the coastal plain, and the summer at Kumukh in the mountains. In 986/1578 at Būynāḳ died the *shāmkhāl* Čūbān, whose possessions were then divided among his sons. These divisions naturally weakened the power of the dynasty. The Ḳāzī-Ḳūmūḳ who stayed in the mountains slowly proceeded to make themselves entirely independent of their ruling house. After the death of the *shāmkhāl* Sūrkhāy-Mīrzā, in 1049/1639-40, the *shāmkhāls* only ruled the coastal region, at Būināḳ or Tārkhū (Tarḳi). None of the later *shāmkhāls* ever returned to Kumukh, where the tombs of the first princes are still to be seen.

It was at this time that the Russians revived their efforts to seize, after Astrakhān, the countries of the northern Caucasus, among them Dāghistān. In 1594 a Russian detachment commanded by Prince Khvorostīnin succeeded in taking Tārkhū and in constructing a fortress on the Ḳoi-Su or Sulaḳ. It was not long, however, before the Russians suffered defeat by the sons of the *shāmkhāl* and were compelled to withdraw over the Sulaḳ. A fresh attack in 1604, directed by Buturlin and Pleshčeev against Tārkhū, was still less successful.

The period between the Ottoman occupation and the Russian conquest is distinguished in Dāghistān by the flowering of the Arab culture which attained its zenith in the period of Shāmil. During the 17th century a galaxy of Dāghistān scholars gathered round Shaykh Ṣāliḥ al-Yamanī (born in 1637—died at Mecca in 1696): his most famous disciple was Muḥammad Mūsā of Kudatli, who disseminated his teachings in Dāghistān and died in Aleppo in 1708. In the 18th century parties of Dāghistān scholars went to Damascus and Aleppo to learn there the Arab language and the sharīʿa. This period of cultural renascence was also a period of juridical organization—a codification illustrated by the Code of Umma Khān, the Avar, and the laws of Rustum Khān, *ūsmī* of Ḳaytāḳ.

With this flowering of Islamic culture in the Arabic language there coincided on the political level an anarchic dispersion when Dāghistān, divided into manifold clans and rival kingdoms, wavered between Turkish and Persian influence, passing alternately from one to the other. This political dispersion confirmed the weakness of Dāghistān and inevitably provoked a foreign conqueror.

From the 16th century onwards three powers, Persia, Turkey and Russia, claimed possession of Dāghistān. The native princes allied themselves now with one, now with another, of these three powers. Not until the 19th century was the contest finally terminated, to Russia's advantage. After 986/1578 the prince of Ṭabarsarān, following the example of the *shāmkhāl* and of the *ūsmī*, made his submission to the Sultan. When, in 1015/1606, Shāh ʿAbbās restored Persian power in these regions, the *ūsmī* joined with him, whilst the *shāmkhāl* remained loyal to the Turks. One of the clauses of the peace treaty concluded in 1021/1612 stipulated that the *shāmkhāl* and the other princes loyal to the Porte would not suffer any reprisals on the part of Persia. The *ūsmī* Rustam-Khān having crossed over to the Turks in 1048/1638, his rival the *shamkhāl* won the favour of the Shāh, who confirmed him in his honours. He had moreover already received a similar investiture from the Tsar Michael (*Athār-i Dāghistān*, 81).

When, under the feeble government of the Shah Husayn, the Ṣafawid empire fell into decline, Dāghistān itself became the stage for a movement directed against Persian domination. At the head of this movement there was Čulāḳ-Sūrkhay-Khān who had just founded a new principality in the land of the Ḳāzī-Ḳūmūḳ. Allied with the *ūsmī* and the *mudarris* Ḥādjdjī Dāwūd, the leader of a pupolar movement, he succeeded in taking Shamākhī in 1124/1712. Then the allies sent to Constantinople an embassy which obtained for them robes of honour from the Sultan, titles and diplomas and the favour of being received into the number of the subjects of the Porte. It was then that the intervention of Russia altered the course of events. Three hundred Russian merchants had been killed at Shamākhī, and Peter the Great seized this as a pretext for intervention. He directed an expedition against Persia and occupied Derbend in 1722. Soon afterwards the other provinces on the west coast of the Caspian sea had themselves to submit to Russia. By the treaty of partition of 1724, Russia's rights over this coast were likewise recognized by the Porte.

The Russian occupation was not at that time of

very long duration. Nādir Shāh succeeded in restoring the unity of the Persian empire, and Russia gave back to him, by the treaty of 1732, all the countries south of the Kura and also, by the treaty of 1735, the territory contained between the Kura and the Sulaḳ. When the Russians had contrived to defeat an expedition of Tātars from the Crimea into Dāghistān, the Porte likewise gave up its claims. As for the native population, it opposed the new Shāh with unyielding resistance, especially in the mountains. It was only on the coast that Nādir Shāh succeeded in establishing his power in any lasting fashion. In 1718 the *shāmkhāl* ʿĀdil Girāy had taken an oath of loyalty to Peter the Great and had aided him in his campaign of 1722; as, however, he later revolted against the Russians, he had been deported to Lapland in 1725 and the dignity of *shāmkhāl* had been abolished. Nādir Shāh restored this dignity and conferred it on Khāṣ Pūlād-Khān, the son of ʿĀdil Girāy. The people of the mountains remained independent, owing to persistent attacks, particularly those of 1742 and 1744.

After the murder of Nādir Shāh in 1160/1747, Persia was for half a century without a government strong enough to maintain its power in this frontier region. The provinces of the empire themselves could not be defended against the incursions of the princes of Dāghistān. In this way the town of Ardabil was sacked by the *ūsmī* Amīr Ḥamza. In turn the Russians, in spite of the treaty of 1735, began to wield influence in Dāghistān once more. The traveller Gmelin was captured in the country of the *ūsmī* and put to death in 1774, and in 1775 a Russian detachment commanded by Madem came and devastated the region. In 1784 the *shāmkhāl* Murtaḍa ʿAlī once more joined Russia. In 1785 the establishment of the post of governor of the Caucasus consolidated Russian domination over these countries. A religious movement instigated by Turkey and directed by Shaykh Manṣūr affected Dāghistān only superficially; most of the princes refused to support the movement.

The Ḳādjārs, when they had succeeded in reuniting all the Persian provinces in one empire, strove once more to annex the lands of the Caucasus. But this time Russia was not disposed to give up her claims without a struggle, as she had with Nādir Shāh. The war began in the last year of the reign of Catherine II, in 1796. Derbend was occupied by the Russians but soon after evacuated by command of the Emperor Paul. In 1806 the town was recaptured, and this put an end to Persian domination in Dāghistān. It was, however, only by the peace treaty of Gulistān, in 1813, that Persia finally renounced her claims over the country.

The resistance offered to the Russians by the native princes and by their peoples in particular continued longer. In 1818 nearly all the princes of Dāghistān, with the exception of the *shāmkhāl*, formed an alliance against the Russians. This rebellion was not put down by the Governor Yermolov without difficulty. The title of *ūsmī* of the Ḳaytāḳ was abolished in 1819, that of *maʿṣūm* of Ṭabarsarān in 1828. After 1830 the princes who were allowed to remain accepted Russian officer advisers at their sides. The masses, excited by their preachers to a holy war against the infidels, resisted more tenaciously than their rulers. Since the end of the 18th century the adherents of the order of the Naḳshbandiyya had penetrated into Dāghistān and there disseminated their doctrines successfully. About 1830 the leaders of the order had stirred up among the Avars a popular movement directed both against the ruling house, against the intrusion of the infidels and in favour of the restoration of the *sharīʿa* in place of the *ʿādāt*. The chief leader of the rebels was Ghāzī Muḥammad [*q.v.*], called Kazi Mulla by the Russians and praised by his pupils as a great expert in Arab sciences (*ʿulūm ʿarabiyya*).

On 17th (29th) of October 1832, Ghāzī Muḥammad was surrounded and killed by a Russian detachment in the village of Gimri. His successor, Ḥamza Beg [*q.v.*] also died in 1834 near Khūnzāḳ. The third leader of the rebellion, Shāmil [*q.v.*] was more fortunate. The inferior of his predecessors in learning, he excelled them in his qualities of administrator and leader. For twenty-five years he maintained in the mountains the struggle against the Russians. He gained his greatest successes in the years 1843 and 1844 when the Russians occupied only the coast and the southern regions. In the mountains many Russian strongholds had been taken by the highlanders. After 1849, Shāmil was once more confined to the western part of the mountain region, but he continued the struggle for another ten years.

After the fall of Shāmil who, on 25th August (6th September) 1859, yielded to Prince Baryatinsky, the Russians restored for a while the authority of the Avar princes, deeming it opportune to consolidate the power of the princes and the nobility in order to destroy with their support the influence of the priesthood. But the Russian authorities soon abandoned this policy. The royal house of the Avars was dispossessed in 1862, and soon afterwards the other princes in their turn had to abdicate the semblance of sovereignty which still remained to them. The deposition of the *shāmkhāl* took place in 1865. Dāghistān was then given the organization which it retained until the Revolution of 1917. In 1877, during the Russo-Turkish war, the population took up arms again. On 8th (20th) September the rebels succeeded in taking the fortress of Kumukh. In Ḳaytāḳ and Ṭabarsarān the descendants of the old ruling houses re-assumed the titles of *ūsmī* and of *maʿṣūm*. But meanwhile the war changed to the advantage of the Russians who soon put down the insurrection.

After the extremely savage civil war in Dāghistān (1917-20), the Soviet regime was set up in the autumn of 1920. On the 13th of November there was proclaimed the Autonomous Socialist Soviet Republic of Dāghistān with Makhač-Ḳala for the capital.

The population of this republic consists now of a majority of Muslims and a minority of non-Muslim immigrants: Russians, Ukrainians, Jews both autochthonous (Dāgh-Čufut) and immigrant (Ashkenazim).

The Muslim population contains three great linguistic groups:

I. The Ibero-Caucasians which divide into three sub-groups speaking languages distinct from each other:

(a) The Avaro-Ando-Dido group (cf. AVAR, ANDI, DIDO and ARČI), in 1959 268,000 strong in the northern part of mountainous Dāghistān. It contains the Avar (or Khunzak) people, eight small Andi nationalities (Andis proper, Akhwakhs, Bagulals, Botlikhs, Godoberis, Čamalals, Ḳaratas and Tindis) inhabiting the high bowl of the Ḳoysu of Andi, five small Dido nationalities (Didos proper or Tzezes, Bežeta, Khwarshis, Ginukhs and Khunzals) and the Arčis.

The Avars possess a literary language, have absorbed the other nations in the group whose

languages are not set down in writing, and form with them one sole Avar "nation".

(b) The Darghino-Lak group (cf. DARGHIN, LAK, ḲAYTĀḲ, KUBAČI) which numbered 222,000 in 1959 in the west-central part of mountainous Dāghistān, and which contain the Darghins (formerly Ashkūdja), the Laks (formerly Ḳāzī-Ḳūmūkh) and two small peoples, Ḳaytāḳ and Kubači (formerly Zirihgarān).

The Darghin and the Lak possess literary languages; the Ḳaytāḳ and the Kubači are without these and have merged into the Darghin nation.

(c) The Samurian group in southern Dāghistān (cf. LEZG, TZAKHUR, RUTUL, ṬABARSARĀN and SHĀH-DĀGH peoples), 279,000 strong in 1959, contain two nations with a literary language, the Lezgians (223,000) and the Ṭabarsarān (35,000), and three small peoples destined to merge into the Lezg nation: Agul (8,000), Rutul (7,000) and Tzakhur (6,000). To this group are connected the five peoples of Shāh-Dāgh (numbering about 15,000) in northern Ādharbaydjān (Djek, Kriz, Khaputz, Budukh and Khinalug), who have been greatly influenced by Turkey and who are merging into the Ādharī nation.

II. The Turks are represented in Dāghistān by the Ādharīs in the plain round Derbend and in the low valley of the Samur; by the Ḳumïḳs [*q.v.*] who numbered 135,000 in 1959 in the cis-Caspian plains north of Derbend to the Terek; and by the Nogays [*q.v.*] (41,000 in 1959) in the steppes between the Terek and the Kuma. The Ḳumïḳṣ and the Nogays, like the Ādharīs, possess literary languages.

III. The Iranophone peoples are represented by the Tāts [*q.v.*] who numbered several thousands around Derbend, and the mountain Jews or Dāgh-Čufut (about 12,000) in the villages of the plain, Jewish in religion but speaking Tātī.

Dāghistān is a multi-national republic, the only one in the Soviet Union which was not founded on one nation or one dominant nationality (*narodnost'*). In the terms of the Constitution (art. 78), she possesses ten official literary languages: Avar, Darghīn, Lak, Lezg, Ṭabarsarān, Ḳumïḳ, Nogay, Ādhari, Tātī (in its Jewish form used by the Dāgh-Čufut) and Russian. These languages are used as teaching languages in the primary schools, but of the autochthonous languages only Avar, Darghin, Lak and Ḳumïḳ have newspapers. It thus appears that these four nations are destined to become poles of attraction and that in the end they will absorb the other groups.

Bibliography: As well as general works on the Caucasus, there is a rich literature on Dāghistān in Russian. A bibliography (134 titles of works and articles) will be found in A. Bennigsen and H. Carrère d'Encausse, *Une République soviétique musulmane*: *le Dāghistān, aperçu démographique*, in *REI* 1955, 7-56, and another more complete version appended to the work *Narodī Dagestana*, Moscow, Acad. Sc., 1955 (137 titles of which 79 are of pre-revolutionary works and titles and 58 later than 1918); Turkish sources in *IA* s.v. (by Mirza Bala). For further details see the bibliographies of the articles on the peoples mentioned in the text. (W. BARTHOLD-[A. BENNIGSEN])

AL-ḌAḤḤĀḲ [see ZUHĀK].

AL-ḌAḤḤĀK B. ḲAYS AL-FIHRĪ, ABŪ UNAYS (or ABŪ ʿABD AL-RAḤMĀN), son of a blood-letter (*ḥadjdjām*, Ibn Rusta, *BGA* vii, 215), head of the house of Ḳays. He is reported to have been of a vacillating character (*djaʿala yuḳaddimu ridjlan wa-yuʾakhkhiru ukhrā*, *Aghānī* xvii, 111) and this is borne out by his changing attitude towards the ruling Umayyad house, in which he proved easy to influence. He was a keen follower of Muʿāwiya, first as head of the police (*ṣāḥib al-shurṭa*), and then as governor of the *djund* of Damascus. In the year 36/656, al-Ḍaḥḥāk defeated the ʿAlid al-Ashtar near al-Mardj (between Ḥarrān and al-Raḳḳa), and the latter had to retreat to Mosul. At Ṣiffīn, he commanded the Syrian infantry. In 39/659-60, Muʿāwiya sent him against the ʿAlids with 3,000 men. He went to the Ḥidjāz via al-Thaʿlabiyya, al-Ḳuṭḳuṭāna etc., and temporarily stopped the pilgrim traffic, until, at ʿAlī's order, Ḥudjr b. ʿAdī al-Kindī, at the head of 4,000 men, forced him to retreat to Syria. In 55/674-5, or perhaps even in 54, Muʿāwiya nominated him as governor of Kūfa, in succession to ʿAbd Allāh b. Khālid b. Asīd, but deposed him again in 58. In 60/680, Muʿāwiya was dying, and made al-Ḍaḥḥāk and Muslim b. ʿUḳba joint regents; he dictated his last will to them, charging them to give it into the hands of his successor Yazīd, who was away from Damascus at the time. Al-Ḍaḥḥāk led the prayer for the dead, and worked for the succession of Yazīd, being recognized by him as governor. During his illness, Muʿāwiya II had chosen him to lead the prayers in Damascus until such time as a new Caliph should be elected.

During the time of general strife and intrigue after the death of Muʿāwiya II in 64/684, al-Ḍaḥḥāk—together with the governors of Ḥimṣ and Ḳinnasrīn—went over to the side of the rival caliph ʿAbd Allāh b. al-Zubayr. At first he did this secretly, but later openly. Ibn al-Zubayr then made him governor of Syria, putting under him the other governors with pro-Zubayr leanings. Marwān b. al-Ḥakam, who had attended Muʿāwiya II's funeral, and was at that time the oldest and most respected of the Umayyads, considered the position so hopeless that he left for Mecca, to pay homage to Ibn al-Zubayr, and to intercede for an amnesty for the Umayyads. On the way, however, he met ʿUbayd Allāh b. Ziyād in Adhriʿāt. The latter was on his way from ʿIrāḳ to Damascus, and reproached him severely, finally deciding him to turn back, which he did, going first of all to Palmyra. In Damascus, the crafty ʿUbayd Allāh suggested to al-Ḍaḥḥāk that he should break with Ibn al-Zubayr, and become the head of the Ḳuraysh himself and be recognized as their ruler. Al-Ḍaḥḥāk succumbed to this temptation, but within three days he had to yield to the revolt of his followers, who could find no blame in Ibn al-Zubayr, so he veered over to his side again. These vacillations lost him the confidence of his people, and at the same time he naturally became an object of suspicion to the Zubayrids. At this point, ʿUbayd Allāh gave him the fateful advice to leave the town, to collect an army, and to fight for Ibn al-Zubayr. So he left—apparently at ʿUbayd Allāh's instigation—and went to Mardj Rāhiṭ, whilst ʿUbayd Allāh himself remained in Damascus. Also at ʿUbayd Allāh's instigation, Marwān accepted the homage of the people at Palmyra, married the mother of the two sons of Yazīd, and asked Ḥassān b. Mālik b. Baḥdal al-Kalbī, Yazīd's very powerful uncle, to come to Palmyra. When he refused, Marwān lost heart again, went to al-Djābiya where —after Ḥassān eventually gave up his position under pressure of the majority—he was elected caliph. After that, ʿUbayd Allāh had him recognized in Damascus as well.

In this way, it was possible for Marwān to lead

the warriors assembled in al-Djābiya, and all his followers from Damascus, against al-Ḍaḥḥāk. In 64/684, a momentous battle took place near Mardj Rāhiṭ, lasting for 20 days and ending with a victory of the Kalb over the Ḳays. Al-Ḍaḥḥāk himself was killed in battle and his followers fled. His son ʿAbd al-Raḥmān b. al-Ḍaḥḥāk, however, became governor of Medina under Yazīd b. ʿAbd al-Malik. Ibn ʿAsākir still knew the house and the beautiful bath of al-Ḍaḥḥāk near the city wall of Damascus (*Taʾrīkh Madīnat Dimashḳ*, ed. Ṣ. Munadjdjid, ii/1, Damascus 1954, 140), and even al-ʿAlmawī (died 981/1573) tells of a mosque, supposedly that of al-Ḍaḥḥāk b. Ḳays, on the southern side of the citadel (H. Sauvaire, in *JA*, 9e série, tome vi, 1895, 442, and vii, 1896, 386).

The course of events following the death of Muʿāwiya II is by no means as clear cut as might appear from the above: accounts vary considerably, but Ibn Saʿd's report is, for factual reasons, the most acceptable on the whole.

(A. Dietrich)

AL-ḌAḤḤĀK B. ḲAYS AL-SHAYBĀNĪ, Khāridjite leader, opponent of Marwān b. Muḥammad (= Marwān II). During the disturbances which followed the murder of the Caliph al-Walīd II, the Khāridjites resumed their campaign in Djazīra and pushed forward into ʿIrāḳ, their leader at first being the Ḥarūrite Saʿīd b. Bahdal, and, after his death of the plague, al-Ḍaḥḥāk b. Ḳays al-Shaybānī, an adherent of the above-mentioned Ibn Bahdal. Several thousand fighters assembled under the standard of al-Ḍaḥḥāk; there were even among them Ṣufrites from Shahrazūr, who, at that time, according to al-Balādhurī, *Futūḥ*, 209, were contesting, with Marwān, the possession of Armenia and Ādharbaydjān, and there were also old women who, dressed in male armour, fought bravely in his ranks. For some months in ʿIrāḳ, two governors had been at war with each other; one of them, ʿAbd Allāh, son of ʿUmar II [*q.v.*], represented the Caliph Yazīd b. al-Walīd (= Yazīd II) and was supported by the Yemenites, and the other, al-Naḍr b. Saʿīd al-Ḥarashī, was the nominee of Marwān b. Muḥammad, and had the support of the Muḍarites. When the Khāridjites advanced, these two governors joined forces against the threat. In spite of their joint efforts, they were beaten in the month of Radjab 127/April-May 745, and al-Kūfa was evacuated. Ibn al-Ḥarashī returned to the domain of Marwān, and Ibn ʿUmar withdrew into the fortress of Wāsiṭ, but in the month of Shaʿbān of the same year, he was besieged there by al-Ḍaḥḥāk. After a few combats he ceased all resistance (Shawwāl 127/August 745), and, although a Ḳurayshite and a member of the ruling family, paid homage to the rebel. Ibn Kathīr, obviously struck by the enormity of this, diminishes its seriousness; he says that Ibn ʿUmar pressed the Khāridjite to oppose Marwān, promising to follow him if he killed the latter. Al-Ḍaḥḥāk, now master of al-Kūfa, did not delay there; invited by the inhabitants of al-Mawṣil, he entered that town and expelled the government officials (according to Ibn Kathīr, he marched against Marwān, and, on the way, he seized al-Mawṣil, at the invitation of the inhabitants). It is certain that he was popular. The sources imply that people flocked to his banner because he paid extremely well, but the real reason must have been that the ideas of the Khāridjites filled the masses with enthusiasm; the movement had acquired towards the end of the Umayyad dynasty a scope and an intensity that it had never known. Al-Ḍaḥḥāk's army is said to have numbered 120,000 men. Even the Umayyad Sulaymān, son of the Caliph Hishām, took his place alongside the Khāridjites, with his *mawālī* and his soldiers, although they had proclaimed him Caliph. Marwān, then busy besieging Ḥimṣ, asked his son ʿAbd Allāh, whom he had left at Ḥarrān, to march against al-Ḍaḥḥāk, but ʿAbd Allāh, beaten, retreated into Niṣībīn and was besieged there by the Khāridjite. Finally Marwān, who had meanwhile seized Ḥimṣ, himself marched against al-Ḍaḥḥāk. The battle took place at al-Ghazz on the territory of Kafartūthā (al-Masʿūdī, *Murūdj*, vi, 62: between Kafartūthā and Raʾs al-ʿAyn) towards the end of 128/Aug.-Sept. 746. Al-Ḍaḥḥāk fell in a fray, and his body was not discovered by Marwān's men until the following night. His successor, Khaybarī, was also killed when he attempted to renew the attack.

DAHISTĀN, erroneous spelling of Dihistān [*q.v.*].

DAHLAK Islands, a group of islands off the west coast of the Red Sea, opposite Muṣawwaʿ (Eritrea), with their centre about 40° 10′ E., 15° 45′ N. Of about 125 islands, including tiny islets, rocks and reefs, the two largest are Dahlak al-Kabīr and Nūra. Others are Nokra, Dohol, Harat Kubarī, Daraka and Dinifarikh. All are flat and low, with deeply indented coasts and scanty rain and vegetation; some are normally or seasonally inhabited, to a total in all of 1500 to 2500 persons, Tigré-speaking Muslims who closely resemble the Samhar coastal tribesmen. They represent an Ethiopian base with an admixture of Arabs, Danākil, Somālīs and Sūdānīs. The islands

afford miserable grazing for goats and camels, with some humble sea-trading, fishing, recovery of mother-of-pearl (and, in former times, pearls), and quarrying. The Italians, who used Nokra Island as a penal station for undesired politicians as well as prisoners, drilled unsuccessfully for petroleum in 1357-59/1938-40.

The derivation of the name is unknown; the islands are referred to to as ʼΕλαία in Artemidorus and the Periplus, and as Aliaeu by Pliny. Occupied by the Muslims in the 1st/7th century, Dahlak al-Kabīr was used as a place of exile or prison by the Umayyad Caliphs (whose détenus included the poet al-Aḥwas and the lawyer Arrāk) and later by the ʿAbbāsids. About the 3rd/9th century the islands passed under the Yamanī coastal dynasty of Zabīd, and in probably the 6th/12th achieved independence as an amīrate both wealthy (thanks to trade and ruthless piracy) and highly civilized, as many recovered documents and elegant Kūfic inscriptions testify. Allied at times with (or menaced by) the Mamlūks of Egypt, and with claims to rule part of the neighbouring mainland including Muṣawwaʿ, the Dahlak amīrs (called "kings" by Maḳrīzī) still fell intermittently under Ethiopian or Yamanī suzerainty. The Amīr ruling when the Portuguese appeared in 919/1513 was Aḥmad b. Ismāʿīl, whose opposition to the newcomers was punished by a devastation of his islands; but he was later restored as a Portuguese vassal. Adhesion to the cause of the Muslim conqueror and liberator Aḥmad Grañ against the Portuguese led, after temporary success and the appointment of Aḥmad Ismāʿīl's successor as Governor of Harkiko, to a second devastation and a mass evacuation of the islanders. Reoccupied, the islands fell easily to the Turkish fleets later in the century, and their fortunes were thereafter those of rarely-asserted Turkish suzerainty, actual or nominal dependence on Muṣawwaʿ, and temporary Egyptian Government in the second half of the 13th/19th century. When the Italians colonized Eritrea in 1885, the Dahlak Islands had long since ceased to offer any claims to interest. They became a Vice-Residenza, with headquarters at Nokra, in the Commissariato of Bassopiano Orientale. This was abolished as a separate administrative unit under the British occupation of Eritrea (1360-72/1941-52) and that of Ethiopia from 1372/1952 onwards.

DAḤLĀN, SAYYID AḤMAD B. ZAYNĪ, born in Mecca towards the beginning of the 19th century, was from 1288/1871 Muftī of the S̲h̲āfiʿīs and *S̲h̲ayk̲h̲ al-ʿUlamāʾ* (head of the corporation of scholars and therefore of the body of teachers in the *Ḥaram*) in his native city. When the Grand S̲h̲arīf ʿAwn al-Rafīḳ, because of a dispute with the Ottoman Governor ʿUt̲h̲mān Pas̲h̲a, removed himself to Madīna, Daḥlān followed him there but died soon afterwards from the fatigue of the journey in 1304/1886. Particularly in his later years, Daḥlān was very active as an author. He not only covered the traditional Islamic sciences which were studied in Mecca in his time, but produced a number of treatises on controversial topical questions, and became the solitary representative of historical writing in Mecca in the 19th century. The most successful of his writings on traditional subjects were a commentary on the *Ād̲j̲urrūmiyya* (see IBN ĀD̲J̲URRŪM) and an edifying biography of the Prophet, known as *al-Sīra al-Zayniyya*, both of which were often printed. His *al-Durar al-Saniyya fi 'l-Radd ʿala 'l-Wahhābiyya* provoked a chain of pro-Wahhābī and anti-Wahhābī replies and counter-replies. His polemics against Sulaymān Effendi, one of two rival Turkish *s̲h̲ayk̲h̲*s of the Naḳs̲h̲ibandī *ṭarīḳa* in Mecca, who competed for the leadership of the Naḳs̲h̲ibandīs in Indonesia, and against the learned *s̲h̲ayk̲h̲* Muḥammad Ḥasab Allāh of Mecca, whose scholarly reputation equalled his own were not free of personal interest. Of his works on history, *al-Futūḥāt al-Islāmiyya*, a history of the Islamic conquests until the time of the author, is remarkable for the light it throws on his attitude to the contemporary Mahdist rising in the Sudan, and his history of Mecca, *K̲h̲ulāṣat al-Kalām fī Bayān Umarāʾ al-Balad al-Ḥarām*, until the year 1095/1684 a short extract from the chronicle of al-Sind̲j̲ārī (Brockelmann, II, 502), is a most valuable source for the events in Mecca during the following two centuries, including the rise of the Wahhābīs, their first rule over the Ḥid̲j̲āz, the fight of the S̲h̲arīfs against them, the restitution of Ottoman rule by Muḥammad ʿAlī, and the disorders in D̲j̲idda of 1274/1858. Being a friend of the family of the ruling S̲h̲arīfs, Daḥlān had access to the best written and oral information. The giving of *fatwās* formed, of course, an important part of his activities, and some of his decisions were incorporated in the current handbooks of S̲h̲āfiʿī doctrine; in his last years, however, he handed over this routine work to his assistant or *amīn al-fatwā*, Sayyid Muḥammad Saʿīd Bābaṣēl (Brockelmann, II, 650, S II, 811). Snouck Hurgronje has drawn a detailed picture, based on close acquaintance, of his person and background.

Bibliography: Snouck Hurgronje, *Verspr. Geschr.*, iii, 65-122 (with two extracts from the *K̲h̲ulāṣat al-Kalām*); Brockelmann, II, 649 f., S II, 810 f.; ʿAbd al-Ḥayy al-Kattānī, *Fihris al-Fahāris*, i, 290-2; Sarkīs, *Muʿd̲j̲am al-Maṭbūʿāt*, 990-2. (J. SCHACHT)

AL-**DAHNĀʾ**—in Saʿūdī Arabia—a long, narrow arch of *nafūd* or dune desert, varying in width from 10 to 75 km., extending around an eastward curve for a total length of over 1,000 km., connecting the Great Nafūd of the northwest with the Empty Quarter (al-Rubʿ al-K̲h̲ālī [*q.v.*]) of the south, lacking in natural water sources except along the fringes, but furnishing a favourite area of pasturing.

In the past separating the interior area of al-Yamāma from the coastal region of al-Baḥrayn, al-Dahnāʾ today serves as an informal boundary between the Province of Nad̲j̲d and the Eastern Province (until 1953 the Province of al-Ḥasā or al-Aḥsāʾ). Its western edge formed a major sector of the westerly boundary of the petroleum concession granted in 1933 to American interests, although an area of potential priority extended still farther west. Beginning with the first well in 1957, an oil field has been discovered in the sand belt itself and adjacent easterly thereto—the K̲h̲urayṣ field, some 120 km. west of the immense G̲h̲awār field and *ca.* 150 km. west of al-Hufūf (in the oasis of al-Ḥasā).

Al-Dahnāʾ is the easterly and much more continuous of two parallel strips of sand desert extending from al-Nafūd generally south-eastward (see D̲J̲AZĪRAT AL-ʿARAB, esp. p. 536[1]). According to tribal

toponymy it begins in the north-easterly Nafūd projection some 50 km. west of Darb Zubayda, which crosses it roughly along the line of longitude 43° 32′ E., and ends far southward with the brownish *ʿirḳ*s of al-Duhm, which lie in the latitude of the district of al-Aflādj (to the west) and the well Muḳaynima (to the east), or just above 22° N. The final link with the southern sands is formed by the continuing band of ʿUrūḳ al-Rumayla, which joins the Empty Quarter slightly below the line of 20° N.

The upper portion of al-Dahnāʾ runs between the desert of al-Ḥadjara on the north and the upland of al-Taysiyya on the south, to the ancient channel of Baṭn al-Rumma (modern Wādī al-Rumah—Wādī al-Bāṭin). Here, just south of the small Wādī al-Adjradī, the Dahnāʾ sands spread south-westward so as to be connected, through the *nafūd* of al-Sayyāriyyāt, with those of Nafūd al-Maẓhūr and Nafūd al-Thuwayrāt in the westerly sand chain. Thereafter, al-Dahnāʾ continues between and roughly parallels the two arcs formed by the low, stony plateau of al-Ṣummān (classical al-Ṣammān), a part of which is called al-Ṣulb, on the east, and the lofty escarpment of Djabal Ṭuwayḳ on the west, but is longer than either. Closer on the west is the escarpment of al-ʿArama (not al-ʿArma), which is much shorter, ending southward at the discontinuous channel of Wādī Ḥanīfa—Wādī al-Sahbāʾ, through which the sand belt is crossed by the Saʿūdī Government Railway, completed in 1951. Beyond this second great channel, al-Dahnāʾ continues between the southerly Ṣummān (Ṣummān Yabrīn, etc.) on the east, and the eastward-sloping, gravelly limestone region of al-Biyāḍ on the west. Running on under the name of ʿUrūḳ al-Rumayla to join the sands of the Empty Quarter, the southernmost portion of the sand strip has to the east the gravel plains of Abū Baḥr and Raydāʾ, and to the west the lower part of al-Biyāḍ and the terminal stretch of Wādī al-Dawāsir (here called Wādī al-Aṭwāʾ).

Narrower in its northern and southern terminal reaches, al-Dahnāʾ attains its greatest width in the portion lying between the two ancient but now sand-choked *wādī* channels, and exhibits here its most striking features. In the area of Ḥawmat al-Niḳyān, which lies athwart the crossing of Darb al-Mubayḥīṣ above the line of 26° 30′ N., over 100 tall pyramidal dunes tower above the huge, long sand ridges and reach heights up to 175 m. These massive formations, which are also called "star dunes", seemingly ride upon the *ʿirḳ*s, but they actually rest upon their own bedrock and are separated from the surrounding sand massifs by peripheral hollows.

In normal seasons a choice pasture land to shepherds, al-Dahnāʾ has been described by travellers as a difficult barrier, because of its long, high *ʿirḳ*s and its lack of water. The dread which it inspired in those who were strangers to it is reflected in the account of how in 12 A.H., during the Wars of the *Ridda* an expedition to al-Ḳaṭīf and Dārīn temporarily lost its camel transport during the night of crossing and was saved from death only by the miraculous appearance of a lake of sweet water. (Caetani, *Annali*, ii-2, 722, with refs. to al-Ṭabarī, Ibn al-Athīr, Yāḳūt, and the *Kitāb al-Aghānī*).

In addition to descriptions of Darb Zubayda with its chain of cisterns, we have, from Arabic sources, information regarding other and even earlier routes crossing al-Dahnāʾ. However, the details of toponymy from a long-past era are often difficult to reconcile with those of the present, in which there are many changes. A motorable crossing (with connexions to Medina, Mecca, and al-Riyāḍ) more or less follows Darb Zubayda between Birkat al-Djumayma, on the Saʿūdī-ʿIrāḳī border, and the *ḳalīb* of Zarūd, in Shāmat Zarūd south-west of al-Taysīya. Two motor crossings, which connect with this route and offer better travel to Zarūd *via* the *ḳalīb* of Turaba, branch from Līna (on the outer edge of al-Dahnāʾ, with old wells cut through stone; the junction of several motor and caravan tracks to al-ʿIrāḳ). One leads first westward by Darb Līna to Buraykat al-ʿAshshār (beside Darb Zubayda, in al-Dahnāʾ), and thence south-westward by Darb Ḳabʿa. The other runs south-westward over Darb Umm Udhn to Birkat al-ʿArāʾish in al-Taysīya, and continues in the same direction *via* Darb Umm Ṭulayḥa to join Darb Ḳabʿa and to cross ʿIrḳ al-Maẓhūr north-west of Turaba.

It is the presence of lasting wells which fringe al-Dahnāʾ, or lie sufficiently near, that has made it possible for the Badw to take advantage of the normally abundant pasturage of the sand belt. However, it is common for tribal groups, going forth with their camels, goats, and sheep from summering places (*maḳāyiẓ*) at more distant wells or villages, to spend in al-Dahnāʾ (as also in other sand deserts) all or most of the cooler portion of the year, keeping in their tents little or no water, and depending for sustenance on the milk from their animals. When rainfall has made the herbage plentiful and succulent, the animals, described as *djawāzī* or *madjziya* (classical verb: *djazaʾa, yadjzaʾu*), often remain at pasture without watering for as long as four or even six months.

The excellence and amplitude of the pastureland of al-Dahnāʾ are described by Yāḳūt, who says that it has been mentioned by many poets, especially Dhu ʾl-Rumma.

Groups now pasturing regularly in al-Dahnāʾ are of the following tribes: in the north, from al-Nafūd to the wells of al-Bushūk, Shammar, and from al-Bushūk to Wādī al-Adjradī and the *zabāʾir* of al-Sayyāriyyāt, Ḥarb; therefrom to Darb al-Mubayḥīṣ, Muṭayr; thence to the crossings of the main north-south motor track and Darb al-ʿArʿarī, Subayʿ (with also some of Suhūl); thence through all the remaining portion of al-Dahnāʾ and through ʿUrūḳ al-Rumayla, al-Dawāsir. Groups of al-ʿUdjmān and of Ḳaḥṭān also range in the southern part of the pasture area of Subayʿ and the northern part of that of al-Dawāsir—*i.e.*, east of the wells of Ḥafar al-ʿAtk, Rumāḥ and al-Rumḥiyya, and Ramlān, al-Djāfiyya, and Siʿd. In addition, some of al-Ṣulaba range in the northerly area of al-Dahnāʾ.

There is little use in attempting to identify the "mountains" or "swords" of sand in al-Dahnāʾ as mentioned by various sources, especially Yāḳūt. The names have changed too much. Likewise, there is no profit in belabouring the question of the origin and meaning of the name *al-Dahnāʾ* itself. The name has often been explained as meaning "red". For the root *DHN*, there persists the sense of paucity of moisture (as in *dahan al-maṭar al-arḍ*), from which may have been derived the senses connected with ointment and oil, including cooking-fat and, in modern times, oil-base paints. The people use *ʿabl* (or *arṭā*)—which grows widely in al-Dahnāʾ—for tanning, but the resulting colour is expressed by *ḤMR*, not by *DHN*, which is reserved to the application of fat to make the leather pliable and soft. One association of redness in the language of the people concerning this desert may be found in the occasionally heard

expression *arḍ madhūna*, which is explained as distinguishing the sands of al-Dahnāʾ, as of a brownish or a duller red, from those of al-Nafūd, which are said to be of a lighter shade of red. At the same time, the people also equate *arḍ madhūna* with *arḍ mundahina*, land only lightly or superficially moistened by rain.

Yāḳūt, in both the *Muʿdjam* and the *Mushtarik*, lists several other places and topographical features under the name *al-Dahnāʾ* or *al-Dahnā*.

AL-**DAHNADJ**, Persian *dahna, dahāna, marmar-i sabz* ('green marble'), Turkish *dehne-i frengi*, malachite, the well known green copper-ore. The description of the mineral in the *Rasāʾil Ikhwān al-Ṣafā* goes back to the pseudo-Aristotelian lapidary. According to that, the malachite is formed in copper mines from the sulphur fumes which combine with copper to form layers. Its colour is compared to that of the chrysolith (*zabardjad*), although it does appear in different shades: dark green, veined, the shade of peacock's feathers, and pale green, with all intermediate shades. Frequently all the shades appear in one piece, as it developed in the earth, layer by layer. The stone is a soft one, and therefore looses its gloss with the years. Tīfāshī, following Balīnās (Apollonius of Tyana), explains how the very best copper is gained from it. There is new malachite and old, from Egypt, Kirmān, and Khurāsān. The very best kind is the old Kirmānian. The stone has been found in ancient Egyptian graves, usually in the form of amulets (scarabs), statuettes, and cut stones. Our detailed description of malachite comes from al-Rāzī, who also treats of the following: 1) its calcination (*i.e.*, its decomposition and the burning up of sulphur and oils which it contains), which can take place in 4 different ways; 2) its ceration, due to salts and borax, each again in 4 different ways; 3) its sublimation.

Taken in powder form and with vinegar, it is regarded as a powerful antidote to poison; on the other hand. it will harm a person who has not been poisoned, and then causes serious inflammations. If rubbed on the sting of a scorpion or a bee, it will reduce pain; it has also been used against leprosy and to cure diseases of the eye. Evidence in poetry can be found in al-Shammākh (*LA*, s.v. *dahnadj*).

DAHOMEY, a corridor 418 miles long by 125 miles wide, between Togoland and Nigeria, is one of the earliest known countries on the Gulf of Guinea.

The coast is low-lying, fringed with lagoons, while the central zone is formed of table-land and isolated mountains; the northern part is higher, slanted across by the mountains of Atacora, which rise to about 800 metres. In the south especially, the humidity is high and the temperature fairly constant although there are two rainy and two dry seasons.

The population of Dahomey, nearly two million inhabitants, is chiefly composed of Fon (central region), Goun and Yoruba (south-east region), Adja (south-west), Bariba, Somba, and Fulani (northern region).

The principal town is Cotonou (87,000 inhabitants), although Porto-Novo has always been the administrative capital.

In contact with Europeans since the seventeenth century, Dahomey was particularly affected by the slave trade, which helped also to increase the wealth of certain of its kingdoms, notably that of Abomey.

It was this last which put up the longest and fiercest resistance to French penetration (1892).

Dahomey, which entered the federation of French West Africa in 1899, played a great part in its development, through the agency of its élites who had emigrated to the various other territories. Together with Senegal, it was one of the first to form political movements, which demonstrated their strength well before the second world war.

Dahomey, like most of its neighbours on the Gulf of Guinea who have been influenced by the Benin cultures, has retained the strong animistic foundation upon which rests the life of its civilization.

The social and religious organization of the country, where animism was the state religion, forbade the introduction of any foreign doctrine and it was not until the fall of the kingdom of Abomey that Christianity could begin to spread.

Islam could nowhere take root very deeply nor bring about large conversions as the chiefs and the local princelings were before the end of the nineteenth century never willing to renounce their beliefs, neither among the archaic clan societies of north-west Dahomey called *Somba*, nor in the feudal Bariba societies of the north-east region which was still crossed by the caravan routes marked out by the Islamic caravanserais, nor in the kingdoms of the south, absolute monarchies where the king was the all-powerful repository of the ancestral traditions which he revived each year in honour of his predecessors.

The Muslim penetration probably began from the north-east; a little commercial colony of the Mali Empire was set up in the thirteenth century in the region which is today Sokoto: the travellers of the time called it Guangara. It was from there that the waves of caravans departed for present-day Ghana, land of the kola. Salt, slaves and other products from the north, sometimes even from Libya, came down to the south-west while kola nuts passed up to the Nigerian and the Hausa lands, crossing North Dahomey. Thus there were quickly established little Muslim colonies called *Wangara* or *Maro*(in Dahomey) which soon blossomed into important centres like Parakou, Djougou or Kandi.

These foreign settlements remained near the local chiefs, whose domains were crossed by the caravan routes; they founded families and so introduced Islam, which slowly developed, by the simple device of local marriages.

Later on, the conquest of the Songhai empire by the Moroccans, at the beginning of the 17th century, brought about the withdrawal towards the Niger of a group of Muslim Songhai called Dendi. These established themselves probably in the extreme north of modern Dahomey and formed the second wave of the Islamic influence. The third wave corresponded to the immigration of the Fulani shepherds, who spread out during the 18th century over the whole of the northern half of Dahomey. Although their religion was still tinged with traces of animism, it formed none the less an Islamic centre which converted a great many of the former slaves or Gando, with whom they maintained permanent contact.

At length, in the last years of the eighteenth century, Islam also entered by the south-east and Porto-Novo, the present capital of Dahomey, soon contained some Muslim Yoruba merchants, who had come from Ilorin and from the west of modern Nigeria. They quickly increased, converted certain Yoruba families of Dahomey and also some descendents of the slaves who had returned from Brazil bearing Portuguese names.

Although it is difficult to draw up statistics, we can reckon that, of a total Dahomey population of 1,800,000 inhabitants, between 230 and 240 thousand are Muslim, of whom only 100,000 are practising devotees.

The greater part of them are Tid̲j̲ānī; some, particularly among the older people, belong to the Ḳādiriyya order. There are a few Hamallists in the north. In spite of this near-unity of sect, a difference of belief set some Muslims, Yoruba in origin, against the natives of the northern regions (Hausa-Zerma-Fulani-Dendi), who claimed to practise their religion with greater orthodoxy. These two aspects of Islamic Dahomey are to be met chiefly at Porto-Novo (Islamic Yoruba) and at Parakou (the Islamic north), which were soon called upon to become the two great Muslim capitals, Djougou having slowly to give place to its neighbour Parakou, where some conversion movements had already been born and where there were established some of the masters of the Ḳur'ān who possessed a new and more dynamic conception of their religion.

It is probable that, in the years to come, the religious leaders and the *imāms* will be chosen more and more from among the most educated notables and no longer, according to heredity, from the families connected with the animist chiefs. This explains the rise today of the schools of the Ḳur'ān in North Dahomey in particular, where religious learning is always an object of prestige.

(J. Lombard)

DAHR, time, especially infinitely extended time (cf. Lane; al-Bayḍāwī on Ḳ. 76.1). The pre-Islamic Arabs, as is shown by many passages in their poetry, regarded time (also *zamān*, and *al-ayyām*, the days) as the source of what happened to a man, both good and bad; they thus give it something of the connota-

tion of Fate, though without worshipping it (W. L. Schrameier, *Über den Fatalismus der vorislamischen Araber*, Bonn 1881; Th. Nöldeke, *Encyclopedia of Religion and Ethics*, i, 661 b; for possible parallels cf. A. Christensen, *Iran*, 149 f., 157—Zurvān as both time and fate; Kronos, Chronos, as father of Zeus; cf. also R. C. Zaehner, *Zurvan*, Oxford 1955, esp. 254-61. This view is ascribed to pagans in the Ḳur'ān, 45. 24/23, "They say ... we die and we live and only *dahr* destroys us". Pre-Islamic conceptions probably influenced the Islamic doctrine of predestination (W. Montgomery Watt, *Free Will and Predestination in Early Islam*, London 1949, 20 ff., 31). Tradition supplies evidence of an attempt to identify God with *dahr*; Muḥammad is reported to have said that God commanded men not to blame *dahr* "for I am *dahr*" (*e.g.*, al-Bukh̲ārī, *Tafsīr* on 45. 24/23; *Adab*, 101; *Tawḥīd*, 35; al-Ṭabarī, *Tafsīr* on 45. 24/23; further references in Wensinck, *Concordance*, s.v. *ād̲h̲ā*, *k̲h̲ayb*; a possible connexion with funeral rites is noted by Goldziher, *Muhammedanische Studien*, i, 254); the Ẓāhiriyya [*q.v.*] are said to have reckoned *dahr* as a name of God (but cf. I. Goldziher, *Die Ẓâhiriten*, Leipzig 1884, 153 ff.). Many traditionists tried to interpret the tradition so as to avoid the identification (cf. Goldziher, *op. cit.* 155; Ibn Ḳutayba, *Ta'wīl Muk̲h̲talif al-Ḥadīth̲*, Cairo 1326, 281-4). The *mutakallimūn* show no interest in the point, and al-Ghazzālī is able to use *dahr* for the views of the Dahriyya [*q.v.*], which are independent of pre-Islamic Arab sources (*Tahāfut al-Falāsifa*, ed. M. Bouyges, Beirut, 1927, 208.1). By poets and prose writers the word continued to be used in the pre-Islamic way (cf. al-Mutanabbī, ed. F. Dieterici, Berlin, 1861, 473, 576); a biographer says that *al-zamān*, time, and *al-ayyām*, the days, took away al-G̲h̲azzālī (al-Subkī, *Ṭabaḳāt al-S̲h̲āfiʿiyya*, Cairo 1324, iv, 109).

(W. Montgomery Watt)

DAHRIYYA, holders of materialistic opinions of various kinds, often only vaguely defined. This collective noun denotes them as a whole, as a *firḳa*, sect, according to the *Dictionary of the Technical Terms*, and stands beside the plural *dahriyyūn* formed from the same singular *dahrī*, the relative noun of *dahr*, a Ḳur'ānic word meaning a long period of time. In certain editions of the Ḳur'ān it gives its name to *sūra* LXXVI, generally called the *sūra* of Man; but its use in XLV, 24 where it occurs in connexion with the infidels, or rather the ungodly, erring and blinded, appears to have had a decisive influence on its semantic evolution which has given it a philosophical meaning far removed from its original sense. These ungodly men said: "There is nothing save our life in this world; we die and we live, and only a period of time (or: the course of time, *dahr*) makes us perish". The word has as yet no philosophical specification; according to the commentaries of al-Bayḍāwī and the D̲j̲alālayn, it signifies "the passage of time" (*murūr al-zamān*), according to al-Zamak̲h̲s̲h̲ari "a period of time which passes" (*dahr yamurru*) in XLV, 24, and an interval of time of considerable length in LXXVI, 1. The idea of a long period of time became increasingly dominant, and finally reached the point of signifying a period without limit or end, to such an extent that certain authors used *al-dahr* as a divine name, a practice of which others strongly disapproved (Lane, s.v. *dahr*; see also *Dictionary of the Technical Terms*, i, 480). The vocalization given in the new edition of the *Rasā'il Ik̲h̲wān al-ṣafā'*, Beirut 1376/1957, iii, fasc. 9, 455, is *duhriyya*; this had already been attested by linguists who considered it to be in conformity with the transformation which vowels often undergo in the *nisbas* (Sībawayhi, ed. Derenbourg, ii, 64, 19-21). Al-D̲j̲urd̲j̲ānī, *Taʿrīfāt*, s.v., emphasizes the perenniality and defines *al-dahr* as "the permanent moment which is the extension of the divine majesty and is the innermost part (*bāṭin*) of time, in which eternity in the past and eternity in the future are united".

According to the explanation given by al-Bayḍāwī, a semantic link with the material world must be understood, for *dahr*, he says, basically denotes the space of time in which this world is living, overcoming the course of time. The doctrine of the *dahriyya* was subsequently denoted by the same term, and in this way al-G̲h̲azālī, among others, speaks of "professing the *dahr*", *al-ḳawl bi 'l-dahr* (*Tahāfut*, ed. Bouyges, 19). The translation "fatalists", sometimes used, cannot be justified. The relative *dahrī* will therefore have two philosophical connotations. It denotes, firstly, the man who believes in the eternity of the world whether in the past or in the future, denying, as a result of this opinion, resurrection and a future life in another world; secondly, the *mulḥid*, the man who deviates from the true faith (Lane, s.v. *dahrī*; cf. for the first meaning given, Pococke, *Notae miscellanae*, Leipzig 1705, 239-240, under the transcription *Dahriani*). To place the whole of human life in this world is to lead swiftly to a hedonistic morality, and it is in this sense that the first literary use of the word has been noted, in the *Kitāb al-Ḥayawān* by al-D̲j̲āḥiẓ (Cairo 1325-6/1906-7) in which, in an over-wide generalization no doubt made under the influence of *sūra* XLV, 24, *dahrī* denotes the man who "denies the Lord", creation, reward and punishment, all religion and all law, listens only to his own desires and sees evil only in what conflicts with them; he recognizes no difference between man, the domestic animal and the wild beast. For him it is a question only of pleasure or pain; good is merely what serves his interests, even though it may cost the lives of a thousand men (vii, 5-6). It follows from the principles accepted by the *dahriyyūn* that they reject popular superstitions, the existence of angels and demons, the significance of dreams and the powers of sorcerers (al-D̲j̲āḥiẓ, *ibid.*, ii, 50). Some of them, however, on the basis of rationalist analogies, apparently admitted the metamorphosis of men into animals (*mask̲h̲*, *ibid.*, iv, 24).

The *dahriyya* are defined in the *Mafātīḥ al-ʿulūm* (ed. Van Vloten, Leyden 1895, 35) as "those who believe in the eternity of the course of time"; the *Ik̲h̲wān al-ṣafā'* call them the *azaliyya*, those who believe in the eternity of the cosmos, as opposed to those who attribute to it a creator and a cause (ed. Bombay 1306, iv, 39; ed. Beirut 1376/1957, iii, 455). In this respect the *Mutakallimūn* are opposed to them, affirming the beginning in time of bodies and of the world created by God, and to this adding an affirmation of the divine attributes, God being alone eternal and alone powerful (*ibid.* Bombay 39-40 and Beirut 456). Like the *Mutakallimūn* in general, the Judaeo-Arab theologian Sāʿadyā (d. 942) refutes their doctrine, first in his commentary on *Sēfer Yeṣīrah* (ed. Lambert, Paris 1891), and later in the first book of his *Kitāb al-Amānāt wa 'l-Iʿtiḳādāt* (ed. Landauer, Leyden 1880), in three pages (63-5) on the doctrine known by the name *al-dahr*, which regards not only matter as eternal but the beings of the world which we see as invariable; this sect limits knowledge to the perceptible: "no knowledge save of what is accessible to the senses" (64, l. 13). His trans-

lation of Job also alludes to it, for he renders *ōraḥ* *ʿōlām* by *madhāhib al-dahriyyīn*; cf. also several passages in his commentary on Proverbs (B. Heller, in *REJ*, xxxvii (1898), 229).

Abū Manṣūr ʿAbd al-Ḳāhir b. Ṭāhir al-Baghdādī does not mention them among the sects, in the *Kitāb al-farḳ bayn al-firaḳ*, but he refers to them several times among the unbelievers, particularly the philosophers who looked on the heavens and stars as a fifth element escaping corruption and destruction, and who even believed in the eternity of the world (ed. Badr, Cairo 1328/1910, 102, 106 with typogr. error, 206, 346). He also compares them with the Christians, without any explanation, 157.

Al-Ghazālī for his part also looked on the *dahriyya* rather as an order of philosophers who throughout the centuries expressed a certain current of thought which was never without some representative. He does not always regard them in the same way. In the *Munḳidh min al-Ḍalāl* (ch. III, Cairo 1955, 96-97), he speaks of them as forming the first category (*ṣinf*) in chronological order. They were then a "sect (*ṭāʾifa*) of the ancients", denying a Creator who governs the world and the existence of a future world, professing that the world has always been what it is, of itself, and that it will be so eternally. He likens them to the *zanādiḳa*, who also included another, and more numerous, branch, the *ṭabīʿiyyūn*, naturalists. The *dahriyya* seem to make the perenniality of the world the centre of their doctrine, whilst the *ṭabīʿiyyūn* insist upon the properties of temperaments and deny, not creation but paradise, hell, resurrection and judgement. Against these two categories there stands a third, the deists, *ilāhiyyūn*, who came later and included Socrates, Plato and Aristotle. They refuted the errors of the first two groups, but they were not always followed by the Muslim philosophers, such as Ibn Sīnā and al-Fārābī. Both were particularly singled out in the *Tahāfut al-Falāsifa* by al-Ghazālī (ed. Bouyges, Beirut 1927, 9) who with reference to them demonstrates the "Incoherence of the philosophers" (according to the translation preferred by M. Bouyges to "Destruction" of the philosophers), at the same time proving the incapacity (*taʿdjīz*) of the adversaries. For the two Muslims strove against those who denied the Divinity, though not without avoiding theories which led them to be classed by al-Ghazālī among the *dahriyya*. To the latter, who are also given the name *dahriyyūn*, are attributed the following theses: they deny a Cause which might be "causative of causes" (65, l. 3-4); the world is eternal and has neither cause nor creator; new things alone have a cause (133, l. 6 and 206, l. 5). Here there are only two groups of philosophers and not three, that of the "followers of truth" (*ahl al-ḥaḳḳ*) and one other, that of the *dahriyya* (133, l. 6). Now there are philosophers who believe that the world is eternal and, nevertheless, demonstrate that it is the work of a Creator (*ṣāniʿ*), a reasoning which al-Ghazālī declares to be contradictory (133, l. 6 ff.). In fact, Ibn Sīnā returns to this subject on many occasions, and he was clearly persuaded of the force of his reasoning. Al-Ghazālī, apparently not convinced, compares the *falāsifa* with the *dahriyya* (95, l. 6) on account of the ambiguity in a reasoning which allows that the work may be God's, provided that he had not planned to carry it out but had acted from necessity. This was very much what Ibn Sīnā maintained, believing that if God made some plan, his action would be determined by some external factor, which is inadmissible. Al-Ghazālī also finds fault with the theses which hold that from One only One can emerge (95-132), that matter is eternal, with the four elements on one hand, on the other the fifth, incorruptible element which forms the celestial bodies; all of these are reasons for classing those who hold these theories with the *dahriyya* (206, l. 5 ff.). In the *Tahāfut al-Tahāfut* (ed. Bouyges 1930), Ibn Rushd does not make the same strictures as al-Ghazālī; he does not name the *dahriyya* (see Index, 654) who only appear under this denomination in the summary of al-Ghazālī's theses (414, l. 5), but he uses *dahr* not only in the original sense of "period of time" (95, l. 1 and 120, l. 3) but also in the sense of the well-known philosophic doctrine wrongly attributed to the *falāsifa* (415).

The *dahriyya* appear as a sect, properly speaking, in the definitions of Ibn Ḥazm and al-Shahrastānī. The former ascribes to the *dahriyya* the doctrine of the eternity of the world, and the corollary that nothing rules it, whilst all the other groups think that there was a beginning and that it was created, *muḥdath* (*Kitāb al-Fiṣal*, Cairo 1317, i, 9). He starts by giving the five arguments of the *dahriyya* who are called (11, l. 9) "those who profess the *dahr*", *al-ḳāʾilūn bi 'l-dahr*. These may be summed up as follows: 1. "We have seen nothing which was newly produced (*ḥadatha*) unless it arose from a thing or in a thing". — 2. What produces (*muḥdith*) bodies is, incontestably, substances and accidents, that is to say, everything that exists in the world. — 3. If there exists a *muḥdith* of bodies, it is either totally similar to them or totally different, or similar in certain respects and different in others. Now a total difference is inconceivable, since nothing can produce something contrary or opposite to itself, thus fire does not produce cold. — 4. If the world had a Creator (*fāʿil*), he would act with a view to obtaining some benefit, of redressing some wrong, which is to act like the beings of this world, or else by nature, which would render his act eternal. — 5. If bodies were created, it would be necessary that their *muḥdith*, before producing them, should act in order to negate them, negation which itself would be either a body or an accident, which implies that bodies and accidents are eternal (10-11). After refuting these arguments in turn, Ibn Ḥazm gives five counter-arguments of his own, continuing the discussion (11-23) into the following chapter which is devoted to "those who say that the world is eternal and that, nevertheless, it has an eternal Creator".

Al-Shahrastānī begins the second part of his *Kitāb al-Milal wa 'l-Niḥal*, in which the philosophical sects are enumerated, with those who "are not of the opinion" that there is "a world beyond the perceptible world", *al-ṭabīʿiyyūn al-dahriyyūn*, "the naturalists who believe in *dahr*, who do not expound an intelligible [world]", *lā yuthbitūn maʿḳūlan*, this last word being in the singular (ed. Cureton, 201, l. 7). A second passage, "sometimes, on the other hand, ... they also admit the intelligible, (ed. Cureton, 202, l. 15)" seems to apply not to the naturalists who believe in *dahr* but to the *falāsifa dahriyya*, that is to say, very probably to Ibn Sīnā and al-Fārābī, contrasting them with the naturalists; this fits well with the position of the two philosophers who, for their part, strenuously affirm that an intelligible world exists. Thus the *dahriyya*, while having features in common, on the one hand with the naturalists, and on the other with the philosophers, could not be identified with

either. The passage, however, remains obscure. In the *Kitāb Nihāyat al-iḳdām* (ed. Guillaume, Oxford 1931, with partial translation) al-Shahrastānī records several discussions between the *dahriyya* (trans. materialists) and their adversaries (29, l. 1; 30, l. 15,' 123, l. 10, 126, l. 9), on the origin of the world, including the theory of atoms moving about in primal disorder. The mode of reasoning of the *dahriyya* appears sophistical, but the refuters who rely on the movements of Saturn adduce no proof. The origin of the world through the fortuitous encounter of atoms wandering in space is an opinion also attributed to the *dahriyya* by Djamāl al-Dīn al-Ḳazwīnī, *Mufīd al-ʿulūm wa-mubīd al-humūm*, Cairo 1310, 37.

The 19th century brought definition to a word that for so long had been somewhat loosely used. European natural sciences, penetrating the East, gave rise to a stream of very simplified but materialistic ideas which were the source of unexpected problems in Islam. (For an Ottoman ferman of 1798, refuting the Dahrī doctrines of the French Revolution, see Amīr Ḥaydar Aḥmad Shihāb, *Taʾrīkh Aḥmad Bāshā al-Djazzār*, edd. A. Chibli and I. A. Khalifé, Beirut 1956, 125 ff.; cf. B. Lewis in *Journ. World Hist.*, i, 1953, 121-2). The question of materialism was raised in an extremely acute form in India. After the Mutiny of 1857-8, Sayyid Aḥmad Khān realised that the Muslims could not challenge the British supremacy until they had assimilated western science and methods. In 1875 he founded the college of ʿAlīgaṙh [*q.v.*], later to be a University, combining English culture with the study of Muslim theology. Deeply impressed by the concepts of *conscience* and *nature*, he took the laws of nature as criteria of religious values. This new conception spread, giving, with the Arabic termination, the qualifying word *naturī*, which became *nayčarī*, plural *nayčariyyūn*, from transcription of the English pronunciation; in Persian *nayčeriyyé*. It was presented as a sort of new religion, appearing in the *Census of India*, where its followers were called *nečari*. These events exercised considerable influence on the whole of India, and made it necessary for orthodox Islam to take position.

Djamāl al-Dīn al-Afghānī [*q.v.*] wrote a violent reply in Persian, as early as 1298/1878, with his *Refutation of the Materialists*, the translation of which into Urdū was lithographed in Calcutta in 1883; it was translated into Arabic by Muḥammad ʿAbduh and first published (1st. ed. Beirut 1303/1885) under the title *Risāla fī ibṭāl madhhab al-dahriyyīn wa-bayān mafāsidihim wa-ithbāt anna 'l-dīn asās al-madaniyya wa 'l-kufr fasād al-ʿumrān*, then (2nd. ed., Cairo 1312, 3rd ed., Cairo 1320/1902) under the title *al-Radd ʿalā 'l-dahriyyīn* (French translation A.-M. Goichon, Paris 1942), while the original title included *al-nayshuriyyīn*, clearly denoting the meaning given to *dahrī* which is therefore the translation of naturalistic-materialistic. In this short work Djamāl al-Dīn traces back this doctrine to the Greek philosophers in terms recalling those of al-Ghazālī; he traces its history, such as he represents it, in the first chapter; it finishes with Darwin. His refutation is, throughout, superficial.

While materialism was spreading, particularly through Arabic translations of European works like Büchner's *Kraft und Stoff*, translated by Shiblī Shumayyil (Alexandria 1884), a contrary movement was taking shape. The history of this struggle between two irreconcilable conceptions is far from finished; it would require considerable research, but has no place here. In the various works mentioned above, the terms *māddiyya* and *māddiyyūn* have, in fact, always been used as synonyms of *dahriyya* and *dahriyyūn*; these latter finally disappeared, replaced by the more exact term. They no longer occur in the contemporary vocabulary in Egypt (information supplied by R. P. Jomier) and, without being in a position to make the same observation in respect of other countries, we can nevertheless remark that they are no longer found in certain publications in Muslim India.

(I. Goldziher-[A. M. Goichon])

DAHSHŪR, a place in the province of Djīza, some 40 kms. south of Cairo, to the west of the Nile on the edge of the desert. A necropolis and pyramids dating from the first dynasties of the Old Kingdom are situated there. These relics of the age of the Pharaohs are mentioned by al-Harawī and al-Maḳrīzī without a precise description being given. Abū Ṣāliḥ speaks of a great church and an important monastery there.

The present-day hamlet is insignificant and the name continues to be well known solely on account of the pyramids.

(G. Wiet)

DĀʿĪ (rarely, dāʿiya), "he who summons" to the true faith, was a title used among several dissenting Muslim groups for their chief propagandists. It was evidently used by the early Muʿtazilites [*q.v.* in *EI*¹]; but became typical of the more rebellious among the Shīʿīs. It appears in the ʿAbbāsid mission in Khurāsān; and in some Zaydī usage. It was ascribed to followers of Abu 'l-Khaṭṭāb. It was especially important in the Ismāʿīlī and associated movements (which were called *daʿwa*, "summons"), where it designated generically the chief authorized representatives of the *imām*.

Among the Ismāʿīlīs, at the height of the movement, the *dāʿīs* were organized hierarchically. (They have been compared to Christian bishops). The terms applied to the several ranks varied according to context (and probably the manner of ranking was not rigidly fixed). The chief of the *dāʿīs*, mouthpiece of the *imām*, was called *bāb* [*q.v.*] or *dāʿī al-duʿāt*. The greater dāʿīs (nominally, at least, the top twelve of them) were called *ḥudjdja*, "proof" of the truth, or, perhaps earlier, *naḳīb*; they seem each to have been in charge of a district (*djazīra*, island) where the *daʿwa* was preached. In some works, the *ḥudjdja* was called *lāḥiḳ* and the *dāʿī* was called *djanāḥ* (cf. W. Ivanow, *Studies in Early Persian Ismailism*, Leiden 1948, 2nd ed. Bombay 1955, ch. ii). Each *dāʿī* was apparently assigned to a particular territory, within which he evidently had extensive authority over the faithful, initiating new converts and admitting them by steps into the esoteric doctrine, the *bāṭin* [*q.v.*]. He was assisted by subordinates, entitled *maʾdhūn* (licensed to preach), *mukāsir* (persuader), etc.

Except where the *imām* himself was in power as Caliph, the *daʿwa* was usually a secret, conspiratorial movement. Accordingly, while a *dāʿī* in Ismāʿīlī-held lands had a high position in the state (the *dāʿī*

al-duʿāt, at the head of all official religious matters, seems to have been on a level with the *wazīr*, if not united with him in one person), the *dāʿīs* in other lands often had adventurous lives and sometimes ended bloodily. Many served as military leaders, particularly before the Fāṭimid state was established (for instance, the Ḳarmaṭian leaders; and Abū ʿAbd Allāh al-Shīʿī, who led Berber tribesmen in the revolt which established al-Mahdī in the Maghrib). Later, they still had to have a gift for political intrigue (some tried to convert the leading figures at the local court, or even the *amīr* himself; thus al-Muʾayyid fi ʾl-Dīn al-Shīrāzī at the Būyid court), for they were not only preachers but agents of the Fāṭimid state. Nevertheless, the *dāʿīs* were often independent scholars; vigorous theological and philosophical controversies were carried on among them, and the chief Ismāʿīlī books seem to have been written by *dāʿīs*, many of the most important by those labouring in hostile Iran.

In the parallelism drawn between the Ismāʿīlī *ḥudūd*, religious ranks, and the principles of cosmic emanation from the One, the *dāʿī* was sometimes associated with "time" or with the *khayāl*, "fantasy". For such purposes, the *ḥudjdja* formed a separate rank between the *dāʿī* and the *imām*, as did the *bāb* [*q.v.*].

The title *dāʿī* came to mean something different in each of the sects which issued from the classical Fāṭimid Ismāʿīlism. Among the first Druzes, the *dāʿīs* performed similar functions, but formed a rank directly dependent on the fifth of the great *ḥudūd*, the *tālī* (Bahāʾ al-Dīn); cosmically, they embodied the *djidd* ("effort"). Subsequently they became superfluous. The Nizārīs ("Assassins") inherited the Ismāʿīlī organization in the Saldjūḳ domains, which seems to have been headed by the *dāʿī* of Iṣfahān; *dāʿī* became the ordinary title for the chief of the sect, resident from the time of Ḥasan-i Ṣabbāḥ at Alamūt (in the name of an unknown *imām*), until in 559/1164 the then *dāʿī* proclaimed himself the actual *imām*. (Ḥasan-i Ṣabbāḥ was evidently also regarded as *ḥudjdja* in a special sense). The Ṭayyibī *daʿwa* of the Yaman separated from the official Fāṭimid organization under a *dāʿī muṭlaḳ*, an "absolute" or sovereign *dāʿī*, who claimed to be the representative of the true line of *imāms*, themselves in *satr*, occultation. The *dāʿī* had full authority over the community, and the Ṭayyibīs split more than once over his person; in the mid-twentieth century there are two main rival *dāʿīs*, one seated traditionally in the Yaman (Sulaymānī) and one seated in Bombay (Dāʾūdī).

For bibliography, see ISMĀʿĪLĪS.

(M. G. S. HODGSON)

DĀʿĪ, AḤMAD B. IBRĀHĪM, Turkish poet of the end of the 8th/14th and the beginning of the 9th/15th century. The scanty information about his life is scattered in his works and in *tedhkires*. A *ḳāḍī* by profession, he began to gain prominence as a poet at the court of the Germiyān in Kütahya under princes Sulaymān and Yaʿḳūb II. He seems to have travelled a great deal in Anatolia and in the Balkans. During the chaotic years of struggle between the sons of Bāyezīd I after the battle of Ankara (804/1402), he entered the service of one of them, *amīr* Sulaymān in Edirne, whose court had become a gathering place for many famous men of letters of the period such as Aḥmedī, his brother Ḥamzawī and Sulaymān Čelebi. He continued to flourish at court under Meḥemmed I (816/1413-824/1421) and became tutor to his son, the future Murād II. The sources do not agree on the date of Dāʿī's death; Ḥādjdji Khalīfa gives the year 820/1427, but there is evidence that he might still have been living during the first years of Murād II (824/1421-848/1444) (I. H. Uzunçarşılı, *Kütahya Şehri*. Istanbul 1932, 213). With the exception of Sehī (*Tedhkire*, 56) who has a short but appreciative note on him, until recently both Ottoman and modern scholars have considered Dāʿī a minor poet as but a few of his works were known. Since many of his works, specially an incomplete copy of his *dīwān* and his remarkable *mathnawī Čeng-nāme*, have come to light (Ahmed Ateş, *Türk Dili ve Edebiyatı Dergisi*, 3-4, 172-4) Dāʿī has proved to be an outstanding poet of his period, without doubt superior in richness of inspiration, originality, mastery of technique and fluency of style to many of his contemporaries.

Apart from various religious treatises (I. H. Ertaylan, *Ahmed-i Dâʿî*, Istanbul 1952) Dāʿī is the author of: (i) *Dīwān*; the only known copy is in Burdur Waḳf Library no. 735; it is incomplete and not arranged alphabetically, containing his later poems: six *ḳaṣīdas* two of which are dedicated to Meḥemmed I and 199 *ghazals*. (ii) *Čeng-nāme*, called wrongly *Djenk-nāme* by some sources (Gibb, *Ottoman Poetry*, i, 256) and confused with Shaykhoghlu's *Faraḥ-nāme* (*Khurshīd-nāme*) by others (ʿĀlī, *Kunh al-Akhbār* and Bursalī Meḥmed Ṭāhir, *ʿOthmanlī Müʾellifleri*, s.v.) is a *mathnawī* of over 1400 couplets, dedicated to Amīr Sulaymān in 808/1405. In this allegory, the human soul is symbolized by the harp, whose heavenly music is a sign of its divine origin and which seeks the mystic paths of return to oneness with God. In a cheerful party on a flower-strewn lawn in spring, the poet asks the harp why it is so sad yet plays joyful melodies. Thereupon the four parts of the instrument tell him their stories: the silk of the strings came from worms which fed on the flesh of Job before eating the leaves of mulberry trees; the wood of the frame was a beautiful cyprus; the parchment covering the wood a gentle gazelle which was cruelly killed by hunters, and the hairs of the key were from the tail of a magnificent horse killed by the Tatars. This *mathnawī* full of vivid description and rich imagery, told in a moving and colourful style of unusual fluency compares favourably with the best contemporary narratives and even with those of the classical period. (iii) *Tarassul*, a letter-writer which became a classic and long remained a popular hand-book (Sehī, *Tedhkire*, 56); (iv) *Muṭāyabāt*, a small book of 12 light poems; (v) *Waṣiyyat-i Nūshirwān-i ʿĀdil*, a short didactic *mathnawī*, probably translated from the Persian; (vi) *ʿUḳūd al-Djawāhir*, a short Persian rhyming vocabulary, written for the use of his princely pupil, the future Murād II; (vii) Persian *Dīwān*, autograph copy written in 816/1413 is in Bursa, Orhan Library no. 66; it is dedicated to Khayr al-Dīn Hādjdji Khalīl Bey; (viii) *Tafsīr*, translation of Abu ʾl-Layth al-Samarkandī's Ḳurʾān commentary, with an introduction in verse, both in simple language and unadorned style, dedicated to Umur Bey b. Timurtash (Üniversite Library T. Y. 8248); (ix) also attributed to Dāʿī, a translation of the *Tadhkirat al-Awliyāʾ*, ʿAṭṭār's well known biographies and sayings of Muslim mystics.

facsimile editions of the Turkish *Dīwān* and the *Čeng-nāme* and extracts from other works have been put together with all available data from sources; A. Bombaci, *Storia della letteratura turca*, Milan 1956, 297-9. (FAHİR İZ)

ḌAʿĪF [see AL-DJARḤ WAʾL TAʿDĪL].

DAḲAHLIYYA, name of an Egyptian province in the eastern region of the Delta. It owes its name, which is an Arabicized form of the Coptic Tkehli, to the town called Daḳahla which was situated between Damīra and Damietta, a little closer to the latter than the former. At one time famous for its paper mills, it is now but an insignificant village.

The province was created at the end of the 5th/11th century and it has survived till today with some changes in its boundaries. At present it extends along the eastern bank of the Damietta branch of the Nile, which marks its western boundary, and ends on the south-east at the province of Sharḳiyya. Its chief town is now Manṣūra.

DAKAR [see SUPPLEMENT].

DAKHAN (DECCAN). This word is derived from the Sanskrit word *dakshiṇa* 'right (hand)', hence 'south', since the compass points were determined with reference to the rising sun. The conventional line dividing north India from the south is formed by the south-western spurs of the Vindhyas along with their continuation called the Satpuŕās; peninsular India to the south of this line is usually further divided into (i) Deccan proper, extending up to the Tungabhadra, and (ii) south India extending right up to the southernmost tip of the peninsula. Physically also these two parts form two distinct units. For, while the Deccan plateau is formed by the great lavaic upland slowly rising from a point a few miles west of the deltas of the Godāvarī and the Krishṇa ending abruptly in the Western Ghāṭs, the country lying to the south of the Tungabhadra and touching the port of Goa has a distinct crystalline character. The Deccan proper, therefore, may be said to consist of five sections, *viz.*, (i) the western section enclosed by the sea and the Western Ghāṭs, called the *dēsh*, the original home of the Marāṭhas; this has extended beyond the Ghāṭs to include the whole territory with Aḥmadnagar and Poona as its principal towns; (ii) the area known as Berār during the Middle Ages and which is now known according to the ancient appellation of Vidarbha, with Nāgpur as its principal town; (iii) Maraṭhwāda, the Marāṭhi-speaking part of the old Ḥaydarābād State with its centre at Awrangābād; (iv) Tilangāna where Telugu is the mother-tongue of a large part of the population, with Ḥaydarābād as its historical and cultural capital; (v) the south-western portion populated mainly by the Kannadigās, with Bīdjāpur as its chief town.

Even if we disregard the legendary war between Rāma and Rāvaṇa, the Aryanization of the Deccan up to the far south must have been complete by the end of the Mawrya rule. There is little to relate between the fall of the Mawryas and rise of the Āndhras who ruled practically the whole of the Deccan plateau for five hundred years. We also read of the Ikshvakus of Nāgardjunakoṇḍa, the Vakaṭakas of Berar, the Western Čālukyas of Badāmī and Kālyanī, the Rāshṭrakūtas of Malkhēd, the Eastern Čālukyas of Vengī, the Yādavas of Deogiri and the Kākatīyas of Warangal, who ruled in different parts of the Deccan during the centuries preceding the Muslim conquest.

The first contact of the Deccan with the Muslims of the north was in 693/1294 when ʿAlāʾ al-Dīn, nephew of Sulṭān Djalāl al-Dīn Fīrūz Khaldjī of Dihlī, marched to Deogiri [see DAWLATĀBĀD] and forced the Yādava Radja Rāmačandra to pay tribute. It was, however, not till 718/1318 that this kingdom, which extended to most of the Marāṭha country, was annexed to the Dihlī Empire. Sulṭān Muḥammad b. Tughluḳ not merely added the dominions of the Kākatīyas of Warangal to his Empire but annexed a large portion of south India as well, making Deogiri his second capital and renaming it Dawlatābād [*q.v.*]. But he could not control his far-flung empire effectively, and in 746/1345 his Deccan nobles, the *amīrān-i ṣadah*, revolted and chose Ismāʿīl Mukh as the first independent Muslim ruler of the Deccan. He was replaced by Ẓafar Khān as king, with the title of ʿĀlāʾ al-Dīn Ḥasan Bahman Shāh in 748/1347, who thus became the founder of the Bahmanī kingdom [see BAHMANIDS]. The Bahmanids spread their Empire over the whole of the Deccan from sea to sea and ruled it first from Aḥsanābād-Gulbarga [see GULBARGA] and then from Muḥammadābād-Bīdar [see BĪDAR]. Towards the end of the 15th and the beginning of the 16th centuries the governors of the Bahmanid provinces became first autonomous and then independent, and the Deccan was finally divided into the five kingdoms of Aḥmadnagar, Bīdjāpūr, Berār, Bīdar and Golkoṇḍā under the Niẓāmshāhī, ʿĀdilshāhī, ʿImādshāhī, Barīdshāhī and Ḳuṭbshāhī dynasties respectively. Berār and Bīdar were soon absorbed into Aḥmadnagar which was itself annexed to the Mughal Empire during the reign of Shāh Djahān in 1042/1633. The turn of the extinction of Bidjapur and Golkoṇḍa did not come till 1097/1686 and 1098/1687 when the Emperor Awrangzīb ʿĀlamgīr annexed these two kingdoms to his vast Empire. But the Mughal authority in the Deccan was undermined by the continuous raids of the Marāṭhas who established a separate kingdom under Shivadjī in 1085/1674 and which forced the Emperor to direct his strategy from Awrangābād where he died in 1119/1707. The next important date in the history of the Deccan is 1136/1724 when Niẓām al-Mulk Āṣaf Djāh [*q.v.*] defeated Mubāriz Khān at Shakarkhēŕa and established his hegemony over the whole of the Deccan. The dynasty of the Āṣafdjāhīs ruled the Deccan first from Awrangābād and then from Ḥaydarābād [*q.v.*] effectively till 1948 when the Ḥaydarābād State was integrated into the Indian Union. The Niẓām, Sir Mīr ʿUthmān ʿAlī Khān, Āṣaf Djāh VII, was appointed *Rādjpramukh* or constitutional head of the state by the President of the Indian Union and acted as such till 1956 when the Ḥaydarābād State was partitioned between Andhra Pradesh, Bombay State and Mysore State more or less according to linguistic affinities.

DAKHANĪ [see URDŪ].

AL-**DĀKHIL** [see ʿABD AL-RAḤMĀN].

DAKHĪL. The dictionaries (*LA*, *TA*, etc.) give a general meaning, "interior, inward, intimate", and two particular derived meanings, (1) guest, to whom protection should be assured, and (2) stranger, passing traveller, person of another race. The first of the particular meanings relates to an institution of nomadic common law which guarantees protection, in traditional ways, to whoever requests it. Although the concept has at all times existed, it has never been incorporated into Islamic law, which has no technical term corresponding to it. In its practical application, the institution combines elements of the complex system of ties of hospitality to which general opinion seems to assimilate the rights of the *dakhīl* and of a very old law of refuge in private households which is attested all over the Semitic world (cf. DJIWĀR). See in particular the detailed analysis by A. Jaussen, *Coutumes des Arabes au pays de Moab*, Paris 1948, 202-20, and Burckhardt's notes on the same subject in *Notes on the Bedouins*, London 1831, i, 329-38; see also Layard, *Narrative of a second expedition to Assyria*, London 1867, ch. VI, 139-62, and Caskel, *apud* Oppenheim, *Die Beduinen*, Leipzig 1939, i, 29.

From this last meaning, several meanings of the word as a technical term in philology, regarded as "late" by the lexicographers, have been derived, notably (1) "a foreign word borrowed by the Arabic language", like *dirham*, and (2) metrical term denoting the consonant preceding the rhyming consonant, the *dakhīl* itself being preceded by an *alif* (cf. ʿARŪḌ). (J. LECERF)

DĀKHLA WA KHĀRDJA [see AL-WĀḤĀT].

DAKHNĪ [see URDŪ].

DAḲĪḲĪ, ABŪ MANṢŪR MUḤAMMAD B. AḤMAD (or Muḥammad b. Muḥammad b. Aḥmad), the poet to whom we owe the oldest known text of the national epic in the Persian language. His place of birth is uncertain (Ṭūs, Bukhārā, Balkh or Samarḳand); he was born between 318 and 329/930 and 940, for he was at least twenty years old when he became panegyrist to the amīrs of Čaghāniyān, then of the Sāmānid amīr Manṣūr b. Nūḥ (350-366/961-976); further, Firdawsī, who continued after him the composition of *The Book of the Kings* (*Shāh-nāma*), assures us that Daḳīḳī was a young man when he began this work, at the behest of the amīr Nūḥ. b. Manṣūr, 366-387/976-997; Daḳīḳī therefore did not die before the time of this prince; and Firdawsī resumed the composition of the *Shāh-nāma* about 370/980, after the murder of his precursor by a slave (a murder provoked by his bad character (*khūy-i bad*) according to Firdawsī).

In the anthologies (*Lubāb al-Albāb*, *Madjmaʿ al-Fusaḥāʾ*, *Tardjumān al-Balāgha* etc.) there are lyrical pieces and fragments which bear witness to Daḳīḳī's precocious skill, his subtle and delicate mind, his easy style. But the work by which he is immortalized is the part of the *Shāh-nāma* (about a thousand lines) incorporated in the poem by his successor, Firdawsī: the reign of the king Goshtāsp, the appearance and the deeds of Zardosht (Zoroaster), and the war against their Chionite enemies.

The Zoroastrian faith of Daḳīḳī seems to assert itself in one of his *rubāʿīs* and in other of his poems, in spite of his Muslim names. Did he remain Zoroastrian at heart? If he had been sincerely attached to Islam, would he, in undertaking the composition of the *Shāh-nāma* on the order of the Sāmānid amīr (a strictly orthodox Muslim), have straightway extolled the rise of Zoroastrianism and the war which it provoked? Howbeit, it is very probable, if not certain, that he chose this episode because he had at his disposal a copy of the *Memorial of Zarīr* (*Ayatkār-i Zarīrān*), a text from the Sāsānid period in Pahlawī verse (as E. Benveniste has shown) from which he drew direct inspiration. It may be that he had also put into verse other episodes from the *Shāh-nāma*, if we take into consideration some of his poems, epic in style and metre, scattered through the anthologies (*tadhkira*).

What remains of Daḳīḳī's lyrical poems shows his remarkable ability to vary his inspiration according to the descriptive, bacchic or amorous styles; quotations from his verse, numerous in the Persian anthologies and dictionaries, give proof of the lasting fame he enjoyed after his too-short career. Indeed his collaboration in the *Shāh-nāma* is as important for its own value as for the light it throws on the sources of the great national poem of Īrān.

Bibliography: Firdawsī, *Book of the Kings* (*Shāh-nāma*), ed. and trans. J. Mohl, 4to edition, iv, 358-730; 12mo edition, iv, 287 ff.; ed. Vullers-Landauer iii, 495-1747; Tehran ed. 1934-35 (pub. Beroukhim), vi; E. Benveniste, *Le Mémorial de Zarēr*, in *JA*, ccxx, (1932), no. 2, 245 ff. Lyrical poems: G. Lazard, *Les premiers poèmes persans*, critical edition, annotated, translation and bio-bibliography (in the press).

(CL. HUART-[H. MASSÉ])

AL-**DAḲḲĀḲ**, ABŪ ʿABD ALLĀH, Moroccan saint born at Sidjilmāsa. He and a certain Abū ʿAbd Allāh Muḥammad b. ʿUmar al-Aṣamm who was assassinated in 542/1147-8 belonged to one of the small circles of Ṣūfīs generally disapproved of by authority. This Abū ʿAbd Allāh had already been imprisoned at Fez at the same time as some of his companions, among whom one was al-Daḳḳaḳ, who on the orders of Tāshufīn b. ʿAlī the Almoravid was afterwards released.

No one knows the date of birth of this saint, nor that of his death. All the same, one can be sure that towards the middle of the 6th/12th century he had become known as a disciple of Ṣūfism at Fez, where his *aḥwāl* had aroused the kindly sympathy of Ibn al-ʿArīf and Ibn Barradjān, both of whom died in 536/1141.

If we may believe al-Tādilī, al-Daḳḳāḳ went to and fro between Sidjilmāsa and Fez. It was in Fez that he met Abū Madyan at a time when the latter, seeking instruction, was studying the *Riʿāya* of al-Muḥāsibī under the direction of Abu 'l-Ḥasan b. Ḥirzihim and the *Sunan* of al-Tirmidhī with Ibn Ghālib. Al-Daḳḳāḳ and a person of the name of Abu 'l-Salāwī initiated him into Ṣūfism (*Tashawwuf*, 319). It is because he was one of the masters of Abū Madyan that al-Daḳḳāḳ has not sunk into obscurity.

He led a life of renunciation, and was, it seems, before all else, a disciple of Ṣūfism rather than a scholar. His manner of claiming sanctity and the satisfaction which he felt when it was acknowledged has something displeasing about it. He died at Fez, most probably, according to A. Bel, at the latest in the last quarter of the 6th/12th century. He is buried in the cemetery of Bāb al-Gīsa.

Bibliography: A. Bel, *Sidi Bou Medyan et son maître Ed-Daqqâq à Fès*, in *Mélanges René Basset*, Paris 1923, i, 31 ff.; al-Tādilī, *Al-Tashawwuf ilā Ridjāl al-taṣawwuf*, ed. A. Faure, Rabat 1958, 135-7. (A. FAURE)

DAḲŪḲĀʾ (or Daḳūḳ), a small town in the Djazīra province of the ʿAbbāsid empire, some 25 miles S.E. of Kirkūk on the Mosul-Baghdād trunk-road, was known to the later Arab geographers and perhaps emerged into urban status, though never eminence, in the 5th/11th century. Some medieval brickwork and a minaret survive. The later and present name (from 9th/15th century, or earlier) was Ṭāwūḳ or Ṭāʾūḳ. The town, on flat ground immediately west of the foothills, stands healthy and well-watered beside the broad Ṭāʾūḳ Chay, a trickle in summer but a formidable flood after winter rains: this now flows into the ʿAẓaim river, and thence to the Tigris, but passed into the great Nahrawān canal when that existed. In modern ʿIrāḳ Ṭāʾūḳ, with some 2,000 Kurdish and Turkish-speaking inhabitants, is today a *nāḥiya* head-quarters, partially modernized, and an agricultural and market centre for the surrounding Kurdish tribesmen (Dāʾūdīyya and Kākaʾī) and Turkoman villagers. The ʿIrāḳ Railways line, and the main road, cross the Ṭāʾūḳ Chay by modern bridges. A well-known shrine of Zayn al-ʿĀbidīn b. Ḥusayn is 1.5 miles distant.

Bibliography: Le Strange, 92, and the Arab authorities there noted. ʿAbd al-Razzāḳ al-Ḥasanī, *al-ʿIrāḳ Ḳadīm^{an} wa Ḥadīth^{an}*; Sidon 1367/1948, 197. Undersigned's own observations.

(S. H. Longrigg)

DĀL, 8th letter of the Arabic alphabet, transcribed *d*; numerical value 4, in accordance with the order of the letters in the Syriac (and Canaanite) alphabet, where *d* is the fourth letter [see abdjad]. It continues a *d* of common Semitic.

Definition: *voiced dental occlusive*; according to the Arab grammatical tradition: *shadīda, madjhūra.* For the *makhradj*: *niṭʿiyya* according to al-Khalīl (al-Zamakhsharī, *Mufaṣṣal*, 2nd ed. J. P. Broch, 191, line 1), who places the point of articulation at the *niṭʿ* (or *niṭaʿ*), the anterior part of the hard palate, 'its striped part' (Ibn Yaʿīsh, 1460, line 19) and so: *prepalatal.* This articulation has left traces in modern dialects (Lebanon, Syria: M. Bravmann, *Materialien*, 69; H. Fleisch, *Zahlé*, in *MUSJ*, xxvii, 78). Another tradition, based on the *Kitāb* of Sībawayh (Paris edition, ii, 453, line 13), which has been much more generally followed, indicates 'the bases of the central incisors', and so: *alveolar.* For the phonological oppositions of the *d* phoneme, see J. Cantineau, *Esquisse*, in *BSL* (No. 126), 99, 12th; for the incompatibles *ibid.*, 134.

Variants: in the mountain dialects of N. Morocco *d* may become *dh* after a vowel; *d* in Classical Arabic and in the modern dialects has numerous conditioned variants (assimilations), see J. Cantineau, *Cours*, 37-8, 41-2.

Bibliography: in the text, and s.v. Ḥurūf al-Hidjāʾ.

(H. Fleisch)

(ii) — Various modifications of *dāl* in languages other than Arabic in which an adaptation of the Arabic script is used may be mentioned here.

In the Indo-Aryan languages there are two series of "d-like" sounds, the dental and the retroflex (also called cerebral, cacuminal, or even, perversely, lingual), the latter produced by the under side of the tongue tip being curled back to strike the hard palate in the post-alveolar position, the concave upper surface of the tongue forming a secondary resonating chamber within the oral cavity. Both sounds may in addition be accompanied by aspiration. In Pashto and Urdū the dental is represented by the unmodified *dāl*, the retroflex (transcribed in the Encyclopaedia by *ḍ*) by *dāl* modified in Pashtō by a small subscript circle (ډ), in Urdū by a small superscript *ṭā* (ڈ; this was originally ڐ). The aspirated varieties of both are now always written with the "butterfly" (*dūčashmī*) *hā*, the "hook" variety of *hā* being reserved for intervocalic *h*, hence the contrast دہی *dahī* 'curds', but دھی *dhī* 'daughter'.

In Sindhī the retroflex *ḍāl* is represented by ڊ, aspirated *dāl* (*dha*) by ڌ, and aspirated *ḍāl* (*ḍha*) by ڍ. Sindhī, in common with other languages of Western India, has in addition a series of implosive consonants (implosive *b*, *dj*, *ḍ* and *g*); the implosive *ḍ* (*ḍa*) is represented by ڏ.

Turner, *Cerebralization in Sindhi* in *JRAS*, 1924, 555-84; idem, *The Sindhī recursives ...*, *BSOS*, iii/2, (1924), 301-15; Mohiuddin Qadri, *Hindustani Phonetics*, Paris n.d. (1931?); also the articles pashtō, sindhī, urdū.

(J. Burton-Page)

DALĪL (Gr. σημεῖον) is an ambiguous term; it can mean sign or indication, every proof through the inference of a cause from its effect or the inference of the universal from the particular in opposition to the proof from a strictly deductive syllogism in which the particular is deduced from the universal; and finally it is used as synonymous with proof, ἀπόδειξις, *burhān* generally.

Aristotle treats the "proof from a sign" in the last chapter of his *Analytica Priora.* According to him "proof from a sign" is an enthymeme, *i.e.*, a syllogism in which one premiss is suppressed (ἐνθύμημα, *ḳiyās iḍmārī* or *ḳiyās idjāzī*) in which from a fact another fact, anterior or posterior in time, is inferred (although Aristotle says "anterior or posterior", the example he gives infers an anterior fact and for the Arab philosophers the inference is always the inference of a cause from its effect). He gives as an example that from a woman having milk it is inferred that she has conceived. He states that this enthymeme can be fully expressed in the following way: all women who have milk have conceived, this woman has conceived, therefore she has milk. This would seem to imply that for this type of reasoning the enthymeme is not a necessary condition and that the conclusion provides absolute evidence, although a "sign", according to Aristotle, is always an accident and there is no necessary proof for the accidental. We find in Avicenna the same definition and the same example (*Nadjāt*, p. 92) and he adds that *dalīl* can mean both the middle term of the syllogism (in this case "having milk") and the enthymeme itself.

This type of reasoning is the only one for which Aristotle reserves the name of "proof from a sign". The Arab philosophers, however, give the term a wider meaning, based on the distinction made by Aristotle in his *Analytica Posteriora* between the proof that a thing is, τὸ ὅτι, *burhān anna* and the proof why a thing is, the proof of its cause or reason, τὸ διότι, *burhān lima.* The proof *why* a thing is is preceded by the proof *that* a thing is, for one can ask only why a thing is, when one knows that it is. The proof that a thing is starts from the particular, the fact, the effect perceived, and infers the cause from its effect, and it is for this reason that the Arab philosophers call it a *dalīl*; on the other hand the

proof why a thing is starts from the universal, the cause, and deduces the particular effect from its cause. The distinction is confused through the ambiguity of the term "cause" which in Aristotelian philosophy can mean both the logical reason of a thing's being such and such, its formal cause, *e.g.*, the reason that Socrates is mortal is that he is a man, and the ontological cause of a thing's becoming, *e.g.*, this fire is the cause of the burning of this wood. I cannot discuss this here *in extenso*, but will give only Avicenna's examples from his *Nadjāt* (103, 105) which show clearly the confusion between the logical and the ontological, so usual in Aristotle. As an example of the ***burhān lima*** he gives: a great heat has changed this wood, everything a great heat has changed is burnt, therefore this wood is burnt; and as an example of the ***burhān anna***: this wood is burnt, therefore a great heat has burned it. According to Avicenna the difference between the two syllogisms is that in the former the middle term (*i.e.*, a great heat) is both the cause (*i.e.*, the logical reason) of our conviction of the truth of the conclusion and the cause (*i.e.*, the ontological cause) of the major term (*i.e.*, the being burnt) in reality, whereas the latter gives us only the subjective conviction of the truth of the conclusion. That is to say in the ***burhān anna*** we can, purely logically, infer from the particular effect its formal cause, for being burnt implies the act of burning, and since being burnt is but the actualisation of the potentiality of heat, heat and the fact of being burnt are practically identical; in the ***burhān lima*** the ontological cause and the logical reason are identified.

The Arab philosophers hold also with Aristotle (*Anal. Prior.*, ii, 23) that through a syllogism based on a perfect induction of particular facts, that is the enumeration of all the particular cases, we can arrive at a universal proposition (cf. *e.g.*, Avicenna, *De demonstratione* [from his *Shifā'*], 31-2).

There is still another type of reasoning mentioned by Aristotle (*Anal. Prior.*, ii, 24) in which from a particular case a general principle may be inferred, reasoning by example, παράδειγμα, *mathal*. Avicenna gives in his *Nadjāt*, 90-91, as an example an argument of the theologians: the world is produced in time, because it is composed of parts, therefore it is like a building; now the building is produced in time, therefore the world is produced in time.

Aristotle had neglected in his logic the hypothetical and disjunctive syllogisms which were studied in his school by Theophrastus and Eudemus, but the Stoics for whom all argument is based on the inference of an event from another event, on the inference of the posterior from the anterior (or the reverse in prognostics), on the inference of a particular cause from a particular effect, that is on the inference from signs or symptoms, σημεῖα, a concept which becomes one of the most important elements of their logic, are chiefly concerned with the study of the hypothetical and disjunctive syllogisms and, indeed, inferences from actual events which imply a time-element, find an easier expression in a hypothetical than in a categorical syllogism. The example of σημεῖον given by Aristotle, becomes in Stoic logic a stock example in their syllogism: if this woman has milk, she has conceived, now she has milk, therefore she has conceived, and Avicenna in his *Ishārāt*, 84-5, gives an example of the difference between ***burhān lima*** and the ***burhān anna*** in a hypothetical form. Reasoning by example, regarded by Aristotle as a categorical syllogism, or as the Stoics call it reasoning by analogy (*ḳiyās*), takes in their logic a hypothetical form and becomes one of their principal arguments, since according to them all knowledge transcending the evidence of the senses proceeds by way of analogical inference. The analogical syllogism was the first one the Arabs became acquainted with (it may well be that because of this the term *ḳiyās* becomes later the general name for syllogism, just as the term ***dalīl*** becomes the general term for proof), the Muʿtazila, the rationalistic theologians in Islam, called by their adversaries *ahl al-ḳiyās*, used analogical reasoning for their interpretation of the Ḳur'ān and as a basis for criticizing traditions, and Shāfiʿī was aware that *ḳiyās* is based on signs, *dalā'il* and examples, *mithāl* (cf. J. Schacht, *The Origins of Muhammadan Jurisprudence*, London 1950, 124 and 128). Ghazzālī in his logical works emphasizes the importance of the hypothetical syllogism in all juridical matters and the Ashʿarīs, nominalists like the Stoics and who with them deny the existence of Aristotle's forms and formal causes, base their arguments on analogical reasoning or as Averroës says (*Tahāfut al-Tahāfut*, Bouyges, p. 522) on what they call "sign".

(S. van den Bergh)

DALLĀL (ar.) "broker", "agent". *Dallāl*, literally "guide"; is the popular Arabic word for *simsār*, *sensal*. In the *Tādj al-ʿArūs* we find, on the word *simsār*: "This is the man known as a *dallāl*; he shows the purchaser where to find the goods he requires, and the seller how to exact his price". Very little is known from the Arabic sources about the origins of these brokers, who have been of such great importance in economic affairs. The *dallāl* corresponded to the Byzantine μεδίτης. In the absence of any systematic earlier studies, only certain items of information collected at random can be given here. Law-books warn the *dallāls* of the need to be on their guard against the dishonest tricks customary in commerce (Ibn al-Ḥādjdj, *Kitāb al-Madkhal*, iii, 75). In fact the *dallāls* frequently recommended to purchasers goods which they knew to be inferior and always took sides with the seller against his customer. Their profession which, at times, was invested with an official character, was known as *dilāla*. The word al-dallāl occurs in early times as a surname (*Tādj al-ʿArūs*). Under the Fāṭimids, certain articles could only be sold through the intermediary of *dallāls* (al-Muḳaddasī, 213_8). In the time of the Mamlūks, the 2% commission which from the earliest days had been paid to these brokers was made subject to a charge, as a result of which the *dallāl* had to give up half his profits in taxes: the loss, naturally enough, he speedily passed on to his clients. This operation was known as *niṣf al-samsara* (Maḳrīzī, *Khiṭaṭ*, i, 89_5). A somewhat similar custom was to be found in northern Syria (cf. Sobernheim in the *Corpus Inscriptionum Arabicarum*, ii, no 55 and the account given by C. H. Becker in *Isl.* i, 100). The principal transactions were concluded in the maritime customs offices. There the *dallāls* acted at the same time as interpreters when any deailngs with the Franks were required. Commercial treaties fixed precisely what fees were due to these agents and interpreters (Amari, *Diplomi Arabi*, 106, 203). Heyd, *Levantehandel*, i, gives a wide range of details about this kind of transaction. For the Western Mediterranean one should consult de Mas Latrie, *Traités de paix et de commerce*, Paris 1866, 189. Later it was the West which monopolized

questions of brokerage (cf. Schaube, *Handelsgeschichte der romanischen Völker des Mittelmeergebietes*, 761).

It was, however, not only for their transactions with foreigners, but also for business matters amongst themselves, that the Eastern peoples made use of the *dallāl*s (see, for example, the notes on Ottoman brokerage dues in B. Lewis, *Studies in the Ottoman Archives, I, BSOAS*, xvi, 1954, 495 ff.). Furthermore, the latter also acted as independent traders, selling, for example, old clothes on their own account (*Description de l'Égypte, État moderne*, xviii/II, 321). The name *dallāl* was also applied to the hawker auctioning goods in the secondhand clothing market and, still more frequently, to the small intermediary and agent. The way of life of these agents has been well described by Lane, *Manners and Customs of the modern Egyptians*[5], ii, 13. Women are also found taking the part of agents. Known as *dallāla*, they act as intermediaries for harems of a superior sort (Lane, *op. cit.* I, 200, 239, 242). For other meanings of the word *dallāl* cf. Dozy, *Supplément*, s.v.

(C. H. Becker*)

II. — In the Muslim West, the *dallāl* is exclusively an intermediary who, in return for remuneration, sells by public auction objects entrusted to him by third parties. In the large towns the *dallāl*s are grouped in specialized guilds, supervised by a syndic (*amīn*) who compels them to give a guarantee of good faith (*ḍāmin*). They chiefly concerned themselves with manufactured goods sold by artisans to the shopkeepers: slippers, locally woven fabrics, carpets, jewellery etc.; industrial raw materials such as hides (green or tanned), wool (untreated or yarn); commodities sold in bulk, such as oil, butter, honey, local soap, henna, eggs, fruit and vegetables; livestock, animals for both riding and baggage; furniture, books and old clothes. Before the French Protectorate was established in Morocco they were also engaged in the sale of slaves of both sexes.

The word has passed into Persian and Turkish (*tellāl*) and, from the latter, into various Balkan languages (modern Greek *tellâles*). Besides *dallāl* (*dellīl* in Granada), Spanish Arabic used *sawwāḳ*.

In the Muslim West today *dallāl* is quite distinct from *barrāḥ* "town crier" and from *simsār* [*q.v.*] "broker, business agent".

In the large towns the feminine *dallāla* denotes a "dealer in women's clothes" who frequents the houses of the rich, offering the women fabrics, clothes and jewellery.

Bibliography: Le Tourneau, *Fès avant le protectorat*, 1949, 306-14; Kampffmeyer, *Texte aus Fes*, 13; idem, *Weitere Texte aus Fes und Tanger*, 71. (G. S. Colin)

DALTĀWA, the headquarter town of the *Ḳaḍā* of Khāliṣ in the *liwā* of Diyālā, central ʿIrāḳ (44° 30′ E, 33° 50′ N). The population of the town —all settled ʿIrāḳī Arabs, with Shīʿī predominance over Sunnī—was some 10,000 in 1367/1947, and that of the *ḳaḍā* 70,000; the two dependent *nāḥiyas* are those of Khān Banī Saʿd and Manṣūriyya (formerly Dalī ʿAbbās). The name Daltāwa is said by ʿIrāḳī scholars to be a corruption of an original Dawlatābād.

Surrounded by date-gardens, the town is watered from the Khāliṣ canal, an important offtake from the Diyālā, right bank. Though still largely old fashioned, and never very healthy, the town now contains a number of new streets and buildings, especially Government offices and institutions; modern services and communications have been greatly developed during the last 30 years. Though nowhere mentioned in mediaeval writers, because then of little importance, the town is certainly of some antiquity, and was watered from the Nahrawān-Diyālā canal system.

(S. H. Longrigg)

al-**DALW** [see Nudjūm].

DĀM [see sikka].

DĀMĀD, a Persian word meaning son-in-law, used as a title by sons-in-law of the Ottoman Sultans. Under the early Sultans, princesses (*sulṭān*) of the reigning house were occasionally given in marriage to the vassal princes of Asia Minor, for example, to the Ḳaramānoghlu, and even to the vezirs and generals of the sovereign; the case of the saint Amīr Sulṭān of Bursa, who married a daughter of Bāyazīd I is, however, unique not only for that but also for later periods. We afterwards find Grand Vezirs, Kapudan Pashas, Aghas of Janissaries, Bostāndjībashīs and other high officials as sons-in-law of the Sulṭān; the best known are Ibrāhīm Pasha, the favourite of Sulaymān I, Rustem Pasha (husband of Mihrimāh), Sokollu Meḥemmed Pasha (husband of Asmākhān), Ibrāhīm Pasha (son-in-law of Meḥemmed III), Ibrāhīm Pasha under Aḥmed III etc. (cf. Hammer, *GOR*, index, s.v. *Sulṭānin*). The title *dāmād* was applied to some of them both by their contemporaries and in historical writings and remained current to the end of the empire (*e.g.*, Dāmād Maḥmūd Pasha, Dāmād Ferīd Pasha [*q.v.*] etc.).

The marriage ceremonies were celebrated with great splendour and are minutely described in the Ottoman chronicles as well as by western travellers (cf. Hammer, *GOR*, index s.v. *Hochzeit und Vermählung*); the dowry had been fixed by Sulaymān I at 100,000 ducats and the appanage (*Khāṣṣ*) brought in 1000-1500 aspers daily. (Venetian *Relazione* of 1608, in Barozzi-Berchet, 72; Hammer, viii, 211); in addition a large palace was usually bestowed on the princesses. Till the time of Sulaymān I the Dāmāds were usually sent into the provinces as governors to prevent them having any personal influence on the affairs of the Sublime Porte, (Kočibey, ed. of 1303, 94, 97). Etiquette compelled the Dāmād to put away the wives he already had and to take no further wives (cf. the Venetian *Relazione* already quoted, 103 ff. and Hammer, iv, 103); he became the slave of his wife and this relationship finds expression in the form of address used between the spouses (cf. the above reports, 72, 104; de la Mottraye, *Voyages*, 338 ff.; Hammer, *Staatsverfassung*, i, 476-84 = *GOR*, viii, 211-13; C. White, *Three Years in Constantinople*, iii, 180 ff.). The statement that sons born of such marriages were done away with at birth (Eton, *Survey of the Turkish Empire*[3], 101; Hammer, *GOR*, iv, 463), may be disproved (cf. Djewdet, vi, 196 ff., *Relazioni* loc. cit., 181, 372); only in earlier times they were debarred from all public offices (*Relazioni* 181).

Bibl. in addition to that given in the article: Ismail Hakkı Uzunçarsılı, *Osmanlı Devletinin Saray Teşkilâtı*, Ankara 1945; A. D. Alderson, *The Structure of the Ottoman Dynasty*, Oxford 1956, 97-8. On the use of the title *Küregen* by the sons-in-law of Mongol rulers see Djuwayni-Boyle, 174 n. 11; Mostaert and Cleaves, *Trois Documents Mongols*, *HJAS*, 1852, 474; and article Gūrkhān.

(J. H. Mordtmann*)

al-**DĀMĀD**, "son-in-law", an honorific title given to Mīr Muḥammad Bāḳir b. Shams al-Dīn Muḥammad al-Ḥusaynī al-Astarābādī, called also *al-Muʿallim al-Thālith*, the "third teacher" in philo-

sophy after al-Fārābī. This title properly belongs to his father who was the son-in-law of the famous Shīʿī theologian ʿAlī b. al-Ḥusayn b. ʿAbd al-ʿĀlī al-Karakī, called *al-Muḥaḳḳiḳ al-Thānī* (Brockelmann, S II, 574), but it was extended to the son, who is more correctly called Dāmādī or Ibn al-Dāmād. Born at Astarābād, Mīr-i Dāmād spent his childhood at Ṭūs from where he went to Iṣpahān, most probably for preliminary studies. Educated at Mashhad, among his teachers are counted his maternal uncle, al-Shaykh ʿAbd al-ʿĀlī b. ʿAlī (the *mudjtahid*), and al-Shaykh ʿIzz al-Dīn Ḥusayn b. ʿAbd al-Ṣamad al-ʿĀmilī.

A noted divine, he is, however, chiefly esteemed for his attainments as a scholastic theologian (*mutakallim*), and two of his numerous works, *al-Ufuḳ al-Mubīn* (also called by the author, at four places in the text, *al-Ṣirāt al-Mustaḳīm*) and *al-Sabʿ al-Shidād*, are still prescribed, in spite of their being the writings of a Shīʿī *mudjtahid*, in the religious institutions of India and Pakistan, run and managed exclusively by the Sunnīs, as courses of logical studies. For a long period of 36 years, from 984 to 1025 (1576-1616), he remained actively engaged in philosophical and scholastic discussions and religious polemics.

Mīr-i Dāmād was also a poet of no mean order and composed verses under the pen-name of *Ishrāḳ*. Specimens of his poetry are given in the *Madjmaʿ al-Fuṣaḥāʾ*, the *Riyāḍ al-ʿĀrifīn* and the *Ātash-Kada* (see Bibliography). Muḥammad Ḥasan "Zulālī" al-Khwānsārī (d. 1024/1615), the well-known author of the imaginative *mathnawī* "*Maḥmūd u-Ayāz*", was a great admirer of Mīr-i Dāmād.

The *Taʾrīkh-i ʿĀlam Ārā-yi ʿAbbāsī*, written in 1025/1616, fifteen years before the death of Mīr-i Dāmād in 1040/1630, describes him as skilled in most of the sciences, especially philosophy, philology, mathematics, medicine, jurisprudence, exegesis and tradition. It further mentions about a dozen of the works of Mīr-i Dāmād which shows that long before 1025/1616, his fame as a writer and author of distinction had been established.

Held in great esteem, rather awe, by Shāh ʿAbbās Ṣafawī I (996-1039/1587-1629), at whose Court he wielded great influence, and his successor Shāh Ṣafī I, Mīr Bāḳir rose morally also above most of his contemporaries who were engaged in the ignoble pursuits of "petty jealousy and mutual disparagement" (cf. John Malcolm, *History of Persia*, London 1815, i, 258-9). Among the notable pupils of Mīr-i Dāmād was Mullā Ṣadrā-i Shīrāzī [*q.v.*], the celebrated philosopher, accounted as the greatest in modern times in Iran.

Mīr Bāḳir died between al-Nadjaf and Karbalāʾ, during a visit to the holy places in ʿIrāḳ, in 1040/1630 and was buried in al-Nadjaf.

He was a prolific writer; a full list of his Arabic works is given by Brockelmann (S II, 579). Chief of these are: *al-Ufuḳ al-Mubīn* which has been the subject of numerous commentaries. Mawlawī Faḍl-i Ḥaḳḳ of Khayrābād, a famous theologian and *mutakallim* of India, was very fond of teaching this book. Baḥr al-ʿUlūm [*q.v.*] has written *taʿlīḳāt* (glosses) on it. *Al-Ṣirāt al-Mustaḳīm* and *al-Ḥabl al-Matīn*, are also on logic. Concerning the former a Persian poet says: "May the Muslim never hear nor the *kāfir* ever see the *Ṣirāt al-Mustaḳīm* of Mīr-i Dāmād".

His other notable works are: *al-Ḳabasāt* (composed in 1034/1624) on the *ḥudūth* (Creation) of the Universe and the Eternity of God, etc.; *Shāriʿ al-Nadjāt* (in Persian), on the principles of religion and jurisprudence, comprising an introduction, five books and a conclusion; *Sidrat al-Muntahā*, a commentary of the Ḳurʾān; *al-Djidhawāt*, (in Persian), a treatise on the mystic meanings of the detached letters (*ḥurūf muḳaṭṭaʿāt*) in the Ḳurʾān and also containing a discussion as to why the body of Moses, composed of organic matter, survived the divine *tadjallī* while Mount Sinai was (according to tradition) reduced to ashes. This work, specially composed for Shāh ʿAbbās Ṣafawī, is divided into 12 preliminary chapters and a large number of sections, each termed *djidhwa*; *Taḳwīm al-Īmān* or *al-Taḳwīm fi 'l-Kalām*, on the philosophy of *īmān*; and *al-Taḳdīsāt*, on the divine dispensation. He has also left two separate *dīwāns*, in Arabic and Persian.

(A. S. Bazmee Ansari)

DĀMĀD FERĪD PASHA, one of the last Grand Vezirs of the Ottoman Empire. Meḥmed Ferīd, son of Ḥasan ʿIzzet, a member of the Council of State (Shūrā-yi Dewlet), was born in Istanbul in 1853, served in minor diplomatic posts, and, upon his marriage (1886) to ʿAbd al-Ḥamīd II's sister Medīḥa, was made member of the Council of State and senator, and given the rank of Pasha. In 1911 he became co-founder and chairman of the Ḥürriyet we Iʾtilāf Firḳasi [*q.v.*]. After the Ottoman defeat he served his brother-in-law Meḥmed VI as Grand Vezir (4 March to 2 October 1919 and 5 April to 21 October 1920). His policy of accommodation to the victor powers in hopes of winning lenient peace terms proved as futile as his attempts to suppress the national resistance movement in Anatolia under Kemal [Atatürk]. Nationalist pressure forced his resignation in October 1919. Restored to office after

the reinforced Allied occupation of Istanbul, his government was responsible for issuing the well-known anti-nationalist *fetwās* (signed by the *shaykh al-Islām* Dürrizāde ʿAbd Allāh [*q.v.*]) and dispatched troops against the nationalists in Anatolia. On 10 August 1920 his cabinet signed the peace treaty of Sèvres, but the growing strength of the nationalists soon caused his final dismissal. In September 1922 he left Istanbul for Nice, where he died on 6 October 1923.

(D. A. Rustow)

ḌAMĀN (A.), in Islamic law, the civil liability in the widest meaning of the term, whether it arises from the non-performance of a contract or from tort or negligence (*taʿaddī*, literally "transgression"). Prominent particular cases are the liability for the loss of an object sold before the buyer has taken possession (*ḍamān al-mabīʿ*), for eviction (*ḍamān al-darak*), for the loss of a pledge in the possession of the pledgee (*ḍamān al-rahn*), for the loss of an object that has been taken by usurpation (*ḍamān al-ghaṣb*), and for loss or damage caused by artisans (*ḍamān al-adjīr*, *ḍ. al-ṣunnāʿ*). The depositary and other persons in a position of trust (*amīn*, [*q.v.*]) are not liable for accidental loss but they lose this privileged position through unlawful acts, *e.g.*, using the deposit, whether the loss is caused by the unlawful act or not. Questions of *ḍamān* are treated sporadically in numerous sections of the works on *fiḳh*, and it forms the subject of a number of special treatises.

Ḍamān in the sense of suretyship, guarantee, is a liability specially created by contract; it is synonymous with *kafāla* [*q.v.*]. In a wider sense, *ḍamān* is used of the risk or responsibility that one bears with regard to property of which one enjoys the profit, as in the old legal maxim, which was put into the form of a *ḥadīth* attributed to the Prophet, *al-kharādj bi 'l-ḍamān* ("profit follows responsibility").

(Ed.)

ḌAMĀN, in the financial sense, 'farming' (of taxes). See BAYT AL-MĀL.

DAMANHŪR, a name derived from the ancient Egyptian Timinhur, the city of Horus. It is not surprising that a number of cities of this name are to be found, almost all in the Nile Delta.

I. Damanhūr al-Shahid, Damanhūr "of the Martyr", one of the northern suburbs of Cairo. This was the name still used by Yāḳūt, but the village was later known as Damanhūr Shubrā, a name which was however already known to al-Muḳaddasī. Ibn Mammātī calls it simply Damanhūr. The two names are sometimes inverted and certain authors speak of Shubrā Damanhūr or even Shubra 'l-Shahīd. This kind of phenomenon is frequent enough in Egypt, especially when it is necessary to distinguish one place from others of the same name. Shubrā is also called Shubra 'l-Khayma or Shubra 'l-Khiyām, Shubrā "of the tents".

There was once a Christian reliquary in this place containing the bones of a martyr. On 8th Bashans (3rd May) each year, the town celebrated a holiday while the people accompanied this casket in procession to the Nile, into which it was plunged in the hope of promoting the success of the river's annual flood. There was no doubt excessive drinking on this day and the feast was forbidden in 702/1302. It was re-established in 738/1338 but was definitely suppressed in 755/1354 and the relic burnt.

Cairo, viii, 202-3; Ibn Djīʿān, 7; Quatremère, *Mémoires sur l'Égypte*, i, 360; Amelineau, *Géographie de l'Égypte*, 113-5 (to be consulted with caution); J. Maspero and G. Wiet, *Matériaux*, 108-110, 217.

II. Damanhūr, capital of the province of Buḥayra, the ancient Hermopolis Parva of the Byzantine era. Since the name is ancient it can hardly be called an Islamic creation, but nothing is heard of it in the chronicles until the time of the Arab conquest. The important locality is Ḳarṭasa, the only name known to the ancient authors, who mention it as the capital of a pagarchy (*kūra*).

The oldest reference is to be found in Ibn Mammātī, who calls it Damanhūr al-Waḥsh. Ibn Djubayr and Yāḳūt passed through it. To them it was an urban centre of medium size surrounded by a wall. Ibn Mammātī mentions a canal named after the city, the Bahr Damanhūr. The sultan Barḳūḳ restored its fortifications, in order better to resist the incursions of the Bedouin; furthermore the town had suffered greatly in the earthquake of 702/1302. Damanhūr increased in importance and according to Ibn Duḳmāḳ, it possessed a Friday mosque, schools, caravanserais and covered markets. It was, then, not only the capital of the province of Buḥayra, but also the residence of a senior Mamlūk officer commanding the whole of the Delta. The post road, skirting the desert from Cairo to Alexandria, had a stage post there and there was also a carrier pigeoncote.

According to Sonnini the town was "large but

badly built, almost all the houses being made either of mud or of bad quality brick. It is the centre of the trade in cotton, which is gathered in the vast and beautiful plains surrounding it".

On 30th April, 1799, a French company was massacred there by the troops of Mahdī Aḥmad; the reprisals were terrible.

Damanhūr is now a heavily populated town. The railway between Cairo and Alexandria has a station there, and it is the centre of a network of secondary railway routes.

DAMASCUS [see DIMASHḲ].

DAMĀWAND, the highest point in the mountains on the borders of Northern Persia (cf. ALBURZ), somewhat below 36° N. Lat. and about 50 miles north-east of Tehran. According to de Morgan it rises out of the plateau of Rēhne to a height of 13,000 feet above it. The various estimates of its height differ: Thomson estimates it at 21,000 feet (certainly too high), de Morgan at 20,260 feet, Houtum Schindler at 19,646, Sven Hedin at 18,187, and in the last edition of Stieler's *Handatlas* (1910) it is given as 18,830 feet. Its summit, perpetually snow-clad and almost always enveloped in clouds, is visible several days' journey away, as Yāḳūt tells us from his own experience. In fine weather and favourable light it may be seen, according to Melgunof, from the Caspian sea, a distance of over 260 versts (162 miles). Ḳazwīnī's statements on this point are exaggerated, but it is certain that the Damāwand massif commands the whole coastlands of Māzandarān (the mediaeval Ṭabaristān).

Geologically Damāwand is of recent origin, as is clear from its volcanic nature which is apparent in several features. There are as many as 70 craters on this mountain mass; from one of them, which is covered with thick deposits of sulphur, rises the conical peak. There are also many sulphur springs on it; Ḳazwīnī mentions "the springs of Damāwand from which smoke arises by day and fire by night". Damāwand is the centre of the earthquake zone which stretches throughout Māzandārān. It is clear from the earlier accounts of Arab travellers that the internal activity of the central volcano had not then quite ceased as it has now.

Damāwand is rich in minerals, particularly anthracite. Sulphur is found in immense quantities; the finest quality, the best in Persia according to Polak, *Persien*, Leipzig 1865, ii, 178, is found just below the summit of the mountain, where it is collected in the summer months by the people of Ask and Damāwand and sold by them. Around the foot of Damāwand rise numerous mineral springs, of which two in particular—one in the little town of Ask, the other somewhat further north on the Herāz (Herhaz)—enjoy a great reputation as baths. The majority deposit considerable sediment; for example Ask is built on such alluvium (Polak, *op. cit.*, ii, 229). The apricots grown in the valleys of Damāwand are highly esteemed in Persia. (Polak, *op. cit.*, ii, 146).

Like the other giants of Eastern Asia, such as Ararat, Damāwand was long regarded as inaccessible; this opinion, which was widely held, is found repeatedly in the Arab geographers, although one successful ascent is mentioned (see ʿAlī b. Razīn's statement in Ḳazwīnī, 159). Oliver (1798) was the first European traveller to visit the mountain, without however being able to reach the summit. The first complete climb was by W. Taylor Thomson in 1837; he was followed in 1843 by the botanist Th. Kotschy and in 1852 by the Austrian engineer Czarnotta. H. Brugsch and Baron Minutoli seem also to have reached the summit in 1860; (see Petermann's *Geographische Mitteilungen*, 1861, 437). In more recent years a number of further successful ascents have been undertaken by Napier and others, usually from Ask; cf. particularly Sven Hedin, *Der Demäwend* in *Verh. der Gesellsch. f. Erdkunde*, Berlin, xix, 304-22.

In the ancient history of Persia Damāwand is the scene of the legendary history of the Pēshdād and Kayān rulers. Even at the present day the people of Māzandarān point out the different places which were the scenes of the wonderful deeds of Djamshīd, Farīdūn, Sām, Zāl, Rustam and other heroes immortalized in the *Shāhnāma*. Damāwand is also the abode of the fabulous bird Sīmurgh. From ancient times the prison of the cruel king Ḍaḥḥāḳ (O. Iran. Dahāka, also Bēwarasp) has been located here. Farīdūn (O. Iran. Θraētaona) is traditionally said to have shut him up in a cavern on the summit of this mountain, and here, in the belief of the local populace, the imprisoned tyrant lives to this day; the dull sounds which are periodically heard inside the mountain are thought to be his groans, and the vapour and smoke which escape from fissures and springs on the mountain-face are his breath. Obviously the volcanic properties of Damāwand have been responsible for these legends. According to another story the demon Ṣakhr, imprisoned by Solomon, is also locked in Damāwand. As the highest mountain in Persia, Damāwand is thought by the Persians to be that on which Noah's Ark rested. On the wealth of Damāwand legends cf. Yāḳūt, ii, 606, 610; Ḳazwīnī; Melgunof, 22 ff.; Grünbaum in *ZDMG*, xxxi, 238-9.

Formerly on the slopes and in the valleys of Damāwand there were many fortified places. Nowadays the most important place is the small town called Damāwand after the mountain and situated on its south-western spurs (according to de Morgan, 6425 feet above sea level). It is said to be very ancient, and according to Mustawfī was formerly called Pishyān. The beautiful valley of Damāwand, watered by two rivers and including ten villages as well as the town of Damāwand, no longer belongs to Māzandarān but to ʿIrāḳ ʿAdjamī. Because of its elevated situation the climate is very pleasant; for this reason the Shāhs of Persia used to delight in spending the summer in its valleys. The ultra-Shīʿī sect of the ʿAlī Ilāhī

[*q.v.*] has a large number of adherents among the inhabitants of this region.

The name of Damāwand appears in Persian and Arabic sources in a number of different forms: Persian Danbāwand (Vullers, Lex. Persico-Lat., i, 907b), Damāwand (ibid., 902b), Dēmāwand (ibid., 955b) and Dēmawand (ibid., 956b); Ar. Dunbāwand, Dubāwand, Dumāwand. The oldest form of the name appears to be Dunbāwand, while the usual modern one is Damāwand (Demāwend). On the different ways of writing the name, see Quatremère, *Hist. des Mongols,* 200 ff.; Fleischer's ed. of Abu 'l-Fidā', *Histor. Anteislamica,* Lips. 1831, 213 ff., 232; H. Hübschmann, *Armenische Grammatik,* Leipzig 1897, 17.

DĀMG̲H̲ĀN a town on the main highway between Tehran and Mas̲h̲had, some 344 km. east of Tehran; also, a station on the railway between Tehran and Mas̲h̲had. At an altitude of 1115 metres, it has a population of 9,900 (1950). One km. to the south of the town is the mound called Tappa Ḥiṣār where excavations conducted by the University of Pennsylvania in 1931 uncovered prehistoric burials and the plaster-decorated remains of a building of the Sāsānid period. The oldest Islamic structure—possibly the earliest surviving mosque in Īrān—is the Tārī K̲h̲āna, believed to date from the 3rd/9th century. Attached to this mosque is a minaret of the 5th/11th century. Several tomb towers of the Saldj̲ūḳ period survive: the Pīr ʿAlamdār dated 417/1026, the Čihil Duk̲h̲tarān dated 446/1054, and the Imām-zāda Dj̲aʿfar. The minaret of the Masdj̲id-i Dj̲āmiʿ is dated 500/1106.

DAMIETTA [see dimyāṭ].

ḌAMĪR [see naḥw].

al-**DAMĪRĪ**, Muḥammad b. Mūsā b. ʿĪsā Kamāl al-Dīn, was born in Cairo about the beginning of the year 742/1341 (according to a note in his own handwriting quoted by al-Sak̲h̲āwī, 59) and died there in 808/1405. Later dates of his birth, as given in some sources (745/1344 or 750/1349), would hardly be consistent with certain details of his biography. His *nisba* is derived from the northernmost of the two townlets both called Damīra near Samannūd in the Delta.

After first gaining his livelihood as a tailor in his native town he decided to become a professional theologian, choosing as his main teacher the famous S̲h̲āfiʿī scholar Bahāʾ al-Dīn al-Subkī [*q.v.*], with whom he became closely associated for years. He also studied under Dj̲amāl al-Dīn al-Asnawī (Brockelmann I, 110, S II, 107), Ibn al-ʿAḳīl, the renowned commentator of Ibn Mālik's *Alfiyya* (Brockelmann II, 108, S II, 104), Burhān al-Dīn al-Ḳīrāṭī (Brockelmann II, 15, S II, 7) and others. His biographers point out his great competence in Muslim jurisprudence, *ḥadīt̲h̲* science, Ḳurʾānic exegesis, Arabic philology and *belles lettres.* His younger contemporary, al-Maḳrīzī [*q.v.*], in his *ʿUḳūd,* speaks of him with love and admiration.

Having been authorized to teach the usual branches of Muslim education and to give *fatwās,* al-Damīrī took up suitable posts in several places of learning and devotion (al-Azhar, the Dj̲āmiʿ of al-Ẓāhir, the *madrasa* of Ibn al-Baḳarī, the Ḳubba of Baybars II, etc.), where he held lectures and delivered sermons and exhortations, apportioning his time in turn to the different institutions. A member of the Ṣūfī community established in the K̲h̲ānḳāh Ṣalāḥiyya (previously known as Dār Saʿīd al-Suʿadāʾ; cf. ʿAlī Mubārak, iv, 102, Maḳrīzī, *K̲h̲iṭaṭ,* Būlāḳ 1270, ii, 415), he was celebrated for his ascetic life and credited with performing miracles. Although as a youth inclined to gluttony, he later made it a habit to fast almost continually, indulged in prayers and vigils and performed the pilgrimage six times between the years 762-799/1361-97. During his stay in Mecca and Medina he completed his education with several local scholars, held lectures and gave *fatwās* and married twice. After his last pilgrimage he stayed in Cairo until his death. He was buried in the Ṣūfī graveyard beside the Dj̲āmiʿ of Saʿīd al-Suʿadāʾ (cf. ʿAlī Mubārak, iv, 102 ff.).

Al-Damīrī's fame as an author rests on his *Ḥayāt al-Ḥayawān,* a para-zoological encyclopaedia, through which he became known both in the east and the west. He wrote it, as stated in the preface, not because of a natural disposition for such an undertaking, but in order to correct false notions about animals which were entertained even by the learned of his time. The work, completed in draft in 773/1371-2, is not only a compendium of Arabic zoology but also a store house of Muslim folklore, described in part in the researches of J. de Somogyi. The author did not restrict himself to the purely zoological aspect of his subject matter but also treated, often at great length, all that pertains to the animals mentioned in any way whatsoever. In addition, he made frequent digressions into other fields, the most remarkable of which is a survey of the history of the Caliphs (s.v. *iwazz*), which occupies about the thirteenth part of the whole work.

The articles, arranged alphabetically according to the first letters—not the radicals—of the anima names, generally contain discussions of the following items: 1) philological aspects of the animal's name;

2) description of the animal and its habits; 3) mention of the animal in the *ḥadīth*-literature; 4) its lawfulness as human food according to the different *madhāhib*; 5) proverbs bearing upon it; 6) medicinal and other properties (*khawāṣṣ*) of its different parts; 7) its meaning when occurring in dreams. The work contains 1069 articles but treats of a much smaller number of animals, real and imaginary (among them the *Burāḳ* [*q.v.*]), since one and the same animal is frequently entered under different names. Being no professional naturalist, the author often entertained superstitious and fabulous notions without any attempt at criticism. He merely transmitted and rearranged traditional knowledge basing himself on hundreds of sources which have been analysed, though not quite satisfactorily, by J. de Somogyi. There are three recensions of the work—a long, a short and an intermediate one—of which the long one is available in at least 13 Oriental impressions (in addition to those mentioned by Brockelmann also Cairo 1315-16, 1321-22, 1353), while a critical edition is still awaited. There exist also several abridgements and adaptations, a Persian translation from the 17th century and a more recent Turkish translation. The English translation of Jayakar extends only to the article *Abū Firās* (about three quarters of the whole) and is not quite satisfactory from the philological point of view.

Of al-Damīrī's other writings only three are extant (see Brockelmann). His last work was a five volume commentary on the *Sunan* of Ibn Mādja [*q.v.*], entitled *al-Dībādja*, of which, however, he was not able to finish a clean copy before he died.

ḌAMMA [see ḤARAKA].

AL-**DAMMĀM**, a port on the Persian Gulf and capital of the Eastern Province of Saudi Arabia. The name formerly designated a tower fort, located at 26° 27′ 56″ N., 50° 06′ 06″ E., on a reef near the shore north of the present town. The origin of the fort is not known, although the structure razed in 1957 to make way for a small-craft pier appeared to date from the time of the redoubtable Djalāhima sea captain Raḥma b. Djābir [*q.v.*]. Ibn Djābir built a fort at al-Dammām after allying himself with Āl Saʿūd about 1809, but the Saʿūdīs destroyed it in 1231/1816 when he deserted their cause to attack al-Baḥrayn. Two years later he assisted the Turco-Egyptian forces of Ibrāhīm Pāshā to capture al-Ḳaṭīf and re-established himself in al-Dammām. He immediately rebuilt the fort, which with its dependent fortifications and village settlement on the adjoining shore became the base for his naval activities against Āl Khalīfa of al-Baḥrayn. In 1242/1826 Āl Khalīfa and Banī Khālid captured al-Dammām, following the death of Raḥma b. Djābir in a naval engagement with the blockading Baḥraynī fleet. For the next seventeen years al-Dammām remained a possession of al-Baḥrayn. During this period Āl Khalīfa permitted the ʿAmāʾir section of Banī Khālid and members of Banī Hādjir to settle there. In 1259/1843 ʿAbd Allāh Āl Khalīfa, having been dispossessed by his grand-nephew Muḥammad, which was soon invested by a Saʿūdī force on land and a Baḥraynī fleet. Fayṣal b. Turkī Āl Saʿūd occupied the fort in 1260/1844, to the disillusionment of Bishr b. Raḥma b. Djābir, who had participated in the campaign in the expectation of recovering his paternal estate. In 1260/1852 Āl Saʿūd, having fallen out with Muḥammad Āl Khalīfa, re-established the sons of ʿAbd Allāh at al-Dammām. An attempt by these exiles to recover al-Baḥrayn led Britain to demand that Āl Saʿūd evict them; when this was not done, they were driven out by a brief British naval bombardment in 1278/1861. In 1282/1866 the garrison of al-Dammām repulsed a British naval force which sought to destroy the fort in retaliation for an incident at Ṣūr in Oman. A Turkish expedition captured al-Dammām in 1288/1871 in the course of occupying a large part of eastern Arabia. Under Turkish administration the fort fell into disrepair, and al-Dammām declined to a minor settlement of fishermen, which figured occasionally in the piratical exploits of the Banī Hādjir. In 1326/1908 Lorimer described it as an abandoned ruin. The site reverted to Saʿūdī rule as a result of the conquest of al-Ḥasā by ʿAbd al-ʿAzīz Āl Saʿūd in 1331/1913. The present town was founded by members of the tribe of al-Dawāsir [*q.v.*], who moved from al-Baḥrayn to the mainland in 1341/1923 to escape British reprisals following clashes with Shīʿī elements on the island. For twenty years al-Dammām remained an insignificant fishing village. In 1357/1938 the California Arabian Standard Oil Company (now the Arabian American Oil Company) discovered oil at nearby al-Ẓahrān [*q.v.*] (Dhahran) on a geological structure which was named the "Dammam Dome". Al-Dammām experienced little growth until its selection in 1365/1946 as the site of a modern deep-water port and the starting point for a railroad leading to the national capital of al-Riyāḍ. The port, which consists of a pierhead connected to the mainland by a trestle and causeway 10.7 km. in length, was opened in 1369/1950 and has since been expanded. In 1372/1953 the capital of the Eastern Province was transferred from al-Hufūf in the oasis of al-Ḥasā to al-Dammām. Al-Dammām has grown rapidly since then and has developed various municipal services, and a limited amount of trade and industry. The town's population was estimated in 1960 at 35,000.

Bibliography: Muḥammad al-Nabhānī, *Al-Tuḥfa al-Nabhāniyya*, Cairo 1342; ʿUthmān ibn Bishr, *ʿUnwān al-Madjd*, Cairo 1373; J. G. Lorimer, *Gazetteer of the Persian Gulf*, Calcutta 1908-15; H. St. J. B. Philby, *Saʿudi Arabia*, London 1954. (H. W. ALTER)

DAMNĀT (DEMNATE, DEMNAT), a small Berber town situated on the edge of the Great Atlas in Morocco, 120 km. east of Marrākush, at an altitude of 960 m., on a small hill overlooking the fertile valley (barley, beans) of the Oued Tassawt, the slopes of which are covered with olive-trees and vines. The town is surrounded by a rectangular wall and includes a *məllāḥ* (Jewish quarter); in fact almost half the population, which stands at about 4,000, consists of Jews, whose numbers however are diminishing regularly. Local trade on a large scale in oil, leather and livestock is carried on at the market which is held on Sundays; in addition, tribes from the Atlas and Sahara used to bring their products (hides, wool, dates), bartering them for such manufactured goods as they needed. Demnat thus appears to have owed part of its prosperity to its situation on the route leading from Marrakush to Meknès and Fez in one direction, and to the Draa (Darʿa) and the Tafilalt in the other; but, without exception, the Arab geographers made no mention of it although its foundation certainly dates from ancient times. Leo Africanus appears to be the first to mention it, though he does not give the name of the town (according to a suggestion put forward by G. S. Colin, Adimmei which appears in Épaulard's trans. on p. 115 may be a mistake for Adimnat) and only mentions a place named El Madina (trans. Épaulard, 130-1), the description of which does in fact correspond closely with that of Demnat. Leo stressed the importance of the Jewish community and of the local leather-work; he also noted the lack of security on the roads, every merchant finding it necessary to maintain "an arquebusier or a cross-bowman". For the rest, the history of the town is little more than a series of disturbances caused either by jealousy of the Jewish population's wealth, or by dynastic rivalries in which the town was the stake. During the 19th century Demnat began to be of concern to the Western Powers who were obliged to intervene to protect the Jews from persecution by the authorities; as a result, on 17 Shaʿbān 1304/11 May 1887, sultan Mawlāy Ḥasan resolved to give them a separate *məllāḥ*, which they still occupy and which formed the subject of a monograph by P. Flamand, *Un Mellah en pays berbère*: *Demnate* (*IHEM*, Notes et Documents, x), Paris 1952 (see further, idem, *Les communautés israélites au Sud-Morocain*, Casablanca 1959). Some years earlier, however, Ch. de Foucauld who stayed at Demnat on the 6th and 7th October 1883 was able to note (*Reconnaissance du Maroc*, Paris 1888, 77-8) that the Jews were treated with exceptional generosity by the Muslims with whom they lived "pell-mell". The two elements of the local population in fact lived together on good terms with each other; their long-standing association had given rise to affinities in practical matters, particularly in regard to the veneration of saints, even though one could not always tell if they were Muslim or Jewish or in fact if they had ever existed (see L. Voinot, *Pèlerinages judéo-musulmans au Maroc* (*IHEM*, Notes et Documents, iv), Paris 1948, 25 sqq., 60-1); 4 km. south-east of Demnat there still exists a grotto known by the name of Imi n-ifri (opening of the grotto) where Jews and Muslims celebrate a pagan ritual at a miraculous spring (L. Voinot, *op. cit.*, 27-8; E. Doutté, *Missions au Maroc*: *En tribu*, Paris 1914, 216-17).

Seven years before the capture of Demnat by Col. Mangin (1912), Said Boulifa stayed there and made a study of the Berber dialect of the Ahl Demnat (*Textes Berb. en dial. de l'Atlas marocain* (Pub. École des Lettres d'Alger, xxxvi), Paris 1908-9); as a result the local dialects, which are important by reason of their situation at the edge of the two large groups in the South (*tashəlḥit*) and Centre (*tamazikht*), have been the subject of research carried out by E. Laoust (*Étude sur le dialecte berbère des Ntifa*, Paris 1918, and *Mots et Choses Berbères*—an ethnographical work—Paris 1920).

Leo Africanus noted that Demnat possessed a number of legal experts, but the true Damnātī rarely figure in Arabic literature; however, we may note ʿAlī b. Sulayman al-Damnātī, author of a commentary on the *Sunan* of Abū Dāwūd entitled *Daradjat mirḳāt al-ṣuʿūd ilā Sunan Abī Dāwūd*, published in Cairo in 1928.

Bibliography: given in the article.

AL-**DAMURDĀSHĪ**, AḤMAD, Egyptian historian of the 12th/18th century. Nothing is known of his life beyond the fact that he held the post of *katkhudā* of the ʿAzabān regiment in Cairo, but he may have been a relative of the *rūznāmedji* Ḥasan Efendi al-Damurdāshī, who flourished in the early 11th/17th century, and about whose doings he is well informed). His chronicle, *al-Durra al-muṣāna fī akhbār al-kināna*, covers the period 1099-1169/1688-1755. It reveals unfamiliarity with Arabic, and the sense is sometimes garbled or obscure. Nevertheless it is valuable, both as a detailed record of events in Cairo, and as perhaps the sole extant chronicle of Ottoman Egypt composed by a member of the military élite. There are considerable differences in phraseology, and even in data, between the British Museum and Bodleian manuscripts: the former is unique among known copies in giving the name of the author. One recension of *al-Durra* seems to have been used as a source by al-Djabartī for his *ʿAdjāʾib al-āthār*; for example, Djabartī's second legend of the origins of the Dhu 'l-Faḳāriyya and Ḳāsimiyya factions, and his list of the *ṣandjaḳ beys* at the beginning of the 11th century H. are closely paralleled in *al-Durra*: (Djabartī, i, 23-4; BM. Or. 1073, 5a-6b; Bodl. MS. Bruce 43, 2a-(3a). (P. M. HOLT)

DANCE [see RAKṢ].

AL-**DĀNĪ**, ABŪ ʿAMR ʿUTHMĀN B. SAʿĪD B. ʿUMAR AL-UMAWĪ, Mālikī lawyer and above all, "reader" of the Ḳurʾān, born at Cordova in 371/981/2. After having made his pilgrimage to Mecca and spent some time in Cairo between 397/1006 and 399/1008, he returned to his birthplace but was soon forced to flee, first to Almeria and finally to Denia (Dāniya, whence his *nisba*), where he settled down and died in 444/1053.

Among more than 120 works which he wrote and enumerated himself in an *urdjūza*, only about ten are known (see Brockelmann, I, 407, S I, 719); two of them deal with questions of grammar, and the others with matters connected with the "readings", a science in which Abū ʿAmr al-Dānī had become famous. His most celebrated works are the *K. al-Muḳniʿ fī Maʿrifat Rasm Maṣāḥif al-Amṣār* (see S. de Sacy, *Notices et Extraits*, viii, 290) and *al-Taysīr fī 'l-Ḳirāʾāt al-Sabʿ* (ed. O. Pretzl, Istanbul

1930), which was the one most studied according to the evidence of Ibn Khaldūn (*Prolégomènes*, ii, 456); *al-Muḥkam fī Naḳṭ al-Maṣāḥif* has recently been edited in Damascus (1379/1960) by ʿIzzat Ḥasan.

DĀNISHGĀH [see DJĀMIʿA].

DĀNISHMENDIDS, a Turcoman dynasty which reigned in northern Cappadocia from the last quarter of the 5th/11th century until 573/1178. The origins and first conquests of its founder, Amīr Dānishmend, are obscure. Appearing in Cappadocia during the years of anarchy which followed the death, in 781/1085, of the Saldjūḳid Sulaymān b. Kutlumish, he became involved in the events of the First Crusade. When historians became interested in him they resorted to legends or imagination to fill the gaps in their knowledge. But it was above all the epic romance of which he was made the hero that gave rise to an imbroglio of historical facts which is difficult to unravel. The oral epic tradition about Dānishmend was put into writing for the first time in 643/1245 by Mawlānā Ibn ʿAlāʾ; this first romance, now lost, was rewritten in 761/1360 by ʿĀrif ʿAlī. This romance which attributes to Dānishmend a legendary relationship with the famous epic heroes Abū Muslim and Sayyid Baṭṭāl and which is conceived as a sequel to the Romance of Sayyid Baṭṭāl, very soon gave rise to error through the fault of certain Ottoman historiographers who could not distinguish between historical truth and legend. The chief culprits were the historians of the 10th/16th century, ʿĀlī and Djenābī who, by treating the romance as a historical document, mingled legendary elements with history in their works. These errors which were to be repeated by historians in succeeding centuries, Ḳaramānī, Kātib Čelebī, Münedjdjim-bashî and Hezārfenn, have been reproduced in the works of orientalists who made use of these sources. Those scholars who attempted to determine which parts of the story were, in their view, in disagreement with historical data often succeeded only in further confusing the facts. When Dānishmend appears in the historians' account of the First Crusade he is already master of Sebastea, the Iris Valley with Eudoxias (Toḳat), Comana, Amasya, Neocaesarea where he resided, and Gangra; he controlled the route from Ankara to Caesarea, the towns of the Pontic coast paid him tribute, and his foraging parties laid waste the shores of the Black Sea, making incursions into Georgia and Armenia. Later he was to make a further conquest, Melitene, and it is in connexion with Ḳîlîdj Arslan b. Sulaymān's expedition against this town in 490/1096-1097 that Dānishmend is first mentioned in history. The sultan having laid siege to Melitene which was defended by the Armenian governor Gabriel, Dānishmend appeared on the scene and made peace between the opposing leaders. These events were interrupted by the capture of Nicaea by the Crusaders in 490/1097. In the summer of the same year Dānishmend, together with the other Turkish amīrs, took part in the harassing attacks to which the Crusaders were to be subjected throughout their march across Anatolia. But soon afterwards an important occurence was to bring him into prominence: in Ramaḍān 493/July 1100 one of the most eminent of the Crusaders' leaders, Bohemund of Antioch, when going to the help of Melitene which was besieged by Dānishmend, fell into the hands of the amīr who imprisoned him in the fortress of Neocaesarea. The following year the Franco-Lombard Crusade coming to the rescue of Bohemund took the Cappadocia route and was defeated by Dānishmend. In September of that year the amīr took part in the massacre of the Crusade's last army, made up of contingents from Aquitaine and Bavaria, which was wiped out near Heraclea in Cappadocia. A year later, Dānishmend entered Melitene after a siege lasting for three years and, by his generosity, won the praise of a population made up of different races and creeds. In Shaʿbān 496/May 1103 the amīr freed Bohemund with whom he had concluded an alliance against their common enemies, Byzantine and Saldjūḳid. But the death of Dānishmend which took place in the year 497/1104 prevented Bohemund from reaping the benefits of this alliance and allowed Ḳîlîdj Arslan to take part of his rival's territory, as well as the town of Melitene. Dānishmend's eldest son, Amīr Ghāzī, succeeded his father. Intervening in the dynastic struggles which divided the sons of Ḳîlîdj Arslan who had died in 500/1107, he helped his son-in-law Masʿūd in 510/1116 to take Ḳonya. Then, in alliance with Tughrul Arslan, prince of Melitene, and his *atabek* Balak, in 514/1120 he defeated the amīr of Erzindjān, Ibn Mengüdjek, and his ally the duke of Trebizond; but he set free his prisoner Ibn Mengüdjek who was also his son-in-law, an act which was a source of dissension between the allies. In 518/1124, on the death of Balak, Amīr Ghāzī recaptured Melitene. Intervening in the war then being waged between Masʿūd and his brother Malik ʿArab, prince of Ankara and Ḳaṣṭamonu, he defeated the latter and in 521/1127 captured Caesarea and Ankara from him. ʿArab appealed for help to Byzantium, but Amīr Ghāzī also took Gangra and Ḳaṣṭamonu and imposed his authority over Cappadocia. In 523/1129, on the death of the Armenian prince Thoros, Amīr Ghāzī intervened in Cilicia, in the following year defeated Bohemund II of Antioch, brought the Armenian prince Leon into subjection and ravaged the Count of Edessa's lands. He then had to turn against John Comnenus who in 527/1132 took Ḳaṣṭamonu from him. Amīr Ghāzī who had given refuge to Isaac Comnenus, then revolted against his brother, and recaptured the town in the following year. In reward for his victories over the Christians the caliph al-Mustarshid and the sultan Sandjār granted him the title of Malik, but when the envoys reached Melitene they found the amīr on his deathbed and it was his son Muḥammad who was invested in his place, in 528/1134. John Comnenus at once resumed hostilities and, in 529/1135, recaptured Ḳaṣṭamonu and Gangra, but these two towns fell once more into the hands of the Turks as soon as the Emperor had withdrawn. The reign of Malik Muḥammad is marked by a series of unsuccessful attempts by John Comnenus, in both Cilicia and the pontic region at different times, to recapture the strongholds which had been taken by the Dānishmendids, as well as by the amīr's inroads into the territories of the count of Marʿash. In 536/1142, Malik Muḥammad died at Caesarea which he had rebuilt and where he had resided. It was his brother Yaghîbasan, governor of Sebastea, who proclaimed

himself amīr at the expense of his nephew Dhu 'l-Nūn, and who married the dead man's widow. By thus usurping power, the new amīr caused the break up of the amīrate which was to lead to the fall of the dynasty; while Dhu 'l-Nūn seized Caesarea, Yaghībasan's brother ʿAyn al-Dawla made himself master of Elbistān and then of Melitene. Henceforth there were three rival branches whose interests were sometimes upheld, sometimes opposed by the Saldjūḳids. However the dynasty survived while Yaghībasan lived, in spite of his continual wars with his father-in-law Masʿūd and subsequently, with his brother-in-law Ḳilidj Arslan II. The emperor Manuel who had at first allied himself with the Saldjūḳids as a means of preventing the Dānishmendids' incursions into Byzantine territory, in 553/1158 took Yaghlbasan's side against Ḳilidj Arslan II and imposed his authority over Dhu 'l-Nūn. The following year marks the opening of hostilities between Ḳilidj Arslan and Manuel, while at the same time war flared up between the rival dynasties as a result of Yaghībasan's abduction of Ḳilidj Arslan's fiancée, the daughter of the Ṣaltuḳid amīr of Erzurūm, who was married to Dhu 'l-Nūn. But the death of Yaghlbasan in 559/1164 gave rise to dynastic quarrels which provided Ḳilidj Arslan with his opportunity to destroy the amīrate. Yaghībasan's widow married Dhu 'l-Nūn's nephew—Ismāʿīl b. Ibrāhīm, aged sixteen, and proclaimed him amīr. In order to protect the interests of Dhu 'l-Nūn, against whom he was afterwards to turn, Ḳilidj Arslan invaded the Dānishmendids' territories. In 567/1172, as a result of a palace revolution during which Ismāʿīl and his wife perished, Dhu 'l-Nūn was called to Sebastea and proclaimed amīr. He was at once attacked by Ḳilidj Arslan, and appealed for help to his father-in-law Nūr al-Dīn, *atabek* of Damascus, whose intervention compelled Ḳilidj Arslan to hand back the territories he had taken from Dhu 'l-Nūn. Nūr al-Dīn withdrew, leaving a relief garrison in Sebastea. But Nūr al-Dīn died in 569/1174 and Ḳilidj Arslan at once seized Sebastea, the Iris valley with Toḳat and Comana, then Amasya, and proceeded to lay siege to Neocaesarea. Dhu l'-Nūn appealed for help to Manuel. In spite of the emperor's efforts the Byzantines were defeated, the Saldjūḳids took possession of Neocaesarea, and Dhu 'l-Nūn was put to death by poison on Ḳilidj Arslan's orders in 570/1175. In the surviving Melitene branch discord reigned among the three sons of Dhu 'l-Ḳarnayn b. ʿAyn al-Dawla, who had died in 557/1162. The eldest, Naṣr al-Dīn Muḥammad, was dethroned in 565/1170 in favour of his brother Fakhr al-Dīn Ḳāsim; but the latter, who was barely fifteen years old, was killed in a riding accident on his wedding day; and it was from the third brother, Afridūn, that Naṣr al-Dīn Muḥammad took back the town in 570/1175 and reigned for three years under Ḳilidj Arslan's suzerainty. But in 573/1178 the Saldjūḳid occupied Melitene, and so came the end of the Dānishmendids. According to Ibn Bībī, Yaghībasan's three sons Muẓaffar al-Dīn Mahmūd, Ẓahīr al-Dīn Ili and Badr al-Dīn Yūsuf entered the Saldjūḳids' service and helped Ghiyāth al-Dīn Kaykhūsraw I to regain his throne; in gratitude the monarch rewarded them by giving them important positions and restoring some of their possessions (cf. *al-Awāmir al-ʿAlāʾiyye*, Ankara 1956, 76 ff.).

DĀNIYA, Span. Denia, capital of the north-eastern district of the province of Alicante, the most southerly of the three present-day provinces which used to make up the ancient kingdom of Valencia (Castellon de la Plana, Valencia, Alicante). This town of 50,000 inhabitants is situated at the south-east tip of the Gulf of Valencia (Sinus Sucronensis), north of the mountain Mongó (in Arabic Djabal Ḳāʿūn) which is 2,190 feet high. Because of its good harbour, north-west of the ancient Promontorium Artemesium, Ferrarium or Tenebrium (to-day Cabo de S. Antonio, S. Martin or de la Nao), Denia was an ancient foundation of the Phocians (of Massilia/Marseilles or of Emporium Ampurias) in the sixth century A.D., and was first called τὸ Ἡμεροσκοπεῖον (Strabo), Hemeroscopium, "the watch of the day"; then, because of the famous temple of Artemis of Ephesus erected on the castle hill, Artemisium; in Roman times this became Dianium (the city of Diana) which later gave the Arabic Dāniya (with the *imāla* Däniya) and finally became Denia in Spanish. Although allied to the Romans, it was nevertheless spared by the Carthaginians since it was a Greek colony. Cato achieved a victory over the Spanish in the neighbourhood of this town before 195. The liberator of Spain, Sertorius, found his last point of support there, as well as a powerful naval base; according to the most likely evidence it was there that he was assassinated in 73. Caesar punished the town because it sided with Pompey (Dianium Stipendiarium); under the Roman Empire it became nevertheless an extremely flourishing municipality, as can be seen from the excavations that have been made there. It soon became Christian, and in the 7th century a bishopric was created there, four of whose prelates took part in the councils of Toledo. It possesses a fragment of the Paleo-Christian tomb of Severina in mosaic and other much more primitive remains which testify to its new faith. But it was under Arab domination, after the country had been conquered by Ṭāriḳ in 94/713, that it reached its highest stage of development (50,000 inhabitants, as it has to-day). On the other hand, we know almost nothing about the period of the migration of the peoples and the Goths. Denia began to play a certain part in the rebellions against ʿAbd al-Raḥmān I, but this part became considerably greater after the fall of the Caliphate in 403/1013, when the ʿĀmirid Abu 'l-Djaysh Mudjāhid, [*q.v.*] a manumitted slave of ʿAbd al-Raḥmān b. al-Manṣūr (called in western sources Musett or Mugeto), at first with the assistance of the learned co-regent (*khalīfa*), al-Muʿayṭī (405-21/1015-30), took possession of Denia and the Balearic Islands [see mayurka] (405-36/1014-1045) and succeeded in surpassing the other *Reyes de Taifas* in learning and wealth. He surrounded himself with scholars and

was a distinguished commentator on the Ḳur'ān. Denia was at that time one of the most important cities of the Levante and the country round it, where the fields were cultivated almost without interruption throughout the year, was very rich. The semi-insular kingdom of Denia played a very important part also as a naval base and in its dockyard was constructed the greater part of the fleet which Mudjāhid used for piracy and with which, after he had seized the Balearic Islands, he undertook his celebrated expedition to Sardinia (406/1015). His son ʿAlī, called Iḳbāl al-Dawla, was taken prisoner by the Germans at the same time that his father was put to flight and pursued by the Christian coalition which retook the island. Ransomed after several years of captivity, he succeeded his father in 436/1044, and reigned for 32 years until 468/1076. Born of a Christian mother and brought up in captivity, he became a Muslim, but possessed none of his father's qualities. Dissolute, miserly and a coward, he confined himself to wringing all he could out of his subjects, and his only undertaking consisted of sending a large ship full of food in 446 or 447 (1054-55) to Egypt, where famine was raging; it came back full of money and jewels. When his brother-in-law, al-Muḳtadir, wanted to enlarge his frontiers on the Denia side, ʿAlī was incapable of resisting him, and his subjects abandoned him, delivering the town up to al-Muḳtadir who sent ʿAlī to Saragossa where he died in 474/1081-2. Al-Mundhir succeeded his father, al-Muḳtadir, in the kingdom of Denia, and his son, Sulaymān, continued to rule under the suzerainty of the Banū Batīr until 484/1091. In the same year the Almoravids had just taken Almeria, which they seized along with Murcia, Játiva and Denia, all of which fell later into power of the Almohads. In the spring of 599/1203, these last concentrated in the harbour of Denia a powerful squadron and landing party, who, on their way to attack the Banū Ghāniya [*q.v.*] at Majorca, put in at Ibiza and seized Palma in September of the same year. Denia was at that time governed by Muḥammed b. Isḥāḳ, who had succeeded his father Isḥāk b. Ghāniya on the throne of Majorca but had been deposed by his brothers because of his adhesion to the Almohads; the Almohad sultān al-Manṣūr had recommended him strongly in his will. In 641/1244, Denia was finally taken from the Muslims by James I of Aragon (Don Jaime el Conquistador), and one of his captains, the German Carroz, undertook the redivision of its lands. In 725/1325, it was given to the Infante, Don Pedro, whose descendants, the royal dukes of Gandía, ruled the County from 1356 up to the time that the Catholic Kings made it a Marquisate. In 1610, it lost most of its population through the expulsion of the industrious Moors by Philip III, and from that time on was of no importance. However, in the War of the Spanish Succession, Denia, whose harbour was fortified, fought stubbornly on the side of the Archduke, was besieged three times by Philip V, and taken in 1708. In 1812-3 it was occupied by the French.

The most famous Arab scholar of Denia is the great commentator on the Ḳur'ān, al-Dānī [*q.v.*] Abu ʿAmr ʿUthmān b. Saʿīd.

C. F. SEYBOLD-[A. HUICI MIRANDA])

DĀNIYĀL. Muslim tradition has retained only a weak and rather confused record of the two biblical characters bearing the name Daniel, the sage of ancient times mentioned by Ezekiel (xiv, 14, 20 and xxviii, 3) and the visionary who lived at the time of the captivity in Babylon, who himself sometimes appears as two different people. Furthermore, the faint trace of a figure from the antiquity of fable combining with the apocalyptic tone of the book handed down in the Bible under the name Daniel, makes Dāniyāl of Muslim legend a revealer of the future and eschatological mysteries, and even lends his authority to astrological almanacs (*Malḥamat Dāniyāl*) of extremely mediocre quality.

Apocalyptical revelations are attributed to Daniel the Elder, it being suggested that a book recording such predictions was found in the coffin supposed to contain the remains of Dāniyāl (whoever he might be) which was brought to light at the time of the Muslim conquest of Tustar, and buried again with the body at the command of Caliph ʿUmar; according to a legend told by al-Bīrūnī, Dāniyāl acquired his knowledge in the Treasure Cave; Muslim sources moreover hand down, besides a garbled version of chapter xi, some authentic quotations from the Book of Daniel. Perhaps it is this Daniel whom the *K. al-Tidjān* (70) places on the same footing as Luḳmān [*q.v.*] and Dhu 'l-Ḳarnayn [*q.v.*]: three characters considered by some as prophets not apostles or simply as just but not inspired men.

Other traditions treat as two characters the Daniel of the destruction of the first Temple in Jerusalem and the captivity in Babylon: an elder Daniel and a son of the same name; the former, son of the Judaean king Jehoiakim, the latter becoming an uncle to Cyrus by marriage (a garbled reference to the marriage of Ahasuerus and the Jewess Esther; moreover, another tradition has Ahasuerus converted to Judaism by Mordecai and taught by Daniel and his three companions).

Muslim tradition has retained, somewhat distorted, episodes related in the Book of Daniel: the presence of Daniel and his companions in the court of Bukht-Naṣṣar [*q.v.*]—Nebuchadnezzar; Nebuchadnezzar's dreams; the friction between Daniel and his detractors (here presented as Magi) and his miraculous delivery from the lions' den; Belshazzar's feast and the deciphering of the mysterious writing. Nebuchadnezzar's being driven temporarily to dwell with the beasts of the field is also to be found here and al-Thaʿlabī is even able to narrate the king's death in a version forming one of the numerous variants of the folk theme used by Schiller in his ballad *Der Gang nach dem Eisenhammer* (see Stith-Thompson, *Motif-Index*, K. 1612, iv, 414). The character of Daniel is also introduced in the framework of stories which in the Bible centre round Ezra and Nehemiah: Ahasuerus did not allow Daniel and his three companions to return to the Holy Land, but

he permitted Daniel, a great judge and a viceroy throughout his reign, to take from the royal treasure all that Nebuchadnezzar had taken from Jerusalem and restore it to the Jews.

DĀNIYĀL, called Sulṭān Dāniyāl in the histories, the youngest and favourite son of the Mughal emperor Akbar, born Adjmēr 2 Djumāda I 979/22 September 1571. In 1008/1599 he was appointed military governor of the Deccan, and after his conquest of the city of Aḥmadnagar (1009/1601) he was honoured by Akbar and given the province of Khāndēsh, fancifully named Dāndēsh after him. He is described as well-built, good-looking, fond of horses, and skilful in the composition of Hindūstānī poems. He figures in Abu 'l-Faḍl's lists of the grandees of the empire (*Āʾīn-i Akbarī*, i, 30) as a commander of 7000. He died of *delirium tremens* at Burhānpur on 9 Dhu 'l-Ḥidjdja 1013/28 April 1605.

Bibliography: see AKBAR.

(J. BURTON-PAGE)

DANḲALĪ, (plural Danāḳil), a tribe occupying the western Red Sea coast from the neighbourhood of Zūla (39° 15′ E, 15° 10′ N) to French Somaliland, and spreading inland over territory of extreme heat and desolation to the foot of the main escarpment of Ethiopia and astride the Dessié—ʿAṣṣāb road. Mainly but no longer exclusively nomadic, with some cattle-owning sections, they have formed many semi-permanent hamlets and a few larger villages on the coast and inland, where a few practise agriculture. Fishing and salt-mining are other occupations. The larger permanent villages today contain markets and police posts, and are gradually losing the complete isolation of centuries. The prevailing standard of life is extremely low, thanks to conditions of abnormal severity and (in the past) to pitiless and ever-repeated raiding from the Ethiopian highlands. The Danḳalī character is reckoned as suspicious, unstable and savage; early attempts at European exploration based on ʿAṣṣāb was met by murderous resistance, and no European survivor returned from the expeditions of Müntzinger (1875), Giuletti (1881), or Bianchi (1884).

The Danāḳil appear to represent a Hamitic base with much absorption in the past of Arab, Somālī, and other stock. Their own origin-legends, all mythical but faintly reflecting actual invasions and upheavals, seek to explain the presence of a phenomenon familiar elsewhere in Eritrea and northern Ethiopia—that of a relatively small ruling caste superior in status, freedom and economic privilege to a larger serf-caste: a distinction which cuts across the division into the subtribes and communities of which the Danḳalī nation is composed. Divided between 1303/1885 and 1372/1952 between Eritrean (that is, Italian and British) and Ethiopian rule, the people had at no time—or have now no remaining trace of—political unity or any more cohesion than can be based on common language, religion, and living-conditions; the only potentate commanding more than sub-tribal or group prestige has been the Sultan of Aussa, resident at Sardo. The Danāḳil in 1954 numbered probably about 50,000 to 80,000 souls.

The Danḳalī language, also called ʿAfar, can be placed as a dialect of the lower-Kushite branch of the Southern Hamitic group. It is close to the Saho language (of the plateau-dwelling tribes west and south of Zūla), and has links with the Somālī dialects.

DAR, a Persian word meaning "door" or "gate", found in many Iranian and Turkic languages. It is synonymous with Arabic *bāb* and is used similarly, *e.g.*, *dar-i ʿaliyya*, *dar-i dawlat*, and in India *dar-bār* (durbar). In a special sense it refers to the ruler's court, or in extension, to a government bureau, already in pre-Islamic Iran. In Pahlavi it was usually written with the heterogram *BB'*.

(R. N. FRYE)

DĀR, (dwelling place), house. The two words most commonly used to designate a dwelling place, *bayt* and *dār*, have, etymologically, quite different meanings. *Bayt* is, properly speaking, the covered shelter where one may spend the night; *dār* (from *dāra*, to surround) is a space surrounded by walls, buildings, or nomadic tents, placed more or less in a circle. *Dāratᵘⁿ* is the tribal encampment known in North Africa as the *duwwār*. From the earliest times there has been in Muslim dwellings a tendency to arrange around a central space: the park, where the shepherd's flock will be sheltered from the blows of enemies; the courtyard, where the non-nomadic family will live cut off from inquisitive strangers. The first house which Islam, in its infancy, offers for our consideration, is that built by Muḥammad, on his arrival in Medina, as a dwelling place for himself and his family, and as a meeting place for believers. The courtyard surrounded by walls is its essential feature. A shelter from the sun, intended to protect the faithful at prayer, runs alongside the wall on one side. Rooms built along another side were occupied by the Prophet's wives and were added to as a result of his subsequent unions.

Tradition brings us an interesting detail on the subject of these rooms. Their entrance on to the courtyard was fronted by a porch of palm branches which could be shut off, if required, by curtains of camel-hair. This front annexe of the room, which recalls the *riwāḳ*, the movable screen of the nomadic tent, which keeps the dwelling in touch with the outside world, and plays the part of a vestibule, was to be perpetuated in the Muslim house.

This arrangement, of a central open space, surrounded by habitable rooms, certainly does not belong exclusively to the Arab world. This disposition is also characteristic of the primitive Roman house, with its *atrium*, and the Hellenic house with its peristyle; it must have been adopted very early by

the Mediterranean countries. But this type of domestic architecture seems to offer an ideal framework for Muslim life. It is well adapted to the patriarchal view of the family and creates for it an enclosed sphere; it conforms easily with the element of secrecy dear to the private life of the Muslim, and this idea is reflected in the architectural arrangement both in elevation and in plan. Houses in European towns look out widely upon the street, the elegance and luxury of the façade are for the architect an object of very considerable attention, and for the owner of the house, a sign of wealth; on the other hand the Muslim dwelling, however rich, presents a most sober external appearence—bare walls pierced by a massive and ever closed door, and by few and narrow windows. The main concern of this domestic architecture is with the central open space. The courtyard seems almost the principal room of the dwelling, and the façades which surround it offer the builder a rich and varied aesthetic theme,—but one whose charm is only accessible to the occupants.

If the customs moulded by Islam contribute to the relative unity of the dwellings, this unity derives even more clearly from the climatic conditions which affect the majority of Muslim countries. The latter, as is well known, almost all occupy a long east-west region in which rain is rare, the sun fierce, and the heat of summer intense. The scarcity of rain and the steppe-like arid character of these countries make water, be it pool or fountain, a much appreciated element of comfort and adornment—one which plays its part in the decoration of palaces as well as in more modest dwellings. The fierce sun and hot summer motivate the arrangement of underground recesses such as the *sarādīb* (sing. *sardāb*) of ʿIrāḳ and Persia, or the building of rooms which are well ventilated but lit only by a subdued light, such as the *īwān*. The *īwān* is a room enclosed by three walls, opening out in the whole width of the fourth side, like an enormous gaping flat-based ledge, and is generally roofed by a cradle-vault (semi-cylindrical). Open to the space of the courtyard, it recalls the *riwāḳ* of the Arab tent; it can act as a reception room and is not without similarity to the *prostas* of the Greek house; yet it does seem to be a genuinely Iranian creation. In the Parthian palace of Hatra (2nd. century A.D.) it is revealed in all its majesty. It was to become a characteristic theme of the architecture of the Sāsānids. The most famous example is the Ṭāḳ-i Kisrā, the palace of Ctesiphon, built by K͟husraw Anūs͟hirwān (551-579 A.D.). The Mesopotamian architects working for the ʿAbbāsids were to make the *īwān* one of the essential elements of their monumental compositions. The palace of Ctesiphon clearly inspired the builder who created, in 221/836, the great *īwān* of the palace of al-Muʿtaṣim at Sāmarrā [*q.v.*]. It is to be found on a smaller scale in 147/764 in the palace of Uk͟hayḍir; this princely dwelling exhibits courtyards surrounded by buildings. In two of the courts, two *īwān*s open out face to face, each preceded by a gallery, along the whole width of the courtyard. This symmetrical arrangement, with two wide galleries facing each other and the *īwān*s opening out in the far wall, used according to the season—summer and winter—has been perpetuated in the houses of modern ʿIrāḳ. The gallery, or wide room, giving on to the courtyard through three bays, is called a *tarma*; the *īwān* is flanked by two small rooms (called *ōda*) which re-establish the rectangular scheme. However, by the 3rd/9th century this architectural idea (wide ante-room, deep *īwān* with lateral rooms whose doors open on the ante-room) moved towards the West and began to reach the Mediterranean world. In some houses of al-Fusṭāṭ (old Cairo) generally attributed to the Ṭūlūnids, the *īwān* plays an important role. The courtyard, which one reaches by one of the corners, is framed by walls, and the four sides contain *īwān*s, some deep, others shallow and rather like wide, flat-based ledges. On one of the sides there is an ante-room with three bays, and at its far end we find a central *īwān* and the two flanking rooms. The arrangement of the wide ante-room and the deep *īwān* forms a characteristic T shape. These Ṭūlūnid dwellings, built in brick like the monuments of the period, comprise several storeys. They were provided with a system of conduits which brought fresh water and carried away dirty water. Their courtyards were decorated with pools and plants. In two houses, a fountain is built into one of the rooms and the water is channelled into the courtyard pool. In the rooms of rectangular shape, the short sides of the rectangle and the long wall facing the entrance are often cut into by level ledges, a sort of atrophied *īwān*s, where seats could be placed.

Before following up the westward migration of these elements of domestic architecture shown by the Ṭūlūnid houses, it seems worthwhile to indicate how they have changed on the spot, and what can be found of them, modified by Turkish influence, in the modern dwellings of Egypt. The courtyard is still an important element in these dwellings, but it is no longer in the centre of the building. It stands in front of them, accessible by a curved corridor. The visitor can be received here, in a low room (*tak͟htabos͟h*), opening out widely on the ground floor, or in a loggia (*maḳʿad*) which stands above it and dominates the courtyard. If the visitor is entering the interior of the house, he will be received in the *selāmlik*. Its principal element is a large room (*mandara*) whose central part, a substitute for the courtyard, is paved, adorned with a fountain and surrounded by two or three *īwān*s—or rather, *līwān*s, as the word has come to be used in local parlance. These *līwān*s, raised above floor level, are furnished with carpets and divans. The *ḥarīm* is completely separate from the *selāmlik* and is accessible by a door opening onto the courtyard and by a staircase. The *ḳāʿa*, its principal room, is not dissimilar to the *mandara*, for here, too, one finds a central space and lateral extensions. But it is different, and derives more evidently from the ancient courtyard, for the walls surrounding the central space rise to the level of the terraces, and carry a lantern which lights the interior.

The dwelling with the central courtyard, with the characteristics inherited from the Iranian tradition being adapted to the domestic theme of the Roman world, spread early across the Mediterranean countries of Islam. Evidences of this expansion have been found in archaeological researches in recent years. Excavations lately undertaken at Ṣabra-Manṣūriyya, the town founded in 335/947 by the Fāṭimid al-Manṣūr at the gates of al-Ḳayrawān, have revealed a palace with walls of clay once decorated with ceramic marquetry. Here we find the arrangement of the wide ante-room and the deep *īwān* with two rooms alongside. From the same period, or possibly a little earlier, the castle of the Ṣanhād͟jī Amīr Zīrī at As͟hīr, dated about 324/935, is interesting for the use of courtyards and for the rigorous symmetry of the rooms which surround them. Five rooms exhibit flat-based ledges cut into

the wall facing the entrance; these inner recesses are fronted on the outside by rectangular fore-parts.

About a hundred years later, at Ṣanhādja in the Berber territory, the palaces of the Ḳalʿa of the Banū Ḥammād were being constructed. Three of these royal dwellings have been excavated. *Dār al-baḥr*, the largest, owes its traditional name to the sheet of water which entirely occupied a large courtyard. Above the huge pool were the state rooms. A second courtyard was surrounded by buildings presumably for domestic use: storerooms for provisions and a bath intended for guests. The flat-based ledges, probably derived from the *īwān* which certainly was already well known to Sāsānid architects, give variety to the interior construction of the rooms. In another Ḥammādid palace, the *Ḳaṣr al-Manār*, castle of the Fanal, the four sides of a central room, once no doubt roofed by a cupola, are hollowed out in this fashion: a similar cruciform plan is seen in Palermo in the pavilion of the Zīza, built by the Norman kings (Twelfth Century). One of these ledges contains a fountain whose water flows in a canal across the room as in Ṭulūnid houses in al-Fusṭāṭ, already mentioned.

The survival of the Asiatic elements taken over by domestic architecture in North Africa can be seen in Sedrata, a town in the Sahara founded by the Khāridjī Berbers south of Ouargla, which was inhabited from the tenth to the twelfth centuries. Houses recovered from the sand contain rooms giving on to multiple courtyards. In addition to buildings provided with storerooms for provisions, the house includes state-rooms richly decorated with plaster sculptures, sometimes roofed by a cradle-vault which joins two half-cupolas on shell-shaped corbels. Some of the rooms are preceded by galleries opening, as at al-Fusṭāṭ, by three bays onto the courtyard. The room follows the T-plan, consisting of a wide shallow room, and the *īwān* in the wall facing the entrance. The two ends of the wide room each show a raised couch framed by an overhanging arch.

We do not know when and how this type of house, with its combination of Persian and ʿIrāḳī elements, reached Muslim Spain and the Maghrib. Many fashions derived from Baghdād or from Sāmarrā were imported by the Western Caliphs, especially in the 3rd/9th century, and made a mark in Andalusia. Perhaps in this way we can explain certain of the architectural elements revealed by the Castillejo of Murcia, attributed to Ibn Mardanish (541-66/1147-1171). Here we find wide rooms, at the end of which there is a narrow room preceded by a fore-part. The inner rectangular courtyard is designed in the manner of a garden divided by two paths intersecting at the centre—a characteristic Persian theme. Two overhanging pavilions on the shorter sides of the rectangle mark the position of the paths. This type of dwelling, transplanted into Muslim Spain, takes on an incomparable beauty and amplitude in the Alhambra, the palace of the Naṣrid kings of Granada. It is known that the principal buildings of this royal habitation, the work of Yūsuf I (735-55/1335-1354) and of Muḥammad V (755-93/1354-1391) are arranged around two rectangular patios. One of them (Patio de los Leones) is divided by two paths in the shape of a cross, dominated by two overhanging pavilions on the shorter sides of the rectangle, as at the Castillejo of Murcia. Water plays an important part in the décor of these courtyards, filling the pool of Alberca and playing over the basins of the famous Fountain of the Lions. Galleries and wide ante-rooms opening on to the court-yards lead to state-rooms, such as the splendid Ambassadors' Room which is in the Comares tower, the outstanding feature of the enclosure. The wide rooms have, at each end, a recess, a lateral *īwān*, bounded by an overhanging arch, as in the houses of Sedrata.

This theme of garden-courts, with fountains, and crossing paths, which certainly seems to have come from Īrān, must have reached Maghrib even in the Middle Ages. It survives in the charming *riyāḍs*, the interior gardens found in Fez and Marrakesh. The Algerian house, especially in Algiers itself, is quite different. The vestibule (*sḳifa*), very long, and bordered by seats, leads on through a curved corridor, or by a staircase, into the courtyard. The latter is enclosed by the columns and horseshoe arches of four galleries; a fountain plays in the centre. The rooms beneath the galleries, on the ground floor or on the upper storeys, are very wide and rather shallow, the limited height being necessitated by the weak bearing of the ceiling beams. Opposite the door is a recess containing a divan. In this we can see a degenerate form of the *īwān*, whose movements we have traced from ʿIrāḳ. In Algiers, this median recess has a fore-part supported by arms set at an angle into the façade. This, there can be little doubt, is an eastern fashion, imported by the Turkish masters of the town. In the villas of the suburbs, the less restricted space makes this overhang unnecessary; the fore-part rises from ground-level. On the upper storey, it develops into a sort of small salon, a belvedere with windows on the three sides, and frequently surmounts the entrance porch. The Tunisian house is a little different, the rectangular court-yard having galleries only on the two shorter sides. The principal rooms follow the T-plan, with the wide room (*bayt*), the deep *īwān* (*ḳbū*), and the two small rooms alongside, (*maḳṣūra*, plu. *mḳāṣer*).

DAR-I ĀHANĪN. Persian "the iron gate", also called Derbend-i Āhanīn. The Arabic form is *Bāb al-Ḥadīd*, old Turkish *Tāmir qapiy*. A name used for various passes in the eastern Islamic world. The most famous pass called *dar-i āhanīn*, is the pass in Mā warāʾ al-Nahr (Transoxiana), in the Baysuntau Mountain Range near the modern village of Derbent located on the old road between Samarḳand and Tirmidh.

Perhaps the earliest mention of this "Iron Gate" is in the account of the Chinese pilgrim Hsüan Tsang who went through the pass about 630 A.D. and described it briefly. The first mention of this

pass under its Persian name is in al-Yaʿḳūbī, *Buldan*, 290, 5. In later times this pass was considered the boundary between Mā warā᾿ al-Nahr and the lands dependent on Balkh. The pass is frequently mentioned in Islamic literature, but the first European to visit the site was Clavijo who passed here in 1404 and mentioned a customs house from which Timur received revenue. The pass is mentioned by Sharaf al-Dīn Yazdī, *Ẓafarnāma*, ed. M. Ilahdād, Calcutta, 1887, I, 49, and the *Bāburnāma*, ed. Beveridge, 124, under the Mongolian name *qa᾿alya* (in Arabic script *ḳahalghah*). The name Buzghāla Khāna, later applied to the pass, is first mentioned by Muḥ. Wafā Karmīnagī, *Tuḥfat al-Khānī* (uncatalogued, in the former Asiatic Museum, Leningrad f. 184b) in the description of a campaign by Muḥ. Raḥīm Khān in 1171/1757. A road runs through the pass today but it is no longer of any importance.

DĀR AL-ʿAHD, "the Land of the Covenant", was considered as a temporary and often intermediate territory between the *Dār al-Islām* [*q.v.*] and the *Dār al-Ḥarb* [*q.v.*] by some Muslim jurists (see Al-Shāfiʿī, *Kitāb al-Umm*, Cairo 1321, iv, 103-104; Yaḥyā b. Ādam, *Kitāb al-Kharādj*, trans. A. ben Shemesh, Leiden 1958, 58). Al-Māwardī (*Kitāb al-Aḥkām al-Sulṭāniyya*, trans. E. Fagnan, Algiers 1915, 291) states that of the lands which pass into the hands of the Muslims by agreement, that called Dār al-ʿAhd is the one the proprietorship of which is left to their previous possessors on condition that they pay *kharādj*, and this *kharādj* is the equivalent of *djizya*. In case of the breach of the agreement their land becomes *Dār al-Ḥarb*. When the Imām accepts their request to submit and pay *kharādj*, war against them is prohibited (Yaḥyā, 58). But in theory these lands are in the end to be included in the *Dār al-Islām*.

Abū Ḥanīfa, however, holds the opinion that such a land can be considered only as part of the *Dār al-Islām*, and there can be no other territory than the *Dār al-Islām* and the *Dār al-Ḥarb*. If people in such a land break the agreement they are to be considered as rebels.

But, there existed, even in early Islam, a type of tributary lands which conformed to the theory defended by al-Shāfiʿī. Under Muʿāwiya the Armenian princes obtained, in return for the payment of *kharādj*, agreements from him guaranteeing their land and autonomous rule (see, J. Markwart, *Südarmenien und die Tigrisquellen*, Vienna 1930, 457, and ARMĪNIYA).

More precise information on the conditions affecting such lands is provided by the examples in Ottoman history. In the *ʿahdnāmes* granted by the Ottoman sultans to the tributary Christian princes (see Fr. Kraelitz, *Osmanischen Urkunden in türkischer Sprache*, Vienna 1922, 42-106; Fr. Babinger, *Beiträge zur Frühgesch. der Türkenherrschaft in Rumelien*, Munich 1944, 21; Ferīdūn, *Munsha᾿āt al-Salāṭīn*, ii, Istanbul 1265, 351-380) we find that submission and the payment of a yearly tribute (*kharādj*) by the Christian prince, with the request of peace and security on the one hand and the Sultan's grant of *ʿahd wa amān* [*q.v.*] on the other, are the essential points for the conclusion of an *ʿahd*. It is absolutely an act of grant on the part of the Sultan. In the *ʿahdnāmes* it is often stipulated that the tributary prince is to be 'the enemy of the enemies of the Sultan and the friend of his friends'. Besides these, further conditions were usually imposed, such as the sending of hostages to pay homage in person to the Sultan every year, and the provision of troops for his expeditions. In his *ʿahdnāme* the Sultan promises by oath peace, protection against the internal and external enemies of the prince, respect of the religion, laws and customs of the country (cf. Ferīdūn, ii, 355), no colonization of Muslim people there, and no interference by Ottoman officials in internal affairs. A *ḳapi-ketkhudā* of the prince represents him at the Porte. His people could freely enter and trade in Ottoman territory. Following Ḥanafī opinion, the Ottoman Sultan considered them as his own *kharādj*-paying subjects and the land as his own land (cf. Kraelitz, 57, doc. 7); Ferīdūn, ii, 358). If the circumstances changed, the Sultan could increase the amount of the tribute. If the prince failed to fulfill any of his obligations toward the Sultan, he would declare him a rebel and his land *Dār al-ḥarb*. If the Sultan saw fit, he could bring the land under his direct rule. But the first step in expanding the *Dār al-Islām* was usually to impose a yearly tribute. Most of the Ottoman conquests were achieved through it (cf. İnalcık, *Ottoman Methods of Conquest*, in *Stud. Isl.*, ii, 103). See also DĀR AL-ṢULḤ.

(AL-)**DĀR AL-BAYḌĀ᾿**, the Arab name for Casablanca, the principal city in Morocco. In Arab dialect Dār l-Bēḍa, formerly Anfā [*q.v.*].

After the Portuguese had destroyed Anfā in the 15th century, the town remained in ruins, sheltering but a few Bedouins and being occasionally used by ships as a watering-place. The Portuguese named the locality Casabranca, after a white house, overlooking the ruins, which served as a landmark for their ships. The Spanish transformed the name into Casablanca, the present European name of the city. The Arab name is its literal translation.

The ʿAlawid Sulṭān Sīdī Muḥammad b. ʿAbd Allāh had the city rebuilt in the 18th century, probably subsequent to the Portuguese evacuation of Mazagan in 1769. Fearing that the Christians would one day return to the attack, he wished to fill the gap in the defences which existed between Rabāṭ and Mazagan. The bastion, or *sḳāla*, provided with artillery emplacements, was similar to those at Rabāṭ and Larache. It is thought that he repopulated the city by setting up two *idālās*, one of Shlūḥ of Ḥaḥa (a Berber tribe giving its allegiance to the Makhzen, in the Agadir region), the other of Bwākher (ahl al-Bukhārī) of Meknès. Right to this day one of the oldest mosques in the city is named *djāmiʿ al-shlūḥ*. Travellers to Casablanca in the early 19th century described it as a mass of ruins used more for camping than for permanent settlement. Like Feḍāla and Manṣūriyya, it was a stopping-place on the journey between Rabāṭ and Marrākesh.

In 1782 the trade in corn, Casablanca's main export, was granted to a Spanish company in Cadiz, and in 1789 to the Compaña de los Cinco Gremios Mayores of Madrid. But following the revolt organized by the Shāwiya governor, who had estab-

lished his residence in Casablanca, Sulṭān Mawlāy Sulaymān closed the port to commerce in 1794, and summoned back to Rabāṭ the Christian traders who had set up business there. It was not reopened until 1830, by Mawlāy ʿAbd al-Raḥmān b. Hishām.

European traders began to return from 1840 onwards, and the influx was particularly great in 1852. The first ones were representatives of French manufacturers in Lodève. They were sent in quest of raw wool, in an attempt to free themselves of dependence on the English market. They were followed by English traders from Gibraltar, by Germans, Portuguese, and Spaniards. The first European vice-consul in Casablanca was appointed in 1857. Thereafter, despite periods of stagnation due to European economic crises or to local causes (*e.g.*, droughts and epidemics), the small foreign colony grew continually. Steamship companies (notably the French line Paquet) called regularly at Casablanca. Trade expanded, and in 1906 the port's traffic (imports plus exports valued at 14 million gold-francs) exceeded that of Tangier.

Following the loan of 1904 and the Conference of Algeciras in 1906, French officials took over control of the Casablanca customs post, and a French company undertook improvements to the port facilities. These events constituted a threat to the Shāwiya tribe which inhabited the surrounding countryside, and on 30 July 1907 they attacked and killed some European workers in a quarry outside the city walls. The intervention of a French warship provoked the sacking of the city, during which the Jewish quarter suffered particularly severely. The French replied by a bombardment on August 5th, and two days later 2000 troops under the command of General Drude were sent ashore from a French squadron. Spain also sent a squadron of assault troops. The French expeditionary force gradually occupied the whole of the Shāwiya territory by driving back the warlike tribes, and the train of events ended with the establishment of the French Protectorate in 1912.

As a result of the decision of its first Resident General, Lyautey, to make it the principal port of Morocco, the city underwent an enormous expansion. No doubt the decision would have been very different if Casablanca had not already known considerable economic prosperity. This arose in part from the presence of a sizeable European colony, in part from the need to supply material to the Expeditionary Force. The modern port is completely man-made. It has 4,870 m. of deep-water quays, and is protected from the open sea by a breakwater 3,180 m. long. In 1956 it registered $8^1/_2$ million tons of traffic.

The census of 1952 showed a population of 680,000 (to be compared with 20,000 in 1907): 472,920 Muslims, 74,783 Jews (more than a third of the total Jewish population in Morocco), and 132,719 foreigners (of whom 99,000 were French).

The old city consisted of 3 districts: Medina (middle-class), Tnaker (working-class, not entirely built-up), Mellāḥ (Jewish). Today the whole area, its walls still in part intact, is called Old Medina, and to the W. and S.W. it has extended beyond the walls. The whole of the Jewish population lives there, mingled with the Muslims. The European districts have grown up around Old Medina, particularly to the E. and S., and further Muslim districts have been built outside these, the principal one being an immense area of 200,000 inhabitants, New Medina. The shanty-towns on the outskirts of the city, to which countryfolk flocked in search of work, have now been largely replaced by working-class dwellings, constituting quarters such as Muḥammadiyya to the E. (formerly the 'Central Quarries'), Sīdī ʿUthmān to the S. (formerly Ben Msīk), and Ḥasaniyya City, formerly Derb Jdīd (*al-darb al-djadīd*) to the S.W. The main centre of industry is in the N.E. along the road to Rabat. It contains the headquarters of most of the country's light industries, and is the most important industrial region in Morocco.

DĀR AL-ḌARB, the mint, was an indispensable institution in the life of mediaeval Middle Eastern society because of the highly developed monetary character of its economy, particularly during the early centuries of Muslim domination. The primary function of the mint was to supply coins for the needs of government and of the general public. At times of monetary reforms the mints served also as a place where obliterated coins could be exchanged for the new issues. The large quantities of precious metals which were stored in the mints helped to make them serve as ancillary treasuries.

Soon after their conquest of the Middle East, the Arabs made use of the mints inherited from the former Byzantine and Sāsānid regimes. It was only during the Umayyad period that the Muslim administration began to interfere with the minting organization. This was manifested in the setting up of new mints (*e.g.*, Kūfa, Wāsiṭ) by al-Ḥadjdjādj, in the famous coinage reform of ʿAbd al-Malik [see DĪNĀR], and in the centralizing measures of Hishām who drastically reduced the number of mints. The policy of Hishām, obviously influenced by Byzantine minting traditions, could not be maintained for long by the ʿAbbāsid caliphate. During the reign of Hārūn al-Rashīd the office of *nāẓir al-sikka* (inspector of coinage) was set up. Although by this measure the caliphate relinquished its direct authority over the mints in favour of a subordinate agency, it still defended the principle of a centralized minting system. But this office seems to have disappeared with the shrinking of the political and administrative authority of the ʿAbbāsids. The increased number of mints whose operations were necessitated by rapidly expanding trade and industrial activities, and the rise of many petty rulers asserting their control over these mints, led to a complete decentralization of minting, a situation closely resembling that which existed under the Sāsānids.

The assumption of control over the mints was one of the elements indicating the assertion of independent power by rulers. It was symbolized by the inclusion of their names in the inscriptions on the issues of their mints, hitherto an exclusive pre-

rogative of the caliphs. By this measure, also, they declared themselves responsible for the quality of their coinage. To safeguard the integrity of the coinage, and consequently the interests of the general public, the mints were submitted to the legal authorities (*e.g.*, *ḳāḍī al-ḳuḍāt* in Fāṭimid Egypt and Syria, and a *ḳāḍī* in 11th century Baghdād) whose agents personally assisted at the minting processes. In spite of this system, the confidence of the general public was abused by the rulers who exploited their mint prerogatives by illegal monetary speculations. The usual method was to declare the coins in circulation invalid, and order their exchange against the new, secretly debased issues, obtainable in the official mints.

The staff of the mint consisted of clerical and manual employees. The former were in charge of book-keeping and of internal security. The manual workers, such as the *sabbākūn* (melters) and *ḍarrābūn* (minters), carried out the actual coining operations. A special position among the craftsmen was occupied by the *naḳḳāsh* (die-sinker) whose professional activities were restricted to engraving only.

Coins issued by Muslim mints were struck of gold, silver and copper [see DĪNĀR, DIRHAM, FALS]. Precious metals for coining consisted of bullion which was supplied by the official authorities as well as by private customers. The latter delivered also obliterated coins and 'foreign' coins which were prohibited on local markets. A prescribed percentage of such deliveries was retained by the mint as a coining levy. The money cashed from the customers was spent on the wages of the minters, on the costs connected with minting operations, as well as on a special government tax. During the period of flourishing trade activities which entailed intensive minting operations, the proceeds from the mint yielded a substantial income to the government. But the economic regression of the late Middle Ages drastically diminished the demand for coinage, with detrimental effects on the position of the mints and the profits derived from them. It then became practicable to farm out the mints, an expedient resorted to, for instance, by Mamlūk Egypt.

Ottoman period. — The Ottoman mint is generally known as *Ḍarbkhāne-i ʿĀmire* but also *ḍarrābkhāne*, *nuḳrakhāne* and *dār al-ḍarb*. The first coin from an Ottoman mint was an *aḳče* [*q.v.*] struck in Bursa probably in 727/1326-7 (cf. I. H. Uzunçarşılı, *Belleten* xxxiv, 207-221). On the *aḳče*s and *manghir*s, copper coins, of Murād I and Bāyazīd I no place-name is found (H. Edhem, *Meskūkāt-i ʿOthmāniyye*, Istanbul 1334, no. 1-58), but we know that under his sons there were mints in Bursa, Amasya, Edirne, Serez and Ayasoluḳ (Ephesus) (see H. Edhem, nos. 59-138).

The first Ottoman gold coin was struck in Istanbul in 882/1477-1478 (I. Artuk, *Fatih Sultan Mehmed namına kesilmiş bir sikke*, in *Ist. Arkeoloji Müzesi Yıllığı*, no. 7), but already in 828/1425 and even before the Ottoman mints must have produced Venetian gold ducats, *Frengī filori* or *aflūrī* (Fr. Babinger, *Zur Frage der osmanischen Goldprägungen im 15. Jahrhundert*, in *Südost-Forschungen*, vol. xv, 1956, 552). A regulation (R. Anhegger-H. Inalcık, *Ḳānūnnāme-i Sulṭānī ber mūceb-i ʿörf-i ʿOsmānī*, Ankara 1956, nos. 1 and 58) makes it clear that *Frengī filori* was struck in the mints of Istanbul, Edirne and Serez (Serres) under Meḥemmed II.

In their expanding empire the Ottomans established new mints in the commercially and administratively important cities and in the centres of gold and silver mines. Thus, under Bayazıd II, new mints were established in Ankara, Karatova (Kratovo), Kastamoni, Gelibolu (Gallipoli) in addition to those in Istanbul, Bursa, Edirne, Serez, Ayasoluk, Novar (Novaberda, Novobrdo), Üsküb (Skoplje), Amasya, Tire and Konya, which existed already under Meḥemmed II. Under Süleymān I, gold coins were struck in his name in Aleppo, Damascus, Miṣr (Cairo), Āmid, Baghdād and Algiers. In Shaʿbān 953/October 1546 a new mint was established in Djandja, a small town to the north of Erzindjān, when rich silver and gold mines were found there. The mints in Morava (Gilan), Novaberda, Sidrekapsa and Serebrenica (Srebrnica) owed their existence to the rich silver and gold mines (see R. Anhegger, *Beiträge zur Geschichte des Bergbaus im osmanischen Reich*, Istanbul 1943, 131-212). The Ottoman laws required that all bullion produced in the country or imported from abroad be brought directly to the *ḍarbkhāne*s to be coined. Also upon the issue of a new *aḳče* those possessing the old were to bring it to the mint. The special agents, *yasaḳ-ḳulus*, were authorized to inspect any person for bullion or old *aḳče* (see *Belleten*, xliv, 697, doc. 2, and Anhegger-Inalcık, *Ḳānūnnāme*, no. 2, 5, 58) and the gold or silver imported by foreigners was exempted from the customs duties. The state levied a duty of one fifth on all silver coined at the *ḍarbkhāne* which corresponded to the difference between the real and face values of the *aḳče* (*Belleten*, xliv, 679 and Anhegger-Inalcık, no. 58).

As a *muḳāṭaʿa* [*q.v.*], this revenue was usually farmed out at auction to the highest bidder. The contractor, *ʿāmil*, was to pay it in regular instalments to the public treasury (see Anhegger-Inalcık, no. 15). Spandugino (ed. Ch. Schefer, Paris 1896, 57) tells us that each new issue of *aḳče* under Meḥemmed II brought a revenue of 800 thousand gold ducats. The *muḳāṭaʿa* of the Bursa *aḳče* mint alone amounted to 6000 ducats in 892/1487 (see *Belleten*, xciii, 56). All the mints in the empire could be farmed out as one single *muḳāṭaʿa* (Anhegger-Inalcık, no. 15). But an *ʿāmil* in turn could farm out at his own responsibility the local *ḍarbkhāne*s to others. The *ʿāmil* employed *emīn*s and *wekīl*s to assist him. Though he was responsible for the revenue of the mint its actual operation and control were in the hands of the employees appointed by the state, namely an *emīn* or *nāẓir* who had its supervision (Anhegger-Inalcık, no. 13), a *ṣāḥib-i ʿayār* who was the director and in this capacity responsible for all the technical and legal requirements (Anhegger-Inalcık, no. 14,

and, Ewliyā Čelebī, *Seyāḥatnāme*, x, 135) and an *ustād* or *usta* who supervised the actual minting processes. Under him the technicians and workers were divided into several groups, the *ḳāldjiyān* who prepared the standard ingots by melting the metal, the *kehledān*s or *kehledār*s who made them into plates to be minted and the *sikke-zen*s or *sikke-kün*s who, under strict supervision, prepared the steel moulds. There were also *dīdebān*s, watchers, *khazīne-dār*s treasurers, *kātib*s, scribes etc.

Minting was arranged on the basis of *newbet*, a system of turn; at each turn 13065 *dirhams* [*q.v.*] of silver were delivered from the capital out of which 3000 were placed in the *khazīne*, treasury, and 10,000 were delivered to the *ustād* to be minted, 65 *dirhams* were accepted as the legal loss.

The general supervision of the *ḍarbkhāne* and of its accounts was the responsability of the local *ḳāḍī* who kept there his own *emīn* (Anhegger-Inalcık, no. 13). It was the *ḳāḍī*'s duty periodically to see the accounts and send the balance sheets, *muḥāsabāt-i ḍarbkhāne*, to the central government (a *defter* of the *muḥāsebāt-i ḍarbkhāne-i Bursa* of the first half of the 10/16th century is now in Belediye Kütüphanesi, Istanbul, Cevdet yazm. no. 0.59).

In the *berāt*s given to the *ʿāmil*s and *emīn*s it was made clear how much they should pay for the bullion purchased and how many coins should be minted from each 100 *dirhams* of it; all this reflected the monetary policy of the state.

Until 865/1460 out of each 100 dirhams of silver 265 or 278 *aḳče* were struck, but it was 355 or 400 *aḳče* under Meḥemmed II, 500 under Süleyman I and 1000 in 996/1588. The original Ottoman monetary system based on *aḳče* was disrupted from this time on (for the causes, see *Belleten*, lx, 656-684). The spoiled and adulterated (*züyūf* and *čürük*) *aḳče*s invaded the market. The renewed attempts to put right the quality and value of it, the so called *taṣḥīḥ-i sikke*, failed (see M. Belin, *Essais sur l'his. économique de la Turquie*, Paris 1865, 118 ff.; I. Ghālib, *Taḳwīm-i Meskūkāt-i ʿOthmāniyye*, Istanbul 1307, 220-226). In 1010/1601 the use of bad and old *aḳče* was prohibited once more and the rate of *sagh* ("good") *aḳče* was fixed at 120 *aḳče* to one gold piece of 1 *dirham* and 1 1/2 *ḳirāṭ* [*q.v.*]. In the following period the Ottoman mints showed little activity and many of them were closed down. In the 11th/17th century only were the mints of Istanbul, Cairo, Baghdād, Tripoli, Tunis and Algiers steadily active. The main reason for this situation was that Europeans, realizing the big profit to be made from the difference in price of silver, began increasingly to import their silver coins in the Levant (in 1614 the French alone imported 7 million *écu*). First *riyāl*s, Spanish *reales*, then in the 11th/17th century *arslānī*, *esedī* or *abū kalb gurush*, Dutch *Loewen riksdaler*, and the *ḳara-gurush*, German thalers, invaded the Levantine markets. The import of these coins was free of duty, but the mark *saḥḥ* had to be struck on them in the Ottoman *ḍarbkhāne*s as a condition of free circulation, because Europeans were increasingly importing counterfeit coins specially struck for the Levant. In 1010/1601 one gold coin was rated officially at 400, and one *gurush* (piastre) at 160, *aḳče* (Başvekâlet Arşivi, Fekete tasnifi, no. 3043). Eventually the *gurush* was made the Ottoman monetary unit, as the *aḳče* became too small in value as a result of the continual debasements and devaluations, and the abundance and cheapness of the commercial silver. The first Ottoman *gurush* of 6 *dirhams* of silver was struck in imitation of the German thaler in 1099/1688 (see I. Ghālib, 237, 254). It was rated 4 *para* (*pāre*), which was struck first under Murād IV. Pieces of half a *gurush*, *niṣfiyye*, and a quarter, *rubʿiyye*, were also struck.

The new system opened a new era in the history of the Ottoman coinage. The *aḳče* ceased to be the basic unit, though it was struck until 1234/1819; special care was then taken to improve the quality of the coins struck (see I. Ghālib, 230). New *ḍarbkhāne*s were opened in Edirne, Izmir (Smyrna) and Erzurum for gold and others at Tawshan-tashī in Istanbul and in Bosna-Saray for copper coins in 1100/1689. New machines and techniques were adopted (Rāshid, *Taʾrīkh*, Istanbul 1282, ii, 383, 394). On 13 Djumādā I, 1139/6 January 1727, the chief imperial *ḍarbkhāne* was transferred from its old location at the Sīmkeshkhāne to its new buildings in the first court of the Topkapı-sarayl (Küčük Čelebī-zāde ʿĀṣim, *Taʾrīkh*, Istanbul 1282, ii, 443). During the same period, for better control, the provincial *ḍarbkhāne*s were again closed down. In 1132/1720 the silver coins struck were the *gurush* of 8 *dirhams* and 12 *ḳirāṭ*, the *zolota* of 6 dirhams and 4 *ḳirāṭ*, the *para* of 2-3 1/4 *ḳirāṭ* and the *aḳče* of 3/4-1 3/4 *ḳirāṭ* in weight. The *gurush* and *zolota* contained 60% pure silver (I. Ghālib, 280).

As the Ottoman government always considered minting as a source of revenue to meet its financial difficulties, the new silver coins, too, became subject to adulteration, and all attempts at reforms (*taṣḥīḥ-i sikke*), failed (I. Ghālib, 303, 327, 407; A. Djewdet, *Taʾrīkh*, iv, Istanbul 1275, 122; v, Ist. 1278, 289). The situation became most confusing under Maḥmūd II, and, eventually under ʿAbd al-Medjīd, by the *ferman* dated 26 Ṣafar 1256/29 April 1840, Western principles of monetary policy were accepted as a guide by the government (see the text in S. Sūdī, *Uṣūl-i Meskūkāt-i ʿOthmāniyye we edjnebiyye*, Istanbul 1311, 76-104). Enlarged by the new buildings, the *ḍarbkhāne-i ʿāmire* was completely modernized by the machines and specialists brought from England (see H. Ferid, *Naḳd ve iʿtibār-i mālī, Meskūkāt*, Istanbul 1333, 215-222). In 1259/1843 new gold and silver coins known as Medjīdī were struck (see I. Ghālib, 422-445).

India. — The earliest coins of Muslim rulers to circulate in India—disregarding the insignificant issues from the early Arab kingdom of Sind in the 1st/8th century—were the bilingual *ṭanka*s struck at Lahore by Maḥmūd of Ghaznī in 418/1027 and 419/1028; after Lahore became the residence of the Ghaznawid princes small billon coins were occasionally struck there, but nothing is known of the mints they employed. Muʿizz al-Dīn Muḥammad b. Sām struck coin at Lahore, Dihlī and

'Parashawar' (Pēshāwar) as well as at Ghaznī and, after the conquest of Kanawdj [*q.v.*] in 590/1194, there also; these coinages were assimilated in weight series as well as in design to the existing coinages of north India, and included gold money—a convenient way of using the proceeds of plunder and war booty to maintain the local currency and simultaneously proclaim the victor's success. Muḥammad b. Sām's lieutenant Yīldīz struck coin in his own and his master's joint names: small *dihlīwālas* assimilated to the local billon currency, first at Karmān, including also some gold and silver, and later in billon only at Dihlī. The outline of the Čawhān horseman was retained in the designs, frequently also the Karmān bull of Shiva, which seems to indicate that Hindū craftsmen were still employed in the production of coin. Up to the death of Muḥammad b. Sām no gold or silver money had been struck in India, with the exception of the Kanawdj gold pieces. Silver appears to have been coined first by Shams al-Dīn Iletmish: silver *tankas* of an original weight of 175 grs. His reign clearly brought a time of experimentation for his mint, for the weights and designs of his early coins are very diverse; by 632/1234-5 a stable design for the silver coinage seems to have been reached, which was taken as a model for his later gold coinage. Billon, however, remained the most frequent currency, supplemented by smaller coin in copper. The silver struck up to this time was very impure. His mints were extended to Multān and Nāgawr, and the coins of his successors continue his series from the same mints: Ghaznī is still frequent, and Parwān, a town with nearby silver mines, also appears. By the time of Sulṭāna Raḍiyya, 634-7/1236-9, the mints had been extended east to Bengal, and Lakhnawtī appears as a mint-name on silver *tankas*. Assays of the Dihlī coinages of about this time show from 990 to 996 grains of silver per 1000, while the Bengal mintings fall below this, from 989 to as low as 962. By the time of Ghiyāth al-Dīn Balban, 664-86/1265-87, the Bengal coinage had become independent of Dihlī, where a period of settled rule had allowed the mint procedure to become stabilized; Balban's reign is notable for the appearance of a regular gold coinage on the silver models.

In the reign of ʿAlāʾ al-Dīn Muḥammad Shāh, 695-715/1295-1315, the expense of the army caused him to contemplate reducing the silver *tanka* from 175 to 140 grs.; but gold *tankas* remained at the nominal 175 grs., often crudely struck, and the gold *hūns* of his southern conquests seem to have been re-struck as camp currency, with no attempt to bring them up to the standard of the northern mints: their average fineness is described in the *Āʾīn-i Akbarī*, i, 5, as 8.5 parts in 12, whereas ʿAlāʾ al-Dīn's Dihlī coinage was 10.5 parts in 12. Devagiri now appears as a mint-town, including a gold issue in 714/1314-5. ʿAlāʾ al-Dīn's successor Ḳuṭb al-Dīn Mubārak Shāh, 716-20/1316-20 struck at 'Ḳuṭbābād' (= Dihlī?) new *square* gold and silver pieces of standard weight, also square copper pieces of 66 and 33 grs.

Ghiyāth al-Dīn Tughluḳ continued the Dihlī series almost unchanged, and also struck coin on his expedition to Bengal in 724/1324; but his son, Muḥammad b. Tughluḳ, has been called a "prince of moneyers": his numismatic types are characterized by novelty of form and variety of weight as well as by perfection of execution. Gold coin was struck at Devagiri, later renamed Dawlatābād [*q.v.*], and at Sulṭānpur (= Warangal), up to the 200 grs. *dīnār*; the Dihlī coinage was much subdivided: the *tanka* was reckoned at 64 *kānīs*, and coins of 1, 2, 6, 8, 12, 16 and the full 64 *kānīs* are known. The *kānī* was further divided into 4 copper *fals*. Besides this system is a partially decimal system of 25, 50 and 100 *kānīs*: the 50-*kānī* piece, called *ʿadalī*, of 140 grs. silver, replaces the silver *tanka* as the largest silver piece of the coinage; the new *dīnār* exchanged at 8 old silver *tankas* or 10 *ʿadalīs*, a fictitious rate in terms of the relative values of gold and silver. The complete scheme of the sub-divisional currency was later conflated to mix silver and copper in arbitrary proportions to produce coins of similar size but different intrinsic values; this brought in the 'black *tanka*', containing only 16.4 grs. silver, valued at one-eighth of the old silver *tanka*. According to Abu 'l-Faḍl (*Āʾīn-i Akbarī*, i, 7, s.v. *Ḍarrāb*) the metal was cast into round ingots and cut by hand; since the black *tanka* was of the same size as the silver *tanka*, the same dies could be—and were—used for both, thus speeding and easing the work of the mint workmen. The uniform small size of the dies required less labour in the striking and resulted in increased efficiency of the mint.

In 731-2/1330-2 appeared Muḥammad b. Tughluḳ's 'forced currency', brass tokens nominally valued at one *ʿadalī*; the experiment failed owing to inadequate precautions against forgery. Tokens were turned out in thousands by local artisans, but after three years all were called in and redeemed. The whole operation thus became virtually a temporary loan from the sultan's subjects which was repaid at a swingeing rate of interest. The issues reverted to normal after this, except for some gold and silver coins of 741-3/1340-3, struck in the name of the Egyptian caliphs.

Fīrūz Shāh Tughluḳ, 752-90/1351-88, continued the 175 gr. gold *tanka*, but not its silver counterpart. Gold coin became more plentiful, thus relieving silver of its earlier responsibility, and mints concentrated on fractional issues, including small pieces in mixed silver and copper; assays of the 140 gr. pieces show 12, 18 or 24 gr. of pure silver. The later Tughluḳid sultans, and the Sharḳī sultans of Djawnpur, followed the Fīrūzian tradition with little change.

After the sack of Dihlī by Tīmūr the mints were in decline. Gold largely disappeared, thanks to Tīmūr's depredations, and the Sayyid Khiẓr Khān struck coin in the names of Fīrūz and other of his predecessors, (but not in Tīmūr's name, as Firishta asserts), using the original dies.

In the Deccan, mints were first established under the Bahmanīs [*q.v.*]; before these were set up at Aḥsanābād-Gulbarga and elsewhere, goldsmiths and dealers in bullion had been authorized to make money without reference to a royal stamp, and the currency was protected by the guild of craftsmen. Interesting among the later Deccan coinages are the silver *lārīns*, 'fish-hook' money, struck by ʿAlī II of Bīdjāpur, which became a standard Indian Ocean trading currency in the 10th/16th century (see G. P. Taylor, *On the Bijapur lārī or larin*, *JASB*, NS vi, 1910, 687-9).

The Mughals. Bābur's reign, 932-7/1526-30, was virtually a military occupation, and Humāyūn's was hardly a period of stability; this is reflected in their coinage, which seems to have been struck irregularly and to follow Central Asian patterns and a Central Asian system, probably depending on imported workmen. Both struck silver *shāhrukhīs* at Agra,

Lahore, Dihlī and Kābul, and Bābur uses Urdū, 'camp', as a mint-name; many of Humāyūn's gold coins are mintless, and his copper is anonymous.

The interrex Shīr Shāh, 945-52/1538-45, who had an intimate practical knowledge of local conditions, commenced the reform of the coinage later fully implemented by Akbar: a new 178 gr. standard for silver and 324 gr. for copper, the rupee (*rūpiya*) and *dām* respectively, with fractional divisions to correspond; the abolition of billon; and a great increase in the numbers of mints (over 25). Many silver and copper coins are without mint-name; sometimes this seems to be a result of the dies being too large for the discs.

Humāyūn in his brief second regnal period left the Sūrī system unchanged; Akbar, however, while retaining the system in principle, greatly elaborated the number of coin-types—Abu 'l-Faḍl (*Āʾīn-i Akbarī*, i, 10) enumerates over 30 without being exhaustive. (cf. Hodivala, *Studies*, iii). The *Āʾīn-i Akbarī* mentions the working of the mint in detail. in charge is the *darūghā*, assisted by the *amīn*; the *ṣayrafī* is responsible for maintaining the fineness; the *mushrif* keeps a day-book of the expenditure; merchants, weighmen, smelters and ingot-makers are other non-craftsman officials. After the ingots have been refined, melted and recast they are cut by the *ḍarrāb* and stamped by the *sikkačī* from dies cut by the engraver who holds the rank of *yūzbāshī* (*sic*; see YŪZBASHĪ). The methods of extracting and separating the metals, refining silver and gold, and testing for fineness (*banwārī*) are fully described (*Āʾīn*, i, 4-9). From the statistics of *Āʾīn*, i, 12, it is clear that any individual could bring bullion to the mint where it would be converted into coin, after refining, on the owner defraying the cost of the minting operations and paying a seignorage to the state of 5½ per cent. Abu 'l-Faḍl also specifies the depreciation in face value to be allowed for wear of the coinage: *e.g.*, for gold, the *muhr* when struck was worth 400 *dāms*, although smaller *muhr*s were current of 360 *dāms*; as long as the loss in weight were no more than three rice-grains no allowance was made, but when it had lost from four to six its value was 355 *dāms*; after losing up to a further three rice-grains it was valued at 350 *dāms*; after losing further weight it ceased to be current and was considered as bullion. As a precaution against fraud by reducing full coins to the permitted legal deficiency the emperor ordered that official weights be made in the mint, and that revenue collectors should not demand payment in any particular species of coin. Abu 'l-Faḍl enumerates four mints for gold; ten more where silver and copper were struck; and 28 more for copper only. Over the entire reign gold is known from 21 mints, silver from 45, copper from 64. For the complete coin-system, see SIKKA.

Djahāngīr's and Shāhdjahān's system was similar, except for their gigantic pieces up to 1000 *tōlā*s in weight (1 *tōlā* = 185.5 grs.) which were used as presents to distinguished persons or hoarded as bullion reserves, and the *nithār*s of about 40 grs. in gold or silver. With Awrangzīb's imposition of the *djizya* [*q.v.*] in 1090/1679 he caused the square silver *dirham sharʿī* to be struck in order to facilitate payment at the canonical rates; this was repeated in similar circumstances in 1129/1717 by Farrukhsiyar. The latter adopted the policy of farming out the mints, which led to many independent chiefs and states striking their own coin in the Mughal emperor's name; this was in fact done by the British East India company, and Shāh ʿĀlam's coinage with wreaths of roses, shamrocks and thistles, commemorating Lord Lake's entry into Dihlī in 1803, shows a very extraneous influence in the Imperial mint.

The Mughal coinage in general shows great diversity of mints—well over 200 are known—and a constant search for variation. The inscriptions could vary for each month of the year; for some years Djahāngīr struck round and square rupees in alternate months, and later varied the month names by zodiacal signs. Emblems appear on the coins from the time of Humāyūn; sometimes these appear to have marked a change of mint-masters, sometimes they were distinctive mint-marks. That the practice of the later Mughal mints was substantially the same as that recorded by Abu 'l-Faḍl is shown by the *Hidāyat al-ḳawāʾid* of 1126/1714-5 which records the current mint rules (quoted by W. Irvine, *Mint rules in* 1126 *A.H.*, in *Proc. A.S.B.*, 1898, 149-52) and prescribes a differential revenue to be exacted from Muslim and Hindū merchants: the latter when specially appointed (*mahādjanān ki muḳarrarī bāshand*) pay less than the Muslim rate of 2½ per cent, otherwise ½ per cent more.

Bibliography: Evidence for the history of the mint under the Dihlī sultanate is numismatic only; cf. E. Thomas, *The chronicles of the Pathán kings of Dehli*, London 1871; H. Nevill, *Mint towns of the Dehli Sultans*, *JASB*, NS xvii, 1921, 116-30; idem, *The currency of the Pathan Sultans*, ibid. 21-30 (corrects Thomas on many points of detail); R. (J. BURTON-PAGE)

DĀR AL-FUNŪN [see DJĀMIʿA].

DĀR FŪR, "the land of the Fūr", a province of the Republic of the Sudan, formerly a Muslim sultanate.

Geography and inhabitants.

Dār Fūr was one of the chain of Muslim states composing *bilād al-Sūdān*. Its eastern neighbour was Kordofān, from which it was separated by a tract of sand-hills. To the west lay Waddāī. The Libyan desert formed a natural boundary on the north, while the marshes of the Baḥr al-Ghazāl [*q.v.*] marked the southern limits. Dār Fūr comprises three main zones: a northern zone, the steppe fringe of the Sahara, providing grazing for camel-owning tribes but little cultivation; a central zone (14° 30′ N to 12° N) with rainfall ranging from 12″ to 25″ (in the mountains), a country of settled cultivators; a southern zone of heavy rainfall (25″-35″), inhabited by cattle-owing nomads, the Baḳḳāra [*q.v.*]. In the central zone, the massif of Djabal Marra, rising to 3024 metres, runs from north to south. The northern and southern regions of Dār Fūr are locally known as *Dār al-Rīḥ* and *Dār al-Ṣaʿīd* respectively.

The central zone is a meeting place of routes. The *Darb al-arbaʿīn* [*q.v.*] (Forty Days' route) ran from Asyūṭ through Khārdja and Salīma to Kūbayh (Cobbé, Browne), where a small mercantile town developed. Another route connected Dār Fūr with Tripoli and Cyrenaica. Kabkābiyya, lying west of Dj. Marra was the mercantile centre on the route to Waddāī

and the western *bilād al-Sūdān*. The route to Kordofān and the east was a pilgrimage road, although some pilgrims preferred the long route through Egypt. Besides such articles as ivory and ostrich feathers, Dār Fūr exported slaves, obtained from the pagan lands to the south. Many of these went by the *Darb al-arbaʿīn* to Egypt. The construction, completed in 1911, of a railway linking El Obeid (*al-Ubayyiḍ*) in Kordofān with Khartoum and Port Sudan, followed by the annexation of Dār Fūr in 1916, ended the importance of the old routes to the north. The capital was finally settled in 1206/1791 at its present site of El Fasher (al-Fās͟hir [*q.v.*]). The *fās͟hir*, or residence of the sultan, had previously varied from reign to reign, the earliest sultans ruling from Dj. Marra.

The inhabitants of Dār Fūr are of varied ethnic origins. The Fūr, (see A. C. Beaton, *The Fur*, in *Sudan notes and records*, xxix/1, 1948, 1-39), are a negroid people, originating in Dj. Marra, who succeeded in imposing their hegemony on the surrounding tribes. From the Kundjāra, one of the three tribes of the Fūr, sprang the royal Kayra clan, and also, traditionally, the Musabbaʿāt, who established a sultanate in Kordofān. According to tradition, the dominant people in the region before the Fūr was the Tundjur, and, before them, the Dādjū: elements of both still survive in Dār Fūr. Arab immigration has played an important part in the ethnic pattern. Tribal groups connected with the great irruption of the Djuhayna into the eastern *bilād al-Sūdān* in the 8th/14th century are now represented by the camel-Arabs of the northern zone and the Baḳḳāra of the south. The name of Fazāra, once commonly applied to a group of camel-Arabs, is now obsolete. Among the Baḳḳārī tribes, the Rizayḳāt and Taʿāis͟ha may be noted. Individual immigrants, coming from the arabized Nubians of the Nilotic Sudan, Barābra [*q.v.*], Danāḳla [see DANḲALĪ] and Djaʿaliyyīn [*q.v.*], have made an important contribution to the development in Dār Fūr of Islamic culture and trade. The present-day population of the province amounts to 1,328,559 (*Sudan Almanac, 1959*).

Chronology.

The chronology of the dynasty before the eighth sultan, ʿAbd al-Raḥmān al-Ras͟hīd, is uncertain. Browne believed that Sulaymān Solong reigned c. 130-150 years before his time, *i.e.*, c. 1640-60; while al-Tūnusī, who makes the foundation of Dār Fūr contemporary with that of Waddāī and Kordofān, asserts that the event occurred not more than 200 years previously, *i.e.*, c. 1640 (Tūnusī, *Ouadây*, 75). S͟huḳayr's chronology, which refers Sulaymān Solong to the mid-9th/15th century, by incorporating a block of inert names, is a late tradition and clearly fictitious. Nachtigal gives the commencement of Sulaymān Solong's reign as 1596, which seems too early.

Sultans with dates of accession.

1. Sulaymān Solong c. 1050/1640
2. Mūsā b. Sulaymān
3. Aḥmad Bakr b. Mūsā
4. Muḥammad Dawra b. Aḥmad Bakr
5. ʿUmar b. Muḥammad Dawra c. 1156/1743-4
6. Abu 'l-Ḳāsim b. Aḥmad Bakr c. 1163/1749-50
7. Muḥammad Tayrāb b. Aḥmad Bakr c. 1170/1756-7
8. ʿAbd al-Raḥmān al-Ras͟hīd b. Aḥmad Bakr 1202/1787
9. Muḥammad Faḍl b. ʿAbd al-Raḥmān 1215/1800-1
10. Muḥammad Ḥusayn b. Muḥammad Faḍl 1254/1838-9
11. Ibrāhīm b. Muḥammad Ḥusayn 1290/1873 (Annexation of Dār Fūr to the Egyptian Sudan; 1291/1874)

    Shadow-sultans of the Khedivial and Mahdist periods:
12. Ḥasab Allāh b. Muḥammad Faḍl
13. Būs͟h b. Muḥammad Faḍl
14. Hārūn b. Sayf al-Dīn b. Muḥammad Faḍl
15. ʿAbd Allāh Dūd Bandja b. Bakr b. Muḥammad Faḍl
16. Yūsuf b. Ibrāhīm
17. Abu 'l-K͟hayrāt b. Ibrāhīm

    The revived sultanate:
18. ʿAlī Dīnār b. Zakariyyā b. Muḥammad Faḍl 1316/1898 (Annexation of Dār Fūr to the Anglo-Egyptian Sudan; 1916)

Traditions of the early sultanate.

In the absence of any native chronicle, we are dependent for information on foreign observers. Of these, the most important are the Tunisian Arab, Muḥammad b. ʿUmar al-Tūnusī, whose visit of eight years began in 1218/1803; the German, Gustav Nachtigal, who was in Dār Fūr in 1894; the Austrian, Rudolf v. Slatin, governor 1881-3; and the Lebanese, Naʿūm S͟huḳayr, an intelligence official of the Condominium, whose principal informant was S͟hayk͟h al-Ṭayyib, (d. 1902), formerly *imām* to sultan Ibrāhīm.

The discrepancies in the traditional genealogies of the Kayra were noticed by al-Tūnusī, Nachtigal and S͟huḳayr. These genealogies are more or less sophisticated attempts to schematize traditions associated with folk-heroes, the chief of whom are Aḥmad al-Maʿḳūr, Dālī, and Sulaymān Solong (*i.e.*, "the Arab"). The many variants of tradition cannot be detailed here. Aḥmad al-Maʿḳūr, an Arab of Tunis, of Hilālī or ʿAbbāsid descent, is represented as the ancestor of the Tundjur rulers who preceded the Kayra, or as the link (by marriage) between Tundjur and Kayra. His son (or more remote descendant), Dālī, was the organizer and legislator of the Fūrāwī state. A descendant of Dālī, Sulaymān Solong, usually described as the son of an Arab woman, is credited with the introduction of Islam, and is the first of the historical rulers. Aḥmad al-Maʿḳūr may represent a genuine memory of Arab intermixture with the Tundjur (or Fūr) or may be a late invention to antedate the coming of the Arab element. The epithet *al-Maʿḳūr*, "the Lame" is probably the arabicization of a non-Arab name: it is explained in Slatin and S͟huḳayr by an obvious legend. Dālī (or Dalīl Baḥr) may have been an historical individual, or may embody the traditions of the Kayra rulers before the coming of Islam. Sulaymān Solong, a warrior and administrator, is Dālī's Muslim counterpart and may have absorbed traditions originally connected with him. Sulaymān was probably not the founder of the Kayra dynasty, but simply the first Muslim ruler. The claims that the royal clan was descended from the Banī Hilāl or the ʿAbbāsids are sophistications, reflecting North African and Nilotic Sudanese influences respectively. The two claims are, of course, incompatible. There is more verisimilitude in a tradition that the Kayra, together with the Musabbaʿāt and the ruling house of Waddāī, were descended from the Fazāra. This

is in harmony with the tradition that Sulaymān's conquests were achieved in alliance with the nomad Arabs.

While Sulaymān may have begun the introduction of Islam into Dār Fūr, the full islamization of the region was a slow process. The persistence of non-islamic customs into the 19th and 20th centuries is noted by all observers. The religious teachers (*faki* for *faḳīh*; *fuḳarā'* is invariably used as the plural), came mainly from the western *bilād al-Sūdān*, and from the Nilotic region, both areas where the Māliki school predominates. Little is recorded of the sultans who immediately followed Sulaymān: his second successor, Aḥmad Bakr, is remembered as the father of many sons, five of whom were sultans after him. The traditions of both Dār Fūr and Waddāī preserve the recollection of a series of wars between the two sultanates, beginning in the time of Aḥmad Bakr and continuing until Muḥammad Tayrāb, early in his reign, made peace with sultan Djawda of Waddāī. Both ʿUmar and Abu 'l-Ḳāsim are said to have been killed in these wars, in which the advantage generally lay with Waddāī.

The later sultanate.

Fuller traditions begin with the reign of Muḥammad Tayrāb, who died only 16 years before the visit of al-Tūnusī. He is represented as luxury-loving and pacific, but his reign ended in war against sultan Hāshim, the Musabbaʿāwī ruler of Kordofān. The pretext for hostilities was found in Hāshim's aggression against the eastern frontier of Dār Fūr, but al-Tūnusī suggests that Tayrāb's real motive was to secure the succession for his son, Isḥāḳ, at the expense of the surviving sons of Aḥmad Bakr. Isḥāḳ, entitled *al-khalīfa*, "the successor", was left as regent in the capital, while the sultan's brothers and ministers accompanied Tayrāb on campaign. Hāshim was expelled from Kordofān and sought refuge with the Fundj sultan of Sinnār, while the Fūrāwī army occupied his dominions. The legend that Tayrāb advanced as far as Omdurman (*Umm Durmān*) and defeated an ʿAbdallābī army is not mentioned by al-Tūnusī or Nachtigal, and is a later elaboration, probably of the Mahdist period. Tayrāb died at Bāra in Kordofān, poisoned, it is said, by his grandees.

Tayrāb's death was followed by a succession struggle between the partisans of Isḥāḳ and those of the sons of Aḥmad Bakr. The latter finally chose as their sultan the posthumous son of Aḥmad Bakr, ʿAbd al-Raḥmān al-Rashīd, a pious and scholarly youth. His election was brought about by Muḥammad Kurra, a eunuch of the late ruler, whom ʿAbd al-Raḥmān appointed as his chief minister. Kurra subsequently led another expedition into Kordofān, which he governed for some years. ʿAbd al-Raḥmān's reign witnessed the progress of both trade and religion, developments which may be ascribed to Nubian immigration into Dār Fūr at this time, in consequence of the decline of Fundj power in the Nilotic Sudan. Increased contact with the outside world, through trade with Egypt, is indicated by the exchange of presents between ʿAbd al-Raḥmān and the Ottoman sultan, by the visit of the English traveller, W. G. Browne, in 1793-6, and by the correspondence with Bonaparte in 1799 (French text in *Pièces diverses et correspondance relatives aux opérations de l'armée d'Orient en Égypte*, Paris, An IX; 187, 216-7). A Mamlūk refugee from Bonaparte was granted asylum in Dār Fūr, but was killed for plotting against the sultan.

ʿAbd al-Raḥmān's young son, Muḥammad Faḍl, was installed as sultan by Muḥammad Kurra in 1215/1800-1, but a rift grew between the ruler and his minister, and Kurra was killed in Radjab 1219/Oct.-Nov. 1804. Faḍl's long reign was a period of declining power. An expedition sent by Muḥammad ʿAlī Pasha of Egypt, under his son-in-law, the *daftardār* Muḥammad Bey Khusraw, defeated the Fūrāwī viceroy of Kordofān, the *maḳdūm* Musallim, at Bāra in 1821, and annexed the province. Revolt in the Nile valley, however, deflected the *daftardār* from the conquest of Dār Fūr. Muḥammad ʿAbd al-Karīm Ṣābūn, the sultan of Waddāī, devastated the vassal state of Dār Tāma and laid it under tribute. Faḍl assisted a brother of Ṣābūn to obtain the throne of Waddāī after his death, but failed to establish a protectorate. The Baḳḳāra, especially the Rizayḳāt, also gave much trouble.

Faḍl's successor, Muḥammad Ḥusayn, was threatened by a pretender, Muḥammad Abū Madyan, a son of sultan ʿAbd al-Raḥmān. Muḥammad ʿAlī Pasha, who claimed Dār Fūr by virtue of a *farmān* of sultan ʿAbd al-Madjīd (13 February 1841; see J. C. Hurewitz, *Diplomacy in the Near and Middle East*, New York, 1956; i, 120), supported Abū Madyan, and an expedition was prepared. The project was abandoned on the death of the ambitious *ḥükümdār* of the Egyptian Sudan, Aḥmad Pasha Abū Widān, in Ramaḍān 1259/Sept.-Oct. 1843. Relations between Ḥusayn and the viceroys Saʿīd and Ismāʿīl were friendly. In the later years of Ḥusayn's reign, his sight failed, and affairs were directed by his sister, the *iya basi* Zamzam.

His successor, sultan Ibrāhīm, soon became involved in hostilities over the Rizayḳāt with al-Zubayr Raḥma Manṣūr, the Sudanese merchant-prince who controlled the western Baḥr al-Ghazāl. Al-Zubayr invaded Dār Fūr from the south, in collusion with the *ḥükümdār* Ismāʿīl Pasha Ayyūb, who brought a force from the east. Ibrāhīm was defeated by al-Zubayr, and killed at the battle of Manawāshī on 24 Oct. 1874. Dār Fūr was annexed to the Egyptian Sudan.

The Khedivial and Mahdist Periods.

Fūr resistance, based on Dj. Marra. continued under a series of shadow-sultans. The first, Ḥasab Allāh b. Muḥammad Faḍl, surrendered to al-Zubayr, and was sent, with a large number of Fūrāwī princes and notables, to Egypt. His brother and successor, Būsh, raised an alarming revolt, but was killed by al-Zubayr's son, Sulaymān. A further revolt, in 1877, against newly imposed taxation, found a leader in Hārūn, a grandson of Muḥammad Faḍl. He besieged El Fasher, the provincial capital, but was driven back to Dj. Marra, and was killed in 1880 by al-Nūr Bey Muḥammad ʿAnḳara, subsequently a Mahdist officer. Another grandson of Muḥammad Faḍl, ʿAbd Allāh Dūd Bandja, next assumed the sultanate in Dj. Marra.

The outbreak of the Mahdist revolution in 1881 produced a critical situation in Dār Fūr, since many of the military and administrative officers were sympathizers with the Mahdi, like them a riverain Sudanese, while both the Fūr and the Rizayḳāt wished to throw off khedivial rule. After the Mahdi's capture of El Obeid and defeat of the Hicks expedition (January and November 1883), Slatin, the Austrian governor, was isolated, and he surrendered in December to Muḥammad Bey Khālid, formerly sub-governor of Dāra, whom the Mahdi had appointed as his agent in Dār Fūr.

In 1884, a Mahdist force captured Dūd Bandja, who subsequently became a Mahdist officer. After the Mahdi's death in 1885, Muḥammad Khalid concerted a plot with the Ashrāf (the Mahdi's relatives), to oust the new sovereign, the Khalīfa ʿAbd Allāh b. Muḥammad [*q.v.*]. He marched on Omdurman with considerable forces, but was intercepted and arrested at Bāra (April 1886). He had left to govern Dār Fūr a son of sultan Ibrāhīm named Yūsuf, who in 1887 revived the sultanate. A force under ʿUthmān Ādam, the governor of Kordofān, defeated and killed Yūsuf early in 1888. ʿUthmān now assumed the governorship of Dār Fūr also.

A few months later, Mahdist authority in Dār Fūr crumbled, in consequence of a revolt, originating in Dār Tāma under a messianic *faki*, Abū Djummayza. He was joined by the shadow-sultan of the Fūr, Abu 'l-Khayrāt (a brother of Yūsuf b. Ibrāhīm) with his supporters. The Mahdist forces were heavily defeated in two battles, but Abū Djummayza died of smallpox and his followers were routed outside El Fasher (February 1889). Abu 'l-Khayrāt fled to Dj. Marra, where he was killed by his slaves in 1891. ʿUthmān Ādam re-established his authority in the province, especially over the Baḳḳāra, who had supported the Mahdia against the khedivial administration, but were now resentful of Mahdist control. The Khalīfa's tribal policy, executed by ʿUthman Ādam, rested on three bases; the substitution of new nominees for the hereditary chiefs, the enforced migration (*hidjra*) of tribes to Omdurman, and the exploitation of tribal rivalries. The great migration of the Taʿāʾisha, the Khalīfa's own tribe, was set on foot by ʿUthmān Ādam in 1888, and had important consequences for the Mahdist state.

ʿUthmān Ādam died in 1891, and was succeeded as governor by Maḥmūd Aḥmad, like himself a relative of the Khalīfa. In 1894, a Belgian expedition from the Congo reached the southern fringe of the province and concluded a treaty with the chief of the Farūḳī tribe, but withdrew shortly afterwards, (see A. Abel, *Traduction de documents arabes concernant le Bahr-el-Ghazal*, in *Bull. de l'Académie royale des Sciences coloniales*, xxv/5, Brussels 1954, 1385-1409). In 1896, Maḥmūd was recalled to Omdurman, to command the forces sent against the Anglo-Egyptian invasion.

The reign of ʿAlī Dīnār and subsequent history

When the Mahdist state fell in 1898, ʿAlī Dīnār, a grandson of Muḥammad Faḍl, who had had a chequered career in the Mahdia (see *A fragment from Ali Dinar*, in *Sudan notes and records*; xxxiv/1, 1953, 114-6), seized El Fasher and installed himself as sultan. Nominally a vassal of the Condominium government in Khartoum, he long imitated with success the Khalīfa's policy of excluding Europeans from his dominions. He was challenged by a survivor of the Mahdist régime, Sanīn Ḥusayn, who had held Kabkābiyya since ʿUthmān Ādam's time and now attempted unsuccessfully to obtain the protection of the Condominium government. Sanīn was not finally defeated until 1908. Like his predecessors, ʿAlī Dīnār had difficulty in asserting his authority, on the one hand over the Baḳḳāra, on the other, over the buffer states between Dār Fūr and Waddāī. This western frontier problem became more serious with the French occupation of Waddāī in 1909. The French, while accepting Dār Fūr proper as within the British sphere of influence, wished to occupy the buffer states. Although the British, through the Condominium government, vigorously supported Fūrāwī claims, the sultan, after prolonged hostilities, succeeded only in holding Dār al-Masālīt. Finding himself pressed by the extension of French power, and exasperated by a series of local grievances against the Condominium government, ʿAlī Dīnār was sympathetic to the Ottomans in the First World War. On the pretext of forestalling an attack from Dār Fūr, the Condominium government sent a force against him. The sultan's army was defeated near El Fasher on 22 May 1916. and he himself was killed on 6 November.

The removal of ʿAlī Dīnār, was followed by a settlement of the western frontier with the French. The final compromise in 1919 allowed Dār Fūr to retain Dār Ḳimr and two-thirds of Dār al-Masālīt, part of which had been ceded by its ruler to the French in 1912. The delimitation of the boundary was completed in 1924. The pacification of Dār Fūr did not prove difficult, although there was a belated rising under a messianic *fakī* at Nyala in 1921. As a consequence of its late annexation, Dār Fūr did not share in the early phase of development of the Anglo-Egyptian Sudan: it remained an isolated and backward province until the last years of the Condominium. The opening-up of air communications from 1947, the development of schools, and the construction of a railway line through southern Kordofān to Nyala (completed in April 1959) are indicative of the fuller integration of Dār Fūr in the modern Sudan.

Administrative history.

The administrative system under the Kayra sultans was described by al-Tūnusī and, more systematically, by Nachtigal. It had few Islamic features. Almost all the titles were Fūrāwī, not Arabic; the chief exception being the sultan's personal representatives (*maḳdūm*, pl. *maḳādīm*), who were usually appointed for a term of years and exercised overriding powers in their provinces. The royal women (sing., *mayram*) held a dignified position; the queen-mother was the second person in the realm, but more real power was possessed by the *iya basi*, usually the sultan's sister. Slaves and eunuchs played an important rôle: the chief minister, who was also *ex officio* governor of the eastern province, was a eunuch. The powers of this functionary were reduced after the death of the king-maker, Muḥammad Kurra. A tradition that sultan Abu 'l-Ḳāsim was deserted in battle by his relatives because of his inclination to the blacks probably marks an increase in the military rôle of the ruler's slave-household at the expense of the free clansmen. A reorganization of the slave-army was carried out by sultan Muḥammad Ḥusayn, who equipped his troops with firearms. Besides the slave-solidiers, the forces included warriors summoned at need by the provincial authorities. Islamic influences are chiefly seen in the practices of the royal chancery and in the reception of the *Sharīʿa* according to the Mālikī school. The ancient customary law was not however disused: the "Book of Dālī", in which it was said to be codified, is probably mythical, or may be a generic term for attempts to commit custom to writing, (cf. A. J. Arkell, *The history of Darfur*: 1200-1700 *A.D.* III, in *Sudan notes and records*, xxxiii/1, 1952, 145-6).

After the conquest by al-Zubayr, the administration was assimilated, as far as circumstances

allowed, to that of other parts of the Egyptian Sudan. A governor (*mudīr ʿumūm Dār Fūr*) had his headquarters at El Fasher, while sub-governors (*mudīrs*) were stationed at El Fasher, Shakkā (to control the Rizayḳāt territory), Dāra (on the route from the south to the capital), and Kabkābiyya (on the route to Waddāī). The governors have been listed by R. L. Hill, *Rulers of the Sudan*, 1820-1885, in *Sudan notes and records*, xxxii/1, 1951, 85-95.

The Mahdist régime inherited the problems and administrative structure of its predecessor. Dār Fūr, later combined with Kordofān in the Province of the West (*ʿImālat al-Gharb*), was ruled by a military governor (*ʿāmil*—originally *amīr*—*ʿumūm Dār Fūr*), who commanded a force composed of tribal levies (*awlād al-ʿArab*) and black troops (*djihādiyya*). Many of the latter, as well as of the military and civil officials had previously served the khedivial administration. The governor was in frequent correspondence with Omdurman, but had his provincial treasury (*bayt al-māl*).

The revived sultanate under ʿAlī Dīnār reproduced many features of the Khalīfa's central administration. Essentially it was a military autocracy under which the ancient Fūrāwī offices and the system of *maḳdūms* alike became obsolete, while special deputies (*mandūb*, plur. *manādīb*) gathered the revenue and represented the sultan in the provinces. Favourites and slaves had much influence at the centre. The influence of the Mahdia can be seen in the organization of a hierarchy of *ḳāḍīs*, and in the system of taxes, which closely resembled that of the Khalīfa.

After the annexation of Dār Fūr in 1916, the province was administered by a British governor and district commissioners, who at first were army officers. Experiments in "native administration" resulted in some useful devolution, primarily of judicial functions, to local notables, but also produced an anachronistic attempt to create or revive large native authorities. This curious reversal of the policy previously followed by successive sultans and governors was too artificial to succeed generally. In the last decade of the Condominium, Dār Fūr shared in the rapid constitutional changes. Local government councils were formed and representatives were sent to the various central deliberative bodies. The coming of independence on 1 January 1956 did not affect the administrative structure, in which Sudanese officials had already filled the higher cadres, previously occupied by British. The military *coup d'état* of November 1958 did not directly affect provincial administration, but the continued existence of the local government councils is necessarily precarious. For the administration under ʿAlī Dīnār and the Condominium, see G. D. Lampen, *History of Darfur*, in *Sudan notes and records*, xxxi/2, 1950, 203-8.

DĀR AL-ḤADĪTH. I. Architecture [see SUPPLEMENT].

II. Historical development. The name *Dār al-ḥadīth* was first applied to institutions reserved for the teaching of *ḥadīths* in the sixth century of the Hidjra. The conclusion that until that time *ḥadīths* were learned through the journeys called *ṭalab al-ʿilm*, there being no special schools for the science of *ḥadīth* (cf. Goldziher, *Muh. Stud.* ii, 186), is not consonant with the results of the study of materials now available. Hence, among other matters connected with *ḥadīth*, the effects of the misunderstanding of the nature and object of the *ṭalab al-ʿilm* journeys need to be investigated (cf. F. Sezgin, *Buharî'nin kaynakları hakkında araştırmalar*, 23-36; idem, *Islam Tetkikleri Enst. dergisi* 1957, II/i, 24).

In his treatise *al-Amṣār dhawāt al-āthār* (MS Veliyeddin 463/3, 90b-93a), al-Dhahabī (d. 748/1347-8) gives us comprehensive information about the centres for hadīth-study and their distribution in different centuries throughout the Muslim world. Interest in the science of *ḥadīth* and the study of it had continued for centuries without intermission in Syria, where the first Dār al-Ḥadīth was founded, one of the centres (with an interruption of 90 years) being Jerusalem (*op. cit.*, 93b).

Until special institutions for the study of *ḥadīth* were set up, the teaching of this, as of other branches of religious learning, was carried out in the mosques. *Muḥaddiths*, unwilling that such instruction should be given to a few people only in private residences, encouraged the use of public places (cf. *e.g.*, al-Khaṭīb, *Taʾrīkh Baghdād*, ii, 33). Al-Bukhārī (d. 256/870), who as a young man came to Basra at the beginning of the 3rd/9th century, instituted *ḥadīth*-lectures in the mosque there, which were attended by thousands of students (*op. cit.*, ii, 16-17). In Cairo in the 3rd century a pupil of al-Shāfiʿī was giving *ḥadīth*-lessons in the Mosque of Ibn Ṭūlūn (*Ḥusn al-muḥāḍara*. Cairo 1299, i, 182). When later the institutions known as *dār al-ʿilm* or *madrasa* were founded, *ḥadīth*-studies were, to some extent, attracted to them from the mosques and the private houses of the teachers. Nevertheless schools reserved for the teaching of *ḥadīth* began to be opened from the 4th/10th century onwards; thus the *ḥadīth*-school set up for Abū ʿAlī al-Ḥusaynī (d. 393/1003) in Nīshāpūr had about a thousand students, and *ḥadīth*-schools were founded for Ibn al-Fūrak (d. 406/1015-6), Abu 'l-Kāsim al-Ḳushayrī (d. 465/1072-3) and Rukn al-Dīn al-Iṣfahānī (d. 418/1027) (cf. Wüstenfeld, *Imam Schafiʿi*, i, 156, ii, 229, iii, 284). In the Sunnī Dār al-ʿilm which al-Ḥākim bi-amrillāh founded at Cairo in 400/1009-10, two Mālikī professors gathered around them the experts in *fiḳh* and *ḥadīth* (al-Dhahabī, *Duwal al-Islām*, Ḥaydarābād, i, 186).

The first institution to be called specifically Dār al-Ḥadīth was founded by the Atabeg Nūr al-Dīn (d. 569/1173-4) (al-Nuʿaymī, *al-Dāris fī taʾrīkh al-madāris*, Damascus 1948, i, 99, cf. *Muh. Stud.* ii, 187). Though Nūr al-Dīn was himself Ḥanafī, he limited this school to Shāfiʿīs (Wüstenfeld, *Die Akademien der Araber und ihre Lehrer*, 69), and set over it the historian and *muḥaddith* ʿAbd Allāh b. ʿAsākir (d. 571/1175-6) (al-Nuʿaymī, *op. cit.*, i, 100). There were many *waḳf*s for this institution and the people attached to it (Abū Shāma, *Al-Rawḍatayn*, Cairo 1956, i, 23). Ibn ʿAsākir was succeeded by his son al-Ḳāsim (d. 600/1203-4) (al-Nuʿaymī, *op. cit.*, i, 100). Al-Nuʿaymī gives the names of the rectors of this *ḥadīth*-school down to Ibn Rāfiʿ (d. 718/1318). The opening of this first Dār al-Ḥadīth was followed by the establishment of numerous similar institutions to which leading historians and *muḥaddith*s were attached, mostly in Damascus and its neighbourhood (for which al-Nuʿaymī records the names of 16), but spreading immediately all over the Muslim world: thus ʿAbd al-Laṭīf al-Baghdādī (d. 629/1231-2), on going to Mosul in 585/1189, found such a dār al-ḥadīth on the ground floor of the Madrasa of Ibn Muhādjir (Ibn Abī Uṣaybiʿa, ii, 204); in 622/1225 al-Malik al-Kāmil Nāṣir al-Dīn founded in Cairo a dār al-ḥadīth inspired by the Dār al-Ḥadīth al-Nūriyya, setting over it Abu ʾl-Khaṭṭāb b. Diḥya. Maḳrīzī notes that in 806/1403-4 it had so far declined as to have as its head an ignorant young man, a mere child (*Khiṭaṭ*, Cairo 1270, ii, 375). In the time of Ibn Duḳmāḳ (d. 845/1441-2) two of the 73 *madrasas* in Cairo were dār al-ḥadīths (*Intiṣār*, Cairo 1299, 99).

After the establishment of the first *dār al-ḥadīth*s, institutions known as Dār al-Ḳurʾān wa ʾl-Ḥadīth, for the teaching of both Ḳurʾān and *ḥadīth*, made their appearance: the first institutions of this type were set up by Sayf al-Dīn al-Malik al-Nāṣirī (d. 741/1340-1) (for this and two other institutions cf. al-Nuʿaymī, *op. cit.*, i, 123-8).

The Dār al-ḥadīth, as an independent institution or as one of many departments of a *madrasa*, survived until recent centuries in the Muslim world: thus according to Mudjīr al-Dīn (d. 927/1521), of the madrasas of Jerusalem, over 40 in number, one was called Dār al-Ḳurʾān and another Dār al-Ḥadīth (Sauvaire, *Hist. de Jérus. et Hebr.*, 139). In the Ottoman period the teachers of the dār al-ḥadīth opposite the Suleymāniyye Mosque were appointed from among the most senior and renowned of all the *mudarris* (*Taʾrīkh-i Djewdet*, Ist. 1309, i, 111). In the last two or three centuries *dār al-ḥadīth*s, like *madrasas* in general, have lost their importance as centres of learning. (Fuat Sezgin)

DĀR AL-ḤARB ('the Land of War'). This conventional formula derived from the logical development of the idea of the *djihād* [*q.v.*] when it ceased to be the struggle for survival of a small community, becoming instead the basis of the "law of nations" in the Muslim State. The Ḳurʾān, in its latest texts on the holy war, IX, 38-58, 87, makes this "holy war" a major duty, a test of the sincerity of believers, to be waged against unbelievers wherever they are to be found (IX, 5). This war must be just, not oppressive, its aim being peace under the rule of Islam.

The Ḳurʾān does not as yet divide the world into territories where peace and the faith of Islam reign, (*dār al-Islām* [*q.v.*]), territories under perpetual threat of a missionary war (*dār al-ḥarb*), or, of course, territories covered by agreements and payment of tribute (*dār al-ʿahd*, *dār al-ṣulḥ* [*qq.v.*]).

The *ḥadīth*, it is true, traces back the idea of *dār al-ḥarb* to the Medina period. In any event, the classical practice of so regarding territories immediately adjoining the lands of Islam, and inviting their princes to adopt this religion under pain of invasion, is reputed to date back to the Prophet who invited Caesar and Chosroes (and the Jews) to be converted (al-Bukhārī, *Kitāb al-Djihād*, §§ 147, 148, 149, 151 and *K. al-Maghāzī*, § 416; see also al-Ḳalḳashandī, *Ṣubḥ*, Cairo 1915, 6, 15). Historically, the invitation to the people of the Yamāma is the prototype (cf. al-Balādhuri, *Futūḥ*). This traditional concept, which ended by committing the Muslim community (or State) and its princes to war, either latent or openly declared, with all its non-Muslim neighbours (the adjective denoting the latter is *ḥarbī* or, more especially, *ahl al-ḥarb*) is classical and is elaborated in the most widely read law books (*e.g.*, the definitions in the *Kitāb al-Djihād* of the *Durar al-ḥukkām fī sharḥ ghurar al-aḥkām* of Mullā Khusraw, where the *ahl al-ḥarb* are defined as those who have refused to be converted after being duly invited on the best terms, and against whom any kind of warfare is henceforth permissible in keeping with the rules of *sūra* IX). In classical times, the kings of the *dār al-ḥarb* are rebels: the emperor of Byzantium is *malik al-Ṭāghiya* (al-Ṭabarī, *Annals, passim*). Classically, the *dār al-ḥarb* includes those countries where the Muslim law is not in force, in the matter of worship and the protection of the faithful and *dhimmī*s. A territory of the *dār al-Islām*, reconquered by non-Muslims of any description, thereby becomes a territory of the *dār al-ḥarb* once again, provided that (1) the law of the unbelievers replaces that of Islam; (2) the country in question directly adjoins the *dār al-ḥarb*; (3) Muslims and their non-Muslim *dhimmī*s no longer enjoy any protection there. The first of these conditions is the most important. Some even believe that a country remains *dār al-Islām* so long as a single provision (*ḥukm*) of the Muslim law is kept in force there. The definition of the *dār al-ḥarb*, like the idea of *djihād*, has in the course of time been modified by the progressive loss of unity and strength in the Muslim State. The conception of hostility to neighbouring countries has equally been modified by the evolution of ideas in Islamic territories and is tending to be secularized. The proclamation of a holy war, at a time of international crisis and for psychological reasons, is an innovation (cf. Snouck Hurgronje, *The Holy war "made in Germany"*, New York 1915, = Verspreide Geschriften, iii, 257 ff.).

Bibliography: Majid Khadduri, *War and Peace in the law of Islam*, Baltimore 1955, 52, 53, 143, 144, 156-7, 171-4, 224-8 and bibliography; L. Gardet, *La Cité musulmane*, 95 ff. (A. Abel)

DĀR AL-ḤIKMA, "house of wisdom", used by Arab authors to denote in a general sense the academies which, before Islamic times, spread knowledge of the Greek sciences, and in a particular sense the institute founded in Cairo in 395/1005 by the Fāṭimid caliph al-Ḥākim. Since the short-lived appearance of the *Bayt al-Ḥikma* [*q.v.*] of al-Maʾmūn, several libraries had been founded in ʿIrāḳ and Persia providing not only information on traditional learning, but also an introduction to classical sciences (*ʿulūm al-awāʾil*) (see Dār al-ʿIlm).

Such establishments were very successful in Egypt under the Fāṭimids, where Shīʿī doctrines provided a favourable climate for the development of Greek sciences. The Cairo palace soon housed a large collection, and one of its librarians was the

writer al-Shābushtī (d. 388/998). The vizier of al-ʿAzīz, Yaʿḳūb b. Ḳillis (d. 380/990), organized meetings of men of letters, jurists, and theologians in his own residence, and granted them financial allowances, but this initiative was soon overshadowed by the *Dār al-ḥikma* (sometimes *dār al-ʿilm*) which al-Ḥākim housed in the north-western part of the western Palace. It contained a library and reading-room, and served as a meeting-place for traditionists, jurists, grammarians, doctors, astronomers, logicians and mathematicians. The Cairo *Dār al-ḥikma* was administered by the *Dāʿī al-duʿāt*, who invited learned men to meet there twice weekly. It was closely associated with the propagation of Shīʿī doctrine, and charged to give instruction in Ismaʿīlī doctrine, which has also been called *ḥikma* since the time of al-Muʿizz (see al-Ḳāḍī al-Nuʿmān, *K. al-Madjālis*, after Dachraoui, *Arabica*, 1960). In 435/1045 a new catalogue was prepared, and it listed at least 6500 volumes on astronomy, architecture and *falsafa*. The institute was closed at the end of the 5th/11th century by the vizier al-Afḍal, but al-Maʾmūn reopened it in 517/1123 in another building, to the south of the eastern Palace. It had already been looted in 461/1068, in the reign of al-Muntaṣir during the civil wars, and when the Fāṭimid dynasty came to an end (567/1171) the library was once more closed. Ṣalāḥ al-Dīn sold the palace treasures, including the books, but fortunately some of them were re-purchased by enlightened men such as al-Ḳāḍī al-Fāḍil.

Bibliography: Maḳrīzī, *Khiṭaṭ*, Būlāḳ ed., i, 408-9, 445, 458-60; ii, 342, 363, 481; Cairo ed., ii, 253-5, 313, 334-7; iv, 158, 192, 377; Kindī, 600, 640; al-Ḳifṭi, 440; Ibn Khallikān, Cairo ed., 1949, vi, 28; O. Pinto, *Le biblioteche degli Arabi*, Florence 1928, 16, 25, 26; Mez, *Renaissance*, 169-70; M. Canard, *Le cérémonial fatimite* . . ., in *Byzantion*, xxi (1951), 364 (D. Sourdel)

DĀR AL-ʿILM, "house of science", the name given to several libraries or scientific institutes established in eastern Islam in the 3rd/9th and 4th/10th centuries. After the disappearance of al-Maʾmūn's *Bayt al-Ḥikma* [*q.v.*], a man of letters called ʿAlī b. Yaḥyā al-Munadjdjim (d. 275/888), friend of al-Mutawakkil and, later, al-Muʿtamid, built a library at his own expense in his residence at Karkar, near Baghdād. It was called *Khizānat al-Kutub*, and was open to scholars of all countries (Yāḳūt, *Irshād*, v, 459, 467). Another writer and poet, the Shāfiʿī *faḳīh* Djaʿfar b. Muḥammad b. Ḥamdān al-Mawṣilī (d. 323/934), founded the institute named *Dār al-ʿilm* at Mosul; it was also equipped with a library open to everyone (Yāḳūt, *Irshād*, ii, 420). During the Buwayhid era further libraries were opened in other towns, and they did much to spread Shīʿī doctrines. The one in Shīrāz was founded by ʿAḍud al-Dawla, and was frequented by the geographer al-Muḳaddasī (449). Others in al-Baṣra and Rām Hormuz were founded by a certain Ibn Sawwār, and were associated with the Muʿtazilite school. The al-Rayy library (Muḳaddasī, 391, 413; Yāḳūt, *Irshād*, ii, 315; Ibn al-Djawzī, *Muntaẓam*, ix, 53) was later burnt down as a centre of heterodoxy upon the orders of Maḥmūd of Ghaznī.

But the most important establishment was the *Dār al-ʿilm* which the vizier Abū Naṣr Sābūr b. Ardashīr founded in Baghdād during the reign of Bahāʾ al-Dawla. It was housed in a building in the al-Karkh quarter, and dated from 381/991 or 383/993. It contained more than 10,000 books, some of them models of calligraphy, on all scientific subjects. It was governed by two *sharīfs* and a *ḳāḍī*, and after Sābūr's death the Shīʿī poet al-Sharīf al-Murtaḍā is thought to have taken over its administration. We also have the names of some of those who were appointed librarians, such as the grammarian Abū Aḥmād ʿAbd al-Salām, otherwise known as al-Wādjikā (d. 405/1014) (a friend of Abu ʾl-ʿAlāʾ al-Maʿarrī) and the secretary Abū Manṣūr Muḥammad b. ʿAlī (d. 418/1027). Sābūr's library was used by numerous scholars, in particular by Abu ʾl-ʿAlāʾ al-Maʿarrī during his short stay in Baghdād (399-400/1009-1010), and it also received the works of contemporary writers such as the Fāṭimid secretary Aḥmad b. ʿAlī b. Khayrān (d. 431/1039). It was finally burnt down when the Saldjūḳs reached Baghdād in 447/1055-56. The vizier ʿAmīd al-Mulk al-Kundurī was able to save only a few books from destruction.

It is thought that a Sunnī *Dār al-ʿilm* was founded at Fusṭāṭ in 400/1010 by the Fāṭimid caliph al-Ḥākim; it was governed by two Mālikī scholars, but after three years they were put to death and the library was suppressed (Ibn Taghrībirdī, ii, 64, 105-106).

Makdisi, *The Topography of eleventh century Baghdād*, in *Arabica*, vi (1959), 195-6. (D. Sourdel)

DĀR AL-ISLĀM, 'the Land of Islām' or, more simply, in Muslim authors, *dārunā*, 'our Country' is the whole territory in which the law of Islam prevails. Its unity resides in the community of the faith, the unity of the law, and the guarantees assured to members of the *umma* [*q.v.*]. The *umma*, established in consequence of the final revelation, also guarantees the faith, the persons, possessions and religious organization, albeit on a lower level, of *dhimmīs*, the followers of the creeds of Christianity and Judaism which sprang from earlier revelations, and of the Zoroastrians (*Madjūs*) [cf. DHIMMA, DJIZYA]. Until the beginnings of contemporary history Islam's oecumenical aspirations were maintained. *Ḥadīths* going back to the Prophet, *e.g.*, a *ḥadīth* on the capture of Rome (al-Bukharī, *Djihād*, § 135-139), are the source of these aspirations. In the classical doctrine, everything outside *dār al-Islām* is *dār al-ḥarb* [*q.v.*]. However, the historic example of Nadjrān (al-Balādhurī, *Futūḥ*, section *fī ṣulḥ Nadjrān*) and, at a later date, that of Nubia are proof of the permissibility of truces (*hudna*, *ṣulḥ*) concluded with the sovereigns of neighbouring territories, who preserve their internal autonomy in exchange for tribute which constitutes an external and formal recognition of the Muslim sovereign's authority (cf. DĀR AL-ʿAHD, DĀR AL-ṢULḤ).

Government in Early Islam, in *Stud. Isl.*, 4; O. Turan, *The ideal of World Domination among the Mediaeval Turks, ibid.* (A. ABEL)

DĀR AL-MAḤFŪẒĀT AL-ʿUMŪMIYYA. The Egyptian State Archives, consisting of the administrative records of the governments of Egypt from the start of the sixteenth century until the present time, and stored at the Citadel and in the Abdine Palace in Cairo. The extant archives of the Ottoman treasury and administration in Egypt from the time of its conquest by Selīm I in 922/1517 until it became autonomous under Muḥammad ʿAlī at the start of the nineteenth century are located at the Citadel (*al-Ḳalʿa*) archives, which were built by Muḥammad ʿAlī in 1242/1827 to store the materials remaining after a disasterous fire in 1235/1820. A very few late-Mamlūk documents and registers, less important nineteenth-century administrative records, and all registers of births and deaths in Egypt are also kept at the Citadel, but the bulk of the nineteenth and twentieth century Egyptian government records are kept at the Abdine Palace in Cairo.

Materials remaining from the Ottoman administration fall into two broad classifications—registers (*dafātir*) and individual documents (*awrāḳ*). There are two basic types of Ottoman administrative registers, those containing copies of orders and decrees, written in the *Dīwānī* script, and those containing financial data, written in the *Siyāḳat* script. Most of the registers of Ottoman orders and decrees stored in Egypt were destroyed in the fire of 1820, and such materials are available only in the published collections of Ferīdun and Ḥayret Efendi (see bibliography) and in the *Mühimme-i Mıṣr* registers kept in the *Başvekâlet Arşivi* [*q.v.*] in Istanbul. The materials remaining in the Citadel archives are principally financial registers and a few individual documents. In addition, the archives possess numerous private collections seized by the State upon the death of their owners. The nineteenth and twentieth-century archives kept in the Abdine Palace are far more comprehensive and complete and include copies made in recent times of materials concerning Egypt found in the principal European archives.

Registers of the deliberations of the *Dīwān* of Ottoman Egypt and of judicial archives since late Mamlūk times are found in the archives of the religious courts (*al-Maḥkama li 'l-Aḥwāl al-Shakhṣiyya*) in Cairo.

DĀR AL-MUṢANNIFĪN [see DĀR AL-ʿULŪM (d.)].

DĀR AL-NADWA, a kind of town hall in Mecca in the time of Muḥammad. The building was to the north of the Kaʿba, on the other side of the square in which the *ṭawāf* took place. It was the gathering place of the nobles (*malaʾ*). The Dār al-Nadwa is said to have been built by Ḳuṣayy [*q.v.*], who is taken to be the ancestor of the Ḳuraysh and founder of the Kaʿba. He bequeathed it to ʿAbd al-Dār and then to ʿAbd Manāf and his son Hāshim and Hāshim's descendants. "All matters of import to the Ḳuraysh" are said to have taken place there up to the coming of Islam: marriages, councils of war, advice on public matters, the clothing of marriageable girls, circumcision (*ʿadhr*) of boys, bestowing of standards of war. It—or rather, the square in front of it—is also regarded as the beginning and end of all Meccan trade caravans (Ibn Saʿd, I, i, 39). Henri Lammens, following a suggestion by Martin Hartmann, reasoned from these and other indications that the Dār al-Nadwa in the old days was not a profane but a sacred building which served for the enactment of social-religious rites (*Les sanctuaires préislamites*, 27-33; cf. G. Levi Della Vida, art. ḲUṢAIY, in *EI*¹). His proof lacks, however, sufficient basis.

To begin with, the Dār al-Nadwa remained after the rise of Islam. Muʿāwiya bought it, and subsequently it served the Umayyads and the first ʿAbbāsids as a residence during their pilgrimages. Hārūn al-Rashīd had a different building extended as a residence (the so-called Dār al-ʿImāra). After that, the Dār al-Nadwa fell more and more into decay. At the end of the 3rd/9th century, under the Caliph al-Muʿtaḍid, it was given columns, arcades and galleries, and incorporated as an annexe to the Masdjid al-Ḥarām.

DĀR AL-SAʿĀDA [see SARAY].

DĀR AL-SALĀM, "Abode of Peace", is in the first place a name of Paradise in the Ḳurʾān (vi, 127; x, 26), because, says Bayḍāwī, it is a place of security (*salāma*) from transitoriness and injury, or because God and the angels salute (*sallama*) those who enter it. Hence it was given to the city of Baghdād by al-Manṣūr, as well as Madīnat al-Salām (cf. BAGHDAD, and also the geographical lexicon of Yāḳūt, *ad init.*). For the capital of Tanganyika see DAR-ES-SALAAM.

(T. H. WEIR*)

DAR-ES-SALAAM, capital of the British administered United Nations Trusteeship Territory of Tanganyika, formerly German East Africa, lies in Lat. 6° 49′ S. and Long. 39° 16′ E. The settlement of

Mzizima (Swahili: the healthy town) was first made in the 17th century A.D. by Wabarawa, of mixed Arab-Swahili stock from Barawa, south of Mogadishu. The present name, a contraction of Bandar al-Salām ("haven of welfare") at least dates from 1862, when Sayyid Madjīd, Sultan of Zanzibar, built a palace and other buildings there, of which a few survive. So does his main street, "Barra-rasta" (Hind. *baṛā rāstā*, lit. 'big road'), now "Acacia Avenue". Its modern prosperity dates from 1888, when it became a station of the German East Africa Company, and, in 1891, the seat of the Imperial Government. In 1916, during the First World War, it was taken by the British forces, and has since been the capital of the British administration. In 1957 the population comprised 93,363 Africans, 2,545 Arabs, 4,479 Europeans, 2,460 Goans, 23,263 Indians, 1,718 Pakistanis, 11 Somali and 903 others. Probably about 85,000 Africans, 12,500 Indians and Pakistanis, the majority of Arabs and all the Somali, are Muslims.

At first a quiet, if imposing official capital, Dar-es-Salaam is now a busy commercial port. A railway bifurcating at Tabora connects it with Lakes Tanganyika and Victoria, while roads, some metalled, reach all parts of the Territory. A complete rebuilding of official buildings is in progress. The mass of the buildings are modern, and, if the African quarter retains its traditional style, as a whole the town has an occidental appearance.

As on the rest of the coast, and in many towns inland, Islam is the majority religion. Of a gross territorial population of 8½ m., there are probably 2 m. Muslims and almost as many Christians. Swahili, a Bantu language, has a vocabulary approximately 25% Arabic in origin: it is the coastal tongue from near Mogadishu to the Rovuma and the *lingua franca* far inland into the Belgian Congo. Except for a small number of Aḥmadiyya, who have published a Swahili translation of the Ḳurʾān, East African Muslims are Sunnīs of the Shāfiʿī rite. The *sharīʿa* is administered for them in Dar-es-Salaam by a Liwali, with appeal to the civil courts. Since earlier than the 1st century A.D. there has been a constant drift of Arab migration along the coast, and possibly Islam reached it in the 7th century. There were already Shāfiʿīs when Ibn Baṭṭūṭa visited the coast in 731/1331. Most of the present Arabs are from Shiḥr, but some derive from other parts of the Ḥaḍramawt and Masḳaṭ, the latter being Ibāḍīs. There are a few from the Comoros. The wealthiest inhabitants of Dar-es-Salaam are Indians, of whom probably half are Muslims. Khodjas (Ismāʿīlīs of the Nizārī branch) predominate, and their head, Āghā Khān IV, was ceremonially enthroned there in 1957. Other Shīʿīs are the Ithnā ʿAsharīs and the Bōhorās. There is a small group of Mayman, and of Sunnīs from Pakistan. There are numerous mosques. Some thirty Ḳurʾānic schools are conducted by Africans. The followers of the Āghā Khān conduct their own secular schools, one reaching secondary level, and certain charitable institutions. Apart from private lectures, there is no advanced Islamic religious instruction.

DĀR AL-SHIFĀʾ [see BĪMĀRISTĀN iii].

DĀR AL-ṢINĀʿA (also, but more rarely: *Dār al-ṣanʿa*). Etymologically, this compound can be translated "industrial establishment, workshop". In fact it is always applied to a State workshop: for example, under the Umayyads in Spain to establishments for gold and silver work intended for the sovereign, and for the manufacture and stock-piling of arms. But the sense most widely used is that of "establishment for the construction and equipment of warships": *dār ṣināʿa li-inshāʾ al-sufun*; or simply *dār al-inshāʾ*, which also occurs. This does not include the arsenals which we are to consider later, while the construction of private merchant ships is not dealt with. See BAḤRIYYA, MILĀḤA, SAFĪNA, USṬŪL.

From the Arabic compounds *dār al-ṣināʿa*, *dār al-ṣanʿa* the words for "arsenal" and "wet-dock" in the "mediterranean" languages are derived: Castilian *ataruzana, arsenal, darsena*; Catalan *darsanale, drasena*; Italian *arsenale, darsena*; Maltese *tarzna, tarznar*. It is probably from an Italian dialect that Ottoman Turkish borrowed its *tersāne* (sometimes "returkicized" as *terskhāne*, on the analogy of *topkhāne* "arsenal for artillery"); the word passed into several languages from the early Ottoman Empire: modern Greek τερσανας, Syrian Arabic *tarskhāne*, Egyptian Arabic *tarsāne* and *tarsakhāne*.

Eastern Mediterranean. It was naturally in the eastern Mediterranean that the first arsenals in the service of the Muslims operated, partly inherited from the romano-byzantine Empire. Victorious on land, the Arabs remained exposed to reprisals by sea, which they tried to prevent by making use of the experience of the indigenous populations until, before long, they themselves took the offensive. Muʿāwiya, when still only governor of Syria, was the first to organize an arsenal at Acre, in 28/649, for the Cyprus expedition; the arsenal was later transferred to Tyre, where it was combined with a fortified dock, closed at night with a chain, in which vessels took refuge. Nevertheless, al-Mutawakkil thought it expedient to restore the arsenal to Acre, and Ibn Ṭūlūn, when he was put in charge of it, had it fortified (by the grandfather of the geographer al-Muḳaddasī) on the model of the one at Tyre. It is possible that smaller establishments also existed at times at Tripoli and Lādhiḳiyya (Latakia); however, apart from the sea they were eclipsed, in the extreme north, by the riverside works at Tarsus which combined the activities of the holy war on land and sea until, as the result of a revolt, the Caliph al-Muḳtadī had its fleet burnt in 287/900 and, fifty years later, the Byzantines regained possession of it. The Crusades gave the final blow to these establishments which were probably already weakened by disorders and political divisions, and it does not seem that the Mamlūks subsequently restored them even at Beirut, which had become the chief town on the littoral.

Egypt. It was also Muʿāwiya, when Caliph, who was responsible for the reopening of the Egyptian arsenals which the autonomous rulers of Egypt were, from the 3rd/9th century onwards, to bring to their fullest and most lasting development. The first to operate were those which the Byzantines had owned, at Ḳulzum (Clysma)—later to be replaced by Suez—which, thanks to the restoration of the canal linking it with the Nile, served both the Red Sea and the Mediterranean, and at Alexandria. Other naval centres were later established at Rosetta, Damietta and Tinnīs on the mouths of the Nile, and to protect

them from Byzantine raids the ʿAbbāsids (al-Mutawakkil in particular) had them fortified and equipped with enclosed harbours like those in Syria. Numerous papyri provide evidence of requisitions of men and materials, made from the Umayyad period onward, to meet the needs of these arsenals. Nevertheless, the most secure, and consequently most highly developed, arsenal was the one established on the Nile near Fusṭāṭ (later Cairo), at first on the island of Rawḍa, in 54/674; probably damaged by Marwān II who had the ships burnt to prevent the ʿAbbāsids from pursuing him (132/750), it was reorganized during the naval struggles of the 3rd/9th century with the Byzantines by al-Mutawakkil (238/853); the island at that time was called Djazīrat al-ṣināʿa. The fortifications which it had possessed in the time of the Byzantines (under the name of Babylon), and which had fallen into disrepair since the conquest, were restored by Ibn Ṭūlūn, who also carried out the work of rebuilding the fleet. The decisive effort was however made by the Ikhshīdids in the following century, to meet the Fāṭimid threat. As it was at that time impossible to defend the arsenal from attack owing to its insular position, Ibn Ṭughdj had the island made into a garden, and gave orders for another arsenal to be set up on the river bank at Fusṭāṭ at the place then called Dār bint al-Fatḥ. It seems however that under the Fāṭimids the two arsenals operated alternately or simultaneously; the wazīr al-Maʾmūn al-Baṭāʾiḥī in 516/1122 tried to rationalize shipbuilding by making the arsenal at Misr (Fusṭāṭ), now enlarged, specialize in *shawānī* and "State vessels", and the Island arsenal in *shalandiyyāt* and *ḥarbiyyāt*. A third arsenal operated in the quarter known as al-Maḳs, north of the town, at the time of the early Fāṭimids, but we know nothing more about it; a fleet fitted out against Byzantium was burnt there in 386/996. The events of the Crusades and the troubles at the end of the dynasty proved fatal to the fleet and to the Cairo arsenals which disappeared in flames. Saladin attempted to re-establish shipbuilding at Alexandria, and in the Mamlūk period we once again hear of a fleet fitted out at the time of the Cyprus expedition; but these were sporadic efforts occurring at long intervals and, roughly speaking, although there had been sudden fluctuations in shipbuilding even earlier, it is safe to say that the Egyptian arsenals disappeared in face of the Italian domination over the Mediterranean.

The Muslims in Crete had an autonomous naval base at Khandaḳ in the 3rd-4th/9th-10th centuries.

The West. The oldest arsenals in the West were necessarily somewhat newer than those in the East, but some of them were perhaps to survive longer, and the East at times tried to make use of the West in this respect as a reserve of materials and equipment.

Ifrīḳiya. The oldest arsenal in the West was at Tunis [*q.v.*]. It was founded in about 75/694 by the governor Ḥassān b. al-Nuʿmān on the orders of the Umayyad Caliph in the East, ʿAbd al-Malik b. Marwān. A thousand Copts, together with their families, were brought from Egypt to undertake the work of building and arming a fleet intended to guard the coast of Ifrīḳiya and, in particular, to conquer Sicily.

Other maritime arsenals were recorded at Al-Mahdiyya, Sousse (= Sūsa) and Bougie (= Bidjāya).

Al-Andalus. It was only in the first quarter of the 4th/10th century that the Umayyads in Spain built arsenals. In fact they needed fleets, firstly to resist the Norman attacks, and subsequently to support their policy of intervention in North Africa against the Fāṭimids. The most important arsenal was at Almeria (= al-Mariyya). Others are recorded at Tortosa (= Ṭurṭūsha), Denia (= Dāniya), Almuñecar (= al-Munakkab), Málaga (= Mālaḳa), Gibraltar, Saltés (= Shalṭīsh), Santa Maria de Algarve (= Shantamariyya), Silves (= Shilb), Alcacer do Sal. There was, perhaps, one at Cadiz (= Ḳādis), a fief of the Banū Maymūn, whose family provided several *ḳāʾids* for the Almoravid fleets, and also in the Balearics.

Western Maghrib. The two oldest are those at Ceuta and Tangier, on the straits of Gibraltar, intended at first for merchant ships. With the advent of the three great Berber-Moroccan dynasties, the Almoravids, Almohads and Marinids, these arsenals became military establishments. They supplied warships and transport vessels, making it possible to keep command of the straits and to allow the passage of armies sent to defend Muslim Spain.

The other principal arsenals known in the Middle Ages were at Algiers (this was to be particularly developed later, after the Ottoman occupation), Oran, Hunayn, Bādis, al-Maʿmūra (now al-Mahdiyya at the mouth of the Subū), Salé and Anfā (now Casablanca).

Sicily. We cannot say if the Muslims established arsenals in the places they occupied on the island or the Italian mainland in the 3rd/9th and 4th/10th centuries. It is probable that there were some in Sicily, at Palermo and Messina.

Indian Ocean and neighbouring seas. In general, the Indian Ocean with its Muslim branches the Red Sea and the Persian Gulf were peaceful areas compared with the Mediterranean; many pirates were to be found there, but no hostile naval power. Police forces consequently proved sufficient, and it is probable that merchant ships, built as we know without nails, were often used by them; there seems to have been no true arsenal of the Mediterranean type. However, apart from Ḳulzum which has already been referred to, it is certain that the Fāṭimids maintained a fleet with ʿAydhāb as its base, to safeguard pilgrims and merchants in the Red Sea on their way to the Yemen. There is little doubt that shipbuilding was carried out in the large eastern commercial ports: Aden, at an earlier period Basra (or rather its outer harbour and precursor Ubulla), Sīrāf, later replaced by Kīsh, Ṣuhār then Mascat in ʿUmān, and perhaps also in Muslim towns on the coast of west India and east Africa; apart from Ubulla, it is difficult to be certain of their status and political character, and even there the dockyards were not able to remain in operation after the 5th/11th century when the maritime activity of Baṣra and Sīrāf began to decline considerably.

The Timber-Supply. The arsenals were naturally set up either within a short distance of districts producing timber for shipbuilding (pine and cedar, oak, acacia *labakh* or *sanṭ* in Egypt, sycamore and to some extent palm and fig) or else in a favourable situation for importing it from Italian, Indian (teak, coconut palm) and East African merchants, not to mention the raiders of the Anatolian coasts. Of the various causes of the decline in ship-building after the 5th/11th century, one may be the increasing shortage of timber.

(G. S. COLIN and CL. CAHEN)

DAR AL-ṢULḤ 'the House of Truce', territories not conquered by Muslim troops but by buying peace by the giving of tribute, the payment of which guarantees a truce or armistice (*hudna*, *ṣulḥ*). The two historic examples of such a situation, which were evidently the starting-point for the whole theory, are Nadjrān and Nubia. Muḥammad himself concluded a treaty with the Christian population of Nadjrān, guaranteeing their security and imposing on them certain obligations which were later looked on as *kharādj* [*q.v.*] by some, and as *djizya* [*q.v.*] by others (for the whole question see Balādhurī, *Futūḥ*, 63 ff.; Sprenger, *Leben Mohammads*, 3, 502 ff.; M. Hamidullah, *Documents sur la diplomatie musulmane*, 78 ff., *Corpus*, no. 79 ff.). In the course of events this protectorate proved to be of no use to the inhabitants of Nadjrān on account of their geographical situation. For Nubia it was somewhat different. Thanks to their skill in archery the Nubians were able for centuries to defend themselves against Muslim attack and to preserve their independence. As a result, ʿAbd Allāh b. Saʿd in 31/652 concluded a treaty (*ʿahd*) with them imposing not a poll-tax (*djizya*) but merely a certain tribute in slaves (*baḳt* [*q.v.*]). On the other hand, some were not prepared to admit that, besides the *Dār al-Islām* and *Dār al-ḥarb*, [*qq.v.*], there existed a third category of territories excluded from Muslim conquest, and they held that in this instance it was in reality a question, not of a *ṣulḥ* or *ʿahd*, but merely of an armed truce (*hudna*) and the implementation of reciprocal undertakings (see Balādhurī, *Futūḥ*, 236 ff.; al-Maḳrīzī, *Khiṭaṭ*, ed. Wiet, iii, 290 f.; Ibn ʿAbd al-Ḥakam, *Futūḥ Miṣr*, ed. Torrey, 189). This somewhat vague theory also provided a basis upon which it seemed possible to establish contractual relations with Christian countries; presents sent by the latter were consequently looked on as a *kharādj*. The legal theory was expounded as follows by al-Māwardī. All the territories more or less directly under Muslim control can be divided into three categories; (1) those which have been conquered by force of arms; (2) those which have been occupied without battle after the flight of their rulers; (3) those which have been acquired by treaty, this third category including two instances which depend on whether the property (a) becomes common property (*waḳf*) of the Muslim community, or whether (b) it remains in the hands of the former proprietors; in the first instance the former proprietors can in fact remain on their land and become *dhimmīs*; they pay *kharādj* and *djizya* and their country becomes *Dār al-Islām*; in the second instance, the proprietors of the land keep their estates by contract and from their revenues pay a *kharādj* which is considered as a *djizya*, and collected until they are converted to Islam; their territory is considered neither as *Dār al-Islām* nor *Dār al-ḥarb* but as *Dār al-ṣulḥ* or *Dār al-ʿahd* [*q.v.*], and their estates can always be alienated or mortgaged without restriction; if the property is transferred to a Muslim, the land is no longer liable for *kharādj*; this state of affairs will continue so long as the proprietors observe the clauses of the treaty, and the *djizya* for which they are liable cannot be increased since they are not in the *Dār al-Islām*. However, according to Abu Ḥanīfa, if their territory became *Dār al-Islām* they would then be *dhimmīs* and subject to *djizya*. As regards the situation created by a rupture of the treaty, the various schools are not in agreement. According to al-Shāfiʿi, the country, if it is then conquered, belongs to the first category, that is to say, territories acquired by force; and if it is not conquered, it becomes *Dār al-ḥarb*. According to Abu Ḥanīfa, the the land becomes *Dār al-Islām* if there are Muslims there or if it is separated from the *Dār al-ḥarb* by Muslim territory, and its non-Muslim inhabitants are themselves considered as rebels (*bughāt*); if neither of these conditions applies, the land becomes *Dār al-ḥarb*. Others, on the contrary, claimed that in both cases it becomes *Dār al-ḥarb* (see *al-Aḥkām al-sulṭāniyya*, Cairo 1298, 131 ff.). It is evident that the position was irregular and ambiguous. Al-Māwardī himself (150 and 164) includes this *Dār al-ṣulḥ* in his enumeration of Muslim territories (*bilād al-Islām*) and al-Balādhurī does not observe this distinction when discussing *kharādj*.

In the period immediately following the Crusades numerous treaties, the details of which we possess, were concluded with Christian princes or princelings (treaties with the king of Armenia, the princess of Tyre, the Templars of Anṭarṭūs, etc.; cf. al-Maḳrīzī, *Histoire des Sultans Mameluks*, trans. Quatremère, ii, 201 ff., 206 ff., 218 ff.). For details and forms, and the traditional justifications of truce agreements concluded between Muslim sovereigns and non-Muslim princes, see al-Ḳalḳashandī, *Ṣubḥ*, xiii, 321 ff.; xiv, 7 ff.

(D. B. MACDONALD-[A. ABEL])

DĀR AL-TAḲRĪB [see IKHTILĀF].

DĀR AL-ṬIBĀʿA [see MAṬBAʿA].

DĀR AL-ṬIRĀZ [see ṬIRĀZ].

DĀR AL-ʿULŪM or the "House of Sciences", (a) an establishment for higher instruction founded in 1872 by ʿAlī Pasha Mubārak [*q.v.*]. Its aim was to introduce a certain number of students of al-Azhar [*q.v.*] to modern branches of learning by means

of a five year course, in order to fit them for teaching in the new schools. In fact, as other centres were created in Cairo for the teaching of science, its curriculum was remodelled a number of times and the exact sciences were relegated to the background. The length of the course was reduced to four years. Attached as a Faculty since 1946 to the University of Cairo (formerly Fuʾād), Dār al-ʿUlūm endeavours to be at the same time Arabic and Islamic, and is proud to be the great Muslim Teachers' Training College of Egypt, influential through the teachers and inspectors who have been trained there. The students are divided into sections: four for Arabic language and three for Islamic studies. The diploma given on completion of the course is equivalent to a Bachelor's degree, and can be followed by a Master's degree or a Doctorate. Since 1951-2, apart from the students of al-Azhar, men who have passed the government secondary schools' 'Baccalauréat' (*tawdjīh*) have been admitted, and since 1953-4, a certain number of women students. Formerly, as at al-Azhar, the teaching was free and a modest sum was given to the students monthly, but now teaching fees are charged, with special concessions for those who undertake to become teachers. In 1957-8, there were 1,715 students as well as some scholarship holders completing their education in European universities.

(b) the religious institution at Deoband [*q.v.*].

(c) Farangī Maḥall. In a house known as the Farangī Maḥall in Lucknow, granted by Awrangzīb to his family as compensation for loss of property on the murder of his father in 1103/1691, Niẓām al-Dīn started two years later a *madrasa* which came to be known as Dār al-ʿUlūm Farangī Maḥall. Mullā Niẓām al-Dīn's fame rests mainly on the introduction of a syllabus of religious instruction called *dars-i Niẓāmiyya*, an improvement on the syllabus said to have been originally drawn up by Fatḥ Allāh al-Shīrāzī, a well-known scholar of Akbar's court. Much stress is laid in this syllabus on the rules of Arabic grammar, logic, and philosophy, while practically no attention is given to modern disciplines. There has more recently been a persistent demand for a change in the curriculum, so far unsuccessfully.

With the establishment of the Dār al-ʿUlūm at Deoband the Farangī Maḥall institution lost the pre-eminence it had enjoyed since the time of Awrangzīb, and has now receded into the background; in recent times it has been politically active: in the early 1920s the *ʿulamāʾ* of the Farangī Maḥall championed the cause of the Ottoman Khilāfa, and played a prominent rôle during Muslim League agitation in the late 1930s for the creation of Pākistān.

M. Ikrām, *Rūd-i Kawthar*, Karachi n.d., 582-92; ʿInāyat Allāh, *Tadhkira-i ʿUlamāʾ-i Farangī Maḥall* (not available to me); Shiblī Nuʿmānī, *Maḳālat-i Shiblī*, iii, Aʿẓamgaṙh 1351/1932, 102-5; ʿAbd al-ʿĀlāʾ, *Risāla Ḳuṭbiyya* (ms.); Walī Allāh Farangī Maḥallī, *ʿUmdat al-Wasāʾil* (ms.); Raḍī al-Dīn Maḥmūd Anṣārī, *Aghṣān al-Ansāb* (ms.).

(d) The Nadwat al-ʿUlamāʾ, Lucknow, was founded in 1312/1894 by a band of progressive *ʿulamāʾ* who nominated Mawlawī Sayyid Muḥammad ʿAlī Kānpūrī as the first *nāẓim*, with the declared object of reforming the current system of religious education and effecting a rapprochement between the various factions of the *ʿulamāʾ* by the establishment of an Islamic *dār al-ʿulūm* which would not only provide education in both religious and temporal sciences but would also offer technical training. In 1316/1898 the primary classes were started, and a year later the great library was founded, round which later grew up the Dār al-Muṣannifīn, also known as the Shiblī Academy, an institute of Islamic research with the monthly *Maʿārif* as its organ. In 1322/1904 Shiblī Nuʿmānī [*q.v.*] joined the Nadwat al-ʿUlamāʾ as its secretary, and in 1326/1908 the present buildings were opened. Its periodical *al-Nadwa* appeared first in 1322/1904 under Shiblī's editorship. Under Shiblī's guidance the Nadwa became the first institution in India to adopt modern methods of critical research; it was, however, a synthesis of the Deoband and ʿAlīgaṙh ideologies, and failed to imbibe either the spirit of orthodoxy characteristic of Deoband or the purely rationalistic attitude of ʿAlīgaṙh. Its foremost scholar was Sayyid Sulaymān Nadwī, whose completion of the Urdū biography of the Prophet, started by Shiblī, is a blending of the seemingly divergent views of East and West in the field of historical research. The Nadwa, however, was not successful in the religious sphere; its leaders were not orthodox, and could not instil into their students the spirit of classical Islam. The result was that the Nadwa came to be known merely as an educational institution with Arabic as the medium of instruction, and its reputation as a seat of learning and Islamic research is now on the decline.

BAZMEE ANSARI)

DĀRĀ, DĀRĀB, Persian forms (adopted by Arab writers) of the name of the Achaemenian king familiarly known under the hellenized form *Dareios* (Darius). Dārāb, and its abbreviation Dārā, are directly derived from the ancient Persian Darayahvahav- (Bartholomae, *Altiranisches Wörterbuch*, 738; the different grammatical cases attested by Persian inscriptions, in Tolman, *Ancient Persian Lexicon and Texts*, 1908, s.v. *darayavau*; for the ancient historians of these kings, *Gr. I. Ph.*, ii, index, s.v. Dareios).

The sources of information about these princes collected by Arab and Persian writers are legendary rather than historical (cf. preface by J. Mohl, *Livre des Rois*, 12mo ed., v, 1877). The Persian poet Firdawsī (*op. cit.*, v), of later date than the Arab historians, was inspired by their accounts particularly in regard to the reign of Alexander (Iskandar), but he combined them with elements from Persian legends. His account, even when stripped of poetic elaborations, is fuller than those of the Arab historians, even the earliest in date, al-Ṭabarī. A short summary follows (Dārāb and Dārā are Darius II and Darius III respectively).

Goshtāsp (Vishtāspa, the Greek Hystaspe), king of Persia, named as his successor his grandson Bah-

man, son of Isfandyār (Vahman, derived from the Avestan Vohū Manah, "Good Thought"), in whom we recognize Artaxerxes (Artak͟hs͟hatra) Longhand. In accordance with the *k͟hetuk-das* (*kvaetvadaθa*) practice, Bahman married his own daughter Homāy ("who appears to represent in popular legend Parysatis", historically the wife of Darius II, to quote J. Mohl); Bahman got her with child; before his death, he declared her to be queen of Persia, and named as his successor the child whom she was to bear. From the time of its birth, the mother entrusted her child to a nurse who reared it secretly; when it was eight months old, the queen placed it in a box filled with treasure and committed it to the waters of the Euphrates; two spies set by the queen to keep watch brought her news that a washerman had rescued the baby. He and his wife, having lost their son, adopted the child and named it Dārāb (Persian: *dar āb*, "in the water", popular etymology); he grew up and questioned his parentage. A war broke out; he took part in it, came to the notice of the queen, then won great renown; the Persian commander-in-chief spoke to the queen of him and led her to recognize a jewel which she had fastened on her infant's arm. On Dārāb's return she had him proclaimed king. He founded Dārābgird, defeated first the Arabs and then king Faylaḳūs (Philip of Macedon); he compelled him to pay tribute and married his daughter. He was however repelled by her foul breath and sent her back, pregnant, to her father. She gave birth to a son whom she named Iskandar, after the plant *iskandar* (*iskandarus*, gr. σκόροδον) which had cured her complaint. Philip had Iskandar recognized as his own son. Dārāb for his part had had by another wife a son named Dārā. Then the two young princes becames kings. Iskandar, refusing to give Dārā the requisite tribute, conquered Egypt and invaded Persia which he hoped to take over from his half-brother; disguised as an ambassador he came to Dārā's camp and was received with great pomp; he was, however, recognized, took to flight and succeeded in escaping, subsequently inflicting four defeats on Dārā. Dārā was assassinated by his ministers who informed Iskandar; horrified by the news, the latter hurried to his half-brother whom he found on his death-bed. Dārā spoke with nobility of God's almighty power, and asked Iskandar to marry his daughter Rus͟hanak (Roxane) and to treat the Persians well. Iskandar who became king of Persia made further conquests. (The *Deeds of Alexander*, *Iskandar-nāma*, written by the Persian poets Niẓāmī, Amīr K͟husraw, D͟jāmī, only describe Dārā's defeat, with further moralizing upon the fickleness of fortune.

Accounts given by the Arab historians differ only in certain details from that of Firdawsī. In the Chronicle by al-Ṭabarī (Persian version, trans. Zotenberg, i, 508 ff.), the infant Dārāb was saved from the water by a miller; Homāy, when told of this, entrusted her son to him with the words (in Persian): *dar* ("look after him!"), whence the name Dārā (another popular etymology); "it is also said that he was called Dārāb because he had been found *in the water*" (*dar āb*); Homāy voluntarily told her son the secret of his birth when he reached his twentieth year; on Iskandar's refusal to give tribute, Dārā had a symbolical message sent to him (racket, ball, sack of sesame) very similar to that sent by the Scythians to Darius I (Herodotus, iv, 131-33; and cf. E. Doblhofer, *Le déchiffrement des écritures*, French trans. 1959, 24); as a result of Dārā's injustice and wickedness, his soldiers deserted and his two chamberlains murdered him with the complicity of Iskandar who was hypocrite enough to be present at Dārā's death-bed and then to punish his assassins. Ḥamza of Ispahan is very brief (*Annals*, ed.-trans. Gottwaldt, 28-9), as is al-Masʿūdī (*Murūd͟j*, ii, 127) who gives the same name (Dārā) to both Darius II and III. In al-T͟haʿālibī's *History of the kings of the Persians* (ed. and trans. Zotenberg, 393 ff.), there is the same fanciful derivation of the name Dārāb, an account practically identical with al-Ṭabarī's, also insisting on Dārā's wickedness and Iskandar's duplicity. The same account appears in al-Maḳdisī's *Book of the Creation* (ed. and trans. Cl. Huart, iii, 154-9), with the exception that Iskandar, after refusing to pay tribute, thought better of it and sent it with an apology: Dārā gave him his daughter's hand.

Just as the Pseudo-Callisthenes had made Alexander heir to the kings of Egypt, so the legendary history of Persia made Iskandar a half-brother of Darius III with whom he disputed the throne (possibly a confused allusion to Cyrus the Younger's revolt against his brother Artaxerxes II in 401).

Dārā (or Daras-Anastasiopolis) is a fortress situated between Mardīn and Naṣībīn, captured from the Greeks by Chosroes I during the campaign in 540 (Nöldeke, *Gesch. der Perser ... zur Zeit der Sasaniden*, 239, and A. Christensen, *L'Iran sous les Sassanides*², 372 and 445).

Bibliography: In addition to the references given in the article: Firdawsī, *S͟hāhnāma*, ed.-trans. J. Mohl, in fol., v and trans. in 12, v; ed. Teheran 1934-35 (pub. Beroukhim), vi; Ṭabarī, index. (B. CARRA DE VAUX-[H. MASSÉ])

DARʿA [see ADHRIʿĀT].

DARʿA. This is the name both of a river of south Morocco which rises on the southern slope of the High Atlas and flows into the Atlantic south of the D͟jebel Bānī, and of a Moroccan province which stretches along the two cultivated banks of this water-course from Agdz as far as the elbow of the river Darʿa, for a distance of about 120 miles in a generally north-west to south-east direction.

This province is traditionally divided into eight districts corresponding with the wider parts of the valley which are separated by mountain barriers forming narrows. From north to south these are: Mazgīta, Ayt Saddrāt, Ayt Zarrī, Tinzūlīn, Tarnāta, Fazwāta, Ktāwa and Mḥammid.

It is populated by generally Berber-speaking tribes and by coloured people who can be divided into *ʿabīd*, slaves imported from the Sahara and negro countries, and *ḥarāṭīn*, who have a dark skin but whose features are not negroid, and who are thought to be the most ancient occupants of the region. Jews, apparently of Berber origin, complete the sedentary population of more than 100,000. At least up to the submission of Darʿa to the French Protectorate in 1932, the sedentary population lived in subjection to the sometimes Arab, but mainly Berber, nomad tribes of the surrounding mountains.

Darʿa has been inhabited from a very early date and must certainly have had an eventful history since it is a productive region in the midst of areas which are almost desert. Traditions lead us to believe that the Jews played an important part politically up to the 10th century and that Islam was brought there by a descendant of the founder of Fez in the first half of the 3rd/9th century. Later, at the end of the 4th/10th century, Darʿa came under the domination of the Mag͟hrāwa (belonging to the Zenāta) who had settled in Sid͟jilmāsa.

With the Almoravids, Darʿa really enters on to the historical scene, for it served as an advance post for their penetration into Atlantic Morocco, as is witnessed by the ruins of a fortress which dominates Zagora. From the second half of the 5th/11th century on, Darʿa was part of the Moroccan empire created by the Almoravids, then by the Almohads and the Marīnids. The Maʿḳil Arabs infiltrated there towards the end of the 7th/13th century and exercised a dominating influence.

In the 10th/16th century, this province was the cradle of the first Sharīfian dynasty of the Saʿdīs [*q.v.*] and was the place from which the sultan Aḥmad al-Manṣūr started on his expedition to the Sudan (1591). This shows, in a very striking manner, the role of Darʿa as a point of contact between Morocco and the Sahara. Thanks to the trade with Gao and Timbuctoo at the beginning of the 11th/17th century, this region enjoyed a brief period of prosperity.

Held more or less by the ʿAlawī sultans, Darʿa was the centre of an important religious brotherhood, the Nāṣiriyyīn, which spread widely at the beginning of the 11th/17th century around the *zāwiya* of Tamgrūt. It was practically independant when Ch. de Foucauld crossed it in April 1884; its history then was essentially one of tribal and clan rivalries. The region was occupied by French troops between 1930 and 1932, almost without any fighting.

To-day, this overpopulated and poor region provides Casablanca and various other towns with a considerable number of workers, for its almost stagnant agriculture is very far from being able to support its growing population. This emigration is usually a temporary one, linked with the vicissitudes of its climate and agriculture (*Naissance du prolétariat marocain*, Paris, n.d., 67-9).

(R. Le Tourneau)

DĀRĀ SHUKŌH, eldest son of Shāh Djahān and Mumtāz Maḥall, was born near Adjmēr on 19 Ṣafar 1024/20 March 1615. He received his first *manṣab* [*q.v.*] of 12,000 *dhāt*/6000 *sawār* in 1042/1633, as also the *djāgīr* of Ḥiṣār-Fīrūza, regarded as the appendage of the heir-apparent. The same year he was given the nominal command of an army despatched to defend Ḳandahār which was threatened by the Persians, and again in 1052/1642 when the threat was renewed. The attack, however, did not materialize. In 1055/1645, he was given the governorship of the *ṣūba* of Ilāhābād to which were added the *ṣūba*s of Lahore in 1057/1647, and Gudjarāt in 1059/1649. Though he took some interest in Lahore and constructed a number of buildings and market-places, he left the other *ṣūba*s to be governed by deputies, himself remaining at the court. By 1058/1648, he had attained the *manṣab* of 30,000/20,000 (which incidentally was the highest rank attained by Shāh Djahān before his accession).

Following the failure of two attempts to recover Ḳandahār from the Persians (who had captured it in 1059/1649), Dārā was deputed to lead a third expedition for its recapture in 1062/1652. Although the siege was vigorously pressed, and forts in Zamīndāwar taken, Ḳandahār itself defied capture. The failure of the campaign, due partly to a division in Dārā's camp as also his lack of experience, adversely effected his prestige as a political and military leader.

On his return, Shāh Djahān associated him more closely than ever with the affairs of the state, bestowing upon him unprecedented honours, and the rank of 60,000/40,000 (1067/1657). It seems that Shāh Djahān, having clearly marked out Dārā as his successor, wanted to avoid a struggle for the throne on his death, a position which his younger sons were not prepared to accept. In 1067/1657, when Shāh Djahān fell ill, his younger sons, fearing that Dārā might use the opportunity to seize power, advanced towards Āgra on a plea of meeting the Emperor, thereby precipitating a war of succession (see Awrangzīb). Awrangzīb and Murād raised the slogan of Dārā being a heretic (*mulḥid*) and the orthodox faith being in danger from his constant association with Hindū *yōgīs* and *sanyāsīs*. However, the slogan of religion does not seem to have influenced significantly the actual alignment of the nobles. Dārā was defeated, first at the battle of Sāmūgaṛh near Āgra (7 Ramaḍān 1068/8 June 1658), and then at Deorāʾī near Adjmēr (28 Djumādā II 1069/23 March 1659). Shortly afterwards he was captured by an Afghān noble, Malik Djīwan, with whom he had taken shelter. He was brought to Dihlī and executed (22 Dhu 'l-Ḥidjdja 1069/10 Sept. 1659), a formal charge of heresy being laid against him. Dārā's elder son, Sulaymān Shukōh, soon followed him to the grave, a younger son, Sipihr Shukōh, being imprisoned at Gwāliyār.

Although Dārā had an undistinguished political and military career, he was one of the most remarkable figures of his age. A keen student of ṣūfism and of *tawḥīd*, he came into close contact with leading Muslim and Hindū mystics, notably Miyān Mīr (d. 1045/1635) and Mullā Shāh (d. 1071/1661) of the Ḳādirī order (becoming a disciple of the latter in 1050/1640), Shāh Muḥibb Allāh Ilāhābādī, Shāh Dilrubā, Sarmad the famous heterodox monist, and Bāhā Lāl Dās Bayrāgī, a follower of Kabīr. A number of contemporary paintings showing Dārā in the company of ṣūfīs and *sanyāsīs* have been preserved.

Dārā was a prolific writer. His works include: *Safīnat al-awliyāʾ* (1050/1640) and *Sakīnat al-awliyāʾ* (1052/1642), dealing with the lives of *ṣūfī* saints, the latter with those of the Ḳādirī order; *Risāla-i Ḥaḳḳ numā* (1056/1646) and the rather rare *Ṭarīḳat-i ḥaḳīḳat*, both based on well known *ṣūfī* works; his *Dīwān*, also known as *Iksīr-i aʿẓam*, recently brought to light, containing verses and quatrains in a pantheistic strain; *Hasanāt al-ʿārifīn* (1062/1652) containing the aphorisms of *ṣūfī* saints belonging to

various orders; *Mukālama-i Bābā Lāl wa Dārā Shukōh*, a record of his discussions with Bābā Lāl in 1063/1653; *Majmaʿ al-baḥrayn*, (1065/1655), perhaps his most remarkable work, being a comparative study of the technical terms used in *Vedānta* and Ṣūfism; and the *Sirr-i akbar* (1067/1657), his most ambitious work, being a translation of fifty-two principal Upanishads which Dārā claims to have completed in six months with the aid of learned pandits and *sanyāsīs*. In addition to this, with Dārā's patronage and support, fresh translations into Persian were made of a number of Hindū religious works such as *Yōga-Vashishta*, the *Gītā* and the mystic drama *Prabōdha-Čandrōdaya*. Dārā was also a good calligraphist, and patronized the arts: an album (*Murakkaʿ*) of calligraphic specimens and Mughal miniatures was presented by him to his wife Nādira Begam (d. of Parwīz) in 1051/1641-42 with a preface written by him.

In some of his later writings, Dārā shows considerable acquaintance with Hindū philosophy and mythology. He was attracted by a number of ideas which have obvious parallels in Hindū philosophy, such as the triune aspect of God, the descent of spirit into matter, cycles of creation and destruction, etc. However, he was opposed to the practice of physical austerities advocated by the exponents of *yōga* and favoured by many *ṣūfīs*, arguing that God desired not to inflict punishment but that He should be approached with love. Like a number of eminent Muslim thinkers (cf. Mīr ʿAbd al-Wāḥid, *Ḥaḳāʾiḳ-i Hindī*, 1566) Dārā came to the conclusion that there were no differences except purely verbal in the way in which Vedānta and Islam sought to comprehend the Truth. Dārā's translation of the Upanishads which he regarded as "the fountain-head of the ocean of Unity", was a significant contribution in the attempt to arrive at a cultural synthesis between the followers of the two chief faiths in the country, being the first attempt to comprehend and to make available to the educated Muslims these fundamental scriptures of the Hindūs.

It may be doubted if Dārā's interest in gnosticism was motivated by political considerations. From an early age, Dārā felt that he belonged to the circle of the select who were marked out for the attainment of divine knowledge. Though some sections of orthodox opinion had accused him of heresy and apostasy as early as 1062/1652, it does not seem that Dārā ever gave up his belief in the essential tenets of Islam, affirming them at more than one place. Nor does the undoubted pantheistic strain in his writings go beyond what had been considered permissible for *ṣūfīs*. The opposition of these orthodox elements to Dārā stemmed from a deeper conviction, viz., that emphasis on the essential truth of all religions would in the long run weaken the position of Islam as the state religion, and effect their privileges. It was thus closely related to Dārā's position as an aspirant for the throne.

Dārā occupies a pre-eminent place among those who stood for the concept of universal toleration and who desired that the state should be based on the support of both Muslims and Hindūs, and remain essentially above religion. His defeat in the war of succession did not, by any means, imply the defeat of the trend he represented.

(SATISH CHANDRA)

DĀRĀBDJIRD (modern Dārāb), a town in the province of Fārs in the district of Fasā, situated 280 kilometres east of Shīrāz at an altitude of 1188 metres and with a population of 6,400 people (1950). In Iranian legend the foundation of this town is ascribed to Dārāb, father of Dārā (Darius III Codomannus). The Sāsānīd ruler Ardashīr rose to power by revolt from his post as military commander at Dārābdjird. The stone-strewn remains of the Sāsānid town lie 8 kilometres south-west of the modern village. The outline of the fortification walls exist as does the debris of a fire temple, located at the centre of the site. Six kilometres south-east of the modern village is a Sāsānid rock-cut relief known as the Naksh-i Rustam or as the Naksh-i Shāpūr. In the immediate vicinity is a spacious cruciform hall hewn into a rocky hillside, known as the Masdjid-i Sangī. Although it bears inscriptions dated 652/1254 and the title of the Sulṭān Abū Bakr, the hall is probably of the approximate period of the rock-cut relief.

DARABUKKA, a vase-shaped drum, the wider aperture being covered by a membrane, with the lower aperture open. The body is usually of painted or incised earthenware, but carved and inlaid wood, as well as engraved metal are also used. In performance it is carried under the arm horizontally and played with the fingers. The name has regional variants: *darābukka* (or *ḍarābukka*), *dirbakki* and *darbūka*. Dozy and Brockelmann derive the word from the Syriac *ardabkā*, but the Persian *dunbak* is the more likely, although the lexicographers mistakenly dub the latter a bagpipe. The name *darabukka*, and its variants, is quite modern although a دربلة (a copyist's error for دربكة is mentioned in the *Alf layla wa layla*. The type is to be found in ancient Egypt. The *dirrīdj* is mentioned by Al-Mufaḍḍal b. Salama (d. 319/930) although he wrongly thought that it was a kind of *ṭunbūr*, as do many Arabic lexicographers, but we know that it was a drum from Al-Maydānī (d. 518/1124). Ibn Mukarram (d. 710/1311) says that the correct vocalization is *durraydj*, and that form—with variants—is to be found in the Maghrib. The كريج and كربج found in Al-Makkarī, are doubtless misreadings of دريج. Al-Shakundī (d. 628/1231) uses the Berber name *agwāl* for this drum, and that is still the name used in the Maghrib, although Höst calls it *akwāl*, whilst it is the *gallāl* of Algeria. In Tripolitania the name *tabdaba* is popularly used, and in Egypt *ṭabla*.

AL-**DĀRAḲUṬNĪ**, Abu 'l-Ḥasan ʿAlī b. ʿUmar b. Aḥmad b. Mahdī b. Masʿūd b. al-Nuʿmān b. Dīnār b. ʿAbdallāh, was born in Dār al-Ḳuṭn, a large quarter of Baghdad, whence he got his *nisba*, in 306/918. He was a man of wide learning who studied under many scholars. His studies included the various branches of *Ḥadīth* learning, the recitation of the Ḳur'ān, *fiḳh* and belles-lettres. He is said to have known by heart the *dīwāns* of a number of poets, and because of his knowing the *dīwān* of al-Sayyid al-Ḥimyarī he was accused of being a Shīʿī. His learning was so wide that many people felt there was no one like him. His biographers speak in fulsome terms of him. For example, al-Khaṭīb al-Baghdādī calls him "the *imām* of his time". Abu 'l-Ṭayyib al-Ṭabarī (d. 450/1058) called him *Amīr al-Mu'minīn* in *Ḥadīth*. This was the subject for which he was specially famous. He had studied it under many masters in Baghdād, al-Baṣra, al-Kūfa and Wāsiṭ, and when he was of mature age he travelled to Egypt and Syria. He became so famous as a traditionist that every *ḥāfiẓ* who came to Baghdād visited him and acknowledged his pre-eminence. Among the many who studied *Ḥadīth* under him were al-Ḥākim al-Naysābūrī (d. 405/1014) and Abū Ḥāmid al-Isfarā'inī (d. 406/1015). He died towards the end of 385/995 and was buried in the cemetery of Bāb al-Dayr near the grave of Maʿrūf al-Karkhī.

He contributed greatly to the advance of the critical study of Muslim traditions. His works, not all of which have survived, therefore deal primarily with the science of Tradition. His *Kitāb al-Sunan* (publ. Dihlī, 1306 and 1310) covers the normal ground of works of this nature. Al-Khaṭīb al-Baghdādī says it could have been produced only by one who was versed in *fiḳh* and acquainted with the conflicting views of the schools. It is said that he went to stay with Djaʿfar b. al-Faḍl, Kāfūr's *wazīr*, in Egypt because he heard that Djaʿfar wished to compile a *musnad*. Al-Dāraḳuṭnī is said to have helped him, or to have complied it for him. Whichever it was, he was richly paid for his trouble. His *Kitāb al-askhiyā' wa 'l-adjwād* has been edited by S. Wajahat Husain and published in *JASB*, n.s., xxx, 1934. It consists of stories of generosity. His *Kitāb ʿilal al-ḥadīth*, on weaknesses in traditions, was dictated from memory to al-Barḳānī. His *Kitāb al-afrād*, on traditions from one man or from one district only, is noted by Weisweiler as possibly the earliest book on the subject. Among other books on *ḥadīth* he wrote *Ilzāmāt ʿalā 'l Ṣaḥīḥayn*, in which he collected sound traditions not given by al-Bukhārī and Muslim which fulfilled their conditions. One other book which may be mentioned here is his *Kitāb al-Ḳirā'āt*, on Ḳur'ān readings, in which he began by stating the principles of the subject. He was the first writer to do so.

DARAN (deren) [see the article atlas].

AL-**DARAZĪ**, Muḥammad b. Ismāʿīl, was one of a circle of men who founded the Druze religion [see durūz]. He was not an Arab, and is called Nashtakīn in the Druze scriptures; according to Nuwayrī (who calls him Anūshtakīn), he was part Turkish and came from Bukhārā. He is said to have come to Egypt in 407 or 408/1017-18 and to have been an Ismāʿīlī *dāʿī* [see dāʿī and ismāʿīliyya], in high favour with the Caliph al-Ḥākim, allegedly to the point that high officials had to seek his good graces. He may have held a post in the mint (Ḥamza accuses him of malpractices with coinage).

He is said to have been the first who proclaimed publicly the divinity of al-Ḥākim; he is also accused, as heretics commonly were, of teaching *tanāsukh* (reincarnation) and *ibāḥa* (antinomianism) regarding the rules against wine and incest, though this latter is most unlikely. It is possible that his doctrine was a popularizing version of Ismāʿīlism such as the *dāʿīs* often warned against. His key treatise is said to have taught that the (divine) spirit embodied in Adam was transmitted to ʿAlī and (through the *imāms*) to al-Ḥākim. This would differ from orthodox Ismāʿīlism presumably in exalting ʿAlī over Muḥammad, imāmate over prophecy; and then in making public the secret *ta'wīl* (inner meaning of scripture) and probably denying the continued validity of the letter of revelation, *tanzīl*. For the commentator of Ḥamza's letters calls his followers Ta'wīlīs, who are accused by the Druzes of altogether rejecting the *tanzīl*. Ḥamza himself deems it necessary to remind al-Darazī that the inner truth and its outer form are always found together. He also accuses him of recognizing only the humanity of al-Ḥākim, not his divinity; which would follow, in Ḥamza's eyes, from his identifying al-Ḥākim with ʿAlī, the *asās*, who is a mere *imām*, leader of men, and far from the indefinable *One*, to Whom as such no functions can be assigned.

Al-Darazī seems to have gained a number of followers among al-Ḥākim's admirers, evidently with the approval of al-Hākim himself. Ḥamza, evidently claiming priority with al-Ḥākim, regarded al-Darazī as insubordinate and acting rashly on his own initiative; for instance, publicly attacking the Ṣaḥāba though warned against this. Ḥamza refused to let him see his doctrinal writings; he criticized the symbolism of the title al-Darazī first assumed, "sword of the faith", only to be worse offended when al-Darazī assumed instead a title, *sayyid al-Hādiyyīn*, "chief of the guided", which overreached Ḥamza's own title, *al-Hādī*, "the guide". He claims that some of al-Darazī's followers had at one time acknowledged Ḥamza's claims to leadership in the

movement, and that al-Darazī himself had done so, having been converted by an agent of Ḥamza, ʿAlī b. Aḥmad al-Ḥabbāl—who subsequently supported al-Darazī. Sacy thinks Ḥamza regarded him as the *Ḍidd*, Ḥamza's Rival as *imām*, who would as such have a major cosmic rôle. But many of al-Darazī's followers, most notably a *dāʿī* al-Bardhaʿī, had from the first rejected Ḥamza as unauthorized by al-Ḥākim.

It seems that al-Darazī, probably in 408/1017-18, took the step of making public, with al-Ḥākim's private but not open blessing, a demand for acceptance of the divinity of al-Ḥākim—according to Sibṭ Ibn al-Djawzī, by reading his treatise in the main mosque of Cairo. This occasioned several riots, which engulfed Ḥamza also, and which evidently caused the whole movement to lose favour; it was probably this which forced Ḥamza to suspend his own preaching during 409. The Druze accounts are allusive, and other accounts seem to confuse several episodes, leaving the riots and the manner of al-Darazī's death unclear. Ḥamza's letters in 410/1019-20 seem to presuppose his death, which the Druze commentator places in 410, and imply that it was Ḥamza himself who—having denounced al-Darazī and others to al-Ḥākim—brought about his death on al-Ḥākim's orders. Ḥamza then tried to win over his followers, promising to intervene with al-Ḥākim for some who were in jail.

Sibṭ Ibn al-Djawzī makes al-Darazī withdraw secretly, on al-Ḥākim's orders, to Syria to preach, because people there readily accept novelties—which sounds like a later explanation of Druze geography. His name, in the form *Durzī*, was applied to the Druze community, probably not because it was he who first converted those of Syria—local tradition assigns this task to others—but because the whole movement was first associated with him in the public mind; thus al-Anṭākī applies the name "Daraziyya" to Ḥamza's own followers. The notion sometimes found, that either licentious teachings or loose moral practices among subsequent Druzes are to be traced to al-Darazī, is unsupported.

For bibliography see the article DURŪZ. Among Ḥamza's letters are especially relevant : *al-Ghāya wa 'l-naṣīḥa*, *al-Riḍā wa 'l-taslīm*, and *al-Subḥa al-kāʾina*. In Silvestre de Sacy's *Religion des Druzes*, the chief references are, in Vol. i, ccclxxxiii-cccxci, 99-113; in Vol. ii, 157-90 (and *errata*). See also Yaḥyā al-Anṭākī, continuation of Eutychius, in *Scriptores Arabici*, text, ser. iii, Vol. vii, second part, edd. L. Cheikho, B. Carra de Vaux, H. Zayyat, Beirut 1909, 220-4. (M. G. S. HODGSON)

DARB [see MADĪNA].

ḌARB [see DĀR AL-ḌARB and SIKKA].

DARB AL-ARBAʿĪN, one of the principal routes linking *bilād al-Sūdān* with the north, obtained its name from the forty days' travelling-time required to traverse it. W. G. Browne, the only European to have gone the whole way (in 1793) took 58 days from Asyūṭ to "Sweini" (al-Suwayna) near the southern terminus. Muḥammad ʿUmar al-Tūnusī in 1803 covered the same distance in 60 days. Starting from Asyūṭ, the route ran to the Khārdja oasis, an outpost of Ottoman Egypt. Thence it proceded across the desert to al-Shabb, a watering-point where, as the name indicates, alum is found. At the next oasis, Salīma, a branch diverged to the Nubian Nile, which it attained a little above the Third Cataract at Mūshū, the frontier-post of the Fundj dominions. This route was followed in 1698 by Ch. J. Poncet (see his *Voyage to Aethiopia*, ed. Sir William Foster, in *The Red Sea and adjacent countries at the close of the seventeenth century*, (Hakluyt Society, Second Series, no. C), London 1949). From Salīma the Darb al-arbaʿīn proper continued across the deserts to al-Suwayna, the frontier post of Dār Fūr, where the caravans were held to await the sultan's pleasure. The route ended at Kubayh (*Cobbé*, Browne), about 35 miles NW of the sultan's residence at al-Fāshir. Kubayh, which is now deserted, was in the 18th and early 19th centuries an important town, principally inhabited by merchants, many of whom were immigrants from Nubia. The Darb al-arbaʿīn was the route followed to Egypt by the *ḳāfilat al-Sūdān*, which brought slaves, camels, ivory, ostrich feathers and gum, and returned with metal manufactured goods and textiles. During the 19th century, in consequence of the political changes of the eastern *bilād al-Sūdān*, and the decline of the slave-trade, the Darb al-arbaʿīn lost its importance, and only sectors of it are now occasionally used.

ḌARB-KHĀNA [see DĀR AL-ḌARB].

DARBAND [see DERBEND].

DARBUKKA [see DARABUKKA].

DARD, one of the four pillars of Urdū literature and one of the greatest of Urdū poets, Khwādja Mīr (with the *takhalluṣ* of Dard) b. Khwādja Muḥammad Nāṣir "ʿAndalīb" al-Ḥusaynī al-Bukhārī al-Dihlawī, claimed descent from Khwādja Bahāʾ al-Dīn Naḳshband and in the 25th step from the Imām Ḥasan al-ʿAskarī [*q.v.*]. Born in 1133/1720-21 in the decadent Imperial Dihlī, Dard received his education at home, mostly from his father, a very well-read man and the author of *Nāla-i ʿAndalīb*, a voluminous Persian allegory dealing with metaphysical and abstruse problems and of another Ṣūfī work, *Risāla-i Hūsh Afzā* (still in MS.). Casual references in Dard's work *ʿIlm al-Kitāb* (*vide infra*) show that on the completion of his studies he had attained proficiency in both the traditional and rational sciences. Starting life as a soldier he tried hard to secure a *djāgīr*, but soon withdrew from everything worldly and devoted himself, when barely 20 years of age, to a life of privation, austerity and asceticism. In 1172/1758-9, when he was 39 years old, he succeeded his father as the spiritual head of the local Čishtīs and Naḳshbandīs, and, despite the disturbed conditions prevailing in the capital in the wake of Nādir Shāh's invasion of 1152/1739 and Aḥmad Shāh Abdālī's incursions of 1175/1761, he did not leave Dihlī, being the only Urdū poet of note not to do so.

A great Ṣūfī, he passionately loved music and contrary to those who believed in the maxim "*al-ghināʾ ashadd min al-zināʾ*" (music is more heinous than adultery), he not only fraternized with the leading musicians of the town but also regularly held musical concerts (*madjālis-i samāʿ*) twice a month at his home, which were attended, among others, occasionally even by the ruling monarch Shāh ʿĀlam Bahādur Shāh I [*q.v.*]. In one of his works *Nāla-i Dard* (p. 37) he describes devotional music (*samāʿ*) "as ordained by God".

Essentially a Ṣūfī writer, Dard's first work *Asrār al-Ṣalāt*, was written during *iʿtikāf*, while he was

still a lad of 15 years of age. It is a small tract dealing with the seven essentials of *al-Ṣalāt*. In 1166/1752 was begun *Risāla-i Wāridāt*, a collection of quatrains depicting the spiritual experiences of the author, and completed six years later in 1172/1758. His *magnum opus*, apart from his select Urdū *dīwān*, is, however, the *ʿIlm al-Kitāb*, a voluminous commentary on *Risāla-i Wāridāt*, comprising 648 very closely-written large-size pages. It is entirely on *sulūk* and is profusely interspersed with long Arabic quotations. Its style is sober and staid but powerful and the arguments adduced are cogent and sound. This book can be safely ranked with some of the outstanding works of S͟hāh Walī Allāh al-Dihlawī [*q.v.*], dealing with the same subject. It was followed by the supplementary works : *Nāla-i Dard*, *Āh-i Sard* and *Dard-i Dil*.

His other works are : *S͟hamʿ-i Maḥfil* (composed 1195-99/1780-84) ; a short Persian *dīwān* (Dihlī, 1309/1891-2); an Urdū *dīwān* (first published at Dihlī in 1272/1855 and later frequently printed); *Ḥurmat-i G͟hināʾ*, in defence of devotional music and *Wāḳiʿāt-i Dard*, also on mystic problems. All these works have been published.

For an estimate of his quality and importance as a poet see URDŪ LITERATURE.

Dard died at an advanced age on 24 Ṣafar 1199/6 January 1785 and was buried in the old cemetery (now abandoned and converted into a public park) of S͟hāhd͟jahānābād, outside the Turkomān Gate. His tomb, along with that of his father and the attached small mosque, is still preserved and visited by the local Muslims.

DARDANELLES [see ČANAḲ ḲALʿE BOG͟HAZĪ].

DARDIC AND **KĀFIR LANGUAGES**, the description now generally applied to a number of what are in many respects very archaic languages and dialects, spoken in the mountainous N.W. corner of the Indo-Aryan (IA) linguistic area, in Afg͟hānistān, Pākistān and Kas͟hmīr. With the exception of Kas͟hmīrī, they are numerically insignificant, and have no written history. The others are known only from vocabularies and grammatical sketches, etc., the oldest dating from about 1830. There is still a great lack of adequate grammars, vocabularies, and collections of texts.

In the following account there is a departure from the normal transcription conventions of the Encyclopaedia: the symbol *ṣ* is used for a voiceless retroflex sibilant ('cerebral *s*'), *not* for *ṣād*; similarly the symbol *ṇ* is used for the retroflex nasal.

The Dardic and Kāfir languages may be roughly grouped as follows:

I. Kāfir Group. (*a*) Katī (Bas͟hgalī), spoken, in two main dialects, in the Ramgel, Kulum, Ktiwī and Bas͟hgal valleys in north Nūristān (Kāfiristān); (*b*) Prasun (Wasī-veri; Veron) in a small valley wedged in between the Katīs in Ktiwī and Bas͟hgal; (*c*) Aṣkūṇ (with Wāmāī), south of Katī, between the Alingar and Peč rivers; (*d*) Waigalī (Wai-alā), in the Waigal valley, south-east of Prasun. There is a not inconsiderable dialect variation, and especially Gambīrī, spoken in the Tregam valley east of Waigal towards the Kunar, differs in many respects from ordinary Waigalī. The Kāfir languages have certainly occupied their isolated valleys since very ancient times. (*c*) and (*d*) have been more exposed to outside influences than (*a*) and (*b*); the last language has undergone such violent sound-changes that it has become incomprehensible to its nearest neighbours.

Dardic group. II. (*e*) Kalaṣa, spoken in two dialects by the Kalaṣ tribe, who are still mainly pagan, in S. Chitral (Čitrāl), chiefly in the west side valleys. Closely related to Kalaṣa is (*f*) Khowār, the principal language of Chitral, spoken, with little dialect variation, by the Khō tribe (see CHITRAL, ii). Khowār has adopted a number of words from Wak͟hī, as well as from some Middle Iranian languages (cf. *BSOS*, viii, 294 ff.). These two languages represent the earliest wave of IA penetration into the Hindu Kush region.

III. (*g*) Damēlī, in one village in an east side valley of Chitral, between Mirkhani and Arandu. It has adopted a number of Kāfirī words, and has little connexion, except the geographical one, with (*h*) Gawar-Bātī (Narisātī), spoken in a few villages on the Kunar river, on both sides of the Chitral-Afg͟hān frontier. There is a tradition that this language was brought in from Swāt a few hundred years ago. (*i*) Remnants of dialects of a somewhat similar type are found further south, in Ningalām on the Peč (nearly extinct), and in S͟humās͟ht, in N. E. Pas͟haī territory.

IV. (*j*) Pas͟haī, spoken in numerous and widely differing dialects, from the lower Kunar in the east, through Lag͟hmān, and right up to Gulbahār on the Pand͟js͟hīr. The number of speakers may well run into the 100,000 guessed at in the *LSI*. Pas͟haī is descended from the ancient languages of Hindū and Buddhist civilization in Nagarāhāra, Lampāka and Kapis͟ha, and there is still a marked difference of vocabulary between the east and west dialects. A few numerals of Pas͟haī type have been recorded in Al-Bīrūnī's India.

V. (*k*) Bas͟hkarīk (Gāwrī/Gārwī), in the upper Pand͟jkora valley, above Dīr, and in three villages at the head-waters of the Swāt valley; (*l*) Torwālī, in the upper Swāt valley, below Bas͟hk; (*m*) Maiyā̃, with a number of related dialects (Kanyawālī, Dubērī, Čilis, Gowro, etc.), in the Indus valley region between the Ṣinā and the Pas͟htō speaking areas. Maiyā̃ is also called Kōhistānī, but this term is also used for (*k*) and (*l*); in some respects it approaches (*p*); (*n*) Woṭapūrī (nearly extinct) and Kaṭārḳalāī, on and near the Peč, just above Čig͟ha Sarāʾī on the lower Kunar. Connected with (*k*) and (*l*), but containing forms of

a more ordinary Lahndā [*q.v.*] type, is (*o*) Tirāhī, in a few villages S.E. of Djalālābād, driven out of Tirāh by the Afrīdīs and probably the remnant of a dialect group once extending from there, through the Pē<u>sh</u>āwar district, into Swāt and Dīr.

VI. (*p*) Ṣiṇā, spoken in many dialects in Gilgit, Čilās, etc., as far south as Gurez in Ka<u>sh</u>mīr, and towards the east isolated in Drās and Ḍah Hanū in Baltīstān, formerly even beyond Leh; (*q*) Phalūṛā, an archaic offshoot of (*p*), spoken in a few villages in S. E. Chitral. A related dialect, Sāwī, is spoken south of Gawar-Bātī; (*r*) Ḍumākī, the speech of the Ḍomas (musicians and blacksmiths) in Hunza, speaking Buru<u>sh</u>askī [*q.v.* in Supplement]. It is influenced by (*p*), but has complex affinities with languages further south.

VII. (*s*) Ka<u>sh</u>mīrī, in the Ka<u>sh</u>mīr valley, with Ka<u>sh</u>tawārī as a true dialect, and other dialects strongly influenced by Ḍōgrī, etc.

The nomenclature and classification of these languages have been much discussed. E. Kuhn, in an important article in the *Album Kern* (1882) used the non-committal geographical term "Hindu Kush dialects". Pischel, *Grammatik der Prākrit-Sprachen*, 28, called them "Dardū and Kāfir dialects", employing the name Dard in the extended sense, accepted since. He thought that they were related to the so-called Piśāca dialect of Prākrit. This theory was further elaborated by Grierson in a series of publications, but no cogent linguistic arguments have been offered in support of it. According to Grierson the Dardic (or "Modern Piśāca") languages are not IA, but contain a number of Iranian features, and constitute a separate third branch of Indo-Iranian (IIr). Grierson divides the Dardic and Kāfir languages into (*A*) Kāfir group (= I, III, IV + (*e*) and (*o*); (*B*) Khowār (= (*f*)); (*C*) Dard group (= V, VI, VII). His classification has, in the main, been accepted in such recent works as *Les langues du monde* (2nd. ed. 1952), and Mhd. Shahidullah's article in *Indian Linguistics, Turner Jubilee Volume*, ii, 1959, 117. On the other hand, Sten Konow (*JRAS*, 1911, 1 ff.), drawing attention to some undoubtedly un-Indian features of Ba<u>sh</u>galī (Katī), came to the conclusion that this language was of Iranian origin, and agreed with Grierson that the whole group must be separated from IA. Finally, Sköld (*ZDMG*, 81, LXXIV) went so far as to contend that the real Kāfir group (I) was not at all IIr, but a separate branch of the IE family.

In order to avoid confusion, it is important to distinguish between I (Kāfir group) and the rest (Dardic, II-VII). The latter languages, apart from some Kāfirī admixtures in (*g*), and in a few isolated cases in (*e*) and (*h*), contain absolutely no features which cannot be derived from Old IA. They have simply retained a number of striking archaisms, which had already disappeared in most Prākrit dialects. Thus for example the distinction between three sibilant phonemes (*s*, *ś* (<u>sh</u>), *ṣ*), or the retention, in the western dialects, of ancient *st*, *ṣṭ*. The loss of aspiration of voiced stops in some Dardic dialects is late, and in most of them at least some trace of the aspiration has been preserved. There is not a single common feature distinguishing Dardic, as a whole, from the rest of the IA languages, and the Dardic area itself is intersected by a network of isoglosses, often of historical interest as indicating ancient lines of communication as well as barriers. Dardic is simply a convenient term to denote a bundle of aberrant IA hill-languages, which in their elative isolation, accentuated in many cases by the invasion of Paṭhān tribes, have been in a varying degree sheltered against the expanding influences of IA Midland (*Madhyade<u>sh</u>a*) innovations, being left free to develop on their own.

In the Kāfir group (I) the situation is an entirely different one. Although very heavily overlaid by IA (Dardic) words and forms, these dialects have retained several decidedly un-Indian features. The complete loss of aspiration of voiceless as well as voiced stops (*e.g.*, Katī *kur* 'ass'; *dyūm* 'smoke': S. Kalaṣa *khār*; *dhūm*) must go back to an extremely remote period, since we also find, *e.g.*, Katī (*d*)*zim* 'snow'; *djāṛ* 'to kill': cf. Sanskrit *hima-*; *han*. Cf. also Katī (*d*)*zāṛ* 'to know'; *dji* 'bowstring', both with unaspirated *dj* in Sanskrit. In this respect Kāfirī follows Ir. as against IA in abolishing the distinction between aspirated and unaspirated sounds, while retaining the one between ancient IE palatal and palatalized velar stops. In most other respects, however, such as in the preservation of *s*, it agrees with IA: Kāfirī *č* (= *ts*) corresponding to Skt. *ś*, Avestan *s* (*e.g.*, in Katī *duč* 'ten') is an archaic feature, and still more so is the retention of dental *s* after *u*, as in *musä* 'mouse'. The vocabulary of Kāfirī contains a number of words not known from IA; some of these appear also in Iranian, *e.g.*, *kan-*, etc., 'to laugh', cf. Pers. *<u>kh</u>and*; *wa<u>sh</u>pīk*, etc., 'wasp', cf. Ir. Pamir dialect, Yidgha *wof<u>sh</u>io*; Prasun *yase* 'belt', cf. Av. *yāh-*; etc. Other words are found only in Kāfirī, and, in a few cases, in some of the adjoining Dardic dialects.

We are, therefore, entitled to posit the existence of a third branch of IIr, agreeing generally with IA, but being situated on the Ir side of some of the isoglosses which, taken as a whole, constitute the borderline between IA and Ir. This branch had also retained archaisms of its own, and must have separated from the others at a very early date. The present-day Kāfir languages represent, so to speak, the decayed ruins of this original building, largely rebuilt and reconstructed with the help of foreign (IA) material, but with the outlines of the original structure still visible.

DARDĪRIYYA, name of the Egyptian branch of the <u>Kh</u>alwatiyya [*q.v.*] order. See also ṬARĪḲA.

DARDISTĀN, the name given to the area, lying between the Hindū Kus͟h and Kāg͟hān, between lat. 37° N. and long. 73° E., and lat. 35° N. and long. 74° 30′ E., the country of the Dardas of Hindū mythology. In the narrowest sense it embraces the S͟hinā-speaking territories, *i.e.*, Gilgit, Astor, Gurayz, Čilās, Hōdur, Darēl, Tangir etc., or what is now known as Yāg͟histān. In a wider sense the feudatory states of Hunza, Nāgar and Chitrāl [*q.v.*] (including the part known as Yāsīn), now forming the northern regions of Pakistan, comprise Dardistān; in the widest sense parts of what was till very recently known as Kāfiristān. Herodotus (iii, 102-5) is the first author who refers to the country of the Dards, "placing it on the frontier of Kas͟hmīr and in the vicinity of modern Afg͟hānistān". He, however, does not use the name "Dard" while referring to the country; on the other hand Strabo (xv) and Pliny (*Natural History*, xi) call the people inhabiting the area as *Derdae* or *Dardae*. The Dards are the "Darada" of the Sanskrit writers, a region to which Buddha sent his missionaries and *bhiks͟hus*. These areas once formed the stronghold of Buddhism and even to this day numerous Buddhist remains and relics are found there. The Dards are "an independent people which plundered Dras in the last year, has its home in the mountains three or four days' journey distant and talks the *Pakhtu* or Daradi language. Those whom they take prisoners in these raids, they sell as slaves" (*Voyage par Mir 'Izzetulla in* 1812 in Klaproth's *Magasin Asiatique*, ii, 3-5).

Strangely enough the Dards have no name in common, each tribe inhabiting a different valley carrying a different name, derived mostly from the areas inhabited by them.

The history of Dardistān, a name first given to the entire country by Dr. G. W. Leitner after his visit in 1866, is the history of its component parts, namely Hunza, Nāgar, Chitrāl, parts of Baltistān, Ladakh, Gilgit etc. [*qq.v.*]. The main enemy of the Dards, otherwise a peace-loving people, was the Dōgrā State of Kas͟hmīr under its first ruler, Gulāb Singh. He led a number of expeditions against the Dards. In 1850 a large Sikh army sent against Čilās met with an ignominious defeat. Next year, a force 10,000 strong under Bak͟hs͟hī Hari Singh and Dīwān Hari Čand succeeded in destroying the fort of Čilās and scattering the hill tribes who had come to the assistance of the Čilāsīs.

A little-known fact about the outlying states of Hunza and Nāgar is that they never owed any allegiance to Kas͟hmīr except that they occasionally sent a handful of gold dust to the Mahārād͟jā and received substantial presents in return. These two states have rather more than once punished Kas͟hmīr when attempting agression, but they have never been hostile to the Dōgrā Kingdom.

The prevailing religion in the whole of Dardistān is Islam; a form of S͟hīʿism is met with in Hunza, Nāgar and parts of Chitrāl, although the latter is predominantly Sunnī. The Mawlāʾīs, as they call themselves, profess to be good Muslims with strong leanings towards the seventh S͟hīʿī *imām*. They, however, owe allegiance to the Āg͟hā K͟hān. The *Kalām-i Pīr*, a book in Persian, an edition of which was published by Ivanow (Bombay 1935), is held in high esteem among the Mawlāʾīʿs. (See further ISMĀʿĪLIYYA).

Čamarkand in Yāg͟histān became the centre of the remnants of the *Mud͟jahidīn*, the followers of Sayyid Aḥmad Barēlwī [*q.v.*] after their defeat and dispersal in 1246/1831 at Bālākoṭ in the Kāg͟hān valley, at the hands of the Sikh forces led by Prince S͟hīr Singh, a son of the Lahore Chieftain, Rand͟jīt Singh. Because of the suspected revolutionary and subversive activities of these *Mud͟jāhidīn* and their descendants, entry into Yāg͟histān from British India and subsequently from Pakistan was regulated by permits. This system was, however, abolished by the Pakistan Government in 1959.

(A. S. BAZMEE ANSARI)

AL-**DARD͟JĪNĪ**, ABU 'L-ʿABBĀS AḤMAD B. SAʿĪD B. SULAYMĀN B. ʿALĪ B. ĪK͟HLAF, an Ibāḍī jurist, poet and historian of the 7th/13th century, author of a historical and biographical work on the Ibāḍīs, the *Kitāb Ṭabaḳāt al-Mas͟hāyik͟h*. He belonged to a pious and learned Berber-Ibāḍī family from Tamīd͟jār, a place in the D͟jabal Nafūsa in Tripolitania. His ancestor, al-Ḥād͟jd͟j Īk͟hlaf b. Īk͟hlaf al-Nafūsī al-Tamīd͟jārī, an eminent *faḳīh*, lived in the neighbourhood of Nefṭa in the D͟jarīd [*q.v.*]. Son of Īk͟hlaf, the pious ʿAlī, who lived in the second half of the 6th/12th century, earned his living by trading with the Sudan. In the course of one of his trading journeys, in the year 575/1179-80, he is said to have converted the pagan king of Mālī in the western Sudan to the Ibāḍī faith, but this is a legend (cf. J. Schacht, in *Travaux de l'Institut de Recherches Sahariennes*, xi, 1954, 21 f.). His son, the famous lawyer Sulaymān, who was the grandfather of Abu 'l-ʿAbbās, lived at Kanūma in the D͟jarīd; he was regarded as a saint. The father of Abu 'l-ʿAbbās, Saʿīd, who was a distinguished traditionist, settled at Dard͟jīn al-Sufla 'l-D͟jadīda near Nefṭa.

We do not know much about the life of al-Dard͟jīnī. He must still have been very young when he went to Ouargla in 616/1219-20, where he spent two years studying with the Ibāḍī *s͟hayk͟hs* of this city. Afterwards he returned to the D͟jarīd, where we find him engaged in historical studies at Tozeur in 633/1235-6. Later he lived for some time on the island of D͟jarba, where he was highly regarded by the *ʿazzāba* (Ibāḍī scholars). It was at the request of these that he conceived the idea of writing the *Kitāb Ṭabaḳāt al-Mas͟hāyik͟h*.

The *Kitāb al-D͟jawāhir al-Muntaḳāt*, of Abu 'l-Ḳāsim b. Ibrāhīm al-Barrādī [*q.v.*], gives some information on the origins of this work.

"Here", says al-Barrādī, "are the circumstances in which Abu 'l-ʿAbbās came to write his book. Al-Ḥād͟jd͟j ʿĪsā b. Zakariyyāʾ had just arrived from ʿOmān bringing various works with him ..... His brothers in the east had asked him to send them a work containing biographies of the earliest Ibāḍīs and recounting the virtues of the western forebears. Al-Ḥād͟jd͟j ʿĪsā consulted the learned *ʿazzāba* who were then to be found in D͟jerba and told them of this desire of their co-religionists in the east. They thought first of the book of Abū Zakariyyāʾ, but they recognized that it was not sufficiently complete, and that the style of the author, who was accustomed to the Berber language and hence not very accurate

in the rules of Arabic grammar or the propriety of its terminology, was often defective. They thought then of having a new work compiled on the history of the Rustumids and the virtues of the ancient doctors. No-one was more suitable than Abu 'l-ʿAbbās to fulfil this task worthily and it was to him that it was confided".

The *Kitāb Ṭabaḳāt al-Mas͟hāyik͟h* exists only in some manuscript copies (a few in the Mzab and one in the collection of the late Z. Smogorzewski). It consists of two distinct parts of which the first is merely a reproduction of the *Kitāb al-Sīra wa-Ak͟hbār al-Aʾimma* of Abū Zakariyyāʾ Yaḥyā b. Abī Bakr al-Ward͟jlānī, or rather of the first part of this chronicle. It contains a history of Ibāḍī penetration into North Africa, of the installation of the Ibāḍī imāmate and of the imāms of the Banū Rustum family, and finally some biographies of Ibāḍī doctors of Mag͟hribī origin. The second part, the original work of al-Dard͟jīnī, is a collection of biographies of doctors and other celebrated Ibāḍīs, divided in the customary way into twelve classes, each class covering a period of fifty years. The first four classes of the work cover the biographies of the eastern Ibāḍī doctors of the 1st/7th and 2nd/8th centuries. The author found it pointless here to give biographies of famous personages from the Mag͟hrib, having reproduced the corresponding part of the work of Abū Zakariyyāʾ. The sources of the biographies of these eastern scholars are sometimes very old. The eight classes which follow, on the other hand, are confined to biographies of Ibāḍī s͟hayk͟hs of Mag͟hribī origin. The last 4 classes, indeed, deal only with persons from Ouargla, the Oued Rīg͟h, the Oued Souf, the D͟jarīd and the island of D͟jerba, and are therefore of no more than a local importance.

Al-Dard͟jīnī used a large number of sources in the second part of his book, among others the historical and biographical works of Maḥbūb b. al-Raḥīl al-ʿAbdi (2nd/8th century) and Abu 'l-Rabīʿ Sulaymān b. ʿAbd al-Salām al-Wisyānī (6th/12th century). He included in his work some curious passages which are of great value for students of Ibāḍī history, for example the rules concerning the constitution of the *ḥalḳa* laid down by the great Ibāḍī scholar, Abū ʿAbd Allāh Muḥammad b. Bakr al-Nafūsī (5th/11th century), and the *k͟huṭba* pronounced at Medina by the famous Ibāḍī chieftain, Abū Ḥamza al-S͟hārī (2nd/8th century). The exquisite language of of the *Kitāb Ṭabaḳāt al-Mashāyik͟h* surpasses by far in elegance all other Ibāḍī works of North African origin, and the author has corrected the style of his Mag͟hribī sources, as can be seen from a comparison with the original text of the chronicle of Abū Zakariyyāʾ.

Al-Dard͟jīnī is also the author of a *dīwān* and of letters in verse. As a jurist, he decided a number of questions on the division of inheritances, which al-D͟jīṭālī [*q.v.*] put together afterwards.

The date of his death is unknown, but it was undoubtedly in the second half of the 7th/13th century.

DARGĀH, Pers., lit. "place of a door" [see DAR], usually "royal court, palace" in Persia, but in India with the additional specialized sense "tomb or shrine of a *pīr*".

DARG͟HIN, name of a Muslim Ibero-Caucasian people in Dāg͟histān formerly inhabiting the pre-Caspian plains and then, in the 12th century, driven back towards the mountains by the Ḳumlḳs who had come from the North. The Soviet census of 1926 gives the number of 126,272 Darg͟hins who, in 1954, had increased to 158,000. The Darg͟hins are grouped in the sub-alpine and mid-alpine zones of central Dāg͟histān, and they form the greater part of the population in the districts of Sergo-Ḳalʿa, Akūs͟ha and Dak͟hadaev. They are intermingled with Avars and Laks in the districts of Levas͟hi and Tzudak͟har, and with Ḳumīḳs and Ḳaytāḳs in the districts of Ḳaytāḳ (Mad͟jālīs). They form isolated communities in the districts of Ḳarabudak͟hkent (*awls* of Gubden and Gurbuki), Buinaksk (*awls* of Ḳadar, Ḳaramak͟hi and Djankurbī), Agul (*awls* of Amuk͟h and Čirak͟h) and Gunib (*awls* of Miamugi). Finally, in 1944 several Darg͟hin *awls* emigrated towards the steppes of north Dāg͟histān to the district of S͟huragat.

The earliest information concerning the Darg͟hins was given by Arab historians of the 4th/10th century in the *Darband-nāma*. After the Arab conquest the feudal principality of the Usmī of Ḳaytāḳ was established in the south-west part of the Darg͟hin territory with its centre at Ḳalʿa Ḳuraysh, near the present *awl* of Kubači, whilst other Darg͟hin clans were found in the dependency of the Lak S͟hamk͟halat of Ḳazi-Ḳumuḳ. After the end of the 8th/14th century when the S͟hamk͟hālat became weakened by the pressure of the Darg͟hin clans allied with the Avars, the Darg͟hin territory was divided between the principality of the Ūsmī of Ḳaytāḳ, which reached its apogee in the 16th and 17th centuries, and the free clans (*d͟jamāʿa*) which were joined together in unions or federations of clans. These were originally four in number: Akūs͟ha, Usala-Tabun, Mak͟hala-Tabun, K͟hürkili-Tabun; to these, six others were added by force of arms at the beginning of the 19th century: Keba-Dargwa, Kutkula, Sergala-Tabun, Usmī-Dargwa, Vakun-Dargwa and Čirak͟h. The administration of these federations reverted to the *ḳāḍī* of Akūs͟ha. This patriarchal structure was maintained until the Russian conquest in the 19th century.

The Darg͟hin language is divided into three dialects: Urak͟hi (or K͟hürkili), spoken by the cattle-breeders of the high plateaux; Tzudak͟har, spoken by the artisans and traders in the plains, and Akūs͟ha which is clearly differentiated from the other two and serves as a basis for the literary language used also by the Kubačis and Ḳaytāḳs. But Turkish (*ḳumīḳ, azeri*) and Russian linguistic influence is considerable and the majority of Darg͟hins are bilingual: in primary schools teaching is carried out in Darg͟hin, in secondary schools only Russian being used. Darg͟hin literature is of recent creation. The earliest works do not go back beyond the 19th century, and Soviet literature is only represented by a few writers, the best-known being the poet Ras͟hid Ras͟hidov.

At the beginning of the 20th century the Darg͟hin literary language was transcribed in Arabic characters. In 1920 a new modified Arabic alphabet was

introduced (called the new *adjem*, with 43 letters). This gave way in 1928 to the Latin alphabet which in turn was replaced in 1938 by the Cyrillic alphabet.

In 1958 eight Darghin newspapers were published: one Republican journal at Makhač-Ḳalʿa, and seven district journals.

The Darghins are Sunnī Muslims of the Shāfiʿi sect, with the exception of two *awls*, Kurush and Miskindjī, whose inhabitants up to the time of the revolution were twelver Shīʿīs. Their Islamization which had begun in the 11th century became decisive in the 16th century, on the elimination of the last Jewish and Christian traces. In the 15th century some at least of the Darghins were still not Muslims, since the *Ẓafar-nāma* (i,777 ff.) cites among the "infidel" tribes of Dāghistān who resisted Tīmūr the "Ashkudja" (who can be indentified with the *awl* Akūsha).

Until the revolution of 1917 the social structure of the Darghins was based on the division into clans, *tukhum*, and the great patriarchal family, *djins*. If in the 19th century the *tukhum* had already lost its economic significance, the customs deriving from it decayed more slowly.

Polygamy was always rare among the Darghins and endogamy fell into decline from the 19th century: the ritual of marriage remained traditional, but though marriage with infidels was for a long time impossible, marriages with Russians became comparatively frequent after 1917. Abduction was often practised in former times, particularly by those who could not pay the obligatory *kalīm*, but the *kalīm* persists.

Conquered by the Russians for the first time in 1819 (capture of Akūsha), and then for the first in the second time in 1844, the Darghins were threatened before the revolution with assimilation by both the Avars and the Ḳumīḳs at the same time. The Soviet authorities, wishing to ensure their protection, as a unique "nationality" possessing a literary language, favoured their consolidation with two small neighbouring peoples, the Ḳaytāḳs and the Kubačis, both also threatened with extinction.

The Darghins practise agriculture in the plains and horticulture at the foot of the mountains; and they take up their flocks and herds of sheep, cattle and horses to the summer pastures in the mountains. Kubača is celebrated for the local handicrafts of jewellery and goldsmiths' work, and Sulevkent for pottery. Industry is scarcely developed; there are canning factories at Akūsha, Levashi and Tzudakhar.

(CH. QUELQUEJAY)

DARĪ, a Persian word meaning "court (language)" from *dar* [*q.v.*]. In Arabic authors such as al-Maḳdisī (335), Yāḳūt (iii, 925), and *Fihrist* (19), we find the *Darī* language (also *Fārsī Darī*) described as the spoken and written language of the (Sasanian) court. It was also the language of government and literature. After three centuries of Muslim rule in Persia it was written down in the Arabic script, and came to be called *Fārsī* or New Persian. The fact that New Persian literature arose and flourished in Khurāsān and Transoxiana because of political reasons (Iranian dynasties of the Ṭāhirids and Sāmānids) has caused some difficulty. The language was basically a West Iranian dialect, hence the name Fārsī after the province. In Islamic times, if not before, elegant Darī diverged more and more from the rather stilted language of the Pahlavi books, kept alive primarily by Zoroastrian priests. By the time of the Mongol conquest of Īrān the term Darī had gone out of use.

(R. N. FRYE)

ḌARĪBA, one of the words most generally used to denote a tax, applied in particular to the whole category of taxes which in practice were added to the basic taxes of canonical theory. These latter (*zakāt* or *ʿushr*, *djizya* and *kharādj*, etc.) and their yield in the "classical" period, have been covered in a general survey in an earlier article, BAYT AL-MĀL, and a detailed description of the methodes of assessment and collection will be given under their respective titles, in particular under KHARĀDJ; along with *kharādj* and *zakāt* will be included associated taxes and payments linked with them or levied on other categories of agricultural or pastoral wealth; finally, in the article DJIZYA will be found a discussion of the problem of the original distinction between *djizya* and *kharādj*. Apart from *djizya* which, as a poll-tax, is not concerned with the nature of the wealth, the above-mentioned taxes which form the basis of the official fiscal system of Islam are essentially concerned with agriculture and stock-breeding; only the theoretical definition of *zakāt* makes it possible to include the products of industry and commerce, but only with the Muslims and, as we shall see, is far from embracing all the effective forms of taxes to which they were subject; and no canonical tax covers the fiscal dues which the State arrogates to itself to recover certain costs of the conduct of its administration. It is of this whole group of taxes, usually called *ḍarāʾib* or *rusūm*, and often stigmatized by theorists, on account of their more or less extra-canonical character, under the name *mukūs*, that we shall attempt to speak here although, precisely because they are poorly represented in doctrinal treatises as well as in papyri, any research into them is made under more difficult documentary conditions than is the case with canonical taxation, and they have been scarcely noticed by historians.

In the practice of the last years of the Prophet's life, treaties concluded with certain communities of *dhimmīs* had allowed them to make payments in kind with goods useful to the Muslims, if they produced them; after the conquest, and on a larger scale, stipulations of the same sort had again been expressed for the benefit of the army of occupation; and for many centuries the same element occurs in the taxes paid by certain provinces with important specific products, either natural or manufactured. It is however clear that it was always a question of the method by which the total contribution from the province was compounded, and not of specific taxes on industry or the trade of individuals. As regards *zakāt*, this of course includes a levy on

possessions in the form of precious metals (money included) or merchandise, as on other categories of wealth, as soon as they exceeded an estimated 200 dirhams, the figure regarded as marking the limit between "rich" and "poor"; but in fact it amounted to a preferential tariff granted to Muslims within the framework of a more general tax levied on traders of all faiths: it was to be confirmed in the rule that the Muslim should pay 1/40 = 2.5%, the *dhimmī* 1/20 = 5%, and the foreign merchant 1/10 = 10%. In the *zakāt* thus conceived two principles are combined: as regards foreigners, it is a matter simply (and explicitly in the account of the innovations attributed to caliph ʿUmar on this question) of conformity with international usage, and the rate of 10% was instituted in reciprocity with the usual rate levied by Byzantium on foreign merchants; for the native merchant, the relation between *dhimmī* and Muslim is the same for the levy on commercial goods as for the *kharādj* and the land tithe, and the conception of the tax appears to be inspired by what it is for livestock, (except that it is paid in money and not in kind) in the sense that it is an annual levy on the total trading capital, and not a tax on the profits from trading operations. Dionysius of Tell-Mahrē describes at the beginning of the ʿAbbāsid period a procedure of this sort for levying the "ʿ*ushr* tithe" on merchants, which, however, he seems to regard as exceptional in its severity or in its very nature; the schedule that such a conception implies, with an official fixing of values and a distinction between consumer goods and those intended for trade, obviously presents great difficulties particularly to a merchant when travelling, for, on introducing himself to officials in a new province, he has to prove that he has already made the obligatory annual payment, since no administration could be satisfied by the Muslim's right, however valid in theory, to determine the amount of his *zakāt* himself and even to pay it direct to the "poor"; the conception of an annual payment became impracticable at the time of the political fragmentation of Islam, no State being prepared to be deprived of the proceeds of a tax on the ground that it had already been paid to another, and Ibn Djubayr, for example, complains that the Alexandria customs-post taxes pilgrims without enquiring whether they have already paid their *zakāt*, and moreover without distinguishing between goods for private consumption and goods for trade, and between pilgrims and merchants. All this helps us to understand that what was taking place was a reorganization and development of the kind of taxes which had been known to the pre-islamic empires and which more or less must have survived the conquest in the framework of local institutions, particularly for towns enjoying a "treaty" which left them free to compound their tributes from such of their resources as suited their rulers.

A first group of taxes belongs to what might be called customs, dues and tolls (*marāṣid, maʾāṣir*). There exist customs such as those on the frontiers which are well organized, on the great international trade routes, and from the very first naturally at the ports (Ubulla, the fore-port of Baṣra, kept the name of *al-ʿashshār*, the tithe-man. The "tithe" levied there can only have been taken in kind on certain merchandise, and for the most part it was therefore necessary to pay in cash according to an official estimate of value; in this way there were evolved certain kinds of customs tariffs such as the one preserved in the *Mulakhkhaṣ* (see *Bibl.*). In theory no customs-post should exist except on the frontiers of Islam, for the foreign merchant is in law indebted only to the Muslim community as a whole; in fact, from the start every large region seems to have had autonomy in customs, and this state of affairs became general everywhere, irremediably so after the establishment of many separate principalities. In addition there were often town-dues at the gates of towns, and tolls on the trade routes, particularly the water-ways, from which the *ḥadjdj* itself was not exempt. The theoretical justification for such dues, insofar as one was looked for, is in this case less clear than for customs; it may in certain cases, as also for other dues to be discussed later, be a question of taxes for the use of a route belonging to the State; in general, variations of this "protection", *ḥimāya* or *khafāra*, became widespread and, although the normal taxation implied such protection, payments had to be made to the *imām*, to local authorities of all kinds and, in bedouin countries, to the tribes, according to immemorial custom; payment generally is calculated on a "load" of an ass or camel. Finally, although the jurists ignore the point, we must add that in addition to dues for the import of goods others, for export (to obtain authorization), were sometimes imposed or substituted, as in other mediaeval societies. The result of all this was that, contrary to what one might expect, the Muslim world, even at the time of its on the whole great political unity, did not allow goods to circulate with any real freedom from those restrictions which so impeded them in, for example, the more divided European communities.

A second category of dues can be grouped under the heading of the renting of lands or buildings belonging to the State. The State, rediscovering ancient habits or regulations under the ʿAbbāsids, sometimes looked upon itself as the proprietor perhaps of the whole territory of a town, but invariably of the ramparts and public highways, calculated on the basis of a width of forty cubits; everything that had in fact been established or built on this land had to recognize the ownership of the State by paying rent; in practice all the shops in the souks and markets in public places were subject to this charge. Dionysius of Tell-Mahré again provides us with evidence from the reign of al-Mahdī, of whom we know in particular from al-Yaʿkūbī that he introduced dues on the *sūḳ*s in Baghdād, and from others that he made the same innovation in Egypt. This did not however signify that the State did not recognize some sort of ownership by occupants of shops or houses standing on rented land, since in fact it left them free to dispose of them normally by inheritance, sale, *waḳf* etc. It regarded itself as having a more direct ownership of the *khān*s and *funduḳ*s, to enter which it was of course necessary to pay; in Egypt, this was true of many shops.

With regard to the *khān*s, there was also *ḥimāya*, protection of goods, to be provided. The same justification was given for the dues which the State required from individuals wishing to make use of the post (*barīd*), weights and measures, as well as certain instruments in which it retained a monopoly and, of course, the profit made from minting money. Ovens, presses, and mills also came into this category although private ones also existed, which were subject to taxes similar to those applying to trades in general.

Indeed, it seems clear that, whether or not under the pretext of *zakāt*, the State levied certain dues

collectively on various organized trades or industrial establishments—without prejudice to secondary taxes on regulation, packing, etc., in the case of goods in which it had a monopoly or whose export it regulated (fabrics from Egypt and Fārs, among others). In addition, dues were charged on certain sales (especially of livestock) and on the exercise of brokerage which was particularly indispensable in commercial dealings with foreigners. We make no mention here of manufactures in which the State retained a monopoly, or of the fifth on mines, treasure trove, etc.

Dues for *ḥimāya* appeared frequently, though it is not always possible to distinguish between those which do or do not merge with certain of the dues noted above. Originally it was, generally speaking, a matter of demands from individuals or from local police, but subsequently the State replaced these beneficiaries, while keeping up their demands. We leave aside the question of State duties on legacies. The drawing up of any written legal deed also of course incurred a tax.

The *waḳf*s in principle were independent of the State, on condition that taxes were paid to it unless they had been renounced; but it tended to take over control, paying a fixed allocation to the parties concerned, while keeping the surplus : a kind of manipulation of property in mortmain.

It should not, however, be imagined that the various sorts of taxes and dues that we have just noted always coexisted everywhere and to the same degree. Of course it was Egypt which was the fiscal paradise, following the tradition of Antiquity. It is possible that at the start the conqueror, satisfied with the payment of poll-tax and other taxes and grants of land agreed upon by the terms of surrender, failed to pay attention to other sources of revenue which had been added by earlier régimes; subsequently, when equivalent measures were re-established, the Muslims accused the Copts of having appropriated them, though one cannot be certain if they meant that these revenues had fallen into private ownership, or that the local powers had embezzled the proceeds. Tradition, simplifying a more complex process that had been initiated earlier, attributes to Ibn al-Mudabbir, head of Egyptian finances on the eve of the Ṭūlūnid régime (mid 3rd/9th century), the particular responsibility for introducing the policy of new extra-canonical taxes. Succeeding régimes, according as to whether they were impelled by a desire for legality and popularity or by financial needs, alternately abolished and re-established all or part of these taxes which no doubt reached their fullest development during the difficult times of the last Fāṭimids; part of them (but not the customs) was later abolished by Saladin, with the loss of 100,000 dinars, and the report which has been preserved is one of the principal sources of our knowledge; but Saladin's successors re-established and perfected them (al-Maḳrīzī, *Khiṭaṭ*, i, 103 ff., Ibn Mammātī, ed. Atiya, chap. 5).

In ʿIrāḳ, tradition and the strength of custom did not allow such a fiscal system to be established, and the fact that the ʿAbbāsids had not the ability or the means to utilize for their own advantage the revenues from commerce like those from agriculture perhaps forms a part, which is difficult to evaluate, of their financial difficulties. Ibn Rāʾiḳ was said to be the first to set up a toll-house at the very gates of Baghdād. It was naturally the Būyids who in particular made repeated efforts to introduce in ʿIrāḳ a system similar to that of the Fāṭimids; ʿAḍud al-dawla, the best organizer of the dynasty, and his immediate successors tried to impose dues on the fine textile products which were the livelihood of great numbers of Baghdād artisans: popular riots compelled them finally to abandon the project, and the same was true of the attempt to place dues on mills, etc. In the time of the Būyids, Baṣra was notorious for the severity of its *ḍarāʾib*, as was Fārs; in Īrān, on the other hand, Iṣfahān in particular and the whole territory of the Sāmānids had moderate *ḍarāʾib*.

This very diversity raises a problem. It is indeed found in all sections of the fiscal organization, which was adapted to economic conditions and inherited different traditions, according to the region. But here there is another point. In principle, the Muslim has the right to pay his *zakāt* direct to the "poor", and if, as happened in fact, he paid it to specialized agents, it was understood that the money had to go direct to the true beneficiaries, and not pass into the coffers of the State, which was taken to imply that it was spent on the spot and not centralized in the capital; furthermore, we have indicated that various taxes had to be regarded as *ḥimāya*, which clearly meant that the beneficiaries were those who provided this *ḥimāya*, the local authorities. It can hardly be doubted that the police, either in their official form as *shurṭa*, or as *aḥdāth* militia etc. were the recipients in particular of the proceeds of certain taxes in particular. From all this it emerges that the *Bayt al-Māl* was not the recipient of all the taxes that we have noted. We must not, however, go too far in the opposite direction. In fact, all the *mukūs* abolished by Saladin had very clearly been profitable to his treasury, and it was no less clear that, to swell his own fortunes, ʿAḍud al-dawla in Baghdād made the fiscal efforts to which we have referred. Customs, which affected Muslims and non-Muslims alike, were in fact regarded as being unrelated to *zakāt* and profited the Treasury. The same was true of the proceeds from rents. However, it was a principle of the Muslim fiscal administration that local expenditure was met from the proceeds of local taxes, only the surplus being sent to the Treasury; the latter did not provide any means of evaluation or control for the *ḍarāʾib*, or for the *kharādj* and other basic taxes. In fact, without exception, the *ḍarāʾib* do not appear in the ʿAbbāsid "budgets" that still survive. However, the proceeds from certain *ḍarāʾib* perhaps formed part of the revenues of the caliph's or sovereign's private treasury, with which he thus contributed to the obligatory "good works".

Economic and international circumstances have sometimes brought about appreciable modifications in the system of *ḍarāʾib* and, more particularly, customs. Al-Ghazālī granted that the tariff could be lowered, even for infidels, if it was advantageous to the community to encourage the import of certain goods. From the 6th/12th century, this was in fact the object of the treaties concluded with the "Franks", setting up differential tariffs according to the goods, and sometimes even conferring on those nations' merchants advantages superior to those legally enjoyed by the Muslims. Naturally, this was not a practice peculiar to the Muslim States: Byzantium concluded similar treaties. It appears indeed that certain Muslim groups like the *Kārimī*s with the Indian Ocean trade were allowed to enjoy preferential tariffs at the end of the Middle Ages (according to the *Mulakhkhaṣ*, see *Bibl.*).

Bibliography: neither *fiḳh* works nor papyri

provide documentation on the aspect of financial history considered here (apart from the doctrinal definition of commercial *zakāt* and taxes on the non-Muslims which *fiḳh* approximates to it). Information is to be found either in geographers such as Muḳaddasī or, for certain countries, in various chroniclers and authors of technical treatises on administration, of which only a few examples can be quoted here; for Mesopotamia, Dionysius of Tell-Mahré, Syriac Chronicle, ed. trans. J. B. Chabot (see Cl. Cahen, *Fiscalité*, etc., in *Arabica*, 1954), Miskawayh, *Tadjārib*, ed. trans. Margoulioutli (*The eclipse of the Abbasid Caliphate*), with sequel by Abū Shudjāʿ Rudhawārī; for Egypt, in addition naturally to the materials in Maḳrīzī, *Khiṭaṭ*, particularly i, 103 ff., Ibn Mammātī, *Ḳawānīn al-dawāwīn*, ed. Atiya 1943, Nābulusī, *Akhbār al-Fayyūm* ed. B. Moritz (see Cl. Cahen, *Impôts du Fayyum*, in *Arabica*, 1956; for Arabia, G. Wiet, *Un Décret du sultan Malik Ashraf à la Mecque*, in *Mélanges Massignon*, III, 1957, and in particular the Yemenī *Mulakhkhaṣ al-fitan*, on which see the article by Cl. Cahen and R. B. Serjeant in *Arabica*, 1957; on Syria, Kamāl al-Dīn b. al-ʿAdīm, *Zubda*, ed. S. Dahan, i, 163 ff. (on the treaty of 358/969 with Byzantium), and ʿIzz al-Dīn b. Shaddād, *al-Aʿlāḳ*, ed. D. Sourdel, 150 (see Sauvaget, *Alep*, 253-4), and, for the Djazīra, the same, provisionally in *REI*, 1934, 111-2. The treaties with the Franks are given in Mas Latrie, *Traités ... concernant les relations des Chrétiens avec ... l'Afrique septentrionale*, 1866; G. Müller, *Documenti sulle relazioni delle citta toscane coll'Oriente*, 1879; Tafel and Thomas, *Urkunden zur älteren Handelsgeschichte Venedigs*, 3 vols. of *Fontes Rerum Austriacarum*, 2nd. s., xii-xiv, 1856-57. For the later Middle Ages, see the Italian technical treaties such as the *Pratica della Mercatura* by Pegolotti, ed. A. Evans, Cambridge Mass. 1936.

As regards the modern literature, besides the information given earlier in Aghnides, *Mohammedan theories of finance*, New York 1916; A. Mez, *Renaissance*, viii; R. Heffening, *Das Islamische Fremdenrecht*, 1925, various works by Arabic-speaking scholars should now be added: ʿAbd al-ʿAzīz Dūrī, *Taʾrīkh al-ʿIrāḳ al-iḳtiṣādī fi 'l-ḳarn al-rābiʿ al-hidjrī*, Baghdād 1948; ʿAbbās al-ʿAzzāwī, *Taʾrīkh al-ḍarāʾib al-ʿirāḳiyya*, Baghdād 1959; M. ʿAwwād, *al-Maʾāṣir fi 'l-Islām*, Baghdād 1950; Rāshid al-Barawī, *Ḥālat Miṣr al-iḳtiṣādiyya fī ʿahd al-Fāṭimiyyīn*, Cairo 1943.

(Cl. Cahen)

(2) — West. The history of fiscal systems in the Maghrib is still to be written, and perhaps may never be written. The texts are few and difficult to interpret, the terminology vague. The writers show little interest in the subject and apart from off-handed and scattered references restrict their remarks to conventional statements such as that "Such-and-such a king, on his accession, abolished illegal taxes and imposed only those allowed by the Sharīʿa". Scholars have fought shy of this unrewarding topic. The present writer has made an attempt to handle the subject for the period ending with the collapse of the Almohade régime (*see Bibliography*) and R. Brunschvig appears to have exhausted it for the Ḥafṣids. References apart from these are laconic. In any case it appears to be unlikely that more material would make the picture clearer, at least for the first few centuries of Muslim rule, simply because the subject actually is vague. The turbulent history of the country gave no opportunity for the establishment of a lasting fiscal tradition. Tax-collection, like the other functions of government, was generally organized *ad hoc*. The government took what revenue it could as opportunity offered without overmuch scruple. The Sharīʿa was generally acknowledged to be the only proper regulator of fiscal methods, but it was just as generally ignored in practice. It may be supposed that the townspeople as a rule came under a more or less regular taxation system; but the country people, and particularly the nomads, were less accessible to the central administration, who could often extract tribute from them only by sending out what were virtually military expeditions often manned by outsiders not bound by any feeling of *esprit de corps* with the taxpayers. Some taxes were, according to the Sharīʿa, to be collected in kind, but for N. Africa we have little more than hints to show that, at one time or another, the government accepted payment in this form. There is some evidence that certain taxes were occasionally farmed out, but this seems in the Maghrib to be a late development first reported under the Almoravids and sporadically mentioned thereafter. There is no clear distinction between the privy purse and the public treasury.

Governors under the Caliphs.—There are no contemporary texts. They collected *ṣadaḳa* and *ʿushūr* and *djizya* but there is no clear indication of what these terms implied; later writers tend to interpret them in the light of legal doctrines which became established later. It seems as though the multitude of newly-converted Muslims led to the same difficulties in Ifrīḳiya as it had in ʿIrāḳ 20 years before, and there was an ill-fated attempt by Yazīd b. Abī Muslim to deal with them as Ḥadjdjādj had done. In the earliest days the *khums* had some importance and there were even attempts to treat the vanquished populations themselves as booty.

Aghlabids.—New tax names (*maẓālim*, *ḳabālāt*) appear, without definitions, and a distinct reference to the conversion of the tithe from a proportion, in kind, of produce, to a fixed sum per area.

Idrīsids.—Little information. The Jews of Fez were obliged to pay the *djizya*.

Rustamids.—This period affords the only (and probably idealized) account of the distribution of the agricultural produce accruing from taxation.

Fāṭimids.—The taxation system seems to take on a better-organized aspect, though this may be an illusion due to the nature of the sources. For the first time we hear of a cadastral survey and of *tawẓīf* or *tawzīʿ* ("apportionment" of tax?), and an attempt to establish the fiscal system on a rational and regular footing. Customs or *octroi* dues are first mentioned.

Zīrids, Hammādids, Berber Principalities (Maghrāwa, B. Ifren, etc.), Almoravids.—Information is very sparse, but Ibn Khallikān describes the Almoravids' tax-collecting detachments composed of European mercenaries.

Almohades.—ʿAbd al-Muʾmin is traditionally remembered as the one who introduced *kharādj* into the Maghrib. However this may be understood it probably symbolizes some striking innovation on his part. These is in fact an obscure account by Ibn Abī Zarʿ of a land-survey which preceded the levying of *kharādj*.

The *ṣāḥib al-ashghāl* (first mentioned in connexion with Manṣūr) was an important official in charge of finance. There seems to have been only one at any

given time and he is always mentioned among the high officers of state. The *mus̲h̲rif*, on the other hand, was a provincial official whose duties are not defined (but see the Ḥafṣid *mus̲h̲rif* below). We hear of *k̲h̲azāʾin* and *buyūt al-amwāl* "treasuries" but can only make guesses as to what these terms indicate.

Ḥafṣids.—A passage in Zarkas̲h̲ī (text 102, tr. 188) indicates a vast proliferation of taxes but in fact there is nothing to indicate that they were not in fact just as numerous in former times. The Ḥafṣids took over the title of *ṣāḥib al-as̲h̲g̲h̲āl*, and presumably his office, from the Almohades. Later this official is referred to as *munaffidh̲*. His subordinates are called *ʿummāl*. The *mus̲h̲rif* is in evidence here also but now as head of the maritime customs, with his subordinates called *mus̲h̲tag̲h̲il*. There were *octroi* duties (*maks*) collected by an official (he may have been a tax-farmer) called *makkās*. Tax-farming seems to have played a very minor rôle in the Ḥafṣids' fiscal policies. Many communities escaped close central control and were taxed only intermittently, when forced. One receives the impression that the taxes did not bear unduly hardly on the taxpayer; the system seems in general to have been mild and regular.

Marīnids.—Since the Marīnids inherited the Almohade machinery *en bloc* presumably their taxation system resembled that of the Almohades; but information is almost entirely lacking. Under Abū Saʿīd, however, tax-farming (if ʿUmarī is to be believed) was the rule; his successor Abu 'l-Ḥasan "abolished the illegal taxes". (*Masālik al-abṣār*, tr. Gaudefroy-Demombynes, 170-1).

Beylerbeys, Pas̲h̲as, and Deys of Algiers. —Little is known, but the pillaging expeditions (*maḥalla*) sent out by the Beys into the countryside may perhaps be looked upon as part of a fiscal system. The Turkish government exploited the country to its utmost with the aid of *mak̲h̲zan* tribes and military colonies (*zmāla*) who were exempted from taxation; but its power hardly extended beyond the chief towns and the main lines of communication.

Ḥasanī Sharīfs (Saʿdīs).—During the days of the last Marīnids and the B. Waṭṭāṣ much of Morocco had lost the habit of paying taxes. The first Saʿdīs seem to have levied only an occasional tax in kind called *nāʾiba*, but later this became more or less permanent and payable in cash. The *k̲h̲arād̲j̲* was re-introduced, not without revival of an old controversy concerning the legal status of the lands of the Mag̲h̲rib. Certain monopolies were farmed out. and the Sultan took a percentage of the proceeds of piracy. Taxation was not only crushingly heavy, but it had extortion added to it. The Ḥasanī *mak̲h̲zan* is a prime specimen of a government organized solely to exploit the resources of the country for its own profit.

Filālī S̲h̲arīfs (ʿAlawīs).—Mawlāy Muḥammad (1171/1757-1204/1789) is said to have established sundry market and commodity taxes, but it is difficult to believe that this was really an innovation. At Fez, perhaps elsewhere also, they were sometimes farmed out to the governor. Apart from these indirect taxes collectively called *mustafād* the treasury received the "legal" taxes *zakāt* and *ʿus̲h̲ūr* (the distinction between these two terms, originally synonymous, is not clear), and the *nāʾiba* mentioned above. Customs dues and the *hadāyā* (customary "gifts" to the Sultan at the feasts) were received directly by the Sultan. The authority of the tax-collectors was reinforced by contingents of the *gis̲h̲* (*i.e.*, *d̲j̲ays̲h̲*) tribes, who were exempt from tax.

Beys of Tunis.—The subject is obscure and still awaits the investigation for which the sources would probably prove quite abundant, but the picture seems to be similar in general to that under the Beys of Algiers. Though from about 1112/1700 onwards the Beys were accepted as a national hereditary dynasty they and their administration continued to be a parasite on the Tunisian body politic, concerned more with exacting the maximum for their private profit than with maintaining a sound and equitable fiscal system. Their failure in this respect and their indebtedness to foreign creditors was one of the main causes of the imposition of the French protectorate in 1882.

Bibliography: Few writings are devoted exclusively to fiscal matters. The list below includes most of those which attempt to deal with the topic in any detail.

R. Brunschvig, *La Berbérie orientale sous les Ḥafṣides, des origines à la fin du XVme siècle*, 2 vols., Paris 1940-7, ii, 66 ff.; J. F. P. Hopkins, *Early Muslim government in Barbary*, London 1958; Michaux-Bellaire, *Les impôts marocains*, in *Archives Marocaines*, i; idem, *L'organisation des finances au Maroc*, in *Archives Marocaines*, xi; Lécureuil, *Historique des douanes au Maroc*, in *Arch. Mar.*, xv; Donon, *Le régime douanier du Maroc et le développement du commerce marocain jusqu'à nos jours*, Paris; J. Ganiage, *Les origines du protectorat français en Tunisie*, Paris 1959.

(J. F. P. Hopkins)

(3) — Ottoman Empire. In the Ottoman system the taxes were divided into two groups, *ḥuḳūḳ-i s̲h̲arʿiyye* and *rusūm-i ʿurfiyye*. The former included *ʿus̲h̲r* [*q.v.*] or *ondalık*, *k̲h̲arād̲j̲*, *d̲j̲izya* [*q.v.*], *k̲h̲ums-i s̲h̲arʿī* levied on mi‸rals mined and *g̲h̲anīma* [*q.v.*]. Other Islamic taxes objected to by some legists, such as *maks* [*q.v.*], were included rather among the *ʿurfī* taxes by the Ottomans (for the *s̲h̲arʿī* taxes dealt with by the Ottoman legists see Mollā K̲h̲usrew, *Durar al-ḥukkām fī s̲h̲arḥ g̲h̲urar al-aḥkām*, Istanbul 1258, 129-43). On the other hand they added to the *ʿus̲h̲r* an *ʿurfī* tax called *salāriyye* or *salārlık* which raised it from one-tenth to one-eighth, and collected some additional dues, *rusūm* or *ʿādāt*, on hives, fisheries, hay, and vegetables. Also *d̲j̲izya* was somewhat modified in its application in the Ottoman empire.

The *ʿurfī* taxes [see ʿURF] were those assessed by the Sultan and, in origin, were mostly pre-Ottoman local taxes. They were recorded by the Ottoman *taḥrīr* [*q.v.*] *emīn*s and proclaimed in the *ḳānūn-nāme*s (see ḲĀNŪN) of the sand̲j̲aḳs. With the development of *ʿurf* this kind of taxation grew in importance, though from the 10th/16th century there appeared a strong tendency to accommodate these taxes, at least formally, to the *S̲h̲arīʿa*.

The *ʿurfī* taxes, generally called *rusūm* or *ʿādāt*, were divided into various categories: 1. Up to the late 10th/16th century the basic *ʿurfī* taxes were *čift resmi* and *ispend̲j̲e* [*qq.v.*]. The latter was paid by every adult non-Muslim at the rate of 25 *akče* [*q.v.*] per person. Widows paid it at the rate of 6 *akče* under the name of *bīwe resmi*. 2. Of the taxes levied on livestock the most important was *ʿādet-i ag̲h̲nām* or *ḳoyun resmi* which was usually 1 *akče* for two sheep, collected directly for the central treasury. The pasturage due, called *yaylaḳ resmi*, *otlaḳ resmi* or *resm-i čerāg̲h̲ah* was usually one sheep or its money equivalent for each flock of sheep of 300

which passed over to another *sandjak*, *kaḍā* or *tīmār*. It was paid to the person holding the land as *tīmār* or *khāṣṣ* (see TĪMĀR). 3. The dues called *bād-i hawā* [*q.v.*] or *ṭayyārāt* were principally such dues levied on occasional cases as *djerā'im* or *kanluk*, fines, *'arūsāne* or *gerdek resmi* or *nikāh akčesi* bridegroom due, *yawa* and *kačkun*, dues paid while recovering runaway cattle or slaves, *ṭapu resmi*, a due paid on entering into possession of a *čiftlik* [*q.v.*]. *Djerā'im* was also called *niyābet*, because for each case a decision of a *nā'ib* appointed by the local *kāḍī* was necessary. 4. The principal imposts on trade were *bādj* or *tamgha*, market dues, paid per load; *kapan* (*kabbān*) and *mīzān* or *terāzū rusūmu*, duties levied at the public scales. There were also *gümrük*, customs duties, *gečid resmi*, tolls levied at mountain passes and river fords, *köprü hakkî*, bridge-toll. 5. The state established monopolies on the trade of such commodities as salt, rice, wax-candles, soap, sesame and lumber. The monopoly of minting was also a large source of revenue [see DĀR AL-ḌARB]. 6. The *'awāriḍ-i dīwāniyye we tekālīf-i 'urfiyye* [see 'AWĀRIḌ] were in origin certain services which the state required from its subjects to fulfil in emergency, but *bedel*, cash substitute for them, could be given instead and from the late 10th/16th century this became a regular tax collected directly for the central treasury. 7. The fees paid by persons for whom a document, *berāt*, *tedhkire*, *ṣūret-i defter* etc., was issued at a government office were another important source of revenue for the treasury. The rates were carefully fixed by law. The tax collectors or other officials sent by the Sultan were authorized to collect *'ā'idāt*, fees and remunerations, for themselves, and these in the period of the decline of the Empire became the source of many abuses.

In addition to these *'urfī* taxes there were some dues in contradiction to the *Sharī'a* or to Ottoman administrative principles, which, nevertheless, continued to be levied either by the state or *tīmār*-holders as *bid'ats*. For example the treasury could not give up the large revenue obtained from the *bid'at-i khinzīr* or *domuz bid'atî*, pig-tax. There were, however, some *bid'ats* called *bid'at-i merdūde* ('rejected innovation') which were absolutely prohibited as against *bid'at-i ma'rūfe* ('acknowledged innovation').

After its conquest each *sandjak* had its own *kānūn* embodying the *'urfī* taxes. Most of them were taken over from the pre-Ottoman regimes, but after a period of adjustment the Ottomans usually extended their own *kānūn-i 'Othmānī* with typically Ottoman taxation. It seems to have formed still under strong local influences, Saldjūkid and Byzantine in western Anatolia and Thrace in the late 8th/14th century. Its main characteristics can be seen in the *kānūnnāmes* of western Anatolia which were extended to eastern Anatolia toward 947/1540. These characteristics were simplicity and the policy of abolition of all kinds of feudal services and dues. An excessive burden of local and feudal dues was replaced by a few taxes such as *čift resmi*, *ispendje* and *'ādet-i aghnām*. It was provided that no tax should be levied twice under different names. This system did much in consolidating the Ottoman rule in Anatolia and Rumeli. But when in the late 10th/16th century a profound economic and financial crisis shook the established order, and the rates of *'awāriḍ*, *djizya* and the other taxes paid in cash were raised in an attempt to adjust them to the depreciation of the currency (see *Belleten*, no. 60), and and the exactions of the *'askerī* class [see 'ASKARĪ] in the provinces became more and more arbitrary, the whole Ottoman tax system underwent a fundamental change.

In the collection of taxes two basic systems were followed, the *ḥawāla* and *mukāṭa'a* or *iltizām* [*qq.v.*] systems. *A'shār* [see 'USHR] as well as *čift resmi*, *ispendje*, *bād-i hawā* and most of the other *'urfī* taxes were assigned as *tīmārs* to the members of the *'askerī* class who collected them themselves in their respective *tīmār* lands. In view of the difficulties for the central government in collecting taxes in kind, such as *a'shār*, and of the lack of adequate means of communication, this system was maintained as the best possible method at that time. In essence *tīmār* was a form of *ḥawāla*. The distribution and assignment of *tīmārs* were made by *taḥrīr* and all this made a vast department of financial administration called *daftar-i khākānī* [*q.v.*] under a *nishāndjî* [*q.v.*]. The total sum of the revenues in this section was about 200 million *akče* or about 3.5 million gold ducats in 933/1527-934/1528. Income unrecorded in the *defters* [see BAŞVEKÂLET ARŞIVI] was to be collected by officers of the Sultan called *mewkūfdju* or *mewkūfātdjî*, under the *defterdār*, directly for the treasury.

Except for the *a'shār*, *shar'ī* taxes, *resm-i berāt* and *tedhkire* and *bayt al-māl* (that is, escheated properties), *mewkūfāt*, and the revenues from the imperial domains [see KHĀṢṢ] were collected for the central treasury, *khizāne-i 'āmire*, either directly by *kuls*, men of slave origin at the Porte, or through the *iltizām* system.

The following is an official statement of the revenues from these sources for the provinces of Rumeli, Anadolu, Karaman, Dhulkadriye and Rūm in the fiscal year of 933/1527-934/1528 (*İstanbul Üniv. İktisat Fakültesi Mecmuası*, xv, 1-4, 269).

mukāṭa'āt	71,524,055 *akče*
djizya	46,056,305 *akče*
resm-i berāt and *tedhkire*	1,897,625 *akče*
bayt al-māl, *mewkūfāt* and *mā-beyn*	1,928,257 *akče*

This was about one fifth of the total amount of the state revenues in the same year. The most important item in it, *mukāṭa'āt*, included the revenues of the Imperial domains (*Khāṣṣ-i Humāyūn*), state monopolies, *khums-i shar'ī*, customs duties and imposts on trade. The *mukāṭa'āt* were usually farmed out to the *mültezims* or *mukāṭa'a 'āmili* under the system of *mukāṭa'a* [*q.v.*], and their accounts were kept in the *mukāṭa'a defterleri* in the *defterkhāne-i 'āmire* (one of the oldest and most important of these *defters* covering the reign of Meḥemmed II is in the *Başvekâlet* Archives, Istanbul, nos. 176, 6222, 7387).

The *iltizām* system was essential for the Ottoman finances from the beginnings of the state and was also used by the big *tīmār*-holders. Upon an order, *ḥawāla*, of the Sultan payments were made for state expenses directly by the *mültezims*. From the 10th/16th century onwards, the *iltizām* system became dominant throughout the empire and the *mukāṭa'as* began to be farmed out for much longer periods; by the 12th/18th century the governors of some provinces became *mültezims* at the same time, which made them virtually autonomous. As the central authority weakened the abuses of the system grew until in 1255/1839, by the rescript of Gülkhāne, *iltizām*, termed a 'destructive instrument', was abolished. The system of *emānet*, a system of collection of *mukāṭā'a* revenues directly by salaried employees called *emīn*, was made general and

muḥaṣṣils, financial heads in the *sandjaks* [*q.v.*] with full responsibilities, were appointed. But the decrease in the state revenues under the new system compelled the government to restore *iltizām* which lasted to the end of the Empire.

(4) — Post-Ottoman Egypt. In the years immediately preceding the Napoleonic invasion of Egypt in 1798, the Egyptian government's principal source of revenue was derived from numerous taxes levied on the land. These fell into three main categories: (1) *al-māl al-ḥurr*; (2) *māl* (or *khidmat*) *al-kushūfiyya*; and (3) supplementary taxes, the *muḍāf* and *barrānī*. The government farmed out all these land taxes to *multazims* who collected them through their agents, most of whom were members of the Copt corporation.

The first of these taxes, *al-māl al-ḥurr*, was composed of the *mīrī* and the *fāʾiẓ*. The *mīrī* was a fixed tax, part of which was destined for the Sultan's Private Treasury in Istanbul while the remainder was kept in Egypt to support the cost of local government. The *fāʾiẓ* went to the concessionaires of *iltizāms* (tax farms), the amount of this tax being fixed by the terms of the concession. To increase their profits, the *multazims* eventually demanded the payment of extraordinary taxes (*muḍāf* and *barrānī*), collecting them regularly despite their illegality. The *māl al-kushūfiyya* paid for the military and administrative expenses within the Egyptian provinces. All these taxes were paid either in specie or in kind.

The government's other sources of revenue included a succession tax (*ḥulwān*) paid by those heirs of *multazims* who desired to inherit tax farms; the *djizya* [*q.v.*]; fixed tax on customs duties, which the tax farmers of customs were required to remit to the government; a tax levied on certain government officials whose functions involved the collection of recognized dues; duties on boats navigating Egyptian waters; duty on the corporation of goldsmiths; various levies on trades, merchants, and *wikāla*s, *i.e.*, buildings designed for the reception of merchants and their goods; the proceeds from grants of tax farms on the sale or manufacture of various products; and profits from the mint. About a quarter of the revenue obtained from these sources was sent to Istanbul along with the *mīrī* on land and some Egyptian produce for use in the *saray* and naval arsenal.

This fiscal system remained substantially the same during the three-year period of the French occupation of Egypt. Napoleon announced shortly after his arrival in Cairo in July 1798 that he wished to change none of the existing institutions or traditional taxes but planned only to eliminate arbitrary exactions and to introduce a regular system of tax collection. Indeed, the only change he made at the outset was to join the lands formerly held by Mamlūk *multazims* to the state domain for the profit of the French Republic (approximately two-thirds of the land of Egypt). Napoleon then confirmed the non-Mamlūk *multazims* in their *iltizāms*. Taxes continued to be collected by the Copts, under the supervision of French inspectors.

When Muḥammad ʿAlī became Pasha of Egypt in 1805, he altered the fiscal system radically by expropriating the *multazims* and the beneficiaries (*mutaṣarrif*) of *al-rizaḳ al-aḥbāsiyya*, state lands which had been illegally endowed with the characteristics of *waḳf* property. *Waḳf*s on houses and gardens, *i.e.*, endowments based on *milk* property, were not affected, however, since they were considered sound or legal *waḳf*s. As compensation for their loss, the *multazims* received a pension and the right to cultivate their *waṣiyya* lands (the portion of the *iltizāms* which had been assigned to *multazims* for their exclusive enjoyment). Neither was heritable; upon the death of the *multazims*, these pensions ceased and the *waṣiyya* lands reverted to the state. The beneficiaries of *rizḳa* lands also received a life pension while the state assumed the responsibility of maintaining mosques and charitable institutions, which had depended for their support upon revenues from these lands.

A cadastre of all cultivated (*maʿmūr*) lands was carried out in 1813-14; registers were prepared, listing the names of landholders, the quantity of land held, and the amount of the *mīrī*, now a single tax replacing the former complex schedule of taxes and rated according to the fertility of the land and ease of irrigation. The only lands excluded from the cadastral registers were the *waṣiyya* lands of the expropriated *multazims* and the uncultivated or uncultivable land (the so-called *abʿādiyya* land). The rate of the land tax did not remain fixed at

the 1813-14 level, but was augmented periodically as the Pasha's need for revenue mounted; nor did all the land remain under direct government supervision. Instead, Muḥammad ʿAlī assigned estates to members of his family, to favourites, and to foreigners. Some of these estates were known as *čiftlik* [*q.v.*]; others as *abʿādiyya* (estates reclaimed from lands uncultivated at the time of the 1813-14 cadastre and granted on favourable terms); and *ʿuhda*s, estates consisting of bankrupt villages whose taxes were collected by their new landholders (*mutaʿahhid*s) rather than by members of the government hierarchy. The substance of the land (*raḳaba*) of all these estates was retained by the state, the landholders possessing only usufructuary rights (*taṣarruf*).

Along with his land reforms, Muḥammad ʿAlī also monopolized all money crops (cotton in particular), creating in consequence of this new policy an important source of revenue for the government.

Other innovations, as well as the retention of taxes antedating Muḥammad ʿAlī, are reflected in the extant budgets of this period. Receipts fell into three major categories: (1) direct taxes; (2) customs and *appaltos*, farms for the collection of duties on sundry items granted by the government for one or more years; and (3) profits from agriculture and industry. Direct taxes incorporated taxes on property, i.e., *mīrī* (land tax), tax on date trees, on successions to city properties and gardens, duties on *wikāla*s, bazaars, and houses; taxes on persons, called *furdat al-ruʾūs*, a personal tax amounting to 3 per cent on known or supposed revenue of all the inhabitants of Egypt, which was paid by all government employees, including even foreigners, by Egyptian employees of non-government establishments, by *fallāḥīn*, and by artisans and merchants, the *dj̲izya*, and a duty on dancers, prostitutes, jugglers, and conjurers; taxes on things, i.e., duties on boats navigating Egyptian waters, fish of the Nile, salt, fruit, butchers' shops, hides, tallow, smelting of silver, galloons for goldsmiths, animals, irrigation implements (*sāḳiya*s and *s̲h̲ādūf*s), exportation of cereals from Egypt, tax on textile looms, stamp duty, quarantine and lock dues, profits of the mint and the Transit, and miscellaneous duties; octrois, *i.e.*, octroi on eatables and duty on grain entering Cairo.

Revenues from customs and *appalto*s included customs collected at Damietta, Rosetta, Būlāḳ, Old Cairo, Deraoui, Asyūṭ, Suez, Dj̲idda, al-Ḳuṣayr, and for merchandise coming overland from Syria; and *appalto*s on fish of Lake al-Manzala, Lake Ḳārūn, and Baḥr Yūsuf, on wines, spirits, and liqueurs, on senna, on oil from linseed and other seeds. Profits from agriculture and industry were obtained from the sale of cotton, sugar, indigo, opium, henna, honey and wax, safflower, flax, linseed, seed (sesame, lettuce, and *Carthamus*), raw silk, rosewater, rice, tobacco, wheat, beans, barley, maize, lentils, cotton goods, linen goods, silks, calicos and handkerchiefs, raw and tanned hides, horns, natron (carbonate of soda), nitre, sal-ammoniac, lime, plaster, tiles, and mats. In addition, the government obtained revenues from freight carried by government boats, gums (from Sinnār), coffee (from al-Yaman), and elephant tusks.

In general, Muḥammad ʿAlī's fiscal system endured until the British occupation of Egypt. Ibrāhīm Pas̲h̲a introduced nothing new during his short reign, while ʿAbbās altered the system very little, although he economized on those projects begun by his grandfather which seemed wasteful. He abolished those *ʿuhda*s whose proprietors had failed to comply with the terms of their concessions, and suppressed the octrois. He also relieved the tax burden of the peasants by removing a large part of the *furdat al-ruʾūs*.

His successor, Saʿīd Pas̲h̲a, changed the existing fiscal system, somewhat, by ending the monopoly system and opening the country to free trade, allowing foreign merchants to deal directly with the Egyptian peasants. To compensate for the loss of revenue from government monopolies, he introduced a new policy regarding land taxes. Former tax-free lands were now taxed, some with the *k̲h̲arādj̲*, and others with the *ʿus̲h̲r*, the rate of taxes being substantially increased as well. In 1853, during ʿAbbās's reign, the revenues from the land tax had amounted to 348,398 purses or £ 1,741,995; by 1858, Saʿīd had increased them to 501,898 purses or £ 2,509,492, almost a 50 per cent increase on land taxes alone (Green, May 1, 1858, in F.O. 78/1401). In addition, Saʿīd reinstated the entire *furdat al-ruʾūs*, adding it to the land tax.

Saʿīd's Land Law of 1858 introduced an important innovation of long-range significance. Under this law, the right to inherit, mortgage, and retain land permanently was granted to existing landholders, provided they paid their taxes. If these taxes were not paid within five years, the landholders were deprived of their lands permanently. This time limit, imposed by the new law, constituted a real change from traditional practices. Formerly, a peasant who had failed to pay taxes on his *athar* land (land held on usufructuary tenure but passed from father to son for generations) was dispossessed until such time as he was able to meet his obligations. In this way, he could always hope to recover his land, no time limit existing which could for ever alienate him from it. Indeed, the class most favoured by the Land Law of 1858 proved to be that of the rich landholders rather than of the poorer peasants. The ill effects of this law were particularly felt in the next reign. Those peasants who had over-extended their credit during the cotton boom of the 1860's were greatly in debt when the market collapsed at the end of the American Civil War. Consequently, many peasants, unable to pay their taxes, lost their land. To make matters worse, Ismāʿīl's excessive demands deprived still more peasants of their land because of their inability to pay the government. The Khedive took advantage of the peasants' plight to add more and more of their land to his private estates, until he eventually possessed one-fifth of the agricultural land of Egypt, which he exploited for his own profit.

Khedive Ismāʿīl resorted to numerous expedients to increase his revenues. Among these was his *Muḳābala* Law of 1871 which provided that all landholders agreeing to pay six years' taxes in advance would be permanently exempted from 50 per cent of their land tax, whether *k̲h̲arādj̲* or *ʿus̲h̲r*. This fiscal device failed to meet Ismāʿīl's expectations because many landholders refused to take advantage of it. Ismāʿīl was no sooner removed from office when the law was abrogated (1880) and taxes reimposed on all land. With the British occupation of the country in 1882, the fiscal functions of the Egyptian government passed into the hands of the British administrators.

(5) — Persia. There is, on the whole, a remarkable continuity of practice in the matter of taxation in Persia from early Islamic times down to the 20th century; but whereas there was in early times an attempt to reconcile existing practice with Islamic theory and sporadic efforts to abolish non-sharʿī taxes, after the break with tradition in early Mongol (Ilkhānid) times, in spite of the Islamization of the administration under Ghāzān Khān and his successors, the general tendency was away from the Islamic theory of taxation towards a multiplication of taxes and dues and a greater variety of usage. Moreover, since there was no longer even an outward attempt to make the tax administration conform to the ideal of Islamic theory, the tendency towards arbitrary action increased; but the general principles of the tax system, the methods of assessment and collection, and the main problems to be faced did not vary greatly and such changes as took place prior to the 20th century were of degree rather than of a more fundamental kind. New dynasties and new rulers did not involve fundamental changes in the tax administration. The tax regime of Uzun Ḥasan, laid down between 874/1470 and 882/1477, is alleged still to have been operative in Ṣafawid times. Many oft he main features of the Ḳādjār tax administration are already to be seen under the Ṣafawids, the period of Afshār and Zand rule having brought little that was new in the field of taxation. At no time, however, did a uniform system prevail throughout the country. In general the amount of money in circulation was limited; commerce was not highly developed and there was difficulty in transporting and remitting large sums of money, all of which affected the system of administration in general and of taxation in particular. Further, the tendency for the silver currency to depreciate makes it difficult to evaluate accurately the changes which took place in the amount of tax levied and its relative incidence. Money going into the Royal Treasury is alleged by various foreign observers to have been hoarded and seldom to have reappeared in circulation; but as against this the money thus accumulated would seem not infrequently to have been dissipated on military expeditions, accession gratuities to secure the throne against rival claimants, and other emergencies; while the frequency with which the pay of the army and the official classes was in arrears suggests that the treasury was not always as full as might be supposed were the surplus revenue hoarded. In any case by the latter part of the 19th century there was a constant struggle to provide revenue to meet the growing demands of the administration and an extravagant court. No very clear distinction was made between the revenue of the state and the ruler's private income; any surplus eventually found its way into the royal purse. In the Ṣafawid period there was a broad distinction between funds belonging to the state (*māl-i maṣāliḥ*), administered by the *mustawfī al-mamālik* under the Grand Wazir, and the funds belonging to the royal household (*māl-i khāṣṣa*), administered by the *mustawfī* of the *dīwān-i khāṣṣa*, corresponding roughly to the earlier division between the *dīwān* and the *dargāh*. How early this distinction is found is uncertain. Chardin affirms that it was first introduced by Shāh Ṣafī (A.D. 1629-42); in any case there was considerable overlapping between the two divisions. By Ḳādjār times the distinction between them such as it was had disappeared. The general tax structure and the broad division into "fixed" taxes (*māl wa djihāt* and later *māliyāt*) and extraordinary levies and requisitions, and the purposes to which the revenue was devoted, namely the payment of the army, salaries of officials, pensions, and the upkeep of the royal court, were largely the same. Whereas, however, under the Ṣafawids large areas of the empire were alienated from the direct control of the central government and little supervision exercised over the tax administration of these areas, there was an attempt under the Ḳādjārs to centralize the tax administration; but the farming of the taxes to governors and others made nonsense of this and by the 20th century chaos prevailed in the tax administration. Collection was profoundly unsatisfactory; such checks and controls as had been devised had broken down, and the system was oppressive in its operation.

The most important of the "fixed" taxes were those levied on the land or its produce. A great variety of practice existed as regards both the method and rate of assessment. Moreover the extent of the area subject to the payment of land tax varied considerably. Much of the land as stated above was alienated from the direct control of the government in the form of *tiyūl*s and *suyūrghāl*s, which carried full or partial immunity from taxation. The latter were granted mainly on crown lands, *waḳf* land, and dead lands. According to Chardin the the Ṣafawid empire was divided into "provinces" (*mamālik*), *i.e.*, indirectly administered areas, and directly administered territory (*khāṣṣa*); the governors of the former, he affirms, remitted to the central government only a lump sum by way of a present (*pīshkash*) at the new year and a proportion of the produce and products of the province for the use of the royal court and workshops, retaining the remainder of the provincial revenue for the expenses of the provincial administration. To what extent

such provincial governors under the Ṣafawids and those of the provincial governors who farmed the revenues of their provinces under the Ḳādjārs exercised freedom of action in the assessment and collection of taxes is not entirely clear. In either period the *mustawfīs* of the central government prepared and sent, usually annually, to the provinces detailed assessments of the provincial districts, known as *dastūr al-ʿamal*, according to which, or on the basis of which, the *mustawfīs* in the provinces allocated the tax demand among the provincial population. It is also not clear to what extent *waḳf* land was exempt from taxation. It seems in any case unlikely that those *waḳfs* of which the ruling monarch was the *mutawallī* paid tax; Curzon states that *waḳf* land was exempt from taxation, but it may be that exemption was, in fact, not automatic but granted by a special decree or *farmān*. After the grant of the constitution in 1906, *waḳfs* of which the reigning Shāh was *mutawallī* were exempted from taxation on the grounds that the income of the Shāh was not taxable; other types of *waḳfs* were subject to taxation.

The land tax was assessed in three main ways: by measurement, as a proportion of the produce, or in a lump sum. The assessments were not made at regular intervals and were frequently hopelessly out of date; though where the tax due was assessed as a definite proportion of the crop, the government tax collectors of necessity estimated this annually. The most common form of assessment by Ḳādjār times was the computation of the revenue due from a town or village in a lump sum; this had the advantage of avoiding annual visits by the tax collectors to assess the amount of the crop. The tax due, assessed partly in cash and partly in kind, was known as the *bunīča* of the area; it included from about the middle of the 19th century also the number of soldiers which the area was required to provide or a sum equivalent to the wages of a given number of soldiers. The final allocation of the tax demand among the population of the town or village was made locally. Special remissions on account of natural calamities or in return for some special service were granted from time to time and occasionally became permanent. More often, however, additional levies were made on account of arrears or to meet some emergency or special need, and the general tendency was for these to become part of the regular assessment. Further by the manipulation of the conversion rates (*tasʿīr*) by which taxes assessed at an artificial currency rate or in kind were converted into cash, the rate of taxation was increased. The assessments being usually out of date, it frequently happened that a village which had declined in prosperity and whose inhabitants had decreased on account of war, famine, emigration or some other cause, would be over-assessed and the amount of taxation due from the individual taxpayers automatically raised. Conversely villages which had increased in prosperity or had been newly developed were often under-assessed.

The rate of the land tax varied; it was affected by the nature of the crops grown and sometimes by the type of irrigation. Under Uzun Ḥasan's tax regime the rate at which tax was levied on the produce of the land varied from 14 to 20 per cent of the produce; in addition dues were levied on each plough-land. Under the Ṣafawids a somewhat similar situation presumably prevailed; Chardin, however, states that the tax on silk and cotton was one third of the produce. The rate in Ḳādjār time seems to have been in the main some 20% of the crop; though a tradition affirms that prior to the reign of Fatḥ ʿAlī Shāh the rate was one tenth. This rate seems unlikely, however, to have been generally current. In any case a wide variety of practice existed. On grain crops the tax demand was paid in kind, the grain thus obtained being stored in government granaries and held against emergencies such as military expeditions and famine, or in some cases sold at fixed prices to the local population. Where the tax demand was made in kind as a fixed proportion of the crop it was presumably usually levied on the threshing floor before the division of the crop between the landlord and the peasant.

The extent of crown lands fluctuated. In cases where they were directly administered land tax as such was not levied, the whole of the produce after the deduction of the peasant's share going to the treasury. If leased, the rent paid by the tenant presumably included, or was in lieu of, land tax, and resembled an ordinary crop-sharing agreement. Under the Ṣafawids the land round Iṣfahān was largely crown land and administered by a special *dīwān* under the *mustawfī-i khāṣṣa*.

In addition to the tax on the land or its produce water dues in the case of large rivers were levied. Pasture dues and a herd tax were also collected in some areas from both the settled and the semi-settled population; but their incidence and method of assessment varied. Among the other "fixed" taxes was a tax on real estate (other than agricultural land), such as baths, shops, water-mills, and caravanserais etc. (*mustaghallāt*), computed in early Ḳādjār times at 20 per cent of the estimated annual proift. Malcolm alleges that there had been large increases in crown property of this nature owing to confiscations after the fall of the Ṣafawid and later dynasties. Where such property was rented by the crown to tenants, the rent presumably included, or took the place of, the tax levied on privately owned property of this kind. A poll-tax was paid by non-Muslims, Jews, Armenians, and Zoroastrians; and by foreigners unless granted special immunity. This derived from the canonical poll-tax or *djizya*. Various other sections of the community, including certain tribal groups, also paid what amounted to a poll-tax (*sarāna, sar-shumārī*). There are references in various documents to some kind of house or family tax (*khāna-shumār*). Poll-taxes were finally abolished by the law of 20 Ādhar 1305 A.H. (solar)/1926.

Taxes were levied on the craft guilds, except where special immunities were granted, by a group assessment, also known as *bunīča*. In Iṣfahān in Ṣafawid times the *kalāntar* and *naḳīb* of Iṣfahān would assemble the guilds in the first three months of the year and the *naḳīb* would fix their *bunīča* with the *kadkhudā* of the guild, this being subsequently allocated among the individual members of the guild. In practice, however, in the same way as the assessment of the land tax tended to become out of date so too was the *bunīča* of the guilds often out of date. Craft guilds continued to pay tax in this way until 1926, when this form of tax was abolished by the law of 20 Ādhar 1305 A.H. (solar).

As regards taxes on merchants there appears to have been no uniform practice. Certain commodities were from time to time subject to special taxes. For example the *Tadhkirat al-Mulūk* mentions taxes on the tobacco trade. Market taxes were also in some cases levied. The main fixed taxes to which merchants were subject were road tolls (*rāhdārī*) and customs

dues. The former were usually levied at so much per animal load at each town, the rate at which they were levied varying. Customs duties were paid on merchandise at the port of entry or exit. In the Ṣafawid period a duty of 10 per cent was levied by the customs houses in the Persian Gulf; on other frontiers the duty was levied per load. Certain exemptions and reductions were granted to various foreign merchants. By the Treaty of Turkomančay (1828) an *ad valorem* tariff of 5% was imposed on imports and exports by Russian merchants; in due course equivalent treatment was demanded by and granted to other nations. Persian merchants paid only 2 per cent but were subject in addition to road tolls. The revision of the customs tariff in 1903 was prejudicial to Persia and partial to Russia. The customs and road tolls were usually farmed in each district.

A levy on mines and pearl fisheries was made at the rate, in Ṣafawid times, of one third of the produce. Similarly a levy of 2 per cent on coins (*wādjibī*) is mentioned. The mints were also a regular source of revenue in Ḳādjār times. In the latter part of the 19th century the post and telegraphs became an additional source of revenue.

Numerous other dues made up the "fixed" revenue. Here again a great variety of practice existed and there is little detailed information on the rates at which these various dues were levied. Many of them were still levied in the 20th century. Millspaugh notes that some two hundred miscellaneous taxes existed in 1922. Included among these dues were those paid to afficials, local and otherwise, which did not necessarily go through the officials of the revenue department and were in many cases collected locally and constituted the whole or a large part of the salary of the officials in favour of whom they were levied. The holders of *tiyūl*s, annual grants, and *suyūrghāl*s in Ṣafawid times paid a certain percentage of their assignments to various officials ranging from the *wakīl* of the supreme *dīwān* to the *daftardār* and other minor officials. More onerous than these, however, because more arbitrary in their incidence were the dues collected by local officials as their perquisites of office.

A further charge on the peasants and some of the craft guilds was labour service exacted by the state or a money payment taken in lieu of this. The incidence of labour service varied from place to place and it is difficult to assess it in money terms. The exaction of such service however could not fail to degrade the station of the peasant and artisan and to emphasize his subjection to authority.

The liability of the taxpayer was not limited to the payment of "fixed" taxation; perhaps the most onerous forms of taxation to which he was subjected were constituted by extraordinary levies, of which *ṣādirāt* and *suyūrsāt* were the most widespread and the most burdensome, and "presents" (*pīshkash*), casual and otherwise. *Ṣādirāt* comprised levies made to meet special expenditure such as that occasioned by a military expedition, the construction or repair of a royal building, or some special festivity, or simply to make good a deficit in the revenue. According to the nature of the occasion the whole country or a district or section of the community only was subjected to the levy. Its incidence was arbitrary in the extreme and its levy gave great scope for the show of partiality and the exercise of injustice. *Suyūrsāt* consisted of levies made for the keep and expenses of military forces, government officials, and foreign envoys passing through the country and like the *ṣādirāt* bore heavily upon the peasantry. Presents (*pīshkash*) were of two kinds, "casual" and "regular". The latter were remitted annually at the New Year and in some cases on certain religious festivals, such as the *ʿīd-i mawlūd*, by provincial governors, chiefs of tribes, and high officials. The amount of these presents was fixed broadly by custom. The occasions for the levy of casual presents were various. On the assumption of office by governors and high officials a payment, virtually equivalent to purchase money, was often expected and made; the grant of a *khilʿa* in many cases would cost its recipient a sum commensurate with his position in society; the progress of the shah through a district would involve the presentation of presents by all and sundry; similarly the visit of the Shah to the house of a favoured minister would impose upon the latter and his family and retainers heavy expenses in the form of presents; further, the heirs of the numerous body of persons who received pensions from the state had frequently to purchase the renewal of these grants, as did also the holders of *tiyūl*s and their heirs. This system of *pīshkash* extended throughout the administration; not only did the Shah expect and receive *pīshkash*, his governors and ministers also demanded and received similar treatment in the areas under their jurisdiction and from their subordinates.

Another irregular source of revenue, the extent of which, though difficult to compute, was no doubt considerable was confiscation (*muṣādara*) from officials dismissed from office, fines, and bribes. To these were added from the second half of the 19th century A.D. onwards considerable sums received from monopolies, concessions, and royalties.

In the latter part of the reign of Nāṣir al-Dīn various steps were taken to unify the tax administration of the country, abolish certain of the irregular taxes and requisitions, increase the revenue, and improve collection. A decree of 1303/1885-6 laid down certain changes in the collection of the revenue and attempted to define the financial responsibility of the governor. Instructions were issued for a new land survey and the levy of land tax at the rate of 10 per cent of the produce and various dues in 1307/1889-90. These and other measures were not, however, attended by any marked degree of success and were not operative throughout the country.

Full figures cannot be given for the total revenue owing to the impossibility of computing the extent of the revenue outside the "fixed" taxes. According to the *Tadhkirat al-Mulūk* the state revenue (*i.e.*, excluding revenue from the *khāṣṣa*) in late Ṣafawid times amounted to c. 800,000 *tūmān*s. 61 per cent of this came from taxes registered in the *awārija*, which Prof. Minorsky thinks may have been land taxes; levies including rents from real estate excluding agricultural land, etc. accounted for 14.5 per cent, mines for 2 per cent, and produce and products remitted to the royal workshops for 1.5 per cent. According to the same source the total cost of the army and administration was 491,986 *tūmān*s 57,000 *dīnār*s, of which 396,792 *tūmān*s went to amīrs and governors. The first charge on the provincial revenues was the cost of the provincial administration. Under the Ḳādjārs in addition to the regular tax assessment the provincial governors levied a sum known as *tafāwut-i ʿamal* for the expenses of the administration. Only after defraying local expenses and the payment of special drafts made on the local revenue by the central government

was any surplus remaining remitted to the central treasury. According to Malcolm the "fixed" revenue in the early 19th century A.D. amounted to about three millions sterling. Local estimates put the receipts from Naw Rūz presents at two fifths of the "fixed" revenue, from fines one fifth of the "fixed" revenue, and the sum levied by public requisitions two fifths of the "fixed" revenue, the total revenue of the Shah being thus estimated at c. 6 millions sterling, only a proportion of which was paid in cash and large deductions being made for the expenses of collection before remission to the central government. Curzon estimates the "fixed" revenue at 55,369,516 *tūmāns* (or £ 1,652,820, converted at 33½ *ḳirāns* to the £ sterling, the rate prevailing in 1888), comprising taxes in cash 36,076,757 *tūmāns*, in kind (converted at government rates) 10,100,983 *tūmāns*, customs 8,000,000 *tūmāns*, and posts, mints, telegraphs, etc. 1,191,776 *tūmāns*. Expenditure, excluding local charges for the collection of revenue, reductions for bad harvests, etc., he estimated at 42,233,472 *tūmāns* (£ 1,260,700), comprising maintenance of government buildings 2,633,472 *tūmāns*, and the army, central administration, pensions, allowances, and the Shah's establishment, etc. at 21,600,000 *tūmāns*, showing a surplus of 13,136,044 *tūmāns* (£ 392,121). These figures, however, do not give a true picture of revenue and expenditure since not only is the revenue derived from sources other than "fixed" taxes and dues omitted, but also expenses for military expeditions and equipment, foreign journeys, and unforeseen emergencies. The total picture was far less favourable and such reserves as may have been accumulated were rapidly dissipated in the second half of the 19th century A.D. and the early years of the 20th century. Foreign loans were contracted to make good budgetary deficits, for the servicing of which the customs were mortgaged. By 1911 there was an annual deficit of c. 6,000,000 *tūmāns*, which in fact was usually increased to some 11,000,000 *tūmāns* because the "fixed" taxes were not collected in full. By 1922 there had been considerable changes in the proportions of the total revenue derived from different sources; nearly half the revenue was derived from the customs tariff, and oil royalties constituted a not inconsiderable part of the national revenue.

The grant of the Constitution in 1906 marks the beginning of a new phase in the tax system of Persia. Under the constitution the approval of the National Assembly was necessary for the regulation of all financial matters, the preparation and execution of the budget, the imposition of new taxes, the reduction and exemption of existing taxes, the sale and transfer of national resources and property, and the grant of concessions. One of the first actions of the newly convened National Assembly in 1907 was to appoint a committee to examine the question of financial reform. As a result of their labours the number and amount of the pensions and grants paid to individuals were reduced, the revenue assessments of the provinces were revised and the *tafāwut-i ʿamal* abolished; *tiyūl*s were also abolished, and conversion rates (*tasʿīr*) abrogated. In the same year a Frenchman, M. Bizot, was appointed financial adviser for two years; he had no powers and his mission proved abortive. In 1911 an American, Mr. W. M. Shuster, was appointed Treasurer-General of Persia with a view to reorganizing the chaotic and archaic state of the financial administration. He was forced, however, by Russian diplomatic pressure to leave the country after some months. The finances of the country continued in a state of disorder and during the first world war the administration broke down. In 1922 another American, Dr. A. C. Millspaugh, was appointed Administrator-General of the Finances, and it is from this date that the reform in the tax system of the country promised by the constitution really began and the foundations of a modern system of taxation were laid.

(ANN K. S. LAMBTON)

(6) — India (a) The Sultanate of Dihlī. The fiscal administration of the Sultanate of Dihlī was modelled to a considerable extent upon the pattern evolved under the ʿAbbāsids. One of the earliest *wazīr*s was Fakhr al-Dīn ʿIṣāmī, who had served at Baghdād before he joined the court of Iletmish (607-33/1210-35) (Firishta, i, 117). The sultans, however, had to take into consideration Hindū traditions, especially in their agrarian policies.

Their fiscal administration, therefore, was based upon precedents developed by the Muslim administrators and jurists of the Eastern Caliphate with an admixture of Hindū traditions. The reconciliation of Islamic law and patterns with native tradition did not prove too difficult because of certain similarities between the two.

A group of taxes payable only by the Muslims came under the category of *zakāt*. The State does not seem to have levied the *zakāt* on personal property, but left it to the discretion of the individual to fulfil his duty in this respect. The State demand on the produce of the *ʿushrī* lands, the prescribed *ʿushr* being 5% or 10% of the gross produce, was levied by the State like other revenue. The *ʿushrī* lands formed an insignificant proportion of the total area under cultivation. All imports paid a *zakāt* of $2^1/_2$%. In the case of non-Muslim merchants the rate was doubled. This was the only tax paid by non-Muslims which was classified as *zakāt*.

Property left by Muslims dying without heirs belonged to the State and was earmarked for charitable purposes. The property of a *dhimmī* dying in similar circumstances was handed over to his community.

Djizya was levied in accordance with the rulings of the Ḥanafī jurists. Buddhists and Hindūs were recognized as *dhimmī*s along with 'the peoples of the Book'. Muḥammad b. Ḳāsim, the conqueror of Sind, first extended the status of *dhimmī*s to Buddhists and Hindūs and no subsequent ruler withdrew it. The sultans of Dihlī assessed *djizya* in their own money; they charged ten, twenty, and forty *tanka*s per annum, in accordance with the income of the assessee (Shams-i Sirādj ʿAfīf, *Taʾrīkh-i Fīrūzshāhī*, Calcutta 1890, 383). Imbecile old men, cripples, the blind, and those who had not enough to pay the tax after defraying the cost of their living, were excused. Women and children also were exempt. Non-Muslim servants of the State also were not required to pay the *djizya*. The Brāhmans remained exempt most of the time. Only Fīrūz Shah (752-90/1351-88) demanded *djizya* from the Brāhmans, who protested and made a demonstration in front of the palace (*ibid*, 382-4). The sultan did not forego the tax in its entirety, but he relented to the extent of assessing all Brāhmans according to the lowest rate. Even this assessment was paid by charitably inclined rich Hindūs who wanted to relieve the Brāhmans of the burden. This is the only instance on record of a public protest against *djizya*. The Hindūs perhaps did not find the idea of a poll-tax difficult to accept because it was also embedded in their own tradition. The Gaharwars of Kanawdj had levied *Turushkadanda*, either from the Muslims resident in their dominions or from all their subjects, as a contribution to defence against the encroachments of the Turks. Even during the British period a poll-tax was levied by some Rajput states.

The most important source of revenue and the mainstay of the financial stability of the Sultanate was *kharādj*. The bulk of the cultivated area in the Sultanate consisted of *kharādjī* lands. Some grants to Muslims were classified as *ʿushrī* lands; any other land in the possession of a Muslim or a *dhimmī* was considered to be *kharādjī*. There was no *arḍ al-mamlaka*. The territories of tributary chiefs, so long as they remained true to their agreements, were treated as *ṣulḥī*. From these areas the State received only a fixed sum of money stipulated at the time of the treaty. The State did not concern itself with the internal administration of such areas or with the relations between the peasants and tributary chiefs.

The principle of the *kharādj al-muḳāsama* was applied to the *kharādjī* lands. This was found convenient because the Hindūs were used to various forms of sharing the produce of their lands with the State, as they recognised that the State was entitled to a share of the agricultural produce. As the share of the State was traditionally considered to be a defined percentage of the actual produce, the basic principle of *kharādj al-muḳāsama* was acceptable to the Hindūs. Thus the requirements of the *sharʿ* and Hindū tradition could be easily reconciled and there was no need to create confusion by any radical change in the principles of assessing the State demand on agricultural produce. The Hindūs had developed various methods of sharing the produce with the State before the establishment of Muslim rule. These included actual sharing through grain heaps of equal size, appraisement and the division of the field. Through long experience appraisement gained considerable accuracy and, because of its convenience, was widely adopted. Gradually the average yield in a unit of homogeneous area came to be so well established in popular knowledge that it was sufficient to measure the area under cultivation to calculate the yield. All these developments were intended to spread the time of assessment so that the harvest would not lie in the open field awaiting the arrival of the assessment team. The village accountant, the *paiwārī*, kept a record of the area cultivated and the crops raised in every season. He also kept a record of the average yield. These traditional methods, called Sharing, Appraisement and Measurement, were left almost intact by the sultans of Dihlī. The sultans encouraged Measurement, because they found this device a more convenient method of accounting and collection. Its great weakness was that it worked satisfactorily only in normal seasons. If the rains failed or the area suffered from some other disaster, the normal yields could not be expected. It was then necessary to revert to Appraisement or Sharing. If the peasant felt that the Appraisement was not fair, he could always elect Sharing. This was an insurance against excessive assessment.

The proportion of the State demand to the gross produce varied in accordance with local tradition. In the areas conquered and brought under effective administration up to the reign of ʿAlāʾ al-Dīn Khaldjī (695-715/1296-1316) the prevailing proportion was a fifth of the yield; because of the increased expenditure upon the army on account of Mongol pressure, ʿAlāʾ al-Dīn raised it to the maximum allowed under the *sharʿ*: a half (I. H. Qureshi, *The Administration of the Sultanate of Dehli*, Karachi 1958, 103 ff.). Ghiyāth al-Dīn Tughluḳ again reduced it to a fifth. When his son Muḥammad b. Tughluḳ (725-52/1325-51) tried once more to increase the level in the Dōʾāb by ten to twenty per cent, there was rebellion. A fourth of the gross yield seems to have been stabilized as the recognized demand before Shīr Shāh (945-52/1538-45) came to the throne (*ibid.*, 111-9). However, in certain desert areas, the demand was as low as a seventh; there also seem to have been certain outlying provinces, such as Gudjarāt, where it was a half.

The spoils of war, technically called *ghanīma*, were shared between the State and the soldiers. Legally the State was entitled to a fifth, but because the soldiers were paid salaries out of the Public Exchequer, the sultans considered it fair to give a

fifth to the soldiers and to deposit four fifths in the public treasury. Under Fīrūz Shāh the legal ratio was restored (ʿAyn al-Mulk Māhrū, *Inshāʾ-i Māhrū*, Letter xv. [MS. in Bankipore Public Library, Patna, India]). The State was also entitled to a fifth of all minerals, provided they were capable of being melted and bearing an imprint. The same applied to treasure trove, if it consisted of unstamped bullion or of money minted before the Muslim conquest.

In addition to the above taxes, local imposts were continually imposed in spite of repeated abolitions by the State. These went mostly into the pockets of the local authorities and did not contribute to the income of the State. They had come down from very early times and were so deep-rooted in the habits of the people that their effective abolition was difficult. They were not excessive and were generally petty levies on certain professions and the sale of a few commodities (Qureshi, *op. cit.*, Appendix H, 244 ff.).

The fiscal administration of the Sultanate was vested in the *dīwān-i wizārat*, which was presided over by the *wazīr*. He was assisted by a deputy. The *mushrif-i mamālik* was the accountant-general, and the *mustawfī-i mamālik* the auditor-general (ʿAfīf, *op. cit.*, 419-20). Every provincial capital had its own *dīwān-i wizārat* which was a replica of the central *dīwān-i wizārat* and functioned under its control (Qureshi, *op. cit.*, 200-1). Every *pargana*, the smallest unit of revenue administration, consisting of a number of villages, had its *ʿāmil* under whom there was an accountant, a treasurer and a field survey and assessment staff. The village accountant and registrar, called *paṭwārī*, kept all records concerning cultivation, assessment and yields (*ibid.*, 208, 209).

The *zakāt* on imports was assessed and collected at the local *sarā-i ʿadl*. *Ghanīma* was administered by the *dīwān-i ʿarḍ*; the property of Muslims dying heirless went to the office of the local *ḳāḍi*.

(I. H. QURESHI)

(b) The early Mughals. No conspicuous modification of the system described above was attempted until the time of Shīr Shāh. Bābur and Humāyūn made no changes in the existing system, largely the result of Sikandar Lōdī's improvements, which they adopted in its entirety; the statistical returns of Bābur's times were based on the rent-rolls of Sikandar Lōdī, and all calculations were made in accordance with Sikandar's prescriptions on standards and computation. Both Bābur and Humāyūn granted new *djāgīrs*. The account of the reconstruction of the central administration in Humāyūn's reign (Khʷand Amīr, *Humāyūn-nāma*, see Bibliography) suggests that there was no change in the work of the revenue ministry, now called *dīwānī*.

The interrex Shīr Shāh was the first ruler to rationalize taxation, especially in respect of the chief source, the land. He tried to counteract the recurring tendencies to impose extra-legal taxes on the cultivators, but there is no evidence that he conscientiously applied the Islamic principles of taxation: *djizya* and *zakāt* are not mentioned in contemporary records, although the later *Taʾrīkh-i Dāwūdī* gives an extensive list of the sources of state income under heads other than land-revenue: sales tax, conveyance duty, ground rent from market vendors, tax on sugar refinery, ferry tax, grazing tax, cattle tax, profession tax from various artisans, gambling tax, and *djizya* and pilgrim tax on Hindūs. Shīr Shāh is said to have forbidden the realization of transit dues and octroi, but how far this prohibition was effective is doubtful; it is probable that a distinction was made between *djāgīr* and *khāliṣa* territories. Property of intestates most probably escheated to the state. Presents to the Emperor do not seem to have been exploited by Shīr Shāh. The changes he introduced in respect of *kharādj* lands seem to have been the result of the practical experience he acquired in administering the *djāgīr* his father had been assigned under the Lōdīs. Sharing of the ripened crop (*ghallābakhshī*) and appraisement (*kankūt*, *muḳṭaʿī*) or visual estimation of the standing crop, the hitherto prevailing systems of assessment, were found difficult to operate effectively owing to the large numbers of personnel needed to apply them and because of the temptations for collusion between *riʿāya* and official; in their place measurement (*ḍabṭ*) was reintroduced wherever practicable; Bengal and Multān remained under appraisement until within Akbar's time, and in the latter province when taken for Shīr Shāh in 950/1543 the governor was ordered to observe the customs of the Langāhs and take no more than one-fourth of the produce as revenue (*Taʾrīkh-i Shīr Shāhī*, tr. Elliot, iv, 399); elsewhere one-third was taken, reckoned by an averaging system: for all the principal staples the good, medium, and bad yields per *bīghā* were added and then divided by three to give the 'average produce' (*maḥṣūl*) per *bīghā*; of this one-third was taken as the state's share (*Āʾīn-i Akbarī*, i, 297 ff.; tr. Jarrett, ii, 62 ff.); the obvious effect of this was to over-assess the bad lands and under-assess the good. This was presumably only applied in the *khāliṣa*-lands; no information is available on revenue collection in the *djāgīr* lands, which were still being granted by Shīr Shāh.

The ten years following Shīr Shāh's death in 952/1545 were a period of confusion; it is reasonable to assume that his methods persisted, since they were adopted in Akbar's reign. It is recorded (*Taʾrīkh-i Dāwūdī*, tr. Elliot, iv, 479-81) that Islām Shāh replaced *djāgīrs* by cash salaries, but this seems to have been a temporary measure.

Under Akbar most of the general sources of revenue (*sāʾir*) described above continued unchanged, except that the *djizya* and the tax on Hindū pilgrims were early abolished. Customs duty, only $2\frac{1}{2}$ to 3 per cent *ad valorem*, was exacted at the ports (classified as major (*bandargāh*) and minor (*bāra*); 27 *bandargāhs* and 45 *bāras* are mentioned in the *Mirʾāt-i Aḥmadī*, *Khātima*, 239) by a *mutasaddī* with a large staff, and at the land frontiers. Certain internal

transit duties were also levied, including ferry taxes. Other regular taxes included those on salt—in some districts accruing to the provincial revenue, in others to the central administration—; fisheries, particularly the Bengal fish-tanks; *rāhdārī*, a road tax for merchants in exchange for protection; and *pandārī*, a sales tax. Regular revenue from non-tax sources included that from copper, zinc, and silver mines (*Āʾīn*, index); mints (6,174,500 *dām* is mentioned as mint income in the *Mirʾāt-i Aḥmadī*, I. O. Ethé 3599, f. 728b), which were established in the principal towns of the empire (R. B. Whitehead in *JASB*, N.S. viii, 1912, 425-531; N.S. xi, 1915, 231-7; G. P. Taylor in *JASB*,N.S. x, 1914, 178-9; see also DĀR AL-ḌARB, c.); and tribute from vassal chiefs (*e.g.*, the revenue of the *ṣūba* of Adjmēr amounted to over 7,200,000 rupees, three-quarters of which comprised tribute from Rādjpūt chiefs; other tributary domains were in Gudjarāt, Uṛīsā and Central India). Irregular revenue included presents on appointment (*salāmī*), escheat through intestacy or forfeiture, treasure trove, and *khums* (one-fifth of war booty reserved for the imperial exchequer).

The greatest single source of recurrent revenue was from the land, demanded under several different systems during Akbar's long reign, and documented in great detail in the *Āʾīn-i Akbarī* and other contemporary texts (see Bibliography). The old methods of *ghallābakhshī* (which prevailed in Sindh when the *Āʾīn* was compiled, for where there are no records of any survey or measurement) and *kankūt* remained in force for some areas, but the most favoured system, *ḍabṭ*, was subject to a number of experiments in the first twenty-four years of the reign. First Shīr Shah's schedule of assessment rates was adopted for general use by the regent, Bayrām Khān, on the basis of a demand of a prevailing rate of one-third of the average produce, stated in grain. "From the beginning of this eternal reign, every year unavaricious and high-minded experts used to ascertain prices and lay them before the royal court; and taking the schedule of crop yield and the prices theroof, used to fix the schedule of demand rates (*dastūr*); and this caused great vexation" (*Āʾīn*, i, 347, trans. I. H. Qureshi in *JPakHS*, i/3, 1953, 208); but by the tenth year the uniform schedules gave place to differential schedules based on local price rates, the measuring instruments had been standardized, and land had been classified in accordance with the time it had been cultivated (*bandjar*, uncultivated for five or more years; *puladj*, cultivated for more than five years; *puladj* land lying fallow for a short time was *paṛawtī*, but for three of four years was called *čačar*; when *bandjar* land was brought under cultivation the demand was one-fifth of the norm for the first year, increasing yearly until the full *puladj* rate was attained; there was a similar differential rate for *čačar*; *paṛawtī* was untaxed but paid the full *puladj* rate on being taken into cultivation again). The *ḍabṭ* system was abolished in the *khāliṣa* lands in the thirteenth year (976/1569) under the specially appointed Shihāb al-Dīn Aḥmad Khān, who discontinued the annual assessment and established a *nasaḳ* ((*Akbar-nāma*, ii, 333), not precisely defined but assumed to be a form of assessment analogous to *kankūt* administered through the *muḳaddams* (according to Moreland, Appx.D, "group-assessment", where the term is discussed).

A new system was introduced in the fifteenth year (978/1571) when Muẓaffar Khān and Rādjā Ṭoḍar Mal were appointed to the *wizāra*, having been set in motion in the eleventh year (on the dating question, see Moreland, Appx.E), described in *Āʾīn*, i, 347: *ḳānūngos* ("interpreters of customs", accountants and registrars of the *pargana* [*q.v.*]) prepared new schedules of produce separately for each *pargana*, and on the basis of returns for the whole empire (*taḳsīmāt al-mulk*) a new *maḥṣūl* was determined by estimate, and hence a new valuation (*djamʿ*) made by applying the new schedules to actual or estimated crop areas (actual areas being on hand for the *khāliṣa* lands).

In the nineteenth year (982/1575) Akbar, requiring to pay salaries by cash rather than by assignment, decided that the areas of the *parganas* of the Empire should be re-examined, and the extent of all land, including that *bandjar* or *čačar*, which on cultivation could be expected to yield one crore (*karōṛ*, 10 million) *ṭankās* should be separated and entrusted to an official called *karōṛī*, who was to be responsible for effecting the cultivation of the *bandjar* land and realizing the correct demand (*Ṭabaḳāt-i Akbarī*, B.M.Or. 2274, f. 203), so that in the course of three years all the waste land should be brought under cultivation, improving the condition of the *riʿāya* and benefitting the treasury (Badāʾūnī, ii, 189). But after a successful start the system broke down under the rapacity of the *karōṛīs* and the corruption of their collectors and clerks. The period of this breakdown coincides with Shāh Manṣūr's *de facto* tenure of the *dīwānī* in the absence of Ṭoḍar Mal on military duty. On Todar Mal's return in the twenty-sixth year (985/1577) he resorted to ferocious measures to bring the collectors to account, and the following year an Imperial commissioner (*amīn al-mulk*) was appointed in Fatḥ Allāh Shīrāzī, invited from the court of Bīdjāpur, to both of whom the final system is due.

Previously, in the twenty-fourth year (987/1579-80), the practice of assignment of *djāgīrs* having been re-established, a new valuation was made, calculated on the data of the previous ten years' operation of Ṭoḍar Mal's assessment rates, described in a notoriously difficult passage of the *Āʾīn* (i, 347), known as *Āʾīn-i dahsāla* (tr. Qureshi, *loc. cit.*; see Bibliography for earlier translations and interpretations): the ministry held the correct figures for the preceding five years, and those for five years before were taken from reliable sources. One-tenth of the total was declared to be the average produce (*harsāla*) and would be taken as the basis of valuation for the ensuing year; deductions were made for partial or complete failure of crops in any area. This decennial average was re-computed each year; demand rates were now fixed in cash, not grain, thus obviating the necessity for yearly revision of the commutation rates. In the provisions the *parganas* are grouped into assessment circles, each with its own schedule (*dastūr*). This system is attributed to Akbar himself.

The final system maintains this ideal of valuation but improves its administration (*Āʾīn*, i, 285-8). Ṭoḍar Mal's proposals of the twenty-seventh year are incorporated in a code of practice which was periodically amended. Village records are kept by the *paṭwārī*, but were available to the State officials. The collector was required to familiarize himself with local agriculture and to extend cultivation wherever possible; to this end the headman was to be allowed up to $2^1/_2$ per cent share in the results, and was authorized to reduce the sanctioned rates on high-grade crops, and to depart from the system of *ḍabṭ* if the *riʿāya* elected *ghallābakhshī*, *kankūt*, or

nasaḳ; the *riʿāya* was to know in advance the extent of his liability to the State. These regulations were applied, successfully, in the *k͟hāliṣa* lands; there is insufficient information on their operation in *d̲j̲āgīr*s.

(c) The later Mug͟hals. The schedules of cash-rates adapted to the varying productivity of different regions were discarded at some time during the reign of D̲j̲ahāngīr in favour of the earlier principle of *nasaḳ*; the seasonal *ḍabṭ*, effective enough under such a strong administration as Akbar's, would have been less so under a weak or unsupported ministry. D̲j̲ahāngīr's memoirs reveal his own lack of interest in fiscal questions, and it is assumed that he neglected the administration; there is indeed a dearth of contemporary information on the fiscal history of his reign, although the summary financial history collected in the later *Maʾāt͟hir al-Umarāʾ* ([*q.v.*]; ii, 813 ff.) confirms this assumption in the statement that the annual expenditure rose to treble the annual income from the *k͟hāliṣa*-lands. This instability is reflected in the frequency with which *d̲j̲āgīr*s changed hands (cf. the accounts of W. Hawkins and E. Terry, in *Early Travels*, 83, 91-3, 114, 326, and of Pelsaert, *Remonstrantie*, Eng. trans. in W. H. Moreland and P. Geyl, *Jahāngīr's India*, Cambridge 1925, 64 ff.; for the contemporary situation in Gud̲j̲arāt cf. *De Remonstrantie van W. Geleynssen de Jongh*, The Hague 1929); some *d̲j̲āgīr*-holders of high provincial office appear to have been appointed to their posts on farming-terms (Roe, 210; Terpstra, Appx. vi). An innovation of D̲j̲ahāngīr's time is the introduction of the *āltamg͟ha*, a grant of land given under the emperor's seal which required his direct personal authority to vary, and thus constituted the nearest approach to land-ownership, as now understood, in the Mug͟hal period (*Tūzuk*, 10; cf. *Bāds͟hāh-nāma*, ii, 409).

For S͟hāhd̲j̲ahān's reign there is even less contemporary description of practices than for D̲j̲ahāngīr's, although the account in the *Maʾāt͟hir al-Umarāʾ* indicates that on his accession he designated as *k͟hāliṣa* sufficient land to yield a revenue of 150 lakhs of rupees, and fixed the expenditure ceiling at 100 lakhs; the expenditure later greatly exceeded this figure, but the *k͟hāliṣa* income was correspondingly increased. A later writer (Bindrāban, *Lubb al-Tawārīk͟h-i Hind.*, tr. in Elliot and Dowson, vii, 170 ff.) refers to agrarian orders having been issued by the emperor, but these have not been discovered, and the nature of his systems can best be inferred from Awrangzīb's early orders, referred to below. There is, however, a record of the practice in this reign in one area: the Deccan provinces had been brought almost to economic ruin as a result of the wars of conquest, and during Awrangzīb's second viceregal period their revenue systems were reorganized, from about 1062/1652, by Murs͟hid Ḳulī K͟hān [*q.v.*] who retained plough rents where the state of agriculture was primitive, and elsewhere introduced *g͟hallābak͟hs͟hī* and *ḍabṭ*, the former being introduced on differential scales for the first time in India, verying with the nature of the crop and with the nature of the source of water on which the crop depended; assessment rates were fixed at a low figure and were accompanied by positive measures to restore prosperity by repopulating and reorganizing the ruined villages and by capital advances. His achievements in the Deccan had apparently no reaction on the administration in the north.

The state of the revenue system when Awrangzīb came to the throne, and his measures towards a reform, can be gauged from two early *farmān*s of the 8th and 11th regnal years (1076/1665-6 and 1079/1668-9), with preambles containing descriptions of the systems of assessment then in force, with their defects, and the procedures to be adopted in future (texts with Eng. tr. in Jadunāth Sarkār, *The revenue regulations of Aurangzib* ..., in *JASB*, n.s. ii, 1906, 223-55); the former constitutes a manual of practice addressed to the provincial *dīwān* and his staffs, but intended to be applicable also for the staffs employed by *d̲j̲āgīr*-holders, while the latter was issued with the object of ensuring an assessment and collection of revenue, throughout the whole empire, in accordance with the principles of Islamic Law. This latter *farmān* is based on the *Fatāwā-i ʿĀlamgīriyya* [*q.v.*] of contemporary jurists, whose authorities were the law-books and commentaries of the central Islamic lands rather than the practical conditions of agriculture in India, with consequent distortions of interpretation of the situation: *e.g.*, reference to peasants as though they held proprietary rights over the land; to a distinction between *ʿus͟hr* and *k͟harād̲j̲* land, not applicable in India; and detailed rules for land under dates and almonds, irrelevant in India.

The first *farmān* is the more practical: revenue from the *k͟hāliṣa* lands was expended by the emperor, not the viceroy, and was assessed and collected by the central *dīwānī* through the provincial *dīwān*s. There is to be increased control over the local staffs, and the central authority must be kept informed of actual agricultural conditions by more detailed

annual returns from each village; there is set out a development policy through extension of cultivation, increase of the area under high-grade crops, and the erection and maintenance of irrigation works; the old standard demand of one-third became the new minimum demand, with the maximum raised to one-half—in practice presumably generally demanded, since the officials' primary duty was to increase the revenue. Assessment was usually by *nasaḳ*, usually of a whole village but on occasion of an entire *pargana*; the *nasaḳ* could be refused, in which case revenue could be obtained by *ḍabṭ* or *g̲h̲allābak̲h̲s̲h̲ī* at the discretion of local officials; cash-payments of revenue were usual, although Sarkār has shown (*Studies*, 217) that in parts of Uṛīsā revenue was paid in kind. The demand was assessed as a lump sum at the beginning of the year, distributed over the peasants by the headmen; these were paid as the crops matured, and passed their collections to the officials after having set aside their own portions as "village expenses"—a further exaction on an already oppressed peasantry. Provision was made for the occurrence of such calamities as drought, frost, or low prices (the second *farmān* makes a distinction between calamities occurring before and those falling after the crops were cut). That these regulations were intended to set a standard of procedure in the *d̲j̲āgīr*-lands is shown by a provision requiring the provincial *dīwān* to report on the loyalty and efficiency of the assessors and collectors employed in the *d̲j̲āgīrs*.

A distinction is drawn in the second *farmān* between two forms of tenure, *muḳāsama* and *muwaẓẓaf*; under the former, revenue was paid only when the land was cultivated, while under the latter revenue was paid whether the land was cultivated or not. The latter was thus a form of contract-holding, where a fixed sum was paid for the occupation of land irrespective of its produce. There seems to be no prior record of this tenure in Muslim India, although the frequency of such holdings at the beginning of the British period, and the fact that they had been long known in Udaypur, never under Muslim administration, would indicate that they were no new institution. Here the administration recognizes the existence of certain rights to retain or dispose of a holding; a *muwaẓẓaf*-holder was ordinarily succeeded by his heir, and he could lease, mortgage or sell his rights.

Although the necessity for full and punctual collection of revenues is stressed, there is no explicit provision for action to be taken in case of default; but it is recorded in other sources that a cultivator's wives and family could be sold into slavery in such cases (cf. Bernier, 205; Manrique, i, 53).

Stress is laid in these *farmāns* on the need for keeping peasants on the land, for absconding had by this time become a serious problem; that the scarcity of cultivators was due to flight and not to death through warfare or epidemics is shown by several contemporary reports (*e.g.*, Bernier's letter to Colbert, *Travels*, 200 ff., esp. 205; also 226, 232): the severity of the administration drove large numbers to the towns or camps, or to territories under Hindū rule.

After Awrangzīb's reign the *d̲j̲āgīr* seems to have become unremunerative and consequently unpopular (cf. K̲h̲ʷāfī K̲h̲ān, *Muntak̲h̲ab al-Lubāb*, Bibl. Ind., i, 622 ff.), on account of the lack of cultivators and the general uncertainty of tenure; also an assignee could no longer rely on the authority of the emperor and had frequently to repel other claimants to the revenue by force of arms: *de facto* possession had more force than title. The place of the *d̲j̲āgīr* is taken more and more by a stipend in cash, and territorially the most important unit of revenue is the *taʿalluḳ* [*q.v.*]; the *k̲h̲āliṣa* areas were frequently farmed out in the later years of Awrangzīb and under his successors, and the large tax-farms in Bengal became the forerunners of the system of *zamīndārī* [*q.v.*]. The revenues thus passed out of the control of the imperial authority as such, and the later fiscal history more properly belongs to the period of British India.

Comm.*, xii, 1929, 81-7; Sh. Abdur Rashid, *A valuable document relating to revenue administration during Awrangzib's reign*, in *JPakHS*, ii, 1954, 26-34.

(d) Other Indian dynasties. Materials for the fiscal systems of the outlying regions are very scanty. For the fragmentary records of Gud̲j̲arāt and Mālwa see those articles; for post-Mug̲h̲al Bengal see ZAMĪNDĀRĪ. For the Bahmanīs there is no information beyond Firis̲h̲ta's remarks that *d̲j̲āgīr*-holdings were common and that there were reserved *k̲h̲āliṣa*-areas (*Muntak̲h̲ab al-Tawārīk̲h̲*, Kānpur lith., 320, 356).

For Aḥmadnagar there is no contemporary account of the reforms of Malik ʿAnbar [*q.v.*], although an account has been given bv Grant Duff, *History of the Mahrattas*, Bombay 1826, from Marāṭhī sources, according to which Malik ʿAnbar abolished farming and substituted a collection of a percentage of the actual produce in kind; after some seasons this was commuted for a cash payment, fixed annually on the basis of cultivation, the State claiming one-third or two-fifths of the total value.

In Golkonḍa in the 11th/17th century the kingdom appears to have been entirely under the farming system, the amount payable having been settled annually by auction (cf. Methwold, *Relations of the Kingdom of Golckonda*, in *Purchas his Pilgrimes*, London 1625); farming is said to have persisted in this region until abolished by Sir Salar Jang in 1853 (*Imperial Gazetteer of India*, xiii, 280).

7. Indonesia [See SUPPLEMENT].

DĀRIM [see TAMĪM].

AL-DĀRIMĪ, ʿABDALLĀH B. ʿABD AL-RAḤMAN B. AL-FAḌL B. BAHRĀM B. ʿABD AL-ṢAMAD ABŪ MUḤAMMAD AL-SAMARḲANDĪ belonged to the B. Dārim b. Mālik, a branch of Tamīm. He travelled in search of traditions and learned them from a number of authorities in al-ʿIrāḳ, Syria and Egypt. Among those who transmitted traditions on his authority were Muslim b. al-Ḥadjdjāj and Abū ʿIsā al-Tirmidhī. Al-Dārimī lived a simple, pious life devoted to study, and acquired a reputation for knowledge of *Ḥadīth*, reliability, truthfulness and sound judgement. He was asked to accept office as *ḳāḍī* in Samarḳand but refused. The sulṭān insisted, so he accepted the office, but after acting once he asked to be excused and this was granted. He was born in 181/797 and died in 255/869. His writings were mainly concerned with *Ḥadīth*, but he is also credited with a Ḳurʾān commentary. Al-Khaṭīb al-Baghdādī says he compiled *al-Musnad* and *al-Djāmiʿ*, but one wonders whether these may not be alternative titles for the same work. His collection of traditions is commonly called *al-Musnad* (publ. Kānpur 1293, Ḥaydarābād 1309, Dihlī 1337, Damascus 1349), but this word is appropriate only if understood in the wider sense common in earlier times. It should be called *al-Sunan*, as the material is arranged according to the subject-matter. This work has not been treated on an equality with the six canonical books, but Ibn Ḥadjar al-ʿAsḳalānī considered it superior to Ibn Mādja's *Sunan*. It is much shorter than any of the six books. Ḥādjdjī Khalīfa mentions three other works, two of them excerpts from his *Musnad*, but they have not survived.

Bibliography: Ibn Abī Ḥātim, *Kitāb al-djarḥ wa 'l-taʿdīl*, Ḥaydarābād 1372/1953, ii, 2, 99; *Taʾrīkh Baghdād*, x, 29-32; al-Samʿānī, 218ab; Dhahabī, *Ḥuffāẓ*, ii, 105 f.; Ibn Ḥadjar al-ʿAsḳalānī, *Tahdhīb al-tahdhīb*, v, 294-6; Ibn al-Ṣalāḥ, *ʿUlūm al-ḥadīth*, Aleppo 1350/1931, 42; Ibn al-ʿImād, *Shadharāt*, ii, 130; Ḥādjdjī Khalīfa, ed. (J. ROBSON)

ḌARĪR, MUṢṬAFĀ, Turkish author of the 7th/14th century. Very little is known of his life. He was born blind (*ḍarīr*) in Erzurum where he studied; later he travelled in Egypt, Syria and Karaman. His works which have come down to us are : 1. *Tardjumat al-Ḍarīr*, an enlarged free translation, interspersed with many original verse passages, of Abu 'l-Ḥasan al-Bakrī al-Baṣrī's (6th/13th century) version of the *sīra* of Ibn Isḥāk, filled with stories and legends borrowed from various sources. It consists of five volumes and was written by the order of the Mamlūk sultan of Egypt Al-Manṣūr ʿAlāʾ al-Dīn ʿAlī; it was completed in 790/1388 and presented to the sultan al-Ṣāliḥ Ṣalāḥ al-Dīn Ḥādjdjī. The chapter on the birth of the Prophet seems to have inspired the corresponding chapter in Sulayman Čelebi's *Mewlid* (Ahmed Ateş, *Vesîletü'n-Necât, Mevlid*, Ankara 1954, 55-7); 2. a free translation of Wāḳidī's *Futūḥ al-Shām*, which relate the conquest of Syria under the caliphs Abū Bakr and ʿUmar, completed in Aleppo in 795/1392; 3. a translation of the Hundred *Ḥadīths*; 4. *Yūsuf we Zulaykhā*, a recently discovered *mathnawī* (Istanbul Univ. Library no. 311, 862). None of these works has yet been edited. Ḍarīr shows remarkable mastery of *ʿarūḍ*; his verse is fluent and he often reaches the heights of lyric poetry. His pleasant and simple prose is one of the best specimens of early Turkish narrative style.

(FAHİR İZ)

ḌARIYYA, a village and a watering place in Nadjd located at 42° 56′ N., 24° 46′ E., on the Darb al-Sulṭānī pilgrim route from al-Baṣra to Mecca (*Handbook*, ii, 189). The village was a much frequented halting place for pilgrims, for the junction with the route from al-Baḥrayn was here. The district of Ḍariyya, according to Ibn Bulayhid, was a wide territory in Nadjd celebrated by the poets in pre-Islamic times for its sweet water and pasturage. The famous Ḥimā Ḍariyya is said to have been named after the village and was part of the district (Yāḳūt, iii, 457). There is some doubt as to when the *ḥimā* was first reserved. Yāḳūt states that Ḍariyya was set aside by Kulayb [*q.v.*], the legendary hero of the War of Basūs, whose burial ground, according to traditions handed down by the Ṭayyiʾ, lies within the confines of the *ḥimā* in the mountains of al-Nīr. The site of this grave was well known among the Arabs as late as the 15th century, for al-Samhūdī, who completed his work in 886/1481, reports that Adjwad b. Zāmil al-Djabrī, the lord of al-Ḥasā and al-Ḳaṭīf (called by the author, Raʾīs Ahl Naghd), had heard of the shrine from the local Arabs and visited it (al-Samhūdī, ii, 227). Al-Bakrī, however, claims that Ḥima Ḍariyya was first reserved for the state by ʿUmar b. al-Khaṭṭāb for the camels given as *ṣadaḳa* or taken in battle. The statement by al-Hamdānī (172, 24) that Ḥimā Ḍariyya and Ḥimā Kulayb are not the same but are separated by the mountains of al-Nīr, which Yāḳūt himself recognizes as an independent *ḥimā*, supports al-Bakrī. It is likely that Ḍariyya was one of the many *ḥimās* of the *djāhiliyya* epoch which later changed their names (Ibn Bulayhid, iii, 244). The Ḥemmey on Doughty's map is probably an approximation of the older Ḥimā Kulayb. According to al-Ṭabarī (i, 1107) and Yāḳūt (ii, 290), Ḍariyya derives its name from Ḍariyya, the mother of Ḥulwān, the son of ʿUmrān and grandson of Ḳuḍāʿa. Al-Hamdānī says that Ḍariyya was the daughter of Rabīʿa b. Nizār.

The *ḥimā* reserved by ʿUmar originally extended 6 miles in each direction from the village of Ḍariyya. Owing to the continuous increase in livestock, which reached a total of about 40,000 in the time of ʿUthmān the *ḥimā* was enlarged about 10 miles in at least one direction (al-Bakrī, iii, 860). The land, which was under the control of the Amīrs of Medina, was released by the ʿAbbāsid Caliph al-Mahdī and is said to have yielded, as private property, an annual tribute of 8,000 dirhams in the early ʿAbbāsid period. At that time the territory was chiefly inhabited by the Kilāb, against whom Muḥammad had sent troops in A.H. 6 and 7. Ḍariyya was not without strife, for al-Ahwāzī mentions that al-Rabtha, a neighbouring pilgrim station and *ḥimā*, was destroyed in the year 319/931 through continuous warfare between its people and those of Ḍariyya.

Today, by-passed by modern roads, Ḍariyya is a poor settlement with about 20 wells and only a few scattered palms, lying in desolate steppe terrain at the edge of one of the dikes in the granite shield underlying the western plateau. Western writers have frequently confused it with al-Dirʿiyya [*q.v.*], the

former Wahhābī capital (cf. Wüstenfeld). Among European travellers in the area, Philby is the first to have visited and described Ḍariyya and its companion village Miska, about 6 kilometers to the north (*The Land of Midian*, 9, 52). He mentions Kūfic inscriptions found on rocks in Ḍariyya, attesting to its former prominence as a pilgram station. Ḍariyya is in territory now occupied by ʿUtayba and Ḥarb, tribes which figured as makeweights in the struggles of the late 18th and early 19th centuries among the Sharīfs of Mecca and the ruling families of Rashīd and Saʿūd for domination of Nadjd.

AL-**DARʿĪYYA** [see AL-DIRʿIYYA]

DARḲĀWA, plural of the *nisba* Darḳāwī, a religious brotherhood founded in north Morocco at the end of the 18th century by an Idrīsī *sharīf*, Mawlāy al-ʿArbī al-Darḳāwī. His name is supposed to come from the appelation of one of his ancestors who used to be called Abū Darḳa, the man with the leather shield. He was the pupil at Fās of another Idrīsī *sharīf*, ʿAlī b. ʿAbd al-Raḥmān al-Djamal, an adept of the mystical doctrine of al-Shādhilī [*q.v.*], and after the latter's death, he organized a brotherhood inspired by this doctrine. The seat of this group was at first the *zāwiya* of Bū Brīḥ in the tribe of the Banū Zarwāl (on the right bank of the Oued Wargha), then, after 1863, the *zāwiya* of Amadjdjūṭ (Amjot) not far from there, where it is still located and where each year at the end of September the annual festival (*mawsim*) of the brotherhood is celebrated. Many pilgrims go there on this occasion.

The Darḳāwa brotherhood has spread above all in the north and east of Morocco and in the west of Algeria. In Morocco especially it has brought together adepts from every kind of social class, including the Sharifian court: the sultans, Mawlāy ʿAbd al-Raḥmān (1822-1859) and Mawlāy Yūsuf (1912-1927) belonged to it. At the end of the 19th century, the number of Darḳāwa in Algeria was estimated at about 14,500, and in 1939, at almost 34,000 in Morocco.

The doctrine of the Darḳāwa appears perfectly orthodox; it insists essentially on the necessity of man's consecrating himself as far as possible to the contemplation of divinity and to the mystic union with God. To attain this the Darḳāwī must pray as often as he can, and particularly during the sessions of prayer (*dhikr*) which are held regularly in the customary meeting-places of the brotherhood. These sessions aim at provoking ecstasy by means of the recitation of pious formulas, mystical poems, song and dance. An excellent description of them is to be found in the *Essai sur la mystique musulmane* of E. Dermenghem, the preface to his translation of the *Khamriyya* of Ibn al-Fāriḍ (Paris 1931, 64, n. 1). In order better to detach themselves from the world, certain adepts go so far as to live as wanderers, a staff in their hands, clothed miserably, and with a rosary of a hundred beads round their necks. The majority content themselves with paying as little attention as possible to wordly matters, and with taking no part in any form of public life.

Nevertheless, on several occasions the Darḳāwa have played a part in politics: one of them, Ibn al-Sharīf, provoked serious agitation in the Turkish province of Oran which lasted for several years (1803-9); but for the moderation of the sultan Mawlāy Sulaymān (1792-1822), this agitation might have ended in the annexation of western Algeria by Morocco. Soon afterwards, various groups of Darḳāwa took an active part on the Berber revolt of the last years of Mawlāy Sulaymān's reign, and the head of the brotherhood was even imprisoned for a time. After the death of Mawlāy Sulaymān, the Darḳāwa took hardly any further part in the political life of Morocco, even in the troubled years at the beginning of the 20th century. On the other hand, they played a certain part during the first years of the French conquest of Algeria by opposing the Amir ʿAbd al-Ḳādir, who was accused of making common cause with the French after the Desmichels (1834) and Tafna (1837) treaties.

DARNA, in modern pronunciation Derna, a town on the northern coast of Cyrenaica which is to-day the second most important in the region after Benghāzī. It is situated in a little plain along the banks of a *wādī* of the same name, bounded by the plateau of the al-Djabal al-Akhḍar, which forms a steep slope to the south and touches the sea to the east and west, but thanks to its never-failing springs it is rich in palms (8,000) and in orange and other fruit trees. Darna owes its origin to the Greeks who founded one of their colonies in the neighbourhood. Darnis, as their trading post was called, did not become a *polis* and was not one of the five cities combined into a federation in the time of Alexander the Great, which gave the country its name, Pentapolis. It is probable that it developed only in the time of the Ptolemies. Darna shared the fate of the Pentapolis and with it became a Roman possession in 96 B.C., in accordance with the will of Ptolemy Apion, who renewed a decision already made in 155 B.C. by Ptolemy Physcon (= Ptolemy VII, Euergetes II Neoteros); concerning these facts, an important inscription discovered at Cyrene, and the bibliography, see Romanelli, *Cirenaica*, 1-24. Under the Byzantines, Darna was the seat of a bishopric which already existed at the time of the Council of Nicea in 325. On the conquest of Pentapolis by the Muslims, see BARḲA. According to Yāḳūt, it was at Darna that the governor of the country, Abū Shaddād Zuhayr b. Ḳays al-Balawī, was killed in 76/695 (or in 74/693?), as he was hastening to meet the Greeks who had disembarked there in an attempt to recapture the region. Yāḳūt says that his tomb, and those of others killed in the battle, were well-known. Under the Arabs Darna fell into decay; if this were not proved by the complete silence of the Arab geographers with regard to it, it would be possible to deduce it from the fact that its prosperity was always linked to the exploitation of its soil and that the conquering Arabs were never farmers. Its harbour was not as good as others in Cyrenaica, and its site was at some distance from the route followed generally by the Arab armies and the caravans of

merchants and pilgrims, which passed about 90 kms. to the south (by ʿAyn al-Ghazāla, al-Tamīmī and al-Makhīlī). It was from the end of the 15th century on, or even later, that Darna revived thanks to the immigration of Andalusians, coming less from Andalusia than from other places in North Africa where they had already found refuge. Accurate information on the arrival of these farmers of Spanish origin goes back to the 17th century: a Turkish Pasha called Ḳāsim, returning from Tripoli to Constantinople, had noticed the fertility of the Darna region and, after having obtained a concession from the Sublime Porte, established himself there with the Andalusians; later on his lieutenant requested the help of the Bey of Tunis in transferring there other Andalusians who had been living in Tunis. Eight hundred colonists were then brought to Darna in four ships (1637). These facts are confirmed by the authors of two well-known *riḥlas*, al-ʿAyyāshī (d. 1091/1679) and Ibn Nāṣir al-Darʿī (d. 1129/1717), who tell us that Darna was colonized by Andalusians in about 1040/ 1631-2. Before this date, according to these travellers, the town had been in ruins for a long time. It had therefore begun to prosper again when the Dey of Tripoli, Muḥammad (1041-59/1632-49), who wanted to keep all the threads of trans-Saharian trade in his own hands, and did not like foreign expansion in the cities of Cyrenaica, made an expedition against Benghāzī (1638) and Awdjila (1640), for part of the caravans from Fezzān and from Bornu used to reach the Mediterranean coast by way of this oasis. Darna must also have fallen into the power of this Pasha, because we learn that its population was unwilling to bear the yoke of Tripoli and that Muḥammad's successor, the Dey ʿUthmān, marched against the town in 1656. As a consequence of this attack, Darna was left almost deserted, so great was the number of the dead and the exiled. However, it soon revived again; even to-day it venerates the memory of Muḥammed Bey (presumably, Muḥammad b. Maḥmūd, governor for the Pasha of Tripoli: see Ibn Ghalbūn, *Cronaca*, or a rich private person of Anatolia), because he, towards the end of the 17th century, gave attention to the irrigation system and achieved various other public works, notably the construction of the Great Mosque, which has 42 cupolas and the only minaret in the town. The daring and hardihood of the people of Darna continued to cause trouble even to the government of the Ḳaramanlī; Aḥmad I tried in 1715 to subdue Benghāzī and Darna once and for all. In the time of Warthīlānī, who, too, described in a *riḥla* his journey of 1179/1765-1181/1767, there was continual struggle between the inhabitants of the town and the people of Miṣrāta; in the time of Ibn Nāṣir, these last formed the garrison, and perhaps later (see Ibn Ghalbūn), after they had become established there, became part of the population. In short, just as the Bedouins of Cyrenaica, who were at all times the true masters of the region, were turbulent, so were the foreign immigrants in the principal towns. Only famines and epidemics, frequent enough in this country, weakened the tendency to rebellion. Warthīlānī tells us about a famine which caused a temporary cessation of hostilities, and Della Cella of an epidemic of plague which in 1816 reduced the population from 7,000 to 500. In 1805, Darna was the scene of a surprise attack; it was bombarded and occupied by irregular troops (400 men) with the support of three ships of the United States, because that country's naval representative for Barbary, William Eaton, intended to march from Egypt against Tripoli via Cyrenaica, in order to punish the Pasha of this town, Yūsuf Ḳaramanlī, for his corsairs' attacks against United States ships, since the direct attempts of the American fleet against Tripoli had met with failure; he had persuaded the elder brother of the Pasha, Aḥmad, (Ahmet, Hamet, in the western sources), who was considered the legitimate ruler, to join the expedition. Nevertheless, these troops did not advance much farther than Darna, for a treaty between Yūsuf and the United States put an end to this strange adventure. In 1835, after the long interval of Ḳaramanlī [*q.v.*] rule, Cyrenaica came back under the direct government of Constantinople, and Darna, one of the three *ḳaḍās* of the *sandjaḳ* of Benghāzī, was useful to it in exercising a precarious control, which grew gradually stronger, over the interior and Marmarica. The government did its utmost to develop the land between Marsā Sūsa and Darna. When Italy decided to take possession of Libya and declared war on Turkey (29th September 1911), one of the first actions was the bombardment of Darna (30th September) and its occupation (16th October). The population of the town was then about 9,500. Under the Italians, Darna became a very beautiful and well cared for city which even tried to attract tourists. During the first world war it remained in Italian hands, and one of the places from which later the reconquest of Cyrenaica began. During the second world war, it passed several times from the hands of the Italians and Germans into that of the allies before its final occupation by the English in January 1943. It suffered much damage in the course of these operations.

Darna now forms part of the United Kingdom of Libya, following on Italy's renunciation of her colonies in the Peace Treaty (10th February 1947) and the proclamation of the kingdom (24th December, 1951). Notwithstanding the importance that the Sanūsiyya has in Cyrenaica, this *ṭarīḳa* has only one *zāwiya* in Darna, whereas 14 other *ṭarīḳas* are represented there, some of them for as long as 150 years. One of the 70 warriors killed at the side of the above mentioned Zuhayr al-Balawī, Sīdī Bū Manṣūr al-Fārisī, whose tomb stands in the cemetery, has given his name to that part of the town which stretches along the right bank of the *wādī*.

Bibliography: For Darna in ancient times: J. P. Thrige, *Res Cyrenensium*, Copenhagen 1828, reprinted Verbania 1940 (Ital. trans., Verbania 1940) P. Romanelli, *La Cirenaica romana*, Verbania 1943 (these volumes have appeared in the collection *Storia della Libia*); among the Arab geographers, Yāḳūt, *Muʿdjam*, s.v. *Darna*, mentions the place but is confused in his information. (L. Veccia Vaglieri)

DARSHAN, also less correctly DARSAN, a Sanskrit word (*darśana*, from the root *dṛś* "see") meaning "showing, being visible"; hence, the ceremonial appearance of a king to his subjects. This Hindū practice was adopted by the Mughal emperor Akbar (*Āʾīn-i Akbarī*, i, 73) and his immediate successors. The English traveller Coryat records that Djahāngīr in Āgra used to present himself three times a day from a canopied window. The failure of Shāhdjahān to appear during his illness at the end of 1067/September 1657 led to rumours of his death. The practice of *darshan* was at first followed by Awrangzīb, but abandoned by him in 1078/1668 as savouring of idolatry.

(J. Burton-Page)

DĀRŪGHA. The word is derived from the Mongol *daru-*, 'to press, to seal' and was used to denote a chief in the Mongol feudal hierarchy (K. H. Menges, *Glossar zu den Volkskundlichen Texten aus Ost. Turkistan*, ii, Wiesbaden 1955, 714 s.v. *dorγa*; B. Vladimirtsov, *Le régime social des Mongols*, Paris 1948, 181, 209, 214; P. Pelliot, *Notes sur l'histoire de la Horde d'or*, Paris 1950, 73). In 617-8/1221 there was a Mongol *dārūkhačī*, or representative of the head of the empire, in Almālīgh beside the native ruler. The duties laid upon him included the making of a census of the inhabitants, the recruitment of local troops, the establishment of postal communications, the collection of taxes, and the delivery of tribute to the court (W. Barthold, *Turkestan*², 401). The term is first met with in Persia in the Ilkhānid period and by Tīmūrid times it had virtually superseded the term *shiḥna*, the *dārūgha* exercising broadly similar functions to the *shiḥna*. In his main capacities he belonged to the military hierarchy. The functions of the *dārūgha* in the Ṣafawid period were sometimes those of the governor of a town (Olearius, *The Voyages and Travels* ...., London 1669, 304; Chardin, *Voyages*, ed. Langlès, Paris 1811, v, 260); but more commonly he was a kind of police officer, usually under the *dīwānbegī*. His duty was to prevent misdeeds, tyranny, brawls, and actions contrary to the *sharīʿa*, such as prostitution, drinking, and gambling (*Tadhkirat al-Mulūk*, Persian text in facsimile tr. and explained by V. Minorsky, London and Leiden 1943, 77b ff.; Tavernier, *Collections of Travels* ...., 222, 232). He had power to fine and punish offenders and was himself responsible for the return of stolen goods (*Tadhkirat al-Mulūk*, *ibid.*). Fees, known as *dārūghāna*, were levied in his favour (*Tadhkirat al-Mulūk*, 90b; Du Mans, *Estat de la Perse en 1660*, Paris 1890, 39). In the 12th/18th and 13th/19th centuries the main functions of the *dārūgha* in Persia continued to be those of a police official acting under the city governor. He regulated prices, weights and measures, preserved order in the towns and bazaars, and supervised the morals of the people; his jurisdiction, which tended to become restricted to the bazaar, encroached upon and in some cases superseded that of the *muḥtasib*. In the capital he appears to have kept special registers of certain crafts which performed labour service for the crown (cf. P. A. Jaubert, *Voyage en Arménie et en Perse*, Paris 1821, 334). The office of *dārūgha* was still found at the beginning of the Constitutional period (see E. Aubin, *La Perse d'aujourd'hui*, Paris 1908, 37, 109; *De Téhéran à Ispahan* in *RMM.*, June-July 1907, 459; and *Le Chiisme et la nationalité persane* in *RMM.*, 1908, 482); but with the new forms of government his office became an anomaly, the various functions formerly exercised by him being taken over by the municipalities and the police force.

The term *dārūgha* was not, however, applied exclusively to an official whose functions were those of a town governor or police officer. There are several instances of the appointment of a *dārūgha* over a tribal group, whose functions were clearly rather different from those of the *dārūgha* of a town or the *dārūgha* of the bazaar. For example ʿAbd al-Razzāḳ states that Tīmūr used sometimes to send a *dārūgha* and a *muḥaṣṣil* to collect the taxes due from the Hazāra near Harāt (*Maṭlaʿ al-Saʿdayn*, ed. Muḥammad Shafīʿ, ii, 1297). There was also a *dārūgha* of the Turkomans in Astarābād in Ṣafawid times (cf. Ḥasan Rūmlū, *Aḥsan al-Tawārīkh*, ed. and tr. C. N. Seddon, Baroda, 1931-4, 346-7); and under the Ḳādjārs the taxes of various Turkoman tribes appear to have been collected by a *dārūgha* (cf. *Rūznāma-yi Dawlat-i ʿAliyya-i Īrān*, 2 Rabīʿ I 1280, 26 Muḥarram, 1287). There are other cases also of a *dārūgha* being appointed over special sections of the population. Thus, the *dārūgha* of the Madjūsiyān of Yazd is mentioned c. 1054/1644 (Muḥammad Mufīd, *Djāmiʿi Mufīdī*, B.M. Or. 210, f. 363b). It is not stated what his functions were; they may well have been to collect the taxes due from the Zoroastrian community and to enforce any special regulations relating to that community.

Under the Ṣafawids the term *dārūgha* was also used to denote a kind of head clerk controlling the staff of the larger government departments; such were the *dārūgha* of the *farrāshkhāna* and the *dārūgha* of the *daftarkhāna* (*Tadhkirat al-Mulūk*, ff. 91a-b, 141; Tavernier, 222). This usage of the term *dārūgha* continued in the Ḳādjār period.

In Muslim India the term *dārūgha* was used to denote an official in the royal stables (Abu 'l-Faḍl, *Āʾīn-i Akbarī*, tr. Blochmann, i, 53). In British India it was used to designate the native head of various departments; and from 1793 to 1862-3 the local chief of police was also known as the *dārōgha* (H. Yale and H. C. Burnell, *Hobson-Jobson*, London 1903, 297-8). In Georgia in Ṣafawid times the *dārūgha* was a police officer working in conjunction with the *mouravi* (constable) and *melik* (Armenian burgomaster) and the *kadkhudā* (see the charters

analysed by M. F. Brosset in *Histoire de la Georgie*).

al-**DĀRŪM**, the name of a coastal plain in Palestine, and later in particular the name of a famous fortress of the time of the Crusades, is to be found in the works of Arab authors with both these meanings. The Hebrew *dārōm* from which it is derived and to which it corresponds in the Arabic version of Deuteronomy, XXXIV, 3°, appeared in a few passages of the Old Testament for south as a cardinal point, or any country situated in the south (F. M. Abel), and it was later applied especially to the south-west of Judea, a low-lying region distinct both from Sephela which bordered it on the north and the southern, desert territory of the Negeb. The Byzantine name Daromas, which corresponded to this ancient Darom, was equally applied to the south-west section of the vast district of Eleutheropolis (see bayt djibrīn), while not including the town itself. However, this distinction was forgotten in Arab times and al-Dārūm, according to the evidence of al-Muḳaddasī, was identified with the territory surrounding Bayt Djibrīn, and it shared its history from the time of its conquest under the Caliphate of Abū Bakr.

As to the Palestinian citadel of al-Dārūm, the Daron of the Crusaders, it stood on the road from Gaza to Egypt on the site marked to-day by the ruins of Dayr al-Balaḥ, to assure the defence of the Latin kingdom of Jerusalem from this side. Attacked especially by Salāḥ al-Dīn, then conquered by him in 583/1187 at the time of his re-occupation of the greater part of Palestine, it was later besieged, taken, and then dismantled by Richard Cœur de Lion and the Franks of the Third Crusade in 588/1192, but was still counted in the Mamlūk period as one of the fortresses depending directly on the *nāʾib* of the district of Gaza, on the coastal border of the province of Damascus.

(J. Sourdel-Thomine)

ḌARŪRA, necessity (also *iḍṭirār*), in works of *fiḳh* has a narrow meaning when it is used to denote what may be called the technical state of necessity, and a wider sense when authors use it to describe the necessities or demands of social and economic life, which the jurists had to take into account in their elaboration of the law which was otherwise independent of these factors.

I. The state of necessity, whose effects recall those of violence, does not result from threats expressed by a person, but from certain factual circumstances which may oblige an individual, finding himself in a dangerous situation which they have brought about (shipwrecked, dying of hunger or thirst in the desert, for example), to do some action forbidden by the law, or to conclude a legal transaction on very unfavourable terms in order to escape from the danger which threatens him. The Ḳurʾān contains numerous verses which, directly or indirectly, legitimize on grounds of necessity certain acts which in principle are forbidden (II, 168; V, 5; VI, 119; XVI, 116). Ibn Nudjaym derived from this a maxim which became famous: *al-ḍarūrāt tubīḥ al-maḥẓūrāt*, which the Ottoman *Madjalla* (art. 21) reproduced literally and which may be translated: "Necessity makes lawful that which is forbidden".

The effects of the state of necessity of which the writers here fixed the conditions and limits, are more or less drastic according to the domain of *fiḳh* in which they occur.

a) In what concerns prohibitions of a religious character (the prohibition against eating pork or dead animals, or against drinking blood or other liquids regarded as impure, for example), it is admitted without difference between the Schools, that necessity legitimizes the non-observance of these rules. It follows—and this is the opinion which has prevailed in doctrine—that one is even obliged to disregard them in a case of danger.

b) Most of the offences committed under the rule of necessity (for example, the theft of food, a shipwrecked person's throwing into the sea the goods of another shipwrecked person in the same boat if it is too heavily laden) are excused and do not give rise to any form of punishment, although they do not cancel any civil responsibility. Three offences are never legitimized, let alone simply excused, whatever may be the circumstances in which they are committed (apart from legitimate defence). They are: murder, the amputation of a limb, or serious wounding likely to cause death; in these cases the evil inflicted is equal, if not superior, to that which the perpetrator of the offence has endeavoured to avoid, and there is no reason to favour him rather than the victim.

c) Jurists have not paid much attention to the effect of legal transactions (sale, lease) committed under necessity. They regard it only as a case of violence (*ikrāh*) to be decided according to the rules which govern violence in general. Nevertheless, in treatises on *fiḳh* rules are found relating to a sale concluded in a state of necessity, when one of the parties (buyer or seller) exploits the circumstances which force the other to buy or sell. The Ḥanafīs call such a sale *fāsid*; the writers of the other schools decree that the price should not be that so agreed, but the habitual price of something equivalent (*thaman al-mithl*).

II. *Ḍarūra* is used in a much wider sense by the commentators when they try to justify by practical necessity, solutions which the lawyers of the first

centuries of the Hid̲j̲ra adopted by *istiḥasān* or *istiṣlāḥ* rather then by the rules of reasoning by analogy (*ḳiyās*). In these very numerous cases, the word is no longer synonymous with constraint, but signifies practical necessity, the exigencies of social and economic life. This is why other expressions such as *ḥād̲j̲a* or *taʿāmul al-nās* or *maṣlaḥa* are frequently used. It is almost exclusively in S̲h̲āfiʿī law, which does not recognize *istiḥsān*, that these divergencies from *ḳiyās* had to be justified by reason of necessity, then taken in its narrower sense (al-G̲h̲azzālī, *al-Mustaṣfā*, Cairo 1322, i, 284 ff.).

Ḍarūra in its wider meaning takes into consideration the existence in Muḥammadan law of rules and whole institutions which reasoning by strict analogy (*ḳiyās*) would have condemned, but which the "necessities" imposed, for instance contracts of hire and lease (*id̲j̲āra*) and of mercantile partnership (*s̲h̲arika*), loan of money (*ḳarḍ*), the agricultural contract of *muzāraʿa*, several kinds of sale including the *salam* sale, and a number of rules concerning details which have no other justification.

(Y. Linant de Bellefonds)

DARWĪS̲H̲ (Darwēs̲h̲) is commonly explained as derived from Persian and meaning "seeking doors", *i.e.*, a mendicant (Vullers, *Lexicon*, i, 839a, 845b; *Gr. I. Ph.*, i/1, 260; ii, 43, 45); but the variant form *daryōs̲h̲* is against this, and the real etymology appears to be unknown. Broadly through Islam it is used in the sense of a member of a religious fraternity, but in Persian and Turkish more narrowly for a mendicant religious called in Arabic a *faḳīr*. In Morocco and Algeria for dervishes, in the broadest sense, the word most used is *Ik̲h̲wān*, "brethren", pronounced *k̲h̲uān*. These fraternities (*ṭuruḳ*, plural of *ṭarīḳa* [*q.v.*], "path", *i.e.*, method of instruction, initiation and religious exercise) form the organized expression of religious life in Islam. For centuries that religious life (see TAṢAWWUF) was on an individual basis. Beyond the single soul seeking its own salvation by ascetic practices or soaring meditations, there was found at most a teacher gathering round himself a circle of disciples. Such a circle might even persist for a generation or two after his death, led by some prominent pupil, but for long there was nothing of the nature of a perpetual corporation, preserving an identity of organization and worship under a fixed name. Only in the 6th/12th century—the troubled times of the Sald̲j̲ūḳ break-up—did continuous corporations began to appear. The Ḳādirites, founded by ʿAbd al-Ḳādir al-D̲j̲īlānī [*q.v.*] (d. 561/1166), seem to have been the first still-existing fraternity of definitely historical origin. Thereafter, we find these organizations appearing in bewildering profusion, founded either by independent saints or by split and secession from older bodies. Such historical origins must, however, be sharply distinguished from the legends told by each as to the source of their peculiar ritual and devotional phrases. As the origin of Ṣūfism is pushed back to the Prophet himself, and its orthodoxy is thus protected, so these are traced down from the Prophet (or rather from Allāh through Gabriel and the Prophet) through a series of well-known saints to the historic founder. This is called the *silsila* or "chain" of the order, and another similar *silsila* or apostolic succession of Heads extends from the founder to the present day. Every darwīsh must know the *silsila* which binds him up to Allāh himself, and must believe that the faith taught by his order is the esoteric essence of Islam, and that the ritual of his order is of as high a validity as the *ṣalāt*. His relationship to the *silsila* is through his individual teacher (*s̲h̲ayk̲h̲*, *murs̲h̲id*, *ustād̲h̲*, *pīr*) who introduces him into the fraternity. That takes place through an *ʿahd*, "covenant", consisting of religious professions and vows which vary in the different bodies. Previously the neophyte (*murīd*, "willer", "intender") has been put through a longer or shorter process of initiation, in some forms of which it is plain that he is brought under hypnotic control by his instructor and put into rapport with him. The theology is always some form of Ṣūfism, but varies in the different *ṭarīḳa*s from ascetic quietism to pantheistic antinomianism. This goes so far that in Persia dervishes are divided into those *bā-s̲h̲arʿ* "with law", that is, following the law of Islam, and those *bī-s̲h̲arʿ* "without law", that is, rejecting not only the ritual but the moral law. In general the Persians and the Turks have diverged farther from Islam than the Syrians, Arabs or Africans, and the same *ṭarīḳa* in different countries may assume different forms. The ritual always lays stress on the emotional religious life, and tends to produce hypnotic phenomena (auto and otherwise) and fits of ecstasy. One order, the K̲h̲alwatiyya [*q.v.*], is distinguished by its requiring from all its members an annual period of retreat in solitude, with fasting to the utmost possible limit and endless repetitions of religious formulae. The effect on the nervous system and imagination is very marked. The religious service common to all fraternities is called a *d̲h̲ikr* [*q.v.*], a "remembering", that is, of Allāh (Ḳur. XXXIII, 41 is the basic text), and its object is to bring home to the worshipper the thought of the unseen world and of his dependence upon it. Further, it is plain that a *d̲h̲ikr* brings with it a certain heightened religious exaltation and a pleasant dreaminess. But there go also with the hypnosis, either as excitants or consequents, certain physical states and phenomena which have earned for dervishes the various descriptions in the west of barking, howling, dancing, etc. The Mawlawīs, founded by D̲j̲alāl al-Dīn al-Rūmī (d. at Konya in 672/1274), stimulate their ecstasies by a whirling dance. The Saʿdīs used to have the Dawsa [*q.v.*] and still in their monasteries use the beating of little drums, called *bāz*. The use of these is now forbidden in the Egyptian mosques as an innovation (*bidʿa*; Muḥammad ʿAbduh, *Ta'rīk̲h̲*, ii, 144 ff.). The Saʿdīs, Rifāʿīs and Aḥmadīs have particular feats, peculiar to each *ṭarīḳa*, of eating glowing embers and live serpents or scorpions and glass, of passing needles through their bodies and spikes into their eyes. But besides such exhibitions, which may in part be tricks and in part rendered possible by a hypnotic state, there appear amongst dervishes automatic phenomena of

clairaudience and clairvoyance and even of levitation, which deserve more attention than they have yet received. These, however, appear only in the case of accepted saints (*walīs*: [*q.v.*]), and are explained as *karāmāt* [*q.v.*] (χαρίσματα) wrought by Allāh for them. But besides the small number of full members of the orders, who reside in the monasteries (*khānkāh, ribāṭ, zāwiya, takiyya* or *takya*) or wander as mendicant friars (the Kalanderīs, an order derived from the Baktāshīs, must wander continually), there is a vast number of lay members, like Franciscan and Dominican tertiaries, who live in the world and have only a duty of certain daily prayers and of attending *dhikrs* from time to time in the monasteries. At one time the number of regular dervishes must have been much larger than now. Especially in Egypt under the Mamlūks, their convents were very numerous and were richly endowed. Their standing then was much higher than it is now, when dervishes are looked down upon by the canon lawyers and professed theologians (*ʿulamā*) in the essential contest of intuitionists on the one hand and traditionists and rationalists on the other. For this division see further under TAṢAWWUF. Now their numbers are drawn mostly from the lower orders of society, and for them the fraternity house is in part like a church and in part like a club. Their relation to it is much more personal than to a mosque, and the fraternities, in consequence, have come to have the position and importance of the separate church organizations in Protestant Christendom. As a consequence, in more recent times, the governments have assumed a certain indirect control of them. This, in Egypt, was exercised by the Shaykh al-Bakrī, who was head of all the dervish fraternities there (*Kitāb bayt al-Ṣiddīk*, 379 ff.). Elsewhere there is a similar head for each city. The Sanūsīs [*q.v.*] alone, by retiring into the deserts of Arabia and North Africa and especially by keeping their organization inaccessible in the depths of the Sahara, have maintained their freedom from this control. Their membership is also of a distinctly higher social order than that of the other fraternities. As women in Islam have generally the same religious, though not legal, status as men, so there are women dervishes. These are received into the order by the shaykh; but are often instructed and trained by women, and almost always hold their *dhikrs* by themselves. In mediaeval Islam such female dervishes often led a cloistered life, and there were separate foundations and convents for them with superiors of their own sex. Now, they seem to be all tertiaries. To give a complete list of fraternities is quite impossible here. Besides the separate articles referred to above, see, also, the articles on the various Ṣūfī leaders and orders.

(D. B. MACDONALD *)

DARYĀ-BEGI, DERYĀ-BEYI, sea-lord, a title given in the Ottoman Empire to certain officers of the fleet. In the 9th/15th century the term *deryā-beyi* or *deñiz-beyi* is sometimes used of the commandant of Gallipoli [see GELIBOLU], who had the rank of Sandjak-beyi, and was the naval commander-in-chief until the emergence of the Kapudan Pasha [*q.v.*]. In the 10th/16th century the Kapudan Pasha became, as well as an admiral, the governor of an *eyālet*, which consisted of a group of ports and islands [see DJAZĀʾIR-I BAḤR-I SAFĪD]. This province, like others, was divided into Sandjaks, the governors of which were called *deryā-beyi* instead of *sandjak-beyi*. The *deryā-beyis* and the officers under them held appanages and fiefs like the feudal cavalry; they were required to serve with the fleet, and to supply, equip, and man one, two, or three galleys, according to the importance of their sandjaks. Their fiefs were administered by the department called *Deryā Kalemi*, sea office, which also handled the *mensūkhāt* [*q.v.*]. The *deryā-beyis* usually held their appointments for life, and transmitted them to their sons. Their ships were auxiliary to the main fleet.

(B. LEWIS)

DARYĀ-YI SHĀHĪ [see URMIYA]

DASKARA, name of four places in ʿIrāk, viz: 1. a town on the Diyālā N. E. of Baghdād, 2. a village in the district of Nahr al-Malik W. of Baghdād, 3. a village near Djabbul, S. of Baghdād, 4. a village in Khūzistān (cf. Yākūt, ii, 575; *Marāṣid*, i, 402; cf. Mukaddasī, 26).

Daskara is arabicized from the Pahlavi *dastakarta* (Dastkarta, Dastakrta), modern Persian Dastadjird [*q.v.*]; it means a post, a village, a town or simply level ground (see Herzfeld, *Geschichte der Stadt Samarra*, Hamburg 1948, 44; J. Markwart, *A catalogue of the provincial capitals of Eranshahr*, Rome 1931, 59; Djawālīkī, *Muʿarrab*, 67; A. Geiger, in *WZKM*, xlii, 1935, 124; Eddi Shīr, *al-Alfāẓ*

al-Fārisiyya al-Muʿarraba, 64; Vullers, *Lexicon Persico-Lat.*, i, 871-2, 878 (s.vv. *Daskara, Dastikār, Dastakarta*); Fleischer in Levy, *Chaldaeisches Wörterb.*, ii, 577 (contra ii, 430ᵃ); Perles, *Etymol. Studien*, 83; H. Hübschmann, *Armenische Grammatik* (1897), 135, Yāḳūt, ii, 575).

The best known is Daskara I, 16 parasangs (c. 88 km.) by the post road east of Baghdād (Ibn Khurradādhbih, 18-19) just above the 34° N. Lat. It is the modest successor of Sasanian Dastadjird [*q.v.*], probably a caravan post which developed into an important town. Its association with Hurmizd I (272-3) who very probably rebuilt it (cf. Yāḳūt, v, 575 and Ḥamza al-Iṣfahānī), and with Khusraw Parvēz (590-608) who made it his permanent residence, account for its name Daskarat al-Malik (The King's Daskara) (Herzfeld, *Samarra*, 44; Ibn al-Athīr, i, 348, 363).

In 628, Heraclius reduced it to a heap of ruins, and a few years later the Arab conquests followed.

In the Islamic period, Daskara (or Daskarat al-Malik) was the centre of an agricultural district (*ṭassūdj*) in Astān Shādh Ḳubādh, and a caravan station of some importance on the Khurāsān road. (Ibn Khurradādhbih, 13, 41; Yaʿḳūbī, *Buldān*, 270). In early Islamic history Daskara became a Khāridjite stronghold (Ibn al-Athīr, iii, 290, 313; Ṭabarī, i, 3310, 3388; ii, 890, 896. Even in the 3rd/9th century the Khawāridj were associated with it, ibid. iii, 1689-90, 2108).

Daskara, as a village or small town, grew gradually and attained some prosperity in the 3rd/9th century (See Ḳudāma, 238 for the revenue of the *ṭassūdj* of Daskara). Ibn Rusta considered Daskara a big town (164). Iṣṭakhrī (318-321/930-933) and Ibn Ḥawḳal (c. 367/977) describe it as a flourishing town, surrounded by date groves and abundant cultivations. They refer to a clay fortress probably constructed by the Arabs. (Iṣṭakhrī, 87; Ibn Ḥawḳal, i, 246). However, Muḳaddasī (375/985) found it a small town with one long market (121; cf. 53). Daskara declined further and in the 7th/13th cent. Yāḳūt followed by the *Marāṣid* spoke of it as a mere village (Yāḳūt, ii, 575; cf. iii, 227; *Marāṣid*, i, 402). It is not known when Daskara was deserted.

Arab geographers were impressed with the ruins of old Dastadjird. Yaʿḳūbī (*Buldān*, 270) refers to the wonderful buildings of old Persian kings, while Ibn Rusta (164) mentions a Sasanian palace surrounded by a high wall.

The ruins of Dastadjird-Daskara are seen now about 9 miles south of Shahrubān, left of the Diyālā (Herzfeld described them in 1905). The ruins of Muslim Daskara are called Eski Baghdād. They occupy a quadrangular area of about half a square mile surrounded by a wall with round towers (Sarre-Herzfeld, *Iranische Felsreliefs*, Berlin 1910).

(A. A. Duri)

DASTADJIRD, Arabicized form of the Persian Dastagard, the name of a number of towns in the Sasanian empire. See DASKARA.

DASTŪR [see DUSTŪR].

DASTĀN [see ḤAMĀSA].

AL-DASŪḲĪ, Burhān al-Dīn **IBRĀHĪM** b. Abi 'l-Madjd **ʿABD** al-**ʿAZĪZ**, nicknamed Abu 'l-ʿAynayn, founder of the Dasūḳiyya order, also known as the Burhāniyya or Burhāmiyya, the followers being generally called Barāhima. Born most probably at the village of Marḳus in the Gharbiyya district of Lower Egypt in the year 633/1235 according to Shaʿrānī in *Lawāḳiḥ* (but 644/1246 according to Maḳrīzī in *Kitāb al-Sulūk* and 653/1255 according to Ḥasan b. ʿAlī Shāmma the commentator on his *ḥizb*) he spent most of his life in the neighbouring village of Dasūḳ or Dusūḳ where he died at the age of 43 and was buried. His father (buried at Marḳus) was a famous local *walī* and his maternal grandfather Abu 'l-Fatḥ al-Wāsiṭī (Shaʿrānī, *Lawāḳiḥ*, i, 176) was the leading Rifāʿī *khalīfa* in the Gharbiyya district. It would seem that Wāsiṭī, in conjunction with a disciple of his, Muḥammad b. Hārūn (*ibid.*, ii, 3), possibly in rivalry to Ibrāhīm's father, were the first to start a legend concerning the saintliness of Ibrāhīm when they credited him with having certified to the beginning of Ramaḍān by refusing to take his mother's breast on the day of his birth at the end of Shaʿbān. After a brief study of Shāfiʿī law, Ibrāhīm became a mystic. He left no children but was succeeded after his death by his brother Shaykh Mūsā.

His works include *al-Djawāhir* (quoted at length in Shaʿrānī's *Lawāḳiḥ*) a collection mostly of instructions to novices and homiletic injunctions, *al-Djawhara*, which enumerates his *karāmāt*, and *al-Ḥaḳā'iḳ*, a record of intimate conversations (*munādjāt*) with God. Ibrāhīm was also the author of several *ḳaṣīdas*, two of which are quoted in *Lawāḳiḥ* (see also Dār al-Kutub, Cairo, *Fihrist* Taṣawwuf no. 319 Madjāmīʿ) a *ṣalāt* (*ibid.*, no. 2593) and a *ḥizb*. *Al-Djawāhir*, his major work, consistently argues the compatibility of *ḥaḳīḳa* and *sharīʿa*. Only in ecstasy is *taklīf* dropped. Inner purity is the central theme. Adherence to the *sharīʿa* is not by word of mouth, nor is Ṣūfism a matter of outward garb or residence in *zāwiya*s. It is the inward action "*ʿamal djuwwānī*" that counts, inasmuch as one's real *zāwiya* is one's heart. The *walī* is in intimate communion with God "*muttaṣil*", and the strictest obedience to him is enjoined. Love, *taslīm* (complete trust, *i.e.*, in the *walī*) and self-mortification "*dhabḥ al-nafs*" are the true path of the Ṣūfī. Although the *karāmāt* listed in the *Djawhara* are extravagant, yet they were not unusual for the times. In his *Ḥaḳā'iḳ* occurs the moving prayer that Ibrāhīm made to God that his body be so enlarged that it should fill up all Hell to ransom mankind. It is evident that Ibrāhīm owed no allegiance to any other Ṣūfī. In the *Djawhara* he stated that at the age of seven he had exceeded in rank all the other saints with the exception of ʿAbd al-Ḳādir (thus affirming his independence of Rifāʿī and Badawī) but later he stated that at a ceremony in heaven God ordered him to invest all saints with the *khirḳa* saying: "O Ibrāhīm, you are the *naḳīb* over them all". The Prophet at the time was by his side but ʿAbd al-Ḳādir was behind him and Rifāʿī behind ʿAbd al-Ḳādir.

Ibrāhīm receives the briefest note from Maḳrīzī (*Kitāb al-Sulūk*, i, 739), and commenting on a certain Khayr al-Dīn Abu 'l-Karam, the Dasūḳī *khalīfa* who died in 890/1485, Ibn Iyās (ii, 228) merely says "*la baʿsa bihi*". But Ḳā'it Bay seems to have had great respect for Ibrāhīm, for he visited the sanctuary in 884/1479 (*ibid.*, ii, 189) and enlarged the building (Mubārak, *Khiṭaṭ*, xi, 7). Shaʿrānī devotes more space in the *Lawāḳiḥ* (i, 143-58) to Ibrāhīm (mostly quotations from *al-Djawāhir*) than to any other saint and it is possible that this was the starting point of a Dasūḳī revival. In 1168/1754

Ḥasan b. ʿAlī S̲h̲āmma wrote the first commentary on Ibrāhīm's *ḥizb* entitled *Masarrat al-ʿaynayn bi-s̲h̲arḥ ḥizb Abi 'l-ʿAynayn* (Cairo *Fihrist*, Taṣawwuf 184 Mad̲j̲āmīʿ, and Sarkis 762) abridged by ʿAlī b. Aḥmad al-Ṣayrafī in *Kas̲h̲f al-g̲h̲āmma muk̲h̲taṣar al-S̲h̲ayk̲h̲ Ḥasan S̲h̲āmma* (*ibid.*, 2097). Another commentary on the *ḥizb* is by Muḥammad al-Bahī (*ibid.*, 2594) whilst a commentary on his *ṣalat* was written by a certain ʿAbd al-Ḥayy in 1271/1862 (*ibid.*, 2593). It would seem that Ibrāhīm's reputation rested to a large extent on his *ḥizb* and its efficacy in fulfilling wishes, driving away *d̲j̲inn* and its general curative and protective powers. According to Bahī, the famous 18th century Egyptian saint Muḥammad al-Hifnī used Ibrāhīm's *ḥizb*, which was usually read after the morning and sunset prayers.

According to D̲j̲abartī (iv, 176) the Burhāmiyya together with the Rifāʿiyya, Ḳādiriyya and Aḥmadiyya are the *aṣḥāb al-ʿas̲h̲āʾir, i.e.*, processions. Their founders were frequently referred to as the four *aḳyān*. A full description of the Dasūḳī *mawlids* is in Mubārak (*K̲h̲iṭaṭ*, xi, 7). There were three *mawlids* held in the three Coptic months of Barmūda, Tūbah, and Misrā respectively. The second and third lasted eight days each, but the third is *al-mawlid al-kabīr*. The Khedive Ismāʿīl enlarged the Dasūḳī sanctuary, and in 1293/1876 Ibrāhīm Pas̲h̲a, Ismāʿīl's son, presented it with a new *kiswa*. In his *Salsabīl al-muʿīn*, Sanūsī sums up the characteristics of the Burhāniyya, as he calls the order, as being *al-d̲h̲ikr al-d̲j̲ahrī*, self-mortification *mud̲j̲āhadāt*, and the formula "*Yā Dāʾim*".

Bibliography: Muḥammad Bulḳīnī, *Ṭabaḳāt al-S̲h̲ayk̲h̲ Aḥmad al-S̲h̲arnūbī*, Cairo 1280; Ṣāliḥ b. Mahdī *al-ʿAlam al-s̲h̲āmik̲h̲*, Cairo 1328, 476, T. Tawil, *Al-Taṣawwuf fi Miṣr*, Cairo 1946, *passim*; A. Le Chatelier, *Les confréries musulmanes*, Paris 1887, 190, and Lane, *Modern Egyptians*, i, 303-7. (WALID KHALIDI)

AL-DASŪḲĪ, AL-SAYYID **IBRĀHĪM** B. **IBRĀHĪM** (ʿABD AL-G̲H̲AFFĀR), a descendant of Mūsā, brother of the Ṣūfī Ibrāhīm Dasūḳī (see the preceding article) born in 1226/1811 in a poor family following the Mālikī ritual. After completing his elementary education in his native place of Dasūḳ, he attended the lectures of distinguished S̲h̲ayk̲h̲s at the Azhar Mosque, among whom was the celebrated Mālikī Muḥammad ʿIllīs̲h̲ (d. 1299/1882). After himself lecturing in the Azhar for a short time, he entered the employment of the state in 1248/1832 where on account of the accuracy of his knowledge of Arabic philology he received the office of corrector of the text-books destined to be used in the higher educational institutes and was ultimately appointed *bas̲h̲-muṣaḥḥiḥ* (chief reader) at the government printing office in Būlāḳ in the time of the K̲h̲edive Ismāʿīl Pas̲h̲a. He was for a period also assistant editor of the official gazette *al-Waḳāʾiʿ al-Miṣriyya*. He died in 1300/1883. His claim to a place in this work is based on the fact that, on the recommendation of Fresnel, he was employed during E. W. Lane's second residence in Cairo with him for several years as a trusted collaborator in the preparation of and collection of material for Lane's *Arabic-English Lexicon*, for which Lane in his preface gave him a glowing testimonial. Even after Lane's return to England, Dasūḳī continued to assist him with extracts from Arabic works (preface, i, xxii, xxiii). We possess a memoir prepared for the former Egyptian minister ʿAlī Mubārak's encyclopaedic work in *sad̲j̲ʿ* from the pen of Dasūḳī in which he describes his meeting and intercourse with Lane, his impression of his personality, his domestic arrangements and mode of life in Cairo, his intercourse with Muslims there (including S̲h̲ayk̲h̲ Aḥmad, immortalized in the preface to the *Manners and Customs of the Modern Egyptians*), his singular mastery of the Arabic idiom ("as if he were an ʿAdnānī or a Ḳaḥṭānī"), their joint method of studying the authorities on Arabic philology and their work on the utilization of these materials for the *Lexicon*, Lane's generosity to his Arab collaborators, etc., in the fullest detail. This article is an important document for the biography of the great English Arabist.

Bibliography: ʿAlī Mubārak, *al-K̲h̲iṭaṭ al-D̲j̲adīda li-Miṣr al-Ḳāhira wa-mudunihā wa-bilādihā al-ḳadīma wa 'l-s̲h̲ahīra*, Būlāḳ 1305, xi, 9-13; S. Lane-Poole, *Life of E. W. Lane*, 117 ff. (I. GOLDZIHER)

AL-DASŪḲĪ, IBRĀHĪM B. **MUḤAMMAD** B. ʿABD AL-RAḤMĀN, a Ṣūfī of repute, b. 833/1429, d. in Damascus S̲h̲aʿbān 919/October 1513, author of collections of prayers (*wird, ḥizb*).

DĀTĀ GAND̲J̲ [see HUD̲J̲WĪRĪ].

DAT̲H̲ĪNA (דתנת in Ḳatabanic inscriptions), a district in South Arabia, situated between the lands of the ʿAwd̲h̲illa (see art. ʿAWD̲H̲ALĪ), in the north-west and the ʿAwāliḳ (see art. ʿAWLAḲĪ), in the east. It belongs to the Western Aden Protectorate and has ca. 8000 inhabitants. The country is called by Hamdānī *g̲h̲āʾiṭ*, a steppe, a description still applicable to the greater portion of it. The climate is dry and the soil is fertile only in the north-east, where it produces tobacco, wheat and maize. Dat̲h̲īna is inhabited by two large tribes, the Ahl em-Saʿīdī (al-S.) and the ʿŌlah (al-ʿUlah: ʿUlah al-Kawr and ʿUlah al-Baḥr). The chief market is al-Ḥāfa (also called Sūḳ Ahl em-Saʿīdī(. In a wider sense Dat̲h̲īna also includes the districts of the Mayāsir and Ḥasana tribes in the east; here is also the town Mōdiya (em-Awdiya "the *wādīs*"), since 1944-5 the headquarters of the Government.

Dat̲h̲īna is a very ancient country, mentioned in the inscriptions. Hamdānī gives many details on it in his *D̲j̲azīra*. By that time it probably also comprised the territory now belonging to the ʿAwd̲h̲illa. It was inhabited by the Banū Awd, who spoke very good Arabic. The main Wādīs are: W. Dat̲h̲īna, al-Ḥār, Tārān, al-G̲h̲amr, al-Ḥumayrāʾ, al-Maʿwarān, Ṣaḥb, ʿUruffān, Marrān, ʿAzzān, and Ḍurā. Among the numerous settlements are mentioned: Āt̲h̲ira, al-K̲h̲anīna, al-Muwas̲h̲s̲h̲aḥ (once the largest town in Dat̲h̲īna) etc. The big mountain al-Kawr (K. ʿAwd̲h̲illa) at one time belonged to Dat̲h̲īna; minor hills are D̲j̲abal Aswad and Rāʾis̲h̲.

There are other places called (al-)Dat̲h̲īna or Dafīna; the geographers mention a town between Baṣra and Mecca, the name of which is usually recorded as al-Dafīna.

DĀʾŪD, DĀʾŪD b. K͟HALAF, etc. [see dāwūd, dāwūd b. k͟halaf, etc.].

DAWĀʾ [see adwiya].

DAʿWA, pl. *daʿawāt*, from the root *daʿā*, to call, invite, has the primary meaning call or invitation. In the *Ḳurʾān*, XXX, 24, it is applied to the call to the dead to rise from the tomb on the day of Judgement. It also has the sense of invitation to a meal and, as a result, of a meal with guests, *walīma*: al-Buk͟hārī, *Nikāḥ*, 71, 74; *LA*, xviii, 285. It also means an appeal to God, prayer, vow: al-Buk͟hārī, *Daʿawāt*, beginning and 26, *Wuḍūʾ*, 69, *Anbiyāʾ*, 9 (Abraham's prayer, cf. *Ḳurʾān*, II, 123), 40 (Solomon's prayer, cf. *Ḳurʾān*, XXXVIII, 34; see also *Ḳurʾān*, II, 182; X, 89; XIIII; XV; XL, 46 (to which al-Ṭabarī, *Tafsīr*, 24, 45, gives a gloss *duʿāʾ*). The *daʿwat al-maẓlūm*, prayer of the oppressed, always reaches God: al-Buk͟hārī, *Maẓālim*, 9 (cf. *D̲j̲ihād*, 180). The *daʿwa* of the Muslim on behalf of his brother is always granted: Muslim, *D͟hikr*, 88. The word is applied to a vow of any kind (*e.g.*, al-Masʿūdī, *Murūd̲j̲*, vii, 361; Ibn al-Muʿtazz, *Rasāʾil*, Cairo, 1365, 53: *daʿwa bi 'l-s͟hifāʾ*). It can also have the sense of imprecation or curse. Finally, it can be synonymous with *daʿwā*, signifying action, case, lawsuit.

In the religious sense, the *daʿwa* is the invitation, addressed to men by God and the prophets, to believe in the true religion, Islam: Ḳurʾān, XIV, 46. The religion of all the prophets is Islam, and each prophet has his *daʿwa*, an idea which has been developed, with the addition of heterodox elements, by the Ismāʿīlīs (see S. Guyard, *Fragments relatifs à la doctrine des Ismaéliens*, in *Not. et Extr.*, xxii (1874), 193; al-Maḳrīzī, *K͟hiṭaṭ*, i, 393, 31; cf. Hodgson, *The Order of Assassins*, 1955, 200 ff.). Muḥammad's mission was to repeat the call and invitation: it is the *daʿwat al-Islām* or *daʿwat al-Rasūl*. As we know, the Infidels' familiarity with, or ignorance of, this appeal determined the way in which the Muslims should fight against them. Those to whom the *daʿwa* had not yet penetrated had to be invited to embrace Islam before fighting could take place: see Abū Yūsuf, *Kitāb al-k͟harād̲j̲*, Fr. trans. Fagnan, 295; al-Māwardī, *Aḥkām*, ch. 4, *ḳism* 2; al-Buk͟hārī, *Siyar*, 101. Elsewhere De Goeje, *BGA*, iv, 235 noted *daʿwa* in al-Muḳaddasī, 311, 5 in the sense of *invitatio ad vitam beatam* and Goldziher, *Muh. St.*, i, 61 in the meaning of *s͟hiʿār*.

The word *daʿwa* is also applied to the propaganda, whether open or not, of false prophets: see, *e.g.*, al-D̲j̲āḥiẓ, *Kitāb al-tarbīʿ*, ed. Pellat 75.

By a natural extension *daʿwa* also denotes the content of this appeal, the religious law, and the words *daʿwa*, *sunna*, *s͟harīʿa*, *dīn*, are often used interchangeably. Lastly the word can be applied to those who have heard this appeal by the Prophet Muḥammad, the Islamic community, considered as a united body as a result of this appeal, and to some extent the word becomes a synonym of *umma*. Thus in al-Muḳaddasī, *BGA*, iii, 244, n.c.; cf. Abū Ḥanīfa al-Nuʿmān, *S͟harḥ al-ak͟hbār*, in Ivanow, *The Rise of the Fatimids*, text, 4. Note also *id̲j̲timāʿ al-daʿwa* in the sense of *id̲j̲timāʿ al-kalima* (*BGA*, iv, 236).

In the politico-religious sense, *daʿwa* is the invitation to adopt the cause of some individual or family claiming the right to the imāmate over the Muslims, that is to say civil and spiritual authority, vindicating a politico-religious principle which, in the final analysis, aims at founding or restoring an ideal theocratic state based on monotheism. The whole organization responsible for attracting the greatest possible number of people to this idea and for giving power to their representatives, as well as propaganda for this purpose, is thus called *daʿwa* which can often be translated as mission or propaganda. The *daʿwa* is one of the means of founding a new empire, as Ibn K͟haldūn noted, *Proleg.*, ii, 111 and 118, Rosenthal, ii, 121 and 129. Such was the ʿAbbāsid *daʿwa* which was, strictly speaking, propaganda for a member of the Prophet's family denoted impersonally by the name *al-Riḍā min Āl Muḥammad*, the accepted member of the family of Muḥammad, of which the ʿAbbāsids took advantage after the claims of the heir of the ʿAlid Muḥammad b. al-Ḥanafiyya were handed down to the ʿAbbāsid Muḥammad b. ʿAlī. This is the *daʿwat Banī Hās͟him* or *daʿwat Banī 'l-ʿAbbās*: al-Ṭabarī, ii, 1467; Ibn Abī Ṭāhir Ṭayfūr, 288. The *ṣāḥib al-daʿwa* is the person in whose name the propaganda is carried out, but the term also denotes the actual head of the organization; thus Abū Muslim is called *ṣāḥib daʿwat Banī Hās͟him* (al Ṭabarī, iii, 129). Propaganda was carried out by missionaries devoted to the cause: *dāʿī*, pl. *duʿāt*, sometimes *naḳīb*, pl. *nuḳabāʾ*.

In the same way one speaks of the *daʿwa* of the ʿAlids who were persecuted by the ʿAbbāsids and took refuge in Ṭabaristān and Daylam, where they made their claims to the imāmate and founded a short-lived state (Ibn K͟haldūn, *Proleg.*, ii, 122, Rosenthal, ii, 133), or of the Almohad *daʿwa* (*ibid.*, ii, 123, Rosenthal, ii, 134). Every adventurer claiming prophetic powers and seeking to win authority used the same tactics and had his *daʿwa* (see above).

The word *daʿwa* is well-known as applied to the wide-spread Ḳarmaṭī-Ismāʿīlī propaganda movement appealing to Muslims to give their allegiance to an imām descended from Ismāʿīl b. D̲j̲aʿfar al-Ṣādiḳ, a movement which resulted firstly in the Ḳarmaṭī revolt in Syria-Mesopotamia in 289-294/902-907 (see al-Ṭabarī, iii, 2218 ff.), and later in the establishment in North Africa of the Fāṭimid dynasty. In this context the word takes on a particular shade of meaning from the fact that, in conformity with the S͟hīʿite idea of the permanence of the revelation through the person of the imām, this *daʿwa* had come to complete the Prophet's *daʿwa*. The latter had preached faith in one single God, without the other articles of the faith, a thing permitted only to Muḥammad, but that was no longer sufficient: see a saying of D̲j̲aʿfar al-Ṣādiḳ in the *Kitāb S͟harḥ al-ak͟hbār* by Abū Ḥanīfa al-Nuʿmān (Ivanow, *The Rise of the Fatimids*, text, i, trans., 104-105), where we see that the *daʿwa* (here called *duʿāʾ*) must be renewed by the Mahdī; cf. also article 65 of *Tād̲j̲ al-ʿAḳāʾid* by Sayyidunā ʿAlī b. Muḥammad, in Ivanow, *A creed of the Fatimids*; also al-S͟hahrastānī, Cairo 1347, ii, 26: *kānat lahum daʿwa fī kull zamān*.

Ismāʿīlī propaganda was at first secret, so long as the imām was not sufficiently strong and had to remain in hiding. It was in this way that it was exercised in the East, the Yemen and North Africa (cf. B. Lewis, *The origins of Ismāʿīlism*, 19, 52, 73 etc.), and that in the Mag͟hrib the *dāʿī* of the Mahdī ʿUbayd Allāh took over power from his master. Abū Ḥanīfa al-Nuʿmān's book describing the beginnings of Fāṭimid propaganda in the Yemen and North

Africa and the establishment of the dynasty in the Maghrib is entitled *Kitāb iftitāḥ al-daʿwa wa'btidā' al-dawla*. When the imām was strong enough and at the head of a state, he made his *daʿwa* public (*aẓhara daʿwatahu*: Ibn Khaldūn, *Proleg.*, i, 363, Rosenthal, i, 413). Unlike the ʿAbbāsid *daʿwa* which ceased once the dynasty was established, the Fāṭimid *daʿwa* did not cease but, on the contrary, became organized and even more extensive from the time the dynasty was established in Cairo. Though overt in the Fāṭimid possessions or in territories won over to the doctrine, it continued in secret in other parts, except that it was proclaimed openly in favourable districts (thus the *dāʿī* al-Mu'ayyad fi 'l-Dīn preaching to the Buwayhid Abū Kālīdjar: see the *Sīra Muʿayyadiyya*, ed. M. Kāmil Ḥusayn, Cairo 1949, 43 ff.). Missionaries were each entrusted with some specified province, denoted by the term island (*djazīra*: for this name and these divisions see Ivanow, *Rise*, 20 and M. Kāmil Ḥusayn, *Fī adab Miṣr al-Fāṭimiyya*, Cairo 1950, 19). In Persia it was known by a name recalling its Egyptian origin, *daʿwat-i Miṣriyān* (Ivanow, *Rise*, 140). From the purely political aspect this propaganda could be effected by those who were merely sympathizers, but for doctrinal matters it was carried out by means of preaching by the *dāʿīs* whose head, *dāʿī al-duʿāt* or chief missionary—whose duties were also called *daʿwa* (al-Ḳalḳashandī, *Ṣubḥ*, x, 434)—had his headquarters in Cairo. In general, the political aim was to convince the Muslims that the *imām* alone, divinely inspired, aided by God and guardian of the secrets transmitted to ʿAlī by the Prophet, could give mankind good guidance, and that dynasties other than the Fāṭimids descended from Ismāʿīl b. Djaʿfar were usurpers and illegitimate, rotten with vices and neglectful of the most sacred duties of religion. The expression *ḳiyām* (*iḳāmat*) *al-daʿwa al-hādiya* clearly shows the task of directing humanity undertaken by the *imāms* and upon which their missionaries had to insist. It occurs, for example, in letters from caliph al-Mustanṣir to the Ṣulayḥid queen of the Yemen, of Fāṭimid persuasion (*Rasā'il al-Mustanṣir*, ed. ʿAbd al-Munʿim Mādjid (Magued), Cairo 1954, no. 46, p. 157) or in missionaries' investiture diplomas (al-Ḳalḳashandī, *Ṣubḥ*, ix, 19, 8, x, 435, 7 a f.) or in an Ismāʿīlī oath (Shihāb al-Dīn al-ʿUmarī, *Taʿrīf*, 158; cf. B. Lewis, *The origins* .... 59-60, Arabic trans., 141, and in *BSOAS*, xii, 1948, 597-8). In addition, M. Canard, *L'impérialisme des Fāṭimides et leur propagande*, in *AIEO*, Algiers, iv, (1942-1947), gives a survey of the methods used by Fāṭimid propagandists to demonstrate the justice of the dynasty's claims and its exclusive merits, and to denigrate and weaken its enemies, whether Byzantine, Umayyad or ʿAbbāsid.

The propaganda was also concerned with education and initiation in doctrine. The doctrine of the sect is indeed a combination of political, religious, juridical and philosophical instruction forming a secret, esoteric side (*bāṭin*, whence the name Bāṭiniyya also given to the sect and misinterpreted by Ibn Khaldūn, i, 363, Rosenthal, i, 413, who makes it refer to the *satr* of the *imām*), founded upon the allegorical interpretation of the Ḳur'ān and the laws of Islam, and another overt, exoteric side (*ẓāhir*), the first reserved for the intellectual élite of the faithful (*awliyā'*), the second for those from whom only fidelity to the imāms was required, together with the various obligations it entailed (see the *Kitāb al-Himma* by Abū Ḥanīfa al-Nuʿmān), and the accomplishment of the religious duties of Islam. Doctrinal propaganda and instruction went together, and more exclusively juridical or philosophico-scientific instruction also had propaganda objectives. This we can see, as early as 385/995, in a lecture given on Fāṭimid *fiḳh* at the al-Azhar mosque, with a list of names of those present, and then by the wazīr Ibn Killis in his own house; Yaḥyā b. Saʿīd, *Patr. Or.*, xxiii/3, 434 (226). In 385/995, a vast crowd thronged to the lectures on "Science of the *ahl al-bayt*" given by Ḳāḍī Muḥammad b. al-Nuʿmān in the palace; eleven men perished, crushed to death. In 395/1005 the caliph al-Ḥākim compelled people to "enter the *daʿwa*", that is to say to attend lectures by the chief *ḳāḍī* ʿAbd al-ʿAzīz b. Muḥammad b. al-Nuʿmān who arranged sessions at the palace on different days, attended either by men or women, or else by dignitaries; there too there was a crowd so dense that men and women perished in the press. From other information we learn that the chief *dāʿī* directed the *daʿwa* sessions, known as *madjālis al-ḥikma*, in a section of the palace called al-Muḥawwal, where the *dāʿī* had a special *madjlis* and his own chair (*kursī al-daʿwa*). He had the oath administered to those who were being converted to the Fāṭimid doctrine, and received offerings of silver from those present (*al-nadjwā*). The lectures which he had carefully prepared with the help of his *naḳībs* and official *faḳīhs* who worked and taught at the *dār al-ʿilm* or *dār al-ḥikma* [*qq.v.*], founded by al-Ḥākim in 395/1005, a kind of university with a library, were submitted to the caliph before being read. As has been noted above, there were separate sessions for men and women. According to Ibn al-Ṭuwayr (525-617/1131-1220), those for men were held in the great hall of the palace (*al-īwān al-kabīr*), those for women in the *madjlis al-dāʿī*. On the other hand al-Musabbiḥī (366-420/977-1029) records five different sessions, one for the *awliyā'*, one for the élite of the senior administrative and palace officials, one for the people and visitors from the interior of the country, another for women (at the al-Azhar mosque), and another for women from the palace (for all these points see al-Maḳrīzī i, 341-42 and ii, 390-391). According to al-Ḳalḳashandī (iii, 487), it was at the *dār al-ʿilm* that the juridical meetings of the chief *dāʿī* were held, and the taking of oaths by converts to the Fāṭimid doctrine. But it is not absolutely certain that the religious and doctrinal lectures based on allegorical interpretation were held in this place (M. Kāmil Ḥusayn, *Fī adab Miṣr al-Fāṭimiyya*, Cairo 1950, 32). Incidentally we know that at Aleppo at the time of the amīr Riḍwān, who died in 507/1113, there was a *dār al-daʿwa*: Ibn Shiḥna, 27; Kamāl al-Dīn b. al-ʿAdīm, in *Rec. Hist. Cr. Or.*, iii, 589-90; Abu 'l-Maḥāsin, *Nudjūm*, Cairo, v, 205, s.a. 507.

We have a detailed account of the procedure apparently used by Ismāʿīlī missionaries to gain neophytes for their philosophico-religious theses imbued with the neo-platonic theory of emanation, their cyclic conception of the world and imāmate, the way in which they made use of allegorical interpretation (*ta'wīl*) of the Ḳur'ān and the laws of Islam to attain their ends, and the different methods used, according to the religion of those whom they were trying to win over. According to this account which is found in al-Maḳrīzī, i, 391 ff. and with greater detail in al-Nuwayrī (translation in S. de Sacy, *Exposé de la religion des Druzes*, i, Introduction), the initiation of neophytes (*al-madʿū*) was only completed after nine periods of instruction, each one of which was called *daʿwa*. This system was attributed to the alleged founder of Ismāʿīlism, ʿAbd

Allāh b. Maymūn al-Ḳaddāḥ. In it we see how they proceeded gradually to reveal the secrets of the doctrine, the *taʾwīl* and the *taʾwīl al-taʾwīl* (for this last expression see al-Masʿūdī, *Tanbīh*, 395, trans. 501, and cf. Goldziher, *Vorlesungen*², 246; Fr. trans., 206). Ivanow has on several occasions (*An Ismailitic Work by Naṣīru d-dīn Ṭusī*, in *JRAS*, 1931, 534; *The organization of the Fatimid propaganda*, in *JBBRAS*, xv (1939), 11 and *Rise*, 133 in the chapter *The Myth of ʿAbdu 'l-lāh b. Maymūn al-Qaddāḥ*) challenged the existence of these nine degrees of initiation for converts to Ismāʿīlism with a gradual revelation of the mysteries. According to him, this is a misinterpretation of the hierarchy of the *ḥudūd al-dīn*, a kind of Fāṭimid "clergy" (for this expression see Ivanow, *Organization*, 8, and a note in M. Canard's translation of the *Sīrat Jaudhar*, 52); these nine degrees have no connexion with either the ancient or modern grades of initiates, there is no trace of it either in the literature of the sect or in controversial literature; he similarly rejects any comparison with initiation in Masonic lodges and their secret ceremonies. It is however difficult to believe that it is merely an invention. The nine degrees were known before al-Maḳrīzī and al-Nuwayrī, from Sunnī sources, not as stages in initiation but as stages (*marātib, daradjāt*) in the Machiavellian tricks (*ḥiyal*) to recruit new adherents and detach them from their religion (Sunnī interpretation, as opposed to the true religious fervour of the Fāṭimids). Each stage bears a name corresponding to the dialectical and psychological method used; the names given to these stages by al-Baghdādī, *Farḳ*, ed. Cairo 1367/1948, 179 ff. are: *tafarrus, taʾnīs, tashkīk, taʿlīk, rabṭ, tadlīs, taʾsīs*, after which come the oaths (*aymān*), and then complete detachment (*khalʿ*). (See also al-Ghazālī, *Kitāb faḍāʾiḥ al-Bāṭiniyya* (Goldziher, *Streitschrift des G. gegen die Bāṭinijja Sekte*, 40 and p. ἰ ff.), and M. Kāmil Ḥusayn, *Fī adab* . . ., 19 ff.).

The question remains obscure. Various methods of propaganda and discussion were used, but the period of their full development can hardly be taken back to the time of the beginnings of Ismāʿīlism. The outline given by al-Nuwayrī and al-Maḳrīzī seems to be of later date.

The word *daʿwa* does not only have the sense of appeal and propaganda. We have seen above its use to denote the Islamic community. Similarly, in connection with the Fāṭimids and Ismāʿīlīs, it has the sense of doctrine, religion, community, sect, party of the imām. Ivanow, *Organization*, 18-19, noted this polyvalence. *Daʿwa* can even be equated with zone of obedience, empire, dynasty. Ibn Ḥawḳal says (57-8) that the lands of the Maghrib are in the *daʿwa* of the Commander of the Faithful al-Muʿizz li-Dīn Allāh, and that (221) Kirmān is in the *daʿwa* of the people of the Maghrib. In the *Kitāb al-Himma* by Abū Ḥanīfa al-Nuʿmān, chap. 7, *man shamalathu daʿwat al-imām* denotes the caliph's subjects, as a whole. *Shuyūkh al-daʿwa* in the *Sīrat Jaudhar* (trans. 54, cf. Ivanow, *Rise*, V 9) is synonymous with *shuyūkh al-dawla*. For this use in the sense of dynasty see also al-Iṣṭakhrī, 36, 4 and 296, 4: *sawād daʿwat Banī 'l-Abbās*, the black colour of the ʿAbbāsid dynasty (*BGA*, iv, 236); al-Maḳrīzī, *Sulūk*, i, 18. Finally we may note that *daʿwa* is the equivalent of *madhhab* among the Wahbī Ibāḍites who call themselves *ahl al-madhhab* or *ahl al-daʿwa* (T. Lewicki, *La répartition géographique des groupements ibāḍites dans l'Afrique du nord au Moyen Age*, in *RO*, xxi, 1957).

In the Ismāʿīlī community there was a schism after the death of al-Mustanṣir in 487/1094, when his son Mustaʿlī was proclaimed in opposition to his other son Nizār. A group of Ismāʿīlīs refused to recognize Mustaʿlī, and there were two branches or parties in the community, the Mustaʿlians and the Nizārīs. The former were called *al-daʿwa al-ḳadīma*, the old, and the latter *al-daʿwa al-djadīda*, the new *daʿwa*. This schism became permanent. When Āmir, Mustaʿlī's successor, was assassinated in 524/1130 by the Nizārīs, before dying he handed over his authority to ʿAbd al-Madjīd, the future Ḥāfiẓ, his cousin, as his son Ṭayyib was a minor. The latter disappeared or entered the *satr*. The *daʿwa ḳadīma* was also called *daʿwa ṭayyibiyya*, and was perpetuated in the Yemen where the Ṣulayḥid queen spread the *daʿwa* for the imām al-Ṭayyib. It is is this *daʿwa ḳadīma*, or Mustaʿlian or Ṭayyibī *daʿwa*, which is today represented by the Bohoras in India, whilst the *daʿwa djadīda* or Nizārī *daʿwa*, made famous by Ḥasan b. Ṣabbāḥ and the Hashīshiyya (Assassins), is today represented by the Khodjas. For these two branches of the Ismāʿīlian *daʿwa* see Ibn Khaldūn, i, 363, Rosenthal, i, 413; al-Shahrastānī, ed. Cureton, 147, 150-152, ed. Cairo 1347, ii, 26, 28-31; Hodgson, *The Order of Assassins*, index. The Nizārīs or Assassins of Syria, also called Fidāʾiyyūn, who with their fortresses played an important part at the time of the Crusades, were conquered by the Mamlūk Baybars in 671/1278. They continued to occupy a certain number of places. They were then known by the name *al-ṭāʾifa al-ismāʿīliyya bi-ḳilāʿ al-daʿwa*; they called themselves *aṣḥāb al-daʿwa al-hādiya*, or *mudjāhidūn*, and had at their head an *atābek* appointed by Cairo (see al-Ḳalḳashandī, i, 122; iv, 146, 235, 309; ix, 254). For modern Islamic propaganda and the propagandist school founded by Rashīd Riḍā in the island of Rōḍa near Cairo, called *Dār al-daʿwa wa'l-irshād* ("House of propaganda and direction"), see Goldziher *Richtungen*, 343-4.

(M. CANARD)

DAʿWĀ, action at law. According to a well-known formula the *daʿwā* is defined as: "the action by which a person claims his right, against another person, in the presence of a judge" (*Madjalla*, art. 1613). A case submitted to an arbitrator is, equally, a *daʿwā*. The plaintiff is termed *muddaʿī*, the defendant *muddaʿā alayh* and the object of the claim

muddaʿā or, more popularly—though less accurately, as certain writers note,—*muddaʿā bihi*. We also meet, particularly in the Mālikī *madhhab*, the terms *ṭālib* (plaintiff) and *maṭlūb* (defendant). The parties to the suit are called, in the dual, *khaṣmān*. and in the plural, *khuṣūm* or *khuṣamāʾ* (opponents)—(singular *khaṣm*); more concretely each party is the *khaṣm* of the other. The contentious argument itself is the *khuṣūma* (additional synonyms, though of a slightly less technical character, are *nizāʿ*, *munāzaʿa* and *tanāzuʿ*).

The fact that the *daʿwā* envisages two contesting parties excludes from this notion the process in which the magistrate effects *ex officio* the exercise of certain rights such as measures to safeguard the public welfare.

But in every case which involves the three essential elements of contentious process there is a *daʿwā*, whatever the judicial authority before whom the action is brought and whatever the nature of the interest in issue.

A *daʿwā* exists, therefore, in the following cases: in the suit brought by an individual, the victim of an offence against the person, who claims the application of the law of talion (*ḳiṣāṣ* [*q.v.*]) or the payment of compensation (*diya* [*q.v.*]); in the case of prosecutions for various "legal" offences sanctioned by public penalties (*ḥudūd*) (see ḤADD) when brought in the exclusive or partial interest of the victim, such as the offences of theft or fornication; in the case of criminal prosecutions *ex officio* where the victim intervenes as plaintiff as well as in every case of the exercise of the so-called *ḥisba* action, a kind of *actio popularis*, based on the principle that every Muslim, apart from any personal grievance, is authorized to stand in the rôle of prosecutor for any infringement of the law (see ḤISBA); and finally in the action brought in accordance with the extraordinary procedure of the *maẓālim* [*q.v.*].

Certain conditions are required for the "validity" (*ṣiḥḥa*), that is to say the acceptability, of the *daʿwā*: there must be an adequate determination of the object of the claim, of the identity of the parties, and of their capacity. The person who does not possess ordinary legal capacity, but who simply has the ability to discriminate, may go to law, provided, however, he is authorized to do so by his guardian or the judge. In a real action the defendant must necessarily be the person in possession of the object in dispute (*ṣāḥib al-yad*).

A *daʿwā* which does not satisfy all these conditions may, however, be subsequently rectified by the fulfilment of the condition(s) in question, such rectification being termed *taṣḥīḥ al-khuṣūma*. This may be accomplished solely upon the initiative of the plaintiff or upon the order of the judge.

The parties may appear in person or through a representative, who may be either appointed by the party (*wakīl*) or, as in the case of the guardian (*waṣī*) or the *walī* of those lacking capacity, required by the law. In the case of things which are open to the use of the general public such as sea-water or the public highway, every person is entitled to go to law to defend his right of user. In the event of litigation between defined groups, such as villages in relation to communal property, such as forests, pastures, etc., a single member of each of the groups may go to law in the name of the group whether as plaintiff or defendant, provided, however, it is a question of groups whose number is "unlimited" (*ḳawm ghayr maḥṣūr*), such a group being, according to the general opinion, one whose number exceeds one hundred persons.

Certain estates of property, such as *waḳfs*, which are regarded as a legal entity, appear in process of law through the medium of their qualified representatives. The same applies to an inheritance prior to its distribution: in principle each heir may appear as plaintiff or defendant in the name of the succession.

The court which is competent to entertain a *daʿwā* is the court of the domicile or of the place of simple residence of the defendant. This rule is equally applicable in the case of immovable property. In the Mālikī *madhhab*, however, it is admitted that in this latter case competence also belongs to the court of the *situs* of immovable. Where there exists in the same locality a number of judges—as will be the case when judges are appointed for the different *madhhabs*, or when there is an ordinary judge and a judge appointed to hear suits concerning military personnel (*ḳāḍī ʿaskar* [*q.v.*]), the choice of the competent court rests with the defendant. However, all these rules of competence are not of a peremptory nature; they may be avoided by the common agreement of the parties.

The appearance of the parties, is, in principle, a necessary condition precedent to the fighting of the issue; there does not exist, in Islamic Law, a procedure of judgment in default of appearance. Further, various procedures of indirect coercion are laid down with the object of securing the appearance of a recalcitrant defendant. As a last resort, the judge will appoint for such a defendant an official representative (*wakīl musakhkhar*).

In another system, followed notably in the Shāfiʿī *madhhab* and in the Shīʿī doctrine, the view is maintained that the appearance of the duly named defendant is not a necessary condition of the *daʿwā*: the procedure runs its course in the ordinary way in his absence, but without being for that reason considered as a procedure of default; further the judgment delivered will have precisely the same validity as a judgment delivered in the presence of the defendant.

Essentially the process is an oral one; and while the parties may be allowed to present their pleas in written form, the writing nevertheless will have no validity until it is orally confirmed by the litigant before the judge.

The term *dafʿ* is used for the reply which tends to traverse the *daʿwā*—and, by extension, for every reply made by a party in contradiction of a plea raised by his opponent.

It is upon the plaintiff that the burden of proof falls. The methods of legal proof are acknowledgement or confession (*iḳrār*), the oath (*yamīn*), testimony (*shahāda*), which is the normal proof *par excellence*, writing (*khaṭṭ*) and legal presumptions (*ḳarāʾin*).

One particular form of testimony is the *tawātur*. This consists of the affirmation of a fact by a number of persons (a minimum of twenty-five according to a fairly widespread opinion) so large as logically to exclude any possibility of fraud or lying. It is not necessary in this case that the strict conditions of testimony properly so-called—such as the condition that the witness should have personal knowledge of the attested fact, or the condition of moral integrity (*ʿadāla*, [*q.v.*])—should be observed. But in spite of this the *tawātur* is superior to all other modes of proof with the exception of confession.

Writing in itself has no evidential value; it is a

valid mode of proof only in so far as it is orally confirmed by duly qualified witnesses.

In the event of the defendant failing to put in a voluntary appearance with the plaintiff it is a matter of some controversy whether the suit is to be regarded as started by the simple action itself of the plaintiff, or whether there can be no question of continuing the process further and naming the defendant until there has first been a preliminary enquiry by the judge to establish that there is at least a *prima facie* ground for the action.

The system of proof is a 'legal' system, in the sense that once proof has been provided according to the dictates of the law and is in conformity with the facts alleged, it binds the judge, whatever his own inner conviction may be. Hence one arrives at solutions like the following: in the case where two contending parties, each of whom claims exclusive ownership of a certain chattel, both adduce a regular form of proof supporting their allegations, it will be incumbent upon the judge to decide that they are co-owners in equal shares; or even, according to one opinion, it will be necessary to draw lots (*ḳurʿa*) to determine the title to the property.

The trial terminates with the judgment (*ḥukm*). Since the system of Muslim judicial organization is a system of a single jurisdiction, the judgment of the *ḳāḍī* is not subject to an appeal before a superior jurisdiction, which does not exist. This principle, however, is subject to two important reservations. In the first place, in periods or in areas where there exists an organized procedure of *maẓālim*, any person who feels himself a victim of injustice as a result of the workings of the public services, may demand redress by presenting a petition to the sovereign authority. In the second place, the suit may be reopened either before the same judge or before another judge—the successor in office of the judge who delivered the decision, or in fact any judge who may be on other grounds competent—in order to determine the case afresh. Furthermore the principle of *res judicata* is, to a large extent, unknown to Islamic law. Although it would be difficult to indicate here the precise scope of this rule, which is, indeed, beyond a certain point a matter of controversy, it may simply be pointed out that the authorities are unanimous in holding that a judgment may be contested and, in suitable circumstances, withdrawn or annulled where there is an infringement of an undisputed rule of law.

The right of action at law is extinguished by prescription, the period of which varies, according to different opinions, from three to thirty-six years. In the Ottoman Empire the period was fixed at fifteen years, except in certain cases, such as those relating to a *waḳf* fund, where the period was extended to thirty-six years. The law further recognizes certain causes of suspension or interruption of the period. Prescription functions as a procedural bar, which paralyses the exercise of the right of action; it does not affect the substantive right itself.

In the final stage of Islamic law in the Ottoman Empire, as represented by the code known as *Medjelle-i aḥkām-i ʿadliyye* [*q.v.*], which was promulgated between the years 1870 and 1877, the old system of the *daʿwā* was reformed in a number of particulars, notably by the recognition of the intrinsic probative value of writing (art. 1736), by the acceptance of the principle of *res judicata* (art. 1837), and by the introduction of procedure in default of appearance (art. 1833 ff.). These modifications ran parallel with the modernization of the judicial organization, established in accordance with European models and based upon the principles of benches of judges and the institution of a hierarchy of courts with systems of appeal.

DAWĀDĀR, also Dawātdār, Duwaydār and Amīr Dawāt, the bearer and keeper of the royal inkwell. Under the ʿAbbāsids the emblem of office of the *wazīr* was an inkwell. The post of *dawādār* was created by the Saldjūḳs, and was held by civilians. Sultan Baybars transferred it to a Mamlūk Amīr of Ten. Under the Baḥrī Mamlūks the *dawādār* did not rank among the important amīrs, but under the Circassians he became one of the highest amīrs of the sultanate, with the title Grand Dawādār (*dawādār kabīr*), and with a number of *dawādārs* under him. The office of *dawādār* ranked among the seven most important offices of the realm. There was competition between the *raʾs nawba* and the *dawādār kabīr* for the fifth and sixth places, possession of which alternated irregularly between them. Some *dawādārs* even became sultans. One of the *dawādār*'s duties during the later Mamlūk period was to decide which of the members of the *ḥalḳa* [*q.v.*] were fit to join in military expeditions; in addition, he regularly visited Upper Egypt, and sometimes the regions of Djabal Nābulus, al-Sharḳiyya, and al-Gharbiyya, in order to collect taxes and gather in the crops. These trips would take place amid great pomp, and the sources discuss them at great length. They were accompanied by cruel oppressions of the local population. At the close of the Mamlūk era, enormous power was concentrated in the hands of the *dawādār*; thus for example Amīr Yashbak was, in addition to his duties as *dawādār*, also *amīr silāḥ*, *wazīr*, *ustādār*, *kāshif al-kushshāf* (inspector-general), *mudabbir al-mamlaka*, and *raʾs al-maysara*; no previous Mamlūk amīr had accumulated such a great number of offices, though exactly the same offices were accumulated by the *dawādār* Ṭūmānbāy, who later became sultan. In the Ottoman and Safavid empires the *dawādārs* (called *divittār* and *dawātdār*) were functionaries with scribal duties in the chanceries.

DAWĀʾIR, plural of *dāʾira*, group of families attached to the service and the person of a native chief in Algeria. Before the French conquest, the name of *dawāʾir* (local pronunciation *dwāyr*) was borne especially by four tribal groups encamped to the south-west of Oran and attached to the service of the Bey of that city, although there were other *dawāʾir*, for example in the Titteri. They were organized as a militia, living on the products of the

land put at their disposition by the Turkish government and the profit from expeditions against tribes who were unruly or refused to pay their taxes. The Zmāla, their neighbours, played the same part.

Local tradition, as discovered after the French conquest, held the members of these groups to be the issue of troops whom the Moroccan sultan, Mawlāy Ismāʿīl, had brought into the region to fight against the Turks in 1701. The campaign having failed, a number of Moroccan soldiers passed into the service of the Turks and formed a *makhzen* tribe, placed under the command of two local families. Dawāʾir and Zmāla had the privilege of levying the taxes only in the district called Yaʿḳūbiyya in the southern region of Oran, which extended from the neighbourhood of Mascara and the mountains of Tlemcen to the Djabal ʿAmūr. Apart from this task, the Dawāʾir were charged with policing the tribes of the western region of Oran, and accompanied the Bey on all his expeditions. They were completely devoted to the Turks.

When the Turkish régime collapsed suddenly after the French expedition of 1830, the Dawāʾir found themselves deprived of their chief reason for existence and sought someone else under whom they could serve. They first embraced the cause of the envoy of the Moroccan sultan, Mawlāy ʿAbd al-Raḥmān, who had come to occupy Tlemcen in 1830 at the request of part of the population, But the Moroccan régime did not last long and they found themselves once again out of employment.

The Amīr ʿAbd al-Ḳādir tried in his early days to enrol them into his service, but their chief, Muṣṭafa b. Ismāʿīl, had already entered into negotiations with the French general in command at Oran, and did not respond to the Amīr's advances. Nevertheless, a part of the tribe joined ʿAbd al-Ḳādir. He tried to win over the rest in 1833 and seemed at one time to have succeeded, but Muṣṭafā b. Ismāʿīl, already an old man, found the authority of the young Amīr difficult to bear and separated himself finally from him. He shut himself up in the citadel (*mashwar*) of Tlemcen with fifty families of the Dawāʾir and the Kulughlī [*q.v.*] of the town. At that time, other groups of Dawāʾir were submitting to the French and were settled around Misserghin. The whole tribe treated with General Trezel at the camp of le Figuier near Oran on 16th June 1835, and became again in the service of France, the *Makhzen* group that they had been in the days of the Turks. Muṣṭafā b. Ismāʿīl, who remained at Tlemcen, was aided by the French early in 1836 and took back his place as head of the Dawāʾir. In this position, he co-operated with them in the struggle of the French against ʿAbd al-Ḳādir, and was appointed a brigadier by Louis-Philippe. He was assassinated at the age of almost 80 after the capture of the *smala* of ʿAbd al-Ḳādir (1843). His death brought to an end the greatest period in the history of the Dawāʾir.

DAWʿAN (sometimes Dūʿan), one of the principal southern tributaries of Wādī Ḥaḍramawt. Dawʿan, a deep narrow cleft in al-Djawl, runs c. 100 km. almost due north to join the main wādī opposite the town of Haynan. The precipitous walls of Dawʿan are c. 300 m. high; its towns nestle against the lower slopes with their palm groves lying in the valley bed below. The valley is formed by the confluence of two branches, al-Ayman (pronounced *layman*) and al-Aysar (pronounced *laysar*), with al-Ayman often reckoned an integral part of Dawʿan proper. Among the cluster of settlements in al-Ayman are al-Ribāṭ al-Khurayba, al-Rashīd, and al-Maṣnaʿa. Just below the juncture of al-Ayman and al-Aysar is the town of Ṣīf, after which come Ḳaydūn and al-Hadjarayn [*q.v.*], the last of which sometimes gives its name to the lower reaches of the valley. North of al-Hadjarayn is the comparatively recent shrine of al-Mashhad with the tomb of al-Sayyid ʿAlī b. Ḥasan al-ʿAṭṭās. Wādī al-ʿAyn empties into the valley from the east and Wādī ʿAmd from the west. The name Wādī al-Kasr (Kasr Ḳamāḳish in al-Hamdānī) is given to the lowest stretch where the stream beds of ʿAmd, Dawʿan, and al-ʿAyn run together. The towns of Ḥawra and al-ʿAdjlāniyya are on the right bank.

A motor road leads from al-Mukallā to the interior past Kawr Saybān, the highest peak in the region, and then past the sacred summit of Mawlā Maṭar to upper Dawʿan.

Relics of Sabaean times have been found in the valley, and the ruins of Ghaybūn lie south of al-Mashhad. The name Dawʿan has been detected in Ptolemy's Thauane (Thabane) and in the Toani, a tribe mentioned by Pliny. The valley lays within the territory of Kinda, and the royal house of Ākil al-Murār came from Dammūn at al-Hadjarayn. In al-Hamdānī's time the Imām of the Ibāḍīs in Ḥaḍramawt had his seat in Dawʿan, perhaps on the site now known as al-Khurayba. Later the upper valley became the stronghold of Āl al-ʿAmūdī, whose ancestor, al-Shaykh Saʿīd b. ʿĪsā (d. 671/1272-3 and buried in Ḳaydūn) is said to have been the first to introduce Ṣūfism into Ḥaḍramawt. The Bedouin tribes of Saybān and al-Dayyin in the highlands showed great reverence for the *shaykhs* of this family, but the religious basis of its influence did not keep the *shaykhs* from squabbling among themselves, and they could not resist the expanding power of the Ḳuʿayṭī Sultanate of al-Mukallā at the close of the 19th century. Dawʿan now forms a *liwāʾ* of the Sultanate with al-Hadjarayn as the northern limit. The house of Bā Ṣurra of Saybān provides the provincial governors, but Āl al-ʿAmūdī has recovered something of its old standing, its main centre now being at Biḍa in al-Ayman.

Many of the people of Dawʿan have emigrated to Aden, East Africa, and Java. For sentimental reasons a number of the rich emigrants maintain homes and gardens in the valley, the only export from which is honey.

AL-DAWĀNĪ, Muḥammad b. Asʿad Djalāl al-Dīn, was born in 830/1427 at Dawān in the district of Kāzarūn, where his father was Ḳāḍī; he claimed descent from the Caliph Abū Bakr whence his *nisba* al-Ṣiddīḳī. He studied with his father and then went to Shīrāz where he was a pupil of Mawlānā Muḥyī 'l-Dīn Gūsha Kinārī and Mawlānā Humām al-Dīn Gulbārī and Ṣafī al-Dīn Īdjī. He held the office of *Ṣadr* under Yūsuf b. Djahānshāh, the Ḳarā Ḳoyūnlū, and after resigning this office became Mudarris of the Begum Madrasa, also known as the *Dār al-Aytām*. Under the Āḳ Ḳoyūnlū he became Ḳāḍī of Fars. During the disorders which occurred in Fārs at the time of the break-up of the Āḳ Ḳoyūnlū kingdom and the wars between them and Shāh Ismāʿīl Ṣafawī, Djalāl al-Dīn took refuge in Lār and Djurūn; and when Abu 'l-Fatḥ Beg Bayāndur took possession of Shīrāz, he set out for Kāzarūn but died some days after reaching the encampment of Abu 'l-Fatḥ in 908/1502-3. He was buried at Dawān. He wrote numerous commentaries on well-known works of philosophy and mystical literature and a number of dogmatic, mystic, and philosophical treatises in Arabic. His commentary on the *Tahdhīb al-Manṭiḳ wa 'l-Kalām* of al-Taftazānī (d. 791/1389), Lucknow 1264, 1293 (with glosses by Mīr Zāhid), and his *Risālat al-Zawrāʾ*, completed in 870/1465 (Cairo 1326 with *Taʿlīḳāt*) have been printed. His best known work is the *Lawāmiʿ al-Ishrāḳ fī Makārim al-Akhlāḳ*, better known as the *Akhlāḳ-i Djalālī*, which he wrote in Persian (lith. Calcutta, 1283/1866-7, translated into English by W. T. Thompson, *Practical Philosophy of the Muhammedan People*, London 1839).

It is a 'modernized' and 'popular' version of the *Akhlāḳ-i Nāṣirī* of Naṣīr al-Dīn Ṭūsī, made at the command of Uzun Ḥasan, the Aḳ Ḳoyunlū ruler, to whom it is dedicated (Persian text, 16). Djalāl al-Dīn admits his debt to Naṣīr al-Dīn (321). The *Akhlāḳ-i Nāṣirī* is divided into three parts, ethics, economics, and politics; the first part is a translation and reworking of an Arabic treatise by Abū ʿAlī Aḥmad b. Muḥammad b. Yaʿḳūb b. Miskawayh, entitled *Kitāb Ṭahārat al-Aʿrāḳ fī Tahdhīb al-Akhlāḳ*; the second derives from Bryson through an essay entitled *Tadābīr al-Manāzil* by Abū ʿAlī b. Sīnā; and the third is based on al-Fārābī's *Madīna Fāḍila* and *Kitāb al-Siyāsa al-Madaniyya*. The *Akhlāḳ-i Djalālī* follows a similar arrangement. Djalāl al-Dīn, like Naṣīr al-Dīn Ṭūsī, argues the necessity of a supreme law, a governor, and a monetary currency. The law he interprets to be the Sharīʿa and the governor that person distinguished by the support of God and possessing such qualities as would enable him to lead individual men to perfection. Government was either righteous, in which case it was the imāmate, or unrighteous in which case it was the rule of force. He does not lay down any conditions of election or deposition for the ruler. Any righteous ruler was the shadow of God upon earth, His representative (*khalīfat allāh*), and the deputy (*naʾib*) of the prophet Muḥammad (236). It is, doubtless, in this sense that Djalāl al-Dīn addresses his patron, Uzun Ḥasan, as caliph. The righteous ruler maintained the equipoise of the world, for the preservation of which co-operation between men was needed. Djalāl al-Dīn recognizes two types of civilization, righteous and unrighteous, which, following al-Fārābī and Naṣīr al-Dīn Ṭūsī, he calls the "good city" (*madīna-i fāḍila*) and the "unrighteous city" (*madīna-i ghayr-i fāḍila*); and subdivides the latter into the "ignorant city" (*madīna-i djāhila*), the "profligate city" (*madīna-i fāsiḳa*), and the "wicked city" (*madīna-i ḍālla*) (260-1). Within the good city there were several intellectual grades among the citizens and a differentiation of function. Equity demanded that each class should be kept in its proper place and each individual engaged in that occupation to which he was fitted and wherein he could attain to perfection (266). Righteous government, the imāmate, consisted in the ordering of the affairs of the people in such a way that each might arrive at that degree of perfection which lay in him (269). Unrighteous government was force, and consisted in the subjugation of the servants of God and the devastation of His territories (270). In order to preserve the equipoise of civilization, society was to be resolved into four classes; (i) men of learning, such as the *ʿulamā*,ʾ *fuḳahāʾ*, *ḳāḍīs*, scribes, mathematicians, geometricians, astronomers, physicians, and poets; (ii) men of the sword; (iii) merchants, craftsmen, and artisans; and (iv) agriculturalists, without whom, Djalāl al-Dīn states, the continued existence of the human race would be impossible (277-8). He then, still following Naṣīr al-Dīn Ṭūsī, divides men into five classes according to their moral nature: (i) those who were by nature righteous and who influenced others, whom Naṣīr al-Dīn describes as the choicest of creation, whom the ruler should treat with the utmost respect and consider to be over the other classes; and whom Djalāl al-Dīn declares to be such people as the *ʿulamāʾ* of the Sharīʿa, the *shaykh*s of darwīsh orders, and mystics; (ii) those who were by nature good but had no influence over others; (iii) those who were neither righteous nor unrighteous; (iv) those who were evil but had no influence over others; and those who were evil and had an influence over others (279-81). He then discusses the means to be adopted to coerce the evil and the need for the ruler to enquire personally into the affairs of his subjects (282 ff.). The final section of the work, also based on the *Akhlāḳ-i Nāṣirī* contains a number of political maxims attributed to Plato and Aristotle.

Djalāl al-Dīn's *ʿArḍ Nāma*, written for Sulṭān Khalīl when he was governor of Fārs on behalf of his father Uzun Ḥasan, has been translated into English by V. Minorsky, *A Civil and Military Review in Fars in* 881/1476, in *BSOS*, x/1, 141-78.

DĀWAR [see zamīn-i dāwar].

DAWĀR, an encampment of Arab Bedouins in which the tents (sing. *khayma*) are arranged in a circle or an ellipse, forming a sort of enceinte around the open space in the middle (*murāḥ*) where the cattle pass the night; this very ancient way of laying out an encampment is still to be found among the Bedouins of the east (northern Syria, Mesopotamia) and among all the nomads or semi-nomads of North Africa. The name of *dawār* which is given to it appears already in the writings of certain travellers

and geographers of the middle ages. In the East, the exact form of the word is *dawār* or *dwār*; in the Maghrib, it is *dūwār* or *dawwār* (pl. *dwāwīr*). The number of tents of which a *dawār* is composed can vary greatly; it can be as many as several hundreds, or no more than ten. Many different reasons, such as abundance or scarcity of pasturage, security or the lack of it, etc., bring about the splintering of the same Bedouin group into *dawārs* of little importance, or its reunion into *dawārs* of considerable size. Beside this term, which has in a way become the generic one, one finds for less important groups the dialectal representatives *rasm*, *ḥilla*, *nazla*, *farīḳ*, etc. In the administrative language of Algeria, the word *douar* no longer bears its original primitive meaning, but is employed to designate an administrative area, either nomad or sedentary, placed under the authority of the same chief, *ḳāʾid*, or *shaykh*. The word *dawār* was known in Arab Spain. The *Vocabulista* (ed. Schiaparelli) gives it as the equivalent of the Latin *mansio*, without further definition. In modern Spanish *aduar* means a gipsy camp.

DAWĀRO, one of the Muslim trading states of southern Ethiopia. It was a long narrow strip of territory lying immediately east of Bāli, and included the great Islamic centre of Harar. It seems to have reached the Webi Shabelle in the south, and the edge of the Danāḳil lowlands in the north, where, with Bāli, it met the state of Ifāt. It is clear, however, that for a time at least, and as early as the reign of ʿĀmda Ṣyon I of Ethiopia, there was an isolated continuation of Dawāro on the north side of the lower course of the Hawaš river, which included part of the present sultanate of Awssa. Dawāro first appears in Ethiopic records in the reign of ʿĀmda Ṣyon I (1312-42). Like the other Muslim states of Ethiopia it was under a king of its own (called *makuannen* in the History of ʿĀmda Ṣyon, BM. MS. Orient. 821, fol. 43), who was tributary to the king of Ethiopia. Under ʿĀmda Ṣyon the king, Hāydārā, revolted and joined the rebellious peoples of Adal; but it was conquered, and remained a dependency of Ethiopia till after 1548 when Fanuʾel was governor under Gālāwdēwos. According to al-ʿUmarī, though only five days' journey in length and two days' in breadth, it maintained a large and powerful army; the inhabitants were Ḥanafites. Al-Maḳrīzī repeats the account of al-ʿUmarī. The name Dawāro was applied also locally to the small Sidamā state of Kullo west of the Omo because this area was colonized by refugees from Dawāro during the war of Ethiopia with Aḥmad Grañ (1527-42); but there was no other connexion between Kullo and Dawāro.

AL-**DAWĀSIR** (singular: Dawsarī), a large tribe based in central Arabia. The Dawāsir are remarkable for the way in which many of them have spread abroad and won success in areas and endeavours remote from their original environment, while at the same time even the settled elements among them have retained an unusually strong sentiment of tribal solidarity and attachment to the *mores* of their Bedouin forebears.

Whatever the origins of the tribe, the Dawāsir became primarily identified with Wādī al-Dawāsir in southern Nadjd (the closest of the populated districts there to al-Rubʿ al-Khālī) and with al-Aflādj [*q.v.*]. Although the mainstream of Dawsarī emigration has flowed off towards the north and east, Dawāsir (emigrants or relics clinging to an earlier home?) are found to the south and west in Raghwān near Mārib and in al-Khurma in the Ḥidjāz mountains. North of al-Aflādj, Dawāsir are numerous in the districts of al-Khardj (where they predominate in the principal town, al-Dalam), al-ʿĀriḍ, al-Maḥmal, and Sudayr. Among the towns for which they have provided rulers or judges or other prominent citizens in recent centuries are al-Bīr and Thādiḳ in al-Maḥmal; and al-Madjmaʿa, Djalādjil, al-ʿAwda, and al-Ghāṭ in Sudayr (Ibn Bishr, ii, 142-4, gives the biography of a famous Dawsarī judge of Ḥuraymilā). Dawāsir live in al-Zilfī on the borders of al-Ḳaṣīm, but not many have moved farther north.

The pride of the Dawāsir is the house of the Sudayrīs (al-Sadārā). Their name comes from Sudayr, where for about four centuries they have lived in al-Ghāṭ. In the 13th/19th century Aḥmad b. Muḥammad al-Sudayrī was an illustrious lieutenant of Āl Saʿūd, and his descendants have been intimately associated with this dynasty ever since. A daughter of his was the mother of King ʿAbd al-ʿAzīz (d. 1373/1953), and a great-granddaughter of his bore the King seven sons, two of whom (Fahd and Sulṭān) were Ministers in the Saudi Arabian Government in 1379/1960. In 1369/1950 thirteen of the Sadārā held provincial or district governorships in Saudi Arabia; through this one family Dawāsir have reached into every corner of the Kingdom.

On the Persian Gulf Dawāsir coming from Nadjd via Bahrayn have founded the new towns of al-Dammām [*q.v.*] and al-Khubar, in which they are prospering. Others live in Bahrayn and Ḳaṭar. From Bahrayn some have migrated to the Iranian shore, and from Ḳaṭar a few to the island of Dalmā. In ʿIrāḳ there are Dawāsir in al-Zubayr, and a stretch of Shaṭṭ al-ʿArab is called the district of the Dawāsir, whose name is also given to river islands there.

The tribe consists of two principal divisions, ʿIyāl Zāyid and the Taghāliba, originally independent of each other. Neither claims an ancestor called Dawsar ("strong camel"), though Dawsar occurs as a tribal name in classical sources. The plural Dawāsir is popularly derived from the phrase *al-da yāsir* (sometimes given as *al-dalyāsir* with an intrusive *lām*), the meaning and application of which are obscure. ʿIyāl Zāyid's eponym is Zāyid al-Malṭūm ("the Slapped"—not al-Maltub as in Philby, etc.), whose name appears in the tribal war-cry. Zāyid's identity is uncertain; frequently mentioned as a progenitor of his is ʿUmar al-Khaṭṭāb (without *ibn*),

but the ordinary tribesman knows him only vaguely as one of the Ṣaḥāba. In legend both Zāyid and the Taghāliba are associated with Sadd Mārib (pronounced Māridz), and Zāyid is said to have led the tribe from there into Wādī al-Dawāsir. Rather early sources speak of the Dawāsir as an offshoot of ʿĀʾidh, which may be plausible if ʿĀʾidh was in fact a branch of ʿUḳayl [*q.v.*], as ʿAdnānite ʿUḳayl once occupied the valley now known as Wādī al-Dawāsir. Against this identification are various indications, admittedly inconclusive, that ʿIyāl Zāyid are Ḳaḥṭānite rather than ʿAdnānite. ʿIyāl Zāyid are sometimes called Banī Zinwān, legend holding that Zāyid's mother had been falsely accused of adultery.

The other principal division, the Taghāliba, has a firm tradition of descent from Taghlib (pronounced Tughlub) b. (not *bint*) Wāyil, which is not impossible, as this ʿAdnānite tribe was in the forefront of eastern Arabian affairs well beyond the heyday of the Ḳarmaṭians. For unclear reasons the Taghāliba, particularly the section of the Khiyālāt, are referred to as ʿAbāt al-Dawāsir. The union between the two principal divisions is traced back to al-ʿIrʿir, the ancestor of Āl Ḥuḳbān of the Taghāliba, whose daughter is said to have been Zāyid al-Malṭūm's mother.

The most important sections of ʿIyāl Zāyid are the Masāʿira, Āl Ḥasan, the Ridjbān, the Makhārīm, the Wadāʿīn, the Badārīn (including the Sadārā), the Ghiyāthāt, the Sharāfā, and the Ḥarādjīn. The foremost chief is Ibn Ḳuwayd of the Masāʿira, who leads a semi-nomadic life in the hamlet of al-Ḳuwayz in Wādī al-Dawāsir. The Taghāliba consist of five sections: the ʿUmūr, the Maṣārīr, the Mashāwiya, Āl Ḥuḳbān, and the Khiyālāt.

The Dawāsir first appear by name about the 7th/13th century, when they were in contact with Āl Faḍl of Ṭayyiʾ, the Amīrs of the Syrian Desert, and with the Mamlūk Sultans in Cairo, who got horses from Arabia. The Dawāsir are called a tribe of the Yemen, and Ibn Badrān (of the Badārīn) is named as their chief.

Beginning in 851/1447-8, details on the history of the Dawāsir become more abundant and precise. In that year Zāmil b. Djabr, the Djabrid [*q.v.*] lord of al-Ḥasā and al-Ḳaṭīf, defeated the Dawāsir and ʿĀʾidh in al-Khardj. In the following year Zāmil led a large force of Bedouins and townsmen against the Dawāsir in their own valley (the first mention of the valley as Wādī al-Dawāsir) to punish them for their many raids on the nomads of al-Ḥasā. Later Zāmil's son Adjwad launched four separate expeditions against the Dawāsir without reaching their valley on any of them. With the decline of Djabrid power, the Dawāsir multiplied their attacks on caravans carrying merchandise from al-Ḥasā to Nadjd.

Of the 43 battles involving the Dawāsir which are recorded for the period between 851 and 1164/1751, fifteen were fought against Ḳaḥṭān. Other principal opponents were Subayʿ, Āl Maghīra, Āl Kathīr, and the Fuḍūl. Usually the Dawāsir had fewer friends than foes; no other tribe stood by them steadfastly, but on occasion even some of their opponents mentioned above, such as Ḳaḥṭān, joined their side, such being the evanescent loyalties of desert warfare.

The favourite battleground for the Dawāsir was the watering place of al-Ḥarmaliyya near al-Ḳuwayʿiyya, where no less than six encounters took place. In the broader district of al-Khardj the Dawāsir fought seven or eight battles, and four in al-ʿArama. The Dawāsir engaged in most of their strife on territory not their own; other tribes seem to have lacked the temerity to assault them in their homeland.

About 1100/1689 pressure by the Dawāsir forced Āl Ṣabāḥ [*q.v.*] and Āl Khalīfa [*q.v.*], both of ʿAnaza, to migrate from al-Haddār in al-Aflādj to the Persian Gulf, where they in time became the rulers of Kuwayt and Bahrayn. As the power of Āl Saʿūd [*q.v.*] grew during the 12th/18th century, the Dawāsir were among the last of the great tribes of Nadjd to adhere to the reform movement of Shaykh Muḥammad b. ʿAbd al-Wahhāb. In 1199/1784-5 Rubayyiʿ b. Zayd of the Makhārīm swore allegiance to Āl Saʿūd, whose mainstay in Wādī al-Dawāsir he remained for the rest of his days. The Ridjbān and the Wadāʿīn resisted the progress of the reform movement in the valley, supported first by the Ismāʿīlī lord of Nadjrān and then by Ghālib, the Sharīf of Mecca. As the domains of Āl Saʿūd expanded, the Dawāsir fought for them in the west side by side with their old enemies Ḳaḥṭān. In 1212/1809 Dawāsir were among the Bedouins who raided Ḥaḍramawt. The large army annihilated by Muḥammad ʿAlī of Egypt at Bisl in 1230/1815 contained a contingent of Dawāsir.

When Āl Saʿūd returned to power after the capture of al-Dirʿiyya by Muḥammad ʿAlī's forces in 1233/1818, both Turkī b. ʿAbd Allāh and his son Fayṣal maintained Amīrs in Wādī al-Dawāsir. The tribesmen were not always obedient subjects; in 1243/1827-8, for instance, Turkī disciplined Bedouin elements of the Dawāsir for their lawlessness.

About 1845 a number of Dawāsir arrived in Bahrayn, having come from Nadjd by way of the island of al-Zakhnūniyya, where they sojourned for a few years. In Bahrayn they settled in the towns of al-Budayyiʿ (cf. the Dawsarī town of al-Badīʿ in al-Aflādj) and al-Zallāḳ.

During the civil war between Fayṣal's sons ʿAbd Allāh and Saʿūd, the chief of al-Sulayyil in Wādī al-Dawāsir and the Ismāʿīlī lord of Nadjrān championed Saʿūd's cause. In 1283/1866-7 ʿAbd Allāh's forces under his brother Muḥammad crushed Saʿūd and his partisans at al-Muʿtalā in Wādī al-Dawāsir and during the next year ʿAbd Allāh himself spent two months in the valley inflicting condign punishment on its inhabitants. After the death of Saʿūd in 1291/1875, the Dawāsir supported his sons in the struggle which led to a temporary eclipse of Āl Saʿūd, whose rule in Nadjd was supplanted by that of Āl Rashīd of Ḥāʾil. Āl Rashīd is said to have kept a small force in Wādī al-Dawāsir in the closing years of the 19th century.

Following the recapture of al-Riyāḍ by ʿAbd al-ʿAzīz Āl Saʿūd in 1319/1902, Wādī al-Dawāsir was quickly brought back into the fold, though ʿAbd al-ʿAzīz had no easy time in keeping the peace among the turbulent elements of the Dawāsir, who if not fighting with each other were often at war with Āl Murra to the east or Āl Murra's cousins of Yām to the south-west.

In 1336/1918 Philby became the first Westerner to visit Wādī al-Dawāsir and provide an accurate description of it. The valley in recent years has remained a backwater of the new Kingdom of Saudi Arabia, scarcely touched by the material progress being achieved in many other parts. Wādī al-Dawāsir, once an important way station for the coffee trade between the Yemen and Nadjd, has been replaced by Bīsha in the 20th century. The present centre of influence of the Dawāsir is in their government positions and their new towns on the Persian Gulf.

In the old days Dawāsir would go from their valley to the Gulf to work as pearl-divers every summer. Now many who reside on the Gulf shore are landowners, merchants, contractors, and laborers in the oil industry.

In Nadjd the Dawāsir have been Ḥanbalīs since the time of Ibn ʿAbd al-Wahhāb. Along the Persian Gulf some are Mālikīs, while on the Iranian side a number have embraced Shīʿism.

Wādī al-Dawāsir is one of the great eastward trending channels which cut through the long wall of Ṭuwayḳ. The Wādī's ancient tributaries, the valleys of Bīsha, Ranya, and Tathlīth, descend from the Ḥidjāz mountains and meet in the basin of Hadjlat al-Mukhatmiyya (for al-Mukhātimiyya?), where a sand barrier now prevents their waters from reaching the Wādī save in exceptional years (the Tathlīth *sayl* flooded the Wādī the year before Philby's first visit). The name Wādī al-Dawāsir is sometimes restricted to the western part of the valley, in which are found the capital of the whole district, al-Khamāsīn; its sister town, al-Lidām (incorrectly shown as Dam on many maps); and the westernmost settlements known as al-Farʿa. Like al-Khamāsīn, a number of other towns bear the names of units of the tribe, such as al-Sharāfā and al-Walāmīn (a subsection of the Wadāʿīn). South of the gap in Ṭuwayḳ lies Tamra, which earlier lent its name to the valley, if the identification of ʿAḳīḳ Tamra with Wādī al-Dawāsir is accepted. East of the gap is the oasis of al-Sulayyil, whence the principal route to the north leads to al-Aflādj. The lower course of the Wādī, called al-Aṭwā, disappears to the east in the sands of al-Rumayla, the southerly extension of al-Dahnāʾ [*q.v.*].

AL-**DAWḤA** (Doha), the capital and only major city of Ḳaṭar, a Persian Gulf state. Al-Dawḥa is located at 25° 17′ N, 51° 32′ E in the SW corner of a natural shallow-draught harbour formed by two reefs in a bay (*dawḥa* in Persian Gulf Arabic) on the east coast of Qatar (Ḳaṭar) Peninsula. A former fishing village, al-Bidʿ, on the site is now a quarter of the city.

Little is known of al-Dawḥa before 1238/1823, when the British Political Resident in the Persian Gulf visited the town and reported that it was a dependency of Bahrain (al-Baḥrayn). The nature of this relationship, however, varied with changing circumstances. During the early 13th/19th century al-Dawḥa apparently belonged to Bahrain, which in turn paid Āl Saʿūd of Nadjd *zakāh* collected from al-Dawḥa by the British Resident, with whom both Bahrain, in 1235/1820, and Muḥammad b. Thānī, for al-Dawḥa in 1285/1868, had agreed to keep the maritime truce. After a Turkish force occupied al-Dawḥa in 1288/1872 and proclaimed it part of the so-called Sandjaḳ of Nadjd, the town still maintained close relations with Bahrain, Āl Saʿūd of Nadjd, and the British. Other parts of Qatar were treated occasionally as belonging to Bahrain, Abu Dhabi (Abū Ẓabī) or Nadjd until after the departure of the Turks. In 1335/1916, ʿAbd Allāh Āl Thānī as "Shaikh of Qatar" signed an agreement placing Qatar in a "special treaty relationship with H. M. Government". Its status has more recently been defined as that of "a British-protected state". As such, it remains the concern of the British Foreign Office, while British Protectorates proper, such as those in southern Arabia, come under the Colonial Office.

The ascendancy of al-Dawḥa derives from the destruction of the rival city of al-Zubāra in 1312/1895 and from the production of oil from a field at Dukhān, the oil being shipped from a marine terminal at Musayʿīd (incorrectly shown on most maps and in much other printed matter as Umm Said). In 1318/1900 al-Dawḥa was a pearling port of some 12,000 inhabitants in nine *fariḳs* or quarters, sprawling for almost two miles (three km.) along the waterfront on the rocky edge of the desert and dominated by the Ḳalʿat al-ʿAskar or Ḳaṣr Kunāra, as the Turkish garrison called it. This fort still stands in the quarter of the Kalʿat al-ʿAskar, in which are the finest shops and residential areas. Until recently the town proper had no water or gardens; today water is piped in or extracted from sea water by a distillation plant. The hereditary mansion of Āl Thānī still stands in the quarter of al-Dawḥa, from which the town derives its name, but the family now has palaces in the western suburb of al-Rayyān. The present population of al-Dawḥa, which may be roughly estimated at 20-30,000, forms the major part of the total population of Qatar. The city possesses a modern hospital and a small airport which affords connexions with international flights out of Dhahran (al-Ẓahrān) in Saudi Arabia and al-Muharraḳ in Bahrain. The British Political Agent is the only representative of a foreign government resident in al-Dawḥa.

DAWLA, 1) an Arabic word signifying the period of an individual's rule or power but also often employed in the meaning of "dynasty". The root *d-w-l* may occur in Akkadian *dālu* "to wander around aimlessly" (*The Assyrian Dictionary*, iii, 59) and Syriac *dāl* "to move, to stir" (Brockelmann, *Lex. Syr.*², 144 b). However, the basic meaning of Arabic *d-w-l* is clearly "to turn, to alternate" (relating it to *d-w-r*?). The Ḳurʾān has *nudāwiluhā* "We cause (days) to alternate" (III, 140/134) and *dūlatan* "something whose ownership is passed around" (LIX, 7/7). In addition, the *ḥadīth* uses *adāla* "to cause someone to obtain his 'turn' (success, victory)", and the famous report of the *Sīra* (Ibn Hishām, 1011) on Muḥammad's death mentions that it took place when it was ʿĀʾisha's regular "turn" (*daw/ūlati*) for Muḥammad to visit her. The meaning "turn, time (of success, holding office, etc.)" is often attested in early times, as, for instance, in the verses of Farwa b. Musayk in which, however, one of the two occurrences of *dawla* is occasionally replaced by another word (*LA*, s.v. *ṭ-b-b*; al-Ṭabarī, i, 735). It appears to have been the starting point for the development of the meaning "dynasty".

How *dawla* acquired this meaning remains to be investigated. There is nothing to indicate a pre-Islamic origin. Tribal terms, such as *banū* or *āl*, continued to be used in Islam. Genuine verses antedat-

ing early ʿAbbāsid times and containing *dawla* in the meaning of "dynasty" have not yet been signalized. Prose references are open to the suspicion of anachronism. Thus, it seems unlikely that an Umayyad general should have blamed a son of the caliph ʿUthmān in these words: "we are fighting for your dynasty (*dawlatikum*) while you betray it" (al-Balādhurī, *Ansāb*, IVB, 39). An increase in the use of the word is noticeable in the earliest ʿAbbāsid documents, some of which may have been transmitted with literal accuracy. In his speech to the Kūfans upon his accession, al-Saffāḥ said: "... you have reached our time, and God has brought to you our *dawla* (time of success)" (al-Ṭabarī, iii, 30). Al-Manṣūr, advising al-Saffāḥ to kill Abū Muslim, praises the strength of "our *dawla*" (*ibid.*, iii, 85; P. K. Hitti, *History of the Arabs*[6], 286). Al-Saffāḥ speaks of Abū Muslim's *dawla* (time in office) (al-Ṭabarī, iii, 86), and, in a document of doubtful historicity, he refers to those who "disrupt the rope of the *dawla* (dynasty)" (*ibid.*, iii, 104). A few years later, al-Manṣūr speaks of those who supported the ʿAbbāsid *dawla* (*ibid.*, iii, 339, but cf. the earlier, similar passage, iii, 32, where *dawla* means "victory"). In a paraphrase of al-Manṣūr's last will, reference is made to the *dawla* (reign) of al-Mahdī (*ibid.*, iii, 454). The evidence is inconclusive. It seems that at the beginning of the ʿAbbāsid period, the term *dawla* was by no means well established in the meaning of "dynasty". However, the word was frequently used by the ʿAbbāsids with reference to their own "turn" of success. Thus it came to be associated with the ruling house and was more and more used as a polite term of reference to it. Soon, one could speak of the supporters and members (*aṣḥāb, ridjāl*) belonging to the *dawla*, the supporters and members of the dynasty; again, the precise date of the earliest occurrence of such usage as yet eludes us.

It has been assumed that Persian political speculation along the lines of the Polybian ἀνακύκλωσις τῶν πολιτειῶν contributed to the formation of the concept *dawla* "dynasty". Such an assumption may find some slender support in the suggestion advanced here that it was the ʿAbbāsids who gave prominence to the term by stressing the significance of their "turn". However, no conscious application of any political theory seems to be involved, notwithstanding the fact that *dawla* occurred later in connexion with speculations about cycles of political power. Al-Kindī, in his *Risāla fī mulk al-ʿArab* (ed. O. Loth, in *Morgenländische Forschungen, Festschrift Fleischer*, Leipzig 1875) usually paired *dawla* with *mulk*. Cf. also al-Rāzī, *Fī amārāt al-iḳbāl wa 'l-dawla* (ed. P. Kraus, *Razis Opera Philosophica*, Paris 1939), where *dawla* means "political success".

2) *Al-dawla* as the second element in titles. At the end of the 3rd/10th century, the *wazīr* al-Ḳāsim b. ʿUbayd Allāh Ibn Wahb was granted the title Walī al-Dawla "Friend of the Dynasty", which then also appeared on al-Muktafī's coinage; specimens dated 291/904 are common, but the existence of any dated 290 is doubted by G. C. Miles. Muslim authors stress that this is the first occurrence of a title composed with *dawla*. Al-Ḳāsim's son, al-Ḥusayn, continued the tradition inaugurated by his father when al-Muḳtadir solemnly bestowed upon him the title of ʿAmīd al-Dawla "Support", which was also inscribed upon coins. This happened in al-Muḥarram 320/February 932 (ʿArīb, 167; Miskawayh, in *Eclipse*, i, 223, trans. iv, 250).

Occasional use of descriptive composites with *dawla* can be traced for the immediately following years. At about this time, we also find a musician and littérateur nicknamed Djirāb al-Dawla "Bag" (*Fihrist*, 135); however, he is said to have chosen this nickname himself in order to ridicule the Būyids (Yāḳūt, *Irshād*, ii, 62 f.). In any case, titles composed with *dawla* came into their own when in Shaʿbān 330/April 942, the Ḥamdānids Ḥasan and ʿAlī were granted the titles Nāṣir al-Dawla "Helper" and Sayf al-Dawla "Sword", respectively. Soon after (beg. 946), the three Būyid brothers claimed *dawla* titles as a sign that they had assumed control in Baghdād and the East. They received the titles Muʿizz al-Dawla "Fortifier", ʿImād al-Dawla "Support", and Rukn al-Dawla "Pillar". Bestowal of these titles was not a meaningless gesture but a highly significant step indicating cession by the caliph of most of the powers of his office.

The Ḥamdānids and the Būyids continued the use of *dawla* titles, and their example was followed in their time, for instance, by the Ghaznawids and Ilek-Khāns in the East and even some of the *reyes de taifas* in Spain. The Fāṭimids also bestowed occasional *dawla* titles upon their highest officials. But the tenth century was hardly over when *dawla* titles lost greatly in significance. They were at first supplemented and eventually replaced by other similar titles; this marked the beginning of the excessive use of titles in Muslim countries, which we find occasionally criticized by Muslim authors. A comprehensive study of post-Būyid occurrences of *dawla* has not yet been made. In the twelfth century, for instance, a court physician was called Amīn al-Dawla "Trusted Supporter" (Hibat Allāh b. al-Tilmīdh) (for *dawla* titles of non-Muslims, cf. al-Ḳalḳashandī, *Ṣubḥ*, v, 490 f.; Ḥ. Zayyāt, in *al-Mashriḳ*, xlii, 1948, 8 ff.). However, while composites with *dawla* were reduced to merely honorific appellations, it can fairly be said that they always denoted high standing in the community. In India, for instance, they continued to be used by some rulers, and, until the abolition of honorary titles in 1935, Persian cabinet ministers often received titles composed with *dawla*.

Bibliography: Al-Bīrūnī, *Chronology*, 132-3; Hilāl al-Ṣābiʾ, *Rusūm dār al-khilāfa*, in al-Suyūṭī, *Awāʾil*, Baghdād 1369/1950, 83; al-Ḳalḳashandī, *Ṣubḥ*, i, 431, v, 442, 490 f.; M. van Berchem, in *ZDPV*, xvi, 1893, 93 n. 1; F. Babinger, in *Isl.*, xi, 1921, 20 n. 3; A. Mez, *Renaissance*, 133 n. 1; J. H. Kramers, in *AO*, v, 1927, 53-67; E. de Zambaur, *passim*; H. Bowen, *The Life and Times of ʿAlī Ibn ʿĪsá*, Cambridge 1928, 59; Ḥ. Zayyāt, in *al-Mashriḳ*, xlii, 1948, 7-12; G. C. Miles, *Rare Islamic Coins*, New York 1950, 42 f.; B. Spuler, *Iran*, 223; M. Canard, *Histoire de la dynastie des H'amdanides*, i, Algiers, 1951, 426; E. Tyan, *Institutions du droit public musulman*, ii, Paris, 1956, 26 f.; Ḥasan al-Bāshā, *al-Alḳāb al-Islāmiyya*, Cairo 1957, 410, 512, and *passim*.

3) From its original meaning, *dawla* developed quite a few specialized connotations (cf. Dozy, *Suppl.*, i, 476 f., and the dictionaries of Muslim languages other than Arabic; further, for instance, A. J. Maclean, *A Dictionary of the Dialects of Vernacular Syriac*, Oxford 1901, 62 b). In modern times, an adjectival formation *dawlī* or *duwalī*—from *dawla*, or its pl. *duwal*, in the meaning of "nation" (< state < government < dynasty)—has become accepted in Arabic as the current term for "international".

(F. Rosenthal)

DAWLAT GIRAY (918/1512-985/1577), styled the Taḥt-alghan or Daghtī-alghan (Conqueror of the

Capital), Khān of the Crimea from 958/1551 to 985/1577. He was the son of Mubārek Giray, and was appointed *ḳalghay*, first heir to the throne, by Saʿādet Giray Khān in 938/1532. When he was made Khān in 958/1551 with the firm support of the Ottomans, the latter increased their influence in the Crimea. He vigorously continued the anti-Russian policy of his predecessor, and made an alliance with the Jagellons against Russian in 959/1552. He made several expeditions against Moscow but could not prevent the capture by the Russians of the two sister Khānates of Ḳazan [*q.v.*] and Astrakhān [*q.v.*]. When the Ottomans failed to get control of the lower Volga in their expedition of 977/1569, they encouraged the Khān to continue the war against Russia. In 979/1571, breaking Russian resistance on the Oka river, he reached Moscow and burned it down, whence his cognomen. The following year, when the Czar rejected the Khān's claims on Ḳazan and Astrakhān, he made a new expedition but was severely defeated at Molodi near Moscow.

His co-operation with the Ottomans in the Polish elections against Russia was more successful (see *Belleten*, no. 46, 390). He died in Ṣafar 985/April-May 1577. His reign was marked by the vital struggle of the Crimean Khānate against Russia for the heritage of the Golden Horde in the Volga basin, and by the further integration of the Crimea in the Ottoman empire. Mention should be made of the Great Mosque that he built at Gözleve in 979/1571. Six of his eighteen sons became Khān after him (see *Giray* in *IA*).

(Halil Inalcik)

DAWLAT-SHĀH (Amīr) b. ʿAlaʾ al-Dawla Bakhtīshāh, a Persian writer from a family owning estates at Isfarāʾ in in the Khurāsān. His father was one of the most intimate courtiers of Shāh-Rukh, son of Tīmūr; he himself took part in the battle fought by the Timurids Abu'l-Ghāzī Sulṭan Ḥusayn and Sulṭan Maḥmūd near Andakhūd. He was about fifty years of age when he began to write his *Tadhkirat al-shuʿarāʾ* ("Memorial to the Poets"), which he finished in about 892/1487 towards the end of his life, the date of his death being unknown. In his *Madjālis al-nafāʾis* (chap. VI), Mīr ʿAlī Shīr Nawāʾī, the famous minister, writer and patron of letters and the arts (cf. Browne, iii, 437), praises Dawlat-Shāh for renouncing the society of the great in order to devote himself to study and to writing his book. This "Memorial to the Poets", the earliest of the *tadhkira* [*q.v.*] made known through von Hammer's translation, is divided into seven parts, each containing information on twenty or so poets and the princes who were their patrons; there is an introduction on the art of poetry; the concluding section is devoted to seven poets who were contemporaries of the author, and to the glorification of the Timurid prince Abu 'l-Ghāzī Sulṭān Ḥusayn b. Manṣūr b. Bayḳarā, who was himself a man of letters (Browne, iii, 390 and 439). This concise anthology of poems which for the most part are well chosen is very useful in literary history, especially for the study of 8th/14th and 9th/15th century poets; but many mistakes have been detected in the notes on the princes and poets, while the judgments expressed on their talents are very often lacking in critical sense.

The eldest son of Fatḥ ʿAlī Shāh was also called Dawlat-Shāh; born at Nawā on 7 Rabīʿ II 1203/6 January 1789, he was for many years governor of Kirmān-shāhān, and died on 26 Safar 1236/3 December 1820 on his return from his campaign against Maḥmūd Pasha; he has left a number of poems.

Bibliography: editions: Bombay, 1887; *The Tadhkiratu'sh-shuʿarā*, ed. E. G. Browne, London 1901. Translation: *Geschichte der schönen Redekünste Persiens* .... by J. von Hammer, Vienna 1818. Riḍā Ḳulī Khān, *Madjmaʿ al-fusaḥā*, i, 26; Belin, in *JA*, i, (1861), 245; Browne, iii, index, *sub nom.*; idem, *The Sources of Dawlat-shah*, in *JRAS* 1899, 37-60; list of other *tadhkira* in *Gr.I.Ph.*, ii, 213-6.

(Cl. Huart-[H. Massé])

DAWLATĀBĀD, a hill fort lat. 19° 57′ N., long. 75° 15′ E., ten miles N.-W. of Awrangābād, now in Mahārāshṭra State, was called Deogiri (properly Devagiri), "the Hill of God", in pre-Muslim times as the capital of the Yādavas, originally feudatories of the Western Čālukyas but independent since 1183 A.D., after which they continued to rule the territory from Deogiri independently. ʿAlāʾ al-Dīn, nephew of Sulṭān Djalāl al-Dīn Fīrūz Khaldjī of Dihlī, actuated by reports of the immense wealth of Deogiri, reached there by forced marches in 693/1294 and invested the fortress. Rāmčandra, the then Rādjā, taken by surprise, was ultimately forced to surrender to the invaders huge quantities of gold, silver and precious stones, which became ʿAlāʾ al-Dīn's bait to lure Fīrūz to his death, as well as agree to the cession of Eličpur to the Dihlī Empire. Rāmčandra failed to remit the revenues of Eličpur and in 706/1307 a force commanded by Kāfūr Hazārdīnārī, then Malik Nāʾib, was sent against him; but on making his submission to Kāfūr he was courteously sent to the capital where he offered sumptuous gifts in lieu of tribute. His ready pardon and official appointment as governor of Deogiri, with the title of *Rāy-i Rāyān*, has been attributed to ʿAlā al-Dīn's superstitious regard for Deogiri as the talisman of his wealth and power. But his son and successor, Shankara, having defied the Dihlī hegemony, Kāfūr was again sent south in 713/1313, where he assumed the government of the state having put Shankara to death. Shankara's son-in-law Harapāla proclaimed his independence some three years later, and the new Dihlī sultan, Ḳutb al-Dīn Mubārak Khaldjī, personally led an expedition south, slew Harapāla, re-annexed the Deogiri lands, and built in 718/1318 the g eat Djāmiʿ masdjid there (see Monuments, below).

The next important date in the history of Deogiri was when Muḥammad b. Tughluḳ decided in 727/1327 that, since Dihlī was not sufficiently central in his dominions, Deogiri should be renamed Dawlatābād and become his capital. Officials were at first encouraged to settle there, but in 729/1329 the entire population was compelled to move to Dawlatābād as a punitive measure (Baranī, 481 ff.; Ibn Baṭṭūṭa, iii, 314 ff.), and from there as a base of operations order was restored in the Deccan. But shortly thereafter Mughal raids in north India necessitated Muḥammad's return to Dihlī and Dawlatābād re-

verted to its status as a southern garrison. It was at Dawlatābād that Ismāʿīl Mukh was elected their leader by the Amīrān-i Ṣadah in . . ./1346 and it was again there that a year later Ẓafar Khān, who had defeated the Dihlī army, superseded Ismāʿīl and became the first Bahmanid sulṭān. The Bahmanīs retained Dawlatābād as a garrison on their northern frontier and improved its defences; the conspicuous Čānd mīnār dates from their occupation. It passed to the Nīẓām Shāhīs of Aḥmadnagar in 905/1500, becoming their capital in 1009/1600. The Mughal emperor Shāhdjahān clearly considered possession of Dawlatābād to be the key to dominion over the Deccan, and in 1043/1633 it was taken for the Mughals by Mahābat Khān after a fierce siege (ʿAbd al-Ḥamīd Lāhawrī, *Bādshāh-nāma*, Bibl. Ind., 496-536). Salābat Djang secured Dawlatābād for the Niẓām al-Mulk in 1170/1757, but lost it three years later to the Marāthās.

Dawlatābād once boasted of the Fatḥābād mint (for the name Fatḥābād given to Dawlatābād in the time of Muḥammad I Bahmanī, see *Burhān al-Maʾāthir*, 1936 ed., 17) where coin was struck from 761-6 A.H.; it was also the centre of a paper-making industry.

(H. K. SHERWANI)

(*ii*) Monuments. The earliest building work at Dawlatābād (apart from the rock-cut caves of the 1st century B.C.) is the scarping of Devagiri, a single conical hill of rock some 200 m. high commanding a natural pass. This scarping, dating at least from the early Yādava times, results in the entire circuit of the rock presenting a vertical face 50 to 65 m. high, above a water-filled moat of rectangular section dug a further 15 m. into the rock (a causeway across the moat leading to a rock-cut shrine shows its Hindū provenance). The utilization of stone of Hindū workmanship in later Islamic building indicates the former existence of a town on the sloping ground to the east.

It is on the east that the triple apron of fortification lies, dating in origin from the time of Muḥammad b. Tughluḳ. The outermost wall is the curtain of the outer town, which is traversed from south to north by the Awrangābād—Khuldābād [*qq.v.*] road; the town (called ʿAnbarkōṭ in ʿAbd al-Ḥamīd Lāhawrī, *Bādshāhnāma, passim*) is an area about 2 km. north-south by a maximum of 1 km. east-west; the second wall encloses an area of 1.2 km. by 0.4 km. to the west of the first, called Kaṭak (= Sanskrit *kaṭaka*) by Ibn Baṭṭūṭa and Mahākōṭ ("great fort") by Lāhawrī, and is entered through a hornwork formed by a succession of rounded bastions [see BURDJ, iii]; a less elaborate entrance in the third apron leads to the citadel, Devagiri (Bālākōṭ of Lāhawrī) through a steep flight of steps, the rock-cut moat crossed by a narrow stone bridge, a tunnel through rock-cut chambers and re-used Djayn caves emerging some 15 m. higher, a broad rock staircase leading to a Mughal *bāradarī*, and finally another flight of 100 steps to the acropolis, a platform 50 m. by 36 m., on which guns are mounted. All three walls are defended by external ditch and counterscarp; they all show signs (by heightening in work of smaller stone) of modification during the Bahmanī period. Of interest in the defence works are: (1) the bridge over the final moat, with its central portion about 3 m. below the level of each side, approached by steep flights of steps from counterscarp and gallery. The height of water in the moat must have been under control, so that the central portion of the bridge could be submerged; (2) the long tunnel, at the head of which was an iron barrier which could be rendered red-hot by lighting a fire on it (for a different interpretation see Sidney Toy, *The strongholds of India*, London 1957, 38 ff., criticized by J. Burton-Page in *BSOAS*, xxiii/3, 1960, 516 ff.); midway is a rock-cut look-out post.

The mosque of Ḳuṭb al-Dīn Mubārak Khaldjī of Dihlī (inscr. 718-1318) is perhaps the earliest Muslim monument. Largely an improvisation out of temple material, it has tapering fluted corner buttresses and a corbelled dome, and is some 78 m. square in overall plan (illustration in *Ann. Report, Arch. Dept. Hyd.*, 1925-6, Pl. III); the *miḥrāb* has since been filled with an idol.

The mosque has no minaret; fulfilling this function, however, is the Čānd mīnār, 30 m. high, of about 840/1435, similar in shape to the towers of Maḥmūd Gāwān's *madrasa* at Bīdar [*q.v.*] but with three galleries supported by elaborate brackets. In addition to its function as a *mīnar* of the mosque, it was also an observation post, since it commanded the dead ground on the north-east.

The palaces are mostly in ruins; noteworthy are the *bāradarī* mentioned above, built for Shāhdjahān's visit in 1046/1636, and the Čīnī maḥall in Mahākōt, of the Niẓām Shāhī period, with fine encaustic tile-work; the latter was used as a state prison for the last Ḳuṭb Shāhī ruler, Abu 'l-Ḥasan (Khʷāfī Khān, *Muntakhab al-Lubāb*, ii, 371 ff.).

Bibliography: There is no monograph on Dawlatābād as a site; in addition to references in the text, see S. Piggott, *Some ancient cities of India*, Bombay 1945, 78 ff. (including sketch-map). (J. BURTON-PAGE)

AL-DAWLATĀBĀDĪ, Shihāb al-Dīn Aḥmad b. Shams al-Dīn b. ʿUmar al-Zāwulī al-Hindī, an eminent Indian scholar of the 9th/15th century, was born at Dawlatābād in the Deccan. He completed his studies in Dihlī at the feet of Ḳāḍī ʿAbd al-Muḳtadir and Mawlānā Khʷādjgī, two eminent disciples of Shaykh Naṣīr al-Dīn Čirāgh-i Dihlī. When Tīmūr invaded India, Shihāb al-Dīn left Dihlī and settled at Djawnpur where Sulṭān Ibrāhīm Sharḳī (804-844/1400-1440) received him with honour and appointed him as the *ḳāḍī al-ḳuḍāt* of his kingdom. Later on he conferred upon him the title of *Malik al-ʿUlamāʾ*. Firishta says that he was held in such high esteem by the Sulṭān that a special silver chair was provided for him in the court. He died at Djawnpur in 848/1445.

Shihāb al-Dīn was a prolific writer. According to Shaykh ʿAbd al-Ḥaḳḳ Muḥaddith Dihlawī and Muḥammad Ghawthī Shaṭṭārī he enjoyed some reputation as a Persian poet also. Of his compositions, the following are particularly noteworthy: *Sharḥ al-Hindī*, a commentary on the *Kāfiya* (for Mss, *Contribution of India to Arabic Literature*, Zubaid Ahmad 401); *Sharḥ uṣūl al-Bazdawī*, (Ms. in possession of M. Abul Kalām Azād); *Al-ʿAḳaʾid al-Islāmiyya*, on scholastic theology (Ms, Rampur, 314); *al-Irshād*, on Arabic syntax, (printed at Ḥaydarābād); *Muṣaddiḳ al-faḍl*, commentary on the famous *Ḳaṣīda Bānat Suʿād*, (printed at Ḥaydarābād); *Baḥr al-mawwādj*, a Persian commentary on the Ḳurʾān, dedicated to Sulṭān Ibrāhīm Sharḳī (for Mss,

Storey 10, 1193); *Ta'rīkh al-Madīna* (Storey, 427); *Fatāwā-i Ibrāhīm Shāhī*; *Badā'i' al-bayān*; *Manāḳib al-sādāt*, on the merits and prerogatives of the descendants of the Prophet, (Storey 211, 1261).

Bibliography: 'Abd al-Ḥaḳḳ Muḥaddith Dihlawī, *Akhbār al-akhyār*, (Dihlī 1309) 175-6; Muḥd. Ghawthī Shaṭṭārī, *Gulzār-i abrār*, (Ms. As. Soc. of Bengal 47 V); Muḥd. Ṣādiḳ, *Ṭabaḳāt-i Shāhdjahānī*, (Ms. British Museum f. 60); Ghulām 'Alī Azād, *Ma'āthir al-kirām*, (Agra, 1910) 188-189; Faḳīr Muḥammad, *Ḥadā'iḳ al-Ḥanafiyya*, (Nawal Kishore, Lucknow, 1906) 316; Raḥmān 'Alī, *Tadhkira-i 'ulamā'-i Hind*, (Nawal Kishore, Lucknow, 1914), 88-9; Nūr al-Dīn, *Tadjallī-i Nūr*, (Djawnpur, 1900) ii 33; Zubaid Ahmad, *The Contribution of India to Arabic Literature*, 167 ff.; Storey 9-10; Brockelmann II, 220.

(K. A. NIZAMI)

DAWR [see SUPPLEMENT].

DAWRAḲ, formerly a town in south-western Khūzistān, was also called Dawraḳ al-Furs, 'Dawraḳ of the Persians' and sometimes al-Madīna, 'the Town'. The original Persian name was Darāk. In the middle ages Dawraḳ was the capital of a district which was sometimes called after it and was sometimes known as Surraḳ. Dawraḳ lay on the banks of the river of the same name, which was a tributary of the Djarrāḥī; it was connected by canal with the Kārūn [*q.v.*]. It was famous for its veils and for its sulphur springs. Pilgrims from Kirmān and Fārs used to pass through Dawraḳ on their way to and from Mecca. As late as the 4th/10th century a fire-temple and some other remarkable buildings dating from the Sāsānid era were still to be seen in the town. Dawraḳ was described in the *Ḥudūd al-'Ālam* (130) as a pleasant, prosperous and wealthy town. Towards the close of the 10th/16th century the Banī Tamīm occupied Dawraḳ and the surrounding area, but they were ousted by Sayyid Mubārak, of the Mush'asha' dynasty of Ḥawīza, the well-known *Wālī* of 'Arabistān (Khūzistān) about the year 1000/1591-2. In 1029/1619-20 the *Beglerbegī* of Fārs conquered Dawraḳ and its district (see the *Ta'rīkh-i 'Ālam-ārā-yi 'Abbāsī*, 675). Subsequently the district was occupied by a branch of the Afshār tribe [*q.v.*], but they were displaced by Shaykh Salmān of the Ka'b [*q.v.*] during the reign of Nādir Shāh [*q.v.*]. Shaykh Salmān built a new town, which he called Fallāḥiya, five miles to the south of Dawraḳ, which thereafter fell into ruin. In order to protect Fallāḥiya against the Huwala and other hostile tribes, Shaykh Salmān erected a strong fort there and built a mud wall two miles in circumference round the town. When Layard visited Fallāḥiya a century later, he found this wall in bad repair; he stated, however, that the many canals and water-courses surrounding it would provide a formidable barrier to invasion if strongly defended (*Description of the province of Khuzistan*, in *JRGS*, 1846, xvi, 39; see also his *Early adventures in Persia, Susiana and Babylonia*, London 1887, ii, 57).

In 1933 the name of Fallāḥiya was changed to Shādagān; it is the capital of the sub-district (*bakhsh*) of the same name which forms part of the *shahristān* of Khurramshahr (formerly known as Muḥammara). The date-groves and rice fields surrounding the town are watered by irrigation canals; wheat is also grown. In the town there are some 400 houses, 120 shops, two mosques and two schools; the population, including that of the surrounding district, is about 20,000. The swampy area between Shādagān and the coast of the Persian Gulf is still known as Dawraḳistān. The name is also preserved in the Khawr Dawraḳ, a northern arm of the Khawr Mūsā, the large inlet of the Gulf which bounds Dawraḳistān on the east and north-east.

(L. LOCKHART)

DAWS [see AZD].

DAWSA (DŌSA), literally "trampling", a ceremony formerly performed in Cairo by the Shaykh of the Sa'dī *ṭarīḳa* on the *mawlids* [*q.v.*] of the Prophet, of al-Shāfi'ī, of Sulṭān Ḥanafī (a celebrated Saint of Cairo who died in 847/1443; *Khiṭaṭ djadīda*, iii, 93, iv, 100), of Shaykh Dashṭūṭī (or Ṭashṭūshī), another saint; Lane, *Modern Egyptians*, chap. xxiv; *Khiṭaṭ djadīda*, iii, 72, 133, iv, 111), and of Shaykh Yūnus (see below). These took place by day; a similar ceremony was performed by the Shaykh al-Bakrī, the head of the *ṭarīḳas* in Egypt, on the *mawlid* of Dashṭūṭī by night. The ceremony has been described at length by Lane (*loc. cit.*, with drawing; another description, with a drawing by the artist C. Rudolf Huber, who was an eye-witness, in G. Ebers, *Aegypten*, Stuttgart and Leipzig 1879-80, ii, 129 ff.); it consisted, in short, of as many as three hundred members of the *ṭarīḳa* lying down with their faces to the ground and the Shaykh riding over them on horseback. It was believed that by a special *karāma* [*q.v.*], inherent in the *ṭarīḳa*, no one was ever injured, and by such physical contact the *baraka* [*q.v.*] of the Shaykh was communicated to his followers. The same ceremony was performed elsewhere (Lady I. Burton, *The inner life of Syria*, etc., chap. x, for Barze near Damascus; Muḥammad b. 'Umar al-Tūnisī, d. 1274/1857, in *Voyage au Ouaday*, tr. A. Perron, 700). In other *ṭarīḳas*, *baraka* has been ascribed to rubbing with the feet of the Shaykh and even to the dust on which he has trodden. The use of the horse by Sa'dī *ṭarīḳa* has been associated with the rank of its founder as a descendant of the Prophet. The origin of the Cairo *dawsa* is obscure; the legend has it that when Shaykh Yūnus, the son of Sa'd al-Dīn al-Djibāwī, the founder, came to Cairo his followers asked him to establish for their usage a *bid'a ḥasana* (good innovation) which by its *karāma* would prove his rank as a saint; he thereupon made them cover his path with round and smooth vessels of glass, and he rode over them without breaking one. This his successors could not do, and prostrated men were substituted for the glass (Goldziher, in *ZDMG*, 1882, 647 f.; Muḥammad Rashīd Riḍā, *Ta'rīkh* ... *Muḥammad 'Abduh*, ii, 147 ff., 2nd. ed., ii, 139 ff.). This Shaykh Yūnus is said by some to be buried outside the Bāb al-Naṣr (Goldziher, *loc. cit.*; *Khiṭaṭ Djadīda*, ii, 72). Sa'd al-Dīn is commonly assigned to the second half of the 7th/13th century. The date is quite uncertain, and there may have been confusion with the ecstatic (*madjdhūb*) Shaykh Yūnus al-Shaybānī, the founder of the Yūnusī *ṭarīḳa* (al-Maḳrīzī, *Khiṭaṭ*, Būlāḳ 1270, ii, 435). The *dawsa* was abolished by the Khedīw Muḥammad Tawfīḳ in 1881, after the Chief Muftī of Egypt had given a

fatwā in which he declared it a *bid'a ḳabīḥa* (evil innovation), involving undignified treatment of Muslims. For some time afterwards, on the mornings of those *mawlid*s some members of the Sa'dī *ṭarīḳa* lay down in front of the door of their Shaykh and let him walk over them (A. Le Chatelier, *Les Confréries Musulmanes du Hedjaz*, 225), but this, too, has now been discontinued.

Bibliography: in addition to the references given: 'Alī Pasha Mubārak, *al-Khiṭaṭ al-djadīda*, iv, 112; O. Depont and X. Coppolani, *Les confréries religieuses musulmanes*, 329 ff.).

(D. B. MACDONALD*)

DĀWŪD, the biblical David. David is mentioned in several places in the Ḳur'ān, sometimes together with his more famous son and successor Solomon (Sulaymān). He kills Goliath (Djālūt, *Sūra* II, 251). God grants him the rule of the kingdom (*ibid.*) and enforces it (XXXVIII, 20). He makes him a "*khalīfa* on earth" (*i.e.*, the successor of an earlier generation of rulers, XXXVIII, 26). He gives him knowledge (*'ilm*) and wisdom (*ḥikma*), and the ability to do justice (*ḥukm*, esp. XXI, 78 f.; XXXVII, 21-24, 26; *faṣl al-khiṭāb*, XXXVII, 20). He gives him a *zabūr* (book, psalter, IV, 163; XVII, 55), and makes the birds and mountains his servants, so that they unite in his praise (XXI, 79; XXXIV, 10; XXXVIII, 18 f.). God also instructs him in the art of fashioning chain mail out of iron (XXXIV, 10 f.; XXI, 80). Together with Solomon, he gives judgment in a case of damage to the fields (XXI, 78). The fable of the rich man and the poor man, which Nathan tells the king (2 Sam, xii, 1-4), is retold in a somewhat modified form (XXXVIII, 21-23). There is no mention of the wrong David did to Uriah, but the subsequent verses show that the king feels himself to be guilty. His prayer for forgiveness is heard (24 f.).

The *ḥadīth* stresses David's zeal in prayer, and especially in fasting. Ḳur'ān commentators, historians, and compilers of the "Tales of the Prophets", specifically mention David as a prophet and add further material from Jewish (and Christian) tradition, including the story of Saul's jealousy of David, and that of the wife of Uriah (this as proof of David's 'temptation', *Sūra* XXXVIII, 24), and the story of Absalom and his early death. The details —especially in the later (and also in the mystical) works—are fantastically elaborated. The title *khalīfa fi 'l-arḍ* (*Sūra* XXXVIII, 26) is interpreted as 'God's delegate on earth'. David's readiness to do penance is mentioned in particular. Another favourite theme is David's gift in singing psalms. His voice has a magic power: it weaves its spell not only over man, but over wild beasts and inanimate nature.

There is proof of the name of Dāwūd (or Dāwud) in pre-Islamic times. There are poems which mention a Dāwūd, or his son, as a maker of coats of chain mail. Perhaps this refers to a Jewish armourer. In any case, presumably even in pre-Muḥammadan times, he was identified with King David (Horovitz, *Koranische Untersuchungen*, 109 f.). In the Ḳur'ān, the name is spelled Dāwūd (< Hebrew Dāwīd), or *D'wd* (Dāwud) throughout. Later on, the form Dā'ūd (with hamza) became common.

(R. PARET)

DĀWŪD B. 'ALĪ B. **KHALAF** AL-IṢFAHĀNĪ ABŪ SULAYMĀN, the *imām* of the school of the Ẓāhiriyya ([*q.v.*]; also called Dāwūdiyya) in religious law. An extreme representative of the tendency hostile to human reasoning and relying exlusively on Ḳur'ān and *ḥadīth*, Dāwūd not only rejected personal opinion (*ra'y*) as al-Shāfi'ī [*q.v.*] had done, but, as far as he could, systematic reasoning by analogy (*ḳiyās*) which al-Shāfi'ī had admitted and tried to regularize, and he made it his principle to follow the outward or literal meaning (*ẓāhir*) of Ḳur'ān and *ḥadīth* exclusively; he also restricted the concept of consensus (*idjmā'*) to the consensus of the Companions of the Prophet, and rejected the practice of allegiance (*taḳlīd*) to a single master which in his time had come to prevail in the other schools of religious law. In all these respects, his doctrine represents a one-sided elaboration and development of that of al-Shāfi'ī and his school.

Dāwūd's family came from a village near Iṣfahān; he was born in Kūfa in 200-2/815-8. He studied *ḥadīth* under well-known authorities in Baṣra, Baghdād and Nīsābūr, and then settled in Baghdād where he became highly esteemed as a teacher and muftī. His biographers praise him for his piety, humility and asceticism. Nothing is known of his teachers in *fiḳh* proper; his father was a Ḥanafī, and he himself is called a fanatical adherent (*muta'aṣṣib*) of al-Shāfi'ī, a description which fits both the starting-point and the later development of his own doctrine, and he occupies an honoured place in the biographical works of the Shāfi'ī school. In theology, he is reported to have held the opinion that the Ḳur'ān as it exists on the "well-preserved tablet", was uncreated, but as it exists in the actual copies, produced in time, and Aḥmad b. Ḥanbal is said to have refused to meet him on account of this.

Dāwūd was the author of numerous treatises (see a more or less contemporary list in the *Fihrist*), some of them extremely long (up to 3000 folios), covering legal theory (*uṣūl*) and all branches of positive law (*furū'*); nothing of all this has survived, and we depend for statements of his doctrine on questions of detail on later authors (*e.g.*, al-Subkī, and particularly Ibn Ḥazm [*q.v.*], and some of the works on *ikhtilāf*), who however do not always distinguish between Dāwūd's own opinions and those of his followers. The Ḥanbalī author Muḥammad al-Shaṭṭī (1307/1889-90), at the suggestion of the muftī of Damascus, Maḥmūd b. Ḥamza Effendi al-Ḥamzāwī (d. 1305/1887-8), collected many of these opinions and compared them with the corresponding Ḥanbalī doctrines (*R. fī Masā'il al-Imām Dāwūd al-Ẓāhirī*, Damascus 1330). The school of the Ẓāhiriyya disappeared in due course, and for this reason their opinions and those of their *imām*, Dāwūd, are not

taken into account in establishing the consensus of the scholars, although a number of Shāfiʿī scholars take, theoretically at least, a more accomodating view (see al-Nawawī and, in more detail, al-Subkī).

Dāwūd died in Baghdād in 270/884 and was buried there. His son, Muḥammad b. Dāwūd [*q.v.*], was a famous man of letters.

DĀWŪD al-ANṬĀKĪ [see al-anṭakī].

DĀWŪD b. ʿAbd Allāh b. Idrīs **al-FAṬĀNĪ** or Faṭṭānī, *i.e.*, from Patani on the N.E. coast of the Malay Peninsula, a Malay author living in Mecca in the first half of the 13/19th century. He belonged to the Shaṭṭāriyya order. He wrote popular tracts as well as extensive handbooks on Shāfiʿite *fiḳh*, theology and orthodox mysticism. All these works are translations from the Arabic into Malay, more literal than those of ʿAbd al-Ṣamad al-Palimbānī [*q.v.*]. They aim at a public not learned enough to read Arabic fluently, but familiar, to a certain degree, with the structure of the language. His earliest dated work was finished in 1224/1810, the latest in 1259/1843. Most of his works are compiled from various Arabic sources, but it seems that sometimes he followed one model only, *e.g.*, in his translation of al-Ghazzālī's *Minhādj al-ʿābidīn ilā Djannat Rabb al-ʿĀlamīn*, and in *al-Bahdja al-wardiyya fī ʿaḳāʾid ahl al-djamāʿa al-sunniyya*, a Malay version of ʿAbd al-Raḥmān b. ʿAbd al-Salām al-Ṣaffūrī's commentary on the *Manẓūma fi ʾl-tawḥīd* by Aḥmad b. ʿAbd al-Raḥmān al-Djazāʾirī (printed Mecca 1331; on the title-page the *manẓūma* is erroneously ascribed to Ibn al-Wardī; the complete text of the Arabic *manẓūma* is incorporated in this edition). Another remarkable work is *Kanz al-minan ʿalā ḥikam Abī Madyan*, translated from a commentary on the maxims of Abū Madyan Shuʿayb b. al-Ḥusayn al-Andalusī (printed Mecca 1328; the maxims are quoted in Arabic). A popular treatise on marriage law by Daud Patani was lithographed in Singapore, 1287, and some other treatises a few years later in Bombay. His main works were printed in Mecca c. 1302, and from 1328 onward his descendants, still living in the holy city, reprinted some of his works and published some others for the first time. There are MSS. of Malay works by Daud Patani in Cambridge (Scott coll.), Djakarta, Leiden and London (R.A.S.) but none of them unpublished.

DĀWŪD KHĀN KARARĀNĪ, younger son of the governor of Bengal under Shīr Shāh, Sulaymān Kararānī, who later asserted his independence, was raised to the Bengal throne in 980/1572 by the Afghān nobles who had deposed his elder brother Bāyazīd. Intoxicated by a sense of power he defied the Mughal emperor Akbar and attacked his outpost at Ghāzīpur in 982/1574. Munʿim Khān [*q.v.*], sent to oppose him, occupied his capital at Ṭ́āndā and compelled him to retreat into Uṛisā; he counter-attacked at the important battle of Tukarōʾī [*q.v.*] (= Mughalmārī), but when Mughal reinforcements arrived he sued for peace and paid tribute to Akbar, being permitted to retain the province of Uṛisā. In 983/1575 Munʿim Khān died and in the following confusion Dāwūd attacked and regained Bengal. Khān Djahān and Ṭ́odar Mall renewed the Mughal attack in 984/1576, when Dāwūd was captured and executed, and Bengal finally passed into Mughal hands.

Bibliography: Abu ʾl-Faḍl ʿAllāmī, *Akbar-nāma*, iii, 22, 70-3, 93 ff., 118 ff., 177-8; tr. Beveridge, iii, 30 ff., 97 ff., 130 ff., 169 ff., 248 ff.; idem, *Āʾīn-i Akbarī*, tr. Blochmann, 2nd. ed. 334, 350, 404, 407, 411. (J. Burton-Page)

DĀWŪD PASHA, Ḳara (? — 1032/1623), Ottoman Grand Vizier. The year of his birth is uncertain, but, in a "relazione" submitted to the Signoria in 1612, Simone Contarini, who had been Venetian Bailo at Istanbul, mentions a Dāwūd Pasha, whom he describes as a Croat in origin and at that time about 46 years old. According to the Ottoman sources, however, Ḳara Dāwūd Pasha was of Bosnian descent. He was trained in the Palace Schools, being appointed in due course to the office of *čuḳadār* (*čuhadar*). During the reign of Sulṭān Meḥemmed III (1003-1012/1595-1603) he became Ḳapldjî Bashî and later, in the reign of Sulṭān Aḥmed I (1012-1026/1603-1617), was made Beglerbeg of Rūmeli in 1013/1604. Dāwūd Pasha served thereafter against the Djalālī [*q.v.*] rebels in Asia Minor and also in the Eriwān campaign against the Ṣafawīds of Persia in 1021/1612. He held the office of Ḳapudan Pasha [*q.v.*] for a short time during the first reign of Sulṭān Muṣṭafā I (1026-1027/1617-1618) and also accompanied Sulṭān ʿOthmān II (1027-1031/1618-1622) on the campaign of Choczim (Ḥotin) against the Poles in 1030/1621. Dāwūd Pasha was married to a sister german of Sulṭān Muṣṭafā. Māh-Peyker, the Wālide Sulṭān (*i.e.*, the mother of Muṣṭafā I) used her influence to secure the elevation of Dāwūd Pasha to the Grand Vizierate (9 Radjab 1031/20 May 1622), when her son Muṣṭafā became Sulṭān for the second time (1031-1032/1622-1623). Dāwūd Pasha at once carried out the execution of Sulṭān ʿOthmān II, who had just been deposed from the throne. On 3 Shaʿbān 1031/13 June 1622 Dāwūd Pasha was dismissed from the office of Grand Vizier. The conflict of factions at the Porte brought about in the end his own execution in Rabīʿ I 1032/January 1623. He was buried in the mosque of of Murād Pasha at Istanbul.

DĀWŪD PASHA, Ḳodja, Darwīsh, d. 904/1498, Ottoman Grand Vizier. Of Albanian origin, he came through the *dewshirme* to the Palace School. In 876/1472, as beylerbeyi of Anadolu, he fought under Prince Muṣṭafā, *wālī* of Konya, against the Aḳ-ḳoyunlu Yūsufča Mīrzā. In the battle against Uzun Ḥasan at Otluk-beli in 878/1473, he was in command of the vanguard. He served in the Boghdan campaign of 881/1476 and, as beylerbeyi of Rumeli, in the operations in Albania and the siege of Ishkodra (883/1478). After the accession of Bāyezīd II he was made vizier and shortly afterwards, in 888/1483, succeeded Isḥāḳ Pasha as Grand Vizier, remaining in this post for 15 years. During this period he went on only two campaigns, the operations against the Mamluks in 892/1487, when he re-occupied Adana and Tarsus and reduced the Wārsāḳs to obedience, and the Albanian campaign of 891/1492, when he took Tepedelen and defeated the Albanian forces (though according to one source he remained at Üsküb to guard against a possible Hungarian attack from the north). He was dismissed from the Grand Vizierate on 4 Radjab 902/8 March 1497 and ordered to live at Dīmetoḳa (with a yearly pension of 300,000 *akčes*). The reason for his dismissal was that the flight of the Aḳ-ḳoyunlu Göde Aḥmed Bey, a grandson of Meḥemmed II, to Tabrīz was attributed to Dāwūd Pasha's negligence. Two years later, in 4 Rabī ʿI 904/20 october 1498. he died and was buried in the *türbe* before the *miḥrāb* of his mosque in Istanbul.

He is described as a capable and upright statesman and a patron of learning. In foreign policy he supported Venice. He was one of the richest statesmen of his time: the *resm-i ḳismet* due to the *ḳādiʿasker* on his estate amounted to no less than 2,000,000 *aḳčes*. The mosque which he built in the quarter which bears his name exists today, together with an *ʿimāret*, a *česhme*, a school and a *medrese*. There are also an *iskele* and a *ḳaṣr* named after him. The Dāwūd Pasha Ṣaḥrāsī, on which the Dāwūd Pasha Barracks now stands, was for centuries a famous camping-ground for the Ottoman army. His sons Muṣṭafā Pasha and Meḥemmed Bey are mentioned in the sources.

DĀWŪD PASHA (1181-1267/1767-1851), the last Mamlūk ruler of Turkish ʿIrāḳ, was acquired in Baghdād as a Georgian slave-boy by Sulaymān Pasha (the Great), marriage with whose daughter, together with his own good looks, charm, learning and ostentatious piety, assisted him in his upward career in the civil service under his patron, as confidential secretary, treasurer, *daftardār*, and finally *ḳahya*. By opportunism, violence and a skilful balancing of forces—Kurds, Mamlūks, the court, the mob, the tribes—Dāwūd, aged 50 years, obtained the Pashalīk for himself in 1233/1817, and assured it by the assassination of his predecessor (Saʿīd Pasha), and by timely generosity. He ruled for fifteen years. He adopted a vigorous (at times a treacherous) tribal policy, preserved fair order, chastised the notoriously turbulent Yazīdīs and the mid-desert ʿAnaza, kept a watch on endless Kurdish princely schisms and threats, and contrived to stop a serious Persian invasion (1239/1823). Under orders from Istanbūl, he disbanded the Janissary forces in Baghdād, raised and armed new-type regiments, and—fitfully, jealously and inconsistently—permitted a marked increase of European methods, traffic and trade. He constructed numerous public works, and maintained a luxurious court and entourage. His decline and fall (1247/1831) was inevitable in the changing atmosphere of the Turkish government; immediately, it was brought about by his persistent insubordination to the Istanbul authorities, whose emissary (and his own successor as *wālī*) was able to evict and replace him thanks to a devastating flood in Baghdād and a terrible visitation of plague. Arrested and captive, Dāwūd was surprisingly well treated, re-promoted to important offices in both Europe and Asia, and, high in royal favour, became in 1261/1845 Guardian of the Holy Shrine at Madīna. He died in 1267/1851, after a career of extraordinary vicissitudes.

(S. H. Longrigg)

DĀWŪD PASHA, first Ottoman *mutaṣarrif* (governor) of Mount Lebanon (1861-1868). He was an Armenian Catholic, born in Constantinople in March 1816. He spent his early years with a French family at Galata; later he married an English wife whom he abandoned before being appointed *mutaṣarrif*. He began his public career as an attaché to the Ottoman Embassy in Berlin, serving next as Ottoman consul general in Vienna. Transferred back to Constantinople, he held several posts in the

Ministry of Interior. In 1857 he was put in charge of the government publications; and in the following year he became superintendent of the Telegraph Office, where he introduced a number of improvements. In that same year, he assisted the Foreign Minister Fu'ād Pasha in applying for a foreign loan. Finally, in 1861, he was appointed to the governorship of Mount Lebanon by the Porte in conjunction with the European Powers. Sent to Beirut with the rank of Vizier, he established the seat of his government in Dayr al-Ḳamar and organized the new administration in a manner satisfactory to all parties concerned. Among other things, he organized the gendarmerie of Mount Lebanon, built roads and bridges, and established a number of schools, and his wise government soon restored peace, order, and good will in Lebanon. Appointed at first to govern the country for three years, the term of his administration was extended for five more years. During his second term, however, he met with a strong resistance from some of the traditional leaders in the Mountain, and was therefore advised to resign from the governorship in 1868, before the end of his term. He next served as Minister of Public Works, and was sent to Europe to negotiate a loan. But, having somehow incurred disfavour with the Porte, he preferred to remain in Europe. He died in Biarritz on 9 Nov. 1873—1292/1875 according to *Sidjill-i ʿOthmānī*.

Dāwūd Pasha was described by a contemporary as an able statesman and administrator, a good linguist, and a lover of learning. Among other things, he was a member of the Berlin Academy of Sciences.

DĀWŪDPŌTRĀS, a rival branch of the tribe to which also belonged the Kalhōrās, one time rulers of former Sind. They and the Kalhōrās both claimed descent from Abu 'l-Faḍl al-ʿAbbās b. ʿAbd al-Muttalib. The rulers of the former princely state of Bahāwalpūr, now merged with West Pakistan, belong to the Dāwūdpōtrās, who unlike their collaterals, the Kalhōrās, take pride in calling themselves the ʿAbbāsīs. Their claim to nobility and high birth appears, however, based more on tradition, hallowed through a long period of rulership and authority, than on unimpeachable information derived from reliable sources.

The genealogical tables, contained in some of the local Persian histories, such as the *Mirʾat-i dawlat-i ʿAbbāsī* and the *Djawāhir-i ʿAbbāsiyya*, are defective and on close examination appear to have been hastily composed at the behest of royalty. However, some references in the older and more authentic works like the *Maʾāthir al-Umarāʾ*, (i, 825) show that both the Dāwūdpōtrās and the Kalhōrās were commonly believed to be the descendants of al-ʿAbbās [*q.v.*].

The common ancestor of both the Kalhōrās and the Dāwūdpōtrās, of whom something is known to history, is believed to be one Muḥammad Čannēy Khān (variants: Čaynay Khān, Čīnā Khān, Čannī Khān, Djīhna *alias* Čīnah Khān), whose father Ḳāʾim is said to have migrated to Sind from Iran *via* Kēč-Mukrān in c. 259/873, long before the advent of the Ghaznawids in the Indo-Pakistan sub-continent. But this date is both doubtful and improbable. Most of the works make no mention of Ḳāʾim. They instead mention one Miyān Odhānā, who is said to have lived the life of a *shaykh* with numerous followers. In the fifth generation from him was one Thull Khān (Fatḥ Allāh Khān?) whose son, Bhallā Khān (Bahāʾ Allāh Khan?) was the father of Čannēy Khān. Čannēy Khān was succeeded to the tribal chieftainship by his sons Muḥammad Mahdī and Dāwūd Khān, the latter inheriting a copy of the Ḳurʾān, the *tasbīḥ* (rosary) and the prayer-carpet (*muṣallā*) belonging to his father; while the family-sword and his turban fell to the share of Muḥammad Mahdī whose descendants came to be known as the Kalhōrās after his son, Ibrāhīm *alias* Kalhōrē Khān.

As a result of family feuds, Dāwūd Khān I had to leave the place and shift for himself. He is stated to have founded a new settlement near the town of Wāndjī, now untraceable. He was followed by his son, Maḥmūd Khān and grandson Muḥammad Khān as the leaders of the tribe. During the chieftainship of Dāwūd Khān II, a son of Muḥammad Khān, the tribe had greatly multiplied and felt the need to enlarge its territory. The descendants and retainers of this Dāwūd Khān II came to be known as the Dāwūdpōtrās irrespective of the fact whether they were the issue of his body or had only spiritual or temporal attachment with him. This explains the fact why certain families of purely Sindhī origin, mainly engaged in the weaving profession and living in the Shikārpūr and Dādū districts of West Pakistan, still proudly call themselves Dāwūdpōtrās. Some foreign writers (for instance, R. F. Burton, *A History of Scinde*, London 1850, 410), not fully acquainted with the origins of the Dāwūdpōtrās, were led to believe that the Dāwūdpōtrās as a tribe were of indigenous origin and weavers by profession. In according recognition as equal members to all those who did not belong to the family or the clan of Dāwūd Khan II, the Dāwūdpōtrās simply revived the old Arab custom of admitting manumitted slaves (*mawālī*) into the family fold or the clan. The prevalence of this Arab custom among them also lends support to their claim to being of Arab stock and descent.

Dāwūd Khān II was followed by eight chiefs, of whom only Bahādur Khān II deserves mention. He is credited with having laid the foundations of the town of Shikārpūr in 1026/1617. The dates of birth and death of all the Dāwūdpōtrā chiefs who preceded Ṣādiḳ Muḥammad Khān I (1136/1723-1159/1746), the founder of the House of Bahāwalpūr [*q.v.*], are practically unknown, none of them being important enough for history to record his annals.

One of the Dāwūdpōtrā chiefs, Mubārak Khān I, assisted the Mughal prince Muʿizz al-Dīn, a grandson of Awrangzīb ʿĀlamgīr, and the then *sūbadār* of Multān [*q.v.*] and Lahore [*q.v.*], in crushing the uprising of the Mīrānīs, a powerful Balūč tribe of Dēra Ghāzī Khān, in 1114/1702. As a reward for this military assistance, the towns of Shikārpūr, Bakhtiyārpūr and Khānpūr were granted to him as a *djāgīr*. The town of Shikārpūr became thereafter the seat of his clan. Most of his time was spent in fighting fraternal battles against the rival Kalhōrā chief, Yār Muḥammad Khān *alias* Khudā-Yār Khān. A grim battle lasting over a week was fought in which both the sides lost heavily. Contemporary accounts show that the Dāwūdpōtrās suffered grievously and had to seek for a truce. It was purely a faction fight, a dynastic feud, which determined the future course of events. Coupled with subsequent encounters between the rival factions this battle

culminated in the separation and demarcation of their respective spheres of influence and control.

The Dāwūdpōtrās, in the final phase, emerged successful, as they were able to conserve and consolidate their hard-won possessions, while their rivals, the Kalhōrās, were ousted by the Tālpūrs who, in their turn, gave way to the British when the latter occupied Sind in 1842, seven years before the annexation of the Pandjāb and the termination of the short-lived Sikh rule. Mubārak Khān I abdicated in 1136/1723 in favour of his son Ṣādiḳ Muḥammad Khān ʿAbbāsī I and died three years later in 1139/1726. An ambitious ruler, he first annexed Uččh [*q.v.*] followed by a part of the Mughal *sūba* of Multān and the fort of Dērāwar, wrested from Rāwal Akhī Singh of Djaysalmēr, whose forefathers had held it for long. In 1152/1739 when Nādir Shāh Afshār invaded India, Ṣādiḳ Muḥammad Khān I waited on him at Dērā Ghāzī Khān, and was granted the title of *Nawwāb*. In addition to what he had added to his possessions by the sword he was granted the *parganahs* of Sīwastān and Lārkāna. In 1159/1746 Shikārpūr, his ancestral home, was attacked by the rival Kalhōrā chief, Khudāyār Khān. Ṣādiḳ Muḥammad Khān lost his life in the contest, and was succeeded by Muḥammad Bahāwal Khān I who, the very next year, founded some towns including that of Bahāwalpūr, which ultimately gave its name to the state. It was during the rule of Bahāwal Khān I that the state came to command respect and gained in political stature. The irrigation canals dug under his orders opened up a new era of prosperity for the otherwise arid regions of the state of Bahāwalpūr. Meanwhile the power of the Dāwūdpōtrās continued to increase. On the death of Bahāwal Khān I in 1163/1749 Muḥammad Mubārak Khān II was unanimously elected by the Dāwūdpōtrās to succeed him. In 1165/1751 Djahān Khān Pōpalzaʾi, the commander-in-chief of the Durrānī forces, first attacked Uččh and then marched on Bahāwalpūr at the instance of ʿAlī Muḥammad Khān Khākwānī, the leaseholder of Dēra Ghāzī Khān. A pitched battle was fought near Khānpūr which resulted in the rout of the enemy, and Bhāwalpūr gained in stature. In 1173/1759 Rāwal Rāy Singh of Djaysalmēr surrendered the border fort of Dērāwar which had been recaptured from the Amīr of Bahāwalpūr. Two years later Ghulām Shāh Kalhōrā, the ruler of Sind, who several times in the past had received help from the ruler of Bahāwalpūr, attacked the state timing his invasion with the onslaught of Aḥmad Shāh Abdālī [*q.v.*], banking on the confusion that was to prevail in the wake of the Afghān king's invasion. He had to be appeased by surrendering Ghulām Shāh's brother, ʿIṭr Khān, who had taken refuge in Bahāwalpūr, after an unsuccessful attempt against the former.

On his death in 1186/1772 he was succeeded by Muḥammad Djaʿfar Khān, his nephew, who on accession at the age of 12 years assumed the title of Bahāwal Khān II. In 1191/1777 Multān was lost to the Sikhs and was never recovered thereafter. In 1194/1780 Shāh ʿĀlam II, Emperor of Delhi, honoured him with a *khilʿat* and bestowed on him the titles of Rukn al-Dawla, Nuṣrat Djang, Ḥāfiẓ al-Mulk. In 1201/1785 Tīmūr Shāh Durrānī attacked the Nawwāb's principality, and captured and plundered the town of Bahāwalpūr which was subsequently set on fire and destroyed. The fortress of Dērāwar was also captured and garrisoned with Durrānī troops. Tīmūr Shāh even carried away his son, prince Mubārak Khan ʿAbbāsī, as a hostage and set him up as the ruler of the state virtually deposing Bahāwal Khān II. Tīmūr Shāh was so severe in his punishment that he also carried away to Kābul the cannon captured from Bahāwalpūr. Till 1203/1788 Bahāwal Khān II was engaged in mopping-up operations against the Durrānīs having earlier placed prince Mubārak Khān, on his return to Bahāwalpūr, under detention.

The threat of Durrānī invasion to his possessions over, he turned to aggression and began to annex the neighbouring areas. His territorial ambitions aroused the suspicions of Makhdūm Ḥāmid Gandj Bakhsh of Uččh, a descendant of Makhdūm-i Djahāniyān Djalāl al-Dīn Bukhārī [*q.v.*] who, in close collaboration with the neighbouring chiefs, revolted in 1214/1799 against the Nawwāb and defied attempts at his capture. He also incited the ruler of Bīkānēr to invade the state, set prince Mubārak Khān free, and proclaimed him the Nawwāb. After some sharp encounters with the rebels and their confederates, the state forces under prince ʿAbd Allāh Khān (afterwards known as Nawwāb Ṣādiḳ Muḥammad Khān II), succeeded in restoring peace. The disgruntled Makhdūm, who wielded considerable influence in the state, again rebelled in 1221/1806 at the instance of Shāh Shudjāʿ al-Mulk of Kābul. This attempt also failed and two years later the Nawwāb entered into a treaty of friendship with the British Government. Thereafter complete peace prevailed in the state and people from Lahore, Dihlī, Dēra Ghāzī Khān and Multān, etc., who felt insecure under the Sikh rule and the disturbed conditions in India, migrated to Bahāwalpūr.

On the death of Bahāwal Khān in 1805 he was succeeded by his son ʿAbd Allāh Khān, in supersession to his elder brother, prince Wāḥid Bakhsh, who was put to death. As already mentioned, ʿAbd Allāh Khān assumed the title of Ṣādiḳ Muḥammad Khān II, on his accession. The greater part of his reign of 15 years (he died in 1825) was spent in either repelling the attacks of the Amīrs of Sind, suppressing the rebellions of his own *umarāʾ* or defending his conquered territories. Among other notable events of his reign was the capture of Dēra Ghāzī Khān in 1234/1818 by Shāh Shudjāʿ with the military assistance provided by the Amīr himself. The very next year he was, however, dispossessed by Randjīt Singh, the ruler of Lahore, who made over Dēra Ghāzī Khān (see DĒRADJĀT) to the Amīr of Bahāwalpūr in consideration of an annual sum of 250,000 rupees. During the rule of his successor, Raḥīm Yār Khān entitled Muḥammad Bahāwal Khān III (1825-52), Dēra Ghāzī Khān along with Muẓaffargarh and Multān were irretrievably lost to Bahāwalpūr, having been conquered in 1235/1819 by the French military adventurer, General Ventura, for his Sikh master, Randjīt Singh. The Nawwāb wreaked his vengeance by providing a contingent 23,000 strong to the British for the capture of Multān, which fell in 1848 to Herbert Edwardes, the founder of Bannū [*q.v.*], and was annexed to the dominions of the East India Company.

On his death in 1852 he was succeeded by Saʿādat Yār Khān, entitled Ṣādiḳ Muḥammad Khān III. The latter's coronation ceremony was performed by the Makhdūm of Uččh, a happy result of the reconciliation reached between the ruling family and the head of the most powerful spiritual group in the state. His harsh treatment of his brothers caused the eldest, prince Ḥādjdjī Khān, to rise against him. Subsequently Ṣādiḳ Muḥammad

Khān was deposed and imprisoned in a grain silo in the fort of Dērāwar. A small allowance was later settled on him and he was deported to Lahore, where he lies buried. Ḥādjdjī Khān assumed the title of Fatḥ Khān, but soon alienated the support of the Dāwūdpōtrās, who continued to intrigue unsuccessfully against him. He died, after a rule of five years, in 1858. He was followed by Raḥīm Yār Khān entitled Muḥammad Bahāwal Khān IV (1858-66), whose otherwise uneventful reign was marred by internal disturbances and commotions culminating in his death through poisoning. He was succeeded by his minor son, Ṣādiḳ Muḥammad Khān IV. On attaining his majority in 1879 he was formally invested with the ruling powers by the Government of British India, the state having accepted British paramountcy in 1849 on the annexation of the Pandjāb. Close on his accession the Dāwūdpōtrās broke out into a rebellion which was, however, ruthlessly suppressed and its leader put to death.

During the minority of the ruler the state was administered by the Chief Political Officer and Agent to the Lieutenant-Governor of the Pandjāb for Bahawalpur Affairs. A very popular ruler, he was known as "Ṣubḥ-i Ṣādiḳ". The 'Shāhdjahān' of the House of Bahāwalpūr, he constructed a number of beautiful palaces, in the construction of which foreign and local artisans were employed. Of these, two, the Ṣādiḳ-Gaṙh Palace and the Nūr Maḥall Palace, deserve mention.

He was succeeded in 1899 by Mubārak Khān, entitled Muḥammad Bahāwal Khān V, a lad of 16 years and the first Bahāwalpūr prince to have received education at the Aitchison College, Lahore. He died in the prime of youth in 1907 at Aden while on his way back home from a pilgrimage to Mecca.

He was succeeded by his infant son, Ṣādiḳ Muḥammad Khān V (1907-56), then only three years old. During his minority, the affairs of the state were managed by a Council of Regency presided over by the late Mawlawī Sir Raḥīm Bakhsh, a native of Ṭhaskā Mīrāndjī (Gurāhm) near Ambālā. His efficient administration, anxiety for public weal combined with piety and philanthropy won him much admiration. In 1947 Bahāwalpūr acceded to Pākistān and rendered much useful service to the new state, especially in the rehabilitation of the uprooted refugees from India, who were then pouring in in large numbers. In 1956 the state of Bahāwalpūr ceased to exist as an independent unit when it was merged with West Pākistān, on the creation of the One Unit.

ḌAYʿA, plu. *ḍiyāʿ*, estate. The word can mean generally a rural property of a certain size, but is understood in a more precise sense in fiscal contexts. It is known that at the time of the Conquests the local people were left in possession of their lands, subject to their paying the *kharādj*; it was later understood that the conversion of the landowner would not change the fiscal status of the land. In contradistinction to the *kharādj* lands there were the original properties of the Arabs, especially in Arabia, and the grants made in favour of notables or their dependents by the Caliphs from public property, the *ḳaṭāʾiʿ* (the plural of *ḳaṭīʿa*) [see *iḳṭāʿ*]: in practice, the primitive *kaṭāʿiʿ* were assimilated into the Arab properties. These were not subject to the native taxes, but the Muslim had to pay out of the revenues that he drew therefrom the *zakāt*, comparable in land matters to the tithe *ʿushr* [*q.v.*]. It was the group of tithe-lands which came to be called *ḍiyāʿ*, whatever the origin of the land, and which appertained in fiscal matters to a *Dīwān al-ḍiyāʿ* as distinct from the *Dīwān al-kharādj*. It inevitably came about that some great landowners might possess numerous *ḍiyāʿ*, but the term *ḍayʿa* means not the group but each estate, the extent of which is sometimes less and rarely more than the area of a village. It was not unknown for the owner of a *ḍayʿa* to be a notable living on the estate, but usually they were rural properties owned by townspeople. During the first centuries of Islam, *ḳaṭīʿa* and *ḍayʿa* described different aspects of the same thing; when, later on, it became customary to distribute to the soldiers, as *iḳṭāʿ*, the *kharādj* of certain districts, in time amounting to the quasi-possession of those districts, the term *ḍayʿa* became distinct from this new *iḳṭāʿ* and continued to describe only estates of the old sort, now mostly in the hands of "civilians".

It follows from this that the holder of the *ḍayʿa* was not usually its cultivator. He maintained on the land, appointing a bailiff (*wakīl*) for their management, some peasants, usually share-croppers [see MUZĀRAʿA]. Here it must be understood that the rents payable by the *muzāriʿ* being of the same order as the taxes payable by the possessor of *kharādj* land, the real difference of status between the two categories of land rests less in an inequality in peasant conditions at the bottom—otherwise it would be difficult to explain why there was no migration from one to the other—than in the social hierarchy which required the fiscal revenues of the *kharādj* to go directly and entirely to the State, whilst on the tithe-lands the peasant rents went for the greater part to the holder of the *ḍayʿa*, who passed on to the State only a small part (a fifth in the case of the half crop of a *muzāraʿa*). The social rôle of the formation of the *ḍiyāʿ* was to ensure the existence of an aristocracy. The real difference between the *kharādj* lands and the tithe-lands faded in this respect as the practice developed of granting to local chiefs the levying of taxes on their subjects, on condition that they made an outright payment

to the State (*muḳāṭaʿa*), or to soldiers the right to the taxes of certain districts, on condition that they paid the tithe (usually a fifth of the *kharādj*) to the State (later, without any further payment). Certainly in law the holder of these revenues was not the landowner but in fact the difference gradually diminished, and many *ḍiyāʿ* were in fact enlarged by the surrounding lands through the workings of the practice of recommendation, *ildjāʾ* [*q.v.*]. The theory moreover, recognizing of necessity past encroachments, permitted the Caliph in the public interest to convert *kharādj* lands into tithe-lands.

The biggest owner of *ḍiyāʿ* during the ʿAbbāsid epoch was the Caliph himself, whose *ḍiyāʿ* were called *khāṣṣa*; then came the princes of the Caliph's family, the amīrs of the army, the heads of the administration and afterwards the merchants and other well-to-do citizens who had put a part of their savings in landed property; in general, very few of the notables lived in the country itself. On the other hand the estates directly maintained by the State (*sulṭāniyya, dīwāniyya*) were likewise divided into *ḍiyāʿ*; according to the state of the budget they could be disposed of, recovered, rounded off, or new estates created from land formerly uncultivated; no doubt this is the explanation of the formula *ḍiyāʿ mustaḥdatha* which is found in the ʿAbbāsid budgets; occasionally there is added the group of estates sequestrated from a very great official, such as the *furātiyya* of the *wazīr* Ibn al-Furāt, which were usually left to the management of an *ad hoc dīwān*, and even restored to its former owner in case of a turn of fortune. The allocation of the *ḍiyāʿ* obviously did not correspond to the original distribution, since in most cases they could be freely transmitted by inheritance, or sold (which seems to have been common), or transformed into *waḳf*, etc.; the only ones not to enjoy this were those which were a result of an *iḳṭāʿ-ṭuʿma*, given with a life-title, or those attached to the discharge of a temporary office.

Bibliography: See BAYT AL-MĀL, KHAṢṢ, IḲṬĀʿ, ʿUSHR. It is impossible to give here all the sources in which *ḍiyāʿ* occur, judicial, chronological, geographical etc. Many references will be found in Fr. Løkkegaard, *Islamic Taxation*, by consulting the word *ḍayʿa* in the index. See also A. von Kremer, *Das Einnahmebudget des Abbasiden Reiches v. Jahre* 306 *H.*, in *Denkschr. K. Akad. d. Wiss. Wien*, xxxvi, 1888, especially 292 ff., and ʿAbd al-ʿAziz Dūrī, *Taʾrīkh al-ʿIrāḳ al-iḳtiṣādī*, Baghdād 1948, chap. ii. (CL. CAHEN)

DAYBUL (Dēbal or Dēwal), the ancient port-town of Sind, which contained a *dēwal* (temple) of *al-budd* (Balādhūrī, *Futūḥ*, Cairo ed., 442), situated on the mouth of a creek (*al-khawr*) and to the west of the Mihrān, *i.e.*, the Indus, was the first place to fall to Muḥammad b. al-Ḳāsim al-Thaḳafī [*q.v.*], who led a punitive expedition against Rādjā Dāhir, the ruler of Sind, in 92/711-12, who was alleged to have connived at an act of piracy committed at Daybul on some boats carrying Muslim men and women on their way to Mecca and ʿIrāḳ from Ceylon. A flourishing town, a centre of sea-borne commerce and trade, it was inhabited largely by traders and artisans belonging mostly to the Mēd tribe. Two earlier attempts by the Arabs under ʿUbayd Allāh b. Nabhān and Budayl b. Ṭahfa al-Badjalī to conquer Daybul by sea having ended in failure, Muḥammad b. al-Ḳāsim decided to march against it by the land-route. His plans met with success, the *mandjanīḳ*, used by the Arabs for the first time in India, proving an effective weapon of war. The tower of Daybul, surmounted by a dome 40 yds. high from which flew a huge red flag, overshadowing the entire town, housed a Buddhist *stūpa* (*manārat al-budd*) or the *dēwal*, after which, it appears, the town itself came to be known as Dēwal (Dēbal, pronounced by the Arabs as Daybul). A huge stone hurled by the *mandjanīḳ* wrought havoc with the tower and brought it down with a thundering crash. The post and the gigantic flag, considered by the local population as a symbol of impregnability, fell to the ground. After the fall of the town Muḥammad b. al-Ḳāsim offered liberal terms to the vanquished non-Muslims and assured them of full protection as *dhimmīs*. He also built a mosque, the first to be constructed on the soil of Sind, and settled 4,000 Arab families in a new quarter, built by him. The ruined *stūpa* remained in a state of neglect and disrepair for a long time until it was partially restored and converted into a prison-house by ʿAnbasa b. Isḥāḳ al-Ḍabbī, governor of Daybul under al-Wāthiḳ Bi'llāh [*q.v.*], about 232/846.

According to the Arabic chronicles (Ṭabarī, *sub anno*, Ibn al-Djawzī, *Muntaẓam* v/2, 143) a terrible earthquake destroyed a large part of the town in 280/893, at the same time killing many thousands of the inhabitants. The town, however, survived the catastrophe and seems to have been rebuilt as it was long in existence thereafter having been visited, among others, in as late as c. 637/1239 by Raḍī al-Dīn Ḥasan b. Muḥammad al-Ṣaghānī [*q.v.*], who strangely enough refers to the old practice of the wealthy classes of Daybul of indulging in acts of piracy and buccaneering. In 618/1221 Djalāl al-Dīn Khʷārizm-shāh after his defeat at the hands of the Tātars came to Sind, attacked and captured Daybul and built a Djāmiʿ Masdjid there on the site of an idol-temple. This means that even in the 7th/13th century idolatry was prevalent in Daybul and that there was a considerable number of non-Muslims residing there.

Various attempts have been made to identify and locate the ruined city of Daybul but they have met with little success. The description of the town, as given by Arab writers and travellers, beyond supplying useful information on the past glory of the town, has been of little use otherwise. The Pakistan Archaeological Department undertook large-scale excavations for the first time in 1958 at the site of Bhambōr, another ruined city, presumed by some scholars to be the original town of Daybul. But the uncovered topography of the Bhambōr mound and the archaeological finds so far (1960) discovered there have failed to provide any conclusive evidence that the ruins of Bhambōr are those of Daybul. Iṣṭakhrī makes separate mention of the town of Daybul and the idol temple of Bahamburā (Bhambōr).

During the early part of Muslim occupation it was a great centre of culture and learning and al-Samʿānī (*Kitāb al-Ansāb*, fol. 236 b) and Yāḳūt mention a large number of traditionists who flourished here.

The destruction of Daybul, its probable causes and the subsequent total disappearance of the town, despite its large size, a big population and its having been in existence till a very late date, are problems which have so far defied all attempts at a satisfactory solution.

(A. S. Bazmee Ansari)

DAYDABĀN, from Persian *dīdebān*, a term applied at different times to certain categories of sentinels, watchmen, inspectors, etc. It already appears as the name of a profession in the *Rasāʾil Ikhwān al-Ṣafā* (8th *risāla* of 1st series, ed. Cairo, i, 210; cf. *IC*, 1943, 147), together with the *Nāṭūr*. In classical Ottoman usage the term, pronounced *Dīdebān*, was applied to the Customs-house guards, whose chief was the *Dīdebān bashī*. It was also given to the watchmen on the fire-towers in Istanbul, as well as to naval and military look-outs.

Bibliography: Dozy, *Supplément*, i, 481; I. H. Uzunçarşılı, *Osmanlı Devleti teşkilâtından Kapıkulu Ocakları*, i, Ankara 1943, 394; M. Z. Pakalın, i, 450. (Ed.)

ḌAYF. From the basic meaning "to incline towards, to set (of the sun), swerve, glance off (of an arrow)", the verbal root comes to mean "to turn aside (from one's road)" and "to halt, on a visit to someone", whence for the noun the sense of "guest"; the meaning "host"—recalling the ambivalence of the French *hôte*—also occurs, but very much later, as indicated by Dozy, *Suppl.* ('maître de maison'). The social implications of the right to protection were earlier associated with the word *djār* [*q.v.*], the corresponding Hebrew word *gēr* (but not exactly parallel; see djiwār) attesting the same Semitic institution. It is curious that the root of this word shows the some semantic derivation from "deviate" to "descend, stay with someone". For a short bibliography, see dakhīl. (J. Lecerf)

DAYÎ, Turkish word meaning "maternal uncle", which seems to have been used to designate official functions only in the Regencies of Algiers and Tunis. It probably began as a sort of honorific title (comparable to the word *alp*, used by the ancient Turks), and must have been difficult to acquire, as its bearer had to have demonstrated his prowess on land and sea in the Mediterranean (Pakalın, i, 407-8). This usage would conflict with the legend in which the father of the Barbarossas is supposed to have told his sons to obey Khayr al-Din [*q.v.*] for "he will be your day" (Venture de Paradis, *Alger au XVIIIe siècle*, in *RA*, 1896, 257).

Another use of the honorific title was to designate a lower rank in the Janissary militia; towards the end of the 10th/16th century in Tunis, the name was born by the heads of the 40 sections of the militia. In 1591 these *dayî*s elected one of their number to the command of the army; this supreme *dayî* held the whole of the power in the Regency of Tunis, at least from 1594, allowing the *beylerbeyi-pasha* to remain in office but with only nominal power (Pierre Dan, *Histoire de la Barbarie et de ses Corsaires*, Paris 1637, 144-5). Ḥamūda b. Murād, when he came into power in 1640 allowed the title of *dayî* to continue, but the person who bore it was no longer the head of the Regency, even if he remained one of its highest dignitaries.

After 1705, the word *dayî* is no longer to be found among the titles conferred by the Ḥusaynid sovereigns, but still appears in the Tunisian hierarchy, in the ninth rank, according to Muhammad Bayrām al-Khāmis al-Tūnusī (*Safwat al-Iʿtibār*, Cairo 1302/1885, ii, 2-3); it is found in several diplomatic documents of the eighteenth century, particularly in the treaties drawn up between the Regency of Tunis and France on 16th December, 1710, 9th November, 1742, and 4 Ventôse, Year X. The word at that time referred to a high judicial officer. It seems to have continued up to the middle of the 19th century.

In Algiers, after 1671, when the Corsair Captains took over the power of the Aghas (see art. algeria (ii) (2), the title of *dayî* was borne by the head of the Regency. This was not yet the case at the beginning of the seventeenth century, when Pierre Dan was in Algiers.

Elected at first by the company (*ṭāʾifa*) of corsair masters, the *dayî* was elected by the officers of the army after 1689. Thirty *dayî*s succeeded each other in power between 1671 and 1830. In theory their power was limited by the control of the *dīwān* of the militia; in fact if the *dayî* had a strong personality, he enjoyed an absolute power.

The *dayî* resided in Algiers, first in the palace of the Djanīna, on the site where the archbishop's palace now stands, then after 1816, in the fortress called the Ḳaṣba, which dominates the Muslim town. The private life of the ruling *dayî* was strictly regulated: he lived apart from his family, except on Thursday afternoons and the night of Thursday/Friday, which he could spend in his private house. No woman could enter his palace, except for a public audience. He was entitled only to the high pay of a Janissary and to allocations of provisions, but he received numerous presents as well, so that several *dayî*s amassed considerable fortunes. Fourteen of them died a violent death.

Bibliography: No books or articles are specially concerned with the function of *dayî*; some scattered information can be found in sources or studies relating to the Turkish regencies of Algiers and Tunis. (R. Le Tourneau)

DAYLAM, geographically speaking, the highlands of Gīlān [*q.v.*]. In the south, the lowlands of Gīlān proper are bounded by the Alburz range; the latter forms here a crescent, the eastern horn of which comes close to the Caspian coast (between Lāhīdjān and Čālūs). In the centre of the crescent there is a gap through which the Safīd-rūd, formed on the central Iranian plateau, breaks through

towards the Caspian Sea. Before entering the gorge at Mandjīl the river, flowing here from west to east, receives a considerable tributary, the Shāh-rūd, which, rising in the district of Ṭālaḳān and flowing east to west, skirts the southern face of the Alburz wall. On its southern side the basin of the Shāh-rūd is separated by a line of hills from the plain of Ḳazwīn [*q.v.*], while on its right side it is fed by a number of streams flowing down the southern slopes of the Alburz. The principal of these tributaries is that watering the valley of Alamūt [*q.v.*]. The valleys of the Shāh-rūd and its tributaries seems to be the cradle of the Daylamite tribe. Though belonging to the basin of the great river of Gīlān (the Safīd-rūd), 'Daylam proper' (*al-Daylam al-maḥḍ*) is in fact separated from it by the Alburz wall. The Daylamites also occupied the northern slopes of the mountain and its ramifications stretching towards the sea (see *Ḥudūd al-ʿĀlam*), and Daylam formed here a wedge between Gīlān and Ṭabaristān [*qq.v.*].

While Gīlān is marshy and unhealthy but highly fertile, the highlands of Daylam, much less favoured by nature, were inhabited by a robust and enterprising race of men ready to emigrate or serve abroad. The geographical term 'Daylam' followed the destinies of the Daylamite expansion in the 4th/10th century, and came to comprise many other neighbouring lands (see below).

The ancient period. The remote origins of the Daylamites are uncertain. They probably belonged to a pre-Iranian stock. The name of the peak of Dulfak (or Dalfak), which rises on the right bank of the Safīd-rūd gorge to the north-east of Mandjīl, has been compared to the name of the ancient tribe of Δρίβυκες. The name of the Daylamites is known to many classical writers. In the 2nd century B. C. Polybius, v, 44, mentions the northern neighbours of Media: *Δελυμαῖοι, *Ἀναρίακαι, ('non-Aryans'), Καδούσιοι, Ματιάνοι. In the 2nd century A.D., Ptolemy, vi, 2, places *Δελυμαῖς to the north of Choromithrene (Khʷār-u Waramīn, to the south-east of Rayy), and to the west of the Tapuri (Ṭabaristān). On the Iranian side the information begins to emerge only in Sāsānian times. Before the decisive victory of Ardashīr the Sāsānian over Ardavān the Arsacid the latter is said to have mobilized "the troops of Rayy, Damāwand, Daylamān, and Patishkhʷārgar" (*Kārnāmak-i Artakhshīr*, tr. Nöldeke, 47). This would suggest Arsacid influence established among the population of the southern face of the Alburz range. At first the Sāsānians treated the Daylamites with caution (see Marquart, *Ērānšahr*, 126) but gradually the latter became conspicuous both in the army and at the court. Kāwādh sent an expedition against Iberia (Georgia) under the command of a "Persian" whose name Boēs (**Bōya*) and title Οὐαρίζης (**wahriz*) point, however, to his Daylamite connexions (see Procopius, *De bello persico*, i, 14). Under Khusraw Anūshīrwān a detachment of Daylamites is mentioned (ca. 552 A.D.) at the siege of Archeopolis (now Tsikhe-Godji) in Lazica where they were used as expert cragsmen, while the Turkic Sabirs were leading the frontal attack (see Procopius, *De bello gothico*, iv, 14 ed. Dindorff, 529-30). A few years later the Daylamites carried out an unsuccessful night attack on another corps of Sabirs employed by the Byzantines (see Agathias, iii, 17) According to Procopius, the "Dolomites" lived in inaccessible mountains; they were never subjects of the kings of Persia, and served them only as mercenaries. They fought on foot, each man being armed with a sword and a shield, and carrying three javelins (*acontia*) in his hands, which corresponds to the later Islamic descriptions.

Khusraw I's famous expedition to the Yemen (ca. 570 A.D.) consisted of 800 prisoners from Daylam and neighbouring places, and was led by an old man, also released from prison, bearing the title of *wahriz* [*q.v*]. When under Kāwādh and Khusraw the passes of the Caucasus were fortified and military colonies settled near them, the names of the latter reflected their origin from Daylam and its neighbourhood (see below, Toponymy). The conspiracy against Khusraw's successor Hurmizd IV, which resulted in his overthrow in 590 A.D., was led by Zoanab, the chief of the "Dilimitic" people (Theophylactus Simocatta, iv, 3, 1).

Daylam and the Arabs. During the Arab invasion the Daylamites took up an indecisive position when the people of Ḳazwīn invoked their help, but, supported by the people of Rayy, they opposed Nuʿmān b. Muḳarrin sent by the caliph ʿUmar. The Daylamites, led by their king (chief?) Mūtā (or Mūrthā), were defeated on the river Wādj in Dastabay (*Dasht-pay, *i.e.*, the "edge of the plain" stretching between Rayy and Hamadān) (Ṭabarī, i, 265 (*sub* 22/642)). Balādhurī, 317-25, and other historians mention seventeen Muslim expeditions into Daylam, from the time of ʿUmar I to that of al-Maʾmūn, which were reflected in Arabic poems (see Kasrawī, 4-20). The poet Aʿshā Hamdān (d. 83/702) was kept a prisoner by the Daylamites, though the place-names he quotes (Ḳ.līsm, Ḳayūl, Ḥāmin, Lahzamīn) seem to refer to the region of Damāwand (Wīma ?). Nevertheless Daylam preserved its independence. The Muslim strongholds against them were in the south: Ḳazwīn; and in the north-east, on the frontier of Ṭabaristān: the fortifications on the rivers Kalār and Čālūs.

Language and religion. The name of the king Mūtā (?) sounds unusual, but when in the 9th and 10th centuries A.D. Daylamite chiefs appear on the stage in large numbers, their names are clearly pagan Iranian, not of the south-western "Persian" type, but of the north-western variety: thus Gōrāngēdj (not Kūrānkīdj, as formerly deciphered) corresponds to Persian *gōr-angēz* "chaser of wild asses", Shēr-zil to *shēr-dil* "lion's heart", etc. Iṣṭakhrī, 205, distinguishes between Persian and Daylamī and adds that in the highlands of Daylam there was a tribe that spoke a language different from that of Daylam and Gīlān.

There may have been some Zoroastrians and Christians in Daylam, but practically nothing is known about the pagan creed of the Daylamites. According to Bīrūnī, (*al-Āthār*, 224) they followed the law established by the mythical Afrīdūn who ordered men to be masters in their family and called them *kadhkhudhā*. Rather enigmatically Bīrūnī adds that this institution was abrogated by the ʿAlid *al-Nāṣir al-Uṭrūsh (see below) and thus they reverted to the condition in which people were living in the time of the tyrant Ḍaḥḥāk Bīwarāsp, when "devils and demons" (*al-shayāṭīn wa 'l-marada*) dwelt in their houses and they were powerless against them.

Apart from the *kadhkhudhās* exercising the rights of *pater familias*, the Daylamites had their local rulers of whose existence we can judge by such titles as *Wardān-shāh*, *wahriz* (cf. Hübschmann, *Armen. Gramm.*, 78: *vahrič-i vahričay* "vahriz of Vahriz"), and even kings (see above, Mūtā). The rôle of the latter becomes clearer only in the 9th and 10th centuries A.D. in connexion with their collaboration with the ʿAlids.

The ʿAlids. At an early date the mountain fastnesses of Daylam served as places of refuge for the ʿAlids who had been obliged to flee from the ʿAbbāsids. The earliest known refugee was Yaḥyā b. ʿAbd Allāh, whose two brothers had been executed and who himself joined a rebel brother of Hārūn al-Ras͟hīd. He came to Daylam in 175/791, but soon surrendered to the Barmakid Faḍl b. Yaḥyā. It appears that in the meantime the caliph used pressure on the king of Daylam both by threats and by offers of money (cf. Ṭabarī, *anno* 176; Yaʿḳūbī, ii, 462).

The Dj̲ustānids. When in 189/805 Hārūn arrived in Rayy he summoned the rulers of the Caspian region and let the lord of Daylam, Marzubān b. Dj̲ustān, go with a gift of money and a robe of honour; no payment of tribute is mentioned in this case, while such an obligation was imposed on the other kings. Although this is the first time that we hear of the family of Dj̲ustān, it is likely that the leniency of Hārūn had a connexion with the events of 175/791 when the same king (or his father?) must have been the ruler. Provisionally we can take Marzubān as the first in the list of the ruling *Banū Dj̲ustān*.

The next king known to us is Wahsūdān b. Dj̲ustān; the interval between Marzubān (who is mentioned in 189/805) and Wahsūdān (who was still living in 259/872, cf. Ṭabarī, iii, 188) is too great to consider them as brothers. The consensus (Justi, Vasmer, Kasrawī, Ḳazwīnī) is now to insert between them Dj̲ustān I (No. 2), putative son of No. 1, Marzubān, and father of No. 3, Wahsūdān. In fact under 201/816 Ṭabarī reports that ʿAbd Allāh b. K̲h̲urdad̲h̲bih in the course of his victorious campaign in Daylam captured a king called Abū Laylī. Laylī (or Līlī) is known in Daylam as a man's name (cf. the adventurer Laylī b. Nuʿmān), and the question is whether he is identical with Dj̲ustān (no. 2) or whether he was a usurper or a local ruler (of Lāhīdj̲ān?).

The situation in Daylam becomes clearer with the advent on the frontier of Daylam of the line of Ḥasanid sayyids, clever politicians and able warriors who succeeded in involving the Daylamites in their struggles and schemes, although no obligation of professing Islam had yet been imposed on them.

Sayyid Ḥasan b. Zayd *al-dāʿī al-kabīr* (no. I) stood at the head of a rising in Čālūs and Kalār in 250/864 and protected the inhabitants against the Ṭāhirid governor who wished to appropriate the common lands which served for collecting fuel and as grazing grounds (Ṭabarī, iii, 1524). According to Iṣṭak̲h̲rī, 205, before the time of Ḥasan b. Zayd, Daylam had been considered as the 'territory of unbelief' (*Dār al-kufr*) from which slaves had been taken, but the ʿAlids had intervened on behalf of the Daylamites. Wahsūdān b. Dj̲ustān (no. 3) swore allegiance to Ḥasan b. Zayd, but soon after broke with him and died.

The *Taʾrīk̲h̲-i Dj̲īl wa Daylam* (quoted by Dj̲uwaynī, iii, 271) reports that in 246/860 a Dj̲ustānid began the construction of a building (*ʿimāra*) on Mt. Alamūt, in which the kings of Daylam took pride. It is more likely that this enterprise marked not the end of the long reign of Wahsūdān but the beginning of that of his energetic son Dj̲ustān II (no. 4). The latter invited the *dāʿī* to send his representatives to Daylam, and under the auspices of the ʿAlids took Rayy from the Ṭāhirids and occupied Ḳazwīn and Zandj̲ān. In 253/867 the caliph al-Muʿtazz sent an army under Mūsā b. Bug̲h̲ā, who wiped out the successes of Dj̲ustān. In 259/872 the latter made a second, though unsuccessful, attempt to occupy Rayy, and continued to assist the *dāʿī* in his struggle against the Ṣaffārids. In 270/883 Ḥasan b. Zayd died and was succeeded by his brother Muḥammad b. Zayd, called *al-dāʿī al-ṣag̲h̲īr*, to whom also Dj̲ustān swore allegiance (no. II).

The worst experience befell Daylam ca. 276/889 when the K̲h̲urāsānian soldier of fortune Rāfiʿ b. Hart̲h̲ama, acting on behalf of the Sāmānids, ousted Muḥammad b. Zayd from Dj̲urdj̲ān. The *dāʿī* sought refuge in Daylam. The troops of Rāfiʿ occupied Čālūs, but the sayyid, assisted by Dj̲ustān, surrounded them. Then Rāfiʿ himself moved forward. Muḥammad b. Zayd retreated to Gīlān, while on the heels of Dj̲ustān Rāfiʿ marched from Čālūs to Talaḳān, and for three months (summer of 278/891) this region was plundered by the invaders. Dj̲ustān gave a promise not to assist the sayyid, and Rāfiʿ went on to occupy Ḳazwīn and Rayy (see Ibn al-At̲h̲īr, vii, 303, and Ibn Isfandiyār, ed. Eghbal, 252-4). In 279/892 Rāfiʿ, seeing himself threatened from many sides, suddenly swore allegiance to the *dāʿī* and returned Dj̲urdj̲ān to him, on the understanding that he would send him 4000 Daylamite stalwarts. By threats and promises the Ṣaffārid ʿAmr b. Layt̲h̲ prevented the *dāʿī* from helping Rāfiʿ and the latter had to flee to K̲h̲ʷārizm where he was killed in 283/November 896. Four years later (287/October 900) Muḥammad b. Zayd fell in a battle against a Sāmānid commander.

After a short interval the ʿAlid cause was taken up by the Ḥusaynid Ḥasan b. ʿAlī (Nāṣir al-Dīn, al-T̲h̲āʾir, al-Uṭrūs̲h̲ "the deaf" (no. III), who despite the shortness of his reign (301-4/904-7) is regarded as the greatest of the ʿAlid rulers. According to Ṭabarī (iii, 2296) the world had never known such justice as that of al-Uṭrūs̲h̲. He had lived for thirteen years among the Daylamites, and succeeded in converting to the Zaydī creed a considerable number of people "between the farther (eastern) side of the Safīd-rūd and Āmul". To confirm this achievement al-Uṭrūs̲h̲ had the fortifications of Čālūs razed to the ground. He was recognized by Dj̲ustān, and although their first campaign against the Sāmānids was a failure, the next year, after a pitched battle of forty days, the Sāmānids were driven out of the Caspian provinces.

The enigmatic phrase of Bīrūnī, referred to above, concerning Nāṣir's action in disrupting the ancient authority of the *kad̲h̲k̲h̲udhā* may hint at the influence of Islamic institutions which had established control over isolated households. Such a trend of events must have been resented by the Dj̲ustānids, and some historians (Awliyāʾ Āmulī, *Taʾrīk̲h̲-i Rūyān* (750/1349), ed. Tehran, 77; Ibn Wāṣil, *al-Taʾrīk̲h̲ al-Ṣāliḥī* in Dorn, *Muhamm. Quellen z. Gesch. d. Kasp. Meeres*, iv, 474) mention a period of struggles between Dj̲ustān and Nāṣir, though apparently before the latter's advent in 301/913. He died on 5 S̲h̲aʿbān 304/31 January 917, after having appointed as his successor his son-in-law, the Ḥasanid Ḥasan b. al-Ḳāsim (no. IV).

At about the same time, after a reign of forty years, Dj̲ustān was assassinated. The perpetrator of this crime was his brother ʿAlī b. Wahsūdān (no. 5), whom in 300/912 the ʿAbbāsids had already appointed their financial agent (*istaʿmala*) in Iṣfahān. He was dismissed in 304, but in 307/919 the ʿAbbāsid commander Muʾnis, who had just taken prisoner Yūsuf b. Abi 'l-Sādj̲, reappointed ʿAlī as the governor of Rayy, Ḳazwīn, and Zandj̲ān. In the same year he

was killed in Ḳazwīn by Muḥammad b. Musāfir (Kangarī, or Sallārī, of the second Daylamite dynasty of Tārom), who being married to the clever Kharāsūya, daughter of Djustān b. Wahsūdān (no. 4) wished to avenge his father-in-law (not his "nephew", as in Ibn al-Athīr, viii, 76). With his political attitude, ʿAlī b. Wahsūdān could hardly have been recognized in the whole of Daylam. However, we learn that when the Ḥasanid Ḥasan b. al-Ḳāsim (the *dāʿī* no. IV) was captured in Ṭabaristān and delivered to ʿAlī to be sent to Baghdād, ʿAlī had him imprisoned in his "ancestral fortress" of Alamūt (see Ibn Isfandiyār, ed. Eghbal, 281). Immediately after ʿAlī's death, his other brother Khusraw Fīrūzān, who apparently had acted as ʿAlī's *locum tenens*, released the sayyid. Khusraw Fīrūzān (no. 6) marched against Ibn Musāfir but was killed by him. Khusraw's son Mahdī (no. 7) also took up arms against the Kangarid, but was defeated and took refuge with the new rising star of Daylam, Asfār b. Shīrōya or Shīrawayh [*q.v.*].

The epigons. With this event (ca. 315/927) ends our direct information about the Djustānids, but remnants of the dynasty may still have carried on, at least in a part of their dominions. When Ibn Musāfir had dealt with his Djustānid opponents (nos. 5, 6, 7), the former amīrs of the ʿAlids and Djustānids had already spread over the Iranian plateau, and Daylam proper lay at the mercy of Ibn Musāfir. In a report in which an official (some time before 379/989) summed up the history of Shamīrān (Tārom) for the Būyid minister Ibn ʿAbbād (see Yāḳūt, iii, 149-50, as explained by Kasrawī, i, 130-4), he states that the Musāfirid ruled over the whole of the mountainous *Ustāniya and (thus?) appropriated a part of Daylam, whereas the descendants of Wahsūdān (no. 3) b. Djustān had to content themselves with the region of *Lāʾidjiya. The same terms appear in the anti-Daylamite and pro-Turkish tract which the secretary Ibn Ḥassūl presented (ca. 450/1058) to al-Kundurī, the *wazīr* of Tughril-beg (see *Faḍāʾil al-Atrāk*, ed. ʿA. al-ʿAzzāwī, *Belleten*, iv/14-5, (1940) 31). Ibn Ḥassūl explains that *Ostān is the highlands, and *Lāʾidj (wrongly printed *Lāndj*) the lowlands of Daylam, the former being in the possession of the Wahsūdānid (here Kangarid) governors, and the latter in the possession of the Djustānid kings. These independent reports indicate that soon after the death of Djustān b. Wahsūdān (no. 4) his possessions were split up and the Wahsūdānids (here children of the *Kangarid* Wahsūdān b. Muḥammad of Tārom) had taken possession of the highlands of Daylam (presumably the "*ostān*", *i.e.*, "home, centre" of the Djustānids). The latter must have migrated to the neighbourhood of Lāhīdjān (*i.e.*, the coastal area of Daylam, of which ten districts are enumerated in the *Ḥudūd*).

On the contrary, when Sulṭān Tughril was operating near Ḳazwīn (Ibn al-Athīr, *anno* 434/1042) the king of Daylam appeared before him with a tribute; then separately Ibn al-Athīr mentions the submission of the *Salār* of Ṭarm (Tārom). We have to conclude either that the Djustānids had succeeded in reoccupying a part of their dominions, or that the tribute was paid by the Lāhīdjān branch. The latter surmise is more likely, for Nāṣir-i Khusraw in his *Safar-nāma* states that in 438/1046 a levy (*bādj*) was collected at the crossing of the Shāh-rūd (near its confluence with the Safīd-rūd) on behalf of the *amīr-i amīrān* who was "(one) of the kings of Daylamān". Nāṣir describes then his visit to Shamīrān whose ruler bore the title of "Marzubān al-Daylam Djīl-i Djīlān (*sic*) Abū Ṣāliḥ"; his name was Djustān Ibrāhīm and he possessed "many castles in Daylam". This must have been the great-grandson of Wahsūdān of Tārom (see Musāfirids), and it appears as though the *bādj* on the Shāh-rūd was levied also in his name.

The story of the *dāʿīs* ends with the rule of the above-mentioned Ḥasanid Ḥasan b. Ḳāsim (no. IV), son-in-law (*khatn*) of al-Uṭrūsh. Although he was nominated by Nāṣir himself, struggles for the succession began between him and the sons of Nāṣir, and after the death of the latter the Daylamite amīrs, involved in complicated struggles, fought for their own supremacy. Ḥasan b. Ḳāsim was killed ca. 316/928 by Mardāwidj b. Ziyār, then the ally of Asfār b. Shīrōya.

Daylamite expansion. The result of the ʿAlids' activities was that the Daylamites, partly converted to the Zaydī creed, developed strong oppositionary tendencies with regard to the caliphate, and that in their numerous fights for the ʿAlids they greatly improved their military skill and became conscious of their strength. The revolts of the Sādjid Yūsuf b. Dīwdād (in 295/907 and in 304-7/916-9) and his final recall before his death in 315/928 opened the field for a chaotic succession in Rayy of Sāmānid governors, Turkish slaves, and ʿAlids of Daylam. An important branch of the Musāfirids of Tārom had expanded towards Ādharbaydjān and Transcaucasia (see Minorsky in *BSOAS*, xv/3, 1953, 514-29), while quite new elements appeared on the central plateau of Īrān: first Asfār b. Shīrōya who ca. 315/927 had proclaimed himself king, then the Ziyārids (316-434/928-1042), for a short time in Rayy in Iṣfahān, and later in the south-eastern corner of the Caspian Sea whither they had had to withdraw under the impact of the more important Būyids [*q.v.*]. This period is known to us through such sources as Masʿūdī, *Murūdj*, ix, 4-15; Miskawayh, in *Eclipse*; Ibn Isfandiyār, ed. Eghbal, 224-301, tr. Browne, 162-223; and such subsidiary mentions as are found in the historians of the Sāmānids, cf. Gardīzī, *Zayn al-akhbār*; Ibn Faḍlān, in his *Riḥla*, etc.

Having occupied the major part of the Iranian plateau (except Khurāsān held by the Sāmānids) the Būyids, who rose in 320/932, occupied Baghdād in 334/946, and for 109 years held the caliph under their ʿAlid tutelage. Under their shadow a great number of local dynasties of Iranian origin (Daylamite and Kurdish) sprang up in the peripheral areas: the Musāfirids; the Kurdish Shaddādids of Gandja (340-409/951-1018) and their branch of Ani (451-559/1059-1163); the Kākūyids [*q.v.*] of Hamadān and Iṣfahān (398-443/1007-51); the Kurdish Ḥasanūyids [see Ḥasanawayhids] in the region of Kirmānshāh (348-406/959-1015); the Kurdish ʿAnnāzids [*q.v.*] in Ḥulwān and on the western slopes of the Zagros (381-511/991-1117); the Kurdish Marwānids [*q.v.*] of Mayyāfāriḳīn and Diyārbakr (380-478/990-1085), etc. The weakness of the Daylamite régime consisted in the dispersion of the not too numerous elements of Daylam over too vast an area; the splitting up of the dynasty into several rival branches; and finally the Turko-Daylamite antagonism in the army (see below). The first great blow to the Būyid power was the occupation of Rayy by the Ghaznawid Maḥmūd in 420/1029; the definite end came under the impact of Tughril-beg who in 447/1055 arrested the last Būyid of Baghdād, al-Malik al-Raḥīm. In Fārs, the last scions of the Būyid house carried on for a few more years as vassals of the Saldjūḳs, (see Bowen in *JRAS*, 1929, 229-45). Outside their

country, the Daylamites continued to serve as mercenaries. Niẓām al-Mulk, *Siyāsat-nāma*, ch. xix, still recommends the employment of 100 Daylamites together with 100 Khurāsānians as palace guards of the Saldjūḳs. Isolated colonies of Daylamites survived in many places before they were absorbed by the local populations.

Toponymy. The area over which generations of Daylamites scattered throughout the ages is very wide, but, in view of the chronological difficulties involved, it is better to combine the references under a single heading. Thus the Babylonian name of the island of Dilmun (Baḥrayn) still merits consideration, while the name of Bandar-i Daylam on the southern coast of Fārs seems to date back to the Būyid period. In the sub-Caucasian region the existence of military settlements of the Sāsānian times is reflected in such names as Layzān or Lāʾizān (now Lahīdj) connected with Lāhīdjān. The name of Shīrwān is probably linked with that of Shīr (in Arabic Shirriz) lying at the confluence of the rivers of Ṭalaḳān and Alamūt, cf. *Ḥudūd*, ch. xxxii, § 24, and Djuwaynī, iii, 425 (note of M. Ḳazwīnī). Even the title of the king of Sarīr (Avaria) figuring in Balādhurī, 196, as Wahrarzān-shāh, may prove to be linked with the title *wahriz*, cf. Minorsky, *History of Sharvān*, 1958, 23-5. The so-called "Zāzā", living north of Diyārbakr up to Pālū and Darsim and still speaking an Iranian language, call themselves *Dimlā*, which name F. C. Andreas identified with Daylam. The (now turkicized) tribe Dumbulī, active in the region of Khoy by the beginning of the 19th century, seems also to be connected with the Dimlā. It is noteworthy that Agathias, iii, 17, speaking of the *Dilimnitai* troops fighting in Lasica, says that their homes (perhaps of that particular group?) lay in the neighbourhood of Persian lands "on the middle course of the Tigris", *i.e.*, (if the "Tigris" is not a mistake for the Safīd-rūd) in the region where the Zāzā live nowadays. The traveller Abū Dulaf, ed. Minorsky, Cairo 1955, § 25, mentions a place called Daylamastān at seven *farsakhs* east of Shahrazūr whence "in the days of the ancient kings of Persia" the Daylamites used to send their raiding parties into the Mesopotamian lowlands. The borough of Daylamān lying west of Lāhīdjān may be the witness of the transfer of the Daylamite centre from *Ostān (see above) to the region of Lāhīdjān. North-west of Lake Urmiya the centre of Salmās was until recently called Dilmaḳān; south-west of Lake Urmiya near an important Zagros pass one finds a district called Lāhīdjān (see SĀWDJ-BULAK in *EI*[1]). Several other villages bearing the name Lāhīdjān are known in the basin of Lake Urmiya, north of Mt. Savalan (Lāhī), etc.

Territory and peoples. The earlier Muslim geographers, such as Ibn Khurradādhbih, Yaʿḳūbī, Ibn Rusta, Ibn Faḳīh, have little to say on Daylam, but ample information on the country and its inhabitants is supplied by the geographers and historians after the rise of the Daylamite dynasties in the 4th/10th century. Already Iṣṭakhrī had described under Daylam all the southern coast of the Caspian and the lands forming a belt to the south of the Alburz range (including Rayy and Ḳazwīn). Muḳaddasī (who lived in the heyday of the Daylamite dominion) adds to it all the coasts of the Caspian comprising the Khazar kingdom at the estuary of the Volga.

Iṣṭakhrī (possibly following Balkhī) places the capital of the Djustān family at Rūdhbār. The editor of Djuwaynī, iii, 434, M. Ḳazwīnī, has presented weighty arguments for identifying it with the Rūdhbār of Alamūt, which would mark the latter valley as the home (*ostān*) of the dynasty of Daylam. In Ibn Ḥawḳal's text, which is mainly based on Iṣṭakhrī, the capital of the Djustānids is placed at al-Ṭarm, which is a slip probably on the part of a scribe or reader, for al-Ṭarm (Tārom) was the capital not of the Djustānids but of the later Musāfirids [*q.v.*]. More complicated is the identification of B.rwān, which according to Muḳaddasī, 360, was the capital (*ḳaṣaba*) of Daylam. The place was devoid of amenity, as opposed to the fertile Tālaḳān (in the Shāh-rūd valley) which in the author's opinion would have been more suitable for the capital. The residence of the government (*mustaḳarr al-sulṭān*), in B.rwān, was called Shahristān, where the treasure was kept in a deep well (Ẓahīr al-Dīn spells Shahr-astān, perhaps Shahr-*Ostān "the town of Ostān", see above). Muḳaddasī names separately Samirūm (*sic*) the capital of the Salāarwand rulers (Musāfirids) of the Tārom region, and Khashm the town of the ʿAlid *dāʿīs*, in eastern Gīlān, situated by a bridge.

Iṣṭakhrī, 205, describes the Daylamites as lean, having "light" (probably "fluffy") hair, rash, and inconsiderate. They practised agriculture and had herds but no horses. According to Muḳaddasī, 368-9, the Daylamites were good-looking and wore beards. Some valuable data on "Daylam proper" and Gīlān are given in the *Ḥudūd al-ʿĀlam*, ch. xxxii, §§ 24-5: Daylam consisted of ten districts in the Caspian lowlands, and three, *Wustān, Shīr (apparently Shirriz of the Arabic sources), and Pazhm, in the mountains.

Customs. Many habits and customs of the Daylamites struck the contemporary authors. Their men were extremely hardy and capable of enduring great privations (Miskawayh, *Eclipse*, i, 140). Particularly mentioned among their armament are javelins (*zhopīn*) and tall shields painted in gay colours and carried by assistant lads. Set side by side these shields formed a wall against the attackers. Special men throwing javelins with burning naphtha (*mazāriḳ al-nafṭ wa 'l-nīrān*) were also used in their army (see *Eclipse*, i, 282). A poetical description of Daylamite warfare is given in Gurgānī's *Wīs wa Rāmīn*, ed. Minovi, ch. xcix. The great disadvantage of the Daylamites was their lack of cavalry; they were obliged to operate jointly with Turkish mercenaries (whose armament was more complete, *Eclipse*, ii, 336) and basic rivalry between them disrupted the army.

Reference is often made to the extravagance of the Daylamite lamenting over their dead, and even over themselves in misfortune (Muḳaddasī, 369; *Eclipse*, ii, 162; iii, 260). In 352/963 Muʿizz al-Dawla introduced public mourning (*niyāḥa*) in Baghdād for the *imām* Ḥusayn (Ibn al-Athīr, viii, 406; Tanūkhī, *Nishwār*, tr. Margoliouth, 219; but see Hilāl b. Muḥassin on the temporary character of the performance, *Eclipse*, iii, 458, *sub* 393), and this institution may be responsible for the later Persian *taʿziyas* in the month of Muḥarram (cf. A. E. Krīmskiy, *Perskiy teatr*, Kiev 1921).

Ca. 200 A.D. the Syrian sage Bardesanes reports that the women of Gīlān work in the fields (*Leges regionum*, Patrologia Syriaca, ii/1, 1907, ed. F. Nau, 586). Eight centuries later the author of the *Ḥudūd* writes that the Daylam womenfolk are engaged in agriculture like men. According to Rudhrāwarī, *Eclipse*, iii, 313, they were "equals of men in strength of mind, force of character, and participation in the

management of affairs". The Daylamites practised endogamy within their tribes, and marriages were concluded by direct agreement between the parties (Muḳaddasī, 368-9).

The Ismāʿīlīs. The Fāṭimid Ismāʿīlī propaganda had been rampant in the environs of Rayy even since the beginning of the 3rd/9th century (see S. M. Stern, in *BSOAS*, xxiii, 1960, 56-90). Asfār of Daylam and Mardāwidj of Gīlān had accepted the new teaching (Baghdādī, *Farḳ*, tr. A. Halkin, Tel-Aviv 1935, 113; Rashīd al-Dīn, *Ismāʿīliyān*, ed. Dānishpazhūh, Tehrān 1338/1959, 12). Under the last Būyids the Daylamites in Fārs adhered to the doctrine of the Seven Imāms, and the penultimate Būyid Marzubān Abū Kālīdjār (d. 440/1048) lent his ear to the preacher al-Muʾayyad who was finally expelled from Fārs (*Sīrat al-Muʾayyad fi 'l-Dīn*, Cairo 1949, 43, 64; cf. *Fārs-nāma*, 115). The strong position of Daylam and the oppositionary tendencies of the population naturally attracted Ḥasan-i Ṣabbāḥ, who first sent his propagandists into Daylam, and then in 483/1090 seized the town of Alamūt, which was then held by an ʿAlid called Mahdī as a fief from Malik-shāh (Djuwaynī, iii, 174). Thus for the next 166 years the great stronghold of Daylam was transformed into a danger-spot on the very doorstep of Saldjūḳ territory and a threat to the whole Sunnī world. The efforts of the Saldjūḳs to liquidate Alamūt were unsuccessful, but they caused much harm to the population; cf. the expedition of Arslan-tash in 485/1092, that of the son of Niẓām al-Mulk in 503/1109, that of Shīrgīr before 511/1117. The last reminiscence of the Būyids in Daylam is Djuwaynī's report, iii, 239, on the deed of one of their scions, Ḥasan b. Nāmāwar, who in 561/1166 stabbed to death the master of the Ismāʿīlīs because, despite his being his brother-in-law, he disliked his propaganda.

The Mongols and after. The total destruction of the fortresses of the Assassins (Alamūt, Lamassar, Maymūn-diz) by the troops of Hulāgū in 654/1256, and the extermination of the followers of the last master of the Assassins, dealt a terrible blow to the original highlanders of Daylam. The Shāh-rūd valley became easily accessible from Ḳazwīn (cf. the account of the operations of Öldjeytū Khān, who in 706/1307 invaded Gīlān and reached Lāhīdjān; *Taʾrīkh-i Uldjāytū*, Bibl. Nat., Supp. 4197, fol. 42v).

At a later period the highlands of Daylam were more or less controlled by the dynasty of the *kār-kiyā* of eastern Gīlān (Biyapīsh) whose centre was at Lāhīdjān. They gradually eliminated their Hazāraspī princes of Ashkawar, the last scions of the Ismāʿīlīs of Alamūt, and the clan of Kūshīdj of Daylamān and Rūdhbār. In 819/1416 the sayyid Raḍī of Lāhīdjān invited the Daylamites to the bank of the Safīd-rūd and had two or three thousand of them murdered with their chiefs (Ẓahīr al-Dīn, *Taʾrīkh-i Gīlān*, ed. Rabino, Rasht 1330, 57, 118, 122-6).

The most recent movement in the history of Daylam is the uprising of the Ahl-i Ḥaḳḳ [*q.v.*] leader Sayyid Muḥammad in Kalār-dasht in October 1891 (see Minorsky, *Notes sur la secte des Ahlé-Ḥaqq*, Paris 1920-1, 51).

No complete enquiries have been carried out on the population of Daylam proper, but H. Rabino, *Le Guilan*, 280, states that the original Daylamites are found only in Kalārdeh and Čawsāl (in winter) and in Kalač-khānī (in summer). The inhabitants of Daylamān (south-west of Lāhīdjān) have sold their lands and now live at Barfdjān (mentioned in the *Ḥudūd* as a canton in the lowlands of Daylam).

Bibliography: Given in the course of the article. The *Taʾrīkh-i Djīl wa Daylam*, dedicated to the Būyid Fakhr al-Dawla (who according to G. C. Miles ruled in Rayy 373-87/984-97), and used by Djuwaynī, iii, 270, is now lost. No Djustānid coins have yet been discovered. Marquart., *Erānšahr*, 126-7; H. L. DAYN [see SUPPLEMENT].

DAYR, a word of Syriac origin denoting the Christian monasteries which continued to function after the Arab conquest of the Middle East. If we are to believe the lists drawn up by Arab writers, they were very numerous, particularly in ʿIrāḳ (along the Tigris and Euphrates valleys), Upper Mesopotamia, Syria (Stylite sanctuaries in the vicinity of the "dead cities"), Palestine and Egypt (along the whole length of the Nile valley). They were often named after a patron saint (Dayr Mār Yuḥannā near Takrīt, Dayr Samʿān in northern Syria) or founder (Dayr ʿAbdūn in ʿIrāḳ), but also occasionally after the nearest town or village (Dayr al-Ruṣāfa in Syria) or a feature of the locality (Dayr al-aʿlā near Mosul, Dayr al-Zaʿfarān in Upper Mesopotamia). Monks, called *dayyār* or *dayrānī*, lived in the *dayr*s (also known in ʿIrāḳ as *ʿumr*, a word of uncertain origin). The monasteries were often no more than simple hermitages, particularly if they were located in remoter parts. Usually however they consisted of several buildings—a church (*kanīsa* or *bīʿa*), cells (*ḳilliya*, pl. *ḳalālī*, or *kirḥ*, pl. *akrāḥ* and *ukayraḥ*, words of Syriac origin, the second being strictly speaking ʿIrāḳī), and outbuildings such as shops and inns. The *dayr* in fact constituted a centre of agricultural development, and drew revenue from the lands which were cultivated to meet its needs (vineyards, olive groves and palm plantations). Hermitages and convents were made defensible either by the construction of fortifications or by the careful choice of site (*e.g.*, on mountain-sides, or even set into the rock face and thus cut off from normal means of entry).

The Christian monasteries were centres of religious and intellectual life during the early years of Islam. For instance, the liturgical rules adopted in the 3rd-4th/9th-10th centuries by the Nestorian church were formulated in the Dayr al-aʿlāʾ of Mosul (see J. M. Fiey, *Mossoul chrétienne*, Beirut 1959, 126-32). They also played an important role in diffusing the works of classical Greece, generally translated into Syriac and then into Arabic, and in some instances they built up large libraries, such as the notable collection in St. Catherine's monastery on Mount Sinai (see A. S. Atiya, *The Arabic manuscripts of Mount Sinai*, Baltimore 1955). Furthermore, some ʿIrāḳī monasteries and the Christian communitites attached to them proved an important source of official clerks in ʿAbbāsid times. They took part in the administration of the empire, and if they adopted the Islamic faith they even had the right to be appointed vizier (see DAYR ḲUNNĀ).

The monasteries were also an important factor in the political and social life of the Islamic world.

They were open without distinction to virtually all travellers, including notabilities, and indeed often provided a safer stopping-place than elsewhere. At the Dayr Murrān [*q.v.*] near Damascus, for example, there was a princely residence nearby (confused with the monastery by some authors), and sovereigns or governors were sometimes accommodated in the *dayr* itself. This was the case in the Dayr al-aʿlaʾ of Mosul, the Dayr Zakkī of al-Raḳḳa, or the monastery of al-Anbār where Hārūn al-Ras͟hīd and his retinue stopped in 187/803—it was here that D̲jaʿfar the Barmakid was executed (Ṭabarī, III, 675, 678). Upon his arrival in Egypt the Fāṭimid al-Muʿizz lived for some months in the monastery of al-Gīza. There are ample records showing that during their hunting excursions rulers and princes visited the local monasteries, where they were offered food and drink by the monks. Muslim visitors were also attracted to the monasteries on account of the taverns usually attached to them, and there they were free to drink as much wine as they wished. Each monastery solemnly celebrated an annual festival, and the buildings were generally surrounded by places of entertainment and even debauchery, particularly if they were situated near a large town. This explains why so many of the monasteries figure in bacchic and erotic poetry, and why there are so many stories relating to the questionable behaviour of some of their inhabitants. Indeed, Arab authors of the 3rd/9th and 4th/10th centuries even wrote whole books about them by collecting poems and stories in which they were mentioned. Only one is still in existence, the *Kitāb al-Diyārāt* of al-S͟hābus͟htī (d. 388/998). But the names of several other books are known, written by His͟hām al-Kalbī, Abu 'l-Farad̲j al-Iṣfahānī, the poet al-Sarī al-Raffāʾ, the two brothers al-K͟hālidiyyān and al-Sumaysāṭī.

After the Arab conquest the monasteries and churches were subject to special conditions laid down by jurists. Although the existing monasteries remained intact, the monks were forbidden to put up new buildings, or even to repair damage incurred through wear and tear or accidental causes. In reality, however, the fortunes of the monasteries varied with the times, and periods of toleration were followed by periods of persecution. The tax regulations governing the occupants of the monasteries were a subject of continual discussion. The monks were initially exempt from poll-tax (*d̲jizya*), and the tradition was often later confirmed by jurists. But some maintained that exemption applied only to those living in poverty, and the S͟hāfiʿīs even went so far as to assert that the exemption was unjust. From the chroniclers it would seem that in the Umayyad age some governors subjected monks in Egyptian monasteries to personal taxation, and others in the ʿAbbāsid age granted exemption only in certain circumstances. The question was raised again during the caliphate of al-Muḳtadir, when in 313/925 ʿAlī b. ʿĪsā, chief inspector of taxes in Egypt, demanded that exemption given to the monks of Wadi 'l-Naṭrūn be withdrawn; the caliph did not accede to his wishes, and in 366/976 al-Ṭaʾiʿ announced once more that the *d̲jizya* should not apply to poor monks (see DHIMMA).

The 5th/11th century was the beginning of a period of increasing hardship for the Christian monasteries. They had to contend with successive Sald̲jūḳid and Mongol invasions, a growing insecurity (*e.g.*, Turcoman raids into Upper Mesopotamia), the worsening of relations with the Muslims at the time of the Crusades, and the progressive disappearance of former small Christian communitites.

In ʿIrāḳ the monasteries near Bag͟hdād and Samarrā perished, whilst many of those in Egypt were abandoned and became overrun by the sand (some of them have been discovered in recent excavations). After the Mongol invasion Christian monastic life was confined to a few groups of monasteries, primarily in Upper Mesopotamia, the Mosul and Mardin region (the monasteries of Ṭūr ʿAbdīn), the Sinai desert, and Egypt (at Wādī 'l-Naṭrūn and near the Red Sea). In Palestine and Syria, great monastic centres before the Arab conquest, there remained no more than a few scattered monasteries, mostly near Jerusalem and in Anti-Lebanon. In the Lebanon itself on the other hand monasticism found a new lease of life, particularly in the 15th century when the Maronite patriarchate was established in the mountains at the monastery of Ḳannūbīn.

During the age when they flourished, Christian monasteries took part in the artistic life of the region, and it is instructive to compare the decorative techniques used in some of them with Muslim works of the same period. Particularly interesting in this respect are the Dayr al-Suryānī at Wādī'l-Naṭrūn in Egypt, containing stucco ornamentation influenced by the style of Samarrā, and the Mār Behnām monastery near Mosul, some parts of which date back to the 6th/12th century. Furthermore, the illuminating of some manuscripts copied in the monasteries bears a resemblance to that of the oldest Islamic miniatures, which seem to have inherited some features of their style and workmanship.

(D. SOURDEL)

DAYR ʿABD AL-RAḤMĀN, a place in the vicinity of Kūfa, next to Ḳanāṭir Rās al-D̲jālūt (Ṭabarī, ii, 701), near Ḥammām Aʿyun (Ṭabarī, ii, 703). It was the assembly point of the Kūfan army which was sent by al-Ḥad̲jd̲jād̲j under the command of al-D̲jazl against the K͟hārid̲jites (Ṭabarī, ii, 902)

and of Ibn al-Ashʿath (Ṭabarī, ii, 930). Al-Ḥārith b. Abī Rabīʿa encamped there in his revolt against al-Mukhtār (Ṭabarī, ii, 759). (SALEH A. EL-ALI)

DAYR AL-ʿĀḲŪL, a town in ʿIrāḳ 15 parasangs (c. 83 km.) south east of Baghdād on the Tigris (Yāḳūt, ii, 676-7. Muḳaddasi, p. 134 gives the distance as two stages, while Ibn Faḍl Allāh al-ʿUmarī, *Masālik al-Abṣār*, Cairo 1924, i, 263, makes it 12 parasangs or c. 67 km.). The town probably grew around a Christian monastery, and was the centre of an agricultural district (*ṭassūdj*) in central Nahrawān.

Ibn Rusta (300/912) mentions its Friday mosque and its market, thus indicating some prosperity. Besides, it was a post where tolls on merchandise carried in boats (*maʾāṣir*) were levied. (Ibn Rusta, 186). Iṣṭakhrī (318-21/930-3) speaks of it as being similar to other towns north of Wāsiṭ, moderate in size with cultivations around (Iṣṭakhrī, 87). Half a century later, the author of *Ḥudūd al-ʿĀlam* (372/982) describes it as a prosperous town, while Muḳaddasī (ca. 375/985) considers it the most important town on the Tigris between Baghdād and Wāsiṭ. It was flourishing, well populated, and had markets with many branches at a distance from the mosque (Muḳaddasī, 123).

Dayr al-ʿĀḳūl is famous in history for the decisive battle fought there in 262/876 between Yaʿḳūb b. al-Layth al-Ṣaffār and the army of the Caliph al-Muʿtamid, led by his able brother al-Muwaffaḳ, in which the rebellious governor suffered his first serious defeat and a great danger for the Caliphate was averted (cf. Ṭabari, iii, 1893; Masʿūdī, *Murūdj*, viii, 41 ff.; Weil, *Geschichte der Chalif.*, ii, 441; Müller, *Isl.*, I, 583; Nöldeke, *Sketches* (1892), 195 ff.).

Then the town began to decline, and when Yāḳūt wrote of it, (beginning of 7th/13th century), followed verbatim by the *Marāṣid al-Iṭṭilāʿ*, the period of its prosperity was already past. The decline of the Caliphate, the ruin of the Nahrawān canal, and the alteration in the course of the Tigris largely account for that. Yāḳūt found it one Arab mile (1848 metres) east of the river; it stood alone in a desolate area. (Yāḳūt, ii, 676; *Marāṣid*, i, 435).

Maps of Arab geographers show the gradual change in its position in relation to the Tigris. Balkhī (308/920) and Iṣṭakhrī put it directly on the east bank of the Tigris. (Sousa, *al-ʿIrāḳ fi 'l-Khawāriṭ al-Ḳadīma*, Baghdād 1960, nos. 12 and 18, cf. the map of Muḳaddasī no. 23 and Djayhānī no. 27). Ibn Ḥawḳal shows the river slightly removed westward (ibid no. 22). Abū Saʿīd al-Maghribī (685/1236) puts it at a distance east of the Tigris, thus confirming Yāḳūt (ibid., map no. 32).

It seems that the town revived again, for Ḥamd Allāh Mustawfī (d. 740/1339) describes it as a big town with humid air, as it was surrounded by gardens and palm trees (*Nuzhat al-Ḳulūb*, 46). However, ʿUmarī (d. 748/1347) talks of the fine buildings of the monastery, but refers to Dayr al-ʿĀḳūl as a big village (*Masālik al-Abṣār*, i, 256-7).

Dayr al-ʿĀḳūl ultimately became utterly deserted. Its site may be identified now among the ruins called locally al-Dayr, consisting of three mounds east of the Tigris, north of modern ʿAzīziyya (see T. Hāshimī, *Mufaṣṣal Djughrāfiyat al-ʿIrāḳ*, Baghdad 1930, 529).

The name Dayr al-ʿĀḳūl, though seemingly Arabic (lit. monastery of the camel-thorn [*Alhagi Maurorum* or *Hedysarum Alhagi*]) is almost certain to be, like so many pre-Islamic names in ʿIrāḳ, of Aramaic origin. The Arabic *ʿāḳūl* reproduces the Aramaic *ākola*, 'bend'; therefore the name means 'the monastery of the bend of the river'. *Ākōla* exists elsewhere as a place name in ʿIrāḳ as the name of the suburb of Kufa, a name given on account of a well marked bend in the Euphrates as is expressly stated in Syriac sources (cf. Nöldeke, in *SBAk. Wien*, cxxiv, Abh. IX, 43).

Bibliography: References are in the article. The following are to be noted: Sumer, x, 1954, 120; Le Strange, 35; idem, in *JRAS*, 1895, 41; K. Ritter, *Erdkunde*, x, 191, 232. (A. A. DURI)

DAYR AL-AʿWAR, a place in ʿIrāḳ named after a member of the clan of Umayya b. Ḥudhāfa of the Iyād tribe (Balādhurī, *Futūḥ*, 283; Hamdānī, *Buldān*, 182; Yāḳūt, ii, 644). It is therefore an Iyādī Dayr (Hamdānī, 135, quoting al-Haytham b. ʿAdī; Bakrī, 69, quoting Ibn Shabba). Hamdānī's identification of it with Dayr al-Djamādjim, *loc. cit.*, is probably an error, since no other source confirms it.

Dayr al-Aʿwar was mentioned in the description of the march of the Sāsānian general Rustam from Ctesiphon to Ḳādisiyya following the route Kūthā Burs (ancient Bursippa)—Dayr al-Aʿwar—Milṭaṭ—Nadjaf, where he pitched his camps (Ṭabarī, i, 2254). This Dayr was also mentioned when Sulaymān b. Ṣurad, after leaving Kūfa with the Tawwābīn, chose it as the assembly point for his followers before he moved to Aḳsās Mālik and Karbala (Ṭabarī, ii, 548; Balādhurī, *Ansāb*, v, 209). It was mentioned also when Ḥamīd b. Ḳuḥṭuba moved south along the route Karbala—Dayr al-Aʿwar—ʿAbbāsiyya (Ṭabarī, iii, 15); when al-Ḥasan b. Ḳaḥṭaba followed a similar route (Ṭabarī, iii, 18); and finally when Saʿīd and Abu 'l-Buṭṭ passed through Dayr al-Aʿwar in their advance from Nīl to check Harthama's armies which were stationed in Shāhī, a village on the Surā canal.

These texts show that Dayr al-Aʿwar is located west of Burs and east of Nadjaf; it is also south of Karbala, Surā and Shāhī, and north of ʿAbbāsiyya and Nīl; they also show that it was known up to the 3rd/9th century.

The Kūfan rebel ʿUbayd Allāh b. al-Ḥurr is said to have withdrawn to Dayr al-Aʿwar after having been defeated by ʿUmar b. Ubayd Allāh at the time of Muṣʿab (Ṭabarī, ii, 775; Ibn al-Athīr, iv, 241).

Bibliography: in the text.

(SALEH A. EL-ALI)

DAYR AL-DJAMĀDJIM, a place in ʿIrāḳ, near Kūfa. It was originally owned by the Iyād tribe before its migration from ʿIrāḳ (Bakrī, 69, quoting Ibn Shabba; Hamdānī, *Buldan*, 135, quoting al-Haytham b. ʿAdī).

Various etymological explanations of its origin have been given: Abū ʿUbayda states that its name was derived from the wooden cups that were made in it (*Naḳāʾiḍ*, 412; Ibn Ḳutayba, *Maʿārif*, 156; Bakrī, *Muʿdjam*, 574; Yāḳūt, ii, 112, 652). Other authorities assert that it was named after the buried skulls of the casualties of the battle between Iyād Bahrā (al-Sharḳī, *Futūḥ*, 283; Hamdānī, *Buldān*, 182) or between Iyād and the Sāsānians (Ibn al-Kalbī, *Futūḥ*, 283; Ibn Shabba in Bakrī, 70; Masʿūdī, *Tanbīh*, 175). Yāḳūt (ii, 652) states that its name was derived from a well in a saline land.

Dayr al-Djamādjim is west of the Euphrates (Bakrī, 70, 573, quoting Ibn Shabba) on the highlands of Kūfa (Iṣfahānī in Bakrī ,573; Yāḳūt, ii, 652) near ʿAyn al-Tamr and Fallūdja [*q.v.*] (Ṭabarī, ii, 1073) and is about 7 parasangs from Kufah.

The description of the battle of Djamādjim (83/

702) shows that this Dayr is near Dayr Ķurra, nearer to Kūfa and the Euphrates (Iṣfahānī in Bakrī, 592; Yāķūt, ii, 685), i.e. south-east of Dayr Ķurra [*q.v.*].

In Islamic history Dayr al-Djamādjim is known as the battlefield of the war between al-Ḥadjdjādj and ʿAbd al-Raḥmān b. al-Ashʿath (see IBN AL-ASHʿATH) in 83/702, the latter supported by most of the Arab Kūfans as well as by some non-Arab Mawālī. The long negotiations had failed; al-Ḥadjdjādj, supported by Syrian Arab reinforcements, defeated Ibn al-Ashʿath, who retreated to Maskin, leaving al-Ḥadjdjādj the unrivalled master of Kūfa and enabling him to assert his control over that city by taking severe measures against his opponents. On the battle see Ṭabarī ,ii, 1070 ff.; Yaʿķūbī, 332; Masʿūdī, *Tanbīh*, 315, and *Murūdj*, iv, 304; Ibn Ķutayba, *Maʿārif*, 156; Abū Yūsuf, *Kharādj*, 57; Ibn al-Athīr, iv, 376 ff.

Bibliography: in the article.

(SALEH A. EL-ALI)

DAYR AL-DJĀTHALĪĶ, a name given to two monasteries in ʿIrāķ. The first stands in the district (*ṭassūdj*) of Maskin, which is watered by the Dudjayl canal. This canal flows off from the west bank of the Tigris south of Sāmarrā and takes a southward course on almost the same line as modern Dudjayl till it reaches the neighbourhood of Baghdād. Maskin is to be located about 9-10 parasangs (50-55 km.) north of Baghdād. Its ruins seem to keep their old name and are called Kharāʾib (ruins of) Maskin; they are by the west bank of the modern Dudjay some 3 km. south of Smeika village (see Sousa, *Rayy Sāmarrā*, i, 191. Abū Ṣakhar could not be the ruins of Maskin as Streck thought; it is by the old course of the Tigris; see ibid., map 6, facing 192).

The place of Dayr al-Djāthalīķ was near Maskin (cf. Balādhurī, *Ansāb*, v, 337). It seems probable that its remains are what is called "Tel al-Dayr", now some 6 km. S. E. of Smeika village. These ruins show a square building of bricks with a square courtyard higher than the neighbouring ground. (Sousa, *op. cit.*, i, 196-7).

Dayr al-Djāthalīķ owes its fame in Arab history to the decisive battle fought in its neighbourhood in 72/691 between the Caliph ʿAbd al-Malik and Muṣʿab b. al-Zubayr, governor of ʿIrāķ for his brother, the anti-Caliph, ʿAbdallāh b. al-Zubayr. The Zubayrī poet ʿAbd Allāh b. Ķays al-Ruķayyāt calls it "The Day of the *Dayr*". Muṣʿab was defeated and killed (see Balādhurī, *Ansāb*, v, 343, 350, 355; Masʿūdī, v, 246 ff.; *Aghānī*, viii, 132, x, 147, xvii, 162; Ṭabarī, ii, 806, 818, 812; Yaʿķūbī, ii, 317; Wellhausen, *Das Arab. Reich* (1902) 120-123).

A mausoleum was built on the spot where Muṣʿab was buried which soon became an object of pilgrimage. It is likely that the dome of Imām Manṣūr is the tomb of Muṣʿab (see Balādhurī, *Ansāb*, v, 337; Sousa, *op. cit.*, i, 198. Balādhurī also states (p. 350) that the place of the battle is called Khirbat Muṣʿab, a desert where—as people claim—nothing grows).

The name 'Monastery of the Catholicos' points to the fact that the head of the Nestorians stayed here at times.

The second Dayr al-Djāthalīķ was a great monastery in Western Baghdād (see M. Streck, *Die Alte Landschaft Babylonien*, i, 167; Le Strange, *Baghdād*, 210; Shābushtī, *al-Diyārāt*, ed. G. ʿAwwād, 221-224; R. Bābū Isḥāķ, *Naṣārā Baghdād*, 1960, 104-108).

Bibliography: References are mentioned in the article. The following are to be noted: Yāķūt, ii, 251, 260; *Marāṣid al-Iṭṭilāʾ*, ed. Juynboll, 1850 ff., i, 426; v, 539; Sousa, *Ray Sāmarrāʾ*, i, (Baghdād 1448), 198 ff.; M. Streck, *Die Alte Landschaft Babylonien*, ii, 190, 236; Shābushtī, *Diyārāt* (ed. G. ʿAwwād), Bagdad 1951, 221-4. (A. A. DURI)

DAYR KAʿB, an Iyādī Dayr (Balādhurī, *Futūḥ*, 283) in ʿIrāķ on the main Ctesiphon-Kūfa route which passes through Kūtha—Dayr Kaʿb—Muzāḥimiyya (near Ķissayn)—Kūfa (Ṭabarī, ii, 60; Iṣfahānī, *Maķātil al-Ṭālibiyyin*, 63). The Muslim armies, in their advance on Ctesiphon after their victory in Ķādisiyya, defeated a Sāsānian detachment under command of Nukhayridjan (*Futūḥ*, 262).

(SALEH A. EL-ALI)

DAYR ĶUNNĀ, a locality in ʿIrāķ some 90 km. south of Baghdād and a mile from the left bank of the Tigris. The name comes from a large monastery still flourishing in ʿAbbāsid times; it consisted of a church, a hundred cells, and extensive olive and palm plantations, all enclosed by thick walls. On the occasion of the feast of the Holy Cross many people flocked to the monastery. It seems that it was abandoned at the time of the Saldjūķid occupation, and geographers of the 7th/13th century record that only the ruins then remained.

Dayr Ķunnā is famous primarily on account of the families of high officials, both Christians and converts to Islam, which came from there. The best known is the Banu 'l-Djarrāḥ family, of which the viziers al-Ḥasan b. Makhlad, Muḥammad b. Dāwūd and ʿAlī b. Īsā were members. The secretaries of Dayr Ķunnā played a considerable political role in the late 3rd/9th and early 4th/10th centuries. In al-Muʿtamid's reign they sought to obtain general recognition of the Nadjrān convention which granted certain privileges to Christians, and supported the conspiracy of Ibn al-Muʿtazz (296/908). Once converted to Islam, they were devout Sunnīs, tried to restore the waning authority of the Caliphate, and were influenced by the preachings of al-Hallādj (of whose disciples at least one was from Dayr Ķunnā). But the open hostility of the pro-Shīʿī groups frustrated all efforts to restore the Sunnī caliph's authority and bring about a reconciliation between Christians and Muslims.

Bibliography: Yāķūt, ii, 687-8; Shābushtī, *K. al-Diyārāt*, Baghdād 1951, 171-6, 248-50; Bakrī, *Muʿdjam*, ed. Wüstenfeld, i, 381; ʿUmarī, *Masālik al-Abṣār*, ed. A. Zakī Pasha, 256-8; Ṭabarī, iii, 1961; Le Strange, 36-7; M. ʿAwwād. *Dayr Ķunnā*, in *Machriq*, xxxvii, 1939, 180-98; L. Massignon, in *Vivre et penser* (*Revue biblique*), IInd series, 1942, 7-14; idem, in *Dieu vivant*, iv, 1946, 18, 22; A. Fattal, *Le statut légal des non-Musulmans*, Beirut 1958, 32; D. Sourdel, *Le vizirat ʿabbāside*, Damascus 1959-60, index. (D. SOURDEL)

DAYR ĶURRA, a place named after a certain Ķurra of the Umayya b. Ḥudhāfa clan (Hamdānī, *Buldān*, 182; Yāķūt, *Muʿdjam*, ii, 685, quoting Ibn al-Kalbī) of the Iyād tribe (Balādhurī, *Futūḥ*, 283; Bakrī, 592, quoting Ibn Shabba), and is therefore to be considered as an Iyādī Dayr in origin (Hamdāni, 135, quoting al-Haytham b. ʿAdī; Bakrī, 698, quoting Ibn Shabba). Al-Iṣfahānī claims that Ķurra was a Lakhmī (Bakrī, 592; Yāķūt, ii, 685) and that the Dayr was established during al-Mundhir's reign (Bakrī, *loc. cit.*).

Dayr Ķurra was mentioned in early Islamic history as the place through which a detachment of the Sāsānian army passed in its retreat after the battle of Ķādisiyya (Ṭabarī, i, 2357) and where al-Ḥadjdjādj had encamped during the battle of

D̲j̲amād̲j̲im [see DAYR AL-D̲J̲AMĀD̲J̲IM]. This Dayr is about 7 parasangs from Kūfa; it is far from, and not on the borders of, Karbala, as A. Musil erroneously locates it in his study (*Middle Euphrates*, 411).

(SALEH A. EL-ALI)

DAYR MURRĀN, name of two former Christian monasteries in Syria. The name is of obscure origin; the Arab etymology *dayr al-murrān*, "ash-tree convent", is suspect, and Syriac does not offer a satisfactory explanation. The better known of the two monasteries was near Damascus, though its exact location cannot be determined. It was on the lower slopes of the D̲j̲abal Ḳaysūn, overlooking the orchards of the G̲h̲ūta, near the gateway of Bāb al-Farādīs and a pass (*ʿaḳaba*) where we may see in all probability the Baradā [*q.v.*] gorge. It was a large monastery, embellished with mosaics in the Umayyad era, and around it was built a village and, one presumes, a residence in which the caliphs could both entertain themselves and keep watch over their capital. Dayr Murrān often figured in poems of the time. Its estates no doubt benefited from the improvements to the river Nahr Yazīd carried out by the caliph Yazīd I. He was staying there when, before his accession, his father asked him to lead the expedition against Constantinople. Al-Walīd I died there in 96/715, and it is thought that al-Walīd II established his residence there. The ʿAbbāsid caliphs and their representatives visited or lived there on various occasions, as did Hārūn al-Ras̲h̲īd, al-Maʾmūn, who built a watch-tower on the mountainside and had a new canal dug, and al-Muʿtaṣim. Rad̲j̲a b. Ayyūb set up his headquarters there when al-Wāt̲h̲iḳ sent him to Damascus to put down the revolt of the Ḳays.

Dayr Murrān was made well-known in the 4th/10th century by the poets Abu 'l-Farad̲j̲ al-Babbag̲h̲āʾ (al-T̲h̲aʿālibī, *Yatīma*, i, 180), and Kushād̲j̲im and al-Ṣanawbarī of Aleppo. In the Ayyūbid era it was also mentioned by a geographer and by a panegyrist of Ṣalāḥ al-Dīn.

It has been incorrectly asserted by some that the tomb of the Umayyad caliph ʿUmar b. ʿAbd al-ʿAzīz was in this Dayr Murrān. It was in fact in the other monastery of the same name on a hill overlooking Kafarṭāb, near Maʿarrat al-Nuʿmān, in northern Syria. The latter was also called Dayr al-Naḳīra and Dayr Samʿān. Although it probably no longer existed in Ayyūbid times, the locality was still inhabited, and it was the home of a holy figure, the *s̲h̲ayk̲h̲* Abū Zakariyyā al-Mag̲h̲ribī. He was known to chroniclers of the 7th/13th century, and was visited by the sultan Ṣalāḥ al-Dīn in person. He was buried near the tomb of ʿUmar (J. and D. Sourdel, *Annales archéologiques de Syrie*, iii, 1953, 83-8).

(D. SOURDEL)

DAYR MŪSA, a place near Kūfa on the way to Surā (Ṭabarī, ii, 644). Al-As̲h̲ʿat̲h̲ chose it as an assembly point for his troops after ʿAlī had sent him to fight the K̲h̲ārid̲j̲ites (Ṭabarī, i, 3422-4). Al-Muk̲h̲tār reached this Dayr in his bidding farewell to Yazīd b. Anas whom he sent to occupy Mosul (Ṭabarī, ii, 644). (SALEH A. EL-ALI)

DAYR SAMʿĀN, the name of various places in Syria, often confused by writers past and present, which corresponded to the sites of Christian monasteries still flourishing during the first centuries of Islam. Among the monasteries to which the name Simeon, common in Syria, was given, were Dayr Murrān [*q.v.*] near Maʿarrat al-Nuʿmān, whose name Dayr Samʿān was also incorrectly applied to the Dayr Murrān at Damascus, and the Byzantine constructions built on hill-tops (called in every case D̲j̲abal Samʿān) in the region of Antioch. The most important of the monasteries was 40 km. north-west of Aleppo, and owed its fame to a Stylite who lived there, Simeon the Elder. In the 4th/10th century it suffered severely during the wars between Byzantines and Arabs and, later, between Fāṭimids and Ḥamdānids. By Ayyūbid times it had probably been abandoned. Nevertheless one of the most interesting archaeological sites in northern Syria today is the remains of the 'basilica of St. Simeon' together with the ruins of the extensive quarters which accommodated pilgrims (to which the modern word *dayr* refers in particular). In the Middle Ages the Muslims transformed the basilica into a fortress called Ḳalʿat Samʿān. A second monastery, situated on the road from Antioch to Suwaydiyya, commemorated the Stylite Simeon the Younger, and it is no doubt to this Dayr Samʿān that the description by Ibn Buṭlān, reproduced by Yāḳūt (ii, 672), applies.

Butler, *Ancient architecture in Syria* (*Publications of the Princeton University archaeological expeditions to Syria in 1904-1909*), Division ii, Leiden 1919. (D. SOURDEL)

DAYR AL-ZŌR, a small Syrian town, 195 m. above sea-level, on the right bank of the Euphrates. A suspension bridge 450 m. long, completed in 1931, crosses the river a short distance down-stream from the town. In 1867 it became the chief town of a *sand̲j̲aḳ* and later of a *muḥāfaẓa*, and today it has a modern aspect about it. The majority of its 22,000 inhabitants are Sunnī Muslims, and the small Christian minority comprises mainly Armenian refugees from former Turkish possessions. There are three mosques and several Orthodox and Roman Catholic churches. It is an important military centre, and also a stopping-place on the road from Aleppo and Damascus to Hasatché, Mosul and Bag̲h̲dād. It thus takes the part played in the Middle Ages by Raḥbat Mālik and Ḳarḳīsiya.

It was probably the site of the ancient town of *Auzara*, from which, via the transposition Azuara, the name Dayr al-Zōr is derived. Its meaning is now explained as "convent set in a grove", referring to the clusters of tamarisks alongside the river. We may suppose that in the immediate neighbourhood of Dayr al-Zōr lay the Dayr al-Rummān mentioned by Yāḳūt (ii, 662) between al-Raḳḳa and K̲h̲ābūr.

DAYṢĀNIYYA, Daysanites or Disanites, disciples of Bar Dīṣān, Bardesanes, Ibn Dayṣān, the celebrated syncretist heresiarch of Edessa, 154 (or 134)-201 A.D., co-disciple and contemporary of Abgar the Great. Arab authors writing of the dualists have placed him among the false prophets, between Zoroaster (Zaradu<u>sh</u>t) and Marcion (Markiyūn), after Manes (Mānī). The account of him which they give is very schematic and far from reliable. One may wonder if their knowledge of the Dayṣāniyya was confined to a chapter taken from one of the historians of the dualists, hitherto the sole source (*e.g.*, Abū ʿĪsā al-Warrāḳ). They give neither a biography of the author nor details of his descent. The doctrine attributed to him is a somewhat general dualism, regarded solely from the point of view of what may be called the physical state of being, in conformity with the constant preoccupation of Arab writers dealing with religions and sects, and which from the start envisages a theodicy. The Dayṣāniyya, taking light and darkness as the primal elements, looked upon them as the sources of good and evil respectively, with the distinction that light was active, living, perceptive and endowed with the fundamental attributes of life, knowledge and power, as against darkness which was purely passive, devoid of these attributes and endowed merely with existence. The cosmogonal drama stems from the determination of light to penetrate the darkness, by deliberate action, and so to bring about salvation. From this voluntary action it is then unable to free itself through some physical misfortune, the cause of which is not explained. Arab authors writing of the doctrine of Bar Dīṣān and his disciples differentiate between two doctrinal tendencies: some believe that in darkness there is a tendency, among the superior forms, to unite with the lower ranks of the creatures of light, who are subsequently unable to free themselves from this union; others consider the intermingling of light and darkness to be an action consciously undertaken by light, and followed by unexpected results inherent in the physical nature of darkness.

Alongside these ideas we may set those which emerge from the information invariably given by the Christian heresiologists, headed by Eusebius, Epiphanius, St. John of Damascus and the Syriac authors Theodore Bar Kouni, Elias of Nisibis, Moses Bar Kepha and St. Ephraem, and thereby may make some useful comparisons. We know that Bar Dīṣān, after receiving a pagan education, studied and reflected upon this cosmological system, influenced by the emanationist and Hermetic doctrines that were called astrology. For him, as for the rest of his contemporaries, the world was the result of the action upon beings of the influence of the spheres, exerted in succession by either the Monad or the Dyad. Persian influences, which underlie the beliefs of the region of Edessa where Bardesanes lived, are no doubt the basis of the dualist conception which, according to Arab writers, can be discovered in his natural philosophy. On the basis of the cosmological ideas provided by his education Bardesanes developed an interpretation of Christianity as it appeared to an inhabitant of Edessa who had grown up in Hierapolis in the house of a priest of the Syrian goddess, at the very time Lucian of Samosata described the ceremonies performed there (Lucian was born about 120 A.D.).

It is, no doubt, in his interpretation of Salvation that the origin must be found of the myths about the mingling of light and darkness, as given by Ibn al-Nadīm and al-<u>Sh</u>ahrastānī. The *Dialogue on the Laws on the Lands*, the principal surviving work of Bar Dīṣān—with the very remarkable text on Destiny preserved by Eusebius—allows us to understand his basic philosophy as distinguishing between the physical state of being, horologically dependent upon the stars (it is possible to find an echo of his argumentation against the belief in astrological determinism in the chapter Ibn Ḥazm devotes to refuting the astrologers, Cairo ed., iv, 24), and the moral destiny which, like the escape from darkness, results from the contradiction between the irremediably determined nature of matter and the free nature granted to man by his Creator, who made him in his own image. Moreover this God is, above all, the co-ordinator and creator of a hierarchy of beings whose original characters and affinities he has defined, and in conformity with which this world is constantly built up and destroyed. It is furthermore a world of failure—and here the Manichaean spirit is revealed—where God in his patience allows confusion and promiscuity until, after the passing of 6,000 years, he will recreate a world all whiteness, light and good.

Bardesanes' reputation as an astrologer, despite his own very clearly defined attitude, was finally fixed by St. Ephraem who fought against him in his own town of Edessa, wrote sermons against him and composed hymns which were destined to supplant those by Bardesanes. Posterity, while recognizing his attitude against Marcion, nevertheless included him in the line of Manichaeans, alongside Marcion. The Arab authors followed suit. For the Christian heresiologists his philosophy, elaborated under the influence of Valentinism, is tainted with Manichaeism.

ḌAYZAN [see AL-ḤAḌR].

DAZA [see TŪBŪ].

DEAD SEA [see BAḤR LŪṬ].

DEBDOU [see DUBDŪ].

DECCAN [see DAKHAN].

DEDE, literally "grandfather, ancestor", a term of reverence given to the heads of Darwī<u>sh</u> communities, as alternative for *ata* and *baba*. The meaning "father" is attested in <u>Gh</u>uzz as early as the *Dīwān lug<u>h</u>āt al-Turk* (compare C. Brockelmann, *Mitteltürkischer Wortschatz*, Budapest and Leipzig 1928, under *dädä*). In western Turkish heroic tales, the term is also used (again as an alternative for *ata*) for the rhapsodes, thus Ḳorḳūt Ata, or Dede Ḳorḳūt [*q.v.*]. Concerning its use preceding a proper name in ancient Anatolian, cf. Ismail Hakkı Uzunçarşılı, *Osmanlı teşkilâtına methal*, Istanbul 1941, 173 (Dede Bâli in a Germiyān deed of foundation).

Dede, following the name, is used predominantly

in Mewlewī Derwīsh circles. It is also used as a term of respect for various wonder-working holy men in Istanbul and Anatolia, as reported by Ewliyā Čelebi (cf. Ewliyā Efendi, *Travels*, translated by Hammer, i, 2, 21, 25; ii, 97, 213).

With this meaning, Dede has also entered the Persian language (*dada*, plur. *dadagān*) (compare F. Steingass, *Persian-English Dictionary*, London 1830, s.v.). In the terminology of the Ṣafawid *ṭarīḳa*, *dada* denoted one of the small group of officers in constant attendance on the *murshid* (cf. *Tadhkirat al-Mulūk*, 125, n. 4).

A. Caferoğlu; *İA*, iii, 506 (Mecdud Mansuroğlu). (Fr. Taeschner)

DEDE AGHAČ, now Alexandropolis, town on the Aegean coast of Thrace, founded in 1871, after the construction of the branch railway from the main Rumeli line. Being an outlet for the products of the hinterland it prospered rapidly, so that in 1300/1883 it supplanted Dimetoḳa as the centre of a *sandjaḳ* (*mutaṣarriflīḳ*) of the *wilāyet* of Edirne. In 1894 the *sandjaḳ* of Dede Aghač comprised the *ḳaḍā*s of Dede Aghač, Enez (Inos) and Sofrulu; the *ḳaḍā* of Dede Aghač comprised three *nāḥiye*s, Feredjik, Meghri and Semadrek, and 41 villages. This was the position until the region was lost as a result of the Balkan War of 1912-3. Two mosques were built in the town, one in the Muṣliḥ al-Dīn quarter in 1877, the other, in the Arab style, in the Ḥamīdiyye quarter in 1890, in the court-yard of which the *mutaṣarrif* Trabzonlu Hüseyn Rüshdī Pasha is buried. In 1894 there were some 1500 houses in Dede Aghač. In the village of Fere-Ilīdjalarī there were foundations of Ghāzī Ewrenos Beg [*q.v.*] and of (Ḳodja) Dāwūd Pasha [*q.v.*].

Bibliography: *Edirne Sālnāmesi* for 1310 and 1317; ʿAlī Djewād, *Memālik-i ʿOthmāniyyenin ta'rīkh we djoghrāfyā lughātī*, i, Istanbul 1313; Bādi Aḥmed, *Riyāḍ-i Belde-i Edirne*, iii (Bayezid Library, Istanbul). (M. Tayyib Gökbilgin)

DEDE ḲORḲUT, a Turkish collection of twelve tales in prose, interspersed with verse passages, the oldest surviving specimen of the Oghuz epic and one of the most remarkable monuments of the Turkish language. They are named after the sage, a legendary character, who appears in each tale; he is the poet-singer who re-composes and recites each narrative, and bestows his blessings upon all. He is strongly reminiscent of the poet-magicians of the shamanistic era. The only existing complete manuscript is in Dresden (H. O. Fleischer, *Catalogus codicum man. orientalium* ... no. 86) of which J. H. von Diez made a copy for the Berlin Library (A. Pertsch, *Die Hand. Verzeichnisse* ... vi, no. 203). The works of von Diez (*Denkwürdigkeiten von Asien*, i, Berlin-Halle 1815, 399-457) and W. Barthold (*Zapiski Vostočnago Otdeleniya, Imp. Russ. Arkh. Obshčestva*, viii, 1894, 203-218; also ix, 1895; xi, 1898; xii, 1899; xv, 1904; xix, 1910) and the first edition of the book by Kilisli Muʿallim Rifʿat (*Kitāb-ī Dede Ḳorḳut ʿalā lisān-ī ṭā'ife-i Oghūzān*, Istanbul, 1332/1916) are based on the Berlin copy. The first edition in transcription with a long historical-bibliographical introduction by Orhan Şaik Gökyay (see bibliography) also uses the Berlin copy with some emendations from the Dresden copy. In 1950 Ettore Rossi discovered a second incomplete manuscript in the Vatican Library (*Un nuovo manoscritto del "Kitāb-i Dede Qorqut"* in *RSO*, xxv (1950), 34-43), which he published in facsimile with an Italian translation of the whole work and a 95-page introductory study. In 1958 Muharrem Ergin published a new transcription of the whole text with the facsimiles of both the original manuscripts and an introduction. A promised second volume will contain an index, grammar and notes. The work also aroused interest in Ādharbaydjān (for a criticism, on ideological grounds, see *Ost-Probleme*, iii, no. 35, 1951). An edition of the text appeared in Baku in 1939, and a Russian translation, based an a manuscript left by Barthold, in 1950.

The publication of the complete text in 1916 gave great impetus to Dede Ḳorḳut studies, and since then a growing number of scholars have been occupied with elucidating many historical, literary, linguistic, ethnological and folkloristic problems of the work. Despite the remarkable contributions of the above-mentioned authors and other scholars (among them M. F. Köprülü, A. Inan, P. N. Boratav, Hamid Araslı, Walter Ruben, Faruk Sümer, M. F. Kırzıoğlu, etc.) these problems continue to be controversial and there is still disagreement as to the date, authorship, the origin of the existing text, the identity of the heroes and of the place-names, etc. As research stands at present, we can cautiously assume that these stories were collected from oral tradition and put together and polished by an unknown author, probably during the second half of the 9th/15th century. They seem to be mainly based on the reminiscences of the Oghuz Turks concerning their life in their original home in Central Asia. In the present text they relate the life of the Oghuz Turkish tribes in north-eastern Anatolia, the deeds of their prince Bayundur Khan and their chief Salur Kazan Beg, of his wife Burla Khātun, and his son Uruz and their companions, their battles against other Turkish tribes and against the Black Sea Greeks and Georgians. The effect of Islamic culture is superficial. The pre-Islamic elements have strong common characteristics, in expression, style and content, with Anatolian and Central Asian popular literature. Some of the tales (*e.g.*, Beyrek) still live in Turkish folklore in slightly altered versions, and two tales (Depegöz and Deli Dumrul) show striking resemblances to Greek legends (Cyclops and Admetus) (cf. C. S. Mundy, *Polyphemus and Tepegöz*, *BSOAS*, xviii, 1956, 279-302).

Bibliography: Detailed bibliographical data are given in the following works : Orhan Şaik Gökyay, *Dede Korkut*, Istanbul 1938; Ettore Rossi, *Il Kitab-ı Dede Qorqut*, Vatican 1952; P. N. Boratav, *Korkut Ata*, in *İA*; idem, *Dede Korkut hikâyelerindeki tarihî olaylar ve kitabın telif tarihi*, *TM*, xiii, 1958, 30-62; Muharrem Ergin, *Dede Korkut Kitabı*, i, *Giriş-Metin-Facsimile*, Ankara 1958. For a recent study of the language of the work see E. M. Demircizade, *Kitabı Dede Korkud dastanlarının dili*, Baku 1959. A German translation of the text was published by J. Hein, *Das Buch des Dede Korkut*, Zurich 1958. (Fahir İz)

DEDE SULṬĀN, epithet of a great religious fanatic by name of Bürklüdje Muṣṭafā, who was prominent in Anatolia in the time of Meḥemmed I (further information under badr al-dīn b. ḳāḍī samāwnā). (Fr. Taeschner)

DEFTER [see daftar].

DEFTER-I KHĀḲĀNĪ [see daftar-i khāḳānī].

DEFTERDĀR [see DAFTARDĀR].

DEFTER EMINI, the title given in the Ottoman Empire to the director of the Daftar-i Khāḳānī [*q.v.*].

DEHĀS, a river in northern Afghānistān, explained by Ibn Ḥawḳal, 326, as *dah-ās* "(that which drives) ten mills". It rises in the Band-i Amīr massif in the mountains of Kūh-i Bābā (Bāmiyān district), and flows in a general northerly direction through several natural lakes, past Mad(a)r and Ribāt-i Karwān, finally reaching the region of Balkh [*q.v.*]. This area, especially the southern part, is dependent on the river for its irrigation and its consequent fertility—especially Siyāhgird, on the route to Tirmidh, as well as the suburb Nawbahār. Because of its importance for Balkh, the Dehās was also called Nahr Balkh (*e.g.*, *Ḥudūd al-ʿālam*, 73, 211, no. 24); in the Middle Ages, however, this was also one name for the Āmū Daryā [*q.v.*], Today the river is called Balkh-āb. The neglect of the irrigation system in the late middle ages and in modern times has caused the once fruitful country-side to revert to marsh land, and brought about the complete decline of the Balkh region.

In ancient times the Dehās was known as Βάκτρος or Ζαριάσπης and reached as far as the Oxus (Strabo, xi, 4, 2 (516); Pauly-Wissowa, *Real-Encyclop.*, ii, 2814). Since Islamic times its waters have become dispersed in canals or in swamps.

(B. SPULER)

DEHHĀNĪ, KHODJA, Anatolian poet of the 7th/13th century, one of the earliest representatives of the *dīwān* poetry. Almost nothing is known about his life except that he came from Khurāsān and was at one time at the court of the Saldjūḳ sultan ʿAlāʾ al-Dīn Ḳayḳūbād III, for whom he wrote a Saldjūḳid *Shāhnāma* of 20,000 couplets which has not come down to us (M. F. Köprülü, *Anadolu Selçuklu Tarihinin Yerli Kaynakları*, in *Belleten*, vii, 27, 396-7). Only ten of his poems survive; they have been assembled from various *naẓīra* collections and published from 1926 onwards (see bibliography). Dehhānī, unlike his contemporaries, does not dwell on mystical or religious-didactic themes, but sings, with remarkable mastery of *ʿarūḍ* and a flowing style, worldly love, wine and other set themes of *dīwān* poets.

Bibliography: Köprülüzāde Meḥmed Fuʾād, *Khodja Dehhānī*, in *Ḥayāt*, i, 1, Ankara 1926; idem, *Selçuklu devri edebiyatı hakkında bazı notlar*, in *Ḥayāt*, iv, 103, Ankara 1928; Mecdut Mansuroğlu, *Anadolu Türkçesi*, xiii *asır*, *Dehhānī ve Manzumeleri*, Istanbul 1947.

(FAHIR İZ)

DEIR EZ-ZOR [see DAYR AL-ZŌR].

DELHEMME [see DHUʾ L-HIMMA].

DELHI, DELHI SULTANATE [see DIHLĪ, DIHLĪ SULTANATE].

DELI, Turkish adjective, meaning "mad, heedless, brave, fiery" etc. In the Ottoman empire the *deli*s were a class of cavalry formed originally in the Balkans (Rumeli, [*q.v.*]) at the end of the 9th/15th or the beginning of the 10th/16th century. Although later official usage, abandoning their true name, styled them *delīl* (guides), they continued to be popularly known by their original name until recent times.

The *deli*s were recruited partly among Turks and partly from Balkan nations such as the Bosniaks, Croats, and Serbs. At first they were private retainers in the suites of the Beylerbeyi (*Beglerbegi*, [*q.v.*]) of Rumeli and of the border beys. They were called *deli*, "mad", on account of their extraordinary courage and recklessness. The caliph ʿUmar was considered the patron of their *odjaḳ*s. Their motto was *yazīlan gelir basha*, "what is written (*i.e.*, destined) will come to pass".

The *deli*s were armed with curved scimitars, concave shields, spears, and maces (*bozdoghan*) attached to their saddles. They wore hats made of the skin of wild animals, such as hyenas or leopards, trimmed with eagles' feathers, and their shields were also decorated with such feathers. Their clothes and horsecloths were made of the skins of lions, tigers and foxes, and their breeches of wolves' or bears' skins, with the hairy side showing. Their calf-length spurred boots, pointed at the toes and high at the back, were known as *serḥaddlīḳ* or border boots. Their horses were renowned for their strength and endurance. They received a fixed salary from the Beylerbeyi or the Beys whom they served. In his *Ṭabaḳāt al-Mamālik fī Daradjāt al-Masālik*, Djelālzāde Muṣṭafā Čelebi mentions the *deli*s of the Bey of Semendere, Yaḥyā Pasha-zāde Bālī Bey, in connexion with the Mohacz expedition, and describes their clothes. In the first half of the 10th/16th century the forces of *deli*s of Yaḥyā Pasha-zāde Bālī Bey and Meḥemmed Bey and of Ghāzī Khusrew, Bey of the *sandjaḳ* of Bosnia, were famous in the Balkans; Khusrew Bey had 10,000 *deli*s in addition to his other forces.

The cavalry organization of the *deli*s spread later to Anatolia, where *deli*s were numbered among the retainers of *vezīr*s and Beylerbeyis. The clothes of *deli*s were changed in the 12th/18th century, when they were seen to wear pipe-like hats some twenty-six inches long, made of black lambskin with a turban wound round them.

Fifty to sixty *deli*s made up a company (under a standard, *bayraḳ*), groups of several companies being commanded by a *delibashī*. A new recruit was attached to the retinue of the *agha* [*q.v.*]; after learning the customs of the *odjaḳ* and proving his worth he took an oath to serve the Faith and the State and to be steadfast in battle. At the end of the ceremony, which included prayers, the recruit would then be entered as an *agha-čiraghī* (apprentice to an *agha*), a *deli*'s hat being ceremonially placed on his head. *Deli*s breaking their oath, failing to observe the rules of the *odjaḳ*, or deserting from the battlefield, were expelled and deprived of their hat. In the middle of the 11th/17th century a *deli*'s daily pay amounted to 12 or 15 aspers (*aḳčes*), according to Rycaut; Marsigli, writing at a later date, says that *deli*s were paid only while on active service.

The *deli*s served the state well in the 10th/16th and 11th/17th centuries, but later they became disorganized like the other military units. *Deli*s deprived of a patron, either through the dismissal of the *wālī* whom they served, or as a result of being paid off, wandered about in search of a new patron, raiding villages in the meantime. In the second half of the 12th/18th century their depredations were centred in the regions of Kütahya and Ḳonya. A *delibashī* by the name of Ḳodja-Bashī, who stood at the head of a numerous band, was notorious at Kütahya towards the end of the century. while the

delibashî Ismāʿīl terrorized the region of Ḳonya in 1801. In the rebellion which took place in Ḳonya in 1803 against the "new army" (*niẓām-i djedīd*), Ismāʿīl assisted the rebels and, entering Ḳonyā, shut off the *ḳāḍi* ʿAbd al-Raḥmān Pasha who had been appointed *wālī* of Ḳonya.

The riotousness of the *delis* reached its peak at the end of the 12th/18th and the beginning of the 13th/19th centuries, when they were a grave evil to the people of Anatolia. This prompted the Grand Vizier Yūsuf Ḍiyā Pasha to decide in Aleppo, on his return from the Egyptian expedition, to reorganize the *delis*. He had some of them sent to Baghdād, while those in his retinue were not demobilized but taken to Istanbul and billeted in the barracks at Üsküdar. The numerous *delis* of the factious Gurdjī (Georgian) ʿOthmān Pasha in Rumeli were also brought to Istanbul and billeted in the Dāwūd Pasha barracks. Later all the *delis* in Istanbul, amounting to 200 companies (*bayraḳs*) were sent off to Baghdād.

In 1829 after the Russian-Ottoman war, 2000 *delis* commanded by 18 *delibashîs* and one *hāyṭabashî* (leader of armed band) moved into Anatolia and, gathering in the region of Ḳonya, tried to take up brigandage again. Sultan Maḥmūd II, determined to carry through his reforms, succeeded however in eliminating them, a remnant fleeing to Egypt and Syria. Of those who stayed behind, those who disobeyed the order to settle on the land were defeated by the *wālī* of Ḳaraman Esʿad Pasha.

(İ. H. Uzunçarşılı)

DELI-ORMAN is the historical name of a district, the greater part of which lies in north-eastern Bulgaria and the remainder in southern Roumania. But as the term is a popular one, exact boundaries cannot be given. It is usually applied to the triangle, the apex of which is at the town of Rusčuk, and the two arms formed by the Danube and the Rusčuk-Varna railway, while the base is somewhat undefined and runs at a certain distance from the coast of the Black Sea. On the north-east, Deli-Orman is bounded by the Dobruja, in the south by the Bulgarian provinces of Tozluk and Gerlovo. The most important places in Deli-Orman are the towns of Balbunar, Kemanlar and Razgrad on Bulgarian territory and Akkadînlar and Kurtbunar on Roumanian.

The name Deli-Orman is of Turkish origin and means something like "wild forest, primeval forest". The country was actually at one time covered with primeval forest of which considerable stretches still survive at the present day. The wooded character of the district contrasts strongly with the flat and treeless Dobruja.

The name is also extended to the land on the left bank of the Danube, where in the Wallachian plain between the mouths of the Aluta and Vede lies a district called Teleorman (C. Jireček, *Einige Bemerkungen über die Überreste der Petschenegen und Kumanen, sowie die Völkerschaften der sogenannten Gagauzi und Surguči im heutigen Bulgarien*, in *Sitzungsber. d. K. böhmischen Gesellschaft der Wiss., Philos.-gesch. Klasse*, Year 1889, 11). According to Jireček, the name was formerly applied to the whole of the hilly forest country lying in front of the Carpathians in southern Moldavia and eastern Wallachia. Tomaschek thinks he recognizes the name Teleorman in a corrupt place-name in the Byzantine writer John Kinnamos of the 12th century. If he is right, the name Deli-Orman would be pre-Ottoman and come from an earlier North Turkish immigration.

Deli-Orman only a generation ago was still inhabited predominantly by Turks, but since the middle of the 19th century Bulgarian colonization has been steadily increasing. Nevertheless the Turks still form a considerable percentage of the population. One hears Turkish spoken everywhere, as is also the case in the provinces of Tozluk and Gerlovo adjoining on the south.

The Turks of this district form a particular type; they are remarkable for their tall stature and athletic build. Their language reveals dialectical peculiarities which are not found elsewhere in the Ottoman Turkish system but can be paralleled among the Christian Gagauz of Bessarabia. These peculiarities form the reason why they are regarded by some students as descendants of the Turkish Bulgars (K. and Ch. V. Škorpil, *Pametnici na gr. Oddessos-Varna*, Varna 1898, 4-6) and sometimes as descendants of the Kumans (V. Moškov, *Turetskiya plemena na Balkanskom poluostrově*, in *Izv. Imp. Russk. Geogr. Obshčestva*, xl, 1904, 409-17). But a strict philological analysis proves no more than that their language shows certain North Turkish features which perhaps go back to an old North Turkish stratum in the population. This stratum was however assimilated in two waves of southern Turkish elements which came later (cf. T. Kowalski, *Les Turcs et la langue turque de la Bulgarie du Nord-Est*, in *Mémoires de la Commission Orientaliste de l'Académie Polonaise des Sc. et des Lettres*, no. 16, 1933). Nevertheless it is significant that in the Balkan Peninsula the most compact mass of Turks is found not in the south-east but in the north-east, which makes very probable the hypothesis of a very early Turkish settlement in the lands south of the lower Danube. Turkish immigration in the Saldjūḳ period (6th/12th century) to the neighbouring Dobruja appears to be a historical fact (cf. F. Babinger, in *Isl.*, xi, 1921, 24).

In the Ottoman period Deli-Orman was a place of refuge for all kinds of political and religious refugees. It therefore still offers a great variety of sects. It was from here that in 819/1416 Shaykh Badr al-Dīn began his missionary career (F. Babinger, *Schejch Bedr ed-Dîn, der Sohn des Richters von Simâw*, in *Isl.*, xi, 1921, 60). At various periods different teachings, usually strongly tinged with Shīʿism, have found an asylum here. To this day there are in Deli-Orman considerable remnants of the followers of ʿAlī, who are here called ʿAlawī or Kîzîlbash (Redheads). Their headquarters seem to be the little town of Kemanlar (plural of Kemal with peculiar dissimilation of the two *l* sounds) in the vicinity of which is the famous, now disused, monastery of the Bektāshī saint Demir Baba (F. Babinger, *Das Bektaschi-Kloster Demir Baba*, in *MSOSAs.*, xxxiv, 1931; Babinger calls my attention to Ewliyā Čelebi, *Seyāḥatnāme*, v. 579, where there is a reference to Demir Baba as a disciple of Ḥādjdjī Bektāsh). There is a short poem (*nefes*) composed in honour of this sanctuary by the Bektāshī poet Derdli Kātib of Shumen (11th/17th century) in N. E. Bulgaria (Sadettin Nüzhet, *Bektaşî Şairleri*, Istanbul 1930, 55 ff.).

A remarkable feature is the wrestling bouts, apparently connected with the worship of Bektashī saints, which are the favourite amusement of the Turkish population of Deli-Orman. Indeed this little explored region is an interesting field for research not only for Turkologists but also for students of Islam.

DELVINA, former residence of an Ottoman *sandjak-bey* in Albania. In Ottoman times Delvina (so in Turkish and Albanian; Gk. Δέλβινον, Délvinon) formed a *sandjak* of the Rumelian governorship. It stands 770 ft. above sea level, about 10½ miles from the shores of the Ionian sea, and consists of one single bazar street set in the midst of olive, lemon and pomegranate trees, surmounted by the ruins of an old, perhaps Byzantine, stronghold. The inhabitants numbered about 3000 before 1940, of whom two-thirds were Muslims and the remainder Orthodox Christians, as well as a few (about 40) Jews, all of whom subsisted by cattle-breeding, fisheries, olive plantations, and retail trade. Delvina, as principal town of the *sandjak* of the same name, contains several mosques and Greek-Orthodox churches, and was formerly well fortified against the attacks of a population frequently restive under Ottoman dominion.

The history of Delvina in the Middle Ages is nebulous. In Byzantine times, probably also even earlier, it played a part of some importance, as is shown by the church of St. Nicholas (Kisha Shën Kollit bë Mesopotam) erected by the ruler Constantine IX Monomachos (1042-54)—of which some significant remains were until recently in existence; cf. Ph. Versanis, Βυζαντιακός ναός ἐν Δελβίνῳ, in Ἀρχαιολογικόν Δελτίον, i (1915), 28-41, and S. Stoupi, Μοναστήρια τοῦ Δελβίνου, in Ἠπειρωτική Ἑστία, iv (1959), 331 ff.—and likewise the imposing outworks of the castle which must have had a part to play in feudal times in Albania. An illustration of the church of St. Nicholas in its present state of conservation is to be found in *Historia e Shqipërisë*, Tirana 1959, 191, fig. 30. Since the establishment of Ottoman domination (end of the 9th/15th century) until well into the 19th century Delvina was a bulwark against the independent minded Albanians of the Himara region, who were constantly in conflict with their overlords. In the 10th/16th century Delvina was also a centre of the Khalwetī order of dervishes, which was spread in the direction of Albania about 937/1530 by one Yaʿḳūb Efendi of Yanina, to be later supplanted by the Bektāshīs. The Khalwetīs attracted a considerable following there, and some of the 12 mosques, two madrasas, and baths owed their beginnings to the adherents of this order. Yūsuf Sinān, son of the same Yaʿḳūb Efendi, has expatiated upon this point in detail in his *Menāḳib-i Sherīf* [sic] *we ṭarīḳanāme-yi pīrān we meshāyikh-i ṭarīḳat-i ʿaliyye-yi Khalwetiyye*, Istanbul 1290/1873; cf. H. J. Kissling in *ZDMG*, ciii, 1953, 264.

Delvina is depicted as a sizeable colony by Ewliyā Čelebi in the *Seyāḥatnāme*, viii, 668 ff.; it had first come into contact with the Ottomans in 835/1431-2 through the incursions of Sinān Pasha (cf. Ḥādjdjī Khalīfa, *Taḳwīm al-tawārīkh*, Istanbul 1146, 104), but was not definitely brought under subjection until 944/1537, by the Albanian Ayās Pasha [*q.v.*] in the reign of Sulaymān the Magnificent (cf. Fr. Babinger, *Rumelische Streifen*, Berlin 1938, 9 ff.). The pentagonal castle, open towards the east, in the interior of which was the residence of the fort governor, a mosque, powder-magazine, and granaries, made a deep impression on the Ottoman globe-trotter. The largest mosque of that time was the Khunkār Djāmiʿi, founded by Bāyezīd II, which has long since disappeared. Nothing has remained of all the Islamic places of worship of older times, with the exception of the mosque of Ḥadjdjī Aḥmed Agha built in 1269/1872.

In 1913 Delvina came within the newly established principality of Albania, having formerly belonged to Greece (cf. L. von Thallóczy, *Illyrisch-albanische Forschungen*, i, Munich and Leipzig 1916, 360 (Delvina in 1847), and ii, 240 (transfer to Albania); also Edith P. Stickney, *Southern Albania 1912-1923*, Stanford 1926, *passim*.

J. von Hammer, Vienna 1812, 130 (whence the misspelling "Delonia"); M. F. Thielen, *Die europäische Türkey*, Vienne 1828, 58 ff. (also "Delonia"); Fr. Babinger in Karl Baedeker, *Dalmatien und die Adria*, Leipzig 1929, 250; Delvina was seldom visited and described by travellers, but cf. W. Leake, *Travels in Northern Greece*, i, London 1835; cf. here the important statements made by Frashëri, *Ḳāmūs al-aʿlām*, iii, Istanbul 1308/1889, 2153, with detailed information on Delvina up to 1890. For the 17th century the most important source is Ewliyā Čelebi, *Seyāḥatnāme*, viii, 668 ff.; on the opposition of the Albanian population to the Ottomans at the end of the 15th century cf. Fr. Babinger, *Das Ende der Arianiten*, *SBBayr. Ak.*, phil.-hist. Kl., 1960, Fasc. 4, 19 ff., and the sources, mostly ms., there enumerated. On the Delvina basin cf. H. Louis, *Albanien. Eine Landeskunde*, Stuttgart 1927, 9 ff., esp. 102. See further ARNAWUTLUḲ.

(Fr. Babinger)

DEMİRBASH, literally iron-head, a Turkish term for the movable stock and equipment, belonging to an office, shop, farm, etc. In Ottoman usage it was commonly applied to articles belonging to the state and, more especially, to the furniture, equipment, and fittings in government offices, forming part of their permanent establishment. The word Demirbash also means stubborn or persistent, and it is usually assumed that this was the sense in which it was

applied by the Turks to King Charles XII of Sweden. It is, however, also possible that the nickname is an ironic comment on his long frequentation of Turkish government offices.

DEMIR KAPI [see DAR-I ĀHANĪN].

DEMNAT [see DAMNĀT].

DEMOKRAT PARTİ, Turkish political party, registered on 7 January 1946. In the general elections held in July of the same year, the party put up 273 candidates for 465 seats; sixty one of them were elected, forming the main opposition group. The first party congress, held on 7 January 1947, formally adopted the party programme and charter. As a result of various internal disagreements, notably the secession of a group of deputies who formed the National Party (*Millet Partisi*) in July 1948, the strength of the Democrat Party in the Assembly had fallen by 1950 to 31. Their influence in the country, however, continued to grow, and in the general election of May 1950 they won a clear majority. The *Demokrat Parti* now took over the government of the country, and remained in power for the next ten years. A series of cabinets was formed, Celâl Bayar and Adnan Menderes retaining the offices of President and Prime Minister respectively. In the general elections of 1954 the D. P. won an increased majority, but in the election of 1957 they were able to win only a popular plurality, which, however, gave them a clear parliamentary majority over a divided opposition. After a period of mounting discontents the *Demokrat Parti* was ousted from power by the revolution of 27 May 1960 (see TÜRKIYE, history). It was formally dissolved on 29 September 1960.

DEMOTIKA [see DIMETOĶA].

DENEB [see NUDJŪM].

DENIA [see DĀNIYA].

DEÑİZLİ, chief town of the *wilāyet* of the same name, in south-western Anatolia. Situated in a fertile plain which has been inhabited since the earliest times, Deñizli in the 14th century replaced Lādīķ, the ancient *Laodiceia ad Lycum*, whose ruins stand at Eski Ḥiṣār, on the Çürük Ṣu, a tributary of the Büyük Menderes, near the railway station of Gondjali, 9 km. from Deñizli. Built in the 3rd century B.C. by the Seleucid Antiochus II on the site of the ancient Diospolis (Pliny, v, 105), Laodicaea controlled an important meeting point of trade routes, and in Roman times was ranked as one of the principal towns of Phrygia (Strabo, xii, 578). Until the end of the 11th century Laodicaea was Byzantine, but it was then disputed between the Comneni and the Saldjūķid Turks who took possession of it on several occasions. Alexis I captured it from them in 491/1098 and held it temporarily (Anna Comnena, ed. Leib, iii, 27). In 513/1119, it was recaptured and fortified by John Comnenus (Cinn., 5; Nicetas, 17); although sacked in 553/1158 and 585/1189 by Turkish tribes who had settled at about that time in the district, it nevertheless remained in the hands of the Byzantines (Cinn., 198; Nicetas, 163, 523) until 602/1206, on which date Theodore Lascaris was forced to cede Laodicaea and Chonae (now Honaz) to Manuel Mavrozomes, father-in-law of Ghiyāth al-Dīn Kaykhusraw I (Nicetas, 842; Houtsma, *Rec. de textes rel. à l'hist. des Seldj.*, iii, 66-7; iv, 26). However in 655/1257 ʿIzz al-Dīn Kaykāwus II gave the town to Michael Palaeologus in order to secure his help against his brother Rukn al-Dīn and the latter's allies, the Mongols; but the little Greek garrison could no longer hold out (Acropolitus, 153-4) and two years later the town was once again in the hands of the Turcomans. It is at about this time, in eastern documents, that together with Lādīķ one first finds a mention of Ṭoñuzlu; this name was later to be changed to Deñizli, and it was to take the place of Lādīķ in the 14th century. In 659/1261 the chief Turcoman of the district, Meḥmed Beg—who must not be confused with the Ķaramānid of the same name who died in 675/1277, nor with Meḥmed Beg Aydînoghlu who died in 734/1334—rose in revolt against ʿIzz al-Dīn Kaykāwus and conquered the district; then, refusing allegiance to the Saldjūķid princes, he asked Hūlāgū for a charter of formal investiture for the towns of Ṭoñuzlu, Khōnās (Honaz) and Ṭālamānī (Dalaman). Thus the first Turcoman principality of Deñizli was founded, but it was short-lived: in 660/1262, at the request of Rukn al-Dīn, Hūlāgū marched against Meḥmed Beg who was defeated and put to death. His son-in-law ʿAlī Beg became chief of the Turcomans of the region, while the towns of Lādīķ and Khōnās were included in the possessions which were granted, in 669/1271, to the sons of the vizier Fakhr al-Dīn ʿAlī. It was, no doubt, in order to regain his independence that ʿAlī Beg took part, in 675/1277, in the revolt of Djimrī and Meḥmed the Ķaramānid; but he was defeated by the sultan's army and put to death. However, as a result of the weakness of the central authority, the Ṭoñuzlu-Lādīķ region fell into the hands of the Turcoman amīrs of Germiyān who in the last quarter of the 13th century seized the town of Kütāhya and lost no time in proclaiming their independence. According to the accounts of al-ʿUmarī and Ibn Baṭṭūṭa who visited the town in 730/1330 and 732/1332, Ṭoñuzlu and the surrounding district were at that time in the hands of an amīr of the Germiyān family, Yînandj Beg. However the town, though still prosperous, lost its value owing to the conquests of the Turcoman amīrs of Menteshe who, at the end of the 13th century, took possession of the sea-coast of Caria; Ṭoñuzlu which was disputed between the amīrs of Menteshe and the Germiyān thereby lost its position as a frontier post and could no longer remain the centre of a principality of any great importance. In 792/1390, the district of Ṭoñuzlu-Lādīķ was restored to the Ottoman empire at the same time as the amīrate of Germiyān. Temporarily given back to the Germiyān by Timūr who stayed in the town in the autumn of 1402, Ṭoñuzlu served as a residence, in the reign of Bāyezīd II, for one of his sons; it was at that time the chief town of a *liwāʾ* attached to the *eyālet* of Anatolia. In the 17th century it was reduced to the rank of *ķaḍāʾ* attached to the *sandjaķ* of Kütāhya. It was at that time that the name Ṭoñuzlu was replaced by Deñizli, under which name the town was mentioned in the accounts of Ewliyā Čelebi and Kātib Čelebi. According to these travellers, Deñizli was then divided into 24 districts and included 7 mosques; a small fort protected the bazaar, whilst the population was housed outside the town proper, in gardens and fields; this situation still remains to the present day and, despite the allegations of European travellers

in the 19th century, it is not the consequence of the terrible earthquake which struck the town in 1702, when 12,000 people perished. Although Deñizli has never managed to regain the position of importance it enjoyed in the Middle Ages, since the Republic was established it has once again become increasingly prosperous. In 1891 a railway line was built connecting Deñizli, via Gondjalî, with the Izmir-Eğridir line; Deñizli, which since the end of the 19th century had been the chief town of a *sandjaḳ* attached to the *wilāyet* of Aydîn, after the Republic became the chief town of the *wilāyet* of Deñizli. The population consisted of 19,461 inhabitants in 1940 (compared with 15,787 in 1927). Deñizli now possesses a Lycée and is a centre for agricultural products (fruit, cereals, tobacco, cotton, sesame, poppy-seed) and handicraft industries (tanning, weaving, carpet-making). The remains of the ancient towns scattered about the region (ruins of Laodicaea, Hierapolis, Hydrela, Kolossai, Chonae) also make it an important tourist centre.

DEOBAND, in the Sahāranpur district of Uttar Pradesh, is a place of great antiquity but its early history is shrouded in myth and romance. In one of the many groves which almost surrounds the site there is an ancient temple of Devī. On this account the name is supposed to be a corruption of *Devī-ban*, 'forest of the goddess'. The earliest recorded reference to it is found in the *Āʾīn-i Akbarī* where Abu 'l-Faḍl refers to a fort of 'baked bricks in Deoband'. Monuments of earlier periods are, however, found in Deoband. The Čhattā Masdjid is considered to be one of the oldest monuments of Deoband, dating back to the early Paṭhān period. According to tradition, Shaykh ʿAlāʾ al-Dīn known as *Shāh-i Djangal Bāsh*, who lies buried here, was a pupil of Ibn al-Djawzī and a disciple of Shaykh Shihāb al-Dīn Suhrawardī. Some mosques and other buildings constructed during the reigns of Sikandar Lodi (894-923/1489-1517), Akbar (963-1014/1556-1605), and Awrangzīb (1068-1118/1658-1707) are still extant.

Deoband is known to-day for its great seat of Muslim religious learning, the *Dār al-ʿUlūm*, founded by Ḥādjdjī Muḥammad ʿĀbid Ḥusayn with the support of three eminent scholars in the Education Department, and to which Mawlawī Muḥammad Ḳāsim was appointed as patron-principal in 1282/1867. During the last 90 years this institution has attained an unrivalled place amongst Muslim religious institutions. It combines the characteristics of three different types of religious institutions which existed in Dihlī, Lucknow and Khayrābād during the 13th/19th century. The institutions of Dihlī emphasized the teaching of *tafsīr* and *ḥadīth*; the institutions of Lucknow [see dār al-ʿulūm, (*c*), (*d*)] took to *fiḳh*, while Khayrabād [*q.v.*] specialized in *ʿilm al-kalām* and philosophy. Deoband represents a synthesis of these three experiments, but its main emphasis has been on the traditions established by Shāh Walī Allah and his Dihlī school of *muḥaddithīn*. It attracts students from many different parts of the Muslim world. Residential accommodation is provided for nearly 1500 students. The buildings of the *Dar al-ʿUlūm* comprise a mosque, a library, and a number of separate lecture halls for *ḥadīth, tafsīr, fiḳh* etc. Its library, though without a catalogue, is one of the biggest manuscript libraries in India. It comprises 67,000 Arabic, Persian and Urdū books, both printed and manuscript. The system of instruction is traditional and the emphasis is more on building up a religious personality than on imparting knowledge with a view to fulfilling the requirements of the modern age. The institution has, therefore, produced mainly religious leaders though its contribution in the political sphere cannot be ignored. Many of those associated with it have been in the forefront of the national struggle for freedom. The principal officers of the *Dār al-ʿUlūm* are: *Sarparast* (patron), *muhtamim* (secretary), *Ṣadr mudarris* (principal) and *Muftī*. Very eminent persons like Mawlānā Rashīd Aḥmad Ganguhī, Mawlānā Muḥammad Yaʿḳub, Mawlānā Ashraf ʿAlī, Shaykh al-Hind Maḥmūd Ḥasan, Mawlānā Anwar Shāh Kashmīrī and Sayyid Ḥusayn Aḥmad Madanī have filled these posts. The present secretary, Mawlānā Muḥammad Ṭayyib is a grandson of the founder of the institution. The *Djamīʿat ʿUlamāʾ-i Hind*, a very influential organization of the Indian *ʿUlamāʾ*, derives its main ideological strength from the *Dār al-ʿUlūm*.

DĔRADJĀT, name of a tract lying between the River Indus to the east and the Sulaymān Mountains to the west, including the modern districts of Dēra Ismāʿīl Khān and Dēra Ghāzī Khān. The name Dēradjāt is a supposed Persian plural of the Indian word *dĕra*, "tent, encampment", and means the "country of the *deras*", that is, of the three towns Dēra Ismāʿīl Khān, Dēra Ghāzī Khān, and Dēra Fatḥ Khān, founded by Balōč leaders in the early 10th/16th century. (See balōčistān). These three towns were all close to the R. Indus, and have been liable to damage by erosion; hence the modern towns show much rebuilding, especially Dēra Ismāʿīl Khān which was largely destroyed under Sikh rule. The mints of Dēradjāt and Dēra under

the Durrānī kings were at Dēra Ismāʿīl Khān and Dēra Ghāzī Khān respectively; copper coins were also struck at Dēra Fatḥ Khān. Afghāns form the most important element in the population, especially in the Dāmān or western part, and the Balōč are numerous in the south. (M. LONGWORTH DAMES*)

DERBEND, a town of Dāghistān [*q.v.*], called Bāb al-Abwāb [*q.v.*] by the Arabs in the Middle Ages. Only the modern period is described under this heading.

Having belonged to Russia from 1722 to 1735, Derbend was restored to the Persians, and Nādir Shāh attempted to restore to it its former importance; but after the death of this sovereign it passed into the hands of the Khān of Kūba, Fatḥ ʿAlī (1765). Recaptured by the Russians in 1796, it was soon evacuated, to be ultimately occupied on 21 June/3 July 1806.

Under Russian domination the town has lost its former military importance. It has, however, retained traces of its past as a fortified town, carefully preserved. Of the two walls which formerly enclosed the town and the citadel, the one most badly damaged is the south wall, now reduced to four gates and three towers, whereas the north wall, with its 8 gates and 30 towers, is still intact over almost all its length.

To the north of the town lies the Arab cemetery of Ḳïrḳlar, which dates from the 8th/14th century. The old congregational mosque constructed in 783/1381-2 out of a Christian church, several mosques of the 17th and 18th centuries, and a few very old caravanserais, remain practically intact. Remains of the old irrigation system bear witness to a very advanced technical civilization.

The economic development of the old fortified city is very remarkable. It is favoured by a well-cultivated soil (supporting vines and fruit-trees), a sub-soil rich in petroleum and natural gas, the proximity of the sea which makes it an important fishing-port, and finally the Bakū—Makhač—Ḳala railway which allows for the transport of merchandise and the multiplication of food industries which make use of the local produce.

At the beginning of this century Muslims made up about 57 per cent of the population, against 18 per cent of Russians, 16 per cent Jews, and 7 per cent Armenians. At that time there was a penetration of socialistic ideas under the influence on the one hand of the Bolshevik organizations of Tiflis and Bakū, on the other of political exiles like I. V. Maligine and some others. The first agitators at Derbend were the Russian railway workers, whose rôle became apparent in the 1905 revolution. In December 1917 Soviet power was established in the town and entrusted to the workers' and soldiers' Soviet set up in the February revolution. From July 1918 to March 1920 the town was stricken with civil war; the power was in the hands of local nationalists ranged against the Bolsheviks, who had to appeal to the Red Army to establish their authority. Since the creation of the Republic of Dāghistān, Derbend has become the capital of the district of that name, and in importance the second town of the Republic. In 1956 its population was 41,800.

DERDLİ, İBRAHIM, Turkish folk poet (1186-1261/1772-1845) born in Shahnalar, a forest village in the province of Bolu. At the death of his father, he tried his fortune in Istanbul but was soon forced to go back to his native province. He then spent ten years in Egypt and travelled extensively in Anatolia where he became one of the leading poet-singers of the period. Again in Istanbul under Maḥmūd II, he became a popular figure of the coffee-houses frequented by folk poets and wrote his famous *ḳaṣīda* on the fez, praising this newly introduced headgear, and enjoyed for a short time the favour of the court. Falling into disgrace, he left Istanbul and wandered again in Anatolia and, after an unsuccessful attempt at suicide, died in Ankara.

In his poems in *ʿarūḍ*, written in an awkward language, he is an unskilled imitator of *dīwān* poets, particularly of Fuḍūlī [*q.v.*]. His poems written in the traditional syllabic metre, though not perfect in language and style, echo in sincere tones his vagrant and nonchalant character, and reflect his endless sufferings in his chequered life.

Bibliography: *Diwān*, lithograph edition, 1329/1913; Ahmet Talât, *Aşık Derdli, Hayatı-Divanı*, Bolu 1928; M. F. Köprülü, *Türk Sazşairleri Antolojisi*, xii, Istanbul 1940; Cahit Öztelli, *Derdli ve Seyrani*, Istanbul 1953. (FAHIR İZ)

DEREBEY, 'valley lord', the Turkish name popularly given to certain rulers in Asia Minor who, from the early 12th/18th century, made themselves virtually independent of the Ottoman central government in Istanbul. The Ottoman historians usually call them *mutaghallibe*, usurpers, or, when a politer designation was needed, *Khānedān*, great families. The derebeys became in effect vassal princes, ruling over autonomous and hereditary principalities. In time of war they served, with their own contingents, in the Ottoman armies, which came to consist to a large extent of such quasi-feudal levies. Though given, as a matter of form, such titles as *muḥaṣṣil* and *mütesellim*, ostensibly as representatives of the titular governors, they were effectively independent within their own territories. Unlike the usurping pashas who had won similar autonomies in other Ottoman provinces, the Anatolian derebeys had deep local roots, and could count on powerful local loyalties. Being under no pressure, as were the pashas, to extract a quick return during a brief tenure of power, they were able to adopt more constructive policies, taking care for public security, the development of trade, and the well-being of their subjects, Muslim and non-Muslim alike. The travellers attest their good government, and the regard in which they were held by their people. The Porte found itself obliged to tolerate them and afford them some form of recognition, proceeding against them only if they openly rebelled against it. The war with Russia in 1182/1768-1188/1774 brought new opportunities, and helped to extend the derebey regimes over most of Anatolia. By the beginning of the 19th century only the *eyālet*s of Karamān and Anadolu were still under direct administration by governors sent from Istanbul. During the reign of Selīm III the derebeys reached the summit of their powers, and even began to play an important rôle in the affairs of the court and capital. Some of them, notably the Ḳara ʿOthmān-oghlu and the Čapan-oghlu, supported the reforms of Selīm III, while

their rivals the Djānīkli bitterly opposed them. While on the one hand the struggle between reformers and reactionaries in the capital was confused with the rivalries of the feudal chiefs, on the other the clash between the Čapan-oghlu and the Djānīkli in central and eastern Anatolia assumed the appearance of a quarrel over the Sultan's New Order (see NIẒĀM-I DJADĪD). Where the derebeys did apply the New Order in their territories, they seem to have done so for their own purposes and to their own profit, using goverment money to strengthen their own armed forces. (For examples of abuse and corruption in the application of the New Order by the derebeys see ʿĀṣim, i, 111-3; cf. Akçura 140, Miller 100-101).

The leading derebeys played a role of some importance in the political struggles of 1807-8, and the victory of the Bayraḳdār Muṣṭafā Pasha seemed to consecrate their power. One of his first tasks, after becoming Grand Vezir, was to convene a great imperial assembly in Istanbul, to which he invited dignitaries of various types from all over the Empire. The great derebeys from Anatolia came to Istanbul in person, with large forces of armed retainers, and seem to have played a considerable part in the proceedings. A deed of agreement (*Sened-i Ittifāḳ*) confirmed their rights, privileges, and autonomies, which were now, for the first time, officially defined and ratified (Shānīzāde, i, 66-73; Djewdet, *Taʾrīkh*[2], ix, 3-7 and 278-83; Uzunçarşılı, *Alemdar*, 138-44; Miller, 283-91. On the *Sened-i Ittifāḳ* see further A. Selçuk Özçelik in *İstanbul Üniv. Hukuk Fak. Mec.* xxiv, 1959, 1-12).

Sultan Maḥmūd II, who had thus been compelled, at the dawn of the 19th century, to recognize the privileges of a feudal baronage, was determined to end them; the 19th century provided him with the means. After the conclusion of the war with Russia in 1812, he turned his attention to the task of establishing the authority of the central government in the provinces. By a series of political, military, and police actions he overcame rebellious pashas and autonomous derebeys alike, and replaced them by appointed officials sent from Istanbul. (For the impressions of a contemporary Western observer see A. Slade, *Record of travels in Turkey, Greece etc.*, i, London 1832, 215 ff.). The work of centralization was continued under his successors; the last major military expedition was that of 1866, sent to subjugate the surviving derebey dynasties in the Čukurova district, such as the Menemendji-oghlu, the Kökülü-oghlu, and the Kozan-oghlu of Kozan (Djewdet, *Maʿrūḍāt*, in *TTEM*, 14/91, 1926, 117 ff.). Though the autonomous principalities of the derebeys had disappeared, the term derebey remained part of the Turkish political vocabulary, used to designate large-scale hereditary landlords, especially in southern and eastern Turkey, who exercised quasi-feudal rights over their peasantry (see for example the remarks of K. H. Karpat in *Social themes in contemporary Turkish literature*, *MEJ*, 1960, 34-5).

The best known Derebey families were:

1) The Ḳara ʿOthmān-oghlu of Aydîn, Manisa, and Bergama; they ruled the sandjaḳs of Saruhan and Aydîn and their influence extended from the Great Menderes river to the coast of the sea of Marmara. [See ḲARA ʿOTHMĀN-OGHLU].

2) The Čapan (Čapar, Djabbār)-oghlu of Bozok, of Turkoman origin, practically contemporary with the Ḳara ʿOthmān-oghlu. They ruled the sandjaḳs of Bozok (Yozgad), Kayseri, Amasya, Ankara, Niğde, and, at the height of their power, also controlled Tarsus. The first member of the family whose name is known was Aḥmed Pasha, the mutaṣarrif of Bozok, who was deposed by order of the Porte in 1178/1764-5. (Wāṣif, i, 233 ff., 268). He was succeeded by his son Muṣṭafā Bey, who was murdered by his body-guard in 1196/1781 (Djewdet, *Taʾrīkh*[2], ii, 171-2); he in turn was followed by his brother Sulaymān Bey, the most powerful of the Čapan-oghlu, who played a rôle of some importance during the reigns of Selīm III, Muṣṭafā IV, and Maḥmūd II. After his death in 1229/1814, his lands reverted to the direct authority of the Porte. Descendants of the family held high offices under the Sultans as governors and generals. One of them, Čapanzāde Agāh Efendi (1832-1885), played a pioneer rôle in the development of Turkish journalism (see DJARĪDA). Another led an anti-nationalist band during the War of Independence. Their name survives in a Turkish proverbial phrase, with the meaning of a hidden snag.

3) The family of ʿAlī Pasha of Djānīk, in Trebizond and its neighbourhood. The founder of the family, Djānīkli ʿAlī Pasha [*q.v.*] was succeeded by his two sons Miḳdād Aḥmed Pasha (executed in 1206/1791-2) and Ḥusayn Baṭṭāl Pasha (d. 1215/1801). After holding the offices of Kapldjî-bashî, governor of Aleppo, and governor of Damascus, Baṭṭāl Pasha became governor of Trebizond in 1202/1787-8. In 1201/1787 he led his forces against Russia, but in 1205/1790 was defeated and taken prisoner. The town of Battalpashinsk commemorates his name. After a period of disgrace, he was reappointed, thanks to Russian intercession, in 1213/1798-9. His elder son, Khayr al-Dīn Rāghib Pasha, governor of Afyūn Ḳara Ḥiṣār, was dismissed and executed in 1206/1791-2, when the independent political power of the Djānīklis ended. This family opposed the military reforms of Selīm III, which were supported by their rivals the Čapan-oghlu and the Ḳara ʿOthmān-oghlu. Ṭayyāı Maḥmūd Pasha, a younger son of Ḥusayn Baṭṭāl, was active against the reforms, and in 1805-7 was in exile in Russia. He returned to Turkey in 1807, and was appointed Ḳāʾimmaḳām to the Grand Vezir during the brief interval of reactionary rule under Muṣṭafā IV. A few months later he was dismissed and executed by Maḥmūd II.

These three were the most important derebey dynasties, and ruled in western, central, and eastern Anatolia respectively. Among lesser dynasties mention may be made of the Ilyās-oghlu of Kush Adasî (Scala Nuova, near Ephesus), who ruled the sandjaḳ of Menteshe as far south as Bodrum from about the middle of the 18th century; the Küčük ʿAlī-oghlu, who ruled in Payas and for a while Adana, and the Yîlanlî-oghlu of Isparta and Eghridir, and the region of Antalya.

Bibliography: The Ottoman chronicles pay some attention to the Derebeys, but tend to gloss over their independent status and represent them as servants of the Porte. More realistic information will be found in Western sources, notably in diplomatic and consular reports and in the writings of travellers and archaeologists. These may be supplemented, especially for names and dates, from the numerous local inscriptions. Some attention has been given to the derebeys in recent Turkish work on local history (as in the important studies of M. Çagatay Uluçay on Manisa), but the subject still awaits detailed examination.

DERGĀH [see dargāh].

DERNA [see darna].

DERSIM, area in eastern Anatolia: bordered on the north by the ranges of the Monzur Dagh (3188 m.) and the Mercan Dagh; on the west by the northern source of the Euphrates (the Kara Su); on the south by its southern source (the Murat Su); and on the east by its tributary, the Piri Su. The area is of a predominantly hilly character, and (in the country districts) inhabited by Kurds. At one time, Dersim, under the name of Čemishkezek (the capital at that time) was a *liwā* of the *eyālet* of Diyārbekir. Dersim became a *wilāyet* temporarily in the 19th century, but in 1888 it came under the *wilāyet* of Maʿmūret al-ʿazīz (Harput) as a *sandjak*, with the capital Hozat and the *kaḍā's* Ovadjık, Čemishkezek, Čarsancak, Mazgird, Pertek, Kozičan, Kīzīlkilise, and Pah. During the reorganization in the administration of the Turkish Republic, Dersim once more became a *wilāyet* under the name of Tunceli [*q.v.*].

Towards the end of the 19th century, the *sandjak* of Dersim had 63,430 inhabitants, of whom 15,460 were Sunnī Turks, 12,000 were Kurds, 27,800 Kīzīl-Bāsh (Shīʿīs), 7,560 were Gregorian and 610 Protestant Armenians.

DERVISH [see darwīsh].

DERWĪSH PASHĀ (?-1012/1603)—the historian Pečewī refers to him (ii, 132) as Derwīsh Ḥasan Pasha—was born at Mostar in the Herzegovina and, in the reign of the Ottoman Sultan Selīm II (974-982/1566-1574), entered the Palace service, where, in the course of his education, he revealed an interest and ability in literature and poetry. During the reign of Sulṭān Murād III (982-1003/1574-1595) he became one of the Imperial Falconers (*doghandjī*) and won the favour of the Sultan through the *ḳaṣīde*s and *ghazel*s which he presented to him. At the order of Murād III he rendered from Persian into Turkish verse the *Shāhnāme* of the poet Bannāʾī, giving to his work the title of *Murādnāme*. Derwīsh Agha rose to the rank of *doghandjī bashī* and, according to Pečewī (ii, 132) acted as *ḳapu ketkhudā* of the Sultan. Pečewī (*loc. cit.*) describes him as a poet of force (*shāʿir-i metīn*) and a man who, in good qualities and knowledge, could vie with the greatest of the *ʿulemā'*. It is possible that he did not go out from the Palace service until the reign of Meḥemmed III (1003-1012/1595-1603). During the long war of 1001-1015/1593-1606 between the Austrian Habsburgs and the Ottomans Derwīsh Pasha was charged with the defence of the Hungarian fortress Istoni Belgrād (Stuhlweissenburg) in 1007/1599. He was at this time Beglerbeg of Bosnia. Derwīsh Pasha, again as Beglerbeg of Bosnia, shared also in the Ottoman reconquest (1011/1602) of Istoni Belgrād, which the Imperial forces had taken in the previous year (1010/1601). He was removed from the Beglerbeglik of Bosnia in 1011/1602, the office being then given to Deli Ḥasan Pasha, hitherto one of the leaders of the Djelālī rebels in Asia Minor. Derwīsh Pasha remained on the Hungarian front and fought in the campaign of 1012/1603, but was slain in battle near Pest on 4 Ṣafar 1012/14 July 1603.

Derviş Paşa (M. Cavid Baysun). (V. J. Parry)

DERWĪSH PASHA (?-1015/1606), Ottoman Grand Vizier, was of Bosnian origin. He served in the corps of *Bostāndjī*s, becoming *ketkhudā* of the corps and then being raised, through the favour of the Wālide Sulṭān, to the office of *Bostāndjī bashī* in 1013/1604. Derwīsh Pasha was set in charge of affairs at Istanbul, when Aḥmed I visited Bursa in 1014/1605. He was made Ḳapudān Pasha, with the rank of Vizier, in Ramaḍān 1014/January 1606 and became Grand Vizier in Ṣafar 1015/June 1606. His tenure of the office was, however, brief, for the enemies whom he had made during his rapid rise to the Grand Vizierate so undermined the confidence which the Sultan reposed in him, that Aḥmed I had him executed in Shaʿbān 1015/December 1606. The Ottoman chroniclers describe Derwīsh Pasha as a harsh, unjust and incompetent man, but the English ambassador at Istanbul, Lello, took a much more favourable view of him and indeed refers to him (Lello-Burian, 27) as "the stouteste and pollitic-quest" of the Grand Viziers that he had known.

DERWĪSH MEḤMED PASHA. (c. 993?-1065/1585?-1655), Ottoman Grand Vizier, was of Čerkes (Circassian) origin. As *ketkhudā* of Ṭabānī Yassī Meḥmed Pasha, Grand Vizier (1041-6/1632-7) in the reign of Sulṭān Murād IV (1032-49/1623-40), he shared in the Eriwān campaign of 1044-5/1635 against the Ṣafawīds of Persia and became thereafter Beglerbeg of Shām, an appointment that he held, according to Ibn Djumʿa, in 1046/1636-7. At the time of Murād IV's campaign against Baghdād in 1048/1638 he was Beglerbeg of Diyārbekir, but in 1049/1639 became Beglerbeg of Baghdād, receiving soon afterwards the rank of Vizier. Derwīsh Meḥmed Pasha remained at Baghdād for three years. During the course of his subsequent career he served as Beglerbeg of Aleppo, of Anadolu, of Silistria and of Bosnia. Appointed to Silistria for the second time in 1059/1649, Derwīsh Meḥmed Pasha was given also a special assignment, *i.e.*, command over the land defences of Čanaḳ-Ḳalʿe Boghazī (the Dardanelles) with the object of driving off the naval forces of Venice, which, in the course of the Cretan War begun in 1055/1645, were then blockading the Straits—a task that he accomplished with success in Djumādā I/May 1649. There followed a second tenure of office as Beglerbeg of Anadolu in 1061/1651, at which time he was entrusted with the defence of Bursa against the threatening advance of the Djelālī rebels in Asia Minor. Derwīsh Meḥmed became *Ḳapudān Pasha* in 1062/1652 and then in Rabīʿ I 1063/March 1653 was raised to the Grand Vizierate, which he held thereafter until Dhu 'l-Ḥidjdja 1064/October 1654, when, disabled with paralysis, he was removed from office. Derwīsh Meḥmed Pasha, noted as one of the wealthiest of the great Ottoman dignitaries of his time, died on 5 Rabīʿ I 1065/13 January 1655 and was buried in the cemetery of the mosque of ʿAtīḳ ʿAlī Pasha at Čemberlitash in Istanbul.

(V. J. Parry)

DERWĪSH MEḤMED PASHA (1142-91/1730-77), Ottoman Grand Vizier, son of Yaghlīkčī ("oil-cloth merchant") Ḳadrī Agha, was born in Istanbul in 1142/1730. (References to his having been born in 1146/1733-4 are probably wrong.) Derwīsh Meḥmed Efendi entered the service of the State as assistant seal-keeper to the *defterdār* (treasurer) Behdjet Efendi. He then became *dewātdār* (secretary or steward) of Nāʾilī ʿAbdullāh Pasha, Silāḥdār ʿAlī Pasha and Saʿīd Meḥmed Pasha, in that order. Promoted *defterdār kesedārī* (treasury cashier), he became finance clerk (*māliyye tedhkiredjisi*) during the expedition of 1181/1768. On 22 Dhu 'l-Ḳaʿda 1185/26 February 1772, while the army was camped at Shumnu (Shumen), he became *defterdār* of the first division (*shiḳḳ*). Although he left that post when the army returned to Istanbul, he was re-appointed to it on 6 Ramaḍān 1188/25 November 1774. On 3 Ṣafar 1189/5 April 1775 he became steward (*kedkhudā*) to the Grand Vizier, being finally appointed Gand Vizier himself on 7 Djumāda I 1189/6 July 1775.

Having in this way come to power in the period which followed the conclusion of the treaty of Küčük Kaynardja, Derwīsh Meḥmed Pasha made use of the authority which Sultan ʿAbd al-Ḥamīd I was in the habit of granting to his Grand Viziers, to procure a pleasurable life for himself instead of trying to make good the damage suffered by the Empire during the war. The laxity of his conduct of State affairs combined with gossip about him led to his dismissal on 8 Dhu 'l-Ḳaʿda 1190/19 December 1776 and to his exile in Gallipoli. Nevertheless, he was appointed on 2 Muḥarram 1191/10 February 1777 to be *wālī* (governor) of Khanya (Canea in Crete). He fell ill, however, during his voyage out and died in Sakīz (Chios), being buried in the mosque of Ibrāhīm Pasha. Derwīsh Meḥmed Pasha was a man of quiet disposition whose services to the State were negligible. Nevertheless, he built or, at least, repaired some pious establishments in Istanbul (in the districts of Eyyūb and of Üsküdar-Scutari), in Bursa and in Egypt. The fact that some of these were *tekkes* (*tekyes*) suggests that he had *ṣūfī* sympathies.

Bibliography: Wāṣif, *Taʾrīkh* (Istanbul 1219 A.H.) ii, 197 ff.; Djewdet Pasha, *Taʾrīkh* (Istanbul 1309 A.H.), ii, 11, 24, 49 ff. 70; iv, 246; Aḥmed Djāwid, sequels to *Hadīḳat al-Wuzarāʾ* (published with latter) (Istanbul 1271) 27 ff. (*İA*)

DERWĪSH MEḤMED PASHA (1178-1253/1765-1837), Ottoman Grand Vizier, son of Rüstem Agha from Anapoli (Nauplion) in Mora (Peloponnesus). He received his training as seal-keeper (*mühürdār*) of the Grand Vizier Aḥmed Pasha, also of Peloponnesian origin, thanks to whose protection he was appointed *mīr-i mīrān* (Pasha of the second class) and *sandjaḳ-beyi*. He became later tax-collector (*muḥaṣṣil*) of the *liwā* of Ḥamīd, while in 1232/1817 he served as *mutaṣarrif* (with the rank of *wezīr* or Pasha) of Khudāwendigār, Eskishehir and Ḳodja-ili. The most influential functionary in the Empire, Ḥālet Efendi, wanted at that time to see a weak Grand Vizier and he, therefore, advised Sultan Maḥmūd II to appoint Derwīsh Meḥmed Pasha, who became Grand Vizier on 27 Ṣafar 1233/6 January 1818. During his two-year tenure of office Derwīsh Meḥmed Pasha did not succeed in imposing his authority: he was even unable to ensure the security of Istanbul, where he refrained from punishing the gang leaders, preferring instead to propitiate every one. Although this conduct was agreeable to the leading functionaries and particularly to Ḥālet Efendi, the Sultan realized the Grand Vizier's impotence, but chose to keep him for some time in order to safeguard the honour of the office. Finally on 19 Rabīʿ I 1235/5 January 1820 the Sultan

dismissed him and banished him to Gallipoli. On 11 Rabīʿ II 1236/16 January 1821 he was appointed nevertheless, governor of Damascus with additional jurisdiction over the *liwā* of Nablūs and with the additional function of *amīr al-ḥadjdj* (official responsible for the pilgrims). In this capacity he quarrelled with ʿAbdullāh Pasha, the *wālī* of Ṣaydā (Sidon), whom he besieged in Acre in accordance with the orders of the Sublime Porte. When, however, the latter was pardoned, Derwīsh Meḥmed Pasha was transferred to the *eyālet* (province) of Anatolia, where the tyrannical behaviour of his son-in-law Ḥamdī Bey led to complaints by the people of Kütahya (Cotyleaum), as a result of which Derwīsh Meḥmed Pasha was dismissed, stripped of the rank of *wezīr*, deprived of his property and exiled to Afyūn-Ḳara-Ḥiṣār, whence he was later transferred, at his own request, to Bursa. In Rabīʿ I 1253/June 1837 he was appointed *Shaykh al-Ḥaram* (governor of Medina), but died (in Ramaḍān/December of the same year) at Yanbūʿ on his way there.

A man of weak and kindly temperament, Derwīsh Meḥmed Pasha is one of the least forceful of the Ottoman Grand Viziers. Some pious works in Bursa and in Istanbul are ascribed to him.

DESTOUR [see DUSTŪR].

DEVE BOYNU, literally "camel's neck", a Turkish geographical term used to designate certain mountain passes and promontories. The most celebrated mountain pass known as Deve Boynu is that between Erzurum [*q.v.*] and Ḥasan-Ḳalʿe, which played an important part in the defence of Erzurum. The transit road leads from Trebizond (ṬARABZUN, [*q.v.*]) to Īrān, and the Erzurum-Kars railway passes through it (see F. B. Lynch, *Armenia Travels and Studies, 1898*, London 1901, ii, 194 ff.; E. Nolde, *Reise nach Innerarabien, Kurdistan und Armenien*, 1895, 260 ff.). Another pass known as Deve Boynu is situated near Göldjük and is crossed by the Elâziz-Ergani (Diyār-Bakr, [*q.v.*]) road (see Hommaire de Hell, *Voyage en Turquie*, iv, 83; E. Chaput, *Voyages d'études géologiques et géomorphogéniques en Turquie*, 193 ff.). There are other passes (between Gaziantep (ʿAyntāb, [*q.v.*]) and Besni in the Ḳaradagh mountains) and villages (*e.g.* between Elbistan and Göksu) known by that name. Other similar place-names are Deve Geçidi ("Camel Pass"), a village and valley north-west of Diyār-Bakr; Deve Çayırı ("Camel pasture"), a village west of Gürün; Deve Tepesi ("Camel hill"), a peak in the Bulgar Daghī mountains, see T. Kotschy, *Reise in den Kilik. Taurus*, 1858, 201); Develi ("connected with camels"), name of inhabited localities and a mountain. Similar place-names occur in Syria and ʿIrāḳ. In ancient Assyria Gaugamela (Aramaic Gab Gamela,) where the famous battle was fought, meant "camel's back" (Pauly-Wissowa, vii, 865, s.v. Gaugamela). Pīrī Reʾīs mentions three promontories known as Deve Boynu on the Aegean coast of Anatolia (*Kitāb-i Baḥriyye*, 140, 151, 240). Modern maps show another promontory known as Deve Boynu at the western tip of the Dadya peninsula, and there is also a Deve Boynu promontory on the southern coast of Lake Van [*q.v.*]. (BESIM DARKOT)

DEVEDJI, a Turkish word meaning cameleer, the name given to certain regiments of the corps of janissaries [see YENI ČERI], forming part of the *Djemāʿat*, and performing escort duties with the supply columns. They were also called by the Persian term *shuturbān*. The Devedjis originally formed the first five *ortas* of the *Djemāʿat* (four according to D'Ohsson), and were later augmented to include many others. They wore heron's feathers in their crests (see SORGUČ); when attending the *dīwān* they wore velvet trimmed with sable and lynx fur. Devedji officers enjoyed high precedence among the *ortas*. According to Marsigli, the captains of the first five *ortas* were always preferred to the command of garrison centres. Their chief, the Bashdevedji, ranked high in the ladder of promotion, after the Khāṣṣeki Agha and above the Yaya-bashī [*qq.v.*].

DEVELİ ḲARA ḤİṢĀR [see ḲARA ḤIṢĀR].

DEVSHIRME, verbal noun of T. *devshir-* 'to collect' (with various spellings, cf. *TTS* s.v. *derşürmek*), Ottoman term for the periodical levy of Christian children for training to fill the ranks of the Janissaries (see YENI ČERI) and to occupy posts in the Palace service and in the administration (Gr. παιδομάζωμα). The same verb is used in the earliest Ottoman sources (Giese's *Anon.* 22, l. 12 = Urudj 22, l. 4) for the 'collection' of the fifth part of prisoners from the *dār al-ḥarb* due to the Sultan as *pendjik* [*q.v.*], from whom, according to tradition, the Janissary corps was first raised in the early years of the reign of Murād I; but the date of the institution of the *devshirme* in its narrower sense of a levy of *dhimmī* children is still uncertain (Idrīs Bidlīsī's attribution of it to Orkhān is certainly anachronistic, although, having been followed by Saʿd al-Dīn and Hammer, it long enjoyed general acceptance). The earliest contemporary reference to the *devshirme* so far known appears in a sermon preached in 1395 (*i.e.*, in the reign of Bāyezīd I) by Isidore Glabas, the metropolitan of Thessalonica, lamenting the 'seizure of the children by the decree of the amīr' (Ὁμιλία περὶ τῆς ἁρπαγῆς τῶν παιδίων κατὰ το τοῦ ἀμηρᾶ ἐπίταγμα, first noticed by O. Tafrali, in *Thessalonique au XIVème siècle*, 1913, 286 f., and discussed by S. Vryonis Jr. in *Isidore Glabas and the Turkish Devshirme* in *Speculum* xxxi, 1956, 433-43); the second oldest appears in Sinān Pasha's letter, of 1430, to the inhabitants of Ioannina, promising them if they submitted exemption from πιασμὸν παιδίων (cf. K. Amantos, in Ἑλληνικά ix, 1936, 119). Bartholomaeus de Jano, in his letter written in 1438, says (Migne *Patr. Graec.* vol. 158, col. 1066): '[Murād II] *decimam puerorum partem de Christianis, quod prius numquam fecerat* (sic, not *fuerat* as in *EI*[1]), *nuper accepit* ...', which has been interpreted as indicating that it was Murād II who introduced the *devshirme*; however in the light of Isidore Glabas's reference it seems rather that Murād re-introduced it, perhaps after it had been suspended in the years of confusion following the battle of Ankara (as is

stated by ʿAṭā I 33) and as part of his re-organization of the Janissaries (Sphrantzes 92).

Although Idrīs Bidlīsī maintained, on the ground that most of the *dhimmīs* had been conquered by force (*be-ʿanwa*), that the *devshirme* was in accordance with the *sharʿ*, this argument seems not to have commended itself to Saʿd al-Dīn (cf. V. L. Ménage in *BSOAS*, xviii, 1956, 181-3), and the *devshirme* does appear in fact to have been an infringement of the rights of the *dhimmīs* (see DHIMMA). It has been suggested however that a justification of the *devshirme* might have been drawn from the Shāfiʿī doctrine that Christians converted since the Descent of the Ḳurʾān (and hence most of the rural population of the Balkans, but not the Greeks) were not entitled to the status of *dhimmī* (cf. P. Wittek, *Devshirme and Sharīʿa*, *BSOAS*, xvii, 1955, 271-8).

With certain exceptions (see below) all the Christian population of the European domains of the Empire, and later the Asiatic domains as well, was liable to the *devshirme*. In the 16th century, the *devshirme* was entrusted to a Janissary officer, usually a *yaya-bashî* (for the ranks eligible for this duty cf. I. H. Uzunçarşılı, *Kapukulu Ocakları*, i [hereafter *KkO*], 15), who went to the district where the levy was to be made, accompanied by a *kātib*, and taking with him a letter from the Agha of the Janissaries, a *berāt* of authorization, and (according to Navagero [see *Bibl.*]) a supply of uniforms. In each *ḳaḍā* criers summoned the children to gather, accompanied by their fathers and by the priests, who brought the baptismal registers. Under the supervision of the *ḳāḍī* and the *sipāhīs*, or their representatives, the officer selected the best of the children of the ages eligible. The age-limits reported in European accounts vary greatly, from as low as eight years old to as high as 20 (cf. Lybyer 48); relatively late Ottoman documents (of 1601, 1621, 1622 and 1666) prescribe the limits 15-20 (*KkO*, 95, 98; A. E. Vakalopoulos [see *Bibl.*] 286 f.). For each group of 100-150 children two registers were made, listing their names, parentage, ages and descriptions; one remained with the recruiting-officer, the other went with the *sürüdjü* ('drover') who conducted the impressed children to Istanbul (see especially documents in *KkO*, 92-7). The local *reʿāyā* were obliged to pay a special tax to meet the cost of the uniforms (*KkO*, 17 f., 22 n.).

On arriving in Istanbul the children were inspected both for their physique and for their moral qualities as revealed by the science of Physiognomy (*ḳiyāfa*, [*q.v.*]; cf. ʿĀlī, *Künh*, v, 14 f.; id., *Mevāʿidü'n-Nefāʾis*, Istanbul 1956, 21; Postel, iii, 3). The best were taken directly into the Palace service or distributed to high dignitaries; the rest were hired (for 25 *aḳčes* a head, according to Navagero [1553]: one ducat according to Busbecq; two ducats according to Ḳoči Beg) to Turks in Asia Minor, and later—already by the middle of the 16th century [Navagero, Busbecq, Chesneau]—in Rūmeli as well, to work on the land for some years, learn Turkish and assimilate Muslim ways (the term for this training period was *Türk üzerinde olmak*, cf. *KkO*, 115 ff.). The lads were called in as required to fill vacancies in the *ʿadjamī odjaḳ* (see ʿADJAMĪ OGHLAN).

In principle the *devshirme* was not applied to children of townsfolk and craftsmen, as being sophisticated and less hardy than peasant lads (*KkO*, 18, 39), though these rules were often abused: *devshirmes* were levied regularly in Athens in the middle of the 16th century (cf. the chronicle in *Ecthesis Chronica*, ed. S. Lampros, 1902, 86). As married lads were not taken, the Christian peasantry often married their children very young (Gerlach, 306). Regions which had submitted voluntarily to the Ottomans seem to have been exempt from the *devshirme* (cf. Des Hayes): certainly exemption is specified among the terms granted, for example, to Galata (cf. E. Dalleggio d'Alessio in 'Ελληνικά xi, 1939, 115-24), Rhodes (cf. Charrière, *Négociations*, i, 92; Fontanus in Lonicerus [1584 ed.] i, 423) and Chios (cf. P. Argenti, *Chius Vincta*, 1941, cxliii, 208 ff.). The inhabitants of Istanbul, perhaps as being townsfolk, were in practice not liable (Gerlach 48; and cf. the story in the *Historia Patriarchica* [Bonn ed. 167, discussed by J. H. Mordtmann in *BZ*, xxi, 1912, 129-144] that Meḥemmed II had granted them *amān*). Moldavia and Wallachia were never subject to the *devshirme* (Cantemir, 1734 ed., 38, and cf. *KkO*, 14 n., Jorga, iii, 188); the Armenians seem to have been exempt at first (Thevet, 799 b, but cf. *KkO*, 17), but were so no longer in later years (Ḳoči Beg). Freedom from the *devshirme*, temporary or permanent, was also included occasionally among the exemptions from taxes and *ʿawāriḍ* granted to various groups of *reʿāyā* in return for services rendered directly to the State, *e.g.*, miners, guardians of passes and dwellers on main roads, or to some dwellers on *waḳf*-lands (*KkO*, 109-14; Ö. L. Barkan, *Kanunlar*, 72, 85; *relazione* of Garzoni [1573] in Albèri, 3rd ser., i, 396); these exemptions were strictly checked and liable to be withdrawn (*KkO*, 97-101).

The Muslims of Bosnia were in a special position. According to a late Ottoman source (Shamʿdānī-zāde, *Marʾī al-tawārīkh*, Istanbul 1338, 454) the Christian population embraced Islam *en masse* upon the Ottoman conquest in 867/1463, but requested that their children should nevertheless be eligible for the *devshirme*. Though the Islamization of the peasantry was not in fact instantaneous (cf. B. Djurdjev, BOSNA, 1265 b above), there is a record of a recruitment of 1000 lads for the Janissaries from the Muslim population of Bosnia and Herzegovina as early as 921/1515 (Ferīdūn[2], i, 472). Here the converted Bosnians are called *Poturnāk* (cf. A. V. Soloviev, in *Byzantion*, xxiii (1953), 73-86); they are called *Potur ṭāʾifesi* in a document of 981/1573 (*KkO*, 103), and the recruited lads *Potur oghullarî* in a document of 998/1589 (*KkO*, 108), which defines them as 'circumcised but ignorant of Turkish', and which warns the beylerbey against recruiting boys who are '*Türkleshmish*', *i.e.*, Turkish-speaking. An undated list preserved in the Topkapu archives (published by R. M. Meriç in *Ist. Enst. Dergisi*, iii, 1957, 35-40) gives the names and descriptions of 60 boys (whose ages range from 13 to 19) recruited from the *ḳaḍā* of Yenipazar; the names show that 44 of them are Muslim-born and 16 Christian-born, the latter being identified both by their (new) Muslim names and by their (former) Christian names. It is said that these Muslims of Bosnia were not distributed for training, but mostly drafted straight into the Palace or into the *odjaḳ* of the *bostāndjīs*, [*q.v.*] (*KkO*, 19, referring to the *Ḳawānīn-i Yeničeriyān*, a work composed under Aḥmed I—see *Bibl.*).

Many of the European reports suggest that the *devshirme* was made at regular intervals, estimates ranging from every five years to annually (references in Zinkeisen, iii, 216 and Lybyer, 51). More probably it took place on an *ad hoc* basis according to need—infrequently in the reign of Meḥemmed II, when the Janissaries were relatively few and *pendjik* prisoners abundant (cf. Cippico [1472] in Sathas, *Docs. in-*

édits . . ., vii, 281: '*se non possono avere prigioni*' = Basle ed. 1544, ii, 51; Iacopo de Promontorio-de Campis [ca. 1480] ed. Fr. Babinger, 1957, 36: '*manchandoli* [*i.e.*, prisoners] *preda rape de figlioli de christiani subditi soi*'), then at more and more frequent intervals throughout the 16th century, until at the end of the century the ranks of the Janissaries were in effect opened to all comers; thereafter, when recruitment was no longer dependent upon the *devs͟hirme*, levies were spasmodic.

Again, many reports maintain, erroneously, that the *devs͟hirme* officials recruited a fixed proportion of children, often stated to be a 'tithe', though estimates range as high as one in five (Spandugino, Thevet) and even one in three (anon. report of 1582 in Albèri, 3rd ser., ii, 245; Palerne [also 1582]). A *fermān*, said to be of the early 16th century (*KkO*, 92 ff.) shows that—at that time, at least—the number of boys to be levied was calculated beforehand on the basis of one boy (aged 14 to 18) from every 40 households.

Reports of the numbers taken also vary greatly, Postel's being as high as 10-12,000 a year. According to Gerlach (34) a *devs͟hirme* of 1573 (documents in *KkO*, 103 ff. show that it covered both Rūmeli and Asia Minor) produced 8000 boys. Saʿd al-Dīn calculated that in the 200 years and more that it had been in force the *devs͟hirme* had produced over 200,000 converts to Islam (i, 41), *i.e.*, an average of 1000 a year, which is the figure given by S͟hamʿdānīzāde (*loc. cit.*). However, there was much abuse by the recruiting officers, who levied more children than their warrants permitted, selling the surplus for their private profit (Spandugino); they also grew rich on bribes, both from Christians who bought their children off, and from non-Christians who smuggled their children in (Gerlach, 48, 306; Roe, *Negotiations*, 534; Selānikī 263 f., referring to the *devs͟hirme* of 998/1589-90, for which cf. the documents in *KkO*, 102 f.).

When the *devs͟hirme* was extended to Asia Minor is not clear. In 1456 the Greeks of the west coast appealed to the Grand Master of Rhodes for help against the Turks 'who take (πέρνουν) our children and make Muslims of them' (Miklosisch and Müller, *Acta*, iii, 291), but this complaint may refer only to piracy. Trabzon was liable to the *devs͟hirme* at various times throughout the 10th/16th century (*KkO*, 15 n., 19); it may be that the *devs͟hirme* was extended from this (formerly Christian) district over the rest of Asia Minor. Kartal had been subject to the *devs͟hirme* before 945/1538 (*KkO*, 111 f.); the *sandjaḳ*s of Sis and Kayseri were visited shortly before 972/1564 (*KkO*, 126), and the districts of Bursa, Lefke and Iznik before 984/1576—the year in which Gerlach visited Ulubad and found it liable to the *devs͟hirme* (257). In 981/1573-4 there was an extensive *devs͟hirme* not only in Rūmeli but also in the area Begs͟hehri-Marʿas͟h and around Biledjik (*KkO*, 103-6, 127), no doubt that which, according to Gerlach (34), brought in 8000 boys in January 1574. The *devs͟hirme* reached as far as Batum in 992/1584 (*KkO*, 107), and in 1032/1623 almost the whole of Asia Minor was covered (*KkO*, 94 ff. and cf. 22 n.); in the latter year, that following the murder of Sultan ʿOt͟hmān, Greece too was visited 'to fill the seraglio' (Roe, *Negotiations*, 534).

By the beginning of the 11th/17th century, the ranks of the Janissaries had become so swollen with Muslim-born 'intruders' that frequent recruitments by *devs͟hirme* were no longer necessary. Although according to Lithgow (*Rare Adventures*, 1906, 106 and 149) the *devs͟hirme* was 'absolutely abrogated' by Aḥmed I, levies were made throughout the century, but sporadically: according to the *relazione* of Foscarini (1637) there had then been no levy for twelve years (Barozzi-Berchet, v/ii, 86). There was a *devs͟hirme* however in the next year, 1048/1638 (*Fed͟hleke*, ii, 211), and it was not, as Hammer believed (*GOR*, v, 244, and hence Zinkeisen, iv, 166), the last; for according to Rycaut (*Present State*, i, ch. 4) the Janissary leader Bektās͟h Ag͟ha demanded (in 1061/1651) that henceforth the 'yearly' collection of children should be abolished, and only the children of Janissaries be admitted 'for the service of the Grand Signior'; and Ewliyā Čelebi (i, 598) speaks of a *devs͟hirme* in Rūmeli every 7 years, when 7-8,000 boys were collected at Üsküb, brought to Istanbul, and placed directly into the various *odjaḳ*s (the preliminary training in Anatolia evidently being by now abandoned, cf. *KkO*, 24 f.). Rycaut found that in his time (he was in Istanbul from 1660) the *devs͟hirme* was 'in a great part grown out of use' (*op. cit.*, i, ch. 18) and 'wholly forgotten' (iii, ch. 8); so too Quirini (1676) reported that there had been no *devs͟hirme* since 1663 (Barozzi-Berchet, V/ii, 160, and cf. Hammer *GOR*, vii, 555), and Morosini (1680) spoke of it as taking place only every twenty years or so (*op. cit.*, 219); article 3 of the Ottoman-Polish treaty of Buczacz (1083/1672) provided that the inhabitants of Podolia would be exempt 'if a *devs͟hirme* is ordered' (Rās͟hid², i, 285), a phrase implying that the practice was by then irregular and infrequent. All the same there were *devs͟hirme*s in 1666 (Vakalopoulos, 286) and 1674 (Hammer-Purgstall, *GOR*, vi, 299), the latter at least intended only to recruit staff for the Palace. Very shortly after his accession in 1115/1703 Aḥmed III ordered that the turbulent *bostāndji*s should be enrolled in the Janissaries and 1000 *devs͟hirme* boys be collected to replace them (Rās͟hid², iii, 88 f., Hammer-Purgstall, *GOR*, vii, 91); there may be a connexion between this and an attempt to carry out a *devs͟hirme* in Greece in April 1705 (Vakalopoulos, 292). This is the latest record of a *devs͟hirme* so far known, though Uzunçarşılı has found a *berāt* of 1150/1738 exempting a Christian subject from taxes and his son from the *devs͟hirme* (*KkO*, 68 f.).

Bibliography (further to references given in the text): Zinkeisen, iii, 215-230, which is based mainly on the Venetian reports in Albèri (the most circumstantial being that of Navagero [1553], Albèri, 3rd ser., i, 48 ff.) and Gerlach's *Tagebuch*, 34, 48, 306; J. H. Mordtmann, DEWS͟HIRME in *EI*¹ (1912) and references there (most of which have been incorporated above); Ḳoči Beg, Ist. 1303, 27 f. = tr. Bernhauer, *ZDMG*, xv, 284 = Ist. 1939, 28; A. H. Lybyer, *The Government of the Ottoman Empire* . . ., 1913, 49 ff.; F. W. Hasluck, *Christianity and Islam under the Sultans*, 1929, ii, 484 ff.; W. L. Wright, *Ottoman Statecraft*, 1935, index; Barnette Miller, *The Palace School of Muhammad the Conqueror*, 1941, 74 ff., 174 f.; D. Pephanes, Τὸ Παιδομάζωμα, Athens 1948 (not seen); Gibb-Bowen, index; J. A. B. Palmer, *The Origin of the Janissaries*, in *Bull. of the John Rylands Library*, xxxv, 1953, 448-481; A. E. Vakalopoulos, Προβλήματα τῆς ἱστορίας τοῦ παιδομαζώματος, in Ἑλληνικά xiii, 1954, 274-293.

References in European travel-books etc. must be treated with caution, for authors frequently borrow without acknowledgement from their predecessors: thus the reference in Rycaut (*Present State*, i, ch. 10) to an annual *devs͟hirme* of

2000 boys mostly from the Morea and Albania derives, presumably via Withers, from Bon (Barozzi-Berchet, v/i, 77), who was writing 60 years earlier, as does that in Baudier, and the account in B. de Vigenère's *Illustrations* (1650 ed., col. 49) largely from Postel. The following references seem to be independent: Spandugino, *Petit Traicté*, ed. Schefer 1896, 102 ff., 144 f., = Sathas, *Documents inédits*, ix, 212 f., 225; J. Chesneau, *Le Voyage de M. d'Aramon*, ed. Schefer 1887, 44 f.; A. Geuffroy, *Briefve Description* (appendix to preceding) 242 f.; G. Postel, *De la république* . . ., 1560, iii, 22 ff.; A. Thevet, *Cosmographie Universelle*, 1575, 799 b, 808 b, 817 b (engraving); N. de Nicolay, *Navigations*, 1568, 79 ff.; S. Schweigger, *Neue Reysbeschreibung*, 1608, 168 ff.; Busbecq, *De Acie* . . ., 1581, 152 f. = Eng. tr. by N. Tate, 1694, 400 f.; J. Palerne, *Peregrinations*, 1606, 412 f., 502 f.; H. de Beauvau, *Relation Journalière*, 1619, 68; L. Des Hayes, *Voiage de Levant*, 1624, 137 ff.

These accounts can be controlled from the archive-material given by I. H. Uzunçarşılı in *Osmanlı Devleti teşkilâtından Kapukulu Ocakları*, i, 1943, 1-141 (this includes nearly all the documents published by Aḥmed Refīḳ in *Edebiyyāt Fakültesi Medjmūʿasi*, v, 1926, 1-14, and on it is based I. H. Uzunçarşılı's article Devşirme in *IA*); Uzunçarşılı refers frequently to a work *Ḳawānīn-i Yeničeriyān* in his private library: this seems to be identical with the work, composed under Aḥmed I, which is described in *İst. Kit. Tarih-Cografya Yazmaları Kataloglari*, i/10, 813 (MS Esad Ef. 2068) and of which MS Revan 1320 contains another copy (cf. L. Forrer in *Isl.*, xxvi, no. 62).

DEWLET [see dawla].

DEY [see dayī].

DHABĪḤA: a victim destined for immolation according to Muslim law, in fulfilment of a vow, *nadhr*, for example, or for the sacrifice of *ʿaḳīḳa*, or on the occasion of the feast of the 10th day of Dhu 'l-ḥidjdja (then called *ḍaḥiyya*), or in order to make atonement for certain transgressions committed during the *ḥadjdj* (the victim in this case being known as *hadī*).

This *dhabīḥa* must be slaughtered according to a strict ritual known as *dhakā'a*. Its form does not differ from the ritual slaughter of animals permitted as food: hence it is with this type of slaughter that we shall now concern ourselves. The differences between the various schools of law in this regard are comparatively unimportant. However, on this question, as with the rest of *fiḳh*, in order to adopt not only a theoretical but also a sociological point of view, it would be necessary to show what the actual practice on this matter has been throughout the world of Islam as whole. On this subject we shall limit ourselves to a single observation.

The matter is briefly referred to in the Ḳur'ān (v, 4, vi, 147) and dealt with at greater length in the collections of traditions and the texts of *fiḳh*.

1. What animals are proper subjects for ritual slaughter? The list does not coincide exactly with that of the animals that are permissible as food. For in the first place there are those animals which may be eaten without any necessity of ritual slaughter—grasshoppers or fish, for example (these latter, indeed, may be eaten even if found dead); in the second place there are special rules, which are not our present concern, applicable to hunting, and finally the foetus which is almost at term is permissible as food if its mother has been ritually slaughtered. On the other hand it is recommended that animals which are not lawful food should be slaughtered according to ritual in order to avoid any prolonged suffering. Nevertheless it is, in general, with a view to being able to eat the animal concerned that a ritual slaughter takes place, and this is the more so since the *dhabīḥa*, the sacrificial victim, is normally eaten. It may be remarked that a ritual slaughter makes the flesh of the animal lawful even if the animal is already sick or mortally wounded and the slaughter does no more than accelerate its end.

2. Who may perform ritual slaughter? It is lawful, although blameworthy, for the people of the Book to perform it on behalf of Muslims. On the other hand it is in no way prohibited, nor, even, is it reprehensible (contrary to a curious superstition which prevails in North Africa, for example) for a woman to kill an animal such as a chicken. (One observer has reported that at Tangier, if women are of necessity obliged to do this, they place a phallic symbol between their thighs). All those authorized to act as slaughterers must be in possession of their mental faculties.

3. How is the slaughter (*dhakā'a*) effected? Four methods of killing may be distinguished of which only the first two need concern us: the *dhabḥ*; the *naḥr* (see below); the wounding or *ʿaḳr* (which is important with regard to the theory of hunting); any other method of killing. For the *dhabīḥa* to be validly put to death and the animal concerned to be permissible as food then either the *dhabḥ* or the *naḥr* should be employed according to the circumstances. Otherwise the dead animal will be regarded as carrion (*mayta*) and therefore legally unfit for consumption except in the case of absolute necessity. At the moment of slaughter it is obligatory to have the necessary intention and to invoke the name of God. The *dhabḥ* is the normal method of slaughter, for the *naḥr* is applicable only to camels (there are some differences of opinion among the schools as to the obligatory or simply praiseworthy character of these provisions). The *dhabḥ* consists of slitting the throat, including the trachea and the oesophagus; (as for the two jugular veins there are divergencies between the schools); the head is not to be severed. Preferably the victim should be laid upon its left side facing in the direction of the *ḳibla*. As for the *naḥr*, it consists of driving the knife in by the throat without it being necessary to cut in the manner prescribed above, the camel remaining upright but at the same time facing the *ḳibla*. There are some casuistic discussions regarding the nature of the instrument to be used. More important is the fact that many provisions of *fiḳh* bear witness to an anxiety that the victims should be spared any unnecessary suffering. In particular the knife ought to be well sharpened; the practice of collective slaughtering is condemned, as too is that of cutting off part of an animal or removing its skin (except in the case of fish) before it is dead.

Bibliography: The collections of traditions contain chapters on the subject—of a greater or lesser scope—such as Bukhārī, tr. Houdas and Marçais, iv, 72; so too do all the books of *fiḳh*, usually in the context of hunting (*e.g.*, Khalīl, *Mukhtaṣar*, tr. Guidi, i, 315 ff., and tr. Bousquet, i, 85 ff.; Shīrāzī, *Tanbīh* (tr. Bousquet, i, 108 ff.)). We might also note the classical treatises of *ikhtilāf*, which have not yet been translated—for example, Ibn Rushd, *Bidāya*; Shaʿrānī, *Mīzān*,

etc.; E. Gräf, *Jagdbeute und Schlachttier im islamischen Recht*, Bonn 1959. See also ṢAYD.

DHAFĀR [see ẒAFĀR].

DHAHAB, gold, played an important part in various areas of the life of Muslim society. The main reason for the significance of the metal was its economic assets. These were referred to in the Ḳur'ān. Apart from implicitly alluding to the value aspect of gold (*Sūra* III, 85), the Ḳur'ān alludes to the attraction of 'hoarded ḳinṭārs of gold' for people (*Sūra* III, 12) and warns against hoarding since 'those who treasure up gold and silver and do not expend them in the way of Allāh' would meet with a painful punishment (*Sūra* IX, 34). The problem of gold was also discussed by Muslim jurists who determined its taxability and regulated property laws in respect of lands possessing gold deposits (cf. al-Māwardī, *Les Statuts gouvernementaux*, trad. E. Fagnan, Algiers 1915, 252-3, 426-7, 447-8).

Since gold, along with silver, constituted the basis for the official Muslim monetary system (see DĪNĀR), a sufficient supply of this metal was essential for general economic stability. This was secured by the exploitation of gold mines situated in the Muslim Empire, as well as by the influx of bullion from the adjacent countries. Although mediaeval sources refer to many mining areas (cf. D. M. Dunlop, *Sources of gold and silver in Islam according to al-Hamdani (10th Century A.D.)*, in *Stud. Isl.* viii, 1957, 29-49), the region of Wādī ʿAllaḳī was particularly famous for intensive mining activities (cf., al-Yaʿḳūbī, *Les pays*, trans. G. Wiet, Cairo 1937, 190), while that of Ghāna for the excellent quality of its ore (cf., *Description de l'Afrique septentrionale par el-Bekri*, trans. de Slane, 177). It seems that the exploitation of gold mines was not subject to the monopolistic pressure of Muslim political authorities (cf. C. H. Becker, *Islamstudien*, Leipzig 1924, i, 189; also, al-ʿUmarī, *Masālik al-Abṣār fī Mamālik al-Amṣār*, trans. Gaudefroy-Demombynes, Paris 1927, i, 58). The total volume of gold circulating in the Near East during various periods of Muslim domination can hardly be ascertained. It is nevertheless possible to infer on the basis of textual and abundant numismatic evidence that the Muslim Empire was well provided with gold. But a tremendous war expenditure connected with the operations of the Crusaders, a gradual re-establishment of European hegemony in the Mediterranean balance of trade, and a later absorption of West Sudanese gold by the Portuguese, led to a drastic draining of Near Eastern gold reserves (cf. M. Lombard, *Les bases monétaires d'une suprématie économique. L'or musulman du VIIe au XIe siècle*, in *Annales* [*Économies, Sociétés, Civilisations*], 2, 1947, 142-60; F. Braudel, *Monnaies et civilisations. De l'or du Soudan à l'argent d'Amérique*, *ibid.*, i, 1946, 9-22).

As in the pre-Islamic period, the use of gold in jewellery, ornamental crafts, in manuscript illuminations and in calligraphy, was widely practised during the Middle Ages (Aḥmad b. Mīr-Munshī, *Calligraphers and painters*, transl. V. Minorsky [*Freer Gallery of Art Occasional Papers*, vol. 3, ii], Washington, D.C., 1959). A prominent place in the goldsmithing production was held by Baghdād (cf. Cl. Cahen, *Documents relatifs à quelques techniques iraquiennes au début du onzième siècle*, in *Ars Islamica*, xv-xvi, 1951, 23-8). Gold woven robes and gold vessels, whose use was condemned by Muslim tradition, were also in demand. The fashion of collecting such luxury objects prevailed particularly during the Buwayhid regime (cf. E. Kühnel, *Die Kunst Persiens unter den Buyiden*, in *ZDMG*, 106, i, [N.F. 31], 1956, 78-92).

The natural properties of gold were studied by Muslim alchemists. Although they still accepted the theory of transmutation of metals (cf. G. Sarton, *Introduction to the history of science*, 2/ii, 1045), they were well acquainted with various chemical processes, such as cupellation, the separation of gold and silver by means of nitric acid, and the quantitative chemical analysis of gold-silver alloys (cf. E. J. Holmyard, *The makers of chemistry*, Oxford 1931, 77).

Finally, gold was used by Muslim medicine. It was considered particularly effective in diseases of the eye, melancholia, palpitation of the heart, alopecia, etc. Instruments of gold were preferably used for the piercing of holes in the ear, as well as for cauterization (cf. Ibn al-Bayṭār, ed. Leclerc, *Notices et extraits*, ii, 150-151).

AL-**DHAHABĪ** [see AḤMAD AL-MANṢŪR].

AL-**DHAHABĪ**, SHAMS AL-DĪN ABŪ ʿABD ALLĀH MUḤAMMAD B. ʿUTHMĀN B. ḲĀYMĀZ B. ʿABD ALLĀH AL-TURKUMĀNĪ AL-FĀRIḲĪ AL-DIMASHḲĪ AL-SHĀFIʿĪ, an Arab historian and theologian, was born at Damascus or at Mayyāfāriḳīn on 1 or 3 Rabīʿ II (according to al-Kutubī, in Rabīʿ I) 673/5 or 7 October 1274, and died at Damascus, according to al-Subkī and al-Suyūṭī, in the night of Sunday-Monday on 3 Dhu 'l-Ḳaʿda 748/4 February 1348, or, according to Aḥmad b. ʿIyās, in 753/1352-3. He was buried at the Bāb al-Ṣaghīr.

His Life. His main lines of study were Tradition and canon law.

He began to study Tradition at Damascus in 690/1291 or 691/1291-2 under Yūsuf al-Mizzī, ʿUmar b. Ḳawwās, Aḥmad b. Hibat Allāh b. ʿAsākir, and Yūsuf b. Aḥmad al-Ḳamūlī. He continued his studies in Tradition in several Islamic centres, especially at Cairo where he stayed longest, under the best authorities of his time. The number of his teachers is said to have surpassed 1,300, whose biographies he collected in his *Muʿdjam*. The most important of them were: at Baʿlabakk ʿAbd al-Khāliḳ b. ʿUlwān, and Zaynab bint ʿUmar b. al-Kindī; in several towns of Egypt al-Abarḳūhī, ʿĪsā b. Aḥmad al-Mu'min b. Shihāb, Abū Muḥammad al-Dimyāṭī and Abu 'l-ʿAbbās al-Ẓāhirī; at Mecca al-Tūzarī; at Ḥalab Shawḳar al-Zaynī; at Nābulus al-ʿImād b. Badrān; then at Alexandria Abu 'l-Ḥasan ʿAlī b. Aḥmad al-ʿIrāḳī and Abu 'l-Ḥasan Yaḥyā b. Aḥmad al-Ṣawwāf; and lastly at Cairo Ibn Manṣūr al-Ifrīḳī and chiefly Ibn Daḳīḳ al-ʿĪd who was well-known for his discrimination in selecting his pupils.

He studied canon law with Kamāl al-Dīn b. al-Zamlikānī, Burhān al-Dīn al-Fazārī, and Kamāl al-Dīn b. Ḳāḍī Shuhba. He was an adherent of the Shāfiʿī school.

Having obtained licence for teaching from Abū Zakariyyā b. al-Ṣayrafī, Ibn Abi 'l-Khayr, al-Ḳāsim al-Irbilī, and others, he became Professor of Tradition at the *madrasa* Umm al-Ṣāliḥ in Damascus; however, he was unable to succeed his teacher Yūsuf al-Mizzī at the *madrasa* al-Ashrafiyya of the same city because he could not subscribe to the conditions made by the founder of the institute concerning the canon law school of the Professor of Tradition.

The fields of research he mostly excelled in were Tradition, canon law, and history. He had an indefatigable energy, having been at his studies day

and night, even when he was struck by blindness which befell him, according to Abu 'l-Fidā' and ʿUmar b. al-Wardī, in 743/1342-3, or, according to others, as early as 741/1340-1. He had a great many excellent pupils, among whom we particularly mention ʿAbd al-Wahhāb al-Subkī, the author of the *Ṭabaḳāt al-Shāfiʿiyya al-Kubrā*, whose father Taḳī al-Dīn al-Subkī, the famous Shāfiʿī doctor of law, was his most intimate friend.

His many-sided qualities were acknowledged both by his contemporaries and his later biographers. By the latter he was commonly referred to as *muḥaddith al-ʿaṣr* ("traditionist of the age") and *khātam al-ḥuffāẓ* ("the seal [*i.e.*, the last] of the *ḥāfiẓs*"). Al-Kutubī praised him with select poetical phrases. According to Ṣalāḥ al-Dīn al-Ṣafadī, "he had nothing of the rigidness of the traditionists or the stupidity of the historians; on the contrary, he was a lawyer of spirit, and was at home in the opinions of people". Ibn Ḥadjar al-ʿAsḳalānī composed a beautiful *ḳaṣīda* in praise of his excellent qualities.

On the other hand, we also find opinions adverse to his reputation. His own most eminent pupil al-Subkī reproached him with reviling even his own Shāfiʿī school, in addition to the Ḥanafīs and the Ashʿarīs, and extolling the theological tendency known as al-Mudjassima. Similarly, Abu 'l-Fidā' and ʿUmar b. al-Wardī, while admitting that he was an historian and traditionist of a high rank, state that towards the end of his life, when he became blind, he compiled biographies of some of his living contemporaries which, based on the biased information of his young admirers, quite unwittingly tarnished the good reputation of certain persons.

His Work. As an author he was not as prolific as Ibn al-Djawzī before him or al-Suyūṭī after him; however, some of his works have attained a high standard in East and West alike. Like practically all the post-classical Arab authors he too was a compiler, but his works are distinguished by careful composition and constant references to his authorities. It is for these peculiarities that his works on Tradition, especially on the *ʿilm al-ridjāl*, have become very popular.

A) History. His greatest work is the *Taʾrīkh al-Islām* ("History of Islam"), printed together with his *Ṭabaḳāt al-mashāhīr wa 'l-aʿlām* at Cairo from 1367/1947-6 onwards, an extensive history of Islam, beginning with the genealogy of the Prophet Muḥammad and ending with the year 700/1300-1. It follows the system of the *Kitāb al-muntaẓam* of Ibn al-Djawzī [*q.v.*], containing both the general narrative (*al-ḥawādith al-kāʾina*) and the obituary notices of the persons who died in the several years (*al-mutawaffūn*). The whole work is divided into "classes" (*ṭabaḳāt*) of decades, so that it contains seventy "classes" altogether. In each decade first comes the general narrative, subdivided into the several years; then follow the "classes" of the obituary notices, equally subdivided into the several years, and ended by the obituary notices of persons whose exact dates of death could not be stated. The relation of the extent of the general narrative to that of the obituary notices is, on an average, 1 to 6 or 7.

The system of the general narrative of the first three centuries is entirely different from that of the last four centuries. For the first three centuries it is very short, giving only the gist of the matter and being but a concise compendium of al-Ṭabarī's [*q.v.*] chronicle; it enumerates the notable persons who died in the year concerned, then the leaders of the annual pilgrimage, and last the political events. For the last four centuries the order is quite inverted. First come the detailed annual records of political history, with constant references to the authorities consulted; then there follow those of local and administrative history, especially of Baghdād and Damascus; then the so-called "strange things" (*al-ʿadjāʾib*), *i.e.*, the curiosities and striking phenomena of the year are recorded; then comes the enumeration of the leaders of the annual pilgrimage from Baghdād and Damascus, and last the list of the names of the notabilities who died in the year concerned. The literary value of the general narrative is in its recording of events neglected by Ibn al-Athīr [*q.v.*] in his *al-Kāmil fi 'l-taʾrīkh*, such as 1) the history of the Saldjūḳs, Ayyūbids, and the Mongol invasion; 2) the internal development of Islam, especially the Bāṭinīs and the Shīʿīs; 3) Western Islam. Al-Dhahabī's tendency is, therefore, to record the development of the *whole* of Islam although his narrative is more detailed for Syria and Egypt than for other countries.

The obituary notices record the biographies of all the caliphs and minor rulers of both the Eastern and the Western Islam; then the viziers, generals, and functionaries of rank; then the jurisconsults and theologians of all the schools of canon law as well as other scholars; and last the poets, whose biographies contain numerous quotations from their works. The obituary notices in general follow the scheme of the *ṭabaḳāt*-works; they have far greater historical value than the general narrative has.

The *Taʾrīkh al-Islām* was continued by at least six hands; three of these continuations are extant: 1) from 701/1301-2 to 740/1339-40 by al-Dhahabī himself; 2) from 701/1301-2 to 786/1384-5 by ʿAbd al-Raḥīm al-ʿIrāḳī and his son Aḥmad (died in 826/1422-3), only the latter's work being extant; 3) from 701/1301-2 to 790/1388 by Ibn Ḳāḍī Shuhba (died in 851/1447-8) in his *Al-iʿlām bi-taʾrīkh al-Islām*.

Owing to the voluminous character of the *Taʾrīkh al-Islām* it was abridged many times. Six abridgments were made by al-Dhahabī himself:

1) *Kitāb duwal al-Islām* or *al-Taʾrīkh al-ṣaghīr* ("Small History"), published at Ḥaydarābād in 1337/1918-9.

2) *al-ʿIbar fī akhbār al-bashar mimman ʿabar* (*Muntakhab al-taʾrīkh al-kabīr*), an abridgment of the biographical "classes".

Whereas these two works combined give a fairly good synopsis of the whole of the *Taʾrīkh al-Islām*, the following are extractions from the biographical "classes" (*ṭabaḳas*) only.

3) *Tadhkirat al-ḥuffāẓ*, published at Ḥaydarābād in 1332-3/1914-5 in five volumes. The best known abridgment and continuation of the work was done by al-Suyūṭī [*q.v.*] under the title *Ṭabaḳāt al-ḥuffāẓ*, published by F. Wüstenfeld at Göttingen in 1833-4. Al-Suyūṭī's continuation was also published at Damascus in 1347/1928-9.

The *Tadhkirat al-ḥuffāẓ* is also the basis of the *Ṭabaḳāt al-Shāfiʿiyya* of Ibn Ḳāḍī Shuhba.

4) *al-Iṣāba fī tadjrīd asmā al-Ṣaḥāba*, an alphabetical list of Muḥammad's Companions, based chiefly on the *Usd al-ghāba* of Ibn al-Athīr, printed at Ḥaydarābād in 1315/1897-8.

5) *Ṭabaḳāt al-ḳurrāʾ al-mashhūrīn*, published in 7 parts in *al-Hidāya* (an Arabic periodical in Turkey), iv, 1331/1912-3 and ff.

6) *Siyar aʿlām al-nubalāʾ*, printed in 2 vols. at Cairo n.d.

7) *al-ʿIbar fī khabar man ʿabar*, a transcript, enlarged in some passages, of al-Dhahabī's work under the same title (see above no. 2) by Ibn Ḳāḍī Shuhba (d. 851/1447-8).

8) A similar recension of the same work by Ibn al-Shammāʿ (d. 936/1529-30), extending to 734/1333-4.

9) *al-Mukhtaṣar min Taʾrīkh al-Islām wa Ṭabaḳāt al-mashāhīr wa 'l-aʿlām*, by Ibn Ildekiz al-Muʿaẓẓamī al-ʿĀdilī al-Ayyūbī.

Two other historical works of al-Dhahabī are extant:

Mukhtaṣar li-Taʾrīkh Baghdād li 'bn al-Dubaythī, a synopsis of the history of Baghdād according to Ibn al-Dubaythī (died in 637/1239-40).

Mukhtaṣar akhbār al-naḥwiyyīn li 'bn al-Ḳifṭī, a synopsis of Ibn al-Ḳifṭī's (d. 646/1248-9) History of the Grammarians.

B) Tradition. His works of this category are nearly all of lexicographical character.

Tadhhīb Tahdhīb al-kamāl fī asmāʾ 'l-ridjāl, an improved edition of the *Tahdjīb al-kamāl fī asmāʾ 'l-ridjāl* of Ibn al-Nadjdjār (died in 643/1245-6).

al-Mushtabih fī asmāʾ 'l-ridjāl, ed. by P. de Jong at Leiden in 1881.

Mīzān al-iʿtidāl fī naḳd (or *tarādjim*) *al-ridjāl*, published at Lucknow in 1301/1883-4, at Cairo in 1325/1907-8, at Ḥaydarābād in 1329/1911-1331/1913, and the letter *hamza* only at Istanbul in 1304/1886-7. It was extracted by Ibn Ḥadjar al-ʿAsḳalāni (died in 852/1448-9) in his *Lisān al-mīzān*.

(Moh. Ben Cheneb-[J. de Somogyi])

DHAHABIYYA, Persian name of the Kubrāwiyya [*q.v.*] order. See also Ṭarīḳa.

DHAHRAN [see Ẓahrān].

ḌHĀKĀ (Dacca) — (literally 'concealed', but origin obscure) is the capital of East Pakistan. The city is situated at the head of the waterways about a hundred miles from the sea, in a region which has had throughout history a premier position in this province of rivers and flooded plains. The Hindū capital was at Vikramapura, then favourably situated on the Dhaleshwarī river, where the line of old fortification can still be seen, but more important are the tomb and mosque (built 888/1483) of Bābā Ādam Shahīd, a pioneer Muslim saint. Sonārgāon on the Meghnā river was the early Muslim capital, which was famous for the seminary of Shaykh Sharf al-Dīn Abū Tawwāma, a Ḥanafī jurist and traditionist of great renown in the 7th/13th century, for the lively court maintained by the romantic Sulṭān Ghiyāth al-Dīn Aʿẓam Shāh in the late 8th/14th century, and for the fine muslin industry through the period. The place is full of ruined tombs, mosques and inscriptions, the most famous being the tomb of Aʿẓam Shāh and the remains of the Khānḳāh of Shaykh Muḥammad Yūsuf, who emigrated from Persia in the 8th/15th century. Later the local rebel chief ʿĪsā Khān made Sonārgāon and its neighbourhood his headquarters, but the town was destroyed in 1017/1608 by the Mughal soldiery under Shaykh Islām Khān Čishtī. The temporary Mughal camp, which was located in the old Thānā of Ḍhākābāzū, came to be developed as the new Mughal capital of the *ṣūba* of Bengal under the name of Djahāngīrnagar, after the reigning Mughal emperor Djahāngīr.

The capital city stood on the northern bank of the Burigangā, the river Dulāy of the Muslim historians, about eight miles above its confluence with the Dhaleshwarī and far away from the recurring floods. It was well protected against the raids of the Arakanese Maghs and the Portuguese pirates in the 11th/17th century by a system of river fortresses, which still survive at Munshīgandj, Narāyangandj and Sonakanda. The Mughal city spread out beyond the Hindū localities, well-laid with gardens, palaces, markets, mosques and minarets, which are all associated with the names of the Mughal officers. Of the princely governors Shāh Shudjāʿ, the ill-fated brother of the Mughal emperor Awrangzīb, and Muḥammad Aʿẓam, the latter's son, had a great reputation in Eastern India. From their time have been inherited the Baṛā Katrā (the great market quadrangle), the ʿĪdgāh and the fort of Awrangābād, commonly called Lāl Bāgh, the last still showing its terraced walls, bastions, gateways, a mosque and a beautiful mausoleum (partly in marble) of Bībī Parī, one of the wives of Muḥammad Aʿẓam. Of the other governors Mīr Djumlā is better known for his conquest of Assam, and Shāyista Khān for his twenty-five years' service in Bengal, his final conquest of Čaṭgāon in 1076/1666, his lavishly kept harem, and above all the numerous mosques and mausolea built by him in the provincial Mughal style, wrongly called by the people the Shāyistā Khānī style of architecture. Though the Mughal seat of government was transferred to Murshīdābād in 1118/1706, Dacca never lost its importance. It remained the centre of the flourishing muslin industry and many other luxury arts of the East, which attracted the foreign merchants, and as early as the middle of the 17th century we find here factories being established by the Dutch, French and British.

With the introduction of British rule and the growing importance of the city of Calcutta, Dacca lost its premier place in Bengal. In 1905 it was again made the capital of the newly created province of Eastern Bengal and Assam—an administrative measure to favour the Muslims which was annulled because of the growing opposition from Hindū nationalists. In 1906 Dacca witnessed the foundation of the All India Muslim League with the object of protecting the rights of the Muslims of the subcontinent. Many of the red-faced buildings of the newly-developed Ramna in Dacca were built at this time. In 1921 the University of Dacca was founded mainly to meet the demands of the local Muslims. It became a centre of both education and political training for the rising talents of Muslim Bengal. Today Dacca (population 432,853 in 1951) is the second capital of Pakistan and is fast growing

into a modern city with its industrial suburban town of Narāyangandj. The old Mughal city still survives with its numerous mosques and mausolea, but its lanes and by-lanes are being broadened, in line with the new developments in the city. Dacca shares fully in the rebirth of the Muslims of Pakistan.

DHĀKIR, Kāṣim Bey, the foremost Ādharbāydjānī poet and satirist in the first half of the 19th century. He was born probably in 1786, at Penāhābād in the Khānate of Ḳarabāgh (now Shūsha, Nagorno-Karabakhskaya Avtonom. Oblast). He belonged to the clan of Djawānshīr, a renowned family of *beys*.

In his satirical poetry he relentlessly castigated the religious fanaticism of the Mollās as well as corruption and all kinds of abuses by the *beyzāde*—the local aristocracy—and the Czarist administration officials. His criticism of the latter resulted in his being persecuted by the governor of Ḳarabāgh, Prince Konstantin Tarkhanov, who took advantage of illegal actions in which a nephew of the poet was involved, to have him deported to Baku for some time. Upon the intervention of his friends he was allowed to return to his family estate, where he spent most of his lifetime.

There have been preserved and partly published (see M. A. Resulzade in the bibliography to this article) a number of complaints and appeals for help (*shikāyat-nāma*) which Dhākir addressed, in brilliant verse, to influential fellow-countrymen such as Mīrzā Fatḥ ʿAlī Akhund-zāda [*q.v.*] and the first Ādharbāydjānī novelist Ismāʿīl Bey Ḳutḳashīnlī (who had risen to the rank of general in the Russian army). His much esteemed style was obviously influenced by the great 18th century poet Mollā Panāh Wāḳīf (1717-97). Like his predecessor, he preferred the simple, popular lyric forms applied by the *ʿāshiḳ* folk literature, such as "*Ḳoshma*" and "*Kerayli*", but he also wrote a number of poems in Persian and in traditional metric forms, as well as some pieces in rhymed prose (*e.g.*, *Darwīsh we ḳīz*). His fables in verse (*Tülkü we shīr*, *ḳurd*, *čaḳḳal we shīr*, *Tülkü we ḳurd* etc.) follow the widespread oriental tradition set by the "*Kalila and Dimna*", but may be also influenced by Krilov's (1768-1844) genial adaptations. In his works a number of Russian words—mostly taken from the terminology of administration and selected to suit his satirical purpose—made their first appearance in Ādharī Turkish.

The first publications of poetry by Dhākir seem to have appeared in 1854 (in the official Tiflis newspaper *Kavkaz*) and 1856 (within an anthology published in Temir-Khān Shūra —now Buinaksk, Dāghistān—by Mīrzā Yūsuf Nersesov Ḳarabāghī).

Although there is reason to believe that Ākhund-zāda had planned a complete edition of Dhākir's works after the latter's death in 1857, no such edition was printed in the pre-Soviet era.

The manuscripts of Dhākir's *dīwān* are kept in the fund of the Academy of Sciences of the Ādharbāydjān SSR (Niẓāmī-Institute of Literature, inventory no. 15).

DHĀL, 9th letter of the Arabic alphabet, here transcribed *dh*; numerical value 700, in the Eastern system [see abdjad].

Definition: voiced interdental fricative; according to the Arabic grammatical tradition: *rikhwa madjhūra*. For the *makhradj*: *lithawiyya* in al-Khalīl (al-Zamakhsharī, *Muf.*, 191, line 2, 2nd ed. J. P. Broch) indicates a position of the tongue on the *litha* "gum", therefore *gingival*. Ibn Yaʿīsh (1460, line 21, ed. G. Jahn) records a position quite close to this, "the base of the central incisors", and therefore *alveolar*. Sībawayh (ii, 453, line 14, ed. Paris), much more widely accepted (*e.g.* Ibn Djinnī, *Sirr ṣināʿa*, i, 53, line 3), indicates an inter dental properly speaking "from between the tip of the tongue and the tips of the central incisors".

Dh is the continuation in classical Arabic of a similar (or analogous) articulation in common Semitic (see S. Moscati, *Sistema*, 28-29); retained in epigraphic South Arabic, in Mehri, Shkhawri, and partly in Ugaritic; represented by *z* in Akkadian, Hebrew-Phoenician, Ethiopian (ancient and modern), by *d* in Aramaic and in Soḳoṭri. In modern Arabic dialects the following principle can be stated: interdental fricatives are preserved unchanged in the speech of nomads or former nomads; they have changed into the corresponding occlusives in the speech of settled populations. Following this principle we shall find *dh* or *d*; for the details and the nuances see J. Cantineau, *Cours*, 50-54. In classical Arabic *dh* is subject to numerous conditioned corruptions (assimilations), see *ibid.*, 47-49.

For the phonological oppositions of the phoneme *dh* see J. Cantineau, *Esquisse*, *BSL* (no. 126) 96 5°; for the incompatibilities, see *ibid.*, 134.

Bibliography: in the text and under ḥurūf al-hidjā'. (H. Fleisch)

2. In Persian, and in Urdū which largely depends on Persian practice, *dhāl* is not distinguished in pronunciation from *ze*, *ḍād* and *ẓā'*. Its use in the writing systems of these languages is not, however, confined to borrowings of Arabic words with *dhāl*, for it occurs in words of certain Iranian origin.

Most cases of the occurrence of *dhāl* in Persian words arise since modern Persian represents a κοινή: in some Middle Iranian dialects post-vocalic *d* developed a spirant pronunciation, and is in fact shown fairly consistently as *dhāl* in the oldest Modern Persian mss, while in others the occlusive pronunciation persisted. The confusion between the dialects, and their mutual influence, has led to the general reintroduction of *dāl*, in spelling and pronunciation, for post-vocalic *d*, although cases of the spirant pronunciation, later > *z*, have resulted in the occasional retention of *dhāl* in some words.

The few cases of variation between *dāl* and *dhāl* in Indian languages are the legacy of borrowings from Persian at different periods; thus Urdū

kāghadh (pron. *kāghaz*), 'paper', appears in early 16th century Hindī texts as *kāgad*, also in Marāṭhī, Dakhnī Urdū, and in the Dravidian languages Kannaḍa and Telugu (*kāgad*ᵘ); similar variations in *gunbadh*: *gunbad*, 'dome' (Kann. *gumbad*ᵘ).

(J. Burton-Page)

DHAMĀR (or Dhimār, see Yāḳūt s.v.), a district (*mikhlāf*) and town in South Arabia, south of Ṣanʿā, on the Ṣanʿā-ʿAdan road, near the fortress of Hirrān. The district of Dhamār was very fertile and had rich cornfields, splendid gardens, and many ancient citadels and palaces. On account of its fertility it was called the Miṣr of Yaman. The horses of Dhamār were famed throughout Yaman for their noble pedigree.

Amongst places which are mentioned as belonging to the district of Dhamār are the following: Aḍraʿa, Balad ʿAns, Baraddūn, al-Darb, Dalān and Dhamūrān (the women of these two places had the reputation of being the most beautiful in all South Arabia), Dhū Djuzub, al-Talbūʿ, al-Tunan, Thamar, Rakhama (Hamdānī mentions a Rudjma), al-Samʿāniyya, Sanabān, Shawkān, al-ʿAdjala, al-ʿAshsha, al-Ḳaṭāyṭ, Ḳaʿra, Ḳunubba, Mukhdara, al-Malla al-ʿUlyā and al-Malla al-Suflā, Nahrān, and al-Yafāʿ; among Wādīs: Banā, Khubān, Surba or Suraba (a large Wādī, with many water-mills), Shurād and Māwā; among mountains: Isbīl (near which on the black hill of ʿŪsī was a hot spring called Ḥammām Sulaymān, "bath of Solomon", where people sought relief from leprosy) and Ṣayd (a high mountain with the citadel Sumāra); among citadels: Barʿ, Ḥayāwa, Dathar, al-Rabaʿa, ʿAwadān, ʿUyāna, al-Kawna, Hirrān, Baynūn [*q.v.*], and Hakir.

Not far from Dhamār there were popularly believed to be remains of the throne of Bilḳīs (*ʿArsh Bilḳīs*), consisting of several pillars near a large stream which could only be crossed at the risk of one's life; but the explorer Niebuhr, who visited Dhamār, could find no trace of it.

The town of Dhamār used to be the headquarters of the Zaydiyya sect, and had a famous *madrasa* attended by 500 students, from whose numbers arose many famous scholars. Its inhabitants included many Jews and Banians. After the fail of the kingdom of the Zaydī Imāms of Ṣanʿā, Dhamār lost its importance and now enjoys but a miserable existence.

(J. Schleifer-[O. Löfgren])

al-**DHAMMIYYA**, "the people of the blame", is a name given by heresiographers to those who held certain disapproved doctrines. Shahrastānī (134) and Maḳrīzī (*Khiṭaṭ*, Būlāḳ 1270 A.H., ii, 353) apply it to Shīʿīs who claimed that Muḥammad was originally an agent of ʿAlī (the real prophet) but blameably summoned men to himself instead—a position noted (without a name) by Ashʿarī (*Maḳālāt al-Islāmiyyīn*, ed. Md. Muḥyī al-Dīn ʿAbd al-Ḥamīd, Cairo 1950, 82), and ascribed also to al-Shalmaghānī [*q.v.*]. Maḳrīzī explains that ʿAlī was silenced by being given Fāṭima. Shahrastānī says they believed ʿAlī was a god. Both associate them with ʿAlbāʾ (or ʿUlyān, etc.) b. Dhirāʿ al-Dawsī (or Asadī or Sadusī), who in Masʿūdī (*Murūdj*, iii, 265; cf. v, 475) and Ibn Ḥazm (cf. I. Friedlaender, *Heterodoxies of the Shiites*, in *JAOS*, xxix, 102-3) seems to be the originator of the ʿAlawiyya or ʿAyniyya, who exalted ʿAlī's rôle in revelation above Muḥammad's without disapproving Muḥammad.

The name is also applied by Baghdādī (*Farḳ*, 169) to Abū Hāshim b. al-Djubbāʾī and his followers among the Muʿtazilites, whose niceties of psychological analysis led them into seeming to assert that a man could be condemned for a sin he had not yet committed. Muṭahhar al-Maḳdisī (*K. al-badʾ wa ʾl-taʾrīkh*, ed. Cl. Huart, Paris 1916, v, 143) gives a different explanation of the same name. He also ascribes the name to one group of Karrāmiyya (145).

(M. G. S. Hodgson)

DHANAB [see nudjūm].

DHĀR, an ancient town on the scarp of the Vindhyas overlooking the Narbadā valley, and since 1956 the headquarters of Dhār district, Madhya Pradesh, India. It stood on the main routes from Dihlī to the Dakhan and to Gudjarāt. From the 3rd/9th to the end of the 7th/13th centuries it was a capital of the Paramāras who ruled Mālwā first as Rāshṭrakūṭa feudatories and then as independent monarchs. The most powerful of these, Vākpati II (or Muñdja) and Bhodjadeva I, receive mention in many Muslim histories of India. Bhodja's troops may have joined Ānandapāla in 399/1008 against Maḥmūd of Ghaznī, while Djagaddeva, 480/1087-497/1104, defeated Ghaznavid forces in the Pandjāb. Undermined by Čawlukya and Yādava onslaughts and attacked by Ḳuṭb al-Dīn Aybak in 596/1199, Iletmish in 632/1234 and Djalāl al-Dīn Khaldjī in 690/1291 and 692/1293, the Dhār Paramāras broke up in confusion at the end of the 7th/13th century.

In 705/1305 ʿAlāʾ al-Dīn's general ʿAyn al-Mulk Multānī defeated the Paramāra Rādjā Mahlakdeva and his minister Gogadeva, slaying both. Dhār was taken and ʿAyn al-Mulk appointed governor of Mālwā. Until 804/1401 Dhār remained the seat of the governors of Mālwā appointed from Dihlī. In 731/1330-31 Muḥammad b. Tughluḳ struck token *ṭanka*s at Dhār. He himself was at Dhār during the famine of 736/1335. His appointment of ʿAzīz Khammār as *shiḳḳdār* of Dhār, with instructions to curb the *amīrān-i ṣada*, led to the massacre of over eighty of them at Dhār and precipitated the fatal revolts of 745/1345 onwards. The last governor, Dilāwar Khān [*q.v.*], was appointed prior to 793/1390.

From 801/1399 to 804/1401 Dilāwar Khān entertained Sultan Maḥmūd Tughluḳ, a refugee from Tīmūr, at Dhār, but on Maḥmūd's return to Dihlī Dilāwar Khān declared himself independent at Dhār. His son, Alp Khān, succeeded him in 808/1405 with the title Hūshang Shāh. Accused of parricide, he was attacked at Dhār and carried off prisoner by Muẓaffar Shāh of Gudjarāt, whose brother Naṣrat Shāh was appointed governor at Dhār. His extortion provoked rebellion and he was expelled from Dhār, where Hūshang Shāh was reinstalled in 811/1408.

Thereafter Hūshang Shāh made Māndū his capital, as did his successors. The importance of Dhār consequently declined, though during the struggle between the sons of sultan Ghiyāth al-Dīn, in 905-06/1499-50 Nāṣir al-Dīn made Dhār his headquarters, as did his son, Shihāb al-Dīn, when he rebelled in 916/1512.

In the Mughal period, though visited by Akbar and Djahāngīr, Dhār was merely one of the sixteen

*maḥal*s of Māndū *sarkār*, chiefly notable, as befitted Pīrān-i Dhār, for extensive *suyūrghal* grants. Its importance, as a strong fort on the Dihlī-Dakhan communications, revived with the Mughal-Marāṭhā struggle. South Mālwā was first invaded in 1111/1699, and in 1115/1703 the fawdjdār of Māndū took refuge from the Marāṭhās in Dhār. From 1129/1717 Shāhū granted *mokāsā*s to his generals in southern Mālwā, and from 1135/1722 Dhār was allotted to Udādji Pawār. The Mughal governor Girdhār Bahādur and his cousin Dayā Bahādur refused Udādjī's demands and repelled Marāṭhā attacks until both were killed at the Amdjherā pass below Dhār on 25 Djumādā I 1141/29 November 1728.

From 1141-42/1729 the Marāṭhās collected dues from Dhār *maḥall*, though the fort, strengthened by Girdhār's son and successor Bhawāni Rām, held out and Muḥammad Khān Bangash defeated the attacks made on Dhār from 6-18 Ramaḍān 1143/15-27 March 1731 by Malhār Holkār. But on 15 Ramaḍān 1150/6 January 1738 Niẓām al-Mulk conferred Mālwā on the Peshwā, who allotted the Dhār territories to Yashwant Rāo Pawār. (Dhār fort was only taken on 6 Shawwāl 1153/25 December 1740). Dhār state, which came under British protection in 1234/1819, remained under Pawār rulers until 28 May 1948 when it was merged in Madhya Bhārat, and in 1956 in Madhya Pradesh.

2. — Monuments. From the architectural point of view the monuments of Dhār are important only as illustration of the earliest phase of the Mālwā style, one of the characteristic provincial styles of Indian Islamic architecture (see HIND, Architecture). The earliest mosque building is that in the tomb enclosure of Kamāl al-Dīn Mālawī (locally called Kamāl Mawla), a disciple of Niẓām al-Dīn Čishtī of Dihlī; the oldest grave inscription in this enclosure is of 795/1392-3, which records that the ruling sovereign was Maḥmūd Tughluḳ, whose local representative was Dilāwar Khān [*q.v.*]. This, and the slightly later Djāmiʿ masdjid, are both adaptations from pillaged Hindū temple material, of trabeate construction; the outer portico of the Djāmiʿ masdjid shows an attempt to integrate the trabeate façade by the interposing of pointed arches, of no structural significance, between the columns, the forerunner of the arrangement in the mosque of Malik Mughīth at Māndū [*q.v.*]. The Djāmiʿ masdjid bears inscriptions of 807/1404-5 on the east entrance, and of 15 Radjab 807/17 January 1405 on the north entrance (presumably misread by Djahāngīr, *Tūzuk-i Djahāngīrī*, Persian text 201-2); for these see *EIM*, 1909-10, 11-2 and plates III and IV. A third mosque of similar style and date is the so-called School of Rādjā Bhodj, which owes its misnomer to numerous paving slabs and pillar stones carved with mnemonic rules of Sanskrit grammar.

Later buildings almost all owe their origin to the first Khaldjī ruler of Mālwā, Maḥmūd Shāh (839/1436-873/1469), including the restoration of perhaps the oldest Muslim tomb in Dhār, that of ʿAbd Allāh Shāh Čangāl, who is said to have converted "Rādjā Bhōdj" to Islam; it has been disputed whether this refers to Bhōdja I (1010-1053), a broad-minded and tolerant but nevertheless strict Shayva Hindū—in which case this *pīr* could perhaps have come to Mālwā with the army of Maḥmūd of Ghaznī—, or to Bhōdja II (1280-1310), at a time when conversion to Islam might have been politically expedient for the ruler of a small state; nothing is known of this *pīr*, and the story of Bhōdja's conversion is now regarded as most doubtful, but the inscription erected by Maḥmūd Shāh in 859/1455 (*EIM*, 1909-10, 1-5 and Plate I; 42 couplets of Persian verse, one of the longest Persian inscriptions in India) shows the then implicit belief in this tradition. To Maḥmūd Shāh is due also the restoration of the tomb of Kamāl al-Dīn (inscription over doorway of 861/1456-7); a tomb opposite the *pīr*'s is said by local tradition to be Maḥmūd's own.

The Djāmiʿ masdjid is known in later times as the Lāṭ masdjid, from the iron pillar (*lāṭ*) — probably a victory pillar of a local Paramāra king in the early 13th century, cf. *ASI*, *Annual Report*, 1902-3, 203—lying outside; this pillar bears an inscription recording Akbar's brief stay in Dhār in 1008/1599, its position showing that the pillar had already fallen.

The fort, now empty of internal buildings, is said to have been built by Muḥammad b. Tughluḳ on his way to the conquest of the Deccan; no adequate description of it exists.

(J. BURTON-PAGE)

DHARRA, a term denoting, in the Ḳur'ān or *ḥadīth*s, the smallest possible appreciable quantity. The Ḳur'ān uses it five times, in the expression *mithḳāl al-dharra*, "the weight of a *dharra*",—to extol the Omniscience of God (X, 61; XXXIV, 3), or His absolute Omnipotence (XXXIV, 20), or His supreme Justice in retribution: IV, 40 and the celebrated text XCIX, 7-8 "He who shall have done the weight of one *dharra* of good shall see it; he who shall have done the weight of one *dharra* of evil shall see it".

Commentators on the Ḳur'ān and interpreters of *ḥadīth*s have explained *dharra* by two images, both of which go back to Ibn ʿAbbās. 1). From the most usual meaning of the root: powder, dust. The *dharra* is the dust which remains clinging to the hand after the rest has been blown off (the sense recollected in *tafsīr*, for example, by Khāzin in xcix, 7-8); or the weightless dust, seen when sunlight shines through a window (*id.*, iv, 40). 2). The image of the "red (black) ant", by a kind of equivalence *dharra-namla* (al-Zamakhsharī): "the weight of the head of a red ant", (Khāzin iv, 40); "little ant" (xcix, 7-8); "little red ant" (x, 61), etc.—The *dharra* is also said to be equivalent to "the hundredth part of a grain of barley".

In translation *dharra* is generally rendered as "atom" (cf. R. Blachère: "weight of an atom", except for iv, 40: "weight of an ant"). L. Massignon, *Passion d'al-Ḥallādj*, Paris 1922, 550, gives *dharra* in the sense of atom with *nuḳta* ("point") in order to

explain the *djawhar fard* ("elemental substance") of the *kalām* and the *falsafa*. It is noticeable, however, that *dharra* was not generally used as the technical term to denote the philosophical atomism of Democritus, Epicurus and the Muslim "atomists". Two technical expressions were used in preference: *djuz'* [*q.v.*], "part" (indivisible), and *djawhar fard*. On the other hand, modern Arabic readily renders the atom of modern physics by *dharra* (*djuz'* becoming "molecule").

Thus Arabic vocabulary is careful to distinguish between three terminologies: 1) physical sciences: *dharra*, atom; 2) mathematical sciences: *nukta*, geometrical point (thus Ibn Sīnā, *Risāla fi 'l-Ḥudūd*); 3) philosophy: *djuz'* and *djawhar fard*, "atom",—and in this way to emphasize that the last usage does not include the atom of modern physics. (L. Gardet)

DHĀRWĀR, a district in the Belgaum division of the Indian State of Mysore. It has an area of 5,305 square miles and a population of 1,575,386 of whom 15% are Muslims (1951 Census). Until the 7th/13th century it remained free from the Muslim invader. In the following century it formed part of Muḥammad b. Tughluḳ's extensive empire. After the decline of Tughluḳ power its geographical position, especially its proximity to the Rāyčūr Dō'āb, made it a bone of contention between the Bahmanī kingdom of the Deccan and the Hindū empire of Vidjayanagar. From about 972/1565 it seems to have been conquered by the ʿĀdil Shāhī sultans of Bīdjāpur who retained it until their power was crushed by Awrangzīb in 1097/1686. With the disintegration of the Mughal empire in the 12th/18th century it was frequently overrun by plundering Marāṭhā forces. For a time it was annexed to Ḥaydar ʿAlī's kingdom of Mysore but, in 1791, during the reign of Tipu Sulṭān, the fort of Dhārwār was taken by an Anglo-Maratha force under Captain Little and Paraśurāma Bhāu (see Grant Duff's *History of the Mahrattas*, vol. ii, 197-201, Oxford 1921 and Wilk's *Mysoor*, vol. ii, 483-8, Mysore 1932). After this it remained in Marāṭhā hands until their defeat by the British in 1817. In 1857-8 Bhāskar Rāo (Bābā Sāhib), the chief of Nargūnd in Dhārwār, who had been refused permission to adopt an heir by Lord Dalhousie, rose in revolt and murdered Charles Manson, the British Commissioner and Political Agent for the Southern Maratha Country. This resulted in the execution of Bhāskar Rāo and the forfeiture of the Nargūnd estate (see *Indian Mutiny*, Kaye and Malleson, vol. v, 164-72, London 1889). Dhārwār was administered as part of Bombay until the reorganization of 1956 when it was transferred to the new State of Mysore.

(C. Collin Davies)

DHĀT. In Muslim philosophy this term is used in several senses. As a general term it can mean "thing", like the words *shay'* and *maʿnā*; next, it signifies the "being" or "self" or even "ego": thus *bi-dhātihī* means "by itself" or "by his self"; but most commonly *dhāt* is employed in the two different meanings of "substance" and "essence", and is a translation of the Greek οὐσία. In its former usage as "substance" it is the equivalent of the subject or substratum (ὑποκείμενον) and is contrasted with qualities or predicates attributed to it and inhering in it. In the second sense of "essence", however, *dhāt* signifies the essential or constitutive qualities of a thing as a member of a species, and is contrasted with its accidental attributes (*aʿrāḍ* [see ʿarad]). In this sense it is the equivalent of *māhiyya* [*q.v.*] and corresponds to the Greek τό τι ἦν εἶναι. Some Muslim philosophers distinguish, within the essence, its prior parts from the rest and apply the description "essential" (*dhātī*) to the former: *dhātī* is the conceptually and ontologically prior part of the essence of a thing. Derivative from this second sense of the term is the distinction between the essential and the temporal order. Thus ordinarily a cause is said to be both essentially and temporally prior to its effects. Some causes are, however, not temporally prior to their effects but only essentially; this is the case with the relationship between God and the world according to Muslim philosophers who reject the idea of temporal creation.

Both these meanings of *dhāt* as essence and substance, however, are combined and often confused, like the term corresponding to *djawhar* [*q.v.*] by Aristotle and his followers. This is because essence is regarded as being constitutive of the substance which is a substance only in so far as it is constituted by this essence. The term *dhāt*, from the point of view of this ambiguity in meaning, is especially relevant to the philosophico-theological doctrine of God and His Attributes. The Muʿtazila and the philosophers deny Divine Attributes and declare God to be a simple substance or pure Essence; in this case simple substance and simple essence coalesce and are identical with one another. The Attributes are then construed either as negations or as pure relations. Although both the Muʿtazila and the philosophers agree in the denial of Divine Attributes, their reasons for doing so are very different. The Muʿtazila were moved to deny Attributes through the theological anxiety that affirmation of these would be contrary to strict monotheism. The philosophers' reasoning, on the other hand, is the result of the rational search for a simple being from which all multiplicity and composition—existential and conceptual—should be excluded, but which at the same time should "explain" the multiplicity of existing things. In this they were followers of Plotinus. The Islamic orthodoxy devised a formula according to which Attributes are "neither identical with God nor other than Him".

The Ṣūfī theosophy, which became widely influential during the later middle ages of Islam, found another way of reconciliation between philosophy and orthodoxy. According to this theory God, as absolute, is pure and simple Being without any Attributes; but through a series of "descents" or "determinations" He becomes progressively determinate. In this pantheistic world-view the mystic, in his upward march towards communion with God, passes through a series of theophanies (*tadjalliyāt*) from the levels of Names and Attributes to the final theophany of the Absolute.

DHĀT AL-HIMMA [see dhu 'l-himma].

DHĀT AL-SAWĀRI [see supplement].

DHĀTĪ, Turkish poet, b. 875/1471 in Balıkesir. The son of a modest bootmaker, as a boy he practised his father's craft but soon gave it up, moving to the capital during the reign of Bāyezīd I where, following his natural inclinations, he devoted his life to poetry. An easy and prolific versifier, he made a living from the gifts of the notables of the day, to whom he dedicated *ḳaṣīdas* (among others, to the sultans Selīm I, Suleymān I, to Djaʿfer Čelebi and Ibn Kemāl). In his old age he practised geomancy in a shop which soon became a sort of literary club for men of letters, where Dhātī helped and encouraged many young talents (such as Tashlīdjalī Yaḥyā

Khayālī, Bāḳī). A "bohemian", unmarried and a heavy drinker, he died in 953/1546 at Istanbul, in poverty.

Apart from a voluminous *dīwān*, his major work is *Sham' we Pervāne*, a *mathnawī* of nearly 4000 couplets interspersed with *ghazal*s, which develops one of the favourite themes of *mathnawī* literature (for a fairly good copy, see Süleymāniye (Lala Ismā'īl) no. 443).

With no regular education and training, Dhātī taught himself all the knowledge which was required by a *dīwān*-poet. Much appreciated by his contemporaries and early *tedhkire*-writers, unduly neglected later, Dhātī was a poet of remarkable talent and skill, and contributed to the refinement of language and style of *dīwān*-poetry, and thus became a link between Nedjātī and Bāḳī.

Bibliography: The *tedhkire*s of Laṭīfī, Ḳīnalīzāde Ḥasan Čelebi, and the biographical section of 'Ālī's *Kunh al-Akhbār*, s.v.; Gibb, *Ottoman Poetry*, ii; M. Fuad Köprülü, *Divan Edebiyatı Antolojisi*, Istanbul 1934, 133; A. Bombaci, *Storia della letteratura turca*, Milan 1956, 336.

(Fahir İz)

DHAWḲ, "taste", is a technical term used in philosophy, in aesthetics (especially literature), and in Ṣūfism.

1. In philosophy [see FALSAFA] *dhawḳ* is the name for the gustatory sense-perception. Following Aristotle, it is defined as a kind of sub-species of the tactual sense, localized in the gustatory organ, the tongue. It differs from tactual sense, however, in that mere contact with skin is not sufficient for gustation to occur: besides contact, it needs a medium of transmission, viz. the salival moisture. The salival moisture, in order to transmit tastes faithfully, must be in itself tasteless, otherwise it will impose its own taste upon the object of gustation, as is the case with patients of bile. The problem is discussed whether the tasted object "mixes" with the saliva and thus its parts are directly tasted, or whether the object causes a qualitative change in the saliva, which is then transmitted to the tongue. The answer is that both are conjointly possible and it is therefore held that if it were possible for the object to be transmitted without this moisture gustation could occur all the same, unlike, for example, vision, for which a medium is absolutely necessary. Nine kinds of taste—which are joint products of the tactual and gustatory sensations—are enumerated by Avicenna.

2. In aesthetics, *dhawḳ* is the name for the power of aesthetic appreciation; it is something that "moves the heart". But although it is psychologically subjective, it nevertheless requires objective standards (*idjmā'*) for objectivity and verification, "just as the taste of sugar is private, nevertheless its sweetness is something universally agreed upon by consensus".

3. The aesthetic definition of *dhawḳ* already stands at the threshold of the mystic use of the term. In its mystical usage this term denotes the direct quality of the mystic experience. The Christian mystics had also used the term (*e.g.*, the αἴσθησις καρδίας and γεῦσις of Bishop Diadochus), although it would occur naturally to a mystic endeavouring to distinguish direct experience from discursive knowledge. The metaphor of "sight" is also often used, but *dhawḳ* has more qualitative overtones of enjoyment and "intoxication" (*sukr*) besides the noetic element which it shares with the term "sight". Thus, Djalāl al-Dīn Rūmī says "you cannot appreciate the intoxication of this wine unless you taste it". Kamāl al-Dīn in his *Iṣṭilāḥāt al-ṣūfiyya* states that *dhawḳ* is the first stage of *wadjd* (ecstasy), the two further stages being *shurb* (drinking) and *riy* (satisfaction). According to some, however, *wadjd* is a higher stage than *dhawḳ*. These distinctions, however, are later, and concern the doctrine of Ṣūfism rather than its practice.

Dhawḳ is also commonly used to denote insight or intuitive appreciation, generally of any phenomenon whatsoever, and implies the previous acquisition and exercise of a skill. A doctor, for example, may *on the basis of* his previous experience be able to identify a novel disease by *dhawḳ*; or a historian, in face of conflicting evidence on a point, may be able to decide by a kind of "historical intuition".

(F. Rahman)

DHAWḲ, Muḥammad Ibrāhīm Shaykh, Urdū poet b. Dihlī 11 Dhu 'l-Ḥidjdja 1204/18 December 1790 (so Āzād; in 1203 according to a contemporary Calcutta newspaper, cf. *Nawā-i Adab*, 45), the only son of Sh. Muḥammad Ramaḍān, a trusted servant of Nawwāb Luṭf 'Alī Khān of Dihlī. His early schooling in Persian and Arabic was in the mosque-school of Ḥāfiẓ Ghulām Rasūl Shawḳ, a poet and a pupil of Shāh Naṣīr (Sheftā, 150), who inspired the young learner with a love for reading and writing poetry. Dhawḳ later became a pupil of Shāh Naṣīr and followed his style, but after some time, when a rupture had taken place between the pupil and the teacher, he began to write successfully in the style of the well-known masters of Urdū poetry, particularly Sawdā. He was now attending *mushā'ara*s and acquiring fame as a young poet (cf. Sprenger, 222; Ḳāsim, *Madjmū'a-i Naghz*, ii, 385: Dhawḳ was about 17 when this was written). He intensified his study of the sciences (medicine, music, astrology, etc.) when an opportunity came for him to complete his education, and the technical terms of these stood him in good stead later when he came to write *ḳaṣīda*s. His reputation grew rapidly, and Mīr Kāẓim Ḥusayn, an old class-fellow, introduced him to Abū Ẓafar, the heir apparent of Akbar Shāh II, whose poetical compositions he was in due course appointed to correct, roughly from 1816 (cf. Karīm al-Dīn, *Tadhkira-i Nāzninān*, 118; but cf. also his *Ṭabaḳāt*, 459). On presenting a *ḳaṣīda* to Akbar Shāh he received the title of *Khāḳānī-i Hind*, by which Shefta (between 1831-3) calls him. After the prince ascended the throne, as Bahādur Shāh II, in 1837, Dhawḳ became his laureate, and his pay, formerly between Rs. 4 and 7, was raised to 30, later to 100, rupees. In his old age he was made a Khān Bahādur, and received many other favours after reciting his court odes in the 'Īd *darbār*s and other ceremonial occasions. He died on 23 Safar 1271/15 November 1854 (Sābir, 224 ff., quoting also Ẓafar, and an elegy of Sōz, particularly 237, line 10).

Dhawḳ was of rather small stature, with a dark pock-marked face (the result of a childhood attack), bright eyes, and a loud but pleasant voice. He had a good memory, and knew a large number of Persian verses by heart. He was a religious-minded man, of the Shī'a persuasion according to Karīm al-Dīn's information, contented and kind-hearted (he wrote no satires). His only son Muḥammad Ismā'īl (called in the *Nawā-i Adab*, 49, Wakār al-Dawla Muḥammad Ismā'īl Khān) survived him for only a few years.

He was a prolific writer, as his contemporaries (Ṣābir, Sayyid Aḥmad Khān, Ānwar, Āzād and others) testify, but much of his work was lost in the disturbances of 1857-8. According to Shēfta, who used to meet him occasionally, 106, and Ṣābir, 223, he did not arrange his poems in the form of a *dīwān*; according to Āzād Dhawḳ compiled a *dīwān* when 15 or 16 years old, though its fate is unknown. Ẓafar also refers to a *dīwān* of Dhawḳ (*Hindustānī*, April 1945, 40). The earliest edition of the *dīwān*, 186 pp., was lithographed in Dihlī in 1859; no reference to it occurs in the subsequent editions. An attempt to collect his work was made by Ḥāfiẓ Ghulām Rasūl Wīrān (the blind pupil of Dhawḳ, who had associated with him for some 20 years and who knew a large number of his poems by heart) and his co-editors Ẓahīr and Anwar (for whom see Saksena, 156 ff.; Bailey, 74 ff.); as well as taking dictation from Wīrān, Ẓahīr and Anwar made use of various *tadhkiras* and of the note-books of the poet's pupils. This *dīwān* (2393 *bayts*) was lithographed in Dihlī in 1279/1862-3, with an Urdū colophon and Anwar's Persian preface (20 pp.) appended to the book; it was later lithographed several times, without the Persian preface, in Kānpur, Dihlī, Mīraʾth, etc. The largest edition was produced by Āzād, in his old age (1885-9 ?) just before his mind became finally deranged; he states that soon after Dhawḳ's death he and the poet's son, Muḥammad Ismāʿīl, collected Dhawḳ's poems after the labour of many months. This collection was published from Lahore in 1890 (Blumhardt, *Suppl. Cat.*, 319), and is composed mostly of *ghazals*, 24 or 25 *ḳaṣīdas*, and some fragments (5040 *bayts* in all), with interesting prefatory and marginal notes. Several pages of rare verses of the poet have been quoted from a *Nigāristān-i Sukhan* in the *Muʾāṣir*. More of his unpublished verses can be collected from old *tadhkiras*. This and what follows would justify a new critical edition of the *dīwān*.

In a critical examination of Āzād's edition (Ph. D. thesis, 1939) Muḥammad Ṣādiḳ claims that Āzād revised and improved Dhawḳ's juvenile work, in some cases slightly, in others drastically; later, in 1944-7, Professor Maḥmūd Shērānī proved the interpolations throughout the *dīwān* even more fully and conclusively, and the same is shown by Āzād's copy of the *dīwān* (edition of 1279 A.H.; now in Dr. Ṣādiḳ's possession) which bears emendations in his own handwriting.

As a poet Dhawḳ enjoyed great popularity among his contemporaries who praised him for handling *ghazals*, *ḳaṣīdas* and other verse forms with equal facility. He owed his great prestige partly to his being a teacher of Bahādur Shāh II, partly to his writing in a style which was, unlike Ghālib's, easily intelligible to all. His work shows great technical skill; the language he uses is perfect in its eloquence, purity, sweetness and naturalness of expression; he uses idioms in a masterly manner, and his similes and metaphors have novelty and beauty. His ideas are well-arranged and often fresh, and his allusions have grace and elegance. Generally speaking, however, he has not the subjectivity of Dard or Mīr; his *ghazals*, therefore, lack what *ghazals* must have —effect and warmth of feeling. In the *ḳaṣīda*, however, he was much more successful, and is regarded as the best *ḳaṣīda*-writer, next to Sawdā, in Urdū. On the whole he shared the tastes of Nāsikh and Ātish of Lucknow, rather than those of the Dihlī school. Gradually public opinion has swung more in the direction of the rival school represented by Ghālib and Muʾmin.

(MUHAMMAD SHAFI)

DHAWWĀḲ [see ČASHNAGĪR].

AL-**DHIʾĀB**, "the wolves", a South Arabian tribe whose lands lie between the territory of the Lower ʿAwāliḳ [*q.v.*] and the Lower Wāḥidī [*q.v.*]. There are also considerable settlements of the Dhiʾāb in the country of the Lower Wāḥidī itself, the villages of which are largely occupied by them. The soil is unfertile and mostly prairie-like pasture land. In the east of the distict is a mountain of some size, the Djabal Ḥamrā, over 4000 ft. high. The chief place is the fishing village of Ḥawra (al-Ulyā) with an important harbour.

The Dhiʾāb are a very wild, warlike tribe of

robbers, and are therefore feared throughout South Arabia. They are *Ḳabā'il* (free, independent tribes) and are considered as genuine Ḥimyarīs; their slogan (*ṣarkha*, *ʿazwa*) is: *anā dhēb* (*dhib*) *Ḥamyar* (*Ḥimyar*), "I am the wolf of Ḥimyar". They have no common sultan, and the various branches of the tribe are ruled by Shaykhs, called *Abū*, "father", whom they heed only in case of war. The most influential Shaykh of the Ḍhi'āb lives in ʿIrḳa (ʿIrgha).

DHI'B, the wolf. Most of the cognate forms in other Semitic languages have the same significance. Numerous synonyms and sobriquets are found in Arabic, such as *sirḥān*, *uways*, *sīd*, *abū djaʿda*, etc. In local usage, *dhi'b* may also denote the jackal (Jayakar, Malouf), yet Hommel's assumption (303, n. 1) that this was the only meaning of the word in ancient Arabic (so also Jacob) is inconsistent with its use in the Sūra of Joseph (Ḳur'ān, XII, 13, 14, 17), where it stands for the biblical 'evil beast' (Gen. xxxvii 20, 33).

Ample mention of the *dhi'b* is made in ancient Arabic poems, proverbs, popular traditions and *ḥadīth*s, some of which are quoted in later zoological writings. Other information given by Arab zoologists goes back to foreign sources, such as Aristotle's *Historia Animalium* and the ancient *Physiologus* literature.

Since *dhi'b*, in the Arabic script, is similar to *dubb* (= bear), the two words were easily confused and, consequently, the behaviour and properties of one animal have sometimes been attributed to the other.

The *dhi'b* is described as extremely malignant, quarrelsome and cunning. It is quick of hearing and possesses a powerful sense of smell. It feeds on flesh only but eats herbs when ill. It can go without food for a long time, whence the proverb: "More hungry than a wolf". *Dā' al-dhi'b* (lit.: the wolf's disease) is a metaphorical expression for hunger. Its stomach (according to some: its tongue) is able to dissolve a solid bone but not a date stone. Its penis consists of bone. The female is robuster and more courageous than the male. If a hyena is killed or caught, the *dhi'b* takes care of her young. Some authors state that the wolf goes single and does not associate, while others describe its behaviour in aggregation; no one separates from the pack, as they do not trust one another. When one becomes weak or is wounded, it is eaten by the others. When asleep, they keep the right and left eye open alternately to keep watch on one another. The wolf is always prone to attack men in contrast to other wild animals which do so only when old and unable to hunt. It assails a person from behind, not from the front. A man who shows no fear of it remains unmolested, but is attacked when afraid. Only ravenous wolves are aggressive. When a wolf has designs on a flock of sheep, it howls so that the dog hears and runs in the direction of the sound; the wolf then goes to the other side where there is no dog and snatches the sheep away. It makes its raids preferably just before sunrise when shepherd and dog are both tired from the night watch.

Some of the information on the wolf belongs to the field of superstition, *e.g.*: If a man carries with him the fang, skin or eye of a wolf, he will overcome his opponents and be loved by all people. The wolf also played a part in Arabic oneiromancy. Its blood, brain, liver, bile, testicles, dung and urine were used for various medicinal purposes.

DHIHNĪ, BAYBURTLU, Turkish folk-poet, b. towards the end of the 12th/18th century in Bayburt. Educated in Erzurum and Trabzon, he spent ten years in Istanbul and later travelled in the provinces on minor governmental duties; he was for a short time in the service of Muṣṭafā Reshīd Pasha. He spent the last four years of his life in Trabzon and died in a village nearby while on his way to his home town (1275/1859).

His background, somewhat different from that of the usual folk poet, led him to imitate classical poets, and he even composed a complete *dīwān* of traditional poetry in *ʿarūḍ*. But he remained a poor and awkward imitator of *dīwān* poets and his fame rests entirely on a few poems, written in the folk tradition, which he himself tried to ignore and did not include in his *dīwān*. Dhihnī, as a folk poet, is strongly under the influence of classical poets and his poems are full of the figures, images, and similes of *dīwān* poetry. In spite of this he succeeds in capturing the spirit of the genuine folk poet of the early 19th century. His famous *koshma* about his home town was written when he saw Bayburt in utter ruin, after its evacuation by the Russians in 1828.

DHIKR, reminding oneself. "Remind thyself of (*udhkur*) thy Lord when thou forgettest" (*Ḳur'ān*, XVIII, 24). Thus: the act of reminding, then oral mention of the memory, especially the tireless repetition of an ejaculatory litany, finally the very technique of this mention. In *taṣawwuf* the *dhikr* is possibly the most frequent form of prayer, its *muḳābal* ("opposite correlative") being *fikr* [*q.v.*], (discursive) reflection, meditation. In his *Ṭawāsīn*, in connexion with Muḥammad's "nocturnal ascension", al-Ḥalladj declares that the road which passes through "the garden of *dhikr*" and that which takes "the way of *fikr*" are equally valid. For the Ṣūfīs the Ḳur'ānic basis of the *dhikr* is the above-quoted text (cited, among others, by al-Kalābādhī) and XXXIII, 41: "O ye who believe! Remember (*udhkurū*) Allah with much remembrance (*dhikr*an *kathīr*an)". *Ḥadīth*s are often quoted in support and in praise of the practice.

As an ejaculatory litany tirelessly repeated the *dhikr* may be compared with the "prayer of Jesus"

of the oriental Christians, Sinaitic then Anthonic, and also with the *djapa-yōga* of India and the Japanese *nembutsu*, and this quite apart from historical threads which may have played a rôle in one direction or another. One may recognize in these modes of prayer, without denying possible influences, a universal tendency, however climates and religious beliefs may differ.

Traditions of the Brotherhoods:—The *dhikr* may be uttered aloud (*djalī*) or in a low voice (*khafī*). At the beginning the formula must always be articulated. In the Muslim brotherhoods (*ṭarīḳa*) [*q.v.*] there is a double tradition: that of solitary *dhikr* (aloud or whispered). and that of collective *dhikr* (aloud). It is the first which the major texts of the great spiritual writers envisage: "The Ṣūfī retires by himself to a cell (*zāwiya*) ... After sitting in solitude he utters continously "God (Allāh)" being present with his heart as well" (al-Ghazzālī, *Iḥyā'*, iii, 16-7). Several brotherhoods (the Shadhiliyya and their offshoots Khalwatiyya, Darḳāwa, etc.) stress the advantages of solitary *dhikr* and seem to make it a condition of the *dhikr al-khawāṣṣ* (of the "privileged", those well advanced along the spiritual path). Others (Raḥmāniyya, etc.), without excluding the entry into solitude, stress the dangers of it and recommend, at least for a long time, "sessions" (*ḥadra*) or "circles" (*ḥalḳa*) of collective *dhikr*. The latter is without doubt as old as the solitary *dhikr*; but in its liturgico-technical form, with prescribed attitudes regulating the respiratory rhythm as well as the physical posture, it seems to have been born at a relatively late date, about the 8th/13th century, betraying Indo-Iranian influence among the Mawlawiyya ("Whirling Dervishes") of Ḳonya, and Indian through Turko-Mongol influence (cf. the descriptions by the Mongol ex-functionary Simnānī, 13th-14th centuries). This technicality, which must have been introduced progressively, extends its influence to the experience of the solitary *dhikr* itself (cf. in the Christian Orient the connexions between the "prayer of Jesus" and the hesychastic technique).

The "sessions" generally take the form of a kind of liturgy which begins with the recitation of Ḳur'ānic verses and prayers composed by the founder of the brotherhood. This is the *ḥizb* or the *wird* [*qq.v.*], often accompanied by the "spiritual oratorio" (*samāʿ*). *Wird, samāʿ*, and physical posture during the recitation of the *dhikr* vary with the brotherhoods (see, for the Maghrib, Rinn, *Marabouts et Khouan*). For the *dhikr* itself the best summary is the *Salsabīl al-muʿīn fi'l-ṭarā'iḳ al-arbaʿīn* of Muḥammad al-Sanūsī (d. 1276/1859) printed on the margin of the same author's *Masā'il al-ʿashr*, where there is a condensed account of the essential characteristics of the *dhikr* practised by the forty preceding brotherhoods, of which the Sanūsiyya claim to have adopted the essential. The collective *dhikr* sessions described by Western writers are generally classifiable as "*dhikr* of the commonalty (*al-ʿawāmm*)". One of the best-observed accounts is that of the Raḥmāniyya by W. S. Haas. It requires correction and completion (*e.g.*, in connexion with the interpretation of the formula used); in any case it can hardly exhaust the subject.

Description of the experience:—Whether collective or solitary, the recitation of the *dhikr* presupposes a preparation. This is the aim of the *ḥizb* and *wird* in the "sessions". But a general preparation is necessary ("renouncing the world to lead an ascetic life" says al-Ghazzālī) and always the intention of the heart (*niyya*). The part played by the *shaykh* ("spiritual director") is a capital one. It is he who directs and regulates the recitation in the collective sessions; it is he who must guide the solitary disciple step by step. The beginner is recommended to close his eyes and to place the image of his *shaykh* before his mind. The disposition of the "circle" in the collective *dhikr* is carefully regulated. He who recites the *dhikr* in solitude is enjoined to sit in an attitude of *tarabbuʿ* (with legs crossed) or on his heels. The position of the hands is specified. It is recommended that the disciple should perfume himself with benzoin and wear ritually pure clothing.

The formula chosen may vary according to tradition and according to the spiritual advancement attained by the Ṣūfī. A customary formula for the commencement is the "first *shahāda*", *lā ilāh illā 'llāh*. The Shādhilī method is: "One begins the recital from the left side (of the chest) which is, as it were, the niche containing the lamp of the heart, the focus of spiritual light. One continues by passing from the lower part of the chest on the right upwards to the upper part, and so on to the initial position, having thus, so to speak, described a circle" (Ibn ʿIyāḍ). There is another (slightly different) description of the Shādhilī *dhikr* by al-Sanūsī, and a description of the Raḥmānī *dhikr* (same formula) in the late work of Bāsh Tārzī, *Kitāb al-minaḥ*, 79-80, etc.

A formula for advanced adepts (sometimes for solitary beginners, sometimes from the beginning of "collective" sessions) is the "Name of Majesty" *Allāh*. The utterance is accompanied by two movements, says Bāsh Tārzī (ibid., 80): (1) "strike the chest (with the head) where the corporeal heart (which is cone-shaped) is, saying *Allāh* with the head inclined over the navel; (2) raise the head as you pronounce the *hamza* (*'A*) and raise the head from the navel up to a level with the brain, then pronounce the remainder of the formula (*llāh*) on the secret navel". The *dhikr* known as that of the Ḥallādjiyya, according to al-Sanūsī, is: *Allāh*, with the suppression of *Al* and with the vocalization *lāha, lāhi, lāhu* (cf. L. Massignon, *Passion d'al-Ḥallādj*, 342). Al-Sanūsī warns that this procedure may only be used in solitude and by "a man aware of what the result will be". (It appears that the modern ʿAlīwiyya brotherhood of Mostaghanem has re-adopted this procedure).

Other formulae are proposed by Ibn ʿAṭā' Allāh of Alexandria, Simnānī, Bāsh Tārzī, etc. in accordance with gnostic hierarchies where spiritual progress is matched with the vision of "coloured lights" which is the sign of it: *Huwa, al-Ḥaḳḳ, al-Ḥayy, al-Ḳayyūm, al-Ḳahhār*.

The duration of the experience is regulated either by the *shaykh*, or, in solitude, by numbers, with or without the help of a rosary (*subḥa*): 300, 3,000, 6,000, 12,000, 70,000 repetitions (cf. the 6,000 or 12,000 "prayers of Jesus" daily of the "Russian Pilgrim" and the Japanese liturgy "of the million" (*nembutsu*). The invocation may finally become unceasing, without care about the exact number. Control of the respiration seems mostly to be concomitant, but it appears more deliberate in the Hamaylī *dhikr* (6th/12th century) and Simnānī's descriptions and also in the counsels of Zayn al-Milla wa 'l-Dīn (no doubt Khawāfī) the commentator on Anṣārī's *Manāzil*.

The *dhikr* as an internal experience:—One of the best sources is the *Miftāḥ al-falāḥ* of Ibn

ʿAṭāʾ Allāh of Alexandria, the second Grand Master of the Shādhilī order. Reference may also be made, on the one hand, to al-Kalābādhī's chapter on the *dhikr* and the matter-of-fact description of Ghazzālī, and, on the other hand, to the numerous gnoses of later times (Zayn al-Dīn, Bāsh Tārzī, Amīn al-Kurdī Naḳshbandī, etc.). Three main stages may be distinguished, each being subdivided; it is to be noted that these progressive stages are found again in the writings of Malay Ṣūfism.

(1) *Dhikr* of the tongue with "intention of the heart" (the mere "*dhikr* of the tongue" without *niyya* is rejected, for it would be "just routine, profitless", says Bāsh Tārzī). (a) At the first step, there is a voluntary recitation, with effort, in order to "place the One Mentioned in the heart" according to the exact modes of utterance and physical postures taught by the *shaykh*; it is firstly to this level that the foregoing descriptions apply. (b) At the second step the recitation continues effortless. The disciple, says Ghazzālī (*Iḥyāʾ*, iii, 17), "leaves off the movement of the tongue and sees the word (or formula) as it were flowing over it". Cf. the similar testimony of those who have experienced the "prayer of Jesus" and the Japanese *nembutsu*. However, three elements are still present: the subject conscious of his experience, the state of consciousness, and the One Mentioned: *dhākir*, *dhikr*, *madhkūr* (cf. the triad of *Yoga-Sūtra*, i, 41: receptive subject, act of reception, object received). The "effortless" step may be compared with the *dhāraṇā* stage of Yoga experience, "fixation" (of mental activity).

(2) *Dhikr* of the heart

"The Ṣūfī reaches a point where he has effaced the trace of the word on his tongue, and finds his heart continuously applied to the *dhikr* (al-Ghazzālī, ibid. Same testimony in *Account by a Russian Pilgrim*). Here also there are two steps: (a) with effort (cf. Ibn ʿAṭāʾ Allāh, *Miftāḥ*, 4), *i.e.*, with the obscure desire to "maintain the formula" which results in something like a pain felt in the physical heart; (b) effortless: this presence is expressed in a sort of hammering of the formula by the beating of the physical heart (same in *Russian Pilgrim*) and by the pulsation of the blood in the veins and the arteries, with no utterance, even mental, of the words, but where the words nevertheless remain. This is a mode of "necessary presence", where the "state of consciousness" dissolves into an *acquired* passivity. Cf. the step of "absorption" (*dhyāna*) of Yoga. Al-Ghazzālī's analysis in the *Iḥyāʾ* halts at this stage. "It is in his (the disciple's) power to reach this limit, and to make the state lasting by repulsing temptations; but, on the other hand, it is not in his power to attract to himself the Mercy of the All-High". This important distinction is reminiscent of al-Ḥallādj's exclamation to God: "You are my ravisher, it is not the *dhikr* which has ravished me!" (*Dīwān*, 53). Later traditions no longer draw this distinction. Ibn ʿAṭāʾ Allāh's monograph speaks of a third stage, for which the second is an effective preparation.

(3) *Dhikr* of the "inmost being" (*sirr*)

The heart (*ḳalb*) was the seat of the "knowledge of divine things"; the "inmost being" (*sirr*), "a substance more subtle than the spirit (*rūḥ*)" will be the place of the "vision" (*mushāhada*) of them. It is also the place where the *tawḥīd* takes place, the declaration of divine unity and the unification of the self with the self, and the self with God. The writers often associate this third stage of the *dhikr* with the state of *iḥsān*, spiritual perfection and beauty. The "arrival" of the "*dhikr* of the inmost being" is known by this, that "if you leave off the *dhikr* it does not leave you, and the whole being of the Ṣūfī becomes 'a tongue uttering the *dhikr*'" (*Miftāḥ*, 6). The slave of God "has disappeared (*ghāʾib*) both from the *dhikr* and the very object of the *dhikr*" (ibid.). Thus no duality must remain. But a twofold step is distinguished even here: (a) *fanāʾ ʿan al-dhikr wa 'l-madhkūr* ... *ilā 'llāh*, annihilation away from the *dhikr* and its object ... *towards* God; (b) *fanāʾ ʿan al-fanāʾ* ... *bi'llāh*, annihilation away from the annihilation ... *in* God.

It seems that this state may be compared with the entry into *samādhi* of Indian Yoga (or at least the "*samādhi* with seed"; any equivalence with the "*samādhi* without seed" should be more closely examined): "becoming one alone" (cf. the Indian *kaivalya*) conceived as abolition in God, generally in the line of "monism of the Being" (*waḥdat al-wudjūd*). The personality of the Ṣūfī has, it as were, "disappeared" in the act of abolishing all acts. Ibn ʿAṭāʾ Allāh's description of the *dhikr al-sirr* goes as far as possible in expressing this.

Accompanying phenomena and explicatory gnoses:—Ibn ʿAṭāʾ Allāh describes the *dhikr* of the tongue as sounds of voices and rhythms "within the periphery of the head". Explanation: "the son of Adam is a mixture of all substances, noble and base", and the sounds heard come from each of the "constituent elements of these substances" (*Miftāḥ*, 5); the *dhikr* liberates the harmony established between the microcosm and the macrocosm (cf. the period of "cosmization" of Yoga). The *dhikr* of the heart resembles "the buzzing of bees, without a loud or disturbing noise" (ibid.) and is accompanied by luminous and coloured phenomena, at this stage intermittent. Al-Ghazzālī drew attention to this apparition of "lights" which "sometimes pass like a flash of lightning and sometimes stay, sometimes last and sometimes do not last, sometimes follow each other different from one another, sometimes blend into one single mood" (*loc. cit.*). He explains them as "gleams of truth" released by God's good will, but other authors later describe them as intrinsically and obligatorily bound up with the *dhikr* experience.

Later writers describe these luminous phenomena as being even more brilliant at the step of the *dhikr* of the inmost being, of which they become the particular mark. This time "the fire of the *dhikr* does not go out, and its lights do not flee ... You see always lights going up and others coming down; the fire around you is bright, very hot, and it flames" (*Miftāḥ*, 6). Yoga describes similar phenomena. Moreover it would be rewarding to make a comparison and a distinction between the Ṣūfī analyses and either the Buddhist "objective" illumination or the "uncreated light of the Thabor" of the oriental forms of Christianity. Various late authors establish other successive stages from the *dhikr* of the inmost being which are also marked by variously coloured luminous phenomena. The descriptions vary with the texts and do not seem to affect the structure itself of the experience. This is the hierarchy proposed by Simnānī: grey smoke (corporeal envelope); blue (physical soul); red (heart); white light ("inmost being"); yellow (spirit [*rūḥ*]); black (subtle and mysterious principle, *khafiyya*); green (reality [*ḥaḳīḳa*], the state of the perfect soul "which sums up all the other states" as Bāsh Tārzī states).

These rising and falling lights are held to be "divine illumination"; no longer a gift from Mercy,

as al-Ghazzālī believed, but an effect linked to the experience according to the extent to which the *dhikr* of the inmost being has liberated the divine element in the human spirit directly "emanating" from God (cf. the "trace of the One" of Plotinus). The *dhikr* also effects a direct communication with the "worlds" [see ʿĀLAM, § 2]. The *dhikr* of the tongue and its "cosmization" effects entry into the world of *djabarūt*, All-Power. The higher stages introduce into the domain of *malakūt* "angelic substances"; they may even lead to *lāhūt*, the world of the Divine Essence. "If you recite the *dhikr* with your inmost being, recite with yourself the Throne with all its worlds until the *dhikr* unites with the Divine Essence (*dhāt*) (*Miftāḥ*, 7). One is reminded here of the entry into the "Pure Land" of the *Jôdo* promised to the disciples of the Japanese *nembutsu*.

These gnostic visions, which in Ibn ʿAṭāʾ Allāh are relatively sober, later become involved in the extreme, as in the above-quoted text of Ibn Amīn al-Kurdī.

Interpretations:—Al-Ḥallādj, al-Kalabādhī, etc., speak of the *dhikr* as a *method* of reminding one's self of God, of helping the soul to live in God's presence; but without for this reason underestimating the discursive method of *fikr*. Al-Ghazzālī portrays the *dhikr* as *the* way of the Sufis, but still preserves, so it seems, the *method* aspect of its nature: a method of unifying the disciple's spirit and preparing him to receive, if the Lord wills, the supreme Mercies. Ibn ʿAṭāʾ Allāh informs us at the beginning of the *Miftāḥ* that to the best of his belief no monograph has yet been devoted to the *dhikr*. If this is true, then the developments *ex professo* in the theory and practice of the *dhikr*, and the absolutely capital importance assigned to it, may be dated from the 6th/12th century. Ibn ʿAṭāʾ Allāh no longer speaks of it as a preparatory or concomitant method, but as an effective technique, up to its consummation: entry into the domain of *lāhūt*. Later works insist even more on technique—voice, breathing, posture, etc., give themselves up to long disquisitions on the gnostic theme, and never cease to see in the *dhikr* pursued to its last steps a "guarantee" of attainment. This emphasis on technique (where non-Muslim influences are at work) dates from the period when Ṣūfism was dominated by the One-ness of Being (*waḥdat al-wudjūd*); man, in respect of his most "spiritual" aspects, is considered to belong by nature to the divine.

Now the direct effect of experiencing the *dhikr* seems to be a monoideism working on the One Mentioned, "realizing" that perpetual (conscious) "re-remembering" which the first Ṣūfīs demanded of it (cf. the "prayer of Jesus" of the Sinaitic Fathers). But as techniques progressed the ever more numerous analyses are marked by the "cosmization" of the *dhikr* of the tongue, the influence of the *dhikr* of the heart on the circulatory system, and the probable influence of the *dhikr* of the inmost being on the para- and ortho-sympathetic systems, and it seems as though we are in the presence of a control by this monoideism on the individual's subconscious, not to say unconscious, zones. In this case we are dealing with an equivalent of the *djapa-yoga*, almost certainly bringing about a twisting-back of self on self towards an ineffable grip of the first act of existence. The conceptualizations of the *waḥdat al-wudjūd* remain faithful to their monist view of the world by calling this movement of "enstasis" *fanāʾ* ... *billāh*.

This "attainment" is the fruit of a difficult technique of natural spirituality based on long asceticism. It is understandable that certain brotherhoods should have sought the equivalent (or what they thought to be the equivalent) by purely physical procedures: the sacred dances of the Mawlawiyya, the cries of the "Howlers", not to mention stimulating and stupefying drugs. Thus one arrives finally at veritable counterfeits which have not been without effect on the opposition by the *nahḍa* of contemporary Islam to the brotherhoods and its distrust of Ṣūfism.

To sum up: we find, in the course of the history of Ṣūfism, two distinct lines of utilization of the *dhikr*. The first and oldest makes it simply a method of prayer, without excluding other methods, where technique appears only in rudimentary form. The second, which became dominant, sees in it a guarantee of efficacity in attaining the highest "states" (*aḥwāl*) by virtue of a seeking after *ittiḥād* conceived as a (substantial) identification with the divine. This latter tendency often yields to the attraction of "procedures" and gnoses which become ever more extravagant. The testimony of Ghazzālī in the *Iḥyāʾ* stands at the hinge of the two lines—nearer to the first, and yet bearing witness already to the appearance of technique.

Bibliography: I. *Muslim works*. An exhaustive list would be very long. We shall restrict ourselves to recalling and specifying the chief sources used in the article: Kalābādhī, *Kitāb al-taʿarruf li-madhhab ahl al-taṣawwuf*, ed. Arberry, Cairo 1352/1933, ch. 47; Ḥallādj, *K. al-ṭawāsīn*, ed. Massignon, Paris (Geuthner), 1913, 33; id., *Dīwān*, 2nd ed., ed. Massignon, Paris (Geuthner), 1955; Abū Ḥāmid al-Ghazzālī, *Iḥyāʾ ʿulūm al-dīn*, Cairo 1352/1933, iii, 16-7; Ibn ʿAṭāʾ Allāh of Alexandria, *K. miftāḥ al-falāḥ wa-miṣbāḥ al-arwāḥ*, Cairo n. d. (often printed on the margin of Shaʿrānī, *e.g.*, Cairo 1321/1903); Zayn al-Dīn al-Khawāfī, *Al-waṣiyya al-ḳudsiyya*, MS. B.N. Paris, fonds arabe 762 (pointed out and studied by S. de Beaurecueil); Ibn ʿIyāḍ, *K. al-mafārīkh al-ʿaliyya fi ʾl-maʾāthir al-shādhiliyya*, Cairo 1355/1937, 108-13 and *passim*; Bāsh Tārzī, *K. al-minaḥ al-rabbāniyya*, Tunis 1351/1932; Muḥammad al-Sanūsī, *op. cit.*, to which may be added most of the Ṣūfī manuals, including Abū Ṭālib al-Makkī, *Ḳūt al-ḳulūb*, Cairo 1351/1932, etc.; in translation: Hudjwīrī, *Kashf al-maḥdjūb*, tr. Nicholson, *GMS*, xvii, *passim* (see Index); extract from Muḥammad Amīn al-Kurdī al-Naḳshbandī, *Tanwīr al-ḳulūb*, 3rd ed., Cairo, 548-58, unsigned French tr. as appendix to Jean Gouillard, *Petite Philocalie de la Prière du Cœur, Cahiers du Sud*, 1953.

(L. Gardet)

DHIMMA, the term used to designate the sort of indefinitely renewed contract through which the Muslim community accords hospitality and protection to members of other revealed religions, on condition of their acknowledging the domination of Islam. The beneficiaries of the *dhimma* are called *dhimmīs*, and are collectively referred to as *ahl al-dhimma* or simply *dhimma*. An account of the doctrinal position of Islam vis-à-vis the religions in question, and of the polemics between the two sides, is given in the article AHL AL-KITĀB; for a detailed account of the various religious communities see MADJŪS, NAṢĀRĀ, ṢĀBI'ŪN and YAHŪD. Mention is made here only of the general characteristics of the Muslim attitude to non-Muslims, as expressed in their institutions and social practices.

The bases of the treatment of non-Muslims in Islam depend partly on the attitude of the Prophet, partly on conditions obtaining at their conquest. Muḥammad is known to have first tried to integrate the principal Jewish groups at Medina into a rather loose organization, then opposed them violently, and finally, after the expansion of his authority across Arabia, concluded agreements of submission and protection with the Jews of other localities such as Khaybar, and with the Christians of, *e.g.*, Nadjrān; this last action alone could and did serve as precedent in the subsequent course of the Conquest. The essential Ḳur'ānic text is IX, 24: "Fight those who do not believe ... until they pay the *djizya* ..." which would imply that after they had come to pay there was no longer reason for fighting them. The conditions at the time of the conquest consisted essentially of the enormous numerical superiority of non-Muslims over Muslims in the conquered countries, and of their generally favourable bias towards the Arabs (because of the vexations to which they had been subjected by the official Churches); the natural, and indeed the only possible, policy was to extend to the inhabitants of the new territories the conception that had been tested experimentally in Arabia,—a flexible attitude in the absence of which no régime of the conquerors could have endured.

However, the precise nature of the earliest régimes, which varied according to the conditions obtaining at each conquest, is difficult to determine exactly, since the relevant texts have often been altered, and sometimes fabricated from the whole cloth, as a consequence of the differing concerns of Muslims and non-Muslims at later periods. Certain regulations have the temporary character of the demands made on a subject population by an army of occupation: dwellings, food-supply, intelligence, and security against espionage (it is as an example of this that we must understand the prohibition, on which later rigorists were to insist, of the wearing by *dhimmīs* of Arab dress, since in fact the natives and the Arabs dressed differently). But the essential—and lasting—stipulation concerns the payment of the distinguishing tax or *djizya* [*q.v.*], which was later to develop into a precise poll-tax, and which, expressing subjection, was to inaugurate the definitive fiscal status of the *dhimmīs*; this was in conformity with the usual custom of all mediaeval societies where non-dominant religious communities were concerned. Precautions must have been taken to avoid clashes between different communities, which at first enjoyed such friendly relations that buildings could be divided between Christians and Muslims; but it was only in the *amṣār* that restrictions on the right to construct new religious buildings could already from that time be maintained. The preservation by each community of its own laws and peculiar customs, as well as its own leaders—this also in conformity with the attitude of all mediaeval societies—must have resulted in the first place from the situation as it was rather than from any formal decision. The autochthonous non-Muslims, who were often unaccustomed to bear arms, were only exceptionally called upon for military services.

The *dhimmī* is defined as against the Muslim and the idolater (with reference to Arabia, but this is scarcely more than a memory); also as against the *ḥarbī* who is of the same faith but lives in territories not yet under Islam; and finally as against the *musta'min*, the foreigner who is granted the right of living in an Islamic territory for a short time (one year at most). Originally only Jews and Christians were involved; soon, however, it became necessary to consider the Zoroastrians, and later, especially in Central Asia, other minor faiths not mentioned in the Ḳur'ān. The Zoroastrians, by committing to writing the previously orally transmitted Avesta, attained the status of *Ahl al-kitāb*; but more generally the Muslims, without waiting for such a step, and whether or not there existed recognized communal chiefs to guarantee the unbroken performance of the agreements, in fact accorded to the subject believers of most religions an effective status comparable to that of the *dhimmīs* properly so-called, except for a few points of inferiority of which one or two examples will be given.

Soon, however, Islam was reinforced numerically, organized itself institutionally, and deepened culturally. Polemics began to make their appearance between the faiths, and the Muslims sought to delimit more clearly the rights of those who were not Muslims. The measures for Islamization of the state introduced by ʿAbd al-Malik already included, as it turned out, an indirect threat to the *dhimmīs*; it is, however, to ʿUmar b. ʿAbd al-ʿAzīz that tradition, doubtless partially based on truth, attributes the first discriminatory provisions concerning them. The only other Umayyad of note in this connexion is Yazīd II, on a special matter which will be referred to later; thereafter one must come down to Harūn al-Rashīd, and more especially to al-Mutawakkil, to encounter a policy really hostile to the *dhimmīs*. But always, through the centuries, the evolution of ideas has shown two aspects at once different and interdependent. On the one hand are the doctrinaires, found mainly among the *fuḳahā'* and the *ḳāḍīs*, who have interpreted the regulations concerning *dhimma* in a restrictive way, developing a programme which, if not one of persecution, is at least vexatious and repressive. From time to time a sovereign, either through Islamic zeal or through the need for popularity amongst them, ordains measures to the doctrinaires' satisfaction; sometimes, also, there are outbursts of popular anger against the *dhimmīs*, which in some cases arose from the places occupied by *dhimmīs* in the higher ranks of administration, especially that of finance.

But indeed, on the other hand, we must recognize that current practice fell very much short of the programme of the purists, which was hardly ever implemented except in the great Muslim centres and in the capitals, and was even then incomplete and sporadic; the different juridical schools are moreover not all in agreement, and some of them reiterate rules without any practical effect. On the whole the condition of the *dhimmīs*, although unstable in its minor practical aspects, was until about the 6th/12th century in the west, and the 7th/13th in the east, essentially satisfactory, in comparison with, say, that of the admittedly smaller Jewish community in the neighbouring Byzantine empire.

The principal directions in which the strengthening of Islamic control operated were as follows. On the one hand people like the *zindiḳs*, Manichaeans and those under their influence, who were suspected of wishing to propagate false doctrines within Islam, were excluded from the benefits of the *dhimma*; so too, of course, were those who, like the Mazdakites of Bābak, called in question the very political domination of Islam. As far as the *dhimmīs* in the traditional sense are concerned, their rights held good, and it could even be said that their financial situation had become closer to that of the Muslims than it was at first, since the converted possessors of *kharādj* lands had to continue to pay this *kharādj*, which the Arabs from the time of the conquest had not paid, and, though they did not pay the *djizya*, had to pay the *zakāt* on their other income. The *dhimmīs* moreover retained the autonomy of their own internal law, the stipulations of which formed the subject of treatises compiled at that time, and although they were able, if they wished, to apply to a Muslim judge (who would then often adjudicate according to Muslim law), they continued normally to resort to their own chiefs where these existed. Nevertheless, in relations between *dhimmīs* and Muslims, the two parties were not treated equally; thus, the Muslim could marry a *dhimmī* woman, but a *dhimmī* could not marry a Muslim woman; a *dhimmī* could not own a Muslim slave, although the converse was permitted; at the frontier the *dhimmī* merchant, although paying only half the rate paid by the *ḥarbī*, would pay double the rate for Muslims (20%, 10%, 5%); in criminal law it was frequently considered, in spite of the contrary opinion of the Ḥanafīs, that the blood-wit (*diya* [*q.v.*]) for a *dhimmī* was less (1/2 or 2/3) than that for a Muslim—less still in the case of a Zoroastrian—a principle the equivalents of which are encountered in all societies at this time. Finally the *dhimmī* had, according to the doctrine going back in part to the time of ʿUmar b. ʿAbd al-ʿAzīz, to wear distinguishing articles of dress, in particular the *zunnār* belt, the original intention of which was perhaps merely to prevent administrative errors but which gradually came to be regarded as a sign of humiliation, and was accompanied by complementary restrictions such as the prohibition of fine cloth, noble steeds, uncut forelocks, etc.; in fact, it would appear that these regulations, often variable in their detail, had never been respected for any length of time (whence their repetition by pietistic sovereigns), and it is even doubtful whether there was any real desire to apply them outside Baghdād and the great Islamic centres. On the other hand, although there may have been a natural tendency for town-dwellers to reside in different districts according to their faiths, there were no precise quarters, nor *a fortiori* any obligatory quarters, for *dhimmīs* of any kind. On the contrary, it was the close association of Muslims and non-Muslims in everyday life that provided the *raison d'être* of the restrictions mentioned above. Similarly, although there may have been some professional specialization, such as the trade of dyeing in the hands of the Jews, in general the mixture of faiths among all trades is the striking characteristic of society in "classical" times.

Although there was obviously no "liberty of conscience", as it would now be understood, in any Muslim society, Islam tolerated the religions of the *dhimmīs* subject to the following restrictions: it was forbidden to insult Islam, to seek to convert a Muslim, and apostasy was forbidden (all this, in principle, subject to the death penalty). The child of a mixed marriage was Muslim. As regards places of worship, the jurists are almost unanimous in interpreting restrictively the undertaking made on behalf of Muslims to uphold them, in the sense that this promise could apply only to those buildings which were in existence at the time of the advent of Islamic power; hence new building was forbidden, and rigorists opposed even the reconstruction of buildings fallen into decay. The practice of earlier centuries shows that these probibitions were rarely made absolute, and that as long as money was available the construction of new buildings was usually possible, even in Muslim centres like Fusṭāṭ and Cairo, and *a fortiori* in the regions where there was a non-Muslim majority during the greater part of the middle ages, such as certain districts in Upper Mesopotamia. Yazīd II had forbidden figure-representations in these buildings, but this order—linked with the iconoclastic movement, regarded favourably by many monophysite Christians, which was shortly afterwards to show itself so strongly at Byzantium—was certainly not enforced in any lasting way. There were also various limitations on the outward expressions of worship, such as processions and the use of bells, though these were never general in the earlier centuries of Islam. Only in Arabia, most strictly in the Holy Cities, was permanent residence by *dhimmīs* forbidden, following measures some of which go back to ʿUmar—although temporary exceptions made under the Umayyads and ʿAbbāsids were numerous, and indeed Jews lived in the Yemen until a few years ago.

Of course, those Muslims who interpreted the early pledges on the *dhimma* restrictively endeavoured to find textual authority for their attitude, as did the Christians who opposed them. Thus appeared the allegedly ancient Pact of ʿUmar on the one hand—which in its complete form is not attested before the end of the 5th/11th century—and on the other the Edict of the Prophet to the Christians, a pious fraud of Nestorian monks of the 3rd/9th century. In addition there came gradually into prominence a person, the *muḥtasib* [*q.v.*], who, entrusted with the maintenance of order in the streets and markets, was to include within his province the control of the *dhimmīs*.

The domain from which one might have expected, from a doctrinal point of view, to see *dhimmīs* excluded is that of government; but in fact this is not the case. Originally the Arabs would, without their assistance, have been unable to carry out the duties of an administration which was primarily the administration of the non-Muslim population. Later Christian bureaucrats, Nestorians in ʿIrāḳ and, more permanently, Copts in Egypt, were able to uphold family positions acquired in the face of the

competition of Muslims, who turned more readily towards other professions, and to whom authority would in any case have found it difficult to entrust duties whose Islamic legality was questionable; the *dhimmīs*, whose situation depended more on the favour of prince or vizier, were more faithful to them. Nowhere had Jews and Christians played a more important part in these matters than in Egypt under the Fāṭimids; much the same position arose, however, at certain periods in Spain, and even in the east, al-Māwardī, the theoretician of Caliphal revival, admits—legitimizing past instances—that even a *dhimmī* vizier was possible, provided that his vizierate was 'executive' (*tanfīdh*) and not with power to command, *i.e.*, that in practice he should neither exercise explicit political responsibility for major political decisions nor, in particular, sit in judgment over Muslims or take the initiative in matters where Islam was concerned. Obviously, it happened on many occasions that the condition upon which a *dhimmī* could secure or retain a high post was that he should become a convert to Islam; but the bonds of clientship and patronage still held, and the official new Muslim could protect the *dhimmī* staff to whom he was used.

Moreover, since the *dhimmīs* remained to some extent under the jurisdiction of their own leaders, it followed that the latter were officially invested by the Muslim ruler—to whom the community did not hesitate to appeal when they disagreed on a candidate. The Jews thus came officially under the government of their Exilarch, and the Christians of different denominations similarly under that of their respective Catholicoi and Patriarchs; in this respect the position of the Zoroastrians is less clear. In ʿIrāḳ, the Catholicos of the Nestorians had some precedence within the entire Christian community.

One single persecution of the *dhimmīs* has been recorded in the classical centuries of Islam, that of the Fāṭimid al-Ḥākim [*q.v.*], which made a considerable impact in both East and West, because of its severity and of the destruction of the Holy Sepulchre; this was, however, the work of a visionary caliph, whose decision, difficult to explain, may not derive from ordinary processes of reasoning; he himself, at the end of his reign, retracted his measures, and his successors until the end of the dynasty restored the previous tradition of an extremely broad toleration. Even the Ayyūbid conquest, which adversely affected the Armenian community, hardly impaired the administrative position of the Copts. The restriction of *dhimmīs* in special quarters in Jerusalem was an exceptional move on the part of the Fāṭimids, and was intended to ensure their safety.

One cannot, therefore, say that it was persecution which led in some cases to the diminution and in others the complete disappearance of non-Muslim communities. The factors, essentially social, involved in this process cannot be discussed here; it must, however, be emphasized that the general position of the *dhimmīs* was gradually transformed by the fact that they passed almost everywhere from the position of a majority to that of a minority community. Moreover, instead of consisting, as previously, of a variety of communities, the gradual disappearance of Christians (foreigners excepted) in the Maghrib, of Christians also in Central Asia a little later, and of Zoroastrians in Īrān, bring it about that in some regions the category of *dhimmī* had practically ceased to exist, while in others it had come to comprise only the Jewish community, more tenacious but by now almost exclusively urban. These proportions were of course to be reversed after the establishment of the Ottoman empire in Europe, but this represented a new phenomenon which was to lead to no modification in the rest of the Muslim world.

It cannot be denied that from the last three or four centuries of the Middle Ages there was a general hardening against *dhimmīs* in Muslim countries, helped materially and morally by the change in numerical proportions. Before proceeding further, however, it must be noticed that this hardening of opinion was contemporary with that which appeared in Christendom against the Jews and against Muslims where there were any, without our being able to say to what extent there was convergence, influence, or reaction. On the other hand it must be emphasized that the populace were more easily excited as a result of the deterioration in the economic climate, and that generally changes in the Muslim attitude had been occasioned more by political than by religious considerations. Hitherto there had been scarcely any difference in the treatment accorded to Christians and Jews (at most they were distinguished by prescribed differences in dress); but it later came about that some categories of *dhimmīs* were looked on as friends of foreign powers and were worse treated, and naturally some Christians were in this respect more of a target than the Jews. There is nothing in mediaeval Islam which could specifically be called anti-semitism.

Although it has sometimes been considered that the formation of the Saldjūḳ empire aggravated the condition of the Christian community, this is only very marginally true. The Saldjūḳids, partly because the numerical proportions of the various communities made it less of a natural conclusion, employed Christian functionaries less than their predecessors, whence doubtless there were a few less safeguards in the life of the community; nothing, however, was directly changed in the régime of which they were the beneficiaries. In Asia Minor the Turkish conquest evidently caused much suffering and loss to Byzantine Christendom, but inter-denominational relations became singularly good once a stable political situation had been established. Contrary to what might have been expected, the Crusades had at first no noticeable effect on the condition of the *dhimmīs*, because the eastern Christians were not of the Latin rite and maintained on the whole an attitude of correct loyalty to their masters—except for the Armenians, who were only to be met with locally. The first suspicions seem to have mounted against the Copts at the time of the Frankish expeditions into Egypt; there may also have been some in Syria and the neighbouring lands after the penetration of Latin missionaries, whose ministries were in vain precisely because it was impossible for the local Christian communities to come into contact with them without becoming politically suspect. The climax came with the Mongol invasions which, wherever they occurred, were of temporary advantage to the Christians, as there were Christians in the Mongol ranks, and because the Mongols held the balance between the various faiths; several acts of excess by Christians against Islam followed locally; but finally Muslim reaction made the Christians pay for their behaviour, and the expansion of intolerant nomads to the detriment of cultivators was a grave blow to rural Christian communities in Armenia and Upper Mesopotamia even when these were under Mongol

control. Tīmūr's massacres, and the rivalries between Turkomans in the 7th/15th centuries, heightened the drama.

In the Mamlūk state the native Christians, the Maronites even more than the Copts, suffered the repercussions of the struggle against the Mongols, the perpetuation of the state of war maintained against the Franks on the mediterranean coastline, and the growing supremacy of western merchants over their eastern rivals. The Mamlūk government tried in general to uphold the earlier legal system, but it was able neither to prevent popular violence stirred up by extremists, especially in 721/1321, nor to resist the pressure of jurists, such as Ibn Taymiyya, who insisted on an increasingly vexatious interpretation of the law regarding *dhimmīs*. Not only were the regulations on dress periodically renewed, though still with doubtful efficacy, but the regulations on mounts were narrowed so as to allow the *dhimmīs* nothing better than indifferent donkeys, and a new restriction was introduced—which has an Italian parallel—which forbade them to possess houses higher than those occupied by Muslims (thus indicating incidentally that they did not live in special quarters). Care was in general taken that nothing in their everyday social comportment might tend to conceal the evidence of their inferiority vis-à-vis Muslims; an attempt was made to embarrass the *dhimmī*'s trade by regulations, always temporary, against the sale of wine; there was a growing repugnance on the part of certain Muslims to associate with non-Muslims, and their religious buildings were destroyed on various pretexts; there was a partial exclusion of *dhimmīs* even from the administrative offices themselves. From this period date also treatises specially written against the *dhimmīs* (no longer merely religious polemics), to say nothing of chapters inserted in works of *fiḳh*.

In the West the Almoravids, and even more the Almohads, had adopted, earlier than the East, an intolerant policy, which is partly explained by the suspicions entertained of their Christian subjects of complicity with the Spaniards of the northern kingdoms who were already intent on the Reconquista, although the Jews suffered no less, whence for example the emigration of Maimonides to the East; *dhimmīs* ceased to be employed in the administration, the distinctive badges reappeared, etc. In the Maghrib there started to appear for the Jews, henceforth the only *dhimmīs*, special quarters (*mallāḥ*, *ḥāra*) which remind one of the European ghetto, and they were authorized to live in certain towns only. They regained, however, some influence after the arrival of their co-religionists who had been expelled from Christian Spain. It must be remembered that this country, for long tolerant, moved at the end of the Middle Ages towards the expulsion of all non-Christians, Jews and Muslims alike; this was achieved at the beginning of the 17th century after two centuries of ill-treatment.

Objectivity requires us to attempt a comparison between Christian and Muslim intolerance, which have partial resemblances and partial differences. Islam has, in spite of many upsets, shown more toleration than Europe towards the Jews who remained in Muslim lands. In places where Christian communities did not die out it may have harassed them, but it tolerated them when they did not seem too closely bound up with western Christianity (as in Egypt and Syria); it has bullied them more roughly in Spain, after a long period of toleration, in the face of the Reconquista (it is impossible to say how the Maghrib would have tolerated Christian communities there while Spain was expelling its Muslims, since except for foreigners there were none). What one may emphasize is that, although religious factors obviously contributed to the intolerance shown in particular by the Almohads, it is political factors which in general outweighed strictly religious intolerance in Islam. Finally, it was at the time of the expulsions from Spain and the religious wars in the West that the constitution of the Ottoman empire restored—albeit without modifying the situation in other Islamic countries—the spectacle of an Islamo-*dhimmī* symbiosis which was none the less remarkable for having been indispensable for the maintenance of the régime, as it had been for the Arab conquerors in the 1st/7th century. The Jews found asylum there, the Armenians and Greeks, in the 18th century, backed by Christian Europe, attained to positions of the highest importance. The later deteriorations are connected with the history of nationalist movements and the change in the notion of the State, which, gradually reaching all Muslim peoples, has emptied the concept of *dhimmī* of its traditional content. No more can be done here than merely to mention this last phase [see ḲAWMIYYA, MILLA and WAṬAN].

Bibliography: It is obviously impossible to enumerate here all the sources, which might include almost all Islamic legal and historical literature, with additions from the geographers, the *adab* authors, etc. An extensive, but incomplete, list will be found in Fattal, cited below. One might notice the importance, for the earlier period, of Balādhurī and Abū Yūsuf; later of Māwardī; then of the works on *ḥisba*, omitted by Fattal (see Gaudefroy-Demombynes, in *JA*, ccxxx, 1938, and ʿArīnī's edition of Shayzarī, Cairo 1946); and in general the Christian chronicles, either Arabic, like the *History of the Alexandria Patriarchs* and the historical chronicle of Mari (ed. Gismondi, 1909), or non-Arabic, like the Syriac chronicle of Michael the Syrian (ed. Chabot); mention may also be made of the Jewish documents, mainly in Arabic, of the *Geniza*. Some smaller works specially directed against the *dhimmīs* date from Ayyūbid and Mamlūk times, such as al-Nābulusī, *Tadjrīd* (fragments edited by Cl. Cahen in *BIFAO*, lix, 1960; complete edition in prepation by M. Perlmann); Ghāzī b. al-Wāsiṭī, *Radd ʿalā ahl al-dhimmā*, ed. and trans. R. Gottheil, in *JAOS*, xli, 1921; the *Fetwa sur la condition des dhimmīs*, etc., trans. Belin, in *JA*, 4e série, xviii-xix, 1851-2; the *Tract against Christian officials* of al-Asnawī, ed. M. Perlmann, in *Goldziher Mem.*, ii, 1958. On this literature in general see Perlmann, in *BSOAS*, 1942.

In the modern literature there are two general studies worthy of notice: A. S. Tritton, *The Caliphs and their non-Muslim subjects*, London 1930 (Arabic trans. Ḥasan Ḥabashī, Cairo n.d.), and Ant. Fattal, *Le statut légal des non-musulmans en pays d'islam*, Beirut 1958. Neither however can be considered as complete, nor to have sought to portray and explain the evolution and the differentiation in the condition of the *dhimmīs*. Deeper studies, but limited to the category of the Jews, are: S. D. Goitein, *Jews and Arabs*, New York 1955; the numerous but scattered passages relevant to the world of Islam in S. Baron, *History of the Jews*, iii-vii (up to the 12th century), New York 1957-9; E. Strauss[-Ashtor], *History*

of the Jews in Egypt and Syria under the Mamlūks (in Hebrew), 2 vols., Jerusalem 1944-51; E. Ashtor, *History of the Jews in Muslim Spain,* (in Hebrew), i, *711-1002,* Jerusalem 1960. The fuller and more diverse history of the Christians has not been the subject of any special study; for religious polemics, see AHL AL-KITĀB. An important work on the Christians in Spain is I. de las Cagigas, *Los Mozarabes,* 2 vols., Madrid 1947-8; E. Cerulli, *Etiopi in Palestina,* 2 vols., Rome 1943, deals in fact with the entire religious history of that country. For the Zoroastrians the only collected references are to be found in works on Iranian history, such as B. Spuler, *Iran in früh-islamischer Zeit,* Wiesbaden 1952 (expanded English translation in the press). Some general information on *dhimmīs* as a whole in Mez, *Die Renaissance des Islams,* ch. iv; Cl. Cahen, *L'Islam et les Minorités confessionelles,* in *La Table Ronde,* 1958; E. Strauss[-Ashtor], *The social isolation of Ahl adh-dhimma,* in *P. Hirschler Memorial Book,* Budapest 1950; N. Edelby, *Essai sur l'autonomie juridictionnelle des Chrétientés d'Orient,* in *Arch. d'Hist. du Droit Oriental,* 1952; O. Turan, *Les souverains Seldjoukides et leurs sujets non-musulmans,* in *Stud. Isl.,* i, 1953. More detailed bibliography appears in the articles on the various religions. On the Ottoman period, see F. W. Hasluck, *Christianity and Islam under the Sultans,* 2 vols., Oxford 1929; Gibb-Bowen, 1/2, ch. xiv. (CL. CAHEN)

DHIMMA. The term *dhimma,* in its legal sense, bears two meanings, the first of which, that of the works on *Uṣūl* (legal theory), is equivalent to the notion of capacity, and such is the definition of it given by the classical doctrine. The *dhimma* is the legal quality which makes the individual a proper subject of law, that is, a proper addressee of the rule which provides him with rights or charges him with obligations. In this sense the *dhimma* may be identified with the legal personality. It is for this reason that every person is endowed with a *dhimma* from the moment of birth. Equally it follows that the *dhimma* disappears with the person at death.

But the *dhimma,* an attribute of the personality, is never used exclusively, by the Muslim legal theoreticians, in relation to a person's estate. It embraces all kinds of proprietary and extra-proprietary rights. Thus the duty of the ritual prayer binds the person insofar as it is endowed with a *dhimma.* So completely is the *dhimma* identified with the legal personality that certain authors have been able to assert that it is a useless notion and even devoid of any real meaning (Taftāzānī, *al-Talwīḥ,* ii, 726).

In its second sense, that of the legal practitioners, the term goes to the root of the notion of obligation. It is the *fides* which binds the debtor to the creditor. The bond of the obligation requires the debtor to perform a given act (*fiʿl*), and this act will be obtained at the demand of the creditor, *muṭālaba.* In the case of a real right (*ḥaḳḳ fi'l ʿayn*) on the contrary no bond exists: there will be no case of exacting any performance from a specified person. For this reason, then, there will be no question of *dhimma.* Some authors have so completely identified the idea of *dhimma* with that of obligation that in their view *dhimma* is properly undertaking, *ʿahd,* or guarantee, *ḍamān.* Others restrict the term to contractual obligations (al-Nasafī, *Iṣṭilāḥāt al-ḥanafiyya,* 65).

But in actual fact *dhimma* is never identical with obligation: it is properly the basis of an obligation. Once *fides* has been brought into existence the object of the right will exist in the seat of rights which is the person. It is at this stage that the second sense given to the term by the legal practitioners merges with that of the theoreticians of Islamic law. The *dhimma* is not only the bond which ties the creditor to the debtor but is, in particular, the seat of it. But here it embraces only rights of debt properly so-called. Thus it is that the obligation to give alms to those in need is not held to exist in the *dhimma.* It must be particularly noted that, as distinct from Western law, a right of debt with which the *dhimma* is charged is restricted to the right which exists in relation to a sum of money or other fungible goods. It is therefore only the obligation termed *dayn* that has its basis in the *dhimma.* The case will be the same if the obligation is one of future performance (*istiṣnāʿ*). But if the obligation exists in regard to a specific object it will be termed *ʿayn* and this obligation will lie outside the *dhimma.* In this case indeed the obligation cannot be *in futuro* and on the other hand is not discharged, in case of non-performance, by payment of damages.

It results that the idea of obligation in Islamic law is of a quite different structure according as to whether it is or is not directed towards a specific object.

In the first case it does not create a legal bond since it cannot be *in futuro.* In the second case the creditor's purpose is to bind his debtor, and this bond is established on the basis of the *dhimma.* Obligation, then, will properly be, as it has been defined by Muslim lawyers, an incorporeal right existing in the *dhimma* of the debtor. Thus the *dhimma* becomes, in the final analysis, the equivalent of what is termed in modern law, the debtor's estate.

(CHAFIK CHEHATA)

DHIMMĪ [see AHL AL-DHIMMA].

DHIRĀʿ, originally the part of the arm from the elbow to the tip of the middle finger, then the measure of the cubit, and at the same time the name given to the instrument for measuring it. The legal cubit is four handsbreadths (*ḳabḍa* = index finger, middle finger, ring finger, and little finger put together), each of six fingerbreadths (*aṣbaʿ* = middle joint of the middle finger) each the width of six barley corns (*shaʿīra*) laid side by side. A considerable number of different cubits were in common use in Islam. Roughly speaking they can be grouped around the following four measures: the legal cubit, the "black" cubit, the king's cubit, and the cloth cubit. The point of departure for all these calculations is the cubit of the Nilometer on the island of al-Rawḍa of the year 247/861, which, on an average, measures 54.04 cm.

1) The legal cubit (*al-dhirāʿ al-sharʿiyya*), is the same as the Egyptian hand cubit (*dhirāʿ al-yad,* also called *al-dhirāʿ al-ḳā'ima*), the Joseph cubit (*al-dhirāʿ al-Yūsufiyya,* called after Ḳāḍī Abū Yūsuf, who died in 182/798), the post cubit (*dhirāʿ al-barīd*), the "freed" cubit (*al-dhirāʿ al-mursala*), and the thread cubit (*dhirāʿ al-ghazl*), measuring 49.8 cm. (In ʿAbbāsid times, a cubit measured only

some 48.25 cm. in Baghdād; this can possibly be traced back to the caliph al-Maʾmūn (170-218/786-833) who reorganized surveying).

2) The "black" cubit (*al-dhirāʿ al-sawdāʾ*), fixed as above at 54.04, is identical with the "common" cubit (*al-dhirāʿ al-ʿāmma*), the sack-cloth cubit (*dhirāʿ al-kirbās*), and the cubit in common use in the Maghrib and in Spain, *al-dhirāʿ al-Rashshāshiyya*. The "black" cubit came into use in ʿAbbāsid times, but was not introduced, as is often stated, by al-Maʾmūn, who had measurements carried out in the legal cubit.

3) The originally Persian "king's" cubit (*dhirāʿ al-malik*), since the caliph al-Manṣūr (136/754-158/775) known as the (great) Hāshimī cubit (*al-dhirāʿ al-Hāshimiyya*). It measured eight *ḳabḍa* instead of six, and measured on an average 66.5 cm. It is identical with the Ziyādī cubit (*al-dhirāʿ al-Ziyādiyya*), which Ziyād b. Abīhi (died 53/673) used in the survey of ʿIrāḳ, and which is therefore also known as the survey cubit (*dhirāʿ al-misāḥa*); it is also identical with the "work" cubit (*dhirāʿ al-ʿamal*), and probably also with the cubit *al-dhirāʿ al-hindāsa*, which measures 65.6 cm.

4) The cloth cubit, which is also known in Levantine commerce as pic, varied from town to town. The Egyptian cloth cubit (*dhirāʿ al-bazz*, also called *al-dhirāʿ al-baladiyya*, identical with the late-mediaeval *dhirāʿ al-ḥadīd*, or "iron" cubit, which seems to have been originally the same as the "black" cubit) measured 58.15 cm., the cloth cubit of Damascus 63 cm., the widely accepted cloth-cubit of Aleppo 67.7 cm., that of Baghdād 82.9 cm., and that of Istanbul 68.6 cm.

Other cubit measures: beside the "great", there was also a "small" Hāshimī cubit of 60.05 cm., also known as *al-dhirāʿ al-Bilāliyya*, after Bilāl b. Abī Burda (died 121/739), a ḳāḍī in Baṣra. The Egyptian carpenter's cubit (*al-dhirāʿ bi 'l-nadjdjārī*) was identical with the architects' cubit (*al-dhirāʿ al-miʿmāriyya*), and measured ca. 77.5 cm. (standardised at 75 cm. in the 19th century). The ʿAbbāsid "house" cubit (*dhirāʿ al-dūr*) which was introduced by ḳāḍī Ibn Abī Laylā (died 148/765) measured only 50.3 cm. The "scale" cubit (*al-dhirāʿ al-mīzāniyya*), introduced by the caliph al-Maʾmūn, was chiefly used for measuring canals, and measured 145.6 cm.; it was double the length of the cubit of the caliph ʿUmar (*al-dhirāʿ al-ʿUmariyya*) which was 72.8 cm. The Persian cubit (*dharʿ*, generally called *gaz*) was in the Middle Ages either the legal cubit of 49.8 cm. or the Iṣfahān cubit of 8/5 *dharʿ-i sharʿi* = 79.8 cm. In the 17th century, there was a "royal" cubit (*gaz-i shāhī*) of 95 cm. in Iran; the "shortened" cubit (*gaz-i mukassar*) of 68 cm. was used for measuring cloth; this was probably the cloth cubit of Aleppo. Today, 1 *gaz* = 104 cm. in Īrān. There was also a "royal" cubit (*dhirāʿ-i pādishāhī*) in Mughal India which consisted of 40 fingerbreadths (*angusht*) = 81.3 cm.

Subdivisions of the cubit: basically, there were six handsbreadths (*ḳabḍa*) to the cubit; the *ḳabḍa* of the legal cubit was thus 8.31 cm., that of the common or "black" cubit was 9 cm. In the 19th century, the *ḳabḍa* in Egypt was even 16.1 cm. The *ḳabḍa*, in turn, consisted basically of four fingerbreadths (*aṣbaʿ*); the *aṣbaʿ* of the legal cubit was thus 2.078 cm., and that of the "black" cubit 2.25 cm. In Egypt, the *aṣbaʿ* is officially established at 3.125 cm. The fingerbreadth (*angusht*) of the Mughals was standardized at 2.032 cm. by the emperor Akbar at the end of the 10th/16th century.

Multiples of the cubit: the *bāʿ* or 'fathom', also known as *ḳāma*, is basically 4 legal cubits = 199.5 cm., or approximately 2 metres, and thus the thousandth part of a mile (*mīl*). Today in Egypt, the *bāʿ* = 4 "carpenter's" cubits = 3 metres. The *ḳaṣaba*, or measuring rod (Persian *nāb*; *bāb* is a reading error) is predominantly used in surveying. The Fāṭimid al-Ḥākim bi-amri'llāh (375-411/985-1021) introduced the *ḳaṣaba Ḥākimiyya*, which measured $7^1/_7$ "black" cubits, on the norm of 3.85 metres, established by a French expedition to Egypt. In 1830, the *ḳaṣaba* was established at 3.55 metres. The *ashl* or "rope" (Persian *ṭanāb*) equals 20 *bāʿ* = 60 Hāshimī cubits = 80 legal cubits = 39.9 metres; 150 *ṭanāb* or 3 *mīl* equal one parasang (*farsakh*) = 5985 metres = approx. 6 km.

DHOLKĀ [see GUDJARĀT].

DHŪ, DHĪ, DHĀ, demonstrative forms based on the demonstrative element *dh*. The variety of their uses precludes these forms from being regarded as a single declined word; thus:

Dhū was the relative pronoun, invariable, of the Ṭayyiʾ; corresponding to the Hebrew *zū*, the poetic form of the relative pronoun.

Dhī forms part of the masc. relative pronoun *alladhī*; but *allatī* in the feminine. The opposition *dh/t* marks the gender. Corresponding to *dhī* are the Aramaic biblical relative, invariable, *dī* (*dᵉ* in syr.), the Geez masc. demonstrative *ze*, acc. *za*.

Dhā masc. sing. demonstrative (near object), diminutive *dhayyā*; *dhī* for the feminine, the opposition *ā/ī* then marking the gender here. J. Barth understood it as *ē/ī*, maintaining the existence of an ancient sound *ē*, from which followed his sharp controversy with A. Fischer (*ZDMG*, 1905, 159-61, 443-8, 633-40, 644-71; J. Barth, *Sprachwissenschfl. Untersuch.*, i, Leipzig 1907, 30-46). *Dhā* occurs most often either reinforced with *hā-*: *hādhā*, or combined with other demonstratives: *dhāka*, *dhālika*. Corresponding with *dhā* are the Geez feminine sing. demonstrative *zā*, Hebr. *zōtʰ* (= **dhā* + *t*), the Geez masc. relative *za*.

Once in the nominal form with the sense: "he of", then "who has", "possessor of", *dhū* follows the Ist declension, taking the dual and the external plural. But it is always followed by a noun in the dependent grammatical phrase (common noun, according to the requirements of the Arab grammarians: al-Zamakhsharī, *Muf.*, § 130, 2nd ed. Broch; al-Ḥarīrī, *Durra*, ed. H. Thorbecke, 138). Thus *dhū mālⁱⁿ* "possessor of money", pl. *dhawū mālⁱⁿ* or (elegantly *)ulū mālⁱⁿ*; for the feminine with the same construction: *dhātu mālⁱⁿ*, pl. *dhawātu mālⁱⁿ* (or *ulātu mālⁱⁿ*). See W. Wright, *Ar. Gr*³, i, 265 D, in *Lisān* the art.: *dhū wa-dhawāt*, xx, 344/xv, 456; *Muf.*, § 122, for expressions like *dhāta yawmⁱⁿ* "a day", *dhāta 'l-yamīni* "on the right".

Dhū, having this meaning of "possessor of" or "who has", was suited to provide surnames or nicknames (*laḳab*), *e.g.* *Dhu 'l-Ḳarnayn* (for Alexander), which have sometimes become the most commonly known name for some individual, e.g. the poet *Dhu 'l-Rumma*. For the kings or princes of the Yemen (such as *Dhū Yazan*) it has become an autonomous word with internal plural; these are the *adhwāʾ al-yaman* (see Wright, *ibid.*, 266 A and *Lisān*, *ibid.*),

[see ADHWĀ']. In addition, two Muslim names of months: *Dhu 'l-ḥidjdja*, *Dhu 'l-ḳaʿda* [see TA'RĪKH, i].

Bibliography: in the text. In addition: J. Barth, *Die Pronominalbildung in den semitischen Sprachen*, Leipzig 1913, 103-16, 152-8; for modern dialects: W. Fischer, *Die demonstrativen Bildungen der neuarabischen Dialekte*, The Hague 1959, 57-98. (H. FLEISCH)

DHU 'L-FAḲĀR, the name of the famous sword which Muḥammad obtained as booty in the battle of Badr; it previously belonged to a heathen named al-ʿĀṣ b. Munabbih, killed in the battle. It is mentioned in the *Sīra* (ed. Saḳḳā, etc., 1375/1955), ii, 100, and in several *ḥadīths* (see for example Ibn Saʿd, ii, 2, section: *fī suyūf al-Nabī*. The expression Dhu 'l-Faḳār is explained by the presence on this sword of notches (*fuḳra*) or grooves (cf. the expression *sayf mufaḳḳar*). According to a tradition, the sword bore an inscription referring to blood-money which ended with the words *lā yuḳtal Muslim bi-kāfir* "no Muslim shall be slain for an unbeliever". The proverbial expression *lā sayf illā Dhu 'l-Faḳār* has often been inscribed on finely engraved swords, from the middle ages down to our own times, throughout the Muslim world. The words *wa-lā fatā illā ʿAlī* are sometimes added, because, although Muḥammad's sword, after belonging to ʿAlī, passed into the possession of the ʿAbbāsid caliphs, it became an attribute of ʿAlī and an ʿAlid symbol. Muslim iconography represented it with two points, probably in order to mark its magical character (the two points were used to put out the eyes of an enemy; for a representation of a sword with two points, among other magic objects, see V. Monteil, in *REI*, 1940/i-ii, 22). Dhu 'l-Faḳār became a proper name which is found more particularly among Shīʿīs.

Bibliography: F. W. Schwarzlose, *Die Waffen der alten Araber*, Leipzig 1886, 152; G. Zawadowski, *Note sur l'origine magique de Dhoû-l-Faqâr*, in *En Terre d'Islam*, 1943/I, 36-40. (E. MITTWOCH*)

DHU 'L-FAḲĀRIYYA, (alternatively *Faḳāriyya*, *Zulfaḳāriyya*); a Mamlūk household and political faction in Egypt during the 17th and 18th centuries.

(1) Origin and first ascendancy. The eponymous founder of the household, Dhu 'l-Faḳār Bey, is a shadowy figure, who seems to have flourished in the first third of the 17th century, but is not mentioned by contemporary chroniclers. The account (in Djabartī, *ʿAdjā'ib al-Āthār*, i, 21-3) which makes Dhu 'l-Faḳār and the rival eponym, Ḳāsim, contemporaries of sultan Selīm I is legendary. The political importance of the Faḳāriyya began with the *amīr al-ḥadjdj* Riḍwān Bey, a *mamlūk* of the eponym (Muḥammad al-Muḥibbī, *Khulāṣat al-Āthār*, Būlāḳ, 1290; ii, 164-6). He held the command of the Pilgrimage for over twenty years until his death in Djumādā II 1066/April 1656. The grandees of his household dominated the Egyptian political scene until Ṣafar 1071/October 1660, when their rivals, the Ḳāsimiyya faction, joined with the Ottoman viceroy to overthrow them. Their forces and leaders were dispersed, several of the Faḳārī beys being put to death at al-Ṭarrāna by the Ḳāsimī, Aḥmad Bey the Bosniak.

(2) The Ḳāsimī ascendancy. For over forty years after the Ṭarrāna episode, the Faḳāriyya remained in a state of diminished power and prestige. The Ḳāsimiyya, although the dominant faction, did not display the arrogance and turbulence *vis-à-vis* the viceroys which had characterized the Faḳāriyya during their ascendancy. The disturbances of this period originated mainly in the garrison of Cairo. By 1123/1711-12, however, a dangerous political polarization had developed. The Faḳāriyya and Ḳāsimiyya were allied respectively with the much older factions of Saʿd and Ḥarām among the Egyptian artisans and nomads. In a quarrel between the Janissaries and ʿAzabs in that year, the Faḳāriyya supported the former and the Ḳāsimiyya the latter. The Ḳāsimiyya-ʿAzab combination was ultimately victorious, but the death during the fighting of Īwāẓ (ʿIwaḍ) Bey, the leading Ḳāsimī grandee, opened a vendetta between the two factions which dragged on for two decades. Finally in 1142/1729-30, the Faḳāriyya succeeded in extirpating their rivals, and restoring their own ascendancy.

(3) The second ascendancy of the Faḳāriyya. The architect of the Faḳārī triumph, another Dhu 'l-Faḳār Bey, (who was assassinated on the eve of victory), came, not from the original Mamlūk household deriving from Riḍwān Bey, but from a household established by a regimental officer of Anatolian (*Rūmī*) origin, Ḥasan Balfiyya, *agha* of the Gönüllüs, who flourished in the late 11th/17th century. Another branch of this household stemmed from Muṣṭafā al-Ḳāzdughlī, also an Anatolian, who entered the service of Ḥasan Agha. The predominance of the Ḳāzdughliyya branch was established by Ibrāhīm Kâhya, who in 1156/1743-44 allied with Riḍwān Kâhya al-Djulfī to oust ʿUthmān Bey, a *mamlūk* of the late Dhu 'l-Faḳār Bey and holder of the supremacy (*ri'āsa*) in Egypt. The Ḳāzdughliyya, hitherto a regimental household, now entered the beylicate, several of Ibrāhīm Kâhya's *mamlūks* being appointed beys, both before and after his death in Ṣafar 1168/November-December 1754. Amongst them was Bulut Kapan ʿAlī Bey, usually called ʿAlī Bey the Great (see ʿALĪ BEY). In spite of the inveterate rivalry among the Ḳāzdughliyya grandees, they maintained their ascendancy, ultimately embodied in the duumvirate of Ibrāhīm Bey and Murād Bey, until the French invasion under Bonaparte in 1798.

DHU 'L-ḤIDJDJA [see TA'RĪKH, i].

DHU 'L-HIMMA or DHĀT AL-HIMMA, name of the principal heroine of a romance of Arab chivalry entitled, in the 1327/1909 edition, *Sīrat al-amīra Dhāt al-Himma wa-waladihā ʿAbd al-Wahhāb wa 'l-amīr Abū (sic) Muḥammad al-Baṭṭāl wa-ʿUḳba shaykh al-ḍalāl wa-Shūmadris al-muḥtāl*, which, in the subtitle, describes itself as "the greatest history of the Arabs, and the Umayyad and ʿAbbāsid caliphs, comprising the history of the Arabs and their wars ..... and including their amazing conquests". Also known is the title *Sīrat al-mudjāhidīn wa-abṭāl al-muwaḥḥidīn al-amīra Dhū (sic) 'l-Himma wa-ʿAbd al-Wahhāb* etc. (catalogue of Vienna MSS by Flügel, ii, 13). Cf. also Brockelmann, S II, 65 and Sarkis, *Dict. encycl.*, xi, 1930, 2008.

The main subject of this romance is the Arab

war against the Byzantines from the Umayyad period until the end of al-Wāthiḳ's caliphate, that is to say it covers in principle the first, second and third centuries of the Hidjra, but also reflects later events. Though this is the general character of the romance, it also has an equally important but individual character as the history of the rivalry between two Arab tribes, the B. Kilāb and the B. Sulaym, the key to a whole series of vicissitudes in the *Sīra* and to the course of action taken by the leading figures, and it may indeed be regarded as the epic of the B. Kilāb tribe. In the edition noted above it covers a total of 5084 pages in 8vo with 27 lines to the page, in 7 volumes of 10 sections (*djuz'*) each, with 64 pages in each section except for sections 69 and 70 which have 92 and 158 pages respectively.

The name of the heroine appears in different forms. She is often called simply Dalhama or al-Dalhama, and this might be her original name, the feminine of Dalham, a well-known proper name and appellation signifying wolf. It has been regarded as a vulgarism for a name beginning with *dhū* (cf. *Abu 'l-* becoming *Bal*), which could be reconstructed as Dhu 'l-Himma, and then, as it refers to a woman, as Dhāt al-Himma, the woman of noble purpose. In the edition and the different manuscripts all these forms occur concurrently, even Dhu 'l-Himma al-Dalhama or Dhu 'l-dalhama. It is by the name Delhemma that the romance is most generally known. But whilst several of the characters have a historical prototype, the heroine herself seems never to have existed historically.

Contents of the romance. The starting point is the history in the Umayyad period of the rivalry between two Ḳaysī tribes in the Ḥidjāz, the B. Kilāb and the B. Sulaym, the former belonging to the ʿĀmir b. Ṣaʿṣaʿa group, a section of the Hawāzin who, with the Sulaym, are one of the two principal branches of Ḳays ʿAylān. The head of the Kilāb was Djandaba b. al-Ḥārith b. ʿĀmir b. Khālid b. Ṣaʿṣaʿa b. Kilāb, while the head of the Sulaym was Marwān b. al-Haytham. It was the latter, a favourite of the Umayyad caliph, who, despite the superiority which Djandaba had won by his exploits, held the *imāra* (command) over the Arab troops. But after Djandaba's death his son al-Ṣaḥṣāḥ, having saved the daughter of caliph ʿAbd al-Malik b. Marwān, and sister of Maslama b. ʿAbd al-Malik, when she was attacked by Bedouin brigands on her return from the pilgrimage, won Maslama's friendship and, thanks to him, was given the *imāra*. It was as head of the Arab tribes that he took part with Maslama in a great expedition against Constantinople, in the course of which he had romantic adventures in a fortress (a monastery in the corresponding episode in the ʿUmar al-Nuʿmān's tale in the 1001 Nights) inhabited by a Greek princess who fell in love with him after a show of resistance and whom he carried off. He was the hero in the fighting outside Constantinople against the emperor Leo and his generals and allies, one of whom was the queen of Georgia, Bakhtūs. After foiling the devilish plots of Shammās, a monk, he entered the town as victor with Maslama, had a mosque built there and had Shammās crucified.

The romance then relates al-Ṣaḥṣāḥ's adventures in the desert with other women, one of whom was a *djinniyya*, his death while hunting, the disputes over the succession between his two sons Ẓālim and Maẓlūm, the birth of Ẓālim's son, al-Ḥārith, and Maẓlūm's daughter, Fāṭima who, having been carried off in a raid with her nurse and foster-brother Marzūk by the B. Ṭayy, grew up among that tribe, became a fearsome amazon and was given the name of Dalhama (Dhāt al-Himma). Returning to her own tribe as a result of romantic events too lengthy to describe here, she continued to astound the Kilāb by her exploits. It was in these circumstances that the revolution which brought the ʿAbbāsids to power took place. The amīr of the B. Sulaym at that time, ʿAbd Allāh (ʿUbayd Allāh) b. Marwān, supported the ʿAbbāsid cause and obtained from al-Manṣūr command over the tribes which from then onwards was lost by al-Ṣaḥṣāḥ's successor. Delhemma persuaded the Kilāb, despite their initial reluctance, to support the new dynasty. The Byzantines having taken advantage of the change of dynasty to regain the initiative, war broke out again and the two tribes, Kilāb and Sulaym, took part in it at the caliph's request, acquiescing in ʿUbayd Allāh's leadership. They freed Āmid, captured Malaṭya and took up positions to defend the frontiers, the Sulaym at Malaṭya, the Kilāb in the nearby fortress of Ḥiṣn al-Kawkab.

It was after this development that Delhemma's cousin al-Ḥārith, son of the Kilābī amīr Ẓālim, succeeded in overcoming the rebellious heroine's repugnance to love and marriage, aided by a drug (*bandj*) supplied by the *faḳīh*, later *ḳāḍī* ʿUḳba, of the Sulaym tribe, and made her the mother of a child, ʿAbd al-Wahhāb who, as a result of the strange circumstances in which the conception took place, was black. ʿAbd al-Wahhāb was educated by his mother and, on reaching manhood, became the head of the Kilāb and the Blacks who formed a group under his leadership; he was the chief hero of the romance together with Delhemma, and won fame in the incessant wars against Byzantium. At his side was al-Baṭṭāl, a Sulaymī and pupil of the *ḳāḍī* ʿUḳba, playing an important part but relying on cunning rather than on force of arms. In the perpetual rivalry that existed between the two tribes al-Baṭṭāl took the side of the Kilāb, left Malaṭya for the Kilāb's fortress and became the implacable enemy of the *ḳāḍī* ʿUḳba who was secretly converted to Christianity and had become a traitor to Islam and the Byzantines' most valuable auxiliary. The amīr of Malaṭya and head of the Arab tribes was now ʿAmr b. ʿAbd Allāh (ʿUbayd Allāh). Although he had concluded a pact of fraternity with ʿAbd al-Wahhāb and had been rescued by Delhemma from the hands of the Byzantines and their allies the "Christianized Arabs", a band whom Delhemma's ephemeral husband al-Ḥārith had led into Greek territory and placed at the emperor's service, he remained in a state of veiled hostility to the Kilāb and their leaders. If the Byzantines had valuable assistants like ʿUḳba and the "Christianized Arabs", the Muslims also had accomplices in Byzantine territory, in a small group of crypto-Muslims organized by Māris, the emperor's personal chamberlain, and his brother and sister, and also, near Malaṭya, an ally in the person of Yānis, of the imperial family and lord of a Greek fortress which he put at the disposal of the Muslims.

In the reign of al-Mahdī a great battle with the emperor Theophilus took place at Mardj al-ʿUyūn. Then the narrator, after a romantic account of al-Mahdī's death, takes us to the reign of Hārūn al-Rashīd, whom he speaks of as the immediate successor of al-Mahdī, and in Byzantium to the reign of Manuel, son of Theophilus. It was at this point that the great duel between al-Baṭṭāl and ʿUḳba began, each trying to seize his adversary and

have him put to death, and, as the Sulaym, their amīr and the caliph supported and defended ʿUḳba whose treason they refused to acknowledge despite the proof provided by Delhemma, ʿAbd al-Wahhāb and al-Baṭṭāl, in consequence the Kilāb only took part in the war to save the situation when it had been rendered critical by the Byzantines' successes in capturing and even advancing beyond Malaṭya, or else to fight against the emperor and the caliph who were linked together in an unnatural alliance against the Kilāb, or else to go off into far distant lands beyond Byzantium to rescue ʿAbd al-Wahhāb's wife and daughter. Adventures which cannot be related here led al-Baṭṭāl into the West, whence he brought back a Frankish king whom he converted, and a little later to the Maghrib, returning with a contingent of Berbers. Subsequently the two tribes were reconciled and secured victories over the Byzantines near the Cilician Gates, recapturing Malaṭya from them and imposing a truce.

The narrator then tells, after the death of Hārūn al-Rashīd, of the war between al-Amīn and al-Ma'mūn in which the Kilāb fought against al-Amīn whilst the Sulaym supported him. The amīrs of the Kilāb who had been summoned to Baghdād, with the exception of al-Baṭṭāl who had escaped, were arrested by ʿAmr at the instigation of Zubayda, she in turn being inspired by ʿUḳba. A fratricidal struggle then broke out between the Sulaym, reinforced by troops from ʿIrāḳ, and the Kilāb and ʿĀmir. The Kilāb overcame the Sulaym and the ʿAbbāsid troops, reached Baghdād, attacked the palace, set free the Kilābite amīrs and took al-Amīn prisoner, but were persuaded by ʿAbd al-Wahhāb and Delhemma to release him. However, some of the Kilāb still continued to support al-Maʿmūn.

The emperor Michael, Manuel's successor, taking advantage of the civil war between al-Amīn and al-Ma'mūn, on ʿUḳba's advice renewed hostilities. Al-Ma'mūn, who had been supported by al-Baṭṭāl, came to the throne but had Delhemma, ʿAbd al-Wahhāb and the Kilābī amīrs who had helped al-Amīn arrested. The caliph, following the not disinterested advice of ʿUḳba, the emperor's ally, set off in the direction of al-Raḳḳa and was captured, together with the Kilābīs whom he had taken with him, and they were all carried off to Constantinople. Delhemma was at once freed by al-Baṭṭāl. The others regained their liberty under cover of a war against the emperor that had been launched by a king named Kushānūsh, grandson through his father of the king of the Bulgars (al-Burdjān) and through his mother descended from Nestor, king of the Maghlabites (sic). Kushānūsh captured Constantinople, and then in his turn renewed the struggle with Islam and penetrated as far as Baṣra. He was finally captured by the Kilāb and beheaded by Delhemma herself. Thanks to the Kilāb, the emperor was freed and restored to the throne, and he decided for the future to give them the tribute which, in the past, he had paid to the caliph, a step which led to some jealousy of the Kilāb. However, the emperor resumed war against the caliph whom he compelled to take refuge in Persia with the Sulaym. Once again it was the Kilāb who saved the situation. Then they hastily started new operations, this time by sea, with the help of the amīr of Tarsus, ʿAlī al-Armanī, against the king of a remote island named Ḳarāḳūna who was holding some Kilābī women captive. But on hearing that al-Ma'mūn had come to lay siege to Constantinople and been captured with the help of the Franks, they hurried to the rescue, fought a naval engagement and laid siege to the city; they captured the emperor and then, reinforced by an army commanded by the future caliph al-Muʿtaṣim, they set al-Ma'mūn free; he had however been wounded by ʿUḳba and died. Al-Muʿtaṣim took over power, at al-Baṭṭāl's request set free the emperor Michael, who was to pay tribute, and gave orders to return to Malaṭya where for the time being he effected a reconciliation between the Kilāb and the Sulaym, later returning to Baghdād.

But soon afterwards he was won over by the amīr ʿAmr to the side of the Sulaym and ʿUḳba. He came to Malaṭya with the intention of invading Byzantine territory, arrested Delhemma, ʿAbd al-Wahhāb and the Kilābī amīrs, and also al-Baṭṭāl shortly afterwards, while ʿAmr released ʿUḳba whom al-Baṭṭāl after prolonged search had finally captured. An attempt by the Kilāb to rescue the prisoners on their way to Baghdād failed on account of the superiority of al-Muʿtaṣim's and ʿAmr's forces. Thereafter the Kilāb seem to have been powerless against the Sulaym and ʿAmr. Those of the Kilāb and ʿAbd al-Wahhāb's Blacks who were unwilling to submit to ʿAmr emigrated to Egypt. While the amīrs were held prisoner in Baghdād the emperor, urged on by ʿUḳba, launched an expedition. But he was soon besieged in his capital by Baḥrūn, the king of the island of Ḳamarān, and dethroned. Baḥrūn then invaded the Muslim territories, took Malaṭya, captured ʿAmr and later the caliph, and marched on ʿIrāḳ. It was then that the Kilābī amīrs were released during a riot. They at once out to fight Baḥrūn, defeated him and released his prisoners, and helped the caliph to recapture Constantinople and restore the emperor to his throne. They took the town of ʿAmūdā the Great, towards which Baḥrūn had fled, and once again freed the caliph who had been captured for the second time.

However, the emperor Michael had died and been succeeded by the usurper Armānūs (Romanus), who expelled the Muslims from Constantinople and was joined by Baḥrūn. Fighting continued, and an interminable series of adventures brought the Kilāb to the kingdom of Kordjāna, bordering on the country of the Abkhāz, in their search for Delhemma who was still a prisoner, while the Sulaym accompanied by the caliph had returned to Malaṭya. Then followed a great offensive by Armānūs who took Malaṭya and went as far as Mosul. The Kilāb, who through ʿUḳba's intrigues had been expelled from the frontier by the caliph, nevertheless saved the situation. Then the caliph became suspicious of ʿAmr, but the latter returned to favour, set out an on expedition, and was defeated. Finally Armānūs was overcome and surrendered. He was soon compelled to seek help from the Muslims against his enemy king Karfanās who, with the Saḳāriḳa and the Malāfiṭa (Amalfitans) captured Constantinople. The caliph sent the Sulaym against him. Karfanās captured ʿAmr, defeated the caliph al-Muʿtaṣim and reached Āmid. At that point ʿAbd al-Wahhāb intervened. Karfanās was killed and Armānūs regained the throne.

The narrator, who is not unaware that al-Muʿtaṣim led an expedition against Amorium in 223/838, does not fail to describe it in a fanciful way, with certain characteristics which recur in an already legendary account by Ibn al-ʿArabī in his *Muḥāḍarāt al-abrār wa-musāmarāt al-akhyār*, ii, 64. Then he had Armānūs dethroned by his own son Bīmund. The latter maltreated al-Baṭṭāl, who had fallen into the hands

of Armānūs, and thereby provoked ʿAbd al-Wahhāb and ʿAmr to intervene. The latter was made prisoner. Delhemma then came to the rescue, killed Bīmund and restored Armānūs to the throne.

ʿUḳba once more contrived to turn the caliph against the Kilāb, and the Sulaym and Kilāb were again at war, when the caliph called in Armānūs against the Kilāb. There followed a long series of exploits in the course of which, outside Constantinople, Delhemma killed a Frankish king, Mīlāṣ, who had come for the Crusade and conquest of Jerusalem, ʿAbd al-Wahhāb was carried off by the Pečenegs, ʿUḳba and al-Baṭṭāl continued their perpetual game of hide and seek, and Armānūs took and sacked Malaṭya. Armānūs was later dethroned and strangled by Fālūghus (Paleologos?) whom Delhemma forced to keep peace. He resumed the war but was beaten and compelled to pay tribute and to rebuild in Constantinople Maslama's mosque which had fallen into ruin. ʿUḳba, whom al-Baṭṭāl had captured, was nearly crucified in Constantinople, but he managed to escape and returned to the caliph; he hatched a new plot against the Kilāb and procured the arrest of ʿAbd al-Wahhāb and al-Baṭṭāl, and it was only by the vizier's help that they escaped from the sentence of death by drowning in the Tigris. Nevertheless, ʿAmr and the Sulaym continued to fight against the Kilāb.

A new emperor named Michael twice sent expeditions against the Muslims, the second time with a Frankish king Takafūr. He took Malaṭya but it was recaptured by the caliph and ʿAbd al-Wahhāb; it was then that al-Muʿtaṣim, after seeing ʿUḳba performing his devotions in the underground church in his house in Malaṭya, became convinced of his treason and no longer defended him, even suspecting ʿAmr also of being a Christian.

We come now to the final section of the romance, section 70, which like the preceding one is almost three times longer than the others. It is given up to a description of two important events: the pursuit of ʿUḳba through various countries from Spain to the Yemen, his capture and crucifixion on the Golden Gate at Constantinople in spite of the intervention of a vast army of Christian peoples led by 17 kings; the murderous ambush into which the Muslims fell on their way back, in the Defile of the Anatolians, from which the only survivors were the caliph with 400 men, al-Baṭṭāl and some of his companions, as well as Delhemma, ʿAbd al-Wahhāb and a number of men who had been shut up in a cave and given up for lost, but were miraculously saved by a genie. Soon afterwards al-Muʿtaṣim died.

His successor al-Wāthiḳ decided on a reprisal expedition against Constantinople. The emperor was captured and executed. Until then, Muslim conquerors had limited themselves to making the emperors pay tribute. From that time, a Muslim governor was appointed in Constantinople in the person of a son of ʿAbd al-Wahhāb who had the mosque rebuilt with great splendour. The amīr ʿAmr had been killed in the disaster of the Defile of the Anatolians, and was succeeded at Malaṭya by his son al-Djarrāḥ.

At this point the narrator describes the deaths, first of Delhemma, then her son ʿAbd al-Wahhāb, after their return from Mecca, in a state of piety, while al-Baṭṭāl ended his life at Ankūriya (a corruption of Ancyra-Angora through contamination with ʿAmmūriya-Amorium), saddened by the news that, from the time of al-Wāthiḳ's successor, al-Mutawakkil (or in some manuscripts al-Muḳtadir), the Byzantines had regained the initiative, reconquered the whole territory between Ankara and Malaṭya, and sent out endless expeditions against the Muslim countries. He died and was buried in the mosque at Ankara, but his tomb, being concealed, escaped the notice of his foes. Islam was to remain in this critical situation until the coming of the Turks (Saldjūḳid?—in some versions there is reference to Čerkesses, hence to the Mamlūks), with their king Āḳ Sunḳur, who recaptured Ankara and discovered al-Baṭṭāl's tomb.

Elements in the romance. Different elements enter into the creation of Delhemma. Firstly, a bedouin element which might be described as "antarian", since it is what occurs in the *Sīrat ʿAntar*, which may have served as a model, as comparisons sometimes appear between some personage and ʿAntar, whose horse Abdjar is mentioned. In the preamble of a Berlin manuscript the narrator, after giving al-Ṣaḥṣāḥ's genealogy, says that the events which he is about to describe took place after the death of ʿAntar b. Shaddād. To this element belong, in the first part of the romance, the intertribal raids and battles, the exploits of al-Ḥārith, his son Djandaba, and later of al-Ṣaḥṣāh and Delhemma herself, tales of pursuits and horse-stealing, al-Ṣaḥṣāḥ's romantic encounters with first Laylā, then Amāma, then a djinniyya. In the last analysis these bedouin tales go back to pre-islamic antiquity. It is noteworthy that Islam only plays a subsidiary part (doxology, Muslim talismanic formulae) although the importance of the *djihād* is stressed from the start.

The most important element is the pseudo-historical, for the romance claims to be an accurate history of the Arabs. This element appears as the often very vague recollection of a certain number of facts and historical personages, garbed in romantic trappings and presented in an imaginary way, with constant disregard for chronology and probability. In the internal history of the Umayyad period we find traces of the history of Maslama b. ʿAbd al-Malik and of the eulogy of him spoken by ʿAbd al-Malik on his death-bed; Maslama's renunciation of the throne in favour of al-Walīd rests on a historical basis, Maslama as the son of a non-Arab mother having been barred from the caliphate for that reason. The ʿAbbāsid propaganda and the story of Abū Muslim find an echo in the romance, like the founding of Baghdād by al-Manṣūr. The incident of the Zindīḳ in al-Mahdī's time is transformed into a meeting of 12,000 zindīḳs with renegade Arabs acting in the service of Byzantium. It would be fruitless to reveal the improbabilities and inventions in the story of al-Mahdī's succession, or the account of the Barmakids interwoven with ʿUḳba's intrigues. Similarly a Khāridjī, in revolt against Hārūn al-Rashīd, is endowed with the same characteristics as the Ḳarmaṭi in al-Muḳtadir's time, for he carries off the Black Stone. In the account of al-Baṭṭāl's adventures in the West there is an incredible farrago in which the Spanish Umayyad called Hishām al-Muʾayyad and described as the imām *mahdī*, the Mulaththama (Almoravids) whose king ʿAbd al-Wadūd (a recollection of the ʿAbd al-Wādids of Tlemcen) pays tribute to the Frankish king of Andalusia, and the Maṣāmida (Almohads) all appear. Turks are mentioned in the Muslim army from the time of Hārūn al-Rashīd. We have seen how the war between al-Amīn and al-Maʾmūn is described in terms of the rivalry between the Kilāb and Sulaym. There is only a very brief allusion to the founding of Sāmarrā by al-Muʿtaṣim.

As regards the Arabo-Byzantine war, it is the historical element which plays the chief part. Thus, in the first part Maslama's expedition against Constantinople in 97-9/715-7 is the central event, around which all the romantic episodes are grouped. Al-Baṭṭāl who in actual fact took part in it is not mentioned here because he has been relegated to the second part of the romance. This part, which is based primarily on the Arabo-Byzantine war, reflects several important events of the ʿAbbāsid period, above all the establishment of a group of fortresses west of the Euphrates, with Malaṭya at the centre, dating from the period of al-Manṣūr, a fact well-known from al-Balādhurī. Then came al-Muʿtaṣim's great expedition against Amorium, which inspired several episodes in the romance, either under Hārūn al-Rashīd's caliphate or under al-Muʿtaṣim himself. Finally, and in particular, there is the fact that the amīr of Malaṭya, ʿAmr b. ʿUbayd Allāh, is no other than the historical personage of that name of the 11th century, for whom see M. Canard, *Un personnage de roman arabo-byzantin*, in *RAfr.*, 1932 and H. Grégoire, *L'épopée byzantine et ses rapports avec l'épopée turque et l'épopée romane*, in *Bull. de la Cl. des Let. et des Sc. Mor. et Pol. de l'Ac. roy. de Belgique*, 5th series, volume xvii, and articles in *Byzantion*, v and vi. And as we know from Byzantine historians that ʿAmr was closely connected with the Paulician dissidents, we can deduce that the situation of the Greek Yānis al-Mutaʿarrab, poised between the two camps in his fortress near Malaṭya, reflects the position of the Paulician Carbeas.

If the romance does not trace the Arabo-Byzantine war after the reign of al-Wāthiḳ (227-32/842-7), later events certainly inspired the narrators. It is probable that the disastrous defeat which the Arabs suffered at the end of al-Muʿtaṣim's reign is the counterpart of the defeat in which ʿAmr perished in 249/863. There are many allusions to situations in the 10th century, in the period of the Ḥamdānids. Apart from Malaṭya, the frequent references made to Shimshāt, Ḥiṣn Ziyād (also in the form Kharpūt, which takes us to a still later period), Mayyāfāriḳīn, Dārā, Āmid and the celebrated Byzantine stronghold Kharshana (Charsianon kastron) call to mind Sayf al-Dawla's campaigns. The emigration on two occasions of renegade Arab groups to Byzantium recalls the emigration of the B. Ḥabīb described by Ibn Ḥawḳal. Various Greek names also seem to suggest the events of the 10th century. No doubt it is Corcuas, the conqueror of Melitene, who can be recognized in Ḳarḳiyās, the Domestikos in al-Dimishḳī, Nicephores (Phocas) in Takafūr. In section 47, p. 34 there is a direct reference to John Tzimisces and his siege of Āmid. Armanus suggests Romanus Lecapenus. For the rest, many names and episodes take us to an even later epoch. From the start, the rivalry for the *imāra* between the two tribes reveals a situation which belongs, not to the Umayyad, but rather to the Ayyūbid period, when command of the Syrian tribes was held by one dominant tribe, but at that time the rivalry was between the Kilāb and the Yemeni Faḍl. The ceremonial forms of salutation, hospitality and procession, and the general use of titles are reminiscent of the Fāṭimid, Ayyūbid or Mamlūk ceremonial forms and titles. The Crusades and the Saldjūḳid period are the source of many names of persons and peoples. Among the Christian, or presumably Christian, peoples in addition to the Bulgars, Armenians and Franks, we find ʿAmāliḳa (Amalekites!), Georgians (Kurdj), Abkhāz, Alans, Pečenegs (al-Badjnāk), Amalfitans (Malāfiṭa), Venetians (Banādika), Saḳāliba, Maghlabites (the Byzantine Μαγγλαβίτης = Latin manuclavium, lictor), Zaghāwira, Dūḳas (sic). As names of individuals we find Kundafarūn (Godefroy, cf. Kundafarī in Yāḳūt, i, 207, ii, 381 and Gontofrè in book x of the *Alexiad*), Fransīs, Ghaytafūr who is certainly king Tafūr in the *Chanson d'Antioche*, Bīmund (Bohemund) etc. Certain names of Christians, Greek or French, are simply taken from antiquity and to some extent garbled: Iflāṭūn, Christopher, Pythagoras, Ptolemy. These names reveal a very superficial knowledge of history and geography on the part of the narrators who, on the other hand, seem to be better documented on Christian practices, religious festivals and formulae (*e.g.*, *Kyrie eleison*, sect. 4, 39; 20, 4; 59, 26), the sign of the cross, the emperor's crown topped with a cross, and on certain Byzantine customs (games in the hippodrome, humiliation of prisoners by having a foot placed on the back of the neck, etc.).

The description of land-battles is full of clichés, but the description of naval battles which have inspired prose or verse accounts seem to be more realistic. There is, for example, (sect. 18, 35) a detailed description of the use of Greek fire, *ḳawārīr al-naft*, boarding with the help of grappling-irons and several names of ships.

Folklore element. As in all romances and *Futūḥ* works, Delhemma contains a mass of features derived from folklore, of which we shall only specify a few: tricks to make the enemy kill each other, the description of wonderful objects (automatic birds, talismanic statues), amazons, the use of the *bandj*, etc. In the story of the queen of Georgia, Bakhṭūs, which occurs in the first part, one can detect features which go back, through the legend of queen Thamar, to that of Zenobia. The theme of the camel-skin cut into strips in order to obtain a larger area for the building of the mosque in Constantinople is the same as the legend of Dido. Certain names (Kayḳābūs, Ḳilīdj b. Ḳābūs) suggest an Irano-Saldjūḳid influence, rather than the Iranian legend.

Composition of the romance. I have tried to show, in an article entitled *Delhemma, Sayyid Baṭṭāl et Omar al-Noʿmān*, in *Byzantion*, xii (1937), 183 ff., following an article by H. Grégoire in *Byzantion*, xi (1936), 571 ff., on the subject of the relegation of the personage of al-Baṭṭāl, the hero of the Umayyad period, to the legend of ʿAmr b. ʿUbayd Allāh, amīr of Malaṭya in the ʿAbbāsid period, that the romance of Delhemma is made up of two parts which are each a version or fragment of two cycles of different periods and origins. The first and shorter part goes back to a bedouin and Syrio-Umayyad cycle (other fragments of which are incidentally extant) describing the adventures of the Umayyad amīr Maslama b. ʿAbd al-Malik and of personages of the B. Kilāb tribe related to Maslama through his wife. Though this part does not include the historical heroes of the Umayyad period, al-Baṭṭāl and his companion ʿAbd al-Wahhāb who have been relegated to the second part, al-Baṭṭāl's exploits have been put under the name of the Kilābī amīr al-Ṣaḥṣāḥ. The second, the principal and longer part of the romance, very closely related to the Turkish Sayyid Baṭṭāl, represents not only the Turkish romance but also a cycle which H. Grégoire and I have called a Melitenian cycle on account of the part played by Malaṭya-Melitene and its amīr ʿAmr b. ʿUbayd Allāh, of the B. Sulaym tribe in the ʿAbbāsid period. This must originally have been the epic of the B. Sulaym and their famous amīr.

As a result of al-Baṭṭāl's popularity the Sulaym must have appropriated the personage who is described in the romance as being of Sulaymī origin. In H. Grégoire's opinion, this change in respect of al-Baṭṭāl was determined by the fact that in the expedition during which he met his death, he was accompanied by an amīr of Malaṭya named Ghamr, a name easily confused with ʿAmr, and his relegation has also involved a similar change in respect of ʿAbd al-Wahhāb. A later stage in the development of the romance was the fusion of the two cycles and the appropriation of the Melitenian cycle by the B. Kilāb, to their advantage, for the reasons I have given in the article under reference (the submission of the amīrs of Malaṭya to Byzantium in the 10th century, which was frowned upon by Islam; and, on the other hand. the important rôle played by the B. Kilāb in the Byzantine war in the 10th centuries, and their eminence in north Syria). It is in this way that the end of the first part, in which we see the birth and childhood of Delhemma, al-Ṣaḥṣāḥ's granddaughter, and then of her son ʿAbd al-Wahhāb, forms a transition with the second part where the Kilābīs take their place in the Melitenian cycle, that ʿAbd al-Wahhāb, historically an Umayyad *mawlā* of unknown origin, becomes a Kilābī and the principal character, with his mother, that al-Baṭṭāl is represented as voluntarily leaving the B. Sulaym in order to join the B. Kilāb, and that ʿAmr b. ʿUbayd Allāh, the central hero of the Melitenian cycle as he is in the Turkish romance under the name ʿUmar b. al-Nuʿmān (cf. also the story in the 1001 Nights of the same name) becomes a personage not only less important than ʿAbd al-Wahhāb but also less attractive, since the narrators give all their sympathies to the B. Kilāb. Moreover, it is known from Ḳalḳashandī, *Ṣubḥ*, i, 340 and iv, 231, that in his time the romance was regarded as having been written to glorify the B. Kilāb of north Syria who claimed to be adherents of ʿAbd al-Wahhāb.

Date of composition of the romance. It goes without saying that it is impossible to give an exact date for the composition of this romance as we have it in the published edition and in the manuscripts which differ little from it. It is probable that, if the first outlines of the Syrio-Umayyad cycle were traced as early as the Umayyad period, and those of the Melitenian cycle shortly after the death of amīr ʿAmr in 249/863, it was at a much later date, and under the inspiration of the spirit of hostility to the Crusaders, that an epic of the Arabo-Byzantine wars followed by the Islamo-Frankish wars finally took shape. Positive references to an epic of this sort do not go back beyond the 12th century. The Egyptian historian al-Ḳurṭī, writing at the time of vizier Shāwar and the Fāṭimid caliph al-ʿĀḍid (555-67/1160-72), speaks of the *Aḥādīth al-Baṭṭāl* and the 1001 Nights as being known in his time (al-Maḳrīzī, *Khiṭaṭ*, i, 485, ii, 181; cf. Macdonald, in *JRAS*, 1924, 381), a detail which should be added to the article AL-BAṬṬĀL. Samaʿwal b. Yaḥyā al-Maghribī, a Jew converted to Islam in 558/1163, says that before his conversion he took pleasure in reading stories and romances and collections of legendary histories like the *Dīwān akhbār ʿAntara*, the *Dīwān Delhemma wa 'l-Baṭṭāl* (see *Bibl.* to AL-BAṬṬĀL). If we can accept a tradition from al-Mughultāʾī reported in the *Tazyīn al-aswāḳ* by Dāwūd al-Antākī (ed. Būlāḳ, 1279, 55), a Maghribī shaykh was said to have heard the *Sīrat al-Baṭṭāl* recited in Cairo, at the time of al-Ḥākim. Thus a romance dealing with al-Baṭṭāl, or with both Delhemma and al-Baṭṭāl, was known in the Fāṭimid period, and it is difficult to tell if it is a question of one and the same romance, or of two separate romances. A *Sīrat al-Baṭṭāl* is also mentioned by al-Ḳalḳashandī, xiv, 149, l. 9. Can we go back even further? According to H. Grégoire (*ZDMG*, lxxxviii, 213-32), the basis of Delhemma's history and the tale of ʿUmar al-Nuʿmān (see also my article *Un personnage* ...) must have been known in about 390/1000 in north Syria since it served as a source for the Byzantine epic Digenis Akritas.

After this period we find other mentions of Delhemma. In the 8th/14th century Ibn Kathīr (see *Bibl.* to AL-BAṬṬĀL), repeating what Ibn ʿAsākir had said of al-Baṭṭāl, adds that the *Sīra* put out under the name of Delhemma, al-Baṭṭāl, amīr ʿAbd al-Wahhāb and *ḳāḍī* ʿUḳba is no more than a tissue of lies, like the *Sīra* of ʿAntara or the one (on the Prophet) by al-Bakrī [*q.v.*]. In the 16th century, the jurist al-Wansharīshī, in his *al-Miʿyar al-mughrib* (see the analysis by Amar, in *Arch. Marocaines*, xi (1908), 456-7 and the lith. ed. vi, 52), says that it is not permitted to sell historical romances like the one on ʿAntar or the "Dalhama". Today, the disfavour shown by the most critical circles has become even more marked: see the modern contempt for this literature, in Brockelmann, S II, 62.

The author or authors of the romance. In the edition, no author is named, but there is a list of *rāwīs*. A manuscript analysed by Ahlwardt begins: *ḳāla Nadjd b. Hishām al-Hāshimī al-Ḥidjāzī*, as though in reference to the author. But in another, six *rāwīs* are listed, Nadjd being the third. The edition gives ten *rāwīs*, of whom Nadjd, with the ethnic al-ʿĀmirī, that is to say, of the tribe of ʿĀmir who plays a large part in the romance with the related Kilāb, is the last. These persons are unknown and one can scarcely draw any conclusions from the fact that the one has the *nisba* at al-Shimshāṭī, and the other at al-Marʿashī, that is to say, lands situated on the Arabo-Byzantine frontier. The fact that a *rāwī* is stated to have been present at the event described (sect. 18, 64), dated 190 A.H. is merely a device by the narrator.

Conclusion. Such then is this long romance of which our analysis gives only an incomplete idea, so complicated are the adventures of the characters, prolonged at will by the author by means of repetition, the constant return of similar situations, the artificial duplication of characters with identical rôles etc. Such as it is, this epic of the Arabo-Byzantine wars and of the B. Kilāb succeeded in pleasing a popular Muslim public by exalting the *mudjāhidūn* and their successes in battles and against adversaries that were often imaginary. A simple-minded audience accepted all this with enthusiasm as though it were fact. In addition to the epic character, with its accounts of combats and great feats of arms, the dramatic or melodramatic element is not lacking; the narrator is adept in holding his listeners spellbound waiting for some climax, through agonizing situations, sudden changes of fortune whether happy or unhappy, and by various means rousing sympathy or antipathy. The comical element, at times of a somewhat crude sort, appears fairly frequently, particularly in scenes portraying disguise, abduction or theft, and in the more or less childish devices employed by al-Baṭṭāl and ʿUḳba, the use of various mountebank tricks of which al-Baṭṭāl is past master, when for example he appears as a Christian king with his *ghulām*, in the guise of Christ and the

twelve apostles (cf. a similar story in *Murūdj al-dhahab*, viii, 175).

The personages are simple in character. They resemble each other and always act in the same way, according to the type they represent. The language is incorrect or careless, but at the same time it pretends to seem learned by making a show of rhymed prose and redundant and assonant epithets in descriptions (horses, arms, clothing, combats, receptions, processions). Verse which plays the same part as in the 1001 Nights is relatively infrequent, but section 70 contains a passage of 472 lines of verse in which al-Baṭṭāl himself reviews his exploits.

DHU 'L-ḲAʿDA [see TAʾRĪKH, i].

DHU 'L-ḲADR, Turkmen dynasty, which ruled for nearly two centuries (738/1337-928/1522) from Elbistan over the region Marʿash-Malatya, as clients first of the Mamlūk and later of the Ottoman Sultans. Name: The use in Arabic sources of the spellings Dulghādir and Ṭulghādir and in one of the dynasty's inscriptions of Dulḳādir (see R. Hartmann, *Zur Wiedergabe türkischer Namen* . . ., Berlin 1952, 7; this spelling occurs also in *Bazm u Razm*, Istanbul 1918, 456) indicates that the Arabicized forms Dhu 'l-Ḳadr and Dhu 'l-Ḳādir, usual in the later Ottoman sources, are a folk-etymology ('powerful') of a (presumably Turkish) name or title : A. von Gabain has suggested *tulga* + *dar*, 'helmet-bearer' (*Isl.* xxxi, 115).

The founder of the dynasty, Zayn al-Dīn Ḳaradja b. Dulḳādir, first mentioned as penetrating Little Armenia with 5000 horsemen in 735/1335, was the leader of Bozoḳ clans whose summer-pastures were in the east range of the Anti-Taurus and who wintered in the valley east of the Amanus range. In the confusion following the death of the Ilkhān Abū Saʿīd, Ḳaradja Beg seized Elbistan and procured from the Mamlūk Sultan a diploma recognizing him as *nāʾib* (738/1337). The rest of his life was spent in struggles with his neighbours and in revolts against Egyptian suzerainty. Defeated at last by a strong force led by the governor of Aleppo, he escaped capture, but was eventually surrendered to the Egyptians by his rival Muḥammad b. Eretna and executed (754/1353).

Ḳaradja's son and successor Khalīl, seeking revenge for his father's betrayal, seized Kharput from the Eretna-oghlu and began to menace Malatya. The Sultan sought to depose him; after several inconclusive expeditions, in 783/1381 the Egyptian forces, driving Khalīl out of Elbistan and advancing as far as Malaṭya, procured his temporary submission. Sultan Barḳūḳ finally resolved to dispose of the turbulent Khalīl by craft and had him murdered (788/1386).

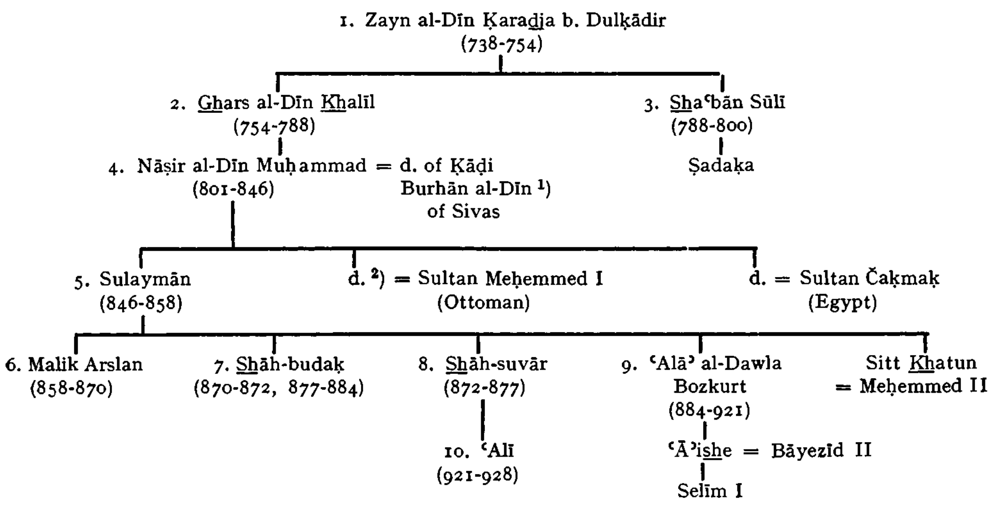
The Turkmens recognized as his successor his younger brother Sūlī, who defeated an Egyptian army near Göksün and allied himself with the rebellious Mamlūk Mintash. Sūlī sent troops to take part in the revolt of the Syrian governors against Barḳūḳ (791/1389); he remained loyal to Mintash for a time after Barḳūḳ's recovery of power, but was obliged to submit in 793/1391. Four years later Barḳūḳ, learning that Sūlī had offered to guide Tīmūr's army into Syria, sent an expedition against him and Sūlī narrowly escaped capture. Barḳūḳ eventually had him murdered (800/1398); but at this juncture the Ottoman Sultan Bāyezīd I arrived on the scene, drove Sūlī's son Ṣadaḳa from Elbistan, and installed Khalīl's son Nāṣir al-Dīn Muḥammad (801/1399). In 803/1400, Tīmūr, whose army had been harassed by the Dhu 'l-Ḳadr Turkmens during the siege of Sivas, ravaged Muḥammad's territories, and on his return from Syria sent a force to attack the Dhu 'l-Ḳadr nomads near Tadmur (Sharaf al-Dīn Yazdī, *Ẓafar-nāma*, Calcutta ed. ii, 270 ff., 346).

Throughout his long reign Muḥammad remained on friendly terms with Egypt, and also with the rising Ottoman state. In 815/1412 he sent troops to assist Meḥemmed I, who had married one of his daughters, against Mūsā (Neshrī, ed. Taeschner, i, 122, 136 f.). He took part in the Egyptian punitive expedition against the Ḳaraman-oghlu in 822/1419, and after its withdrawal defeated him and sent him prisoner to Cairo; for these service the Sultan al-Muʾayyad made over Kayseri to him (where, in 835/1432, he built the Khātūniyye medrese). The Ḳaraman-oghlu Ibrāhīm re-took Kayseri (O. Turan, *Tarihi Takvimler*, 40), but in 840/1436 Muḥammad appealed for help to the Ottoman Sultan Murād II, who captured the city and restored it to him (*İA*, art. Karamanlılar [Şihabeddin Tekindağ], 324 f.). In 843/1440, to restore the temporarily interrupted harmony with Egypt, Muḥammad visited Cairo and married one of his daughters to Čaḳmaḳ; he died, over 80 years of age, in 846. Bertrandon de la Broquière, travelling through Syria in 1432, encountered nomads attached to the Dhu 'l-Ḳadr-oghlu north of Ḥamā, and noted, on passing through his territories, that this prince "a en sa compaignie trente mil hommes d'armes Turquemans" (*Le voyage d'outremer*, ed. C. Schefer, 82, 118).

The twelve-year reign of Muḥammad's son Sulaymān passed uneventfully. In 853/1449 Murād II, seeking an ally against the Ḳaraman-oghlu and the Ḳara-ḳoyunlu sultan (Ducas, 224), married the future Meḥemmed II to Sulaymān's daughter Sitt Khatun (see F. Babinger, *Mehmed's II Heirat mit Sitt-Chatun* (1449), in *Isl.* xxix, 1950, 217-35).

During the reign of Sulaymān's son Malik Arslan (858/1454-870/1465) the principality was menaced by Uzun Ḥasan, who seized Kharput, and Ottoman-Egyptian intrigues for control of the region became intensified. Malik Arslan was murdered, at the instigation of his brother Shāh-budaḳ and with the connivance of the Mamlūk Sultan Khosh-ḳadem, who installed Shāh-budaḳ. But Meḥemmed II sent against him his own candidate Shāh-suvār, another brother (his diploma [see *Bibl.*], dated 14 Rabīʿ II 870/4 December 1465, appointed him *wālī* over his ancestors' domains "and all the dispersed Bozoḳlu and Dhu 'l-Ḳādirlü", *i.e.*, the nomads). Shāh-suvār drove out Shāh-budaḳ, and gained such successes over the Egyptians that he threw off Meḥemmed's

protection (see *Ibn Kemāl, VII. defter* [facsimile], ed. Ş. Turan, 429-33). The Egyptians retaliated, took him prisoner to Cairo and executed him (877/1472), and re-installed Shāh-budaḳ. (Shāh-suvār alone of the Dhu 'l-Ḳadr rulers is said to have struck coins, cf. ʿĀrifī [see *Bibl.*], 430, 763).



Another brother, ʿAlāʾ al-Dawla (whose daughter was married to Prince Bāyezīd and had borne him the future sultan Selīm I), sought Meḥemmed's protection (Ibn Kemāl, 433-7) and in 884/1479 drove out Shāh-budaḳ. During the Ottoman-Mamlūk war of 890-6/1485-90, ʿAlāʾ al-Dawla began to incline towards Egypt, so that the Ottomans made an unsuccessful attempt to depose him in favour of Shāh-budaḳ, who had changed sides and was now sandjaḳ-bey of Vize (ʿĀshiḳpashazāde, ed. ʿĀlī, 234-8; Saʿd al-Dīn, ii, 63-5). During the next twenty years ʿAlāʾ al-Dawla remained at peace with the Ottomans, but came into conflict with Shāh Ismaʿīl, who in 913/1507 sacked Elbistan (destroying the monuments of the dynasty) and Marʿash. When Selīm I marched against Shāh Ismāʿīl the aged ʿAlāʾ al-Dawla refused to assist the Ottoman army, so that on his return Selīm sent against him Khādim Sinān Pasha and ʿAlī, the son of Shāh-suvār, an Ottoman sandjaḳ-bey. ʿAlāʾ al-Dawla was defeated and killed (Rabīʿ II 921/June 1515) and his head sent to Cairo (Saʿd al-Dīn, ii, 293-7; Ferīdūn, *Munshaʾāt*², 1, 407-413).

ʿAlī Beg, appointed in his stead, distinguished himself in Selīm's Egyptian campaign; but by playing the major part in suppressing the Djalālī revolt and the rebellion of Djān-birdi he aroused the jealousy of Ferhād Pasha, who procured Suleymān I's consent to his killing ʿAlī Beg and all his family (Shaʿbān 928/July 1522). Thereafter the region was administered as an Ottoman beglerbegilik, 'Dhu 'l-Ḳadriyya', with its headquarters at Marʿash (from which it was later named); in the 17th century it comprised five sandjaḳs, Marʿash, Malaṭya, ʿAyntāb, Kars (modern Kadirli) and Sumeysat (ʿAyn-i ʿAlī in P. von Tischendorf, *Lehnswesen* ..., 60, 72).

Under Ottoman suzerainty the Dhu 'l-Ḳadr-oghullarī enjoyed the privileges of a mediatized ruling house (*e.g.*, in the *alḳāb*, cf. Ewliyā, *Seyāḥatnāme*, i, 170) and were in the 17th century still reckoned among the 'famiglie del Regio sangue' (Sagredo, *Memorie istoriche* ..., Venice 1677, 1068). Members of the family appear, sometimes in official positions, throughout the Ottoman period (see ʿĀrifī, 694-6).

Dhu 'l-Ḳadirlü was the name of a large *ulus* of tribesmen, widely spread not only in E. Anatolia but also in Ṣafawid domains, where they formed an influential element in the state (*Tadhkirat al-Mulūk*, tr. and comm. V. Minorsky, GMS New Series xvi, London 1943, 14-19).

Bibliography: Mordtmann's article in *EI*¹ was mainly based on Münedjdjimbashī, iii, 167-71, ʿĀlī, *Künh* iv/3, 38-45, and Hammer-Purgstall. See further ʿĀrifī, *Elbistān ve Marʿashda Dhu 'l-Ḳadr* (*Dūlghādir*) *oghullari ḥukūmeti*, in *TOEM*, v, 358-77, 419-31, 509-12, 535-52, 623-9, 692-7, 767-8, and (inscriptions) vii, 89-96; *İA*, art. Dulkadırlılar (Mordtmann's article in *EI*¹ much expanded by M. Halil Yinanç with many new facts, especially for the 14th century, from Arabic sources; *İA*, art Elbistan, by M. Halil Yinanç. Letters of Meḥemmed II to and concerning Shāh-suvār are found in *Fatih devrine ait münşeat mecmuasi* (= Vienna, Nationalbibl. MS H.O. 161), ed. N. Lugal and A. Erzi, Istanbul 1956 (the diploma of appointment at 41); see also *Belleten*, xxi, 1957, 279. A *ḳānūn* of ʿAlāʾ al-Dawla, confirmed by the Ottomans, is included in Ö. L. Barkan, *Kanunlar*, Istanbul 1943, 119-24 (on the introduction of Ottoman administration see also *İA*, art. Elbistan, 229), and *Arşiv Kılavuzu* I (index s.v. Alâüddevle) notes some letters of his in the Topkapu Sarayı archives. For the Dhu 'l-Ḳadirlü tribesmen see firstly F. Sümer, *XVI. asırda Anadolu, Suriye ve Irakta yaşayan Türk aşiretlerine umumî bir bakış*, in *Iktisat Fak. Mecm.*, xi (1949-50), 509-23 (esp. 512-3); sporadic references to them appear in the various articles of F. Sümer and F. Demirtaş concerning the tribesfolk.

¹) ʿĀshiḳpashazāde, ed. Giese, 66; her name was perhaps Miṣr Khatun (Kh. Edhem, *TOEM*, v, 456).
²) Perhaps named Emīne, see Kh. Edhem, *Düvel*, 309n.

(This table shows only the ruling members of the line and their dynastic alliances; for a full genealogy see the table in *İA*, art. Dulkadırlılar, 660, which corrects and expands those of Khalil Edhem (*Düwel-i Islāmiyye*, 312) and E. de Zambaur (*Manuel de Généalogie* ..., 158 f.).

(J. H. Mordtmann-[V. L. Ménage])

DHŪ ḲĀR, name of a watering-place near Kūfa, in the direction of Wāsiṭ (Yāḳūt, iv, 10), where one of the most famous Arab *ayyām* [*q.v.*] took place. In contrast with most other clashes between Arabian tribes, this one had a historical importance because the Bakr b. Wā'il tribe (a coalition of all its clans except the Banū Ḥanīfa) put other Arabs to flight (Taghlib, Iyād, etc.) among whom, significantly, were regular Persian troops. Even if the battle was no more than a skirmish (though sources speak of several thousand combatants) it showed the Arabs that the Persians were not as invincible as had been supposed. Caetani points out that it was not mere coincidence that several years later, the same Bakr b. Wā'il tribe, led by al-Muthannā b. Ḥāritha, took the initiative in making the first incursions into ʿIrāḳ; it was henceforth well aware of the Persian weakness when faced with an Arab coalition. The date of the battle is uncertain (variously put at the year of Muḥammad's birth(!), or when he began preaching, *i.e.*, ten years before the *hidjra*, or immediately after the flight to Medina, or some months after Badr, *i.e.*, 2-3/623-625) but the account left of it allows us to place it within a very restricted period. Details vary, and are partly legendary; some of them however can be accepted as authentic, and indicate that the battle occurred soon after certain well-known historical facts. These details attribute the cause of the conflict to the imprisonment of the last Lakhmid leader, al-Nuʿmān b. al-Mundhir, by Khusraw Parwīz (Abarwīz in Arab sources) From them it is possible to reconstruct the train of events: the Sāsānid made an error of judgment in replacing the Lakhmid monarchy by a system of direct government. The Bakr b. Wā'il were either incited by al-Nuʿmān's imprisonment followed shortly by his death, or else, suddenly freed from their fear of this guardian of the frontiers, they devoted themselves to plundering, and the Sāsānid resolved to punish them. His troops, however, were defeated and pursued as far as the Sawād, and through a combination of circumstances the expected reprisal did not ensue. The end of al-Nuʿmān's reign has been put at 602 A.D. (605 by Caetani), and the government of the Taghlibid Iyās b. Ḳabīsa, who followed the Lakhmid sovereign with a *marzubān* at his side lasted until 611. The date of the battle can therefore be restricted to the years between 604 and 611 A.D. (Caussin de Perceval, *Essai*, ii, 185, puts it at 611; Noeldeke, *Geschichte*, 347, n. 1., between 604-610; Goldziher, *Muh. Stud.*, i, 103, at 611; Caetani, *Annali*, Intr. § 230, at 610).

A famous *ḥadīth* bears witness to the great importance which the Arabs attached to this military success; the Prophet is recorded as having said "It is the first time that the Arabs have got the upper hand of the Persians, and it is through me that God has helped them (*nuṣirū*)". Poets and story-tellers of the *ayyām* have perpetuated the fame of this battle; many poems are recorded by al-Ṭabarī and in both the *Aghānī* and the *ʿIḳd*; the traditions of the event have been collected together principally by Abū ʿUbayda [*q.v.*], and in time provided the material of popular romances, such as (according to Goldziher, xvi, 6-43) the romance of ʿAntar, and (according to Mittwoch, *EI*[1], s.v. DHŪ ḲĀR) the romance entitled *K. Ḥarb Banī Shaybān maʿa Kisrā Anūshirwān*.

The *yawm* of Dhū Ḳār is also known by the names of other places situated near the watering-place, such as al-Ḥinw (*i.e.*, the *ḥinw*, "the curve", of Dhū Ḳār or of Ḳurāḳir), al-Djubābāt, al-ʿUdjrum or Dhu 'l-ʿUdjrum, al-Ghazawān, al-Baṭhā' (*i.e.*, the *baṭhā'*, the "wide valley", of Dhū Ḳār).

At Dhū Ḳār another battle took place, between the Bakr and Tamīm tribes, but it is of no historical interest (*ʿIḳd*, Cairo 1305, iii, 73).

VECCIA VAGLIERI)

DHU 'L-ḲARNAYN [see ISKANDAR].

DHU 'L-KHALAṢA (or KHULAṢA). Dhu 'l-Khalaṣa refers to the sacred stone (and the holy place where it was to be found) which was worshipped by the tribes of Daws, Khathʿam, Badjīla, the Azd of the Sarāt mountains and the Arabs of Tabāla. "It was a white quartziferous rock, bearing the sculpture of something like a crown. It was in Tabāla at the place called al-ʿAblā', *i.e.*, White Rock (*TʿA*, viii, 3) between Mecca and the Yemen and seven nights' march from the former (*i.e.*, approximately 192 kilometres or 119 miles). The guardians of the sanctuary were the Banū Umāma of the Bāhila b. Aʿṣur" (Ibn al-Kalbī, *Aṣnām*, 22 f.). As the rallying point for a good many tribes, the sanctuary acquired the name *al-Kaʿba al-Yamāniya* in contrast with the Meccan sanctuary which was called *al-Kaʿba al-Shāmiyya* (Ibn Saʿd, i/1, 55), whence there arose occasional confusion with the legendary church built by Abraha in order to drawn Arabs away from Mecca (Yāḳūt, ii, 461, iv, 170). Can the divinity referred to by this characteristic be identified with the idol bearing the name al-Khalaṣa "built in the lower part of Mecca" by ʿAmr b. Luḥayy [*q.v.*]? We are told that, "It was adorned with necklaces; offerings of wheat and barley were made to it; milk was poured over it [as libations]; sacrifices were offered and ostrich eggs placed on it" (al-Azraḳī, 78).

The form of worship thus outlined suggests an agrarian goddess. She was also a cleromantic goddess, as is shown by the belomantic practices carried out in her sanctuary (cf. *Semitica*, viii, 1958, 59, 67). The arrows at Dhu 'l-Khalaṣa were called *al-āmir* (ordering), *al-nāhī* (forbidding), and *al-mutarabbiṣ* (expecting) (*Aghānī*, viii, 70, etc.). Legend has it that before leaving to avenge his father Imru 'l-Ḳays consulted the oracle at Dhu'l-Khalaṣa. Seeing 'forbidding' emerge he became angry, broke the arrow and continued on his way. "From then on until the advent of Islam and its destruction by Djarīr b. ʿAbd Allāh al-Badjalī, nobody ever consulted the arrows again (*ibid.*; Ibn Saʿd, i/2, 78). From the time of Ibn al-Ḳalbī (*op. cit.*, 23) the stone of Dhu 'l-Khalaṣa was used as the threshold in the entry to the mosque of Tabāla.

A *ḥadīth* of eschatological character is recorded

about the idol according to which the prophet said: "The hour will not come until the women of Daws crowd about Dhu 'l-Khalaṣa, worshipping it as in the past" (Ibn al-Kalbī, *l.c.*, 23; Wensinck, *Concordance*, i, 85).

Bibliography: All traditional data has been assembled in Yāḳūt, ii, 461-3, which uses Ibn al-Kalbī, *K. al-Aṣnam*, ed. Aḥ. Zakī Pasha, after R. Klincke-Rosenberg, Thesis, Leipzig 1941, 22 f. and 29 (English translation by N. A. Faris, Princeton 1952, 29-32). Cf. J. Wellhausen, *Reste*², Berlin 1897, 45-8. (T. FAHD)

DHU 'L-KIFL, a personage twice mentioned in the Ḳur'ān (XXI, 85 and XXXVIII, 48, probably second Meccan period), about whom neither Ḳur'ānic contexts nor Muslim exegesis provides any certain information. John Walker (*Who is Dhu 'l-Kifl?*, in *MW*, xvi (1926), 399-401) would like the name to be understood in the sense of "the man with the double recompense" or rather "the man who received recompense twice over", that is to say Job (Ayyūb [*q.v.*]; cf. Job xlii, 10). Without being certain, this explanation does not lack probability; in any case, no better suggestion has been put forward. Muslim exegesis either adopts a similar opinion in making Dhu 'l-Kifl the second name of Ḥizḳīl [*q.v.*] = Ezekiel, or else identifies him with an imaginary Bishr (Bashīr), son of Ayyūb (as early as Ṭabarī, *Annales*, i, 364). "Etymological" speculations about the meaning of *kifl* or the derivatives of the root *KFL* (double, caution, subsistence) have helped to swell the legends that have been woven round the rather insignificant figure in the Ḳur'ān; thus, for example, Dhu 'l-Kifl assumes the role of Obadiah, Ahab's pious *major domo* who, according to the Bible (I Kings, xviii, 4) kept and fed a great number of prophets.

The figure of Dhu 'l-Kifl reappears elsewhere in certain edifying accounts in which another person of the same name is presented as typical of the sinner who, having overcome some particularly strong temptation, gains his eternal reward.

As with many other historical or legendary personages, various local traditions attribute to Dhu 'l-Kifl burial places far removed from each other.

Bibliography: Commentaries on the two passages in the Ḳur'ān; Thaʿlabī; *ʿArā'is al-Madjālis*, Cairo edition 1371, 155; other references in the very elaborate article by I. Goldziher in *EI*¹; in addition to the note by J. Walker quoted *supra*, there is also J. Horovitz, *Koranische Untersuchungen*, 113 (which adds nothing to Goldziher). For the theme of the repentant sinner, see the Judeo-Arab legend edited in the original language by J. Obermann (*Studies in Islam and Judaism, The Arabic Original of Ibn Shâhîn's Book of Comfort*, New Haven 1933, 129 ff.), and the introduction by H. Z. Hirschberg to his Modern Hebrew version of this text, *Rabbēnu Nissīm ... mi-Ḳayruwān, Ḥibbūr yāfeh mēha-yeshūʿāh*, Jerusalem 1954, 63-9.—The burial of Dhu 'l-Kifl: Harawī, *K. al-ishārāt ilā maʿrifat al-Ziyārāt*, ed. J. Sourdel-Thomine, 76, trans. by the same *Guide des lieux de Pèlerinage*, Damascus 1957, 174 (in which the figure is identified with Ḥizḳīl). (G. VAJDA)

DHU 'L-NŪN, ABU 'L-FAYḌ THAWBĀN B. IBRĀHĪM AL-MIṢRĪ. This early Ṣūfī was born at Ikhmīm, in Upper Egypt, about 180/796. His father was a Nubian and Dhu 'l-Nūn was said to have been a freedman. He made some study of medicine and also of alchemy and magic and he must have been influenced by Hellenistic teaching. Saʿdūn of Cairo is mentioned as his teacher and spiritual director. He travelled to Mecca and Damascus and visited the ascetics at Lubbān, S. of Antioch; it was on his travels that he learnt to become a master of asceticism and self-discipline. He met with hostility from the Muʿtazila [*q.v.*] because he upheld the orthodox view that the Ḳur'ān was uncreated: he was condemned by the Egyptian Mālikī ʿAbd Allāh b. ʿAbd al-Ḥakam for teaching mysticism publicly. Towards the end of his life he was arrested and sent to prison in Baghdād, but was released by order of the caliph Mutawakkil [*q.v.*] and returned to Egypt; he died at Djīza in 246/861.

He was called "the head of the Ṣūfīs", a great teacher who had many disciples during his lifetime and afterwards. A few books on magic and alchemy, attributed to him, have survived, but his mystical teaching is found only in what has been transmitted by other writers, including his great contemporary, al-Muḥāsibī. There are many of his prayers recorded and also some poems of fine quality. He was the first to explain the Ṣūfī doctrines and to give systematic teaching about the mystic states (*aḥwāl*) and the stations of the mystic way (*maḳāmāt*). He taught the duty of repentance, self-discipline, renunciation and otherworldliness. Self, he considered, was the chief obstacle to spiritual progress and he welcomed affliction as a means of self-discipline. Sincerity in the search for righteousness he calls "the sword of God on earth, which cuts everything it touches". Solitude helps towards this end, "for he who is alone sees nothing but God, and if he sees nothing but God, nothing moves him but the Will of God".

Dhu 'l-Nūn was the first to teach the true nature of gnosis (*maʿrifa*), which he describes as "knowledge of the attributes of the Unity, and this belongs to the saints, those who contemplate the Face of God within their hearts, so that God reveals Himself to them in a way in which He is not revealed to any others in the world". "The gnostics are not themselves, but in so far as they exist at all they exist in God". The gnostic needs no state, he needs only his Lord in all states. Gnosis he associates with ecstasy (*wadjd*), the bewilderment of discovery. Dhu 'l-Nūn used the word *ḥubb* for love to God, which means, he says, to love what God loves and to hate what God hates. But the love of God must not exclude love to man, for love to mankind is the foundation of righteousness. He is one of the first to use the imagery of the wine of love and the cup poured out for the lover to drink.

Dhu 'l-Nūn was a practical mystic, who describes in detail the journey of the soul on its upward way to the goal, and gives the Ṣūfī conception of the unitive life in God.

Nicholson), i, 114-34; Djāmī, *Nafaḥāt al-Uns* (ed. Nassau Lees), 35-18; Ibn ʿAsākir, *Ta'rīkh*, v, 271-88; L. Massignon, *Lexique technique*, 206-13, 238; Brockelmann, S I, 214. (M. SMITH)

DHU 'L-NŪNIDS, in Arabic Bānū Dhi 'l-Nūn, a prominent family of al-Andalus, originally Berbers of the tribe of Hawwāra. Their name appears to be the Arabicization of an earlier Zannūn (cf. Ibn ʿIdhārī, *Bayān*, iii, 276) which would explain the alternative spelling Dhunnūn (adj. Dhunnūnī). In the 5th/11th century, during the first period of the 'Party Kings' (*Mulūk al-Ṭawā'if*), the Dhu 'l-Nūnids

ruled, with Ṭulayṭula (Toledo) as their capital, from Wādi 'l-Ḥidjāra (Guadalajara) and Ṭalabīra (Talavera) in the N. to Murcia in the S.

The original territory of the Banū Dhi 'l-Nūn lay E. of Toledo in the *kūra* (administrative district) of Shantabariyya (represented by modern Santaver near the confluence of the Guadiela and the Tagus) where as early as the amīrate of Muḥammad I (238-73/852-86) we find established Sulaymān b. Dhi 'l-Nūn, a descendant in the fourth generation of a certain al-Samḥ, who is said to have been present at the conquest of al-Andalus. In this region of the Middle Frontier (*al-thaghr al-awsaṭ*) or, as is also given, of the Northern Frontier (*al-thaghr al-djawfī*), the family played an active part, frequently in opposition to the reigning dynasty, until the end of the Caliphate of Cordova.

In the troubles of the *Fitna* (literally 'sedition') after 399/1009 the Dhu 'l-Nūnids rallied at first to Sulaymān al-Mustaʿīn (died 407/1016), but soon ʿAbd al-Raḥmān al-Midrās b. Dhi 'l-Nūn and his son Ismāʿīl, who is said to have received from Sulaymān the double vizirate and the title Nāṣir al-Dawla (Ibn Ḥayyān, quoted Ibn Bassām, iv/1, 110), struck out a line of their own. According to Ibn Ḥayyān, Ismāʿīl was the first of the 'Party Kings' to break with the central authority and was imitated in this by the others, but when and how he actually did so are not known. It is usually said that he began to rule in Toledo after the *ḳāḍī* Ibn Yaʿīsh in 427/1035. But this is evidently too late. The date of the death of Ibn Yaʿīsh is given by Ibn Bashkuwāl (ed. Codera, 628) as 419/1028-9. We also have an inscription of Ismāʿīl in Toledo dated 423/1032 with the titles Dhu 'l-Riʾāsatayn (cf. above) and al-Ẓāfir, 'the Triumphant', which must be placed after his accession (E. Lévi-Provençal, *Inscriptions arabes d'Espagne*, 66). As king in Toledo Ismāʿīl was beset by difficulties on all sides, including war with the Christians (Ibn Saʿīd, *Mughrib*, ii, 15-16), but he made good his position and survived till 435/1043, when he was succeeded by his son Yaḥyā, called al-Maʾmūn.

Early in his reign al-Maʾmūn was attacked by Sulaymān b. Hūd of Saraḳusṭa (Saragossa), and subsequently both he and Ibn Hūd at different times leagued themselves with the Christians, who were able to operate practically unopposed in Muslim territory. The death of his rival in 438/1046 put an end to these anxieties, at least temporarily, and al-Maʾmūn was free in the next decades to occupy himself elsewhere. He intervened profitably in the E. of al-Andalus, wresting Valencia from the hands of a descendant of al-Manṣūr b. Abī ʿĀmir in 457/1065 (see art. BALANSIYA). In 464/1072 he received Alfonso VI, who had been defeated by his brother Sancho of Castile at the battle of Volpejares (Golpejera), and retained him as guest in Toledo for 9 months. The main object of al-Maʾmūn's ambition was Cordova, the former seat of the Caliphate, held by the Djahwarids till 461/1069. To secure help against Ibn Hūd, he had been obliged to support the claims to the Caliphate of the pseudo-Hishām, maintained by the ʿAbbādids of Seville, which his father al-Ẓāfir had always denied. But even though thus compromised, he was able to gain possession of Cordova, which had passed to the ʿAbbādids, in 467/1074-75, shortly before his own death in the same year.

Al-Maʾmūn was succeeded at Toledo by his grandson Yaḥyā al-Ḳādir, whose ineptitude was speedily shown by the assassination of the *wazīr* Ibn al-Ḥadīdī, hitherto a principal support of the Dhu 'l-Nūnid regime. Al-Ḳādir lost Cordova and Valencia and, faced by dissension at home and by the hostility of the other 'Party Kings', he took the disastrous decision of applying for help to Alfonso VI. He was brought back to Toledo, which he had been obliged to leave, by Christian arms and later installed by Alfonso in Valencia, in return for the cession of Toledo, but was assassinated in 485/1092. With al-Ḳādir ended the rule of the Dhu 'l-Nūnids. Toledo itself had passed into the hands of the Christians in 478/1085.

Less well-endowed than the ʿAbbādids, the family produced perhaps only one man of literary distinction, Arḳam b. Dhi 'l-Nūn, brother of Ismāʿīl al-Ẓāfir (Ibn Saʿīd, *ibid.*, 14), and at first their court appears to have been deficient in poetical talent (Ibn Bassām, *ibid.*, 111, 114). This state of affairs must have radically altered under al-Maʾmūn, since we know the names of many literary men and scholars who flourished under Dhu 'l-Nūnid protection, among them the *ḳāḍī* Ṣāʿid, author of the well-known *Ṭabaḳāt al-Umam*, valuable for the history of science, and the famous astronomer al-Zarḳāla (Azarchiel), who may have been employed as engineer by al-Maʾmūn in some of his constructions at Toledo. The luxury of al-Maʾmūn's court became proverbial in the expression 'the circumcision-feast of Ibn Dhi 'l-Nūn' (*al-iʿdhār al-Dhunnūnī*), given in honour of his grandson (an eye-witness description in Ibn Bassām, iv/1, 99 ff., paraphrased by E. Lévi-Provençal, *Islam d'Occident*, 119-120).

DHŪ NUWĀS, YŪSUF ASHʿAR, pre-Islamic king of the Yemen. According to a tradition probably deriving from Wahb b. Munabbih (*Tīdjān*, 2 ff.) and repeated by the Arab chroniclers (Ibn Ḳutayba, *Maʿārif*, 277; al-Dīnawarī, *Akhbār*, 63; al-Ṭabarī, i, 540 ff.; Ibn Khaldūn, *ʿIbar*, i, 90; al-Masʿūdī, *Murūdj*, i, 129 etc.), Lahayʿa b. Yanūf (Lakhīʿa, Lakhīʿa Yanūf Dhū Shanātir; al-Ṭabarī, i, 540; see also Ibn al-Athīr, ii, 250) abandoning himself to unnatural practices with the sons of the aristocracy, the young Dhū Nuwās, who in Arab traditions is generally known as Zurʿa b. Tibbān Asʿad, and who took the name Yūsuf after his conversion to Judaism (Ibn al-Athīr, ii, 252, calls him Yūsuf Shuraḥbīl), was placed on the throne by the Ḥimyarites after he had

assassinated Laḥayʿa b. Yanūf to escape from his attentions. On the subject of his reign, which is said to have lasted 38 years, tradition tells in particular of the persecutions to which he subjected the Christians of Nadjran [see AṢḤĀB AL-UKHDŪD] and the invasion of the Yemen by the Negus at the request of the emperor of Constantinople. Dhū Nūwās was conquered by Aryāt, (who had Abraha under his command, and threw himself into the sea.

In the *Martyrium St. Arethae* he is called Δουναας (nom.) and Δουναav (accus.) (Nöldeke, *Geschichte*, 174, 3) (Theophanus calls him Dimianus, which Nöldeke believes incorrect, the name belonging to an Ethiopian king). Thus the epithet Dhū Nuwās does not seem to be an invention of Arab traditions which explain it by his curly hair (al-Hamdāni, *Iklīl*, viii, 137); but a certain Dhū Ghaymān and Nuwās, lord of a fief, is mentioned in *CIH*, 68, li (cf. M. Hartmann, *Islamische Orient*, ii, 292 ff.). However, *The Book of the Himyarites* (A. Moberg, lxxiv, 34a; D. Smith, 456, 3) and the *Chronique de Seert* (v, 2, 330-1) call our Dhū Nuwās Masrūķ; brought up in the Jewish faith by his mother (from Nisibis), he reigned after his father. The inscription Ry 446 = Ry 510, (*Muséon* lxv, lxvi), whose author was the South Arabian king Maʿdīkarib Yaʿfur, at that time (631 sab. = 522 A.D.) on a campaign in central Arabia against al-Mundhir III of al-Ḥīra, and various pieces of evidence show that Dhū Nuwās Masrūķ had succeeded Maʿdīkarib on the throne. If the *Chronique* is authentic, Yūsuf Dhū Nuwās must be his predecessor's son. The two inscriptions Ry 507 = Ḥima 444 (Philby 158, *Muséon*, lxiv, 93 ff.) and Ry 508 (*Muséon*, lxvi), discovered in 1952 by G. and J. Ryckmans confirm the historical existence of Yūsuf Dhū Nuwās; they describe the operations conducted against the Christians and Abyssinians in Ẓufār, Mukhā and Nadjrān in 633 sab. = 524 A.D. by a South Arabian king who can be conclusively identified with Yūsuf Dhū Nuwās. Between the dates of Ry 510 (522 A.D.) and Ry 508, Ry 507 (524, March, April, July-September 524 A.D.) we note the date of the letter from Simeon Bēth Arsham (cf. J. Ryckmans, *Persécution*, 18) written on the 20 January 524 and addressed to the Christians, telling of the coming of the new king and his persecution of the Christians. E. Glaser has however remarked that the Sabaean year began between January and February. It emerges that Dhū Nuwās, Yūsuf Ashʿar had come to power at the end of 523 A.D. Simeon Bēth Arsham's letter seems to establish this fact. Simeon was sent by Justinian I to negotiate a peace with al-Mundhir III at that time, in 524, to Ramla in the Syrian desert. It was there that the letter came from the king of Ḥimyar telling al-Mundhir: "this king whom the Abyssinians sent to us is dead, therefore I have become king of the whole Ḥimyarite region" (cf. J. Ryckmans, *Muséon*, lxvi, 329; Guidi, *Lettera*, 480 ff.).

John Posaltes' hymn and Simeon's letter, as I. Guidi has shown, must refer to the second persecution, that is to say to the period of Negus Ella Aṣbaha's second expedition. The letter from James of Sarug to the Ḥimyarites dated 521 A.D. (Guidi, *Lettera*, 479), must relate to an earlier and less general persecution. This letter and other facts from Abyssinian and Greek sources suggest that the persecution had in fact already started before Dhū Nuwās, during the reign of his predecessor Maʿdīkarib Yaʿfur. According to a tradition from Ibn al-Kalbī (al-Ṭabarī, above; Ibn al-Athīr, *Kāmil*, i, 254), the Negus must have made two expeditions. In the first, Dhū Nuwās by means of a ruse succeeded in wiping out the occupation forces. After installing a viceroy, the Negus withdrew to Ethiopia, leaving an Ethiopian garrison on Ḥimyarite territory. According to Cosmas Indicopleustes, the Negus (Sidney Smith, *Events*, 454) tried to establish Abyssinian claims to the Ḥimyarite territory from 518 A.D. Abyssinian sources suggest that the Christians paid their tribute to the Negus himself.

On the other hand, Maʿdīkarib Yaʿfur, the author of Ry 510, can be identified with his homonym of CIH 621 = RES 2633 (640 sab. = circa 530 A.D.; cf. Philby, *Muséon*, lxiii, 271-5). One explanation is therefore possible: Maʿdīkarib Yaʿfur may have abdicated as he could not restore the economic autochthonous situation. His régime must have been in financial difficulties, with the result that he was compelled to seek a large credit from a Nadjrānī Christian, Raḥma (A. Moberg, 26a, 43b). Then Yūsuf Ashʿar, Dhū Nuwās and other leading Ḥimyarites, specially those of Ry 508, Ry 507 and a certain number of those of RES 4069 and Ist. 7608 bis must have joined together to seize power and unleash the persecutions (cf. Philby, *Muséon*, lxiii, 271 ff.). The Dhū Yazan tribe must have taken a leading part in these activities. Sharāḥīl Yaķbul Dhū Yazan acted for Yūsuf Ashʿar in the persecutions at Ẓufar and Nadjrān. Sumayfaʿ Ashwā (Ist. 7608 bis ll. 1-2) whom the Abyssinians chose as king of Sabaʾ after the defeat of Dhū Nuwās (G. Ryckmans, lix; J. Ryckmans, *Muséon*, lxvi, 337-8; *The Book of the Ḥimarites*, 54a and c/xvii-ix; see also Smith, *Events*, 459) was grandfather of Sharāḥīl Yaķbūl Dhū Yazan; this tribe must be the same as king Yūsuf's (J. Ryckmans, *Muséon*, lxvi, 337). At the beginning of his reign, Yūsuf Ashʿar invited the king of Ḥīra, al-Mundhir, just when the latter was leading a campaign against Byzantium in the Syrian desert, to follow his example and exterminate all Christians who would not deny Christ.

Then Yūsuf Ashʿar began a savage onslaught on the Christians and Abyssinians, first of all at Ẓufar where he destroyed and burnt the church (Ry 508 ll. 2-3; Ry 507 l. 4; cf. *The Book of the Ḥimyarites*, 7b). Then turning to the neighbouring Christian tribe of al-Ashʿar, he ordered his commander Sharāḥīl Dhū Yazan to march against Mukhā (Ry 508, 3-4). In the operations in the two inscriptions, casualties in the battles amount to 14,000 killed, with 11,000 prisoners. At Nadjrān, where the siege was said to have lasted some months, the king asked the Nadjrānīs for guarantees to prevent any invasion by the South. Meanwhile a certain Daws Dhū Thuʿlubān fled and informed the emperor Justinian I. Simeon Bēth Arsham arranged that the news should reach the monophysites in Tarsus and Antioch. An Ethiopian army then intervened, at Justinian's request, in May 525 A.D. (J. Ryckmans, *Persécution*, 18-22) and the Negus occupied the Yemen (see Bury, *Later Roman Empire*, ii, 324; Smith, *Events*, 451) at the head of 120,000 men (70,000 according to al-Ṭabarī, i, 548) who came down on Bāb al-Mandab (J. Ryckmans, lxvi, 334-5; Budge i, 262; Smith, 458).

According to Syrian evidence, Dhū Nuwās Ashʿar was killed (A. Moberg, Ch. XLII; Philby, *Background*, 120). We can see from what ensued that a split occurred among king Yūsuf's allies (cf. Smith, 549; Ibn Khaldūn, *ʿIbar*, i, 92). Sumayfaʿ Ashwā, viceroy to the Negus in 525, was among Yūsuf's supporters in 524. Inscriptions and *The Book of the Himyarites* are in agreement about the Jewish king's

successor, whom Ella Aṣbaḥa gave to the Ḥimyarites (see Smith, 459, B.H. 54b); it is a question of king Sumayafaʿ Ashʿwa (in Procopius, *Wars*, i, xx, 3-8, he is called Esimiphaeus) of Inst. 7608 bis, l. 1, a Christian convert of the royal family. J. Ryckmans and A. F. L. Beeston think that RES 2633 = CIH 621, the date of which, 640 sab., must indicate his death, not that of Dhū Nuwās Yūsuf (*Persécution*, 8-9). This inscription must relate to Abraha's revolt against king Sumayfaʿ Ashʿwa in about 530 A.D. (see also Procopius, *Wars*, supra). According to this thesis, the Sabaean era started in about 109 B.C., and not in 115. It is by this system of dating, which conforms better with the evidence of inscriptions and traditions, that the inscriptions quoted in this article have been dated.

DHU 'L-RUMMA, lit. 'he who wears a piece of cord', nickname given to the famous Arab poet Ghaylān b. ʿUḳba, who died in 117/735-36.

He earned the name on account of a small charm which he hung around his neck by a piece of string. He was from the Ṣaʿb b. Milkān clan, an offshoot of the ʿAdī tribe which originated from the ʿAbd Manāt peoples of Central Arabia. On his mother's side he was related to the Asad tribe. If we accept that he died at the age of forty, his date of birth would be 77/696. This information is however open to doubt, as it is based on a very obscure passage in one of his poems (see Ibn Ḳutayba, 334, l. 7). He came from a family rich in poetical talent (see *Aghānī*[1], xvi, 111); and was known as the 'transmitter' (*rāwī*) of the poet al-Rāʿī [*q.v.*]. Later in his life, in Baṣra, he was regarded as an authority on poetry (*Aghānī*[3], vi, 88), but is said not to have divulged the fact that he knew how to read and write (see Ibn Sallām in *Aghānī*[1], xvi, 121, and Ibn Ḳutayba, 334). There is every reason to think that during his life he remained in close contact with his tribal group in Central Arabia; numerous anecdotes have come to us of his relations with the very aged governor of Yamama, Muhādjir (see *Aghānī*[1], xvi, 112, 115, and *Aghānī*[3], viii, 54—panegyric in his honour by the poet). Other anecdotes throw light on Dhu 'l-Rumma's activities in Kūfa (*ibid.*, xvi, 122) and, above all, in Baṣra, where he frequently came into contact with the ḳāḍī-governor Bilāl b. Abī Burda (d. after 120/738). Certain works addressed to this generous patron are evidence of the protection which he granted the poet (see Ibn Ḳutayba, 341. Ibn Sallām in *Aghānī*[1], xvi, 121 bottom, 128 ff.). It was in Baṣra, moreover, that Dhu 'l-Rumma met the reader (*ḳāriʾ*) ʿAnbasa and the grammarians Abū ʿAmr al-ʿAlāʾ [*q.v.*], Yūnus [*q.v.*] and ʿIsā b. ʿUmar (see *Aghānī*[8], xvi, 122 bottom; Ibn Sallām, 128; Ibn Ḳutayba, 334). The city was also the scene of his disputes with other poets from eastern Arabia; on one occasion, Ruʾba accused him in front of Bilāl b. Abī Burda of the shameless plagiarism of his own poems (see *Aghānī*[1], xvi, 121 and 123-5; also Ḳutayba, 339). The controversies with Djarīr [*q.v.*] were a result of the open preference which Dhu 'l-Rumma showed for the poetry of al-Farazdaḳ; his diatribes with the Tamīmī Hishām seem to have given rise to some of the choicest anecdotes in Baṣra (see *Aghānī*[3], viii, 55, and *ibid.*[8], xvi, 117). We have only a few facts of doubtful authenticity on his love affairs with Mayya and a certain Kharḳāʾ; they were later developed into a sort of novel. His thoughts on religion also remain obscure, there being but a few references to the Ḳurʾān in his poems, *e.g.*, *Dīwān* no. 7 verse 30, no. 22 verses 35 & 79 (cf. anecdotes in *Aghānī*[1], xvi, 128). His death, at a relatively young age, has been put at about 117/735 (for other estimations see Schaade in *EI*[1], s.v., and references). According to a story originating from two sources in Baṣra, an unknown person reported his burial at Huzwā, on the borders of Dahmā.

As was normal for the times, Dhu 'l-Rumma's works were diffused orally by *rāwīs*, one of whom is known by name (see *Aghānī*[1], xvi, 112, l. 27). Many stories attributed to him circulated among the nomads of eastern Arabia (*ibid.*, xvi, 112), and, although often of doubtful authenticity, they have helped preserve his poetry for later generations. In time, oral accounts were written down in the form of a *Dīwān*, and by the end of the 3rd/9th century two collections existed, one by Thaʿlab and the other, a more complete edition, by al-Sukkari (cf. *Fihrist*, 158, l. 20). In Macartney's work, the collection attributed to Dhu 'l-Rumma is extensive, comprising 87 complete poems to which the author has added 149 fragmentary works. Most of the poems are exceptionally long. Sometimes they are improvised for a particular occasion, *e.g.*, nos. 31, 33 (in praise of Muhādjir), 57 (traditional *ḳaṣīda* in honour of Bilāl), 81 (an allusion to events of which nothing is known historically). More often than not they are lyrical odes written in a style common to Bedouin poets of the time, beginning with a description of deserted camps, followed by some reflections on the poet's lover, and ending with a description of his camel and its wanderings across the desert. His beloved Mayya is mentioned in nearly all of them (nos. 4, 7, 10, 11, 17, 22, 28 etc.). The study of his works poses several well-known problems. Some pieces are fragmentary (*e.g.*, the end of no. 60, *ḳaṣīda*, is missing), others are of dubious origin because of the inconsistent sequence of themes treated in them. Some seem to have no more than a lexicographical inspiration, and were no doubt composed to meet the demands of certain learned men of Baṣra and Kūfa. If we are to believe Ḥammād 'the Transmitter', many poems full of *pathos* were written in Kūfa by persons using Dhu 'l-Rumma's name (see *Aghānī*[1], xvi, 122, l. 156 ff.). Moreover, it may well be asked whether certain elegaic poems were not included in the collection simply because they contained references to Mayya. From the 3rd/9th century onwards, the historical character of Dhu 'l-Rumma began to change and he took his place among those famous Arab lovers who were victims of unrequited passion; in this case, the hero pines away for Mayya, who is married to a rich *sayyid*, and his songs addressed to Kharkāʾ are designed only to arouse his Lady's

jealousy (ref. *Aghānī*[1], xvi, 113, 114, 119 ff., 125, quoting Ibn al-Naṭṭāḥ; cf. Ibn Ḳutayba 334-6, where the story, from an unknown source, is in a very conventional romantic manner).

Although this epic of love has been much elaborated (cf. mention of title in *Fihrist*, 306, l. 22), it has nevertheless retained traces of its Bedouin origin, as is shown by comparison with a story in al-Hamadhānī's [*q.v.*] *Maḳāmāt* [*q.v.*] (Beirut 1924, 43), which the author adapted from an old story of central Arabian origin.

Dhu 'l-Rumma's prestige stood particularly high with the Baṣra grammarians (see *Aghānī*[1], xvi, 113 ff.), although this assertion must be qualified with some reservations (see Ibn Sallām, 125, & Ibn Ḳutayba, 333). It was the profuse richness of the poet's descriptions of the camel, onager and oryx and the desert which aroused admiration; the great beauty of his elegies was also acknowleged, hence the large number of his verses which were set to music (*Aghānī*[1], xvi, 129 ff.), of which we may mention a *Kitāb akhbār Dhu 'l-Rumma* composed by Isḥāḳ al-Mawṣilī (title in *Fihrist*, 142, l. 19). But it was nevertheless the lexicographers whom Dhu 'l-Rumma interested most, and, to give but one example, numerous verses of his are quoted in the dictionary *Lisān al-ʿArab*. This is due to the great number of rare expressions used by the poet. On the other hand, he is quoted only 6 and 20 times respectively in the *Bayān* of al-Djāḥiẓ and the *ʿIḳd* of Ibn ʿAbd Rabbih. Set in the perspective of his age and society, Dhu 'l-Rumma is one of the great figures in the tradition of eastern Arabian poetry. His excessive use of rare terms was a common tendency in poets (*e.g.*, Ruʾba, [*q.v.*]) who were in close contact with the philologists and grammarians of ʿIrāḳ; the frequent appearance of the *radjaz* metre in his *Dīwān* underlines his close relationship with certain of his contemporaries. He terminates a line of poets who, even in their own age, were considered 'behind the times'.

(R. Blachère)

DHU 'L-SHARĀ is the soubriquet of a god borrowed from the Nabataeans, known in Aramaic as *dshr*, *Dusares* (E. Littmann, *Thamūd und Ṣafā*, 30). These soubriquets for gods formed from the pronoun *dhū* (feminine *dhāt*) were of frequent use in Southern Arabia (G. Ryckmans, *Les religions arabes préislamiques* 2, 44-5; W. Caskel, *Die alten semitischen Gottheiten*, 108-9). According to Ibn al-Kalbī, Dhu 'l-Sharā was a divinity of the Banu 'l-Hārith of the tribe of the Azd (*Kitāb al-Aṣnām*, ed. Aḥmad Zakī[2], 37). Ibn Hishām records that Dhu 'l-Sharā "was an image belonging to Daus and the *ḥimā* was the temenos which they had made sacred to him; in it there was a trickle of water from a rivulet from the mountain" (Ibn Isḥāḳ's *Sīra*, ed. Wüstenfeld, 254; trans. A. Guillaume, *The Life of Muhammad*, 176). This tradition is resumed in the *Ḳamūs*: *dhu 'l-sharā ṣanam daws*. The tradition arose from confusion among the Arabs between Duserani, "the worshippers of Dusares", a naming for the Nabataeans, and the tribe of Daws (R. Dussaud and F. Macler, *Mission dans les régions désertiques de la Syrie moyenne*, 67, n. 3).

Dhu 'l-Sharā is attested in Thamudic and Ṣafaitic. Its only trace in Thamudic is on an inscription from the region of Tabūk, in the Aramaic form *dshr* (Jaussen-Savignac 658[1], according to the reading of A. van den Brauden, *Les inscriptions thamoudéennes*, Louvain 1950, 451). Ṣafaïtic has the name of this god in the form *dhshr* (*CIS*, v 57, etc.) and in the Aramaic forms *dshr* (*CIS*, v 88 etc.) and *dshry* (*CIS*, v, 2955). The name *Dhu 'l-Sharā* means "The One from Sharā", the local god of the Sharā range, the southernmost tip of the chain of mountains to the south-east of the Dead Sea (A. Musil, *The Northern Heğâz*, New York 1926, 252-5; R. Dussaud, *La pénétration des Arabes en Syrie*, 30; W. Caskel, *Die alten sem. Gottheiten*, 109). The name of this god was Aʿara, as is shown by several Nabataean inscriptions dedicated to Dū Sharā Aʿara (*CIS*, ii 190; *RES* 83, 696; J. Cantineau, *Le nabatéen*, ii, nos X-XII, 21-4). This name might belong to a root *ghry*; in Arabic, *gharā* means "to coat with a sticky substance". At Ḥirā, in the kingdom of the Lakhmids, there were known to be two obelisks (*ghariyān*) daubed with the blood of sacrifices (H. Lammens, *L'Arabie occidentale avant l'Hégire*, 146 and 167). Aʿara would then be the god whose bethel was daubed with blood. It was the same with Dusares (Suidas, *Lexicon*, s.v. Θευσαρης) whose bethel was a black, rectangular, uncarved stone and who was the object of bloody sacrifices (D. Sourdel, *Les cultes du Hauran à l'époque romaine*, 59; R. Dussaud, *Pénétration*, 40 and n. 4; J. Starcky, *Palmyréniens, Nabatéens et Arabes du Nord*, 222). The confusion of Dusares with the god Ares is due to Suidas who "takes Θευσαρης, a defective form of Dusares, for the god Ares" (M.-J. Lagrange, *Études sur les religions sémitiques* 2, 210, n. 1).

From the fifth century B.C. the god Aʿara was identified with Dionysos, according to Herodotus: "Dionysos, with Urania, is the only god whose existence they [the Arabs] recognize . . . They call Dionysos Orotalt, Urania Alitat" (*Hist.* iii, 8). Aʿara can be recognized in the part *Oro*, whatever may be the case with its second part *talt* or *tal* (C. Clermont-Ganneau, *Recueil d'archéologie orientale*, V, Paris 1903, 109-15; R. Dussaud, *Pénétration*, 45). Alitat, clearly, is the goddess Allāt. Hesychius (s.v.) identifies Dusares with Dionysos: Δουσάρης τὸν Διόνυσον· Ναβαταῖοι. Aʿara Dhu 'l-Sharā being none other than Dionysos the god of vegetation, "it may be concluded that during the occupation of Djebel esh-Sharâ by the Edomite Arabs the vine prospered there and that before the arrival of the Greeks the god of vegetation Orotal (Aʿara) had soon been identified with Dionysos" (R. Dussaud, *op. cit.*, 56). J. Perrot's excavations in the Negev and the recent experiments of the botanist M. Evenari, who has restored a Nabataean agricultural settlement dating from early in the Christian era, on the site of the former city of Subeita, prove that the fertility of the land in that desert area was ensured by the construction of terraces, dams and channels, irrigated by periodic rainfall and flooding. This explains how Dionysos-Dusares came to be represented on reliefs decorated with vine-branches, particularly on the lintels of Ḳanawāt and Suwayda (R. Dussaud, *Pénétration*, 57-61; see M. Dunand, *Le musée de*

Soueida, Paris 1934, nos 1, 2 and 3; D. Sourdel, *Les cultes du Hauran*, 64, expresses certain doubts on these identifications). Similarly, the statue of a bearded god at Ghariya-Shubayḥ, holding a horn of plenty filled with bunches of grapes, seems indeed to represent Dusares (R. Dussaud, *op. cit.* 61; see D. Sourdel, *op. cit.* 64, who does not share this opinion).

An eagle with outspread wings was probably the symbol of Dusares. It figures above the entrance to numerous Nabataean tombs at Hegra (see particularly Jaussen and Savignac, *Mission*, i, pl. xxxvi and fig. 160; ii, *Atlas*, pl. xli, xliii, xliv and xlv). Jaussen and Savignac see in it the symbol of Dusares, who might have been assimilated in Zeus the sun god (*Mission*, i, 400-401). An eagle figures also on one of the lintels of Suwayda (M. Dunand, *op. cit.*, n. 2); attributing it to Dusares in this relief "is not subject to doubt" (R. Dussaud, *op. cit.*, 60). R. Dussaud sees Dusares on an altar relief from a Nabataean temple to that god in Siʿ (formerly Seia in the Ḥawrān; see R. Dussaud, *Topographie historique de la Syrie antique et médiévale*, Paris 1927, 368-9), dating from early in the Christian era (D. Schlumberger, *La Palmyrène du Nord-Ouest*, Paris 1951, 97 n. 3). But the altar is dedicated to Zeus Kyrios (R. Dussaud, *Pénétration*, 57). This assimilation, as does also the assimilation of Dusares to Helios in the Roman era, nevertheless raises problems which are far from resolved (D. Sourdel, *op. cit.*, 63-5), and it should be noted that, while Strabo may associate Dionysos with Zeus Ouranos, he never identifies them with each other in any way (Strabo, xvi, 1, 11).

In the Hellenistic period Dionysos gave his name to the town of Suwayda, Dionysias, formerly called Soada, in Djabal Drūz. The Greek inscription [Waddington 2309 = CIG 4617] describes Dionysos as the founder of Dionysias: πρωνοία κυρίου κτίσλου Διονύσου. The identification of Suwayda with Dionysias has been established by the remains of an inscription, engraved on a milestone between the towns of ʿAtil (formerly Athela) and Suwayda: ...ὅροι Διον[υσιά]δος ...[ὅ]ροι 'Αθελεν[ῶ]ν (R. Dussaud and F. Macler, *Mission*, 247-248, Greek no. 23). This confirms that during the Nabataean occupation the worship of Dusares had spread into the Ḥawrān and adjacent areas. Several Nabataean inscriptions were dedicated to Dhu 'l-Sharā *dy bbṣr'*, "who is at Boṣrah" (*CIS*, ii 218; *RES* 83; see J. Cantineau, *Le nabatéen*, ii, 21, no. X 36,; no. VII).

According to Epiphanius (*Contra Haeres.*, LI, 22, 9-12), the Nabataeans celebrated on the sixth of January (formerly in the East the Christian feast of the Nativity) the feast of Dusares, the son of the virgin Χααβου (correction for Χααμου; R. Eisler, in *ARW*, xv (1912), 630). Epiphanius records this tradition with apologetical purpose, "with a view to showing that also the pagans had the notion of the virgin birth of a god" (D. Sourdel, *Les cultes du Hauran*, 67). But Epiphanius's account rests on a linguistic confusion: Χααβου "virgin" (in Arabic *kuʿba, kaʿiba*) is in fact the Arabic *kaʿba* "cube" (a word belonging to the same root), whence *kaʿba*, "stele" or "bethel", the term which designates the Kaʿba of Mecca. This tradition is perhaps only a reminiscence of the worship of the bethel personifying Dhu 'l-Sharā. In Aramaic bethel is *mōtab* "seat". According to J. Starcky, coins from Boṣra presenting the legend of "Dusares the god", as might also three egg-shaped bethels resting on a support, may give some idea of Dusares' "seat", represented by the support (*Palmyréniens, Nabatéens et Arabes*, 221).

According to Ibn Hishām (see above) the *kaʿba* or bethel of Dhu 'l-Sharā was in a *ḥimā*, a sacred enclosure also called *ḥaram*. According to a scholion in the *Dīwān* of the Hudhaylīs (J. Wellhausen, *Reste*, 51), the *ḥaram* was itself enclosed in the *sharā*, which covered a greater area: *al-sharā mā kāna ḥawl al-ḥaram wa-huwa ashyaʾu 'l-ḥaram.* Thus Dhu 'l-Sharā, the god of Djabal Sharā, becomes also "the master of the sacred enclosure" (M.-J. Lagrange, *Études sur les religions sémitiques*², 184-5). Nevertheless, that is only a secondary meaning of the name Dhu 'l-Sharā.

Also known are the Nabataean theophorous proper names ʿAbddūsharā, Taymdūsharā (references in J. Cantineau, *Le nabatéen*, ii, 126 and 256), and the Arabic proper name ʿAbd dhī Sharā (J. Wellhausen, *Reste*², 3).

(G. Ryckmans)

DHŪ YAZAN [see sayf].

DHUBĀB, the fly. Some authors state that word is used also for other insects, such as bees, hornets, butterflies or moths (*farāsh*), etc. According to Arab lexicographers, it is either a singular or else a collective noun, in which case *dhubāba* is used for the singular. Cognate synonyms are found in other Semitic languages, *e.g.*, Hebrew זְבוּב, Aramaic דְּבָבָא.

The fly is often mentioned and described in ancient Arabic poems and proverbs. A *ḥadīth* has it that there are flies in hell to torture the condemned. Numerous kinds are mentioned by Arab zoologists, some of them bearing specific names and some being distinguished by their colour (black, blue, red, tawny [*aṣfar*]). Another distinction is made according to the supposed origin of the different varieties: Some are said to be produced by spontaneous generation, in putrescent substances or in the body of certain animals (lion, dog, camel, horse, cattle, etc.), to

which they adhere exclusively; others are born by sexual procreation. The flies that molest man are produced in dung. Certain places are pointed out as man.
particularly infested with flies, such as the town of Wāsiṭ. In some region flies are said to be eaten by man

The fly lives no longer than forty days (based on a *ḥadīth*). It belongs to the 'sunny' animals, appearing in summer and vanishing in winter. It is killed by intense heat or cold. It is active during day time and rests at night. It likes sweet and loathes certain substances, as oil, camphor and arsenic. It hunts bugs (*baḳḳ*) and gnats (*baʿūḍ*) and is eaten itself by bats, spiders, reptiles and other animals. If it were not for the flies' hunting bugs, it would be intolerable for man to live in houses. The tips of the fly's feet are rough so that it may not slip on smooth surfaces. The sources mention several devices for keeping flies away from human habitations.

In various ways flies were used for medicinal and cosmetic purposes: rubbed over the sting of a hornet they relieve the pain; burnt and mixed with antimony they increase the beauty of the eyes of women, etc. Their significance when seen in dreams was treated in pertinent writings.

A work entitled *Kitāb al-dhubāb* (probably a lexicographical treatise) is attributed by Ḥādjdjī Khalīfa (ed. Flügel, v, 85, no. 10120) to Abū ʿAbd Allāh Muḥammad b. Ziyād al-Aʿrābī, who, but for the year of his death, 333 A.H. as given by Ḥ.Kh., could be identical with the well known philologist Ibn al-Aʿrābī (Brockelmann, S I, 179).

DHUBYĀN [see GHAṬAFĀN].

DHUNNŪNIDS [see DHU'L-NŪNIDS].

AL-**DHUNŪB, DAFN**, burial of offences, a nomadic practice which consists of a make-believe burial of the offences or crimes of which an Arab is accused. According to Shihāb al-Dīn al-ʿUmarī (*al-Taʿrīf bi 'l-muṣṭalaḥ al-sharīf*, Cairo 1312, 165 ff.), almost the only source, this curious ceremony was practised as follows. A delegation consisting of men who had the full confidence of the culprit appeared before an assembly of notables belonging to the tribe of the victim, to whom they said: "We wish you to perform the *dafn* for So-and-so, who admits the truth of your accusations". The delegates then enumerated all the offences of their client. The plaintiff agreed, dug a hole in the ground, and said: "I throw into this hole all the offences with which I charge So-and-so, and I bury them as I bury this hole". He then filled in the hole and levelled the ground.

According to the same author, the practice of *dafn* was sometimes also applied to the *amān* [*q.v.*]. However, contrary to the customs of the nomadic Arabs, who recognized only oral confessions, the offences which were forgiven were also recorded in a written document.

This practice, about which we have little information, seems to have been current in the time of al-ʿUmarī. By the present day it would seem to have completely disappeared.

ḌIBĀB [see ʿĀMIR B. ṢAʿṢAʿA].

DĪBĀDJ [see ḲUMĀSH].

AL-**DIBDIBA**, an extensive gravel plain in north-eastern Arabia, bounded roughly on the east by the depression of al-Shaḳḳ (which forms the western boundary of the Saudi Arabia-Kuwait Neutral Zone), on the west by the *wādī* of al-Bāṭin, and on the south by the gravel ridge of al-Warīʿa. The plain extends northward from Saudi Arabia into the Shaikhdom of Kuwait for a distance of about 20 kms. It has an area of c. 30,000 sq. kms. and is remarkable for its firm, almost featureless surface, sprinkled with pebbles of limestone, quartz, and igneous rock carried from central and western Arabia during the Pleistocene by the Wādī al-Ruma al-Bāṭin drainage system. Al-Dibdiba is drained internally, with rain water collecting in shallow, silt-floored basins (*khabāri*; sing., *khabrāʾ*). It is part of the traditional *dīra* of Muṭayr and is now a favourite winter grazing area of several north-eastern tribes. The plain was once famous for its gazelle hunting. The term *dibdiba* (pl. *dabādib*) is applied by some of the Bedouins to any flat, firm-surfaced area and is related to the classical *dabdaba*, referring to the drumming sound of hooves on hard earth.

(J. Mandaville)

DIʿBIL, poetic nickname of ABŪ ʿALĪ MUḤAMMAD B. ʿALĪ B. RAZĪN AL-KHUZĀʿĪ, ʿAbbāsid poet, born 148/765 and died 246/860. His birthplace is uncertain; the cities of Kūfa and Ḳarḳīsiya are given as his places of birth. According to the accounts in the *Kitāb al-Aghānī*, he spent his youth in Kūfa from which he was forced to flee because of some mischievous activity. Diʿbil's apprenticeship as a poet was under the tutelage of Muslim b. al-Walīd [*q.v.*]. However, he soon made a reputation for himself as is indicated from his relationship with Khalaf al-Aḥmar (d. 180/796) and Marwān b. Abī Ḥafṣa (d. 181/797). The most probable date for Diʿbil's entry into the circle of Hārūn al-Rashīd (d. 193/809) lies between 795-809.

Being pro-Shīʿite and famous for his poem praising ʿAlī al-Riḍā [*q.v.*] he generally attacks the ʿAbbāsid caliphs from Hārūn to al-Mutawakkil (d. 247/861). However, Diʿbil's loyalty appears to be motivated also by monetary considerations so that we find him praising them on occasion. If Diʿbil is famous for his satires—at times of the vilest content—he is also capable of expressing a fine sentiment and an appreciation of nature. The simplicity and directness of his expression share and give additional evidence of this tendency which has become characteristic of the early ʿAbbāsid age.

Ibn Rashīḳ places him in the *Ṭabaḳa* of Abū Nuwās [*q.v.*] and al-Buḥturī rates him above Muslim b. al-Walīd. Diʿbil's rivalry with Abū Tammām [*q.v.*], whom he excluded from his *Kitāb al-shuʿarāʾ*,

is based not only on literary grounds but also on political-religious foundations, since Abū Tammām was lukewarm to the Shīʿa and was pro-North-Arab.

Diʿbil's *Book of the Poets*, whose date of final composition is post 231/846, and whose fragments are cited in works from the 9th to the 17th century, is important in Arabic literary history since it forms a link between the *Ṭabaḳāt* of al-Djumaḥī (d. 230/845) and the *Kitāb al-Shiʿr* of Ibn Ḳutayba (d. 276/889), Diʿbil's pupil. Moreover, since Diʿbil was chiefly interested in the minor poets of the Islamic period—including those of the category of Hārūn al-Rashīd, ʿAbd Allāh b. al-Zayyāt (d. 233/847), and Aḥmad b. Abī Duʾād (d. 240/854)—his work can be regarded as a defence of the "modern poets" which preceded and anticipated that of the *Kitāb al-Shiʿr* by Ibn Ḳutayba.

(L. Zolondek)

ḌIDD, ναντίον, "contrary" is one of the four classes of opposites, ἀντικείμενα, *mutaḳābilāt*, as discussed by Aristotle in his Categories x (and also in his Metaphysics v, 10). There are four classes of opposites: 1) relative terms; 2) contraries; 3) privation and possession; 4) affirmation and negation. The fact that there are contraries implies that there must be a substratum in which they inhere, for it is impossible, even for God, to change, *e.g.*, the White into the Black, although a white thing may become black. There are things which have necessarily one of two contraries, *e.g.*, illness and health, for every animal is either sick or healthy (Galen, however, distinguishes three conditions of the body, *corpus salubre, corpus insalubre* and *corpus neuter*) and there are contraries which allow an intermediate term, for not all bodies are necessarily black or white. The question whether there is an intermediate term between virtue and vice was much debated by the Stoics who originally denied this, for whether a man is a hundred stadia from his aim or only one stadium, he is equally not there. In Islam the question whether there is a medium term between faith and unbelief was much discussed and those theologians who asserted that belief is based only on *taṣdīḳ* assent, (for faith as a θεοσεβείας συγκατάθεσις see for example, Clemens Alexandrinus, *Strom*, ii, 2.8) held that faith can be neither increased nor diminished.

Ḍidd is used also as a translation of the Greek prefix ἀντί. So ἀντίδοτον is translated by *ḍidd al-samm* or simply by *al-ḍidd*.

Bibliography: See, *e.g.*, Ibn Rushd, *Talkhīṣ Kitāb al-Maʿḳūlāt* (ed. Bouyges), Beirut 1932, 92; Ibn Sīnā, *al-Maʿḳūlāt*, ed. Cairo 1958, 241. See also AḌDĀD. (S. van den Bergh)

DIDJLA, the Arabic name (used always without the article *al-*) of the easterly of the "Two Rivers" of ʿIrāḳ, the Tigris. The name is a modernized and Arabicized form of the Diglat of the Cuneiform, and occurs as Ḥiddeḳel in the Book of Genesis.

The river (Dicle Nehri in modern Turkish) rises in the southern slopes of the main Taurus, south and south-east of Lake Golcük. Its upper course, with its many constituent tributaries, drains a wide area of foothills and plain, which formed the northern half of the ʿAbbāsid province of Djazīra) in which stood the important towns of Āmid (modern Diyarbakır), Mayyāfāriḳīn, and many others. Among the early tributaries the Arab geographers (Ibn Sarābiyūn, Muḳaddasī, Yāḳūt) name the Nahr al-Kilāb (alternatively Nahr al-Dhiʾb), the Wādī Ṣalb, Wādī Sātīdamā and Wādī al-Sarbaṭ. Identifications of these are not certain with the modern tributaries which are notably (in their Turkish forms) the Zulkarneyn Suyu, the Ambar-Çay, the Pamuk Çayı, the Batman Suyu and the Garzan Suyu. At the point where the river bends from eastward to southward, at the modern Til or Till (medieval Tall Fāfān) the Bohtan Çayı enters from the east, and at least doubles the discharge of the Didjla: this, the Wādī al-Zarm of the Arab geographers, drains the high mountains south of Lake Vān including the areas of Bidlīs (modern Bitlis), and Sīʾird (modern Siirt). Above this junction, 50 miles to the west, lay the important town of Ḥiṣn Kayfā, modern Ḥasankayf.

Between the entry of the Bohtan Çayı and that of the Greater Zāb, Arab geographers mention as tributaries the Nahr Baznā, the Nahr Bāʾaynāthā (or Bāsānfā, or Saffān) the Būyār and the Wādī Dūsha. The identification of these with each of the present-day hill streams is uncertain. The Khābūr al-Ḥasaniyya (modern Khābūr) with its tributary the Iṭayzil Su, forms today the Turkish-ʿIrāḳī boundary. The town of Ḥasaniyya (probably the modern Zakho) contained a famous bridge. No main tributary except the Abu Maryā (modern Wādī al-Murr, joining the Didjla at Eski Mosul, the former Balad), and many small left-bank flood-channels, comes in south of the Khānbūr till the Greater Zāb is reached, 30 miles below the great city of Mosul (al-Mawṣil), itself a Sāsānid city which grew to greatness under the Umayyads.

The Greater Zāb (al-Zāb al-Aʿẓam) which rises partly in the Ḥakārī mountains and partly in those which form the Perso-ʿIrāḳī frontier, contribute a highly important volume to the Didjla. The same is true of the Lesser Zāb, which joins the river some 60 miles to the south, having drained a wide sector of the Perso-ʿIrāḳī frontier region. The point of junction of the Greater Zāb was in the middle ages marked by the town of Ḥadītha, that of the Lesser Zāb by Sinn; neither of these survives. There are no intermediate tributaries, but it is possible that a stream or streams, rising in Djabal Sindjār, may in some periods have found an outlet for their flood water into the Didjla near Ḳalʿa Sharḳaṭ.

Below the point where the river cuts through Djabal Ḥamrīn (at al-Fatḥa) it appears that, at or above Takrīt, the Wādī Tharthār (which may in some flood seasons have drawn water from the (western) Khābūr drainage-area, which belongs more naturally to the Euphrates) poured its waters into the Tigris passing by al-Ḥaḍr: Yāḳūt speaks even of a formerly navigable Euphrates-Tigris channel in this area. Lands in the Didjla drainage area above Takrīt have at all periods been rain-irrigated, and have therefore risked drought but not floods; skin-bucket water-lift devices (the modern *karad*) assured crops along the river-banks. The great mediaeval (and in part much more ancient) canal-system of ʿIrāḳ began below Takrīt. The Nahr al-Isḥāḳī, doubtless a partially-controlled spring-flood channel, took off from the right bank and after the expenditure of its waters in irrigation

poured the remainder into the river below Sāmarrā. South of the latter the Dudjayl took off also from the right bank, and (it is said) was sometimes augmented from the tails of Euphrates canals; it returned to the river at varying points south of ʿUkbarā. The course of the main river between a point south of Sāmarrā and one not far north of Baghdād (that is, for some 70 miles) lay in ʿAbbāsid times some five to twelve miles west of its modern channel, with the towns of Ḳādisiyya, al-ʿAlth, ʿUkbarā and Rashīdiyya on its banks. Many flood-season irrigation canals led off from this stretch of the river which later, when partially or wholly abandoned (perhaps by the 7th/13th century), was known as the Shuṭayṭ or Little River.

On the left bank the great Ḳāṭūl-Tāmarrā-Nahrawān waterway, probably initiated in Sāsānid times and improved under the early ʿAbbāsids, took off from the main river near Dūr (15 miles above Sāmarrā), and ran, at a maximum distance of 30 miles from it and nearly parallel, to re-join the Didjla near (modern) Kūt al-Amāra (medieval Mādharāyā) having received into its left bank, and somehow disposed of, the very important waters of the ʿUẓaym and the Diyālā which—especially the latter—are today major tributaries of the Didjla. (See NAHRAWĀN and DIYĀLĀ). Important canals taking off from the right bank of the Nahrawān system included the Khāliṣ (which still exists under that name, but with different alignment) and the Bīn; the waters of these made possible a closely-cultivated area north of Baghdād, and in part supplied the city itself.

Bringing Euphrates water, thanks to its proximity in this area (minimum, 20 miles) and to the slight eastward dip of central ʿIrāḳ, a number of large canals took off from that river and poured the unutilized portion of their waters into the Didjla at various points between Baghdād city and Mādharāyā. These were the Nahr al-ʿĪsā (approximately but not identically the modern Ṣaḳlāwiyya), the Ṣarṣār and the Malik (corresponding to the modern Abū Ghurayb and Raḍwāniyya), the Kūthā and the Nīl, the last of which took off just above Ḥilla (and the ruins of Babylon) and joined the Didjla not far above (modern) Kūt. Alike on these canals, on the main river channel, and on the parallel Nahrawān system, a relatively dense population lived in mediaeval times, cultivating by flow-water and lift.

Mādharāyā marked the spot from which, downstream, the greatest difference between the mediaeval and modern courses of the river was manifest. In ʿAbbāsid times the present course, by way of modern ʿAlī al-Gharbī, Ḳalʿa Ṣāliḥ and ʿAmāra was unimportant or (unless in high flood) non-existent; the main river ran down or near the channel of the (present) river Ḥayy or Gharrāf, past the great mediaeval but now vanished city of Wāsiṭ, and the sites of the modern towns of Ḥayy, Ḳalʿa Sikr, and Shaṭra. The change to the modern course of the Didjla (which had also probably prevailed in pre-Islamic antiquity), permitting to the Gharrāf a far smaller but considerable discharge, took place gradually from late ʿAbbāsid times onwards and was (on the evidence of European travellers) nearly complete by the 10th/16th century. Under the ʿAbbāsids the Didjla, like the Euphrates, poured its waters, except in so far as used for irrigation higher up, into the swamps (al-Baṭāʾiḥ) about 60 miles below Wāsiṭ, a vast area of water which, corresponding to but much larger than the Ḥammār Lake of today, took the full flood-discharge of both the great ʿIrāḳī rivers, and was in its turn drained into the Persian Gulf by the single water-way called in the Middle Ages Didjla al-ʿAwraʾ (one-eyed Didjla), and in modern times the Shaṭṭ al-ʿArab. Ḳurna stood on the Shaṭṭ al-ʿAwraʾ a little below its point of emergence from al-Baṭāʾiḥ, and below it villages and towns were continuous. Dry land, created by the deposited silt of the Two Rivers and of the Kārūn, had in early ʿAbbāsid times pushed out as far as (modern) Ābādān, and later ruined this seaport by advancing further. Many irrigation canals (including those serving Baṣra, the Maʿḳil and Ubulla canals) took off from the Didjla al-ʿAwraʾ in the area today covered by extensive date gardens and numerous villages. Seagoing ships of the Caliphs could ascend the Didjla through the swamp to well above Wāsiṭ.

Although, as mentioned above, the Didjla has changed its course in more than one area since the Middle Ages, and although an idea of the canal system derived from it can be gained from the contemporary geographers and from remaining traces, it is evident that this system was under constant modification between the 2nd/8th and the 7th/13th centuries, until it was substantially destroyed by the Mongols in the middle of the latter. The alignment and degree of water control, and the discharge of the canals, varied from century to century; most were seasonal flood-channels without head-works, and the solution if any found for disposal of the devastating annual floods does not satisfactorily appear. Nevertheless, irrigation from the Didjla—and rain cultivation in the north—undoubtedly supported a population perhaps three times more numerous than that of today, in a host of cities and villages now forgotten. During the centuries following the ruin caused by Hūlāgū (656/1258) conditions fell to a low point of disorganization, misery and stagnation, during which the régime of the river deteriorated and all control was lost. No serious study of its problems was made thereafter until the 14th/20th century.

The efforts of the modern ʿIrāḳ Governments have been concentrated on such irrigation works as will stabilize the course of the river, prevent the extremely serious annual flooding of the country side—and almost of Baghdād itself—and regulate and conserve the water for summer irrigation upon which, in central and southern ʿIrāḳ, all cultivation other than precarious spring crops must depend. Many control works have been built, notably in 1357/1938 the Kūt Barrage which regulates the supply into the Ḥayy (Gharrāf) river; many more, and major flood-disposal arrangements—for instance, on the Greater Zāb, and by utilizing the Wādī Tharthār—are in hand or planned. But the immense difference between the high water and the low water discharge of the river, varying between some 6000 to 300 cubic metres a second at Baghdād, due to seasonal melting of snow in the north and to winter and spring rains, and the inadequacy of the river bed to take the flood water, combine to render the Didjla peculiarly difficult to control or utilize. The important extension of irrigation by mechanical pump from the Didjla has been a striking feature of the period since 1346/1927.

The river contains large quantities of indifferent or low-quality fish.

In modern as in ancient and mediaeval times, all the traditional types of river-craft—skin-borne rafts floating downstream from Mosul or the Zābs, bitumen-covered coracles, sailing-craft and paddled

skiffs of every size have been and are in use. They have been supplemented regularly between Baṣra and Baghdād (and rarely and precariously between Baghdād and Mosul) by river steamers since 1256/1840, and by motor-launches and tugs. In addition to public passenger and goods services, the work of river-steamship fleets has made an important contribution in both World Wars; the navigational difficulties are, nevertheless, formidable. The railway, of which a first German-made section (Baghdād-Sāmarrā) was opened in 1332/1914, now runs from Baghdād to Mosul along the right bank of the river, and north of Mosul branching westward joins the Turkish system. Main roads, successors to immemorial tracks, follow the course of the river in many areas. The river passes through the administrative provinces, in Turkey, of Diyārbakır, Siirt and Mardin, and in ʿIrāḳ those of Mosul, Irbīl, Baghdād, Kūt al-Amāra, ʿAmāra and Baṣra.

(R. Hartmann-[S. H. Longrigg])

DIDO, a people comprising five small Ibero-Caucasian Muslim nationalities, whose total number reaches, according to a 1955 estimate, some 18,000. Ethnically close to the Andi [*q.v.*] and the Avar [*q.v.*], they inhabit the most elevated and inaccessible regions of Central Dāghistān, near to the Georgian frontier.

It is necessary to distinguish:

1. The Dido proper (Tsez Tsunta), numbering about 7,200, distributed in 36 *awls* along the upper reaches of the Ori-Tskalis.

2. The Bežeta (Kapuči, Kapčui, Beshite, Khwanal), the most developed of the Dido peoples (2,500 in the 1926 census, 2,580 in 1933), who inhabit the three *awls* of Bežeta, Khodjar-Khota, and Tladal, in the district of Tlarata.

3. Khwarshi (Kwan), 1561 in 1920, 1614 in 1933, living in five *awls* on the upper reaches of the Ori-Tskalis shortly before it flows into the Koysu of Andi.

4. The Khunzal (Gunzal, Nakhad, Enzeli, Enseba, Gunzeb), 799 in 1920, 616 in 1933, in the four *awls* of Tlarata district on the upper reaches of the Avar Koysu.

5. The Ginukh, numbering a few hundreds.

The Dido peoples were converted to Islam by the Avars, and like them are Sunnīs of the Shāfiʿī rite. Each Dido race has its own language, not committed to writing, belonging to the Avar-Ando-Dido group of the Dāghistān branch of the Ibero-Caucasian languages, but the Dido are in general bilingual, and Avar serves as their cultural language.

The geographical position of the Dido peoples has protected them from external influences, and because of this they have retained patriarchal customs and Muslim traditions more than have the Andi. The Avar influence is less noticeable among them, except for the Bežeta, than among the Andi; and their integration within the Avar nation is less advanced. Russian linguistic influence is barely noticeable.

The economy of the Dido remains traditional; they subsist by fodder-production (maize, potatoes), by sheep-raising over changing pasture-lands, and by terraced horticulture. They are well-known for their craftsmanship: goldsmiths' work among the Dido and the Bežeta, and leatherwork among the Khunzal.

(Ch. Quelquejay)

DIENNÉ, a town in the Sudan Republic, 360 km. SW of Timbuctoo and 200 km. ENE of Segou. Geographical position: lat. 13° 55′ N.—long. 4° 33′ W. (Gr.). Altitude: 278 m.

The etymology of this name (often wrongly spelt Djenné) is unknown but the most likely is Dianna = the little Dia (Dia is an ancient Sudanese town, 70 km. to the NW.). Dienné was mentioned for the first time in 1447 by the Genoese Malfante, under the name Geni.

The town is situated in the flood-area of the Niger and the Bani, 5 km. from the left bank of the latter river, to which it is connected by a navigable channel. It is built on a hill of sandy clay not subject to flooding, though surrounded by water particularly during the flood season, which normally lasts from August to February; and it is then that movement in the district is easiest, owing to the network of navigable channels between the Bani and the Niger, the most important and most freely used being the Kouakourou channel. In the dry season the town is linked up with surrounding districts by tracks which can be used by motor vehicles.

In area, Dienné extends for 900 m. from east to west, and 600 m. from north to south. Until the end of the 19th century it was surrounded by a brick wall; this was destroyed by the French who also cleared and laid out a large square in the town.

The population which has remained the same since 1900 is about 6,300; of these, 3,000 are Diennenké, 1,600 Fulani and 1,600 Bozo. Several languages are spoken, Songhai, Bozo and Fula among others.

The date on which the town was founded is not known. The *Taʾrīkh al-Sūdān*, trans. Houdas, 23, mentions a first settlement at Zoboro, the foundation of the town in about 150/767 and the conversion to Islam in about 500/1106. It seems more likely that the actual date of founding was later: M. Delafosse puts it at about 648/1250 and attributes it to Soninke merchants, the Nono; according to him, the inhabitants' conversion to Islam followed in about 700/1300. Legend has it that a Bozo virgin, Tapama, was immured alive in the walls at the instigation of magicians, in order to ensure the future prosperity of the town.

When chief Konboro was converted he pulled down his palace and, on the foundations, built the great mosque which remained standing until about 1830 when it was destroyed by Shaykhu Aḥmadu.

Konboro's descendants remained in power until the Songhai conquest.

In spite of the well-known passage in *Ta'rīkh al-Sūdān* (26) stating that from the time the town was founded the inhabitants of Dienné were never conquered by any king until the day when Sonni Ali imposed his authority over them, there is a strong possibility that, after 735/1335, the city belonged to Mali. It must have regained its liberty fairly soon, before being captured by Sonni Ali (872/1467).

The Songhai domination was very favourable to Dienné and it seems that it was from this time onwards in particular that it became a commercial centre of the highest importance in the Sudan. In direct communication with Timbuctoo by river, it was also situated at the head of the overland routes leading to the gold mines of Bitou (Bonduku region, Ivory Coast), Lobi and Bouré. It was the great entrepot for salt from Teghaza on its way via Timbuctoo to the countries in the south.

The first account to speak of the town is the *Descripçam* ..... by Valentim Fernandes (1506): "Gyni is a large town built of rock and limestone, surrounded by a wall. To it come the merchants visiting the gold mines. These dealers belong to one particular race, the *Ungaros* (*Wangara*), who are red or brownish ..... When these Ungaros come to Gyni, each merchant brings with him 100 or 200 or more negro slaves to carry salt on their heads from Gyni to the gold mines, and to bring back gold. Merchants who trade with the gold mines deal in considerable sums. Some of them undertake a deal which may amount to 60,000 *mithkāl*; even those who are content merely to take salt to Gyni make 10,000 *mithkāl* ..... The Ungaros only come to Gyni once a year".

Leo Africanus (1525) repeats the theme of the town's prosperity, describing it under the name Ghinea (ii, 465-485).

This prosperity was maintained throughout the 16th century, and even to the beginning of the Moroccan domination. In fact Dienné followed the fate of her sister town, Timbuctoo, which from 1000/1591 was occupied by the Moroccans of Djūdhar. The *ḳā'ids* of Timbuctoo had no difficulty in compelling Dienné to recognize their overlordship. In Dienné the Moroccan authority was represented by a pasha, a *ḥākim* assisted by an *amīn* or treasurer and a *ḳā'id* in command of the troops.

In the middle of the 17th century the *Ta'rīkh al-Sūdān* once again described (22 ff.) a town at the height of prosperity: "This town is large, flourishing and prosperous; it is rich, and enjoys Heaven's blessing and favour .... Dienné is one of the great markets of the Muslim world. It is the meeting-place for merchants with salt from the mines of Teghaza and others bringing gold from the Bitu mines. Almighty God has drawn to this blessed town a certain number of scholars and men of piety, strangers in this country who have come here to live".

The town's two-fold reputation for commerce and religion continued even after the decline of Timbuctoo in the 17th and 18th centuries; protected by its marshes, Dienné was able to hold its own in spite of the attacks of the Bambara [*q.v.*] who for a time even succeeded in making themselves masters of the Dienneri but were unable to take the capital.

After 1818, Shaykhu Aḥmadu founded the Fulani empire of Massina and took Dienné after a well-conducted siege. He drove out part of the population and built a new mosque (on the site now occupied by the school) in place of the old one which he allowed to fall into ruin. He left the administration of the city to the people of Dienné, but he was represented by an *Amīru mangal*, military commander. It was at this time (1828) that René Caillié visited the town. The Fulani rule lasted until 1861-1862 when al-Ḥādjdj ʿUmar conquered Dienné. In 1893, Colonel Archinard took possession in the name of France. By bringing peace to the Sudan, French rule paradoxically enough led to the decline of Dienné, for what had previously been the source of its strength, its isolated position surrounded by flood-waters, in the 20th century became a source of weakness. The town's commercial functions were taken over by Mopti which is situated at the confluence of the Bani and the Niger, and is connected by a dyke with dry land. Dienné is no more than a second-rate local market and centre of the administrative sub-division.

The town has kept its beautiful old houses, built in the style which was peculiar to itself, now widespread and known as the "Sudanese style"; the old mosque, built before the 19th century, has been rebuilt in the old style on the same foundations.

DIFRĪGĪ [see DIWRĪGĪ].

DIGLAL, the title of the hereditary ruler of the Banī ʿĀmir tribal group in the Agordat district of western Eritrea and in the eastern Sudan; he is also senior member of the aristocratic Nabtab class or caste, who, for historical reasons no longer possible to elucidate, form the superior stratum in every Banī ʿĀmir section. The title is believed of Fundj origin, and may recall days when the tribe was, in the 10th/16th and 11th/17th centuries, intermittently tribute-paying to the Nilotic but Muslim Fundj dynasty of Sennar. The insignia of the Diglal's position include notably a red velvet three-cornered hat of unique design.

The Diglal, whose relations with Ethiopian, Italian and British rulers of Eritrea have varied in the manner usual with feudal or tribal potentates, has at his best exercised good control over the lawless, scattered and wholly nomadic Banī ʿĀmir, themselves numerous (some 60,000 in Eritrea in 1936-44, and 30,000 in the Sudan), varied in origin (containing an original Hamitic base with large admixtures of Sudani, Ethiopian and Nilotic stocks), and speaking the Beja or Tigré languages according to subtribe or section. Indeed, the Diglal's traditional position, unchallenged for four centuries, has been a main unifying force in a group otherwise highly heterogeneous.

He lives normally in a main settlement of the Dagga (Dega, Dāga), a term which, by origin the "camp" of himself and his immediate circle, now signifies that section of the Banī ʿĀmir (numerically the largest) which contains the Diglal's family,

retainers and slaves, and the descendents and numerous accretions of these.

DIGURATA [see OSSETES].

DIHISTĀN, name of two towns, and their respective districts in north-eastern Īrān:

1) A town north-east of Harāt, the capital of the southern part of the Bādg͟hīs [*q.v.*] region, and the second largest town in that region ("half the size of Būs͟hand͟j"), and according to Yāḳūt (i, 461), the capital of the whole of Bādg͟hīs around the year 596/1200. The town was situated upon a hill in a fertile area, and near a silver mine; it was built of brick. In 98/716-7, Dihistān is mentioned as the seat of a Persian *dihḳān* (Ṭabarī, ii, 1320); ca. 426/1035, it came into the possession of a Turkish *dihḳān* (these titles persisted amongst the Turks) by the agency of the Sald͟jūḳs (to whom the G͟haznawids had left it). In 552/1158, it was the residence of the Og͟huz prince Ik͟htiyār al-Dīn Aytaḳ, who, as the only ruler of this district, became subject to K͟hʷārizms͟hāh Il Arslan (Bayhaḳī, *Taʾrīk͟h-i Bayhaḳ*). The K͟hʷārizms͟hāh Sulṭān S͟hāh was robbed of his succession by his brother Tekes͟h, and fled with his mother Terken (Islamicized: Turkān) to Dihistān in 569/1174. Following this, Tekes͟h occupied the town of Dihistān, and had Terken executed; Sulṭān S͟hāh succeeded in escaping further to the G͟hūrids (Ibn al-At͟hīr, xi, 247/53). The town does not appear to have played an important part later on. It is probably to be equated with the modern shrine K͟hʷād͟ja Dihistān.

Bibliography: Iṣṭak͟hrī, 268 f.; Ibn Ḥawḳal 319 f.; Muḳaddasī, 50, 298, 308; Ḥamd Allāh Mustawfī, *Nuzha*, 153, trans. (1919), 151; Le Strange, 414 f.; J. Marquart, *Ērānšahr* ..... (1901), 150; J. Markwart (= idem), *Wehrot und Arang* (1938), 40; W. Barthold, *Turkestan*, 308, 335, 338; Spuler, *Iran*, 311.

2) A region rich in agriculture, to the north of the lower Atrek [*q.v.*], which waters its southern section. Its capital is Ak͟hur (4 days' journey to the north of D͟jurd͟jān), which, according to Muḳaddasī (358 f.), also bore the name of Dihistān, and was on the route from D͟jurd͟jān to K͟hʷārizm. There was also a frontier fortification (Ribāṭ) by the name of Dihistān, with beautiful mosques and an active market (Muḳaddasī, 358, compare also *ibid.*, 312, 367, 372; and see below). W. Barthold regards this fortress as the capital of the whole region in the 12th century, and bases this view on Yāḳūt (i, 39). Islamic data concerning the area are not consistent and lack clarity: according to Ibn Ḥawḳal (i, 277, 286; ii, 388, 398), the region was sparsely populated, and only by fishermen from the Caspian Sea. Muḳaddasī, on the other hand, reckons the 24 villages of this area amongst the most densely populated of the region of D͟jurd͟jān.

According to the Middle Persian list of towns, Dihistān was founded by the Arsacid Narsahē (J. Marquart, *Ērānšahr* [1901], 54, 73, 310); in Islamic times, the Sāsānid Ḳubād͟h b. Fīrūz (Pērōz) is mentioned (Ḥamd Allāh Mustawfī, *Nuzha*, [1915], 160; trans. [1919], 157; comp. also index). In the 4th/10th century, the area was a border region [against the 'heathen' Turks], and even Ḥamd Allāh, 212 (trans. 205) mentions it as such in the 14th century. At this time it can only have referred to a few nomad tribes between K͟hʷārizm and the Üst Yurt, as by then, Islamization—even of the Mongols of Transoxania—was complete.

The *Ḥudūd al-ʿālam*, ed. V. Minorsky (1937), 60, mentions the peninsula *Dihistānān Sūr* (?), inhabited by fishermen and birdhunters, which W. Barthold takes to be the modern Cape Ḥasan Ḳulī (to the north of the mouth of the Atrek). This is hardly possible, if Iṣṭak͟hrī's data (219) are correct: he states that there are 50 parasangs between the mouth of the river D͟jurd͟jān and this peninsula, and this would get on to the region of the Bay of Ḳzīl Suw (Russian: Krasnovodsk).

V. Minorsky, *Ḥudūd*, 386, connects the name of Dihistān with the name of the ancient *Daher* (Δάαι) (concerning these, compare W. Tomaschek in Pauly-Wissowa, *Realencyklopädie*, iv, 12 [1901], col. 1945/6). Today, the ruins of Ribāṭ Dihistān (as can be gathered from an inscription in a mosque of the beginning of the 13th century) are known as Mas͟hhad-i Miṣriyyān [*q.v.*].

Bibliography: In addition to references in the text: *Taʾrīk͟h-i Bayhaḳī*, Tehran 1946, index [but note that the vocalization Dahistān demanded on 135[5]—in view of the derivation from Δάαι—contradicts Yāḳūt and the other Islamic sources]; Samʿānī, *K. al-ansāb*, 1922 (GMS xx), fol. 234 v (gives the correct vocalization); Nikbī (in Nars͟hak͟hī, ed. Ch. Schefer), 144; Gg. Hoffmann, *Syr. Akten pers. Märtyrer* (1880), 277-81; W. DIHḲAN, arabicized form of *dehkān*, the head of a village and a member of the lesser feudal nobility of Sāsānian Persia. The power of the *dihḳān*s derived from their hereditary title to the local administration. They were an immensely important class, although the actual area of land they cultivated as the hereditary possession of their family was often small. They were the representatives of the government vis-à-vis the peasants and their principal function was to collect taxes; and, in the opinion of Christensen, it was due to their knowledge of the country and people that sufficient revenue was provided for the upkeep of a luxurious court and the cost of expensive wars (*L'Iran sous les Sasanides*[2], Copenhagen 1944, 112-3). Masʿūdī divides the *dihḳān*s into five classes, distinguished from one another by their dress (*Murūd͟j*, ii, 241). Persian legend imputes their origin to Vēghard, brother of the legendary king Hūs͟hang (Christensen, *Le premier homme et le premier roi dans l'histoire légendaire des iraniens*, i, 144, 150, 151, 153, 155, 159). After the Arab conquest the *dihḳān*s continued to be responsible for local administration and the collection of tribute from the protected communities; many of them were converted to Islam and largely retained their lands (von Kremer, *Culturgeschichte*, ii, 160). In Transoxania, where immediately before the Arab invasion the *dihḳān*s had enjoyed perhaps greater influence than in Persia in that their power was not limited by that of the monarchy and the Zoroastrian clergy, the local rulers as well as the landowners were designated by the term *dihḳān* (Barthold, *Turkestan*, 180-1; and see Nars͟hak͟hī, *Taʾrīk͟h-i Buk͟hārā*, ed. Mudarris Riḍavī, 7, 72). The power of the Ṭāhirids and Sāmānids was largely founded on their community of interest with the *dihḳān*s; but by the end of the Sāmānid period the *dihḳān*s had become discontented and were in part responsible

for the eventual overthrow of the Sāmānid dynasty by Bug͟hrā K͟hān Hārūn b. Mūsā, the Īlak K͟hān (Barthold, 257, 307). With the spread of the *iḳṭāʿ* system in the 5th/11th century and the depression of the landowning classes the position and influence of the *dihḳān*s diminished. With this the term *dihḳān* became debased and by the 5th/11th century it was also used to denote a peasant, in which sense it is used by Nāṣir-i K͟husraw (*Dīwān*, Tehrān 1304-7 A.H. solar, 557) and Kāʾūs b. Iskandar (*Ḳābūs nāma*, G.M.S., 138). On the other hand under the Sald͟jūḳs the *dihḳān*s appear to have continued to exist in the eastern part of the empire as village heads or landowners. The term would appear to have this sense in a document issued by the *dīwān* of Sand͟jar (*ʿAtabat al-kataba*, ed. ʿAbbās Iḳbāl, Tehrān 1950, 53, 55) and in a diploma for the *miʿmār* of K͟hʷārazm belonging to the latter half of the 6th century A.H. (Bahāʾ al-Dīn Muḥammad Muʿayyad Bag͟hdādī, *al-Tarassul ilā 'l-tarassul*, ed. Bahmanyār, Tehrān 1315 A.H. solar, 113, 114). Similarly Nad͟jm al-Dīn Rāzī uses the term *dihḳān* to mean landowner (*Mirṣād al-ʿibād*, Tehrān 1312 A.H. solar, 294 ff.). Naṣīr al-Dīn Ṭūsī (*Ak͟hlāḳ-i Nāṣirī*, Lahore, lith., 180-1) and D͟jalāl al-Dīn Dawānī (*Ak͟hlāḳ-i D͟jalālī*, lith., 278), however, seem to use *dihḳān* simply in the sense of peasant, which is its meaning in modern Persia also. In Turkistan farmers are called *dihḳān* (*RMM*, xiii, 1911, 568).

AL-DIHLAWĪ, NŪR AL-ḤAḲḲ [see NŪR AL-ḤAḲḲ AL-DIHLAWĪ].

AL-DIHLAWĪ, S͟HĀH WALĪ ALLĀH, the popular name of ḲUṬB AL-DĪN AḤMAD ABU'L-FAYYĀḌ, a revolutionary Indian thinker, theologian, pioneer Persian translator of the Ḳurʾān, and traditionist, the first child of the 60-year-old S͟hāh ʿAbd al-Raḥīm al-ʿUmarī of Dihlī, by his second wife, was born in 1114/1703 at Dihlī, four years before the death of Awrangzīb. A precocious child, he memorized the Ḳurʾān at the early age of seven and completed his studies with his father, both in the traditional and rational sciences, at the age of fifteen. On the death of his father in 1131/1719 he succeeded him as the principal of the religious college, *Madrasa Raḥīmiyya*, which S͟hāh ʿAbd al-Raḥīm had founded, at Dihlī. This institution, in later years, produced a galaxy of brilliant scholars and was the fore-runner of the famous *Dār al-ʿUlūm* at Deōband [*q.v.*]. In 1143/1730 Walī Allāh went on a pilgrimage to Mecca and Medina and stayed in al-Ḥid͟jāz for 14 months before returning to India in 1145/1732. He took advantage of his stay in Medina to learn *ḥadīt͟h* from eminent scholars like Abū Ṭāhir al-Madanī, ʿAbd Allāh b. Sālim al-Baṣarī, and Tād͟j al-Dīn al-Ḳalʿī, all of whom he held in high esteem (*Anfās al-ʿārifīn*, 191-3, 197-200). After his return from al-Ḥid͟jāz he devoted himself to writing along with his old profession of teaching. He died in 1176/1762, the author of more than forty works (*Nuzhat al-k͟hawāṭir*, vi, 407 f.). He lies buried in the family graveyard beside his father and his equally illustrious son, S͟hāh ʿAbd al-ʿAzīz al-Dihlawī, in the Mēnhdīyān cemetery of Old Dihlī, behind the modern Central Jail.

Basically an altruist, S͟hāh Walī Allāh may be called the founder of Islamic modernism. He was much ahead of his times, a revolutionary thinker who attempted, although with little success, the reintegration of the socio-economic and the religio-ethical structure of Islam. His chief merit, however, lies in the propagation of the doctrine of *taṭbīḳ* (conciliation) which he skilfully applied even to such controversial problems as the *k͟hilāfa* and the conflict between dogmatic theology and mysticism.

The reform movement outlined by S͟hāh Walī Allāh, which found full expression in the religio-military campaigns of Sayyid Aḥmad Barēlawī [*q.v.*] and S͟hāh Ismāʿīl, the grandson of Walī Allāh, revolved round his concept of *maṣlaḥa, i.e.*, the establishment of a kind of welfare state based on the "relationship of man's development with the creative forces of the Universe". The time and the environment were both unsuited for the success of such a revolutionary movement. The inevitable result was that the movement, although launched with a great deal of fervour, soon lost impetus when faced with realities. On the other hand, the Wahhābī movement launched by his contemporary, Muḥammad b. ʿAbd al-Wahhāb, [*q.v.*] succeeded, as it sternly refused to accept the idea of compromise, which constitutes the kernel of Shāh Walī Allāh's thought; he even attempted to reconcile such antithetic theories as the *waḥdat al wud͟jūd* [see IBN AL-ʿARABĪ] and *waḥdat al-s͟huhūd* [see AḤMAD SIRHINDĪ].

His mission failed because both he and his successors failed correctly to assess the impact of contemporary forces and the increasing conflict of the East and West consequent on the growth of European influence in India, especially those parts of the country where Muslims dominated.

His chief works are: (a) Arabic, (i) *Ḥud͟jd͟jat Allāh al-bālig͟ha*, his *magnum opus*, a unique work on the secrets of religion (*asrār al-dīn*), also dealing with various other subjects such as metaphysics, politics, finance and political economy. It was in this book (ed. Bareilly 1285/1868; Cairo 1322-3/1904-5), now prescribed as a course of study at al-Azhar and in the Sudan, that he propounded his revolutionary theory of "*fakk kull niẓām*" (down with all systems!). The book has also been translated into Urdū (Lahore 1953, Karachi n.d.); (ii) *al-Musawwā*, a commentary on the *Muwaṭṭāʾ* of Mālik b. Anas; (iii) *al-Fatḥ al-k͟habīr* ...... the fifth and the last chapter of his Persian work *al-Fawz al-kabīr fī uṣūl al-tafsīr*, but with the above independent title (Lucknow 1289/1872); it is a pithy but highly useful dissertation on the principles of the science of Ḳurʾānic exegesis; (iv) and (v) *al-Budūr al-bāzig͟ha* and *al-K͟hayr al-kat͟hīr*, both on the *ʿilm al-asrār*, a branch of *taṣawwuf* dealing with its truths and realities (Dābhēl n.d.); (vi) *al-Inṣāf fī bayān sabab al-ik͟htilāf*, a masterly survey of the causes of the juristic differences between the various sects of Islam and the evolution of Islamic jurisprudence; (b) Persian, (vii) *Tafhīmāt-i Ilāhiyya*, partly in Arabic, contains *inter alia* addresses to the various

groups in Muslim society, pinpointing their vices, failings and weaknesses; (viii) *ʿIḳd al-djīd fī bayān aḥkām al-idjtihād wa 'l-taḳlīd*, a scholarly survey of the two problems mentioned (Dihlī 1344/1925; partial Eng. transl. by M. Dāʾūd Rahbar in *MW*, xiv/4, 346-587) (ix) *Fatḥ al-Raḥmān bi tardjamat al-Ḳurʾān*, an annotated Persian translation of the Ḳurʾān, by far his greatest achievement, published several times in India and still in great demand; (x) *al-Muṣaffā*, a sister volume to the *al-Musawwā*, being a commentary on the *Muwaṭṭaʾ*; (xi) *Izālat al-khafāʾ ʿan khilāfat al-khulafāʾ*; basically a vindication of the *khilāfa* of the first two caliphs, Abū Bakr and ʿUmar al-Fārūḳ, but also comprising an exhaustive discussion of the doctrine of the *khilāfa*, political theory in Islam, the basic principles of economics (*tadbīr al-manzil*), the *idjtihād* as practised by ʿUmar b. al-Khaṭṭāb and the significance of his judgments etc.; practically the same discussion figures in (xii) *Ḳurrat al-ʿaynayn fī tafḍīl al-shaykhayn*; (xiii) *Alṭāf al-ḳuds*, (xiv) *Fuyūḍ al-ḥaramayn* (Ar.); (xv) *Hamʿāt* (Ar.) (Urdū translation: *Taṣawwuf kī ḥaḳīḳat awr uskā falsafa-i taʾrīkh*, Lahore 1946); (xvi) *Saṭʿāt* (Ar.) and (xvii) *Lamʿāt* (Ar.), all deal with the different aspects of *taṣawwuf* as viewed by Shāh Walī Allāh; (xviii) *Anfās al-ʿārifīn*, contains an account of his ancestors, the *mashāʾikh* with whom they contracted their *bayʿa*, and the teachers of the author. This work is very useful for a critical appreciation of Shāh Walī Allāh and the evolution of his religio-political thought.

Bibliography: Shāh Walī Allāh, *Anfās al-ʿārifīn* (comprising his autobiography called *al-Djuzʾ al-laṭīf fī tardjamat al-ʿabd al-ḍaʿīf*, (Eng. tr. by Hidāyat Ḥusayn in *JASB* 1912, 161-75), Dihlī 1335/1917; ʿAbd al-Ḥayy Nadawī, *Nuzhat al-khawāṭir*, Ḥaydarābād (Deccan) 1376/1957, vi, 398-415; Ṣiddīḳ Ḥasan, *Itḥāf al-nubalāʾ*, Cawnpore 1288/1871, 1448; idem, *Abdjad al-ʿulūm*, Bhopāl 1295/1878, 912 ff.; idem, *al-Ḥiṭṭa bi dhikr ṣiḥāḥ al-sitta*, Cawnpore 1283/1866; Brockelmann, II, 418 and index; Storey i, 20-2, 179; ii, 1020-1, 1137, 1201, 1253, 1263; Muḥsin b. (A. S. BAZMEE ANSARI)

DIHLĪ. 1. — History. The city of Dihlī, situated on the west bank of the river Djamnā [*q.v.*] and now spread out between 28° 30′ and 28° 44′ N. and 77° 5′ and 77° 15′ E., was the capital of the earliest Muslim rulers of India from 608/1211 (see DIHLĪ SULTANATE), and remained the capital of the northern dynasties (with occasional exceptions: Dawlatābād, Āgrā, and Lahore (Lāhawr), [*qq.v.*], were the centres favoured by some rulers) until the deposition of Bahādur Shāh in 1858; from 1911 it became the capital of British India, and after 1947 of Independent India.

The usual Romanized form of the name is Delhi, based on the commonest form in the earlier Muslim usage Dihlī; the common spellings in Urdū, Hindī (certainly from the time of the *Prithī Rādj Rāsō* of the 7th/13th century), and Pandjābī represent *Dillī*. The etymology is obscure; for some popular etymologies see A. Cunningham, *ASI*, i, 137 ff.

It has become popular to speak of "the seven cities of Delhi"; but the number of centres of government in the Dihlī area has in fact been nearer double that number. These are here described in approximate chronological order; all appear on the accompanying map, on which those which are no longer in existence are marked with an asterisk.

The earliest settlement was Indrapat, Sanskrit *Indraprastha*, a tell on which the present Purānā Ḳilʿa stands, supposed to have been built in legendary times by the Pāṇḍavas; the site is certainly old, and potsherds of Painted Grey ware and Northern Black Polished ware, types dating back to the 5th century B.C., as well as Kushan fragments of the 1st and 2nd centuries A.D., have been discovered there (see *Ancient India*, x-xi, 1955, 140, 144). The region of Dihlī seems to have been almost abandoned thereafter, for the next settlement dates from the 9th or 10th century, the Tomār city now known as Sūradj Kuṇḍ, where a large masonry tank and an earthwork are still in existence. More

extensive are the remains of the Čawhān Rādjpūt town, dating probably from the 10th century A.D., which existed immediately prior to the Muslim conquest. On a small hill in the south-west of this region a citadel, Lālkōt, was built *circa* 1052 A.D. by Ānang Pāl, and around the town an outer wall was thrown, as a defence against the Muslim invaders, by Prithwī Rādj in about 576/1180 (Cunningham, *ASI*, i, 183). Subsequent to the conquest a mosque, known as Masdjid Ḳuwwat al-Islām, was built in 588/1192 by Ḳuṭb al-Dīn Aybak, who later commenced the building of the adjoining *mīnār* not only as a *maʾdhana* but also as a commemoration of his victory; for these, their extensions by Shams al-Dīn Iletmish and ʿAlāʾ al-Dīn Khaldjī, and other buildings in this so-called "Qutb site" see Monuments, below. The systematic refortification and extension of these old Hindū walls was effected by the earliest governors and monarchs to form the first Muslim city of Dihlī, known by the name of its former occupant as Ḳilʿa Rāy Pithorā. An indication of the extent of these walls and of their periods is given in the sketch-map, Fig. 1; for a discussion of the archaeological evidence see J. D. Beglar, *ASI*, iv, 1874, 6 ff.

Ḳilʿa Rāy Pithorā remained the only regular residence of the Dihlī sultans until Muʿizz al-Dīn Kayḳubād built his palace at Kilōkhrī, then on the banks of the Djamnā (Briggs, *Ferishta*, i, 274), in about 688/1289; this was occupied, completed, and its suburbs extended, by Djalāl al-Dīn Fīrūz Khaldjī in and after 689/1290. It has now fallen completely into desuetude. Even in Djalāl al-Dīn's case the older city seems to have had a higher prestige value, and he moved his court there as soon as it was politically practicable so to do. The sultan ʿAlāʾ al-Dīn Khaldjī effected many improvements and repairs, including the west gate (Randjīt darwāza) of Lālkōt (Amīr Khusraw, trans. in Elliott and Dowson, iii, 561); he commenced also the extension of the citadel of Lālkōt, see Beglar, *loc. cit.*, and Fig. 1. As a protection against the invading Mongols he first established a camp on the plain of Sirī to the north, later encompassed it by entrenchments, and finally walled it, in about 703/1303. The location of Sirī has been questioned (*e.g.*, by C. J. Campbell, *Notes on the history and topography of the ancient cities of Delhi*, in *JASB*, xxxv, 1866, 206-14); but the descriptions of Ibn Baṭṭūṭa, iii, 146, 155, and Tīmūr, *Malfūẓāt-i Tīmūrī*, trans. in Elliott and Dowson, iii, 447, and the ruins and lines of defences on the ground, enabled Campbell's views to be

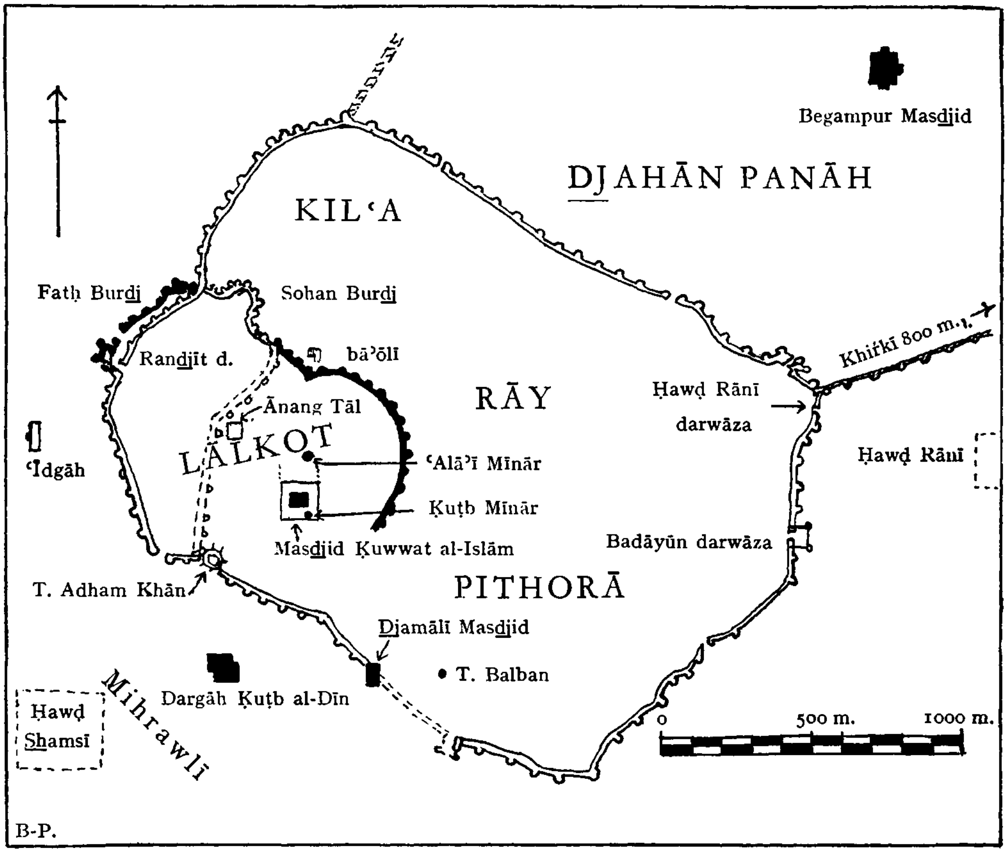

Fig. 1

Old Hindū walls — Extension of ʿAlāʾ al-Dīn, c. 700/1300

Walls removed by ʿAlāʾ al-Dīn — T = Tomb

convincingly refuted by Cunningham in *ASI*, i, 207 ff. All that now remains within the walls is the comparatively modern village of Shāhpur.

Hardly a "city of Delhi", but an important site in its history, is the group of buildings, the earliest of which date from Khaldjī times, surrounding the his defeat of the converted Hindū Nāṣir al-Dīn in 720/1320, for the building of his capital Tughluḳābād. The trace of the outer enceinte is approximately a half-hexagon, within which are a more strongly defended palace area, and an even stronger citadel; there are the ruins of a mosque in the city

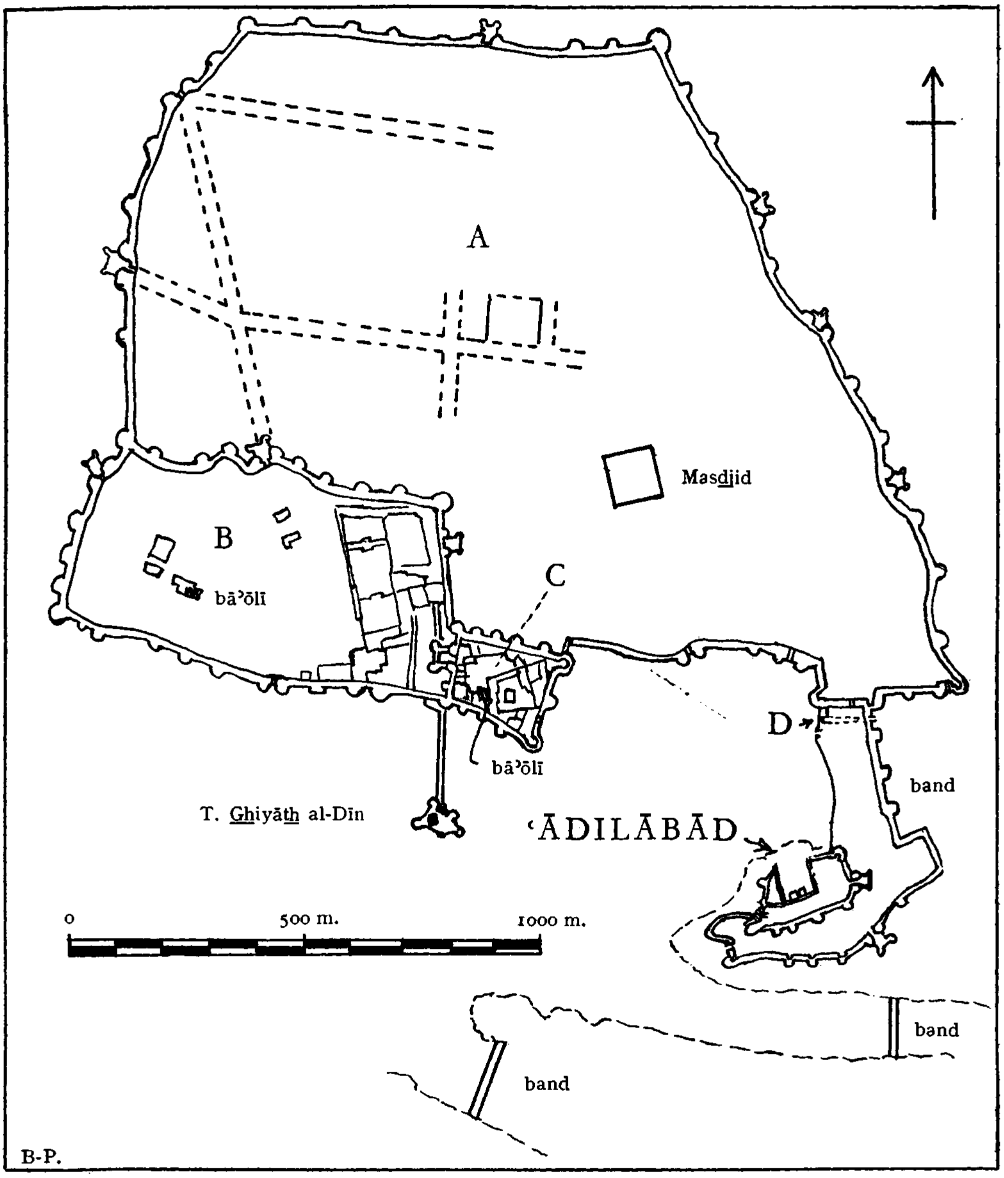

Fig. 2. Tughluḳābād

shrine of the Čishtī saint Niẓām al-Dīn Awliyā', which make up what Piggott has described as the "squalid but entertaining complex" now known officially as "Nizamuddin" (for plan, and description of these buildings, see Monuments, below).

Some of the most ambitious building projects in the time of the Dihlī sultanate were conceived during the rule of the following Tughluḳ dynasty. Firstly, Ghiyāth al-Dīn Tughluḳ selected a site some 8 km. to the east of Ḳilʿa Rāy Pithorā, immediately after area, and the layout of the streets and houses of the streets and houses of the city, which shows it to have been well populated, can be seen from the aerial photograph in *Ancient India*, i, Plate IX. On the south of the city was formerly an artificial lake, in which stands the tomb of Ghiyāth al-Dīn, connected to the citadel by a fortified passage supported on arches, itself fortified. Connected with Tughluḳābād by a causeway on the south-east, which formed a *band* to retain the waters of the lake, is the subsi-

diary fort of ʿĀdilābād built by his son Muḥammad b. Tughluḳ c. 725/1325, but abandoned by him, together with Tughluḳābād, in 729/1329 on his transfer of the capital to Dawlatābād [*q.v.*]. For these sites see Fig. 2, and the excellent article of Hilary Waddington, *ʿĀdilābād: a part of the "fourth" Delhi*, in *Ancient India*, i, 60-76, with photographs and survey plans. A small fort, known as the "Barber's" or "Washerman's" fort, to the east, machicolations, containing a palace complex, the remains of a fine mosque, and an extraordinary pyramidal structure built as a plinth for a column of Ashoka brought from near Ambālā; the isolated Ḳadam Sharīf and the nearby ʿĪdgāh show the western extent of the city to have been no further than the later Shāhdjahānābād. The extent of Fīrūz Shāh's building activity around Dihlī would indicate that the suburbs in his time were still well populated,

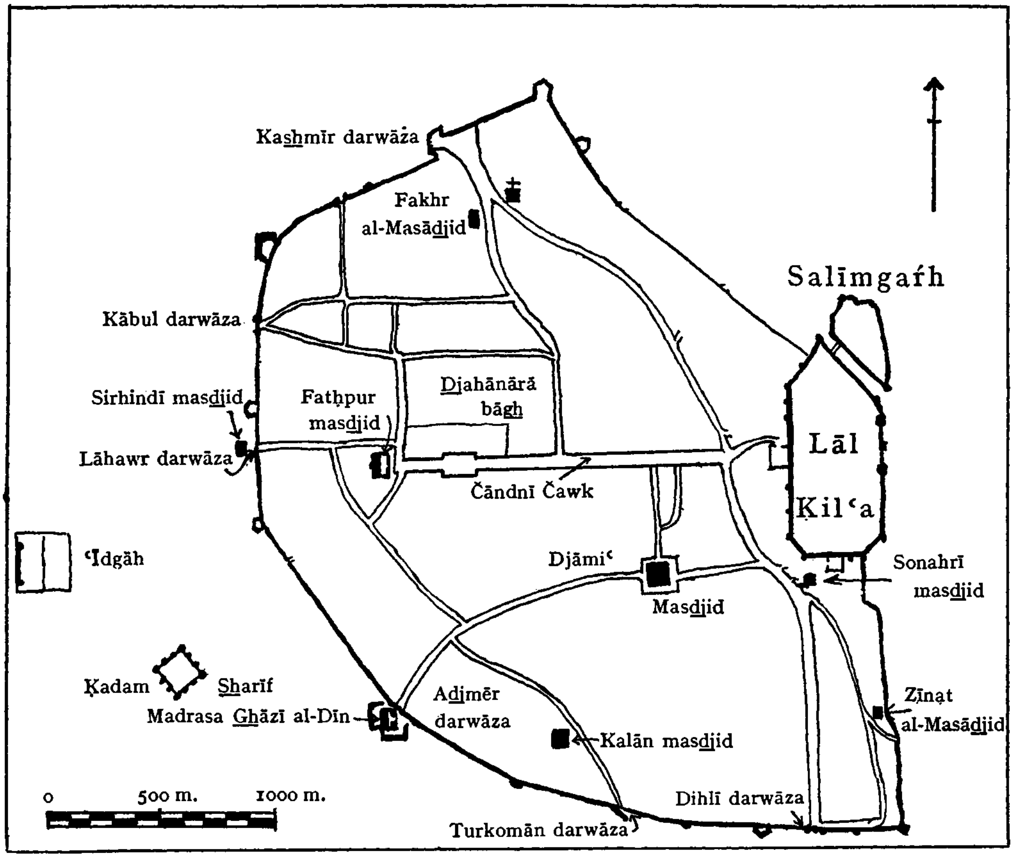

Fig. 3. Shāhdjahānābād

possibly a *madrasa* or a shrine in origin, was fortified and presumably used as a residence for Ghiyāth al-Dīn while Tughluḳābād was in building.

About contemporary with the building of ʿĀdilābād was Muḥammad b. Tughluḳ's more grandiose project, the walling-in of the suburbs which had grown up between Ḳilʿa Rāy Pithorā and Sirī (see Map) to form yet another city, called Djahānpanāh, the walls of which, some 12 m. thick, have almost completely fallen and the exact trace of which cannot easily be located; for the sluice built into this wall near the village of Khiṙkī, the Sāt Pulāh, see *Monuments*, below.

Muḥammad's successor Fīrūz Tughluḳ was responsible for the building of another city, Fīrūzābād, extending from Indrapat to Kushk-i Shikār some 3 km. north-west of the later city of Shāhdjahānābād, and now largely covered by that latter city. Its buildings were dilapidated by later builders, especially Shīr Shāh Sūrī and Shāhdjahān, and all that remains is the citadel, known as Fīrūz Shāh Kōṫlā, its walls reduced to below the level of their

as evidenced by the two large mosques in Djahānpanāh, another in Nizamuddin, and smaller ones in the northern suburbs and in Wazīrābād. A further occupied site was around the old reservoir built by ʿAlāʾ al-Dīn, the Ḥawḍ-i ʿAlāʾī, later known as Ḥawḍ-i Khāṣṣ, where he established a large *madrasa* and built his own tomb.

The Tīmūrid sack caused the eclipse of Dihlī as a capital city for some time, and although the Sayyid governor Khiḍr Khān established his court at Khiḍrābād, and Mubārak Shāh his at Mubārakābād, both on the Djamnā, and the latter sultan built also his own tomb in the fortified village Mubārakpur (also Mubārikpur, Mubārik [*sic*] Shāh Kōṫlā), the Sayyids and their successors the Lōdīs built no further cities at Dihlī. The Lōdīs, indeed, moved their seat of government to Āgrā, and Dihlī became little more than a vast necropolis, the plains between Sirī and Fīrūzābād being covered with tombs and mausolea of this period; especially Khayrpur, 2 km. west of Nizamuddin, a region 1 km. west of Mubārikpur ("Tīn Burdj", *i.e.*, "three

towers"), and a region on the road to Ḥawḍ-i Khāṣṣ (Kharērā); there was also some building in the region of the reservoir of Iletmish, Ḥawḍ-i Shamsī, south of the village of Mihrawlī.

After the Mughal invasions in the early 10th/16th century [see MUGHALS] Humāyūn settled at Dihlī and started the building of a citadel, Dīnpanāh, on the mound of the old Indrapat in 940/1533, but was dispossessed by the usurper Shīr Shāh Sūrī. Shīr Shāh took over and completed the building of Dīnpanāh, as the citadel of a new city, to which no particular name is given, little of which remains except the northern gate, near Fīrūz Shāh Kotlā, and the southern gate, opposite the citadel, as most of the stone was removed for the building of Shāhdjahānābād. His son and successor Islām Shāh, popularly called Salīm Shāh, built on the Djamnā the fortress Salīmgaṛh as a bulwark against the return of Humāyūn in about 957/1550. Humāyūn's return five years later added nothing to the Dihlī buildings, and the next two Mughal rulers preferred to reside at Āgrā and Lahore; some buildings at Dihlī date, however, from their time, especially the complex of monuments around Humāyūn's tomb (see S. A. A. Naqvi, *Humāyūn's tomb and adjacent buildings*, Dihlī 1947). Shāhdjahān also reigned at Āgra for 11 years, but the inconveniences there caused him to remove to Dihlī (*ʿAmal-i Ṣāliḥ*, fol. 575-6; Manucci, *Storia do Mogor*, i, 183) and found there on 12 Dhu 'l-Ḥidjdja 1048/16 April 1639 (so the contemporary historians and inscription in the Khwābgāh; 9 Muḥarram 1049/12 May 1639 according to the *Maʾā-thir al-Umarāʾ*, iii, 464, and Sayyid Aḥmad Khān) a new fort, the citadel of his new city (Fig. 3) Shāhdjahānābād, known as the "Red Fort", Lāl ḳilʿa, which was completed after 9 years. The walling of the city proceeded at the same time, and it was enriched with many more buildings in the reign of Shāhdjahān and his successors (notably the Djāmiʿ masdjid, commenced two years after the completion of the fort), who made no further expansions of any of the successive cities. Shāhdjahānābād continued to be the capital of the Mughal rulers—except for Awrangzīb, who spent much time in the Deccan and died at Awrangābād [*q.v.*]—although other sites around continued to be used; *e.g.*, the Humāyūn's tomb complex, Nizamuddin, and the *dargāh*s of Rōshan Čirāgh-i Dihlī in Djahānpanāh and of Ḳuṭb al-Dīn Kākī at Mihrawlī were all used as burial places for the later Mughal rulers, and at Mihrawlī is a small summer palace used by the latest Mughals.

With the fall of the Mughal dynasty in 1858, the destruction of many buildings by the British during and after the mutiny, and the transfer of the capital to Calcutta, Dihlī became a town of less importance, the head of a local administration and a garrison town. The British expansion was to the north of Shāhdjahānābād, where the Civil Lines were established; here the capital was transferred in 1911, and the building of the new city commenced, originally known as Raisena, later New Delhi, *Naʾī Dillī*. Later expansion has been westwards of Shāhdjahānābād in the Sabzī Mandī, Karōl Bāgh, and Ṣadr Bāzār quarters; south of Khayrpur and on the road to Mihrawlī; and around the Cantonment, north of the Gurgāʾōn road, and the new airport of Pālam.

Some confusions of nomenclature, omitted in the above description, must be mentioned. Lālkōt and Ḳilʿa Rāy Pithorā were known as "Old Dihlī" as long ago as Tīmūr's time, and this phrase was in regular use in the early British period; since the building of New Delhi the expression "Old Delhi" has often been falsely applied to Shāhdjahānābād. After the building of Shāhdjahān's new fort, Lāl ḳilʿa, the older fort of Humāyūn and Shīr Shāh was regularly known as the "Old Fort", Purānā Ḳilʿa or Ḳilʿa-i kuhnā.

2. — Monuments. As the buildings of Dihlī present the earliest monuments of a settled Islamic power in the sub-continent, and as it was there that the first characteristic Indian Islamic styles developed, the influence of which was to spread far and wide from Dihlī itself, the account of the monuments given here is confined to a simple description of the major works, arranged chronologically, and an account of the architectural features of the monumental complexes of buildings of different periods.

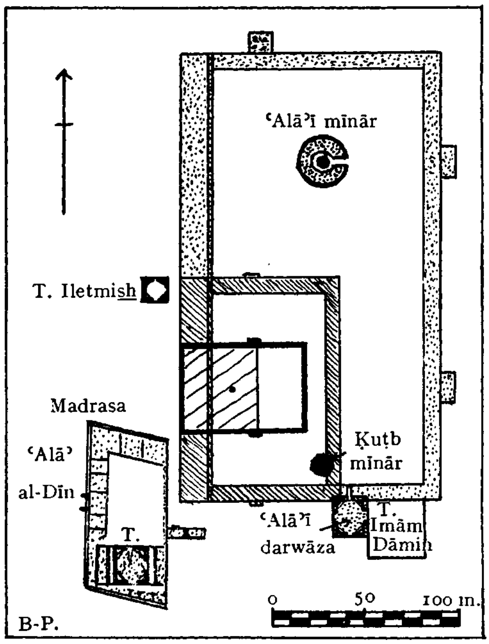

Fig. 4. Masdjid Ḳuwwat al-Islām

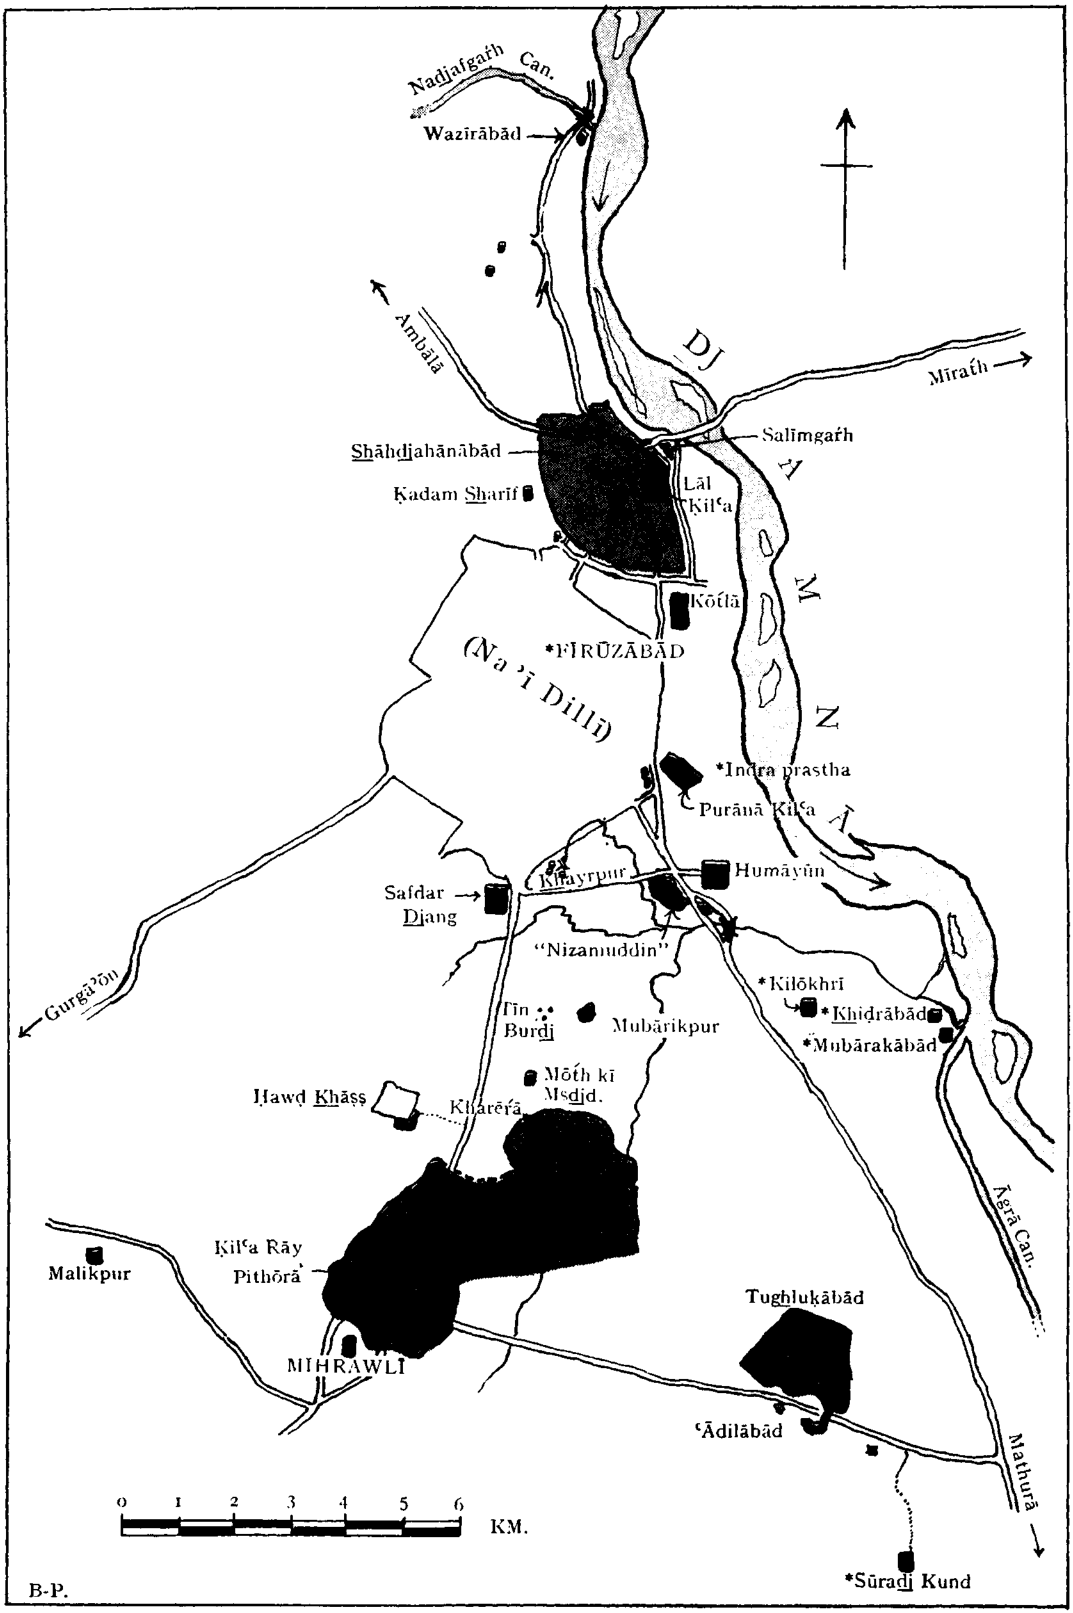
Plinth of Hindū temple — Iletmish

Ḳuṭb al-Dīn Aybak — ʿAlāʾ al-Dīn

For a treatment of the styles, with plates and detailed drawings, see HIND, Architecture.

The earliest phase of Muslim building in Dihlī is represented, as in the earliest stages in other sites (see ADJMĒR, BHARŌČ, BĪDJĀPUR, DAWLATĀBĀD, DHĀR, DJAWNPUR, GAWṚ, GUDJARĀT, MĀNḌŪ, TRIBĒNI) by the re-utilization of pillaged Hindū temple material. This applied to the first mosque constructed in India, Ḳuṭb al-Dīn Aybak's Masdjid Ḳuwwat al-Islām, earliest inscription 587/1191-2, in Ḳilʿa Rāy Pithorā: on a temple plinth 37.8 m. by 45.4 m. is constructed the central court, 65.2 m. by 45.4 m., with colonnades of three bays on the east and two on north and south; the western *līwān* is four bays in depth, originally with five domes covering voids in front of the *miḥrāb* recesses, its roof raised at the north end to accomodate a *zanāna* gallery. The *līwān* is separated from the mosque courtyard by a great arched screen, added 595/1199, whose arches

do not conform with the spacing of the columns and *miḥrābs* behind. The columns of the arcades were taken from some twenty-seven Hindū and Djayn temples, arranged haphazard, often set one over another to give the necessary height, ranged to support a roof made from ceiling slabs of similar temples, the sculptured figures mutilated and roughly covered with plaster, sometimes turned face inwards. The screen arches are corbelled, ogee at the top, some 2.5 metres thick, the central arch 13.7 m. high with a span of 6.7 m. The whole surface of this *maḳṣūra* is covered with carving, Hindū floral motifs and arabesques, and vertical lines of *naskh*. In the court-yard stands a pillar of rustless malleable iron from a temple of Vishnu of the Gupta period (4th century A.D.), doubtless placed there by the builders not only as a curious relic but also as a symbol of their triumph over the idolaters. At the south-east corner of the mosque Ḳuṭb al-Dīn commenced, after the completion of his mosque, the minaret known as the Ḳuṭb mīnār, described below.



The reign of Ḳuṭb al-Dīn's successor, Shams al-Dīn Iletmish, saw an increase in building, not only at Dihlī. To the Dihlī mosque he attempted to give greater scale and dignity by extensions of the colonnades and the great *maḳṣūra* screen—symmetrically disposed as regards the new *miḥrābs*, columnar bays, and the arches of the *maḳṣūra*, thus indicating a design of homogeneous conception; the new *ṣaḥn* included the *mīnār*, to which he added also, and its entrances were arranged co-axially with those of the old mosque. The colonnade is composed of relatively plain columns, and the screen decoration, including Kūfic character and *ṭughra* devices, is more obviously the work of a craftsman familiar with his material than is the earlier example. The arches, still corbelled, differ in contour from those of the earlier screen by the absence of the ogee counter-curve at the apex. Immediately west of his northern extension of the mosque is the Tomb of Iletmish (c. 632/1235 ? No dating inscriptions), a square chamber, originally bearing a circular dome, supported on corbelled squinches, the whole interior surface intricately banded with arabesques, diaperwork, and *naskh* and Kūfic inscriptions (entirely Ḳur'ānic); the exterior is of dressed ashlar, with the arched openings on north, east and south in red sandstone; red sandstone is also used for the interior, with marble on the *miḥrāb* wall and the cenotaph; the true grave is in a subterranean *tahkhāna*.

The Ḳuṭb mīnār was extended by Iletmish by the addition of three further storeys, to a total height of 69.7 m. (Cunningham, *ASI*, i, 195), completed c. 626/1229. The angle of slope is about $4^1/_2$ degrees from the vertical, and the four storeys are separated by balconies supported by stalactite corbelling. Each storey is fluted—developing probably the polygonal outline of the prototype *mīnār* at Ghaznī —the lowest having alternately rounded and angular flutes, the second all rounded, the third all angular; the upper storeys, the work of Fīrūz Tughluḳ (see below), are plain. Each of the three lowest storeys is decorated with wide encircling bands of Arabic inscriptions in *naskh* (dating inscriptions, panegyrics of Muʿizz al-Dīn Muḥammad b. Sām and Shams al-Dīn Iletmish, Ḳur'ānic verses); features of typically Hindū origin are almost entirely absent.

To the reign of Iletmish belongs the first instance in India of a monumental tomb, the mausoleum of his son Nāṣir al-Dīn Maḥmūd, at Malikpur, of 629/1231. This stands within a plinth some 3 m. high in an octagonal cell, the top of which projects into a court-yard with a plain enclosure wall pierced by corbelled arches, with arcades of Hindū columns on the east and west walls; that on the west forms a small mosque, with central portico and *miḥrāb*. The external gateway bears the dating inscription in Kūfic characters (non-Ḳur'ānic inscriptions in Kūfic are known only here, at the Masdjid Ḳuwwat al-Islām, and at Adjmēr); the corner towers appear to be part of Fīrūz Tughluḳ's restorations (*Futūḥāt-i Fīrūz Shāhī*, ʿAlīgaṛh ed. 1943, 16). The tomb is locally known as "Sulṭān Ghārī", presumably on account of the crypt (*ghār*) in which Nāṣir al-Dīn is buried, but this name is not known before Sayyid Aḥmad Khān, *Āthār al-Ṣanādīd*, lith. Dihlī 1848, 206-8. For a detailed study see S. A. A. Naqvi, *Sulṭān Ghārī, Delhi*, in *Ancient India*, iii, 1947, 4-10 and Plates I-XII.

During the reigns of the suceeding sovereigns no buildings of note were erected until the reign of the Khaldjī ruler ʿAlā' al-Dīn, except for the tomb of the sultan Balban, d. 686/1287, in the south-east of Ḳilʿa Rāy Pithorā, larger than the tomb of Iletmish, with side chambers leading off the main hall, in which appears for the first time the use of the true voussoired arch. This marks not only a technical advance in construction but also a strengthening of Islamic building tradition, as opposed to that of the impressed Hindū craftsmen.

ʿAlā' al-Dīn Khaldjī's extensions to the citadel of Lālkoṭ, and the building of Sirī, have been mentioned above. He started a grandiose plan of extension to the Ḳuwwat al-Islām mosque to the north and east; a few columns remain, and the foundations of the north gateway, to show the extent of this, and of the great arched *maḳṣūra* screen which was intended to be twice as long as the two previous screens combined, and of twice the scale; in the northern court-yard stands the incomplete first storey of a gigantic *mīnār*, its diameter at base twice that of the Ḳuṭb mīnār. The most notable feature of these extensions is the southern gateway, the ʿAlā'ī darwāza, of exceptional architectural merit: a square building of 10.5 m. internal dimension, with walls 3.4 m. thick, is surmounted by a flat dome, with lofty (10.7 m. from ground level to apex) arches on east, south and west, and a smaller trefoil arch on the north leading to the new eastern extension of the court-yard. The three large arches, and the squinches which support the dome, are of pointed horse-shoe shape, voussoired, with on the intrados a fringe of conventionalized spear-heads. A similar style is seen in the Djamāʿat Khāna mosque at the *dargāh* of Niẓām al-Dīn, the first example in India of a mosque built with specially quarried materials, not improvised from Hindū material. (For a discussion of this mosque see M. Zafar Hasan, *A guide to Niẓāmu-d-Dīn* (= *Memoir ASI*, x), 1922). Apart from the early building (*madrasa*?) at Ḥawḍ ʿAlā'ī (= Ḥawḍ-i Khāṣṣ), the only other structure of ʿAlā' al-Dīn at Dihlī is his tomb and madrasa to the south-west of the Masdjid Ḳuwwat al-Islām, now much ruined; the series of small cells on the west wall show for the first time in India domes supported by a corbelled pendentive. The location of this building and all others in the "Qutb site" is shown on Fig. 4; for an extensive description of all the monuments and archaeological work see J. A. Page, *Historical Memoir on the Qutb, Delhi* (= *Memoir ASI*, xxii), 1925; idem, *Guide to*

the Qutb, Delhi, (abridged from above), Dihlī 1938; best illustrations in H. H. Cole, *The architecture of Ancient Delhi,* London 1872.

The achievements of Ghiyāth al-Dīn, the founder of the Tughluḳ dynasty, are confined to the building of the city of Tughluḳābād (see above, History), and his own two tomb buildings; for the first of these see MULTĀN; the second, commenced after leaving the Pandjāb and coming to Dihlī as sovereign, forms an outwork on the south side of Tughluḳābād (see Fig. 2 above), an irregular pentagon with bastions at each angle, with the tomb-building placed diagonally at the widest part of the enclosed court-yard. This mausoleum is of red sandstone faced with white marble, its walls with a strong batter (25° from the vertical), with a recessed archway in the north, east and south sides (the west side closed for the *miḥrāb*) with the "spear-head" fringe introduced under the Khaldjīs and a slight ogee curve at the apex. Here the old Hindū trabeate system is joined with the newer arcuate by a lintel being imposed across the base of the arch.

Muḥammad b. Tughluḳ's foundation of ʿĀdilābād and Djahānpanāh has been mentioned above; in the walling of the second of these is a sluice or regulator of seven spans, the Sāt pulāh, with subsidiary arches and end towers, its two storeys of seven arches holding the mechanism for regulating the level of a lake contained within the walls. Another building of his time, near the village of Begampur, is the Bidjay Maṇḍal, which has been supposed to be the remains of his Ḳaṣr-i hazār sitūn, with the first example of intersecting vaulting in India; close to this is a superb but nameless tomb, and the Bārah Khambā (see below).

Muḥammad b. Tughluḳ's act in transporting the entire *élite* population of Dihlī to Dawlatābād [*q.v.*] resulted in the dispersal of the northern craftsmen, and the introduction of a rubble-and-plaster phase under the enthusiastic patronage of his successor Fīrūz Shāh (752-90/1351-88). A list of the numerous building projects sponsored by this monarch is given by Shams-i Sirādj ʿAfīf, *Taʾrīkh-i Fīrūz Shāhī,* and by Firishta, and in his own *Futūḥāt-i Fīrūz Shāhī* he describes the monuments of his predecessors which he had rebuilt or renovated. These numerous building and restoration projects demanded a strict economy: plans for every undertaking were submitted to the *Dīwān-i wizāra,* and the more expensive building materials, red sandstone and marble, were no longer used. Of Fīrūz Shāh's cities, Fīrūzābād has been mentioned above; see also DJAWNPUR, FATḤĀBĀD, ḤIṢĀR FĪRŪZA, and for the fortification of the *kōṭlā* and the introduction of machicolation see BURDJ, iii. The Djāmiʿ masdjid within the *kōṭlā* stands on a high plinth and the main gate is on the north; the *ṣaḥn* was surrounded by deep triple aisles, and around the central octagonal *ḥawḍ* was inscribed the record of the public works of Fīrūz. Only the shell of the building remains, much of the stone having been built into the walls of Shāhdjahānābād by British engineers. The other building standing within the *kōṭlā* is a three-storeyed pyramidal structure on which is mounted a pillar of Ashoka (3rd century B.C.) brought from the Mīraṭh district. For these and other ruins in the citadel see J. A. Page, *A memoir on Kotla Firoz Shah, Delhi* (= *Memoir ASI,* lii) Dihlī 1937. The mosque style of the period is better shown by half a dozen mosques of approximately the decade 766-76/1364-75: all are rubble-and-plaster, presumably originally whitewashed, with pillars and Hindū-style brackets and eaves in local grey granite, with prominent gateways, many-domed roofs, and tapering ornamental pillars flanking the gateways. The simplest is the mosque in the *dargāh* of Shāh ʿĀlam at Wazīrābād (= Tīmūrpur), a simple west *līwān* of five bays, with three domes, within which is the earliest example in Dihlī of a *zanāna* gallery in the rear corner of the *līwān*; the large (court-yard 68.0 by 75.3 metres) Begampur mosque in the north of Djahānpanāh has the *ṣaḥn* surrounded on all sides by a domed arcade, and the west *līwān* has a tall arched pylon in the centre of its façade which completely masks the large central dome; the Sandjar mosque (also called Kālī [black] masdjid) at Nizamuddin has the central court-yard divided into four smaller courts each 13.1 by 10.1 metres by a cruciform arcade one bay in depth, as well as the domed arcading on all sides (*ASI, Annual Report,* xxvii, Plate I); the Khiṙkī mosque, at Khiṙkī village in the south of Djahānpanāh close to the Sāt Pulāh, has a similar arrangement, but the crossing arcades are of three ranks of arches, as are the side *līwāns*: hence only the four courts, each 9.8 metres square, are open in the total area of about 52 m. square; the Kalān (this also sometimes miscalled 'Kālī) masdjid, within the walls of the later Shāhdjahānābād, is smaller with a single open court and surrounding domed arcades. This, the Khiṙkī mosque, and the Djāmiʿ masdjid in the *kōṭlā,* are all built on a high plinth over a *tahkhāna* storey, and the mosques themselves are approached by high flights of steps. The Kalān masdjid was no doubt the main mosque of the new Fīrūzābād suburbs, but the size of the Begampur and Khiṙkī mosques implies that the older cities still maintained a considerable population. The northern suburbs were further provided for by the Čawburdjī mosque on the Ridge, now so altered through various uses that its original plan is hardly discernible; near the mosque is the remains of Fīrūz Shāh's hunting lodge, Kushk-i Shikār or Djahān-numā, to which he repaired for consolation after the death of his son, Fatḥ Khān, in 776/1374. This prince is buried in the Ḳadam Sharīf, a fortified enclosure (see BURDJ, iii, and *ASI Annual Report,* xxii, 4 and Plates III*c* and *d*) in which is a domed arcade surrounding the grave, over which is a stone print of the Prophet's foot set in a small tank of water. Fīrūz's own tomb is coupled with the *madrasa* he built on the site of ʿAlāʾ al-Dīn's structure at the Ḥawḍ-i Khāṣṣ; the *madrasa* buildings on the east and south of the *ḥawḍ,* double-storeyed on the lake front and single behind, are colonnades, several bays deep, of arches or lintel-and-bracket construction, connecting square domed halls at intervals, extending about 76 m. on one shore and 120 m. on the other; at the south-east corner is the 13.7 m. square tomb, with plastered walls slightly battering, the two outer (south and east) with a slight projection in which is an arched opening in which the entrance is framed by a lintel-and-bracket; there is a single dome on an octagonal drum, supported by interior squinches, and the west wall, in which is a door to the adjoining hall, has a small *miḥrāb.* The building stands on a short plinth extended southward to form a small terrace, which is surrounded by a stone railing of mortice and tenon construction resembling woodwork. Another tomb, of great architectural significance, is that of Fīrūz's Prime Minister Khān-i Djahān Tilangānī, d. 770/1368-9, within the *kōṭ* at Nizamuddin; this is the first octagonal tomb at Dihlī (although the tomb-

chamber at Sulṭān Ghārī is octagonal also), and is surrounded by a verandah, each side of which has three arched openings surmounted by a wide *čhadjdjā* or eaves-stone; there is a central dome, and eight smaller dome-like cupolas, one over each face. The prototype of this tomb has been sought in the Dome of the Rock in Jerusalem; it formed the model for many royal tombs of the subsequent "Sayyid", Lōdī and Sūrī dynasties. One of the latest buildings of the Tughluḳs is the tomb of the *shaykh* Kabīr al-Dīn Awliyā᾽ (probably of the time of Nāṣir al-Dīn Maḥmūd, after 796/1394); although an indifferent and half-scale copy of the tomb of Ghiyāth al-Dīn Tughluḳ, it is of interest in indicating a revival of sympathy for the earlier polychromatic style, a reaction against the Fīrūzian austerity.

On Fīrūz Shāh's tunnels at Dihlī, see H. Hosten, in *JASB*, n.s. vii (1911), 99-108; viii (1912), 279-81; ix (1913), lxxxiii-xci.

Since the major structures at the shrine of Niẓām al-Dīn are of this time the complex is described here (Fig. 5). The entrance gate bears the date 780/1378-9, within which is a large *bā᾽ōlī* [*q.v.*] flanked by two tombs and a two-storeyed mosque, all of Fīrūzian appearance; the *bā᾽ōlī* is named Čashma-i dil kushā (= 703/1303-4 by *abdjad*). A further gate leads to the shrine enclosure; the shaykh's tomb dates from the time of Akbar, replacing an earlier one built by Fīrūz Tughluḳ, but has been much restored since, the dome being an addition of Akbar Shāh II in 1823; the Djamā῾a khāna mosque, to the west of the tomb, has already been referred to. To the south of the enclosure are numerous graves (Djahānārā, daughter of Shāhdjahān; Muḥammad Shāh, d. 1161/1748; Djahāngīr, son of Akbar II; Amīr Khusraw, a contemporary of the *shaykh*, although the tomb is early 11th/17th century; and others); outside the east wall of the court is the square polychromatic tomb of Atga Khān, foster-father of Akbar, d. 969/1562, of a style similar to that of Humāyūn (see below). Some 60 m. south-east of this tomb is the Ćawnsaṫh Khambe, a grey marble pavilion of excellent proportions forming the family burial place of Atga Khān's son, Mīrzā ῾Azīz Kōkaltash, d. 1033/1624. The adjoining *kōṫ* and Tilangānī tomb have already been described. For a full account of all these buildings see M. Zafar Hasan, *A guide to Niẓāmu-d-Dīn* (= *Memoir ASI*, X), Calcutta 1922.

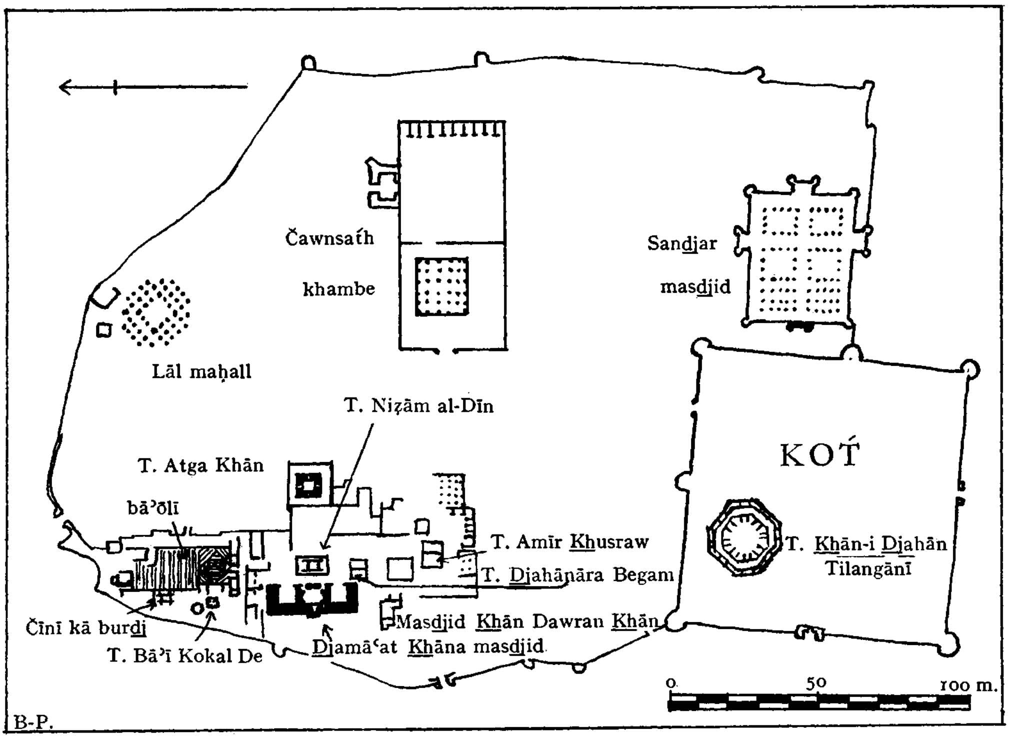

Fig. 5. Nizamuddin

Another *dargāh* largely dating from Fīrūzian times is that of Naṣīr al-Dīn Čirāgh-i Dihlī, d. 757/1356 (see ČISHTIYYA); the east gate is of 775/1373, but the tomb has been much modernized; the walls enclosing the shrine and village were built by Muḥammad Shāh in 1142/1729; beside stands one of the alleged tombs of Bahlōl Lōdī.

The "Sayyid" and Lōdī dynasties produced no great building projects; their monuments consist entirely of tombs, except for one significant mosque, and the principal ones are concentrated in three sites: Khayrpur, Mubārakpur, and south of Mudjāhidpur on the road to Ḥawḍ-i Khāṣṣ. The tombs are of two distinct types, square and octagonal, in both cases with a large central dome, frequently also with open *čhatrīs* above the parapets. The earliest octagonal example is that of Mubārak Shāh, d. 838/1434, in Kōṫlā Mubārakpur, an improvement on the style of the Tilangānī tomb although the dome is not high enough and the octagonal *čhatrīs* over each face are too crowded. The tomb of Muḥammad Shāh, ten years later, removes these defects by raising the drum of the dome and the *čhatrīs*, and

adding a *guldasta* at each angle of the verandah parapet. The tomb of Sikandar Lōdī, c. 924/1518, at the north end of Khayrpur, is of similar proportions but without the *čhatrīs*, and the dome has an inner and outer shell; the mausoleum stands in a fortified enclosure, on the west wall of which is an arrangement of arches resembling an *ʿīdgāh*, presumably an outdoor *miḥrāb*. The tomb of Mubārak has a detached mosque, but that of Muḥammad has none. All tombs have sloping buttresses at the angles.

The square tombs probably all date from the last quarter of the 9th/15th century, but they lack inscriptions and are known only by very uninformative local names. The finest is the Baŕē Khān kā gumbad, "Big Khān's dome", the largest (height 25 m.) of the three known as Tīn burdj, west of Mubārakpur, apparently of three storeys from the exterior, but actually a single hall; this and the adjoining "Little Khān's dome" have octagonal *čhatrīs* in the angles of the square below the drum, as had the Dādī kā ("Grandmother's) and Potī kā ("Granddaughter's") gumbad of the Mudjāhidpur group. At Khayrpur are the best preserved, the Baŕā Gumbad ("Big dome"), date 899/1494, which has no graves within and is locally said to be a gateway to the attached mosque, court-yard and *madjlis-khāna* (?). The mosque has massive tapering and sloping pillars at each rear angle, each with a band of fluting, alternately rounded and angled, reminiscent of the lowest storey of the Ḳuṭb mīnār; the east façade has wide central arches whose spandrels are filled with the best cut-plaster decoration in Dihlī. Near is the Shīsh gumbad, very similar to the Baŕā gumbad, but with courses of dark blue encaustic tile work.

Apart from the mosque mentioned above, the Lōdīs produced one major example of this class, the isolated Moth kī masdjid south of Mubārakpur, built by the *wazīr* of Sikandar Lōdī c. 911/1505; the west wall shows similar tapering pillar-turrets, but at the angles of the projecting *miḥrāb*, and the external angles are provided with two-storeyed open towers; the side walls have trabeate balconies; the façade of the west *līwān* has the contours of the arches emphasized by the recession of planes of the intrados, and the central arch is emphasized further by a pylon-like structure of the same height as the remainder; the *līwān* side domes are supported on stalactite pendentives; white marble, red sandstone, and coloured encaustic tiles are used in the decorative scheme, as well as fine cut-plaster; it is aesthetically one of the liveliest buildings in the whole of Islamic art in India. Other buildings of the Lōdīs are few: a structure (*madrasa* ?), incorporating a small mosque, known as the Djahāz maḥall, on the east side of the Ḥawḍ-i ʿAlāʾī at Mihrawlī, a few small *bārādārīs* and *maḥalls* near Nizamuddin, and the residence (Bārah Khambā), with enclosed court-yard and three-storeyed tower, at Begampur.

In the unsettled days of the early Mughal conquest the Lōdī mode seems to have continued: the Djamālī mosque, of 943/1536, in the south of Ḳilʿa Rāy Pithōrā, has fine ashlar masonry, five *līwān* arches with recession of planes in the intrados, and the central archway sunk in a larger arch, with a spearhead fringe, in a central propylon rising above the general level of the façade, with a single central dome; to the north is the insignificant-looking oblong building over the tomb of Faḍl Allāh [*q.v.*], *takhalluṣ* Djamālī, with the best colour decoration in Dihlī on its ceiling. A continuation of the octagonal tomb style is in that of ʿĪsā Khān Niyāzī, of 954/1547-8 and hence in the reign of Islām Shāh Sūrī; the construction is similar to the preceding examples, including the closed west wall and *miḥrāb*, but more encaustic tile remains; a separate mosque stands on the west of the octagonal court-yard, of grey quartzite and red sandstone, the central bay of the three set in a projecting portico, with a central dome and *čhatrīs* over the side bays. The tomb-building has sloping buttresses at each angle, and is the last building in Dihlī so treated. (For these buildings see S. A. A. Naqvi, *Humāyūn's tomb and adjacent buildings*, Dihlī 1947, 21-4). The last octagonal tomb in Dihlī was built some fourteen years later, in the reign of Akbar, the tomb of Adham Khān in the extreme south-west of Ḳilʿa Rāy Pithōrā; this seeks to obtain additional elevation by converting the drum of the dome into an intermediate storey, arcaded externally, and without *čhatrīs*; the thick walls of the drum contain a labyrinth of stairways. Its general effect is rather spiritless. (Photograph and brief description in Cole, *op. cit.*).

The first two Mughal emperors, Bābur and Ḥumāyūn in his first period, added nothing to Dihlī's monuments, except perhaps the commencement of the Purānā Ḳilʿa; this, however, was mostly the work of the usurper Shīr Shāh Sūrī, as a citadel for his new city. Of the city only two gateways remain, the northern (Lāl, Kābulī or Khūnī darwāza), opposite Fīrūz Shāh Kōtlā, and the southern, with a short stretch of walling, near Purānā Ḳilʿa (see *ASI, Annual Report*, xxii, 6 and Plate II). Of the citadel the walls remain, and two major structures within, the Shīr Mandal, a two-storeyed octagon of red sandstone of unknown original purpose but used by Humāyūn as a library and from which he fell to his death; and the mosque, with no distinctive name, which has the Djamālī mosque as its immediate prototype: but each of the five façade bays has a smaller recessed archway, and every other feature of the earlier mosque is improved and refined in this later example. The external construction is in coursed ashlar, and the *līwān* façade in red sandstone, some of it finely carved, embellished with white marble and polychromatic encaustic tile work; inside the central dome is supported by two ranks of squinches, and in the side bays stalactite pendentives support the roof; the rear wall has tapering turrets on each side of the *miḥrāb* projection, and an open octagonal turret at each angle.

The first major building of the Mughals in Dihlī is the tomb of the emperor Humāyūn, of a style already prefigured in the small tomb of Atga Khān at Nizamuddin; the foundations of it were laid in 976/1568-9 (so Sangīn Beg, *Siyar al-Manāzil*, MS in Dihlī Fort Museum; 973/1565 according to Sayyid Aḥmad Khān, followed by most later writers) by his widow, employing the Persian architect Mirzā Ghiyāth, although the enclosure wall had been started some five years before. In a large square garden enclosure (340 m. side; this is the first *čārbāgh* garden in India still preserving its original plan) stands the mausoleum building, 47.5 m. square on a plinth 95 m. square, 6.7 m. high; each face is alike, having a central rectangular fronton containing an immense arch, flanked by smaller wings each containing a smaller arch; these wings are octagonal in plan and project in front of the main arches. The central chamber is surmounted by a bulbous double dome on a high collar, around which are *čhatrīs* over the corner wings and portals. The

entire building is in red sandstone, with a liberal use of white and coloured marble. Neighbouring structures are the small Nā'ī kā gumbad, "Barber's dome"; the Nīlā Gumbad, "Blue dome", earlier than Humāyūn's tomb and therefore not the tomb of Fahīm Khān, d. 1035/1626, as often stated; the "Afsarwālā" tomb and mosque; the ʿArab Sarā'ī; and the tomb of ʿĪsā Khān already described (see Fig. 6 for plan of this complex; full description of these buildings in S. A. A. Naqvi, *Humāyūn's Tomb and adjacent buildings*, Dihlī 1947). Not far to the south is the tomb of ʿAbd al-Raḥīm [*q.v.*], Khān-i Khānān, d. 1036/1626-7, a similar structure but smaller and without the octagonal corner compartments—hence a more obvious forerunner of the wards to the river. The dīwān-i ʿāmm is of red sandstone, with slender double columns on the open sides; this and the palace buildings on the east have engrailed arches, stand on low plinths, and most have open *čhatrīs* at each corner of the roof. Through the palaces runs an ornamental canal, the Nahr-i Bihisht, which flows south from the Shāh Burdj, water being brought from a point thirty *kōs* up the Djamnā (through the Western Djamnā canal; for the history of this, which dates from the time of Fīrūz Shāh Tughluḳ, see J. J. Hatten, *History and description of government canals in the Punjab*, Lahore n.d., 1-3); this has a plain marble channel, which in the Rang maḥall flows into a large tank in which is set a marble lotus, having previously passed, in the royal

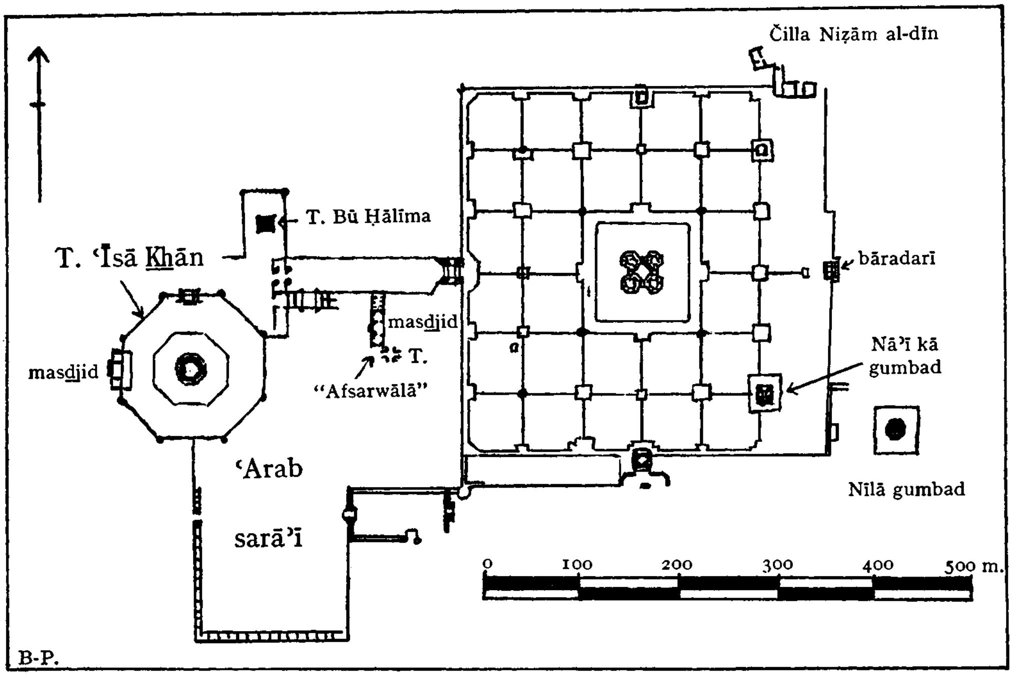

Fig. 6. Humāyūn's tomb

Tādj Maḥall than Humāyūn's tomb; the white marble of this building was later stripped off by Āṣaf al-Dawla, *wazīr* of Awadh. Other early Mughal buildings are the Lāl čawk or Khayr al-manāzil (the latter name a chronogram, 969 = 1561-2), a mosque built by Māham Anaga, foster-mother of Akbar, with double-storeyed chambers on east, south and north forming a *madrasa* (*ASI*, *Annual Report*, xxii, 6 and Plate I a and b; inscr., *Memoir ASI*, xlvii, 10); and the mosque of Shaykh ʿAbd al-Nabī, *ṣadr al-ṣudūr* of Akbar, between Fīrūz Shāh Kōtlā and the Purānā Ḳilʿa, built 983/1575-6 (see M. Zafar Hasan, *Mosque of Shaikh ʿAbdu-n Nabī* (= *Memoir ASI*, ix), Calcutta 1921).

The main phase of Mughal building in Dihlī was the construction of Shāhdjahānābād and the Red Fort, Lāl ḳilʿa, founded 1048/1638. The main features of Mughal palaces and other buildings will be described in MUGHALS; a brief account only is given here. Within the palace enclosure, about 950 by 505 m., are a central court, containing the Dīwān-i ʿāmm; flanking this, two open spaces containing gardens; and, on the eastern wall, the range of palaces facing inwards to the gardens and outprivate apartments, under a screen bearing a representation of the "Scales of Justice", Mīzān-i ʿadl. Off these apartments is the external octagonal balcony, the Muthamman Burdj, from which the emperor gave the darshan [*q.v.*]. The Rang maḥall and the Dīwān-i khāṣṣ are the most lavishly ornate of these palaces, built and paved in white marble, the piers of the arches inlaid with floral designs in *pietra dura*; the latter building contained the fabulous Peacock Throne (*Takht-i ṭā'ūs*), taken to Persia by Nādir Shāh in 1152/1739 and there broken up (G. N. Curzon, *Persia and the Persian question*, i, 321-2). The disposition of these and the other buildings is shown in the plan, Fig. 7.

The fort originally contained no mosque; the Mōtī masdjid was added by Awrangzīb in 1073/1662-3, entirely of white marble, with a curved "Bengali" cornice over the central bay. For the fort and its buildings, see G. Sanderson, *A guide to the buildings and gardens, Delhi Fort*[4], Dihlī 1937.

The Djāmiʿ masdjid of Shāhdjahānābād (named *Masdjid-i Djahān-numā*), built 1057-9/1648-50, stands on an open plain to the west of the Lāl Ḳilʿa, its high basement storey, with blind

arches on all sides, built on an outcrop of the local Aravallī ridge. The gates on north, east and south have an external opening in the form of a half-dome with a smaller door in the base of each. The east gate, used as the royal entrance, is the largest. The *līwān* surrounding the court is open to the outside, and has a square *burdj*, surmounted by an open *čhatrī*, at each angle. The western sanctuary is a detached compartment 79 m. by 27.5 m. with the

court-yard (99 m. square), with a wide central arch flanked by five smaller bays of engrailed arches on each side, and a three-storeyed minaret at each front angle; above are three bulbous domes of white marble with slender vertical stripes of black marble. The mosque as a whole is in red sandstone, with white marble facings on the sanctuary, and white marble vertical stripes on the minarets. Nearly contemporary is the Fatḥpurī masdjid at the west end of Čandnī Čawk, the main street of Shāhdjahānābād, of similar style but less refinement, with a single dome; there is a mosque school within the enclosure. A smaller mosque of similar style, but with the three domes more bulbous and with equal black and white marble stripes, is the Zīnat al-Masādjid, c. 1112/1700, in the east (river) quarter of Shāhdjahānābād.

Of the latest Mughal phase must be mentioned the Mōtī masdjid in the *dargāh* of Ḳuṭb al-Dīn Awliyāʾ at Mihrawlī (early 12th/18th century); the tomb, madrasa, and mosque of Ghāzī al-Dīn Khān, father of Āṣāf Djāh, in a hornwork outside the Adjmēr gate of Shāhdjahānābād (1122/1710), and where the Arabic school is still maintained; the gateway of the Ḳudsiya Bāgh, north of the Kashmīr Gate, c. 1163/1750, and the elegant diminutive mosque (Sonahrī masdjid) of Djāwid Khān, of fawn-coloured sandstone, of the same time; and the finely-proportioned fawn sandstone tomb of Safdar Djang, d. 1166/1753, standing in the last great Mughal garden. One British building is worth mention, St. James's church, built by Col. James Skinner in Palladian style in 1824. The vast building projects of New Delhi (*Naʾī Dillī*) show occasional reminiscences of the glory of Mughal building, but have no further Islamic significance.

DIHLĪ SULTANATE, the principal Muslim kingdom in northern India from its establishment by Iletmish (608-633/1211-1236) until its submergence in the Mughal empire under Akbar (963-1014/1556-1605). The establishment of the Dihlī sultanate was made possible by the Indian campaigns of the Ghūrid Muʿizz al-Dīn Muḥammad b. Sām and his lieutenant Ḳuṭb al-Dīn Aybak. Having recovered Ghaznī from the Ghuzz in 568/1173, in 571/1175 Muḥammad b. Sām captured Multān and Učč, hoping to by-pass the Ghaznawid possessions in the Pandjāb. A severe defeat near Mount Ābū in 574/1178 by Mūlarādjā II, the Čālukya ruler of Gudjarāt, induced the Ghūrids not to persist with the southern route into Hindūstān via the Gumal pass. The capture of Peshāwar in 575/1179, of Siālkoṭ in 581/1185, and of Lahore finally in 582/1186, ended Ghaznawid rule in India and placed the Ghūrids in a favourable strategic position *vis-a-vis* the Rādjput clans. Defeated however at Tarāʾīn (Tarāorī) in 587/1191 by the Čawhāns (or Čāhamānas) under Pṛithvīrādja, Muʿizz al-Dīn returned the following year with an army, said by Firishta to be of 120,000 horse, decisively to defeat the Čawhāns at the same place. Although Hānsī, Kuhrām and Dihlī (588/1192) were occupied, the political fragmentation of northern India prevented Ghūrid victories from having more than a temporary and local result. The Gāhaḍavāla chief, Djayačandra was defeated and slain near Čandāwar on the Djamnā in 590/1194 and Banāras occupied, but even so Ḳuṭb al-Dīn Aybak had to fight hard to retain Koyl and

Adjmēr and Muʿizz al-Dīn had to enter India himself in 592/1195-6 to take Bayāna, the stronghold of the Djadon Bhaffī Rādjpūts. Thereafter, however, until the year of his death, Muʿizz al-Dīn left Ḳuṭb al-Dīn a free hand in Hindūstān. In 592/1196, the latter defeated an attempt by the Mhers, in alliance with the Čālukyas, to retake Adjmēr and in the following year defeated the Čālukyas near Mt. Ābū without however attempting permanently to occupy their territory. Turning his attention to the upper Ganges, Aybak occupied Badā'ūn in 594/1197-8 and Kanawdj in 595/1198-9. In 597/1200-1, Gwāliyār was taken and the Bundelkhand area was penetrated in 599/1202-3 with the capture of Kālāndjara (Kālindjar).

When, in 602/1206, Muʿizz al-Dīn was assassinated at Damyak on the Indus (on the identity of the assassins see Habibullah, *The foundation of Muslim rule in India*, 79), the Ghūrid position in India was that of a precarious military occupation. Holding only the chief towns of the Pandjāb, Sind and the Ganges-Djamna Dō'āb, the Ghūrid forces were menaced by the Khokars along their line of communication with Ghaznī and were faced by a resurgence of the Rādjpūts in Bundelkhand (Kālindjar had been retaken by the Čandelas) and around Gwāliyār which had been retaken by the Parihāras. Moreover the Gāhadavālas were still active in the districts around Farrukhābād and Badā'ūn. The Rādjpūt clans had but melted into the countryside hoping to re-emerge and take control when the Turkish invaders had passed on. Indeed, by accepting Pṛithvīrādja's son and the Rāy of Gwāliyār Sallakshaṇapāla as tributaries, the Ghūrids may have testified to their limited political rôle in Hindūstān and their principal pre-occupation with their extra-Indian rivalry with the Khʷārazm-Shāh and the Ḳara-Khitay.

That the consolidation of the Ghūrid position in Hindūstān was still a secondary consideration even after Muʿizz al-Dīn's death is evident from the subsequent career of Ḳuṭb al-Dīn Aybak. Said by his panegyrist Fakhr-i Mudabbir to have been appointed *walī ʿahd-i Hindūstān* by Muʿizz al-Dīn shortly before 602/1206, on his master's death Ḳuṭb al-Dīn moved from the neighbourhood of Dihlī to Lahore and assumed power there. (Statements that he assumed the title of sulṭān are not corroborated by numismatic or inscriptional data and are not consonant with others that he sought and obtained a patent of manumission and a diploma as *malik* of Hindūstān from Ghiyāth al-Dīn Maḥmūd, nephew of Muʿizz al-Dīn and ruler of Fīrūz Kūh). Maintaining his headquarters at Lahore, he fended off Tādj al-Dīn Yīldiz who claimed the Ghūrid conquests in Hindustan; when, in 605/1208 Yīldiz moved out of Ghaznī into the Pandjāb, Ḳuṭb al-Dīn promptly drove him back and occupied Ghaznī himself, only in turn to be expelled by the people of Ghaznī after the proverbial 'forty days'.

It is significant that no efforts by Ḳuṭb al-Dīn to extend the conquests in Hindūstān are recorded in the four years before his death at Lahore in an accident at *čawgān* in 607/1210.

Ḳuṭb al-Dīn was succeeded at Lahore by his son Ārām Shāh, but at Dihlī a group of military officers set up Iletmish, *muḳtaʿ* of Badā'ūn and son-in-law of Aybak. Ārām Shāh was slain while marching on Dihlī. However, before Iletmish was secure, he had first to put down a revolt by the Turkish *djāndārs* of Dihlī.

Shams al-Dīn Iletmish (Iltutmish), an Ilbārī Turk, may be regarded as the founder of an independent sultanate of Dihlī. (The correct form of the name is Iletmish, as shown by Hikmet Bayur in *Belleten*, xiv, 1950, 567-88). His reign saw three main political developments—the severance of political ties between the Turks and Afghāns in Hindūstān and Central Asia, the achievement of primacy in Muslim India by the ruler of Dihlī, and the firm grasping of the main strategic centres of the north Indian plain by the forces of Dihlī. But in 608/1211, another former Muʿizzī slave, Nāṣir al-Dīn Ḳabāča, the ruler of Multān, had taken advantage of the struggle between Ārām Shāh and Iletmish to occupy Lahore, Tādj al-Dīn Yīldiz had not abandoned his claim to the Ghūrid conquests in India and numerous Hindū chiefs were threatening the Turkish hold over Badā'ūn, Kanawdj and Banāras. Rādjāsthān also had slipped out of Dihlī's feeble grasp.

Placating Yīldiz by acceptance of the *čhatr* and *dūrbāsh* of sovereignty and by not stirring when the latter's troops drove Ḳabāča from Lahore, Iletmish tightened his hold over Sarsūtī and Kuhrām east of the Satladj and when, in 612/1215, Yīldiz was forced out of Ghaznī into the Pandjāb by the forces of the Khʷārazm-Shāh, Iletmish was able to defeat and capture him at Tarā'in (Tarāorī). He still did not hasten, however, to occupy Lahore.

Čingiz Khān's attack upon the Khʷārazm-Shāh hastened the political isolation of the Turks in India. Iletmish refused to be drawn into the struggle between the Mongols and Djalāl al-Dīn Khʷārazm-Shāh [*q.v.*], watching the latter erode Ḳabāča's position in the Pandjāb and Sind. Taking advantage of Ḳabāča's difficulties, Iletmish occupied Lahore and in 625/ 1228 drove Ḳabāča from Multān and Učč to a death by drowning in the Indus. Although Iletmish occupied Siālkoṭ (and Lahore when he could), by drawing back his effective frontier east of the Beās, he managed to avoid a head-on clash with the Mongols before his death.

In the east, where Muḥammad Bakhtiyār Khaldjī had overcome the Sena kingdom in Bengal in 600-2/1203-6, Iletmish repelled Ghiyāth al-Dīn ʿIwāz Khaldjī's encroachments in Bihār in 623/1225; in the following year the latter was slain by Iletmish's eldest son Nāṣir al-Dīn Maḥmūd. Towards the end of 627/1230, Iletmish invaded Lakhnawtī and slew the Khaldjī chief Balka.

Against the Rādjpūts, Iletmish was successful in capturing, at least temporarily, Ranthambhor in 624/1226, Mandor in 625/1227, Gwāliyār in 629/1231, and in plundering Bhīlsā and Udjdjayn (Ujjain) in 632/1234-5. Nevertheless his lieutenants were worsted in encounters with the Čawhāns of Bundī and the Čandelas of Narwar and even in the Dō'āb Hindū chiefs needed constant overawing.

The appearance of an independent Muslim power in north India was however signalized by Iletmish receiving, in 626/1229, a robe of honour and the title of *Nāṣir Amīr al-Mu'minīn* from the ʿAbbāsid caliph, al-Mustanṣir.

That the Dihlī sultanate had 'settled in' in northern India by the end of Iletmish's reign is suggested by its capacity to survive faction, Mongol pressure and sapping by Hindū chiefs during the years immediately following. Within ten years of Iletmish's death, the *muḳtaʿ*s and officials had accepted and deposed four of his children or grandchildren, Rukn al-Dīn Fīrūz (633/1236), Raḍiyya (634-7/1236-40), Muʿizz al-Dīn Bahrām, (637-9/1240-2) and ʿAlā' al-Dīn Masʿūd (639-44/1242-6).

Stability was not achieved until the reign of Nāṣir al-Dīn Maḥmūd (644-64/1246-66) during whose time effective authority was exercised by Ghiyāth al-Dīn Balban as *nā'ib*. Most sources picture Nāṣir al-Dīn as a pious recluse, but from the evidence of ʿIṣāmī's *Futūḥ al-Salāṭīn*, it is possible that this is an exaggeration. (See also K. A. Nizami, *Balban, the regicide*, in bibl.).).

The ceaseless struggle required of the Turks and Afghāns in Hindūstān to maintain Dihlī as the principal, let alone the paramount, power at this time, is emphasized by the career of Balban both as *nā'ib* and sultan. Ceaseless military activity was demanded. In 645/1247, Balban plundered the areas between Kālindjar and Karra; in 646/1248, he led an unsuccessful raid against Ranthambhor and in 649/1251 he marched against Čahaŕadeva, the Djadjapella ruler of Gwāliyār and Narwar. In 652/1254 he campaigned against the Katehriyas whose activities always threatened the hold of Dihlī over Badā'ūn and Sambhal, north of the Ganges. Depredations by the Yaduvanshī Rādjpūts of the northern Alwār area, the 'Mewātīs', were endemic in the last decade of Nāṣir al-Dīn Maḥmūd's reign, with raids against Hānsī in 655/1256 and even as far as the environs of Dihlī itself.

Early in Balban's own reign (664-86/1266-87), he cleared the forests near Dihlī of marauders and pacified the Bhodjpur, Patīyālī and Kampil districts, stationing garrisons of Afghāns there. One historian of the next century, Ḍiyā' al-Dīn Baranī, depicts Balban as consciously pursuing, in his own reign, a purely defensive policy and as concerned mainly to hold the western marches against the Mongols. That this is probably an *ex post facto* rationalization, provoked by the contrast with the succeeding period, is suggested by the fierceness of Balban's reaction to trouble in Lakhnawtī in the 1280's when he put forth a great military effort to suppress Tughril who had assumed independence under the title of Sulṭān Mughīth al-Dīn. Dihlī was not always so mindful of events in Bengal. Although Balban strengthened the frontier strongholds of Dīpālpur, Sāmāna and Bhātinda and posted his favourite son Muḥammad to Multān and Lahore, the Mongols were too preoccupied with the quarrels between the Čaghatāys and the Il-Khānids and their rivalry in Afghānistān to be a serious threat to the Dihlī sultanate in Balban's time.

As Muḥammad was killed in a skirmish with the Mongols in 684/1286, and Balban's second son Bughrā Khān preferred his *iḳṭāʿ* of Lakhnawtī, Balban was succeeded by his grandson, Muʿizz al-Dīn Kayḳubād who, young and frivolous, proved incapable of withstanding the intrigues of ambitious ministers and the faction struggles between groups of Turks and Khaldjīs. Eventually, succumbing to paralysis, he was displaced by his infant son, Kayūmarth, a puppet in the hands first of the Turks and then of the Khaldjīs. The Khaldjī leader, Djalāl al-Dīn, accepted the status of *nā'ib* to Kayūmarth; after about three months, finding that, in order to protect himself against the jealousies of other nobles, he needed the title to as well as the reality of power, Djalāl al-Dīn assumed the sultanate himself (689/1290).

By Muslim historians of a later generation, the end of Balban's dynasty was regarded as signalizing the end of the Turkish sultanate of Dihlī. In the sense of the race of the sultan this is so, but not in the sense that the ruling élite had hitherto been exclusively Turkish. Djalāl al-Dīn Khaldjī had been Balban's *muḳtaʿ* of Sāmāna before becoming *ʿāriḍ-i mamālik* under Muʿizz al-Dīn; and Balban's *ʿāriḍ-i mamālik*, ʿImād al-Mulk Rāwat, was a converted Hindū. The outcome of the diversification of the Muslim ruling groups through immigration, intermarriage and concubinage with the subject population was to become more evident under the Khaldjīs, but Baranī's rhetoric, for example, cannot conceal the fact that the process had already gone a considerable way under Balban.

Djalāl al-Dīn Khaldjī's assassination by his nephew, ʿAlā' al-Dīn, has enabled Baranī, against the evidence of events and the testimony of Amīr Khusraw's *Miftāḥ al-Futūḥ*, to fasten upon him the character of an ageing, indulgent and gullible valetudinarian. Actually, he suppressed a revolt by Balban's former officers in Shaʿbān 689/August-September 1290, besieged Ranthambhor (though unsuccessfully) in 690/1291 and defeated a Mongol foray in 691/1291-2. He also pillaged Mandor and Udjdjayn (Ujjain) at the end of 691/1292.

But it was under ʿAlā' al-Dīn Khaldjī (695-715/1296-1315) that, for a brief period, the Dihlī sultanate attained an imperial status in the sub-continent. ʿAlā' al-Dīn was probably born about 666/1267-8. A participant in the Khaldjī coup against Balban's family and the other military officers, he was appointed *muḳtaʿ* of Karra in 690/1291 from whence he raided Bhīlsā and then, in 695/1296, unbeknown to Djalāl al-Dīn Khaldjī, the Yādava kingdom of Devagiri (Deogir). Loaded with booty, he was met on the Ganges near Mānikpur by Djalāl al-Dīn who appears to have been so avid to share the spoils that he was careless of his own safety. Fear of the influence of powerful enemies at court feeding his ambition, ʿAlā' al-Dīn had his uncle slain.

Supported by his brother Almās Beg, ʿAlā' al-Dīn bought over many *maliks* and *amīrs* by money and promotion. Within a few months of his accession, he had captured the surviving sons of Djalāl al-Dīn Khaldjī and their supporters and blinded, imprisoned or executed them.

The reign was noteworthy in that serious attacks upon Hindūstān by the Čaghatay Mongols of Transoxiana were repulsed, the influence of Dihlī over Rādjāsthān was greatly extended and profitable raids, which made possible the introduction of a Muslim ruling class there later, were made against the Hindū kingdoms of the Deccan and the far south. The historian Baranī details important changes in the system of administration and measures to control the prices of necessities at headquarters and thus lessen the cost of a large army. (See Baranī, *Ta'rīkh-i-Fīrūz Shāhī*, Bib. Ind. ed., 282-8, 302-19). There are hints of unwonted activity in these spheres in other contemporary or near-contemporary evidence. It is not clear from the evidence why ʿAlā' al-Dīn should have succeeded in winning the co-operation of the military and official classes for reforms which adversely affected them.

The rivalry between Dawā Khān, great-great grandson of Čaghatay and ruler of Transoxiana, and the Great Khāns in the east in alliance with the Il-Khāns in the west, led to an effort by Dawā to expand in the direction of Afghānistān and Hindūstān. The first Mongol invasion of ʿAlā' al-Dīn's reign, into the Pandjāb in 697/1297-8, was worsted at Djalandhar and the second, into Sīwistān in 698/1299 was equally abortive. A third, later the same year, under Ḳutlugh Khwādja, son of Dawā, reached Kīlī near Dihlī before it too was defeated. The invasion of Ṭarghī in 702-3/1303 invested Dihlī and appears to have

been thwarted of success only by ʿAlāʾ al-Dīn Khaldjī's entrenchments at Sīrī. (On the location of Sīrī, see *ASI*, i, Simla 1871, 207-12). Other incursions were defeated at Amroha in 705/1305, and near the Rāwī in 706/1306 by Malik Kāfūr and Malik Tughluḳ. But although Dihlī was almost uniformly successful against the Čaghatay Mongols, the cessation of major attacks during the latter half of ʿAlāʾ al-Dīn's reign was probably caused more by an intensification of antagonism between the Il-Khāns and Dawā's successors than by discomfiture in Hindūstān; Malik Tughluḳ appears to have been kept busy combatting minor forays as *muḳṭaʿ* of Dīpālpur.

ʿAlāʾ al-Dīn had not waited upon security from the Mongols before expanding the sultanate in India itself. In 698/1299, Gudjarāt was invaded and Khambāyat plundered. (See K. S. Lal, *History of the Khaljīs*, 83, on the date of this expedition). In 700/1301, Ranthambhor, in 702/1303 Čittor, in 705/1305 Māndū were captured, to be followed in 708/1308 by the capture of Siwāna and in 711/1311-2 of Djālor. These victories in Rādjāsthān were essential to the success of ʿAlāʾ al-Dīn's expeditions south of the Narbadā. The Yādava kingdom of Devagiri was laid under tribute in 706-7/1307, the Kākatīya kingdom of Telingāṇa in 709/1309-10. In 710/1311, with the help of the Hoysāla Ballāladeva of Dwārasamudra, Malik Kāfūr invaded the Pāndya kingdom in the far south, returning laden with spoils to Dihlī in 711/1311.

The successes of ʿAlāʾ al-Dīn Khaldjī's reign may be attributable partly to the personal drive of a sultan requiring, as his uncle's murderer, to go on living dangerously, partly to the financial appeal of his earliest Deccan raid and the conquest of Gudjarāt to the soldiery, and partly to the services of Indian-born Muslims and converted Hindū slaves. Moreover, he treated defeated Hindū rulers in a conciliatory way, receiving them at court and marrying into their families. (He himself married a daughter of Rāmadeva of Devagiri and his son Khiḍr Khān married "Duwal Rānī" (correctly Devaldevī), daughter of Rāy Karan of Gudjarāt). It is significant that he was content to reduce the Hindū kingdoms of south India to a tributary status. His administrative measures will be mentioned under a general reference to the political institutions of the Dihlī sultanate.

ʿAlāʾ al-Dīn Khaldjī did not however succeed in perpetuating the sultanate in his family. On his death, his *nāʾib* Malik Kāfūr raised ʿAlāʾ al-Dīn's six-year-old son ʿUmar Khān to the throne as Shihāb al-Dīn ʿUmar Khaldjī, blinding Khiḍr Khān and Shādī Khān before himself being murdered by the palace *payk*s. ʿAlāʾ al-Dīn's third son Ḳuṭb al-Dīn Mubārak Shāh Khaldjī then ascended the throne. During his reign (716-20/1316-20), a revolt in Gudjarāt was suppressed, Devagiri was garrisoned and Telingāṇa and the far south raided again. However, Ḳuṭb al-Dīn was murdered by a Hindū convert, his favourite Khusraw Khān Barwārī (on his name and origin see: Hoḍīvālā, *Studies in Indo-Muslim history*, i, 369-71), who assumed the title of Sulṭān Nāṣir al-Dīn Khusraw Shāh.

Tradition formed under the Tughluḳs depicts his rule of four months as that of an avowed Hindū infidel; it is evident however that Ḳuṭb al-Dīn was unpopular among important elements of the military classes [there had been plots against his life in 718/1318 when coins were struck in favour of one Shams al-Dīn Maḥmūd Shāh (see R. B. Whitehead, *Some rare coins of the Pathan sultans of Delhi*, in *JASB*, 1910, Numismatic Supplement xiv, 566-7; *Shamsu-d-din Maḥmūd of Dehli*, in *JASB*, 1912, Numismatic Supplement xvii, 123-124; H. Nelson Wright, *The sultans of Delhi; their coinage and metrology*, Dihlī 1936, 109-10; K. S. Lal, *op. cit.* 330-2, 337-8)]. Historians favouring the Tughluḳs state that many Muslims either accepted office under him or refused to join Malik Tughluḳ's revolt, or fought energetically on the Barwārī's behalf. It is stated that Hindū Khokhar chiefs also supported the Tughluḳs. However, Ghāzī Malik, later Ghiyāth al-Dīn Tughluḳ, encouraged by his son Malik Fakhr al-Dīn Djawnā, marched on Dihlī, defeating the forces of Nāṣir al-Dīn Khusraw Shāh twice, capturing and executing him.

According to Ibn Baṭṭūṭa, (*Riḥla*, ed. Defremery and Sanguinetti, iii, 201), Ghiyāth al-Dīn Tughluḳ was a Ḳarawna Turk. (On this see Wolseley Haig, *Five questions in the history of the Tughluq dynasty of Dihli*, in *JRAS*, July 1922, 319-21). He appears to have risen to the appointment of *wakīl-dār* under Muʿizz al-Dīn Kayḳubād and first to have obtained the post of *muḳṭaʿ* under Djalāl al-Dīn Khaldjī. His reign (720-5/1320-5) saw a further campaign against Telingāṇa, the repulse of a Mongol raid, a raid into Djādjnagar and an expedition to Lakhnawtī to re-assert Dihlī's suzerainty. Ghiyāth al-Dīn Tughluḳ met his death under a collapsing hunting pavilion at Afghānpur. The complicity of Muḥammad b. Tughluḳ in his father's death has been exhaustively argued (see Syed Moinul Haq, *Was Mohammad bin Tughlak a parricide?*, in *Muslim University Journal*, Aligarh, v/2, October 1938, 17-48). In the light of Ḍiyāʾ al-Dīn Baranī's apparently genuine mystification at the event, the absence of condemnation of Muḥammad b. Tughluḳ (whom he condemns fiercely on other counts) and the unnecessarily elaborate and haphazard method of killing alleged, Muḥammad b. Tughluḳ is, in this article also, adjudged innocent of his father's death.

The reign of Muḥammad b. Tughluḳ (725-52/1325-51) appears to have been a watershed in the history of the Dihlī sultanate. At the outset, Dihlī's authority was, according to Ḍiyāʾ al-Dīn Baranī, recognized in twenty-three provinces, and the picture drawn by Ibn Baṭṭūṭa in the 730/1330's is one of Dihlī's power and magnificence. Yet by 752/1351 the power of Dihlī south of the Narbadā was clearly forfeit and revolt endemic elsewhere. Baranī's interpretation of Muḥammad b. Tughluḳ's troubles is too redolent of his general philosophy of history (see P. Hardy, *Historians of medieval India*, 36-9, 124-5) to be acceptable as it stands (it hardly explains the military support the sultan enjoyed until his natural death, for instance).

Perhaps the decision which did most, in the long term, to undermine the sultan of Dihlī's authority was Muḥammad b. Tughluḳ's attempt to make Deogir (Dawlatābād [*q.v.*]) a second capital and to settle numbers of Muslims belonging to the ruling *élite* in the Deccan. During the two previous reigns, the temptation among Muslims of the Deccan armies to plot against the Dihlī sultan had been shown to exist. By changing the Khaldjī policy of suzerainty over south India for one of settlement in south India, Muḥammad b. Tughluḳ unintentionally ensured that such temptations would be successful. The relationship of other projects of the sultan—an expedition said to have been aimed at the conquest of Khurāsān, but probably at the seizure of Peshāwar or Ghaznī (Baranī's geographical statements are

vague and uncorroborated, while ʿIṣāmī speaks of a Pes͟hāwar expedition about the same date), a disastrous campaign against Ḳarāčil in the Kumāon-Gaṛhwāl region of the Himālayan foothills, the issue of token currency [see DĀR AL-ḌARB]—to the many rebellions has not been satisfactorily established. It was perhaps important that the Dihlī-Dōʾāb area was afflicted by a disastrous famine in 736/1335-6. In all, Muḥammad b. Tug͟hluḳ was called upon to put down twenty-two rebellions, the most important of which, as resulting in a permanent loss of hegemony, were in Maʿbar (735/1334-5), Gulbargā (740/1339), Warangal (746/ 1345-6) and Deogir, which led to the proclamation, in 748/1347, of an independent sultanate under ʿAlāʾ al-Dīn Bahman S͟hāh [see BAHMANIDS]. Muḥammad b. Tug͟hluḳ died near Ṭhaṭṭhā while in pursuit of one Tag͟hī, a Turkish rebel, who had taken refuge with the Sammas of Sind. It is noteworthy that tradition in *ṣūfī* or *ṣūfī*-influenced writing is generally hostile to Muḥammad b. Tug͟hluḳ. (He is known to have welcomed a pupil of Ibn Taymiyya to his court (see K. A. Nizami, *Some aspects of khānqah life in medieval India*, in *Stud. Isl.*, viii, 1957, 69).)

Muḥammad's successor, his cousin Fīrūz b. Rad̲j̲ab, selected by the army in Sind, was apparently *persona grata* to the *ṣūfī*s of the time; the extant accounts of the reign are mainly panegyrical and in the *manāḳib* idiom; they depict him as pious and benevolent, shunning war and devoting himself to building. Nevertheless, before old age came upon him, he seems to have been no more pacific than Dihlī sultans usually were. He led expeditions to Lakhnawtī in 754/1353-4 and in 760/1359, followed by a foray into D̲j̲ād̲j̲nagar in 761/1360 and Nagarkoṭ 762/1361. Other campaigns followed to Ṭhaṭṭha in 767-8/1366-7, Etāwā in 779/1377 and Katehar in 782/1380. Fīrūz S͟hāh Tug͟hluḳ did however refrain, despite an invitation, about 767/1366, from disaffected leaders in the Bahmanī sultanate, from attempting to recover Dihlī's former possessions south of the Narbadā. The impression of prosperity and contentment among all sections of the population given in ʿAfīf's *Taʾrīk͟h-i Fīrūz S͟hāhī* was probably heightened by the contrast with the period after Tīmūr's incursion into Hindūstān, when the work was written.

Perhaps Fīrūz's longevity (he died in 790/1388) had removed all restraint from the frustrated ambitions of his descendants, for after his death his sons and grandsons fell to struggling for the throne without regard for the consequences for the sultanate. By 796/1393-4, there were two would-be sultans, Maḥmūd, son of Muḥammad the third son of Fīrūz S͟hāh Tug͟hluḳ, with headquarters in old Dihlī, and Nuṣrat K͟hān, son of Fatḥ K͟hān the eldest son of Fīrūz, with headquarters in Fīrūzābād, the new capital built by Fīrūz S͟hāh Tug͟hluḳ to the north-east of old Dihlī. It was not surprising that the *muḳtaʿ*s of the provinces seized their opportunity to become independent or to raise their terms for supporting one or other of the contestants.

Upon a scene of political disintegration burst Tīmūr's invading army. Crossing the Indus in Muḥarram 801/September 1398, capturing Bhatnagar but by-passing Dīpālpur and Sāmāna, Tīmūr defeated the forces of Sulṭān Maḥmūd before Dihlī and occupied and sacked Dihlī itself. The consequent political anarchy is reflected in the purely local scale of the events recorded in the histories of the period. The possessor of Dihlī itself became merely one of many military chiefs, both Muslim and Hindū, struggling to widen the area in north India from which they drew revenue, or to increase their military following. Some of Dihlī's former officers succeeded in assuming complete independence of Dihlī. In 808/1406 Hūs͟hang S͟hāh put the seal on his father Dilāwar K͟hān's independent rule in Mālwā with a proclamation of an independent sultanate; in 810/1407 Ẓafar K͟hān did the same in Gud̲j̲arāt. In the east, the area of Awadh and Tirhut became the centre of the independent power of D̲j̲awnpur under the eunuch Malik Sarwar (D̲j̲awnpur appears to have become formally independent of Dihlī in 803/1400). K͟hāndes͟h in the valley of the Tāptī, Kālpī and Mahoba in eastern Rād̲j̲āsthān also became independent in the period immediately after Tīmūr's invasion.

Dihlī itself, a capital city without an empire, came in 817/1414 into the possession of the 'Sayyid' K͟hiḍr K͟hān, governor of Multān, Maḥmūd, the last of the Tug͟hluḳs, having died the previous year. He lay claim to a title no higher than Rāyāt-i Aʿlā and, according to the *Taʾrīk͟h-i Muḥammadī*, (B.M. Or. 137, folios 311b-312a) acknowledged the suzerainty of S͟hāh Ruk͟h, Tīmūr's son. K͟hiḍr K͟hān and his 'Sayyid' successors, Mubārak S͟hāh (824-37/1421-34) and Muḥammad b. Farīd (837-49/1434-45) were obliged to play the part of provincial rulers, struggling with the Rāys of Katehar, Etāwā, Čandwar, Bayānā, Gwāliyār for the acknowledgment of suzerainty by the payment of tribute. The possession of Dihlī and its historic claims was worth so little at this time that in 855/1451 the last of the Sayyids, ʿAlāʾ al-Dīn ʿĀlam S͟hāh, peacefully relinquished Dihlī to the Lōdī Afg͟hān, Bahlūl, contenting himself until his death in 883/1478 with possession of the district of Badāʾūn, a possession which, illustrative of the particularist outlook of the time, Bahlūl was equally prepared peacefully to allow.

There are now extant no records strictly contemporary with the Lōdī period of the sultanate; moreover some authors in Mug͟hal times tend to romanticize the Lōdīs under the influence of pro-Afg͟hān sentiment. It is incontrovertible that considerable Afg͟hān immigration into India occurred (it is said with the deliberate encouragement of Bahlūl) and that during Bahlūl's reign (855-94/1451-89), the Loḥānis, the Sūrs, the Sarwānīs, the Niyāzīs and the Karranīs come into prominence as settlers in India.

Bahlūl Lōdī was the grandson of Malik Bahrām who had migrated to Multān during the reign of Fīrūz S͟hāh Tug͟hluḳ. Bahlūl succeeded his uncle Malik Sulṭān S͟hāh as governor of Sirhind and acquired Lahore becoming *K͟hān-i K͟hānān* under Muḥammad b. Farīd. He was invited to take over at Dihlī by Ḥamīd K͟hān, the *wazīr* of ʿAlāʾ al-Dīn ʿĀlam S͟hāh. Bahlūl succeeded in widening the area of Dihlī's influence. He pacified the Dōʾāb, reduced Etāwā, Čandwar and Rewārī and, in 856/1452, defeated an attempt by sultan Maḥmūd S͟harḳī of D̲j̲awnpur to seize Dihlī itself. Another attempt by sultan Ḥusayn S͟hāh in 880/1475 was also defeated. Desultory warfare between Dihlī and D̲j̲awnpur continued until, in 884/1479 Bahlūl succeeded in occupying D̲j̲awnpur itself and seating his son Bārbak S͟hāh on the throne. Much of Bahlūl's success is attributed to his dexterous handling of his Afg͟hān *amīr*s; he is reputed to have avoided any extreme assertion of the authority of the sultanate and to have limited his demands upon his *d̲j̲āgīrdār*s to military service.

Bahlūl's third son, Niẓām Khān (Sikandar Lōdī), was preferred as successor by the Afghān chiefs. Sikandar completed the incorporation of Djawnpur into the Dihlī kingdom, deposing Bārbak Shāh, and campaigned in Bihār where the fugitive Ḥusayn Shāh had taken refuge. In order to control the Etāwā, Koyl, Gwāliyār and Dholpur areas more effectively, he founded Āgra in 910/1504, but the latter years of his reign (894-923/1489-1517) saw incessant military activity in this region.

His successor, Ibrāhīm (923-32/1517-26), was soon faced by a Loḥānī and Farmūlī revolt under the nominal leadership of Djāl Khān, a younger brother, in Djawnpur and Bihār where the tradition of independence of Dihlī at that time was still strong. Although Ibrāhīm enjoyed some successes, Dawlat Khān, governor of the Pandjāb appealed to the Mughal Bābur at Kābul to intervene in Hindūstān, as also did ʿĀlam Khān, Ibrāhīm's uncle who claimed Dihlī for himself. Bābur, proving more adept at using them than they at using him, marched on Dihlī to defeat and kill Ibrāhīm Lodī at Pānīpat in Radjab 932/April 1526. But this victory merely established Bābur as one of the serious contenders for empire in Hindūstān. The Afghāns melted into the countryside or withdrew into Bihār out of Bābur's immediate reach, waiting on events and by no means reconciled to Mughal supremacy.

The Afghān sultanate of Dihlī was temporarily restored by Shīr Shāh Sūr and his son Islām Shāh. Farīd Khān's (Shīr Shāh's) grandfather had migrated to Hindūstān during the reign of Bahlūl Lōdī; his father Miyān Ḥasan Khān receiving under Sikandar Lōdī the *parganas* of Sahsarām, Ḥādjīpur and Kharpur Tānda near Banāras in *djāgīr* for the maintenance of 500 horsemen. Shīr Shāh, who was born about 1472 (see P. Saran, *The date and place of Sher Shāh's birth*, in *Journal of the Bihar and Orissa Research Society*, xx, 1934, 108-22, and Ishwari Prasad, *Life and times of Humayun*, Calcutta 1955, 96 *fn.*) was given the management of his father's *parganas* about 917/1511. Losing them to his half-brother Sulaymān, in 933/1527 he took service with Bābur only to leave him the following year to place himself under Bahar Khān Loḥānī who had set himself up as Sultan Muḥammad Shāh in southern Bihār. In 936/1529, after Muḥammad Shāh's death, Shīr Khān ruled in co-operation with Dudū, the mother of the boy successor Djalāl Khān. Shīr Khān temporarily lost his position in Bihār to the Lōdī claimant Maḥmūd b. Sikandar Lōdī. His rivals were however discomfited by the Mughal Humāyūn at the battle of Dawra 937/1531, with the help of Shīr Khān's neutrality. His spirited defence of Čunār rallied the Afghāns of Bihār around him and he consolidated his position in Bihār by defeating an invasion by the forces of the Bengal ruler Maḥmūd Shāh at Suradjgarh in 940/1534. Counter-attacking, by Dhu 'l-Ḳaʿda 944/April 1538, the sultanate of Bengal was at his feet with the occupation of the capital Gawṛ.

Alarmed at the rise of Shīr Khān, Humāyūn moved eastward from Āgra in Ṣafar 944/July 1537 only to waste six months besieging Čunār. Losing an opportunity to secure Shīr Khān's submission as a tributary, Humāyūn marched on to Bengal only to meet defeat at Čawnsa in Ṣafar 946/June 1539. He was again defeated near Kanawdj in Muḥarram 947/May 1540 and forced to flee to Lahore and then via Multān to Sind from whence he eventually made his way to Ḳazwīn.

Shīr Shāh secured his position in the west by occupying the Pandjāb, founding a stronghold, Rohtās, near Balināth; Multān was also occupied in 950/1543. Shīr Shāh took up Dihlī's perennial struggle with the Rādjpūts with the capture of Rāysen in 950/1543 and campaigns against Mārwār in 950-1/1544. He was killed while besieging Kālindjar in Rabīʿ I 952/May 1545.

His successor, Islām Shāh Sūr (952-60/1545-53), the younger son of Shīr Shāh, though far from adroit in handling the Afghān chiefs, managed to hold Shīr Shāh's dominions together until his death. He is criticized by later Afghān writers for attempting to curb the powers of the *djāgīrdārs*.

On his death the throne was seized by Mubāriz Khān, a nephew of Shīr Shāh who took the title of Muḥammad ʿĀdil Shāh. This was the signal for the collapse of any unifying authority in the area of the Dihlī sultanate. Tādj Khān Karranī in Gwāliyār, Ibrahīm Khān Sūr, Aḥmad Khān Sūr in Lahore and Muḥammad Khān Sūr in Bengal threw off their allegiance. Upon this scene of political confusion Humāyūn re-entered in 962/1555, occupying Lahore in Rabīʿ II 962/February 1555, defeating the Afghāns at Sirhind in Shaʿbān 962/June 1555 and entering Dihlī the following month. It was not however until after Humāyūn's death (Rabīʿ I 963/January 1556) that the Mughal victory at Pānīpat over Hemū, the Hindū general of Muḥammad ʿĀdil Shāh, guaranteed that the Mughals would not be expelled from India again.

Under Akbar, the Dihlī sultanate merged imperceptibly into the Mughal empire, distinguished from that empire less by the character of its institutions (for Akbar built more upon Khaldjī and Tughluḳ foundations than his panegyrists acknowledge) than by the narrower extent of its authority, its failure to guard the north-west marches and its failure to hold Rādjāsthān for any appreciable period.

Despite the rhetoric of Muslim historians of the period and the undoubted achievements of the Khaldjīs and the early Tughluḳs, the Dihlī sultanate made no violent break with the later Rādjpūt political tradition that rulers in Hindūstān sought paramountcy rather than sovereignty, that is, acknowledgment of their superior rights in the spheres of military service and revenue enjoyment rather than a general control over the people at large. This is hardly surprising when it is remembered that at no time did the Turks and the Afghāns succeed in reducing the Hindū chiefs to disarmed impotence. The panegyrics of Muslim historians require correction by the inscriptional evidence cited, for example, in H. C. Ray, *The dynastic history of Northern India*, i, Calcutta 1931, 544-7, 565; ii, Calcutta 1936, 729-35, 908, 1096-1103, 1132-4, 1190-5 (see also *Cambridge History of India*, iii, *Turks and Afghans*, Chapter xx), which shows clearly that the Rādjpūt clans remained politically active away from the principal centres of Turkish military occupation; the emergence of the Hindū chiefs into prominence in the 9th/15th century is explicable only on the basis that they had been there all the time, concealed from view by the earlier Muslim historians. It is important to recall that except for a short period under the Khaldjīs and Tughluḳs, Rādjāsthān was generally independent of Dihlī. Moreover the Ghūrid conquest of Hindūstān was undertaken by a military *élite* of Turks, Khaldjīs and Afghāns, accustomed at home to a predatory relationship with the economically productive sections of the population but leaving them a large measure of autonomy in law and custom. Although

there was a large and continuing (though imperfectly documented) migration of Muslims to India during the sultanate period, it was largely a movement of professional classes and did not involve economic and social displacement of the mass of the Hindū population. The bulk of the Muslim 'working' population consisted of converts made in the group or the products of intermarriage and concubinage. Neither their own political traditions nor their political necessities would suggest more than the minimum interference, political and administrative, by the Muslim conquerors with the principal unit of Indian social life, the village community. (It is probable that the Muslim *djāgīrdārī* contingents living in the villages near the larger towns had some social and cultural impact upon the local population).

The relations of the Dihlī sultanate with the Hindū population were dominated usually by considerations of policy rather than of religion. Hindū chiefs were acceptable as tributaries and Hindū cultivators as tax-payers. Hindū clerical assistance in leyying the land revenue and Hindū bankers' services in providing sultans with ready cash were indispensable. The description of the place of the Rādjpūts at Muḥammad b. Tughluḳ's court by Ibn Baṭṭūṭa, following upon Khaldjī marriages with Rādjpūt families, suggests that Akbar's policy of conciliating the Rādjpūts was not without precedent in the sultanate period. It cannot be regarded as established, without question, that the sultans of Dihlī normally levied *djizya* as a discriminatory tax on non-Muslims as such. It is suggested that many statements in Indo-Muslim historians to that effect may be discounted as attempts to depict, for the comfort and edification of the pious, an ideal Muslim ruler. Moreover, where the terms *kharādj* and *djizya* are found together, it is suggested that they are being used as conventional legal terms, with emotive intent, for what was in fact the tribute or land revenue customarily paid to a paramount power. In support of this latter hypothesis, it may be noted that in his *Fatāwa-yi Djahāndārī*, Ḍiyā' al-Dīn Baranī speaks of Hindū Rāys taking *kharādj* and *djizya* from Hindū *mushrik*s and *kāfir*s (India Office Library MS. 1149, f. 119a). However, for a contrary (and indeed the more usual) view of this very controversial question, see, *e.g.*, Ishwari Prasad, *History of mediaeval India*, 475-6; A. L. Srivastava, *The sultanate of Delhi*, Agra 1950, 443-5; and *The advanced history of India*, index, *s.v. jizya*, 1051.

The Muslim ruling *élite* was ethnically heterogeneous. Turks from the steppe, Afghāns and Khaldjīs were dominant until Balban's time, but Hindū converts soon made their appearance in important offices (see P. Saran, *Politics and personalities in the reign of Nasir-uddin Mahmud, the Slave*, in *Studies in medieval Indian history*, Delhi 1952) and later, under the Khaldjīs and Tughluḳs, sometimes played a dominant rôle (*e.g.*, Malik Kāfūr, Khusraw Khān Barwārī and Khān-i Djāhān Maḳbūl, *wazīr* of Fīrūz Shāh Tughluḳ). Muḥammad b. Tughluḳ was reported to have encouraged Muslims to come to India to take service under him. As in Mughal times, the Indian-born Muslim of Hindū stock did not enjoy the same prestige as did descendants of the original conquerors or Muslim immigrants. Although Ḳuṭb al-Dīn Aybak, Iletmish and Balban, their principal commanders and *muḳṭa'*s, and the Khaldjī favourites Malik Kāfūr and Khusraw Khān, began as slaves in the royal household, the position of slaves in administration and war under Dihlī followed the Ghaznawid and Sāmānid precedents. Slavery was not the only or indeed the principal road to power; slaves formed merely one source of recruitment to the ruling *élite*.

The headquarters administration of the Dihlī sultanate followed familiar Sāmānid and Ghaznawid lines. The *wakīl-i dār* and the *amīr-i ḥādjib* were to be found managing the sultan's household and regulating access to him; the *wazīr*, the *'āriḍ-i mamālik*, the *barīd-i mamālik* and the *ḳāḍī al-mamālik* appear to have exercised broadly the same functions as under the Sāmānids and Ghaznawids.

The administrative, the military and the salary *iḳṭā'āt* (cf. A. K. S. Lambton, *Landlord and Peasant in Persia*, London 1953, 61-64), are clearly discernible under the Dihlī sultanate. The provincial governor, in the period from Balban to Fīrūz Shāh Tughluḳ, *wālī* or *muḳṭa'* was an official, transferable at will, commanding the local military forces and paid personally by the grant of a revenue assignment or by a percentage of the provincial revenues. He was supposed to remit the revenue, surplus to local expenditure, to headquarters, where a record was kept of the numbers of the provincial contingents and the anticipated revenue. This system broke down after the Tughluḳs when the distinction between the administrative and the military *iḳṭā'* became blurred, governors became semi-independent tributaries with their own private armies, and the process of revenue audit also became spasmodic. The military assignment, or grant of the revenue from villages for the recruitment and upkeep of a body of cavalry, is reported to have existed under Balban; 'Alā' al-Dīn Khaldjī is said to have resumed many such assignments and to have paid his soldiers in cash. An Arabic source (*Masālik al-abṣār fī mamālik al-amṣār* of Shihāb al-Dīn al-'Umarī, trans. Otto Spies *etc.*, *Muslim University Journal*, Aligarh, March, 1943, 28-9) written in Egypt during the reign of Muḥammad b. Tughluḳ states that the troops of the Dihlī sultan were paid in cash from the *dīwān*. The encomiast 'Afīf clearly indicates that during the time of Fīrūz Shāh Tughluḳ the military assignment was common, though there are passages which suggest that the assignee was not always allowed the personal management of his assignment. In the 'Sayyid' and Lōdī periods payment of troops by the grant of *djāgīrs* or assignments, which the *djagīrdār* managed himself and over which the sultan's *dīwān* exercised minimal supervision, was usual. It is clear that there was throughout the sultanate period a tension between the sultan, like 'Alā' al-Dīn Khaldjī, with a preference for an extension of the *khāliṣa* land, or area under direct revenue administration from which the troops could be paid in cash, and the Muslim military class with a preference for assignments which they managed themselves. Neither the sultan nor the military class ever wholly succeeded in obtaining their wishes throughout the whole area of the sultanate. Probably 'Alā' al-Dīn Khaldjī succeeded more in managing the assigned areas than in abolishing all such grants of revenue. The accounts of Shīr Shāh give a vivid picture of the opportunities open to a *djāgīrdār* or military assignee in the Afghān period to become the *de facto* ruler of the area of the *djāgīr* and aspire to a provincial sultanate or even to the throne of Dihlī itself. Shīr Shāh did not himself, as sultan, abolish *djāgīrdār*s but set a limit to their influence by maintaining a large army recruited by himself and financed by a more extensive *khāliṣa* area.

Evidence on the sub-organization of a province

(*iḳṭāʿ* or *wilāyat*)—which in any event denoted that area around the principal town which the *wālī* or *muḳṭaʿ* could control rather than a clearly defined administrative area—is scanty. There are references to *shiḳḳdārs* in the time of Muḥammad b. Tughluḳ and *fawdjdārs* rather later; these probably represented military commands subordinate to the *wālī* or *muḳṭaʿ* rather than regular heads of a definite administrative subdistrict. Shīr Shāh is said however to have appointed *shiḳḳdār-i shiḳḳdārān* to the unit known as the *sarkār* under the Mughals. The existence of the *pargana* or *ḳaṣaba* as a revenue district of a number of villages is well attested. Shīr Shāh is said to have appointed a *shiḳḳdār* and an *amīn* to each *pargana* to control the police and the revenue aspects of its work respectively. Below the *pargana* was the village community with which the Muslim official dealt through its *muḳaddam* or headman and *paṭwārī* or village accountant. In the 9th/15th century *shiḳḳ* is sometimes used to denote a province — a sign perhaps of the smaller political scale of that period.

In the collection of the land revenue, the Dihlī sultanate, its revenue officers and assignees, did not depart seriously from the principles and practices of the pre-Muslim period—of demanding a proportion of the gross produce of the soil assessed either by sharing the harvest (*ḥukm-i ḥāṣil*), by estimating its probable yield (*ḥukm-i mushāhada*) or by measurement of the area under cultivation and assessment according to a standard rate of demand per unit area according to the crop sown (*ḥukm-i misāḥat*). For the best account of the known changes and permutations in the sultanate period, see W. H. Moreland, *The agrarian system of Moslem India*, Cambridge 1929; see also ḌARĪBA, 6(a).

DIHLĪ SULTANATE, ART. With the exception of the coinage [see SIKKA] and a very few ceramic fragments (a few described in J. Ph. Vogel, *Catalogue of the Dehli museum of archaeology*, Calcutta 1908; for the pottery fragments of the ʿĀdilābād excavations see H. Waddington, in *Ancient India*, i, 60-76), the only body of material for the study of the art of the Dihlī sultanate is monumental. Most of the monuments are in Dihlī itself and are described s.v. DIHLĪ. The remainder are mostly described under the appropriate topographical headings, and are listed here in more or less chronological order.

The first major undertaking outside Dihlī was at Adjmēr [*q.v.*], where Ḳuṭb al-Dīn Aybak built the mosque, known as Aṛhāʾī din kā djhōmpṛā ("Hut of two-and-a-half days"), at about the same time as the Masdjid Ḳuwwat al-Islām at Dihlī, to which Iletmish added a *maḳṣūra* screen as he had done to the Dihlī example. Other buildings attributed to Iletmish include a large masonry tank, the Ḥawḍ-i Shamsī, and an *ʿidgāh* and mosque at Badāʾūn [*q.v.*]; for the last, one of the largest mosques in India, see J. F. Blakiston, *The Jami Masjid at Badaun and other buildings in the United Provinces* (= *Memoir ASI*, xix), Calcutta 1926, and Cunningham, *ASI*, xi, 1880. In Nagawr [*q.v.*] is a fine gateway, the Atarkin kā darwāza, c. 627/1230, and at Bayānā, about 80 km. south-west of Āgra, is a mosque made out of temple spoil with corbelled arches similar to those of the Dihlī mosque; known as the Ukhā mandir, it was later reconverted to temple use. Of the time of Balban is a *minār* at Koyl (see ʿALĪGAṚH), demolished in 1862, described in *ʿAligarh Gazetteer*, v, 218.

Noteworthy buildings of the Khaldjī dynasty include the bridge over the Gambērī river at Čitawr built by ʿAlāʾ al-Dīn in c. 703/1303, and the Ukhā masdjid of Ḳuṭb al-Dīn Mubārak (716-20/1316-20) at Bayānā, with colonnades of temple pillars but typical Khaldjī arches with their "spear-head" fringe.

Ghiyāth al-Dīn Tughluḳ's buildings after his accession were confined to Dihlī; for his previous buildings see MULTĀN. His son, Muḥammad b. Tughluḳ, carried the Dihlī craftsmen south to Dawlatābād [*q.v.*], whence the Dihlī style spread to the Deccan (see BAHMANIS, monuments). Fīrūz Shāh Tughluḳ was responsible for the early buildings of the towns of Djawnpur, Fatḥābād, Ḥiṣār and Lalitpur [*qq.v.*], and the last Tughluḳ, Maḥmūd Shāh, for the Djāmiʿ masdjid at Irič [*q.v.*], the arches of which anticipate the recession of planes characteristic of the Lōdīs (there is not general agreement about the date of this building; the interpretation of Blakiston, *op. cit.*, seems the most plausible).

The Lōdī dynasty's buildings outside Dihlī are mainly at Āgra, Kālpī, Lalitpur, and Hansī, [*qq.v.*], to which must be added the fine tomb of Muḥammad Ghawth at Gwāliyar [*q.v.*], of c. 972/1564, which is Lōdī in spirit if not in date. The Čawrāsī Gumbad at Kālpī is said to be the mausoleum of one of the Lōdī sultans, who is not further identified (cf. Blakiston, *op. cit.*).

For the buildings of the Sūrī dynasty see especially RŌHTĀS, RŌHTĀSGAṚH, SAHSARĀM, and the bibliography to BIHĀR.

See also HIND, Architecture.

(J. Burton-Page)

DIḤYA (or Daḥya) b. Khalīfa al-Kalbī, Companion of the Prophet and a somewhat mysterious character. He is traditionally represented as a rich merchant of such outstanding beauty that the Angel Gabriel took his features; and, when he arrived at Medina, all the women (*muʿṣir*, see *LA*, root. ʿṣr) came out to see him (Ḳurʾān, LXII, 11, may be an allusion to this occurrence). There is no reason to accept the suggestion put forward by Lammens (*EI*[1], *s.v.*) of some commercial connexion with Muḥammad; we only know that a sudden death put

a stop to a projected marriage between a niece of Diḥya and the Prophet, that the latter died just as he was about to marry a sister of the Kalbī and that Diḥya, to whom Ṣafiyya [*q.v.*] had been allotted after the capture of Khaybar, had to renounce her, to receive instead a cousin of the young captive.

After being present, if not at Uḥud, at least at the Khandaḳ, Diḥya commanded a small detachment at the battle of the Yarmūk, but it was his "diplomatic" activities in particular which have been pointed out. As a Kalbī he was bound to have an intimate knowledge of the districts along the Syrian *limes*, and his business allowed him to move freely everywhere without arousing suspicion; for this reason, he was probably used as a secret agent. Tradition however simply reports that, in 6 or 7, he was given the task of conveying to Heraclius a message from the Prophet inviting him to be converted to Islam, and that on his return the caravan was plundered by the Djudhām, against whom Muḥammad was compelled to send Zayd b. Ḥāritha. Several orientalists have noted legendary characteristics in the account of these events and have called into question the authenticity of the letter addressed to Heraclius; M. Hamidullah has recently applied himself to the task of refuting their arguments and even of finding evidence concerning the fate of the original document which may still be in existence (see *Arabica*, 1955/i, 97-110).

After the conquest of Syria, it is surprising that Diḥya should disappear from the scene; one source makes him withdraw to Egypt, but most biographers state that he settled in Damascus (al-Mizza = Mezzé), where he died in the caliphate of Muʿāwiya, in about 50/670.

(H. LAMMENS-[CH. PELLAT])

DĪK, the cock. The word is perhaps of non-Semitic origin. No cognate synonyms seem to exist in the other Semitic languages, except in modern South Arabian (Leslau, *Lexique soqotri*, 1938, 126).

The cock is mentioned quite often in ancient Arabic poems and proverbs and in the *ḥadīth*. In zoological writings it is described as the most sensual and conceited of birds. It is of feeble intelligence, as it cannot find its way to the hen-house when it falls from a wall. Yet it possesses a number of laudable properties: it is courageous and enduring, bold and clever in fighting other cocks and in defending its hens. The numerous hens with which it mates at the same time are treated by it impartially; it apportions to them grains even when hungry itself, its generosity having become proverbial. The best cocks (for eating) are those which do not crow yet. For fecundation a cock of two years should be chosen. Its vigour is recognizable by a round comb, a short mandible, a black pupil of the eye, etc. A good fighting cock is distinguished by its red comb, its thick neck, etc.

The cock lays one small egg in its whole life-time, the cock's egg (*bayḍatu 'l-ʿuḳr*). Its testicles are big; they are tasty and easy to digest. Castrated cocks yield meat fatter and tastier than that of any other animal; yet the Prophet, according to a *ḥadīth*, forbade their castration. When castrated their comb and 'beard' wither. Several kinds of *dīk* with various epithets (*hindī, nabaṭī, zandjī* etc.) are mentioned in the sources. According to Nuwayrī, the *dīk* in a town of Sind reaches the size of an ostrich.

It is one of the most remarkable characteristics of the cock that it apportions its crowing correctly to the different hours of the night, whether the night is 9 or 15 hours long. People are delighted by its crowing; the sick, when hearing it, feel alleviation of their pains, and even God, according to a *ḥadīth*, likes its voice. The Prophet was fond of white cocks and used to keep one in his house.

There is an angel in the form of a gigantic cock in Paradise, immediately below the throne of Allāh; by his crowing, which is repeated by all the cocks in the world, he announces the hours of prayer (M. Asín Palacios, *La escatologia musulmana en la Divina Comedia*, 2nd ed., Madrid and Granada 1943, 50 ff.; E. Cerulli, *Il "Libro della Scala"*, Vatican City 1949, 98 ff. (§ 69) and plate 4 (opp. 49); R. Ettinghausen, in *Convegno di Scienze Morali Storiche e Filologiche* (XII Convegno "Volta", Rome 1957, 362 f.; J. Berque, *Les Arabes*, Paris 1959, 17.). The Barghawāṭa [*q.v.*] determined the times of their prayers by the call of the cock, and did not eat him (al-Bakrī, ed. de Slane, 139 f.).

Although the *dīk* is the male of the *dadjādja* [*q.v.*] it is treated in most of the sources under a separate heading. Its medicinal properties, however, are mentioned by Ibn al-Bayṭār and Dāwūd al-Anṭākī in the chapters of *dadjādj*. Mainly its flesh and a gravy soup prepared therefrom, its bile, brain, comb and blood were put to medicinal use.

Djāḥiẓ, who mentions quite often a dispute between *ṣāḥib al-dīk* and *ṣāḥib al-kalb*, seems to quote from an anonymous work belonging to that kind of literature which has been treated by Steinschneider in his *Rangstreit-Literatur* (*SBAk. Wien, phil.-hist. Kl.*, 155, Abh. 4, 1908).

DĪK AL-DJINN AL-ḤIMṢĪ, surname of the Syrian Arabic poet ʿAbd al-Salām b. Raghbān b.

ʿAbd al-Salām b. Ḥabīb b. ʿAbd Allāh b. Raghbān b. Yazīd b. Tamīm. This latter had embraced Islam at Muʾta [*q.v.*] under the auspices of Ḥabīb b. Maslama al-Fihrī [*q.v.*], whose *mawlā* he became. The great-grandfather of the poet, Ḥabīb, who was head of the *dīwān* of salaries under al-Manṣūr, gave his name to a mosque at Baghdād, masdjid Ibn Raghbān (al-Djāḥiẓ, *Bukhalāʾ*, ed. Ḥādjirī 327, trans. Pellat, index; al-Djahshiyārī, 102; Le Strange, *Baghdad*, 95). Dīk al-Djinn, born at Ḥimṣ in 161/777-8, died under the caliphate of al-Mutawakkil, in 235 or 236/849-51, without ever having left Syria. He is said to have had a frivolous and happy-go-lucky disposition. A moderate Shīʿī, as the elegies on al-Ḥusayn b. ʿAlī b. Abī Ṭālib prove, he was associated particularly with Aḥmad b. ʿAlī al-Hāshimī and his brother Djaʿfar, to both of whom he addressed panegyrics. He also composed epigrams and erotic poems in the taste of the times. Arab critics do not recognize any superior talent in him, although his work has largely spread beyond the bounds of his native land. The Ḳayrawānīs of the 5th/11th century however have not failed to extract therefrom a particularly obscure and complicated verse (Ibn Rashīḳ, *ʿUmda*, i, 147; Ibn Sharaf, ed. and tr. Pellat, 85; A. Benhamouda, in *Bull. des Ét. Ar.*, March-April 1949, 65). The few fragments which have come down to us are of interest only since the poet upholds the equality of the rights of his compatriots, the Arabized Syrians, with those of the true Arabs, and since he seizes the opportunity to write on the conflicts between the Northern and Southern Arabs.

Bibliography: in addition to the references in the text: *Aghānī*[1], xii, 142-9 (= Beirut ed., xiv, 49-65); Ibn Khallikān, no. 394, tr. de Slane, ii, 133); Thaʿālibī, *Yatīma*, i, 66, 172; Goldziher, *Muh. St.*, i, 156; Brockelmann, S I, 137.

(A. Schaade-[Ch. Pellat])

DIKKA, or *dikkat al-muballigh*. During the prayer on Fridays (or feast-days) in the mosque, a participant with a loud voice is charged with the function of *muballigh*. While saying his prayer he has to repeat aloud certain invocations to the imām, for all to hear. In mosques of any importance he stands on a *dikka*. This is the name given a platform usually standing on columns two to three metres high, situated in the covered part of the mosque between the *miḥrāb* and the court. In Cairo numerous undated platforms are to be found. The oldest dated inscription, with the word *d-k-t*, dates back to Sulṭān Ḳāytbāy (end of the 9th/15th century). Mosques of the Ottoman period have their *dikka* in the form of a rostrum against the wall opposite the *miḥrāb*. Nowadays, a microphone is used to amplify the *muballigh*'s voice.

The *dikka* should not be confused with the *kursī al-sūra*, the place where the ritual reader of the Ḳurʾān sits cross-legged. The term *dikka* is also used to describe a kind of wooden bench of secular usage.

(J. Jomier)

DILĀWAR KHĀN, founder of the kingdom of Mālwa [*q.v.*], whose real name was Ḥasan (Firishta, Nawalkishore ed., ii, 234); or Ḥusayn (Firishta, Briggs's tr., iv, 170; so also Yazdani, *op. cit.* below); or ʿAmīd Shāh Dāwūd (*Tūzuk-i Djahāngīrī*, tr. Rogers and Beveridge, ii, 407, based on the inscriptions of the Djāmiʿ masdjid (= Lāt masdjid) in Dhār, cf. Zafar Hasan, *Inscriptions of Dhār and Māndū*, in *EIM*, 1909-10, 11-2 and Plates III and IV). He was believed to be a lineal descendant of Muʿizz al-Dīn Muḥammad b. Sām, Shihāb al-Dīn Ghūrī, and this belief is reflected in the dynastic name Ghūrī usually given to himself and his descendants. During the reign of Fīrūz Tughluḳ a title had been granted to him and a *manṣab* conferred on him. From an inscription on a gravestone discovered in the enclosure of the shrine of *shaykh* Kamāl al-Dīn Mālwī at Dhār it is established that in 795/1392-3 Dilāwar Khān was the governor of Mālwa. The date of his assumption of the pseudonym of Dilāwar Khān is not known precisely, but most probably this was the title conferred on him by Fīrūz Shāh Tughluḳ, whose son Muḥammad Shāh had appointed him as the *ṣūbadār* of Mālwa (the inscription referred to curiously mentions the name of the regnant sovereign as Maḥmūd Shāh).

Dilāwar Khān unhesitatingly offered protection and refuge to the runaway Tughluḳ monarch Nāṣir al-Dīn Maḥmūd Shāh when Tīmūr attacked India in 801/1398. His devotion and loyalty to this ill-starred monarch, however, incurred the resentment of his ambitious son Alp Khān (later Hūshang Ghūrī [*q.v.*]) who disapproved of his father's homage to his fugitive overlord and removed himself to Māndū [*q.v.*] where he put in order and consolidated the fortress-buildings. On the departure of Maḥmūd Tughluḳ for Dihlī in 804/1401 Dilāwar Khān, who had since 795/1392 ceased to send to Dihlī the balance of the revenue collections, proclaimed his independence, much instigated by his son Alp Khān (cf. Briggs, *Ferishta*, iv, 169). Dilāwar Khān did not, however, live long to enjoy the fruits of freedom, and died suddenly in 808/1405; his sudden death gave rise to a suspicion, shared by some of the high-ranking army commanders, that he had been poisoned by his ambitious son, and Muẓaffar Shāh I, ruler of the neighbouring kingdom of Gudjarāt, long had the same impression and ultimately made the desire to avenge his old friend and sworn brother-in-arms the reason for his attack on Mālwa.

Djahāngīr's record (*Tūzuk-i Djahāngīrī*, Lahore ed., 431) of the year of construction of the Djāmiʿ masdjid at Dhār as *hasht ṣad wa haftād* (870) is apparently a misreading of the line in the inscription on the east gate referred to above, since Dilāwar Khān had died in 808/1405; the inscription on the north entrance (*EIM*, 1909-10, 12 and Pl. IV) gives the date of its construction as Radjab of *sabʿ wa thamāni miʾa* (807). Other buildings of Dilāwar Khān are the mosque which bears his name at Māndū (insc. of 808/1405, *EIM*, 1909-10, 20-1 and Pl. XII/1) and the Tārāpur gate of that fort (Ins. of 809/1406, ibid., 19 and Pl. VII/2); the latter inscription, though attributing its erection to Dilāwar Khān, is presumably a reference to the date of its completion after his death.

(A. S. Bazmee Ansari)

DILĀWAR PASHA (?-1031/1622), Ottoman Grand Vizier, was of Croat origin. He rose in the Palace service to the rank of Čāshnigīr Bashī,

becoming thereafter Beglerbeg of Cyprus and then, in Dhu 'l-Ḥidjdja 1022/January 1614, Beglerbeg of Baghdād. As Beglerbeg of Diyārbekir—an appointment bestowed on him in 1024/1615—he shared in the Erivān campaign of 1025/1616 against the Ṣafawids of Persia. His subsequent career until 1030/1621 is somewhat obscure. The Ottoman chronicles (cf. Pečewī, ii, 366; Ḥādjdjī Khalīfa, i, 392; Naʿīmā, ii, 166) state that a certain Muṣṭafā Pasha, killed in action during the last hostilities of the Ottoman-Ṣafawid war (1024-7/1615-8), was Beglerbeg of Diyārbekir at the moment of his death in 1027/1618. A Venetian "relazione" of July 1620 mentions the removal of Dilāwar Pasha from the Beglerbeglik of Diyārbekir, the office being now given to the "Silidar del Re" (cf. Hammer-Purgstall, viii, 267). Dilāwar Pasha fought—once more as Beglerbeg of Diyārbekir (cf. Ḥādjdjī Khalīfa, i, 406; Naʿīmā, ii, 194)—in the Choczim (Ḥotin) campaign of 1030/1621 against the Poles. It was on 1 Dhu 'l-Ḳaʿda 1030/17 September 1621, in the course of this war, that Sultan ʿOthmān II (1027-31/1618-22) raised Dilāwar Pasha to the Grand Vizierate. His tenure of the office was destined to be brief. He lost his life on 8 Radjab 1031/19 May 1622 during the revolt of the Janissaries which led to the deposition and death of ʿOthmān II. Dilāwar Pasha built a large khān at Čār-Malik, between al-Ruhā' (Urfa) and Bīredjik, and another khān—not completed until the time of Sulṭān Murād IV (1032-49/1623-40)—at Sīdī Ghāzī (Seyyid Gâzî).

(V. J. Parry)

DİLSİZ, in Turkish tongueless, the name given to the deaf mutes employed in the inside service (*enderūn*) of the Ottoman palace, and for a while also at the Sublime Porte. They were also called by the Persian term *bīzabān*, with the same meaning. They were established in the palace from the time of Meḥemmed II to the end of the Sultanate. Information about their numbers varies. According to ʿAṭā', three to five of them were attached to each chamber (*Koghush*); Rycaut speaks of 'about forty'. A document of the time of Muṣṭafā II (d. 1115/1703), cited by Uzunçarşılı, dealing with the distribution of cloth to the palace staff, mentions one mute in the *ḥarem*, two mutes and a dwarf (*djüdje*) in the Privy Chamber (*Khāṣṣ oda*), a chief mute, chief dwarf, six mutes and two dwarfs in the Treasury Chamber (*Khazīne Koghushu*), a chief mute, chief dwarf, and ten mutes in the Campaign Chamber (*Seferli Koghushu*).

The mutes received pay and pensions, and had special uniforms and ceremonial dress. Their chiefs were called *bashdilsiz*—chief mute. Though deaf mutes from birth, they are said to have been men of intelligence, and to have had an elaborate sign language in which they communicated among themselves and received orders from their superiors. According to Bon, many of them could write 'and that very sensibly and well'. Their duties were to act as guards and attendants, and as messengers and emissaries, in highly confidential matters, including executions.

H. Uzunçarşılı, *Osmanlı Devletinin Saray Teşkilâtı*, Ankara 1945, 330; Pakalın, i, 237. There are descriptions and pictures of the deaf-mutes in a number of western accounts of the Ottoman court. (B. Lewis)

DIMASHḲ, Dimashḳ al-Shām or simply al-Shām, (Lat. Damascus, Fr. Damas) is the largest city of Syria. It is situated at longitude 36° 18′ east and latitude 33° 30′ north, very much at the same latitude as Baghdād and Fās, at an altitude of nearly 700 metres, on the edge of the desert at the foot of Djabal Ḳāsiyūn, one of the massifs of the eastern slopes of the Anti-Lebanon. To the east and the north-east the steppe extends as far as the Euphrates, while to the south it merges with Arabia.

A hundred or more kilometres from the Mediterranean behind the Lebanon and Anti-Lebanon, a double barrier of mountains which rise to 3,000 metres, the city, which is deprived by these of sea-winds and cloud, gives the impression already of belonging to the desert. The seasons are capricious, the winter short but severe with very occasional snowfalls. The rains which come in December, January and February, this last being a particularly wet month, are by no means abundant (in fact the city only has from 250 to 300 mm. as against 850 to 930 at Bayrūt [*q.v.*]. The spring, sudden and short, lasts for only a few weeks at the end of March and the beginning of April, followed by a relentless summer. From May to November there is absolute dryness, the daily temperature exceeds 35° centigrade in the shade and the glaring light accentuates

the shadow. At the end of November the first heavy showers wash the dust from the leaves; it is autumn. In this semi-desert type of climate vegetation sufficiently abundant and above all sufficiently lasting to support animals or man would scarcely be expected. But nature had fixed the site of Dimas̲h̲ḳ in advance. It was at the point where the Baradā [*q.v.*], the only perennial water-course of the region, emerges on to the plain after crossing the mountain-side and before losing itself in the desert. By means of an ingenious system of irrigation, man learned how to use this water, succeeded in wrenching from the desert a corner of ground which responded to his needs, and even made of it one of the richest agricultural regions of all "Hither Asia", the G̲h̲ūṭa [*q.v.*], which Muslim tradition likes to regard as one of the three earthly paradises (the others are Samarḳand and al-Ubulla; Ibn ʿAsākir, *Taʾrīk̲h̲*, 169). Thus with its situation between the desert and the mountains, its fertile soil and abundant water, it was able to support human habitation on a scale which from the dawn of time has caused it to be regarded as a metropolis.

Difficulties of communication between the town and the sea forced Dimas̲h̲ḳ to turn towards the interior. Protected on the west by the mountains, endowed with an excellent water supply, situated along the road which crosses Syria from north to south, and in the middle of a rich oasis, the city served as a market for the nomads and as a halt for the caravans which joined the Euphrates to the Nile; the incessant movement of men and goods was not unlike the activity of a great maritime port. Turned towards the desert, many times attacked but never destroyed, Dimas̲h̲ḳ offers us, against this unchanging background, evidence of a history of several thousands of years.

We have no precise knowledge of the epoch in which the city was founded. Nevertheless the excavations made in 1950 to the south-east of Dimas̲h̲ḳ at Tell al-Ṣāliḥiyya have disclosed an urban centre dating from the fourth millennium. When we compare the rudimentary equipment even of Bronze Age man with the complexity of the irrigation system, we can understand that the prosperity of this city in the middle of the second millennium must have been the result of a long and slow development.

Dimas̲h̲ḳ enters into history with the mention made of her in the Tell al-Amarna tablets. She is named as one of the towns conquered in the 15th century B.C. by the Pharaoh Thutmoses III who occupied Syria for a time.

In the 11th century B. C. Dimas̲h̲ḳ was the flourishing capital of the land of Aram referred to in the history of Abraham (Genesis, X, 22, XIV, 15); even to-day Muslims venerate the Masd̲j̲id Ibrāhīm at Berzé, to the north of Damascus, which according to tradition was the birthplace of Abraham. It seems that it was at this time that the Aramaeans introduced its grid-like plan with straight streets and rectangular intersections, similar to that which existed in the second millennium in Babylon and Assyria. The city owed the development of its canal system to the Aramaeans; we know from the Old Testament history of Naʿamān the Leper (II Kings, V) that the Abāna was already flowing alongside the Baradā before the 10th century B.C., while the Nahr Tawrā with its Aramaean name, which had been dug along the slopes of the Ḳāsiyūn, irrigated the region to the north and north-east of the city and played an important part in the agricultural economy of the oasis.

The town was conquered by David (II Kings, viii, 5-6) but in the century of Solomon, the king of Dimas̲h̲ḳ fought successfully the Assyrian kings to the north and the kings of Israel to the south. In 732 B.C. the Assyrian troops of Tiglatpilezer III put an end to the kingdom of Dimas̲h̲ḳ; they took the town and despoiled the temple and palace, part of whose furniture was rediscovered in 1930 in Upper Mesopotamia. For this period of the city's history, as for the successive occupations by the Assyrians in the 8th century, the Babylonians in the 7th century, the Achaemenids in the 6th century, the Greeks in the 4th century and the Romans in the 1st century B.C., see K. Wulzinger and C. Watzinger, *Damascus*, i, *Die Antike Stadt*, and the articles of J. Benzinger in *Pauly-Wissowa*, iv, 2042-8, Jalabert in the *Dictionnaire d'archéologie chrétienne et de liturgie* of Cabrol and Leclercq, art. *Damas*, iv, 1920, col. 119-46, R. Janin in the *Dictionnaire d'histoire et de géographie ecclésiastiques* of R. Aubert and E. van Cauwenbergh, xiv, 1957, col. 42-7.

The conquest of Alexander the Great in 333 B.C. is an important date, for Dimas̲h̲ḳ, lost to the Achaemenids, was now to come for several centuries, up to the time of the Arab conquest in 14/635, under western influence. Three stages can be distinguished in the Hellenistic period; first a Ptolemaic foundation in the 3rd century B.C., then the raising of the town to the rank of a capital by the Seleucid Antiochus IX of Cyzicus (111 B.C.), and finally the installation of a new Greek colony about the year 90 B.C. under Demetrius III. As a Seleucid capital Dimas̲h̲ḳ became important once again and began to be developed according to Hellenistic urban planning. At the side of the Aramaean town, where stood the temple which since the 9th century B.C. had dominated the development of the city, there arose a twin city, that of the Greeks, following a normal procedure when two cultures of quite different character are obliged to exist upon the same site. Elements of Hellenistic urban architecture appeared such as the street with side arcades, traces of which are to be found to the east of the Umayyad Mosque, or the agora of which we are reminded by the still-existent Zuḳāḳ al-Sāḥa, or the small blocks of houses with the standard size of 100 by 45 metres with the longer side orientated north-south.

In 85 B.C. the town fell for the first time into the hands of the Nabataeans who had come from Petra under the rule of Aretas III, the Philhellene. These fresh arrivals constructed a new quarter to the east of the Hellenistic city, which mediaeval Arab historians called al-Naybaṭūn. In addition, they made on the the slopes of the D̲j̲abal Ḳāsiyūn above the Nahr Tawrā a canal which was reconstructed under the Umayyads and then took the name of Nahr Yazīd.

In 64 B.C. Pompey proclaimed Syria a Roman province, but Dimas̲h̲ḳ was not its capital and the imperial legates installed themselves in Antioch. From 37 to 54 A.D., under Aretas IV Philopator, the Nabataeans became for a second time masters of Dimas̲h̲ḳ with the approval of Rome. It was at this period that Saul, the future St. Paul, came to visit the important Jewish colony of the city in order to seek out Christians and was himself converted to Christianity by Ananias whose chapel, excavated in 1921, is still preserved to-day. Under Hadrian (beginning of the 2nd century) Dimas̲h̲ḳ was given the rank of metropolis. Septimus Severus and Caracalla carried out many public works there and Alexander Severus set it up as a Roman colony after the year 222.

Rome brought internal peace and administrative order, which in their turn brought amazing prosperity to the town. The upward trend of its economy led to a considerable influx of population and goods and the city very soon became too small. The Romans therefore imposed a new urban plan and set about combining the original Aramaean town with the Hellenistic one to form a new city. The state occupied itself mainly with projects of general interest such as the city walls and additional canals to provide extra water.

Rectangular walls measuring 1500 by 750 metres were built on the right bank of the Baradā to protect the inhabitants against pillaging nomads. Strengthened by a *castrum* in the north-east corner, the entry took on the appearance of a vast quadrangle which could be entered by seven gates: to the east, the Eastern Gate (Bāb Sharḳī), to the south the Kaysān Gate and the Little Gate (Bāb al-Ṣaghīr), to the west the al-Djābiya Gate, and to the north the Gate of the Gardens (Bāb al-Farādīs), the Djīnīḳ Gate and the Thomas Gate (Bāb Tūmā). Important remains of these walls and gates are still visible to-day. The growth in the population necessitated the construction of an aqueduct, *al-Ḳanawāt*, to provide drinking water which functions up to the present time. New blocks of houses in the southern part of the rectangle settled the problem of finding homes for the newcomers. Two great colonnaded streets were new features of the urban picture. One of these important thoroughfares, 25 metres wide and with arcades on either side, joined Bāb Sharḳī to Bāb al-Djābiya, crossing the city from east to west and corresponding with the *decumanus* of Roman cities. This road, the present Sūḳ Midḥat Pasha, is still referred to by foreigners as the 'Street called Straight' from the allusion to it in Acts, IX, 11. In the middle we can still see to-day one of the three Roman arches which used to stand there, and in a little semi-circular *tell* on its south side, crossed obliquely by a small alleyway, is the site of the ancient theatre. The second colonnaded street was the ancient road joining the temple and the *agora*, which was now turned into a *forum*. The temple, which was dedicated to Jupiter of the Damascenes, the successor to Hadad, god of storms, was partially rebuilt and altered on several occasions, especially in the second and third centuries A.D. Part of the *peribolus* (enclosure), two of whose corner towers serve as bases for minarets, is to be found in the outer wall of the Great Mosque. The eastern propylaea are to be seen in the present day Djayrūn to the east of the Great Mosque, while the western propylaea, which are ornamented with a wide pediment, are visible at Bāb al-Barīd to the west of the sanctuary. Finally it is also known that the Circus, which perhaps replaced the Stadium, was situated on the site of the present Boulevard de Baghdād, north of a cemetery outside the Gate of the Gardens, where Roman sarcophagi have been found.

Medieval Arab nomenclature has preserved in other ways the memory of certain Roman districts such as al-Dīmās, corresponding with the ancient *demosion*, al-Fūrnaḳ which recalls the furnaces or pottery kilns, and again al-Fusḳār, which seems to show that at this end of the Street called Straight there once stood the *foscarion* where the *fusca* was made and sold.

Many of the ancient remains must have disappeared beneath the earth whose level has risen by more than four metres in some places since the Roman period, but the plan of the city as it was laid out at the beginning of the 3rd century A.D. was hardly altered up to the arrival of the Muslims. The Roman city, in fact, formed the skeleton of the mediaeval one.

The Romans were succeeded by the Byzantines. Syria became a part of the Eastern Empire after the death of Theodosius in 395. When Dimashḳ became the outpost of Byzantium, a new urban element, the church, appeared there. First of all the Temple of Jupiter was rebuilt and transformed into the cathedral which was dedicated to St. John the Baptist. The head of Yaḥyā b. Zakariyyā' is preserved in a crypt now situated in the Great Mosque and is venerated alike by Christians and Muslims. The present Orthodox Patriarchate stands on what was once the site of the Church of St. Mary.

The weakening of the Ghassānids and the Persian wars of the 6th century ruined the Syrian economy. In 612 the soldiers of Khusraw II occupied Dimashḳ, the majority of whose population was Jacobite Monophysite and hostile to the Melkite Byzantines. Well received, the Sāsānids did not ravage the town as they were to do later (614) in Jerusalem. In 627 on the death of the Persian monarch, the city was evacuated and the following year Heraclius returned to Syria.

The Muslim Conquest.—After first the dissolution of the Ghassānid Phylarchate and then the devastations of the Persians, the Arabs of the Ḥidjāz must have had no difficulty in conquering Syria. Each year Arab expeditions crossed the Byzantine frontier; in Djumāda I 13/July 634 Khālid b. al-Walīd's men crossed Palestine and then went up towards the north along the route of the Djawlān. The Byzantines offered some resistance to the north of al-Ṣanamayn in the Mardj al-Ṣuffar before turning back to Dimashḳ in Muḥarram 14/March 635. A few days later, the Muslims were at the gates of the city. Khālid b. al-Walīd established his general headquarters to the north-east of the town; an ancient tradition puts his camp near the existing tomb of Shaykh Raslān outside Bāb Tūmā. A blockade aimed at hindering a reunion of the Byzantine troops flung back into Dimashḳ with any army which might come to their aid from the north. The dislike of the population of Dimashḳ for Byzantine rule brought a group of notables, among them the bishop and the controller-general, Manṣūr b. Sardjūn, father of St. John of Damascus, to engage in negotiations to avoid useless suffering for the people of the city. In Radjab 14/September 635 the Eastern Gate was opened to the Muslims and the Byzantine troops retired to the north. There are several traditions concerning the capture of the city. The most widely spread is that of Ibn ʿAsākir (*Ta'rīkh*, i, 23-4) according to which Khālid b. al-Walīd forced his way through the Bāb Sharḳī, sword in hand, while Abū ʿUbayda b. al-Djarrāḥ entered by the Bāb al-Djābiya after having given them the *amān*, and the two generals met in the middle of the *Kanīsa*. Another version, that of al-Balādhurī (*Futūḥ*, 120-30), says that Khālid received the surrender of the city at Bāb Sharḳī and that Abū ʿUbayda entered by force of arms at Bāb al-Djābiya; the meeting of the two commanders is said to have been at al-Barīṣ, towards the middle of the Street called Straight near the church of al-Maḳsallāt (Ibn ʿAsākir, *Ta'rīkh*, i, 130). By demonstrating that Abū ʿUbayda was not in Syria in the year 14, Caetani has destroyed the validity of these traditions. Lammens (*MFOB*, iii, 255) has tried to save them

by proposing to substitute the name of Yazīd b. Sufyān for that of Abū ʿUbayda. In any case, Lammens has shown the unlikelihood of a division of the town, a legend which seems to have come into being only at the time of the Crusades.

The Muslims guaranteed the Christians possession of their land, houses and churches, but forced them to pay a heavy tribute and poll tax.

In the spring of 15/636, an army commanded by Theodorus, brother of Heraclius, made its way towards Dimashk. Khālid b. al-Walīd evacuated the place and reformed his troops at al-Djābiya before entrenching himself near the Yarmūk to the east of Tiberias. It was there that on 12 Radjab 15/20 August 636 the Byzantine army was put to flight by Khālid who, after this success, returned to Medina. This time the conquest of Syria and Dimashk was to be the work of Abū ʿUbayda b. al-Djarrāḥ. The town capitulated for the second time in Dhu 'l-Kaʿda 15/December 636, and was finally integrated into the dominion of Islam.

The fall of Dimashk was an event of incalculable importance. The conquest put an end to almost a thousand years of western supremacy; from that time on the city came again into the Semitic orbit and turned anew towards the desert and the east. Semitic by language and culture, Monophysite and hostile to the Greek-speaking Orthodox Church, the people of Dimashk received the conquerors with unreserved pleasure, for they felt nearer to them by race, language and religion than to the Byzantines, and, regarding Islam as no more than another dissident Christian sect, they hoped to find themselves more free under them. At Dimashk more than elsewhere circumstances seemed as if they ought to have favoured Arab assimilation to Greek culture but in fact Hellenization had not touched more than a minute fraction of the population who for the most part spoke Aramaic. While the administration continued to maintain Byzantine standards, religious controversies arose and contributed towards the formation of Muslim theology. Assimilation took place in the opposite direction so that the positive result of the conquest was the introduction of Islam, which within half a century succeeded in imposing Arabic, the language of the new religion, as the official tongue.

The Caliph ʿUmar nominated Yazīd b. Abī Sufyān [*q.v.*] as governor of the city. The more important of the conquerors installed themselves in houses abandoned by the Byzantines (Ibn ʿAsākir, *Taʾrīkh*, xiii, 133-44). The town had made a deep impression on the nomads who referred to it as the 'beauty spot of the world', but the lack of space and above all of pasturage led the Bedouins to camp at al-Djābiya. Dimashk very soon took on the character of a holy city, for traditions recognized here places made famous by the prophets, and pilgrimages began to increase. People went chiefly to the Djabal Kāsiyūn to visit Adam's cave, the Cave of the Blood where the murder of Abel was thought to have taken place, or the Cavern of Gabriel. At Berzé, Abraham's birthplace was honoured; the tomb of Moses (Mūsā b. ʿImrān) was regarded as being situated in what is now the district of Kadam. Jesus (ʿĪsā b. Maryam) was cited among the prophets who had honoured the town; he had stayed at Rabwa on the 'Quiet Hill' (Kurʾān, XXIII, 50) and would descend at the end of time on to the white minaret sometimes identified as that of Bāb Sharkī, sometimes as the eastern minaret (*maʾdhanat ʿĪsā*) of the Great Mosque, in order to fight the Antichrist.

The Umayyads.—In 18/639 Yazīd b. Abī Sufyān died of the plague; his brother, Muʿāwiya, succeeded him in command of the *djund* of Dimashk. In 36/656, after the death of ʿAlī, Muʿāwiya was elected Caliph and, leaving al-Djābiya, he fixed his residence in Dimashk. The Umayyads were to carry the fortunes of the new capital to their highest point; for a century it was the urban centre of the metropolitan province of the Caliphate and the heart of one of the greatest empires that the world has ever known.

The domination of the conquerors did not at first bring any changes in the life of the city since the Muslim element was no more than an infinitesimal minority; arabization was slow and Christians predominated at the court up to the reign of ʿAbd al-Malik. At this time the growth in the number of Muslim subjects provoked a reaction which caused Arabic to replace Greek as the official language of the administration. At the beginning of the dynasty, discipline, prosperity and tolerance were the order of the day, but later on civil strife culminated in anarchy and in the end of Umayyad rule. Troubles broke out in the city, fires increased in number, even the walls had been demolished by the time that Marwān II installed himself in his new capital, Ḥarrān, in 127/744.

The change of régime was reflected in the urban plan only by the erection of two buildings closely connected with each other, the palace of the Caliph and the mosque, which did not alter the general aspect of the city. Muʿāwiya was content to remodel the residence of the Byzantine governors to the south-east of the ancient *peribolus* on the site of the present-day gold- and silversmith's bazaar; it was called *al-Khaḍrāʾ*, 'the Green (Palace)'. This name must in fact have been given to a group of administrative buildings as was also the case in Constantinople and later at Baghdād. At the side of the palace, which under the ʿAbbāsids appears to have been transformed into a prison, was situated the *Dār al-Khayl* or Hostel of the Ambassadors. The Caliph Yazīd I improved the water supply by reconstructing a Nabataean canal on the slopes of the Djabal Kāsiyūn above Nahr Tawrā which was given the name of Nahr Yazīd which it still bears to-day. Al-Ḥadjdjādj, the son of the Caliph ʿAbd al-Malik b. Marwān, built a palace outside the walls to the west of Bāb al-Djābiya whose memory is preserved in the name of the district of Kaṣr al-Ḥadjdjādj.

It is to Caliph al-Walīd I that we owe the first and one of the most impressive masterpieces of Muslim architecture, the Great Mosque of the Umayyads. The Church of St. John continued to exist under the Sufyānids and Muʿāwiya did not insist on including it in the *masdjid*. The Gallic bishop, Arculf, passing through Dimashk about 50/670, noted two separate sanctuaries for each of the communities (P. Geyer, *Itinera Hierosolymita, Saeculi iv-viii*). Conversions grew in number and the primitive mosque, which was no more than a *muṣallā* situated against the eastern part of the south wall of the *peribolus*, became too small. ʿAbd al-Malik laid claim to the church and proposed its purchase but the negotiations failed. "By the time that Caliph al-Walīd decided to proceed with the enlargement of the mosque, the problem had become difficult to solve. There was no free place left in the city, the *temenos* had been invaded by houses and there remained only the agora where the Sunday markets were held. In spite of previous agreements, he confiscated the Church of St. John the Baptist from

the Christians, giving them in exchange, however, several other places of worship which had fallen into disuse". A legend which tells of the division of the Church of St. John between Christians and Muslims springs from an error in translation. Neither al-Ṭabarī (*Annales*, ii/2), nor al-Balādhurī (*Futūḥ*, 125), nor al-Masuʿdī (*Murūdj*, v, 363) mentions the division of the church. The text of Ibn al-Muʿallā which Ibn ʿAsākir and Ibn Djubayr have helped to spread, speaks of a division of the *kanīsa* where the Christian sanctuary adjoined the *muṣallā* of the Muslims. We must take the word *kanīsa* in a broad sense as meaning place of prayer, that is to say the open-air *ḥaram* of the ancient sanctuary (J. Sauvaget, in *Syria*, xxvi, 353) which can also be called *masdjid*. Fascinated by the plan of the mosque in which they hoped to discover an ancient Byzantine basilica, certain authors, of whom Dussaud is one, have stated that the Christian hall of prayer was divided between the two communities. Lammens admits, however, that the construction of the cupola must be attributed to al-Walīd. All those who have studied it on the spot, such as Thiersch, Strygowski, Sauvaget and Creswell, agree with only some slight differences of opinion in regarding the Great Mosque as a Muslim achievement. In 86/705, al-Walīd had everything within the *peribolus* of the ancient temple demolished (al-Farazdaḳ, *Dīwān*, 107-109), both the Church of St. John and the little chapel which stood over the three cubits square cript, in which there was a casket containing the head of St. John the Baptist (Yaḥyā b. Zakariyyāʾ). Only the surrounding walls made of large stones and the square corner towers were allowed to remain. In this framework, approximately 120 by 80 metres in size, the architects placed to the north a court-yard surrounded by a vast covered portico with double arcades. "Along the whole length of the south wall of the *peribolus*, extended in the same direction as that in which the faithful formed their ranks for prayer, an immense hall made a place of assembly for the Muslim community". In the middle was an aisle surmounted by a vast cupola. In the east the "*miḥrāb* of the Companions" served as a reminder of the primitive *masdjid*. In the west a new door, Bāb al-Ziyāda, was opened in the wall to replace the central portico which had been blocked up. "Finally, in the centre of the north wall a high square minaret showed from afar the latest transformation which had come to the old sanctuary of Damascus". The walls of the building were hidden in some places under marble inlays, in others under mosaics of glass-paste. The Great Mosque was built in six years and "by the vastness of its proportions, the majesty of its arrangement, the splendour of its decorations and the richness of its materials" it has succeeded in impressing the human imagination down the centuries. A Muslim work in its conception and purpose, it was to be "the symbol of the political supremacy and moral prestige of Islam".

Two new Muslim cemeteries were made in addition to that of Bāb al-Farādīs: the first was situated at Bāb Tūmā but the one in which most of the Companions of the Prophet were to lie was to the south of the city outside Bāb al-Ṣaghīr.

The ʿAbbāsid period.—ʿAbd Allāh b. ʿAlī, uncle of the new Caliph Abu 'l-ʿAbbās al-Saffāḥ, having put an end to the Umayyad dynasty, took Dimashḳ in Ramaḍān 132/April, 750 and became its first ʿAbbāsid governor. Umayyad buildings were sacked, the defences dismantled, tombs profaned. A sombre era began for the city which dwindled to the level of a provincial town, while the Caliphate installed its capital in ʿIrāḳ. A latent state of insurrection reigned in the Syrian capital. Under al-Mahdī (156-68/775-85) a conflict between Ḳaysīs and Yamanīs flared up into a vain revolt led by an Umayyad pretender called al-Sufyānī, with the support of the Ḳaysīs. Under the Caliphate of Hārūn al-Rashīd, the movement against Baghdād became more broadly based; in 180/796, the ʿAbbāsid ruler sent a punitive expedition under the command of Djaʿfar al-Barmakī. Order was only temporarily re-established and the authority of the ʿAbbāsid governors was continually being put to scorn. In an endeavour to restore calm, the Caliph al-Maʾmūn made a first visit there in 215/830, but the troubles continued. He made a second visit in 218/833, the year of his death. In 240/854 a violent revolt ended in the execution of the ʿAbbāsid governor of Dimashḳ, but troops of the Caliph succeeded in restoring order. Four years later the Caliph al-Mutawakkil tried to transfer his capital to the Syrian metropolis but only stayed there 38 days before returning to Sāmarrā.

In 254/868 a Turk of Bukhārā, Aḥmad b. Ṭūlūn [*q.v.*], was appointed governor of Egypt by the Caliph of whom he was no more than a nominal vassal. He seized the opportunity of the Caliphate's being much weakened by the successive revolts of the Zandj to occupy Dimashḳ in 264/878. His son, Khumārawayh [*q.v.*], succeeded him in 270/884 and continued to pay an annual tribute to the Caliph-Sultan in order to remain master of Egypt and Syria. He was assassinated at Dimashḳ in Dhu 'l-Ḥidjdja 282/February 896. In the course of the last years of Ṭūlūnid power, the Ḳarmaṭians [*q.v.*] appeared in Syria and helped to increase the centres of political and social agitation. The decline of the Ṭūlūnids and the growing activity of the Ḳarmaṭians who got as far as besieging Dimashḳ forced the Caliph to dispatch troops who reduced the Ḳarmaṭians to order in 289/902 and lifted the siege of Dimashḳ whose governor, Ṭughdj b. Djuff, a Turk from Transoxania, re-allied himself with the ʿAbbāsid general, Muḥammad b. Sulaymān, without difficulty, and as a reward was appointed governor of Egypt by the Caliph. In this country his son, Muḥammad, founded the dynasty of the Ikhshīdids [*q.v.*] in 326/938. Recognizing the nominal suzerainty of the ʿAbbāsids, the new dynasty went to the defence of Dimashḳ against the Ḥamdānids. In 333/945 an agreement was reached, the Ikhshīdids holding the town in return for paying a tribute to the masters of Ḥalab. When Muḥammad died at Dimashḳ in 334/946 chaos was born again both there and in Cairo.

The Fāṭimids [*q.v.*] replaced the Ikhshīdids in Cairo in 357/968. With their coming, first in Egypt and then in Syria, a Shīʿite Caliphate was installed which was the enemy of Baghdād. At the beginning of the 11th century, Dimashḳ was in a difficult situation; the Ḥamdānids were putting on pressure from the north, the Fāṭimids from the south, not to mention Byzantine movements, Ḳarmaṭian activities and Turkoman invasions. At one time the city was occupied by the Ḳarmaṭians but in 359/970 the Fāṭimids expelled them, not without causing a certain amount of fire and destruction in the town. The Fāṭimid domination only aggravated the situation for the city, where the Maghrabī soldiers in the pay of Cairo exasperated the population. It was a century of political anarchy and decadence. The riots sometimes turned into catastrophe, for the majority of the houses were built of unfired brick

with framework and trusses of poplar trees, and any fire could have grave consequences; such was the case in 461/1069 when one which broke out owing to a brawl between Damascenes and Berber soldiers caused serious damage to the Great Mosque and the city.

The Turkish domination.—A Turkoman chief, Atsiz b. Uvak [*q.v.*], who had been in the pay of the Fāṭimids, abandoned their cause and occupied Dimashk on his own account in 468/1076, thus putting an end to Egyptian rule. Threatened by his former masters, Atsiz hastened to strengthen the citadel and endeavoured to form an alliance with Malik Shāh [*q.v.*] whom he asked to help him. In reply, the Saldjūkid sultan gave the town in appanage to his brother, Tutush [*q.v.*]. He arrived in Dimashk in 471/1079, re-established order and got rid of Atsiz by having him assassinated. The era of violence continued. In 476/1083, Muslim b. Kuraysh besieged the city; the Fāṭimid aid which he expected failed to arrive and Tutush succeeded in setting the city free. He died fighting his nephew, Barkyārūk [*q.v.*], in 488/1095. His sons divided his domain. Riḍwān installed himself at Ḥalab and Duḳāḳ at Dimashk. The latter put the direction of his affairs into the hands of his *atabeg*, the Turk Ẓahīr al-Dīn Tughtakīn, who from that time on seems to have been the real ruler of Dimashk. His political position was a delicate one for he had against him the Fāṭimids, the Saldjūkids of Baghdād and, after 490/1097, the Franks as well.

On the death of Duḳāḳ (Ramaḍān 497/June 1104), Tughtakīn exercised his power in the name of the young Tutush II who died soon afterwards. From then on, the *atabeg* was the only master of Dimashk and his dynasty, the Būrids [*q.v.*], remained there until the arrival of Nūr al-Dīn in 549/1154. During the quarter of a century of Tughtakīn's reign, there was a remarkable improvement in the state of the city, both morally and economically. On his death in Ṣafar 522/February 1128, he was succeeded by his son, Tādj al-Mulūk Būrī. The Bāṭiniyya [*q.v.*], who had already made themselves felt in Dimashk by killing the Amir Mawdūd in 507/1113, redoubled their activities supported by the Damascene vizier, Abū ʿAlī Ṭāhir al-Mazdaḳānī. In 523/1129 Būrī had this vizier killed. This was the signal for a terrible massacre, the population, out of control, exterminating some hundreds of Bāṭiniyya. The survivors did not long delay their revenge; Tādj al-Mulūk Būrī was the victim of an attempt on his life in 525/1131 and died as a result of his wounds a year later in Radjab 526/May-June 1132. The two succeeding princes were also assassinated, the one, Ismāʿīl, by his mother in 529/1135, the other, Shihāb al-Dīn Maḥmūd, by his enemies in 533/1139.

In 534/1140 the military leaders brought to power the young Abū Saʿīd Abaḳ Mudjīr al-Dīn, who left the direction of his affairs to his *atabeg*, Muʿīn al-Dīn Unur. On the *atabeg*'s death ten years later Abak took over the power himself but was obliged to accept the guardianship of Nūr al-Dīn who finally chased him out of Dimashk.

The situation of the Būrids was not easy. Invested with their power by the Caliph, they defended an advance position on the road to Fāṭimid Egypt, while the replenishment of their grain supplies was dependent on two regions, the Ḥawrān and the Biḳʿa, which were threatened by the Latin kingdom of Jerusalem. It was necessary at certain times to negotiate with the Franks, while at the same time they had to account for this conduct to Baghdād. A new threat hung over Dimashk from the beginning of 524/1130, that of the Zangids, who at that time became masters of Ḥalab. In order to cope with them, the Būrids on more than one occasion obtained the help of the Franks, but as these last themselves attacked Dimashk in 543/1148, new agreements with them became no longer possible. The city was obliged to seek other alliances in order to safeguard its recently re-established economy.

Before Tughtakīn succeeded in restoring order, Dimashk had known three centuries of anarchy. Delivered up to the arbitrary power of ephemeral governors and their agents, the population lived under a reign of terror and misery. Hence the quest for security which haunted them determined the lay-out of its streets. They had to live among people whom they knew and who knew each other and be near to those who lived a similar kind of life. It was from this starting-point that they were able to make a new beginning in their corporate life.

The plan of the city, which had changed very little since Roman times, from the beginning of the 4th/9th century on became broken up into numerous water-tight compartments. Each district (*ḥāra*) barricaded itself behind its walls and gates and was obliged to form itself into a miniature city provided with all the essential urban constituents such as a mosque, baths, water supply (*tāliʿ*), public bakery, and little market (*suwayḳa*) with its cook-shop keepers; each had its own chief (*shaykh*) and group of militia (*aḥdāth* [*q.v.*]).

This breaking up of the ancient town was accompanied by a complete religious segregation since each community had its own sector of the city, the Muslims in the west near the citadel and the Great Mosque, the Christians in the north-east and the Jews in the south-east. The whole appearance of the city changed, houses no longer opening directly on to the streets. From this time on, there sprang up along the ancient roads of the city streets (*darb*) each of which served as the main thoroughfare of its own district and was closed at both ends by heavy gates. It branched out into little lanes (*zuḳāḳ*) and blind alleys.

Nevertheless there still existed in the city some elements of unity. These were the fortified outer walls which protected the town, the Great Mosque of the Umayyads, its religious and political centre where official decrees were proclaimed and displayed, and finally the *sūḳs* which, under the supervision of the *muḥtasib*, furnished provisions and manufactured goods. Commercial activities went on in the same places as in the Roman epoch. One sector was on the great thoroughfare with the side arcades and another on the street with the columns which, to the east of the Great Mosque, led from the temple to the agora. These highways had been completely changed. The arcades had been occupied by shops, the roadway itself invaded by booths, and in each of the commercial sectors there had developed a maze of *sūḳs*. One of the centres of the ancient Decumanus was the Dār al-Biṭṭīkh which, as in Baghdād, was the actual fruit-market, while not far from the ancient agora the Ḳayṣariyyas were much frequented. In these covered and enclosed markets, like civil basilicas based on Byzantine models, trade in valuable articles such as jewels, embroideries carpets and furs, was carried on.

When tranquillity returned under Tughtakīn, new districts were built, al-ʿUḳayba to the north, Shaghūr to the south, and Ḳasr al-Ḥadjdjādj to the south-west. At the gates of the city, tanneries produced raw

materials for the leather workers, two paper-mills functioned from the beginning of the 9th century, and many water-mills ground various fatty substances.

Of the period preceding the Būrids, the only monument which still exists is the cupola of the Treasure-house (*Bayt al-Māl*) built in the Great Mosque in 161/778 by a governor of the Caliph al-Mahdī.

During the reign of Duḳāḳ, the city's oldest hospital was built to the west of the Great Mosque, and there also in 491/1098 the first *madrasa*, the Ṣādiriyya, was constructed for the Ḥanafīs.

The first *khānaḳāh* of Dimashḳ, the Ṭāwūsiyya, once contained the tombs of Duḳāḳ and his mother, Ṣafwat al-Mulk, but the last traces of it disappeared in 1938. Intellectual activity and Sunnī propaganda developed in the city under the Būrids. The Shāfiʿīs had their first *madrasa*, the Amīniyya, by 514/1120, whereas the first Ḥanbalī one, the Sharafiyya, was not built until 536/1142. On the eve of Nūr al-Dīn's capture of Dimashḳ seven *madrasas* were to be found there but there was still none for the *madhhab* of the Imām Mālik.

Dimashḳ under Nūr al-Dīn.—A new era began for the city with the arrival of Nūr al-Dīn in 549/1154. In establishing his residence at Dimashḳ, this prince, already master of Ḥalab, set a seal on the unity of Syria from the foot-hills of Cilicia to the mountains of Galilee. For the first time since the Umayyads, Dimashḳ was to become once again the capital of a vast Muslim state, unified and independent. Nūr al-Dīn's politics imprinted his character on the city which assumed the rôle of rampart of Muslim orthodoxy as opposed to the Fāṭimid heretics and the infidel Franks. A recrudescence of fanaticism showed itself at this time; its one and only aim was the triumph of Sunnī Islam and all efforts were concentrated on the *djihād* [*q.v.*]. Great centre of the Sunnīs, its fame was heightened by a large number of new religious buildings, mosques and *madrasas*. Dimashḳ retrieved at this time both its military importance and its religious prestige.

Works of military defence were carefully planned and carried out. The surrounding city walls were strengthened, and new towers built, of which one can still be seen to the west of Bāb al-Ṣaghīr. Some gates such as Bāb Sharḳī and Bāb al-Djābiya were merely reinforced, others provided with barbicans (Bāb al-Ṣaghīr and Bāb al-Salām). A sector of the north part of the city wall was carried forward as far as the right bank of the Baradā, and a new gate, Bāb al-Faradj, was opened to the east of the citadel, while Bāb Kaysān to the south was blocked up. Nūr al-Dīn carried out works at the citadel itself, strengthening Bāb al-Ḥadīd and building a large mosque. Finally, in keeping with the military life of the city, two great plots of ground were reserved for the training of cavalry and for parades, the Maydān al-Akhḍar to the west of the the town and the Maydān al-Khaṣā to the south.

Religious and intellectual life was very highly developed and here two families played leading rôles, the Shāfiʿī Banū ʿAsākir and the Ḥanbalī Banū Ḳudāma who came originally from the now district of al-Ṣāliḥiyya, outside the walls on the slopes of the Ḳāsiyūn, in 556/1161. Places of prayer multiplied; Nūr al-Dīn himself had a certain number of mosques restored or constructed. An especially energetic effort was made to spread Sunnī doctrine and traditions and Nūr al-Dīn founded the first school for the teaching of traditions, the Dār al-Ḥadīth. There remain only ruins of this little *madrasa* whose first teacher was the Shāfiʿī historian, Ibn ʿAsākir. Other new *madrasas* were built, for the most part Shāfiʿī or Ḥanafī. It was at this time that the first Mālikī *madrasa*, al-Ṣalāḥiyya, was begun, to be finished by Ṣalāḥ al-Dīn. It was to the initiative of Nūr al-Dīn that we owe the construction of the great *madrasa*, al-ʿĀdiliyya, now the home of the Arab Academy. Begun about 567/1171, it was only finished in 619/1222.

Another new institution owed to Nūr al-Dīn was the Dār al-ʿAdl, which later on became the Dār al-Saʿāda. A high court of justice occupied the building to the south of the citadel; there, in the interests of equity, the prince grouped representatives of the four *madhhabs* around the Shāfiʿī *ḳaḍī 'l-ḳuḍāt*.

New forms showing an ʿIrāḳī influence appeared in Damascene architecture, notably the dome with honey-comb construction outside, to be found on the funerary *madrasa* of Nūr al-Dīn which was built in 567/1171, and in the cupola over the entrance to the *Māristān* whose portal is ornamented with stalactites. This hospital, one of the most important monuments in the history of Muslim architecture, was founded by Nūr al-Dīn to serve also as a school of medicine. An accurate inventory of the 12th century monuments of Dimashḳ is to be found in the topographical introduction drawn up by Ibn ʿAsākir for his *Taʾrīkh madīnat Dimashḳ*. By the end of Nūr al-Dīn's reign the number of places of worship had risen to 242 *intra muros* and 178 *extra muros*.

The Ayyūbid period.—In 569/1174 on the death of Nūr al-Dīn his son, al-Malik al-Ṣāliḥ Ismāʿīl, whose *atabeg* was the Amīr Shams al-Dawla Ibn al-Muḳaddam, inherited his father's throne. In Dimashḳ, where a powerful pro-Ayyūbid party had been in existence since the time when Ayyūb, father of Ṣalāḥ al-Dīn [*q.v.*], had been governor, plots were hatched among the amīrs. The young prince was taken to Ḥalab while Ibn al-Muḳaddam remained master of the city. To ensure its stability, the amīr negotiated a truce with the Franks, an agreement which upset one section of public opinion. The agents of Ṣalāḥ al-Dīn presented him as the champion of Islam and won over the population of Dimashḳ to their side. The former Kurdish vassal of Nūr al-Dīn took over the waging of the Holy War and entered Dimashḳ in 571/1176. During the years which followed fighting hardly ever ceased; it was the time of the Third Crusade and the Muslims were dominated by a desire to throw the Franks back to the sea. At last, in 583/1187, the victory of Ḥaṭṭīn [*q.v.*] allowed Islam to return to Jerusalem. Some months after having made peace with the crusaders, Ṣalāḥ al-Dīn, founder of the Ayyūbid dynasty [*q.v.*], died on 27 Ṣafar 589/4 March 1193 at Dimashḳ. Buried first at the citadel, his body was to receive its final sepulchre in the al-ʿAzīziyya *madrasa* to the north of the Great Mosque. After the sovereign's death fierce fighting broke out between his two sons and his brother. Al-Afḍal [*q.v.*], who in 582/1186 had received Dimashḳ in fief from his father, tried to retain his property, but in 592/1196 he was chased out by his uncle, al-ʿĀdil, who recognized the suzerainty of his nephew, al-ʿAzīz, successor of Ṣalāḥ al-Dīn in Cairo. Al-ʿAzīz died three years later and after lengthy disputes, al-ʿAdil was recognized as head of the Ayyūbid family in 597/1200. Under the rule of this spiritual heir of Ṣalāḥ al-Dīn there began a period of good organization and political

relaxation. Cairo from that time on became the capital of the empire but Dimashk remained an important political, military and economic centre. Al-ʿĀdil died near Dimashk in 615/1218 and was buried in the al-ʿĀdiliyya *madrasa*. Al-Malik al-Muʿaẓẓam ʿĪsā, who had been his father's lieutenant in Syria since 597/1200, and who had received the province in fief in 604/1207, endeavoured to remain independent in Dimashk, but the twists and turns of political life brought him at the beginning of 623/1226 to mention in the *khuṭba* the Khwārazm-shāh, Djalāl al-Dīn [*q.v.*], who thus became nominal suzerain of the city. When al-Muʿaẓẓam died in 624/1227 his son, al-Malik al-Nāṣir Dāwūd, succeeded him under the tutelage of his *atabeg*, ʿIzz al-Dīn Aybak. Very soon afterwards, the Amīr al-Ashraf arrived from Diyār Muḍar, eliminated his nephew, Dāwūd, and installed himself in Dimashk in 625/1228.

On the death of al-Kāmil, who had succeeded al-ʿĀdil in Cairo in 635/1138, there had begun a period of decline. Fratricidal disputes started again. In order to hold on to Dimashk, al-Malik al-Ṣāliḥ Ismāʿīl allied himself with the Franks against his nephew, al-Ṣalīḥ Ayyūb, master of Egypt. With the help of the Khwārizmians, Ayyūb was victorious over him in 643/1245 and once again Dimashk came under the authority of Cairo. Ayyūb died in 646/1248, his son, Turanshāh, disappeared presumably assassinated a few months later, and in 648/1250, the prince of Ḥalab, al-Malik al-Nāṣir Yūsuf, seized Dimashk of which he was the last Ayyūbid ruler. The Mongol threat was, indeed, now becoming more imminent; Baghdād fell in 656/1258 and less than two years later the Syrian capital was taken in its turn.

The arrival of Nūr al-Dīn had undoubtedly brought about a renaissance in Dimashk, but the circumstances of the reign of Ṣalāḥ al-Dīn had put a stop to the evolution of the city.

Progress began again under the Ayyūbids when Dimashk became the seat of a princely court. The growth in population and new resources which such a promotion implied had repercussions on its economic life, all the more appreciable since the calm reigns of al-ʿĀdil and his successor brought a peaceful atmosphere. This improvement in economic activity went side by side with the development of commercial relations. From that time on, Italian merchants began to come regularly to Dimashk. Industry took an upward trend; its silk brocades remained as famous as ever, while copper utensils inlaid or not, gilded glassware and tanned lambskins were also much in demand. The markets (*sūḳs*) stayed very active and at the side of the *Ḳayṣariyya*s, warehouses (*funduḳ*) multiplied in the town, while the Dār al-Wakāla, a depôt of merchant companies, gained in importance.

To strengthen their resistance against both family cupidity and the threats of the Franks, as well as to bring the system of defence up to date with the progress of the military arts, the Ayyūbids made changes and improvements in the outer walls and the citadel of Dimashk. The work on the walls was confined to the gates; Bāb Sharḳī and Bāb al-Ṣaghīr were strengthened in 604/1207 by al-Muʿaẓẓam ʿĪsā; al-Nāṣir Dāwūd rebuilt Bāb Tūmā in 624/1227; Bāb al-Faradj was reconstructed in 636/1239; lastly, al-Ṣāliḥ Ayyūb remodelled Bāb al-Salām in 641/1243, adding a square tower which may still be seen at the north-east corner of the walls. Complete reconstruction of the citadel, a piece of work which took ten years, was begun in 604/1207. A new palace with a throne-room was built in the interior to serve as a residence for the Sultan, while the military offices and financial services were installed in new locations there. The present-day arrangements, indeed, go back to this period and although the citadel was burnt down and dismantled by the Mongols, two of these 7th/13th century towers still remain almost intact.

The general prosperity allowed the Ayyūbids to practise an exceptionally generous patronage of writers and scholars. Dimashk at this time was not only a great centre of Muslim cultural life but also an important religious stronghold. The Sunnī politics of the dynasty showed themselves in the encouragement which its leaders gave, following the custom of the Saldjūḳids and the Zangids, to the propagation of the Islamic faith and of orthodoxy. Civil architecture flourished at this time also. Princes and princesses, high dignitaries and senior officers rivalled each other in making religious foundations and Dimashk was soon to become the city of *madrasas*; the number of these—twenty are mentioned by Ibn Djubayr in 1184/1770—was to quadruple in a single century. (On the Ayyūbid *madrasas*, see Herzfeld in *Ars Islamica*, xi-xii, 1-71). From then on, the *madrasa* with its lecture-rooms and its lodgings for masters and students, began, like the mosques, to be combined more and more often with the tomb of its founder (see, for example, the ʿĀdiliyya and the Muʿaẓẓamiyya). Linked with the funerary *madrasa*, there appeared also at this time the *turba* of a type peculiar to Dimashk. The mausoleum consisted of a square chamber whose walls were decorated with painted stucco, above which four semi-circular niches and four flat niches symmetrically placed formed an octagonal zone surmounted by a drum composed of sixteen niches of equal size upon which rested a sixteen-sided cupola. This was the typical way of erecting a cupola over a square building. The first example whose date we know is the mausoleum of Zayn al-Dīn, built in 567/1172. Among the monuments of this kind which can still be seen to-day are the following of the 6th/12th century: the Turbat al-Badrī, the al-Nadjmiyya *madrasa*, the al-ʿAzīziyya *madrasa* where the tomb of Ṣalāḥ al-Dīn is situated, and the mausoleum of Ibn Salāma, built in 613/1216. Most characteristic of Ayyūbid architecture is its sense of proportion; the buildings have façades of ashlar of harmonious size, and the alternation of basalt with limestone forms a decorative motif whose finest example, perhaps, is the Ḳilīdjiyya *madrasa*, completed in 651/1253. The dimensions of the cupolas are such that they seem to sink naturally into their urban background.

The 7th/13th century was one of Dimashk's most brilliant epochs. It had once more become "a political, commercial, industrial, strategic, intellectual and religious centre" and most of the monuments which still adorn the city date from this period.

The Mamlūk period (658-922/1260-1516).—A new phase began in the history of Dimashk when in Rabīʿ I 658/March 1260 the troops of Hūlāgū entered the city. The governor fled, the garrison was forced to retreat towards the south, the Prince al-Malik al-Nāṣir and his children were made prisoners. The Ayyūbid dynasty had come to an end. The invasion stopped at ʿAyn Djālūt [*q.v.*] where the Mamlūks, under the command of the Amīrs Ḳuṭuz and Baybars, put the Mongols to flight. These then evacuated Dimashk which was given by the powerful Kurdish family of the Ḳaymarī into the hands of the Sultan
